January 4, 2011

The Caddo Parish School Board (CPSB) met in special session in its office at 1961 Midway, Shreveport, Louisiana at approximately 4:40 p.m. immediately following the administration of the oath of office to all board members by The Honorable Pam Lattier on Tuesday, January 4, 2011 with President Lillian Priest presiding and the following school board members present being a quorum: Steve Riall, Jasmine Green, Willie Burton, Charlotte Crawley, Curtis Hooks, Mary Trammel, Bonita Crawford, Barry Rachal, Larry Ramsey, Ginger Armstrong and Dottie Bell. Also present were Dr. Gerald Dawkins, secretary, and Reginald Abrams, legal counsel. Mrs. Charlotte Crawley led the invocation and Pledge of Allegiance.

VISITORS

Jon Glover, employee, asked if board members reviewed the compensation plans to be equipped to address the needs of the support employees. She referenced the published list of the top 200 administrative personnel and the fact that it made her feel uneasy to see Caddo’s top boss at the head of the list. Ms. Glover stated that she looked at the survey and when seeing the injustice for support employees, she believed there had to be those support employees who gained significant increases and noted one support employee receiving $3,000 and another a $5,000 increase. She stated if the board had allowed the Arthur Anderson plan to remain in effect, all support employees would have been awarded an increase. Noting the new positions included in the budget, she said they average a total of $500,000, and asked for clarification on the statement that there was a savings of $800,000 by not giving support personnel an increase and $700,000 was paid for the newly adopted plan, leaving a net savings of $100,000. She further stated that if the new positions averaged a total of $500,000, she believes the board could have afforded an increase. Ms. Glover stated that she doesn’t believe this is good business and asked board members to consider all that has been done and who is directing the end result. She again asked if both plans were visited or researched in an effort to bring about fairness; and if not, she doesn’t believe the board will acknowledge what has been placed upon the employees as would the superintendent. She noted that the daily average salary of an administrator is $342.04 including benefits, and the $300 annually, not daily, that she was looking for is minute in comparison. She encouraged the board, if they have the slightest concern for Caddo’s support employees, that now is the time to let this be done. Ms. Glover also asked the board to revisit the study in addition to putting into progress an increase to insure that the support employees can swim and not sink.

ELECTION OF OFFICERS FOR 2011

*Mrs. Bell nominated Lillian Priest for President for 2011.* There being no additional nominations, the nominations closed. Mrs. Crawley announced that Board member Lillian Priest is nominated for president, and the vote for Ms. Priest carried unanimously.

President Priest announced that floor open for nominations for First Vice President. *Mr. Ramsey nominated Steve Riall.* Mr. Burton moved that nominations be closed, seconded by Mr. Ramsey, and the vote for Steve Riall for First Vice President carried unanimously.

President Priest announced the floor open for nominations for Second Vice President. *Mrs. Armstrong nominated Dottie Bell.* Mr. Burton moved, seconded by Mr. Ramsey, that the nominations be closed, and vote for Dottie Bell for Second Vice President carried unanimously.

AUTHORIZATION FOR PRESIDENT TO USE FACSIMILE SIGNATURE

*Mr. Burton moved, seconded by Mr. Ramsey, to authorize the president to use a facsimile signature.* Vote on the motion carried unanimously.

Adjourn. Mr. Burton moved, seconded by Mr. Hooks, to adjourn. Vote on the motion to adjourn carried and the meeting adjourned at approximately 4:55 p.m.

Dr. Gerald D. Dawkins, Secretary

Lillian Priest, President
The Executive Committee of the Caddo Parish School Board (CPSB) met in regular session in its office at 1961 Midway Street, Shreveport, Louisiana, at approximately 5:15 p.m. (following a special session of the CPSB and brief recess) on Tuesday, January 4, 2011 with President Lillian Priest presiding and Steve Riall and Dottie Bell present being a quorum. Other school board members present were Jasmine Green, Willie Burton, Charlotte Crawley, Curtis Hooks, Mary Trammel, Bonita Crawford, Barry Rachal, Larry Ramsey and Ginger Armstrong. Also present were Secretary Dr. Gerald Dawkins, Legal Counsel Reginald Abrams, staff and other visitors. The prayer and Pledge of Allegiance were omitted.

PRESENTATIONS

Financial Update. Superintendent Dawkins stated that last spring he, Mr. Lee and Caddo’s bond counsel attended a meeting with Standard and Poor’s in Dallas regarding our bond rating status in anticipation of any financial initiatives the district might pursue with Vision 2020. He stated that they will share the same information with the board this evening and asked the board to consider this baseline data on the evolving fiscal condition of the district. Dr. Dawkins stated that it will become clear very quickly that we must be focused and poised to do all that is necessary to assure the fiscal integrity of the school district. He said the changes in the state, local and national economic picture do not offer much comfort to school districts and municipalities anywhere in the state or nation. He further stated that, consistent with Vision 2020 and with a review of all policies, laws and procedures that govern the movement of students, the staff will share with the board plans to strengthen the fiscal conditions of the district; and the final recommendation for all future budgets, facilities and academic programs that are directly tied to our ability to manage the resources in hand as well as seek resources from other sources. Dr. Dawkins announced that beginning now, the board will more frequently receive financial data and strategies to address our greatest fiscal needs. He also announced that staff will send monthly financial statements to the board, and quarterly budget work sessions will be held. He said that the goal is to avoid disruption to the educational experience of the students through prudent and responsible financial planning and management. He encouraged board members to share their concerns and questions with staff and while some of the work will not be easy, it is necessary to insure that we meet the needs of students for many years to come.

Jim Lee, director of finance, reiterated that this same information was presented to Standards and Poor’s in an effort to get our bond rating increased. Mr. Lee shared with the board financial and statistical data and the November financial statement. Mrs. Crawley asked if anyone besides board members gets copies of this information, i.e. employee organizations? The superintendent stated that staff will make it available on line.

Mr. Lee highlighted the current poor economic outlook for the state with a forecast of a $1.5 billion to $2.0 billion shortfall. He reminded the board of Caddo’s budget cuts at the beginning of the past school year as well as mid year cuts, which we have not experienced in some time; and the fact that it comes to the district as a direct impact of the state’s condition. Because the district has been financially prudent in the past, Caddo has been able to absorb these cuts without any layoffs; however, as was mentioned in this year’s budget discussions, it was a difficult time to adopt a budget when we had to go into the fund balance to avoid any layoffs. He reported that in 2011-12, the district will be faced with some financial challenges.

He also shared with the board background information on how the district accounts for funds, highlighting the different fund types, i.e. General Fund, special revenue funds, and capital project funds as follows:

General fund – used to account for everything that doesn’t have to be accounted for somewhere else. Three major sources of revenue for the General Fund are ad valorem taxes, sales taxes, and the state MFP funding. In the year ending June 30, 2010, a net operating loss was reported for the first time in recent history in the General Fund, with most of this due to decreased MFP funds and increases in normal operations, i.e. salaries, fuel, etc., which caused an approximate $8.6 million loss and a dipping into the fund balance. Mr. Lee also reminded the board that the 2010-11 budget also dips into the fund balance even more because of the $30 million used in order to have a balanced budget, leaving approximately $4 million in the undesignated fund balance. This is only about 1% of Caddo’s annual expenditures, an amount that would only last about 4
days if the district found itself in a crisis situation; and this amount is no where near industry recommended guidelines of 10-15%. Mr. Lee also stated that Caddo currently does not have a fund balance policy as some districts do; however the district has strived to keep the fund balance in the 10-15% range. He also explained that reasons for dipping into the fund balance so heavily were because of the following that hit the district hard this year – large, extraordinary increase in retirement costs, increase in health care insurance costs (and additional requirements in the future), and decrease in State-funded MFP (second year in a row with no increase).

Mr. Lee further explained the difference in designated and undesignated fund balance in all reserves. The undesignated fund balance is the district’s savings account that can be used as long as a balance is maintained, and the designated fund balances are those the board has set aside for specific possible needs, i.e. fund for catastrophic property damage in the event of damage from tornado, for example. For the beginning of the 2010 fiscal year, these figures are $41 million for undesignated and $35 million for designated; and next month, when the auditors present this information, he reminded the board that they should not believe that is what’s in the fund when they see the $41 million because of the fact of using it this year, and that the balance is now actually $4 million. He also made the board aware that they will also see something they have never seen before when the auditors present their report and that is in the statement of net assets will reflect a negative because of the OPEB liability that must be accounted for on the financial statement, approximately $100 million annually.

He presented background information on the three main sources of revenue, explaining that the ad valorem taxes stay pretty stable and is based on property values in the parish, sales taxes stay fairly stable and noted the Haynesville Shale effect over the past five years, as well as the MFP funding and how student enrollment has affected this amount.

In highlighting expenditures, Mr. Lee stated that we have seen less than a 5% increase which is in the normal range, and explained that the state requires that 70% of this money must be spent in instructional areas, which we have always done and did so this past year with 76%. In looking at the budget for the coming year, Mr. Lee reminded the board that 85% of our expenses are in people (salaries and benefits). He also brought to the board’s attention that capital outlay and debt service reflect a large increase, which is mainly an accounting adjustment made by the auditors; and this was the first year the district had to make a payment on the QSCB Loan in excess of $1 million. He explained that under Central Administration, incentives paid to the Target Schools were budgeted in this line, and he also shared percentages spent in each area.

In the Superintendent’s request when he came to Caddo, he said staff began looking at some long-range planning for the district, and Mr. Lee reported comparisons in past years in the areas of ad valorem taxes, sales takes as well as MFP and enrollment numbers; and based on this information, he shared predictions for these areas. Mr. Lee also explained it is anticipated the State will revert back and begin giving the district the 2.75% growth MFP money again in a couple of years.

The special revenue funds, which include Title I and IDEA, and we are anticipating cuts next year. He also reminded the board that last year and this year we received stimulus funds (Title I, IDEA, Title 2D) which goes away at the end of this year with no indication that there will be additional stimulus monies in the future. It is also anticipated that Title I will be flat next year. The debt service fund is used entirely to repay outstanding General Obligation bonds, about $101 million outstanding at this time. He explained that this fund is funded completely by a tax millage and we set the millage each year to determine how much is needed to repay the debt with limits on how much we can build this fund up. He also explained that if the board and the public decide to issue additional debt, the district has a capacity of up to $508 million. He also reported that this past year was the first year the district did not issue any debt with the last election in 2004 that allowed for the issuing of bonds and currently we are spending what is left of these bonds to finalize construction projects.

Mr. Lee concluded his report by highlighting the CEEF (Caddo Education Excellence Fund) Fund that is used to account for the money the district receives from the two riverboats in Caddo Parish. He added it is a permanent trust fund and all the money deposited stays in the fund. We cannot touch the principal, which is currently about $16 million, but can only take the earnings each year and distribute to the schools to use for instructional enhancements. He reminded the
board that with the interest rates where they were this year, there was not a distribution to the schools, a decision made by the committee who decided to carry it over to next year.

Regarding the two charter schools, Mr. Lee reported that while they anticipated having approximately 1,200 students at these two schools, there is actually less than 800 at both schools combined. He also stated that we have not to date received any indication from the state that they are planning on taking any additional Caddo schools.

He also reminded the board that General Motors is scheduled to close the latest in 2012 and they are gradually scaling back; and if they shut down everything at one time, it would have had a tremendous impact on the district all at once.

Dr. Dawkins explained that he wanted to provide this information to the board so we are consistent as we move forward and address the big challenges ahead. He said these funds will be the resource for all the projects and educational programs in the system and it is important to strategically plan the resources available to us. He announced that the overwhelming majority of districts in Louisiana are faced with the same challenges. The superintendent noted the obligation and duty to the board and public to strengthen the financial conditions and this was a start in that direction.

Mr. Hooks asked Mr. Lee if he has a breakdown by schools as to how the money is disbursed and if he could get a breakdown of the funds for the schools in District 5. Mr. Lee said we currently do not have a financial statement. Mr. Hooks said this is not helping him at all and he wants to know what his schools are getting at this point. Mr. Lee said he can work on that information. Mr. Hooks said he wants to begin 2011 right and when he asks for something, he wants it. He said he wants staff to understand that the board doesn’t work for staff, but staff works for the board and when he requests something, he wants the superintendent to provide it. Dr. Dawkins explained that we don’t carry the information as Mr. Hooks requested it, but we can give him a budget for each of his schools. Mr. Hooks asked about the percentage of monies being spent in instruction and what does this mean? Dr. Dawkins referenced page 6 where it states 75%. Mr. Lee further explained that total instruction (what the state considers instructional expenditures) was 76% with the chart showing “pure” instruction at 60+% and when adding school administration and support services at the schools, it comes to 76%.

Mrs. Bell asked if it is possible for the board to meet with staff to explain this so she can fully understand certain terminology in this financial report? The superintendent said he will set up times to meet with board members.

Mr. Rachal asked about the approximate 800 students in the two charter schools and the state getting approximately $10,000 per student. Mr. Lee said that is what the state started off with based on last year’s numbers and there should be an adjustment at midterm based on the actual October 1 count. Mr. Rachal asked if there is a ballpark number? Mr. Lee responded that the last he heard there are approximately 200 at Linear and 300-400 at Linwood. Mr. Rachal reminded everyone that they started out with approximately $10,000 per student and the money they received was figured on 1,200 students, and he believes it will be difficult to get any of the money back (state and local). Mr. Rachal asked if, when Caddo gets back the credit, it will be according to the same chart we received MFP? Mr. Lee explained that what they have done in the past is take our average ($3,855 plus extras for at-risk, et.al. students), and this average times the number of students at the charter schools is what they reduce from Caddo’s amount and they do a similar prorating for the local revenue. Mr. Rachal asked about the General Fund comparison relative to revenue and he believes it is good for the public to see this. He also noted the additional expenditures ($23 million) for a total of approximately $41 million. Mr. Lee added that the expenditure amount should rise as a result of the increase in retirement cost this year (20% the district has to pay into the retirement system for every employee). For 2011, it will increase from 20% to 23% or approximately $4-$5 million, plus the increase in health care. Mr. Rachal also mentioned the ad valorem taxes because everyone local is contributing through paying property taxes, and with everything going on in real estate and wherever the construction is taking place is where he believes one will see an increase in contributions.

Mrs. Crawford asked if we will see this big of an impact again? Mr. Lee responded we will see the impact because we still have to carry this. Mrs. Crawford asked for clarification and is it this much plus? Mr. Lee reminded the board that the 2010-11 budget has approximately $30 million
budgeted for expenditures over revenue, and we will not be able to have only a $4 million reserve again, so it is necessary to build this up and have a fund balance for next year.

Dr. Dawkins announced that the budget process has begun, and the information presented will hopefully give board members a look at the larger picture of what we are looking at. Mrs. Crawford asked if the hits being projected are all of them. Mr. Lee responded they are the biggest ones.

Mrs. Crawley asked about the designated funds and if a list of what is in this fund total the $35 million is included in the packet of information? Mr. Lee said it is not, but is something he can provide. Mrs. Crawley asked Mr. Lee how this went down from last year to this year? Mr. Lee responded that most of it was a designated fund of approximately $16 million to be used in repaying the QSCB loan. Regarding Haynesville Shale, Mrs. Crawley asked how much money we are receiving from this? Mr. Lee explained that he can get a total amount of mineral income and what is in the works because it is broken out by Haynesville Shale and the other company. Mr. Lee further explained there are two aspects of mineral income – (1) lease bonus payments, which we have not received a lot from because most of our properties are already under lease, and (2) ongoing royalties which is dependent upon the price of oil and gas. Mrs. Crawley stated that she would like to receive a list of the designated funds.

Mr. Burton stated his appreciation for the thorough report and asked what effects will the cuts being made statewide and nationwide have on the amount given to the charter schools? Mr. Lee explained that based on the reports he has seen, they are affected the same way, and because of their enrollment, they will receive less.

Mr. Ramsey asked about the American Recovery and Reinvestment Act and the direct allocation of $4 million for 2010, which has been deferred to 2011; and if we have received any confirmation on receiving this? Mr. Lee said it is ours, but it depends on the plan we develop for specific needs, that meet the guidelines established for those funds, similar to the $17 million received last year. Using it for additional upgrades, enacting the facilities plan or some version of it, etc. are possibilities, but the district must have a plan. Mr. Ramsey asked if there is a timeframe for spending these funds? Mr. Lee responded it is three years and we must spend 95% of it during those three years.

Ms. Priest asked about special revenue (bonds) and our ability in the past to generate a lot of grant dollars. She said she believes there has been a significant reduction in our grant writing and receiving new dollars even though they would be specifically used in areas other than the General Fund, and asked if this is something we are currently looking into to boost those amounts? Mr. Lee said it would be a benefit because of those expenditures that are being picked up in the General Fund as opposed to having grant funds to pay them. Dr. Dawkins explained that we are aware that there are some dollars there, but the board should also be aware that many of the discretionary type grants have been blocked into some of the airtight pockets of money at the Federal level. Caddo, however, is stepping up its vigilance in this area, and Dr. Robinson is keeping an eye out for those opportunities on the state and local level. Ms. Priest said she believes there are some great opportunities at the Federal level. Mr. Lee added that once you get past the three big Federal funds – Title 1, IDEA and in the past, Title II, many are state grants and many have been cut or changed and is part of the reduction we see.

Ms. Priest noted the many businesses in the past that have come before the board for waivers on taxes and asked how this negatively affects the district. Mr. Lee reminded the board of information sent to the board last year from a company requesting a tax exemption and in the short term, and the definite effect depending on the amount of property taxes the company is paying. He said it also has offsets, because if that company leaves town, it will all be lost; but in a tax exempt situation, we lose a part of it for five to ten years only on new construction.

Mrs. Bell asked the superintendent and attorney why it is so hard to get information about the charter schools when Caddo has to release information on our district? She also asked what procedure would need to be followed to obtain information on the charter schools? She said she doesn’t believe it is fair. Mr. Abrams said it is certainly public information, but the question is will you get it directly from the State Department or from the charter school. Mrs. Bell said she does not want anything from Linwood or Linear, but she wants the information from the State Department just as they passed out Caddo’s information at a state meeting.
Mr. Riall asked Mr. Lee what is our total indebtedness at this time. Mr. Lee reported $100 million in General Obligation bonds, $19 million in QSCB for a total of approximately $120 million. Mr. Riall asked again how much debt can the school district assume? Mr. Lee reported the total debt capacity is approximately $600 million and you reduce that by the amount for General Obligation bonds. Mr. Riall asked Mr. Lee if he anticipates the district having to go into additional debt in the next few years in order to break even. Mr. Lee explained that these are for special needs and do not go in the operating cost of the school system.

Mr. Riall stated that he believes CPSB receives approximately 50% from property taxes and asked what percentage does Caddo get from the city property taxes or do they pay these taxes? Mr. Lee responded that if they are in the city, they do pay taxes to the school board.

Mrs. Crawford asked about the board-approved item in November to give back money to the Caddo Parish Commission. Mr. Lee stated he did not recall, but believes it was for roads.

ESTABLISH THE AGENDA FOR JANUARY 18, 2011 CPSB MEETING

Superintendent Dawkins highlighted items for the board’s consideration at the January 18, 2011 CPSB meeting and the following discussion ensued.

Approval of Legal Services, Dale Cox Individually. Mr. Abrams explained that Dale Cox is a long-term attorney for the CPSB and recently announced he will be leaving partnership in the firm of Bradley, Murchison to work with the Caddo Parish District Attorney. The firm is asking if the CPSB wishes to continue with Bradley, Murchison or allow the files to follow Dale Cox. Mr. Abrams said he notified them that the CPSB would meet and make that decision, but his recommendation will be that Mr. Cox continue to handle the work of the CPSB, because (1) he is an excellent attorney, and (2) we have invested a lot of time and effort in those particular cases, and he doesn’t want him to stop working on them. He further stated that he advised them that an RFP for legal services is being advertised and if their firm desires to continue to do work for the CPSB, they are free to submit a proposal at the appropriate time.

Mr. Rachal asked if we will only continue using Mr. Cox until he completes work on the files he currently is working on? Mr. Abrams said it is recommendation that if any new files come up, we will continue to use him. He said he has been one of the CPSB attorneys for 15-20 years and is a very experienced, efficient attorney. He said if the board desires, he will prepare the motion allowing him to take these files and continue to be an attorney on assignment as has been in the past, and he would like to continue to use him until the RFP process is complete. Mr. Rachal asked if there is a conflict with him working with the DA’s office? Mr. Abrams said it is not because the District Attorneys are typically allowed to have their own practice. He further added that if there was a case where the District Attorney had something adverse to the CPSB, he would not be able to assign it to him. The current cases Mr. Cox is working on include personal injury, student claims of injury, etc.

Student of the Year Program. Mr. Hooks said he has met with staff and Dr. Dawkins added that a team of staff members representing counselors, teachers, administrative, etc. will meet to review the student of the year process and determine a way to account for the numbers. He said the teacher part of the process has been around for some time, but there have been objections, so it will be completely reviewed and a recommendation brought to the board. Mr. Hooks said he will postpone this item until there is something to bring back to the board.

ADDITIONS

Mr. Hooks asked about discussion in the November 16th board meeting regarding the compensation study. Mrs. Armstrong explained that she believes what was requested was a review of the compensation study. Mr. Hooks asked if it is postponed until January, and Mrs. Armstrong said it was postponed until the first of the year. Mr. Hooks requested that this item be on the January 18th meeting agenda. Mrs. Armstrong asked if it is feasible to have this discussion begin on January 18. Dr. Dawkins stated that he prefers to have it in the work session setting prior to the board acting on it. Mrs. Armstrong said with what is being done with the financial statements and other information being discussed, she would recommend that it be on the agenda for the February work session. Mr. Hooks concurred.
Mr. Hooks stated that he has the names for the superintendent for the autism training.

Mr. Hooks also asked that Oil City Staff Conflict be added to the agenda. Ms. Priest asked Mr. Hooks to place this on his request sheet. Mr. Hooks said he is hesitant to place it on a request form, because he doesn’t get the requested information. Dr. Dawkins asked Mr. Hooks to let him know if he doesn’t get his answer and he will follow up.

Mrs. Crawford asked if the compensation study is on the agenda. Ms. Priest said no, but it will be added to the February agenda for discussion at the work session in February.

Mr. Burton inquired about the information he has previously requested for BTW.

Ms. Trammel asked what is being reviewed in the review of the compensation study. Ms. Priest said the superintendent will bring this information to the board ahead of time to review in February.

Mr. Hooks asked if this will be on the February meeting (compensation study)? Ms. Priest said staff will bring the information at the February work session.

CONFIRM THE CONSENT AGENDA

Ms. Priest announced that items 7.01 and 8.01 are the consent agenda. _Mr. Riall moved, seconded by Mrs. Bell, to approve the proposed agenda and consent agenda for the January 18, 2011 CPSB meeting as presented. Vote on the motion carried unanimously._

POLL AUDIENCE

Jon Glover, employee, asked if Mrs. Armstrong did not delay the conversation on the compensation study until January and is the board now saying that it is not prepared to discuss it because it didn’t receive adequate information, which again puts off the support employees because no one is addressing the issue that has continually been brought before the board? Why is the board giving this more time when a time constraint was placed on it? Ms. Priest reminded Ms. Glover that the board does not respond at this time, but the superintendent will provide her with an answer. Ms. Glover asked Mr. Lee about the reference to industry standards and what is the industry standard percentage for the designated funds? She also wants to know if there are emergency funds in the designated and undesignated funds.

Jackie Lansdale, Caddo Federation of Teachers/Support Personnel, brought to the board’s attention an issue with the block scheduling that they would like reviewed prior to entering the second semester to alter the floating Monday. Ms. Lansdale also asked the board to review teachers being asked to pull all the books from students prior to midterms in order to bar code them. She said she has never heard of this and this does not send a good message.

ANNOUNCEMENTS

As a point of information, Mrs. Crawley reminded the board about those employees who brought the concern and request relative to the AB block (Monday rotation).

Ms. Priest announced that the Intergovernmental Meeting is Friday, January 7th at 11:30 in the Sky Box at Independence Stadium.

Ms. Priest also announced that information is at the new board members’ stations (Mr. Hooks, Miss Green and Ms. Trammel) regarding the orientation meeting in Baton Rouge on January 12.

Adjournment. _Mr. Riall moved to adjourn, seconded by Mrs. Bell, to adjourn. Vote on the motion carried and the meeting adjourned at approximately 6:50 p.m._
The Caddo Parish School Board (CPSB) held a special work session in its office at 1961 Midway, Shreveport, Louisiana at 4:30 p.m. on Thursday, January 6, 2011 with President Lillian Priest presiding and the following school board members present being a quorum: Steve Riall, Jasmine Green, Charlotte Crawley, Curtis Hooks, Mary Trammel, Bonita Crawford, Barry Rachal, Larry Ramsey, Ginger Armstrong and Dottie Bell. Also present were Secretary Gerald D. Dawkins, and Reginald Abrams, legal counsel. Mrs. Crawley led the prayer and Pledge of Allegiance.

President Priest announced that today’s meeting is the first of three scheduled work sessions on the Vision 2020 Plan with additional meetings scheduled for Tuesday, January 11th at 11:30 a.m. and Thursday, January 13th at 4:30 p.m. She also announced that there is the possibility of additional meetings as needed. President Priest stated that there will be no recommendations brought at tonight’s meeting nor will there be any recommendations made to the board until all questions have been answered and all legal and policy related issues addressed. Ms. Priest announced that index cards are available on the sign in tables for those who have questions.

Ms. Larissa Brown, chief planner with Goody Clancy, shared with the board information on the Master Plan recently adopted by the Metropolitan Planning Commission. Ms. Brown explained that this was a process in which many public meetings were held and public surveys conducted to gain as much public input as possible. Things that people said they would like to see in the future included more development, direct and encourage more development inside the loop, revitalize downtown, those neighborhoods that have been challenged over the years in the inner city neighborhoods, and the desire to see the area become more “green” (parks, for example). Ms. Brown said two topics that are very much on everyone’s mind are economic development and jobs (which relate to education). The four big themes highlighted were (1) grow smarter, which means to shape growth and direct it inside the loop; (2) celebrate the uniqueness of this area (importance of downtown, landscape of the area); (3) invest in people (education, workforce development, jobs, human capital); and (4) invest in place (physical development, i.e. infrastructure, transportation, zoning, higher quality development, etc.).

Ms. Brown explained that the strategy for this plan is first economic development, setting goals and organizing better for attracting more jobs. When the jobs are there it will also be important to make sure the quality of life is where the people want to stay here, including the young people who grow up in the area.

Ms. Brown further explained that another aspect of education is what happens to school property in neighborhoods where school boards have made the difficult decision to close a school or dispose of property. She also stated the plan addresses structuring a system to where there is more community/neighborhood participation and communication when there is planning in different areas of the city. Ms. Brown stated that meetings were held with the superintendent regarding the Vision 2020 plan and it is hoped that in the future when the school board’s process is complete and implementation begins that the two plans can be integrated.

Superintendent Dawkins stated that the school system looks forward to working with the MPC as well. He reported that feedback from the community meetings was shared with board members prior to Christmas; and prior to moving into discussion, it is important to revisit the legal and procedural rules and the process that the district operates under; because whether real or imagined, what has been heard in almost every meeting has been that much of what we are or are not is because of how these policies, laws and rules have been applied over the years. Dr. Dawkins stated that the focus for today’s meeting will be student assignment policies and procedures, because these policies and legal requirements must be addressed before the Vision 2020 plan can be finalized. Planning for the future of the school district requires that everyone has a complete and consistent understanding of these policies, laws and procedures, down to the clear definition of terminology and complete understanding of their operational impact on our students, parents and neighborhoods. Dr. Dawkins announced that, as President Priest stated, several meetings have been scheduled over the next few weeks to address these important foundational questions and concerns, because it is important to be thorough and complete
on the policies that have brought the district this far and these policies may not be what defines the district’s future.

Attorney Reginald Abrams shared with the board the legal basis of all listed policies and the Consent Decree, transfers, magnet school assignments and Choice and how the system currently operates under the current set of rules. Mr. Abrams began by sharing that the Consent Decree began in 1965 when the parents of seven Black children filed suit against the school board seeking desegregation of the Caddo Parish Public Schools, (Jones v. CPSB). He explained that the U. S. Government intervened as a plaintiff and in 1973 the District Court ordered the school board to implement a desegregation plan. In 1976, the school board filed a motion to have the school system declared unitary which means that we created a system where all the vestiges of slavery have gone away, and dismiss the original suit, but the Government opposed the motion. He further explained that in 1977, the District Court ruled that the school board had fully complied with the 1973 court order desegregation plan and declared the system unitary, and dismissed the suit against the school board. At this point, the U. S. Government filed a motion to amend the judgment that interrupted everything, and basically stated they would not let the court ruling stand. In the meantime, Mr. Abrams reported that the United States and the school board entered into negotiations which resulted in the 1981 Consent Decree and all the school system has to do in order to comply, to be released, is be declared unitary.

He explained that amongst this was the establishment of magnet schools; and magnet schools were not super schools, but were intended to attract Whites into Black neighborhoods, to schools subject to closure. The order states that magnet schools were established in order to enhance the quality of education and bring a greater degree of desegregation of the schools. He also noted what happened in other districts that did not establish magnets for this purpose, and that Caddo’s flourished because people got behind these schools and placed programs in them with parental involvement.

Mr. Abrams also explained the M-M transfer established in the Consent Decree which allowed someone majority race (at a school) to transfer to a school where their race would be in the minority; and as a result, schools were desegregated through this process.

In 1990, Mr. Abrams reported the school board filed another order to say the school system complied with the Consent Decree; and this basically amounted to there was consent ordered and declared that the only areas Caddo had left to comply with were the M-M transfers, assignment of principals to schools, and the enhancement of programs in remaining one-race schools. Within this was a statement that actually terminated the Court’s jurisdiction over the magnet schools; and during this time, partial unitary status was not available. When the order was written, the previous general counsel believed that in order to comply with the Consent Order you could not allow the school district to go backwards. Because of this, the district maintained the system in place relative to magnet schools in order to make sure the schools stayed 50-50 or at least within the ratio. The “Spirit of the Consent Decree” meant that the intent behind the Consent Decree was in order to desegregate we would maintain those processes. One of the processes used in the magnet school enrollment was a separate list for Black and a separate list for White students to enroll in the school. Within that there was basically a separate score for White students and a lesser score for Black students which was a discrepancy that was challenged twice and the Court ruled that it was an appropriate manner to use to maintain the “Spirit of the Consent Decree” and maintain balance at those schools.

In 2002, Mr. Abrams reminded the board that a young man whose cut-off score was higher than many minorities that got into Caddo Middle Magnet; and as a result he alleged there was a violation of racial discrimination. At the time, the District Court ruled in Caddo’s favor and it was appealed to the 5th Circuit in 2005 with a ruling that the “Spirit of the Consent Decree” could no longer be used. Mr. Abrams stated that the nation has come a long way, and when looking at the administration at the time, now it is how will we deal with desegregation that has changed a lot. Attorney Abrams explained that at this time, the school board moved forward and changed its policies without using race at the magnet schools and only using diversity factors at the elementary level. He also said that the opinion from the Cavalier case stated that Caddo Parish was basically released and the only areas in which the court has control at this time are the
enhancements to the traditional one-race schools and the fact that the principals cannot be aligned to the race of the school.

Mr. Abrams said these are the only areas in which the Justice Department has control and the district has always been able to move forward and change lines, change schools, close schools with the question always being to the Justice Department whether they would mind the district moving forward and doing it without holding us out of compliance. In the last couple of years, the main thing to realize is when the court system is overseeing everything, the board’s hands virtually are tied by telling you the Courts are taking over running the schools and that they do not care how the schools are run as long as race is not used as a base in making determinations.

Relative to policies, Mr. Abrams noted the M-M transfer which is imposed by the Federal Government and one that we cannot get out of, and once approved, a student can stay in that school until graduation unless the student gets in trouble. He added that hardship, curriculum, and medical transfers were also a part of the Consent Decree, but noted that these could have been used to get around desegregation. He said the district has maintained medical and hardship transfers; and he doesn’t believe the Courts are real concerned about this area as long as there is not a substitute to try and racially segregate schools, and were put in the Consent Decree to keep people from getting around the rules and are important to the day-to-day function.

Mr. Abrams also explained the rule that is under returning to neighborhood schools for conduct violations; because if a student has four out-of-school suspensions in one school year that student will be kicked out of the magnet school and returned to the neighborhood school. It also states that if there are no problems for two full semesters, the student can apply to return on one of the possible transfers. In elementary, one of the first preferences is “sibling preference”, which gives siblings first preference as long as they meet the bottom cutoff score for the school which could mean they will get in before students that score higher. The next criteria is based on test scores, followed by a diversity criteria (qualifying for free lunch, Medicaid, Chips, disadvantaged, homeless, Section 8 housing, Head Start). He added that the same criteria is followed for K-8 schools and middle schools using sibling first preference, followed by test scores without regard to race.

Attorney Abrams said the board also does not have control over Choice because once told you have to offer Choice for a school because the school they are attending has been named an Academically Unacceptable school, students can make the choice to attend another school that does not have the AU label. He explained that NCLB, of which this is a part, is their intent and No Child Left Behind’s intention is to close a school. Choice is the main factor being imposed on the district by Federal law and it is the superintendent’s goal to get out of Choice or close the school; and if the board makes a decision to close a school, the school is no longer in the equation. He re-highlighted that the statute that established Choice was designed to force students out of the schools labeled Academically Unacceptable and if they don’t leave, to put more money in the schools and see if the schools standards can be raised.

Attorney Abrams reiterated that the sibling preference is not a rule that the board must keep, even though it may want to; and it does not have to keep magnet schools, but would probably want to keep them to avoid flight from the school. He also stated that M-M transfers must be kept in place unless the district gets the Justice Department to remove it from the Consent Decree, which he believes could be shown through the programs used to enhance Booker T. Washington. Another issue deals with the schools and identifying administrators with the school-population and he is uncertain that this is still the law or if the Justice Department would even oppose this.

Superintendent Dawkins added that moving forward with Vision 2020, the plan must be reflective of current and legally sound policies and practices and we will not create a plan that does not meet the legal requirements of the law.

President Priest announced that the process will be each board member will have the opportunity to ask two questions initially and then additional questions may be asked.
Mrs. Bell asked for clarification on a curriculum necessity transfer? Mr. Abrams responded that he did not say it was a mandate of the Consent Decree, but that within the mandated M-M transfer, they allowed that the district could continue to have curriculum necessity, medical necessity and hardship transfers. Mrs. Bell said she believes, if it is not part of the M-M transfer, it should be out. Mrs. Woodard explained that when this was voted in years ago, it was created because there may not have been a Chemistry teacher in North Caddo Parish and at that time, the district did not have Distance Learning, Virtual Learning, etc. She stated she hears that children attend Byrd because of this and she believes if every school offers the same subjects, there will not be a need for this type transfer. Mrs. Bell asked about the reference to the racial makeup of a school and if this is checked at least every 5-6 years? Mr. Abrams responded that it is checked every year.

Mrs. Armstrong noted that this has been touched on many times and asked Mr. Abrams if there would be a benefit in pursuing unitary status at this point, and if so, will we need to go through this process before we attack some of the other problems? Mr. Abrams responded that this is a question for the board and the community, because he believes the Justice Department will respond based on how everyone feels about it. At this time he doesn’t believe being held under the three areas really matters a lot even though it did prior to Cavalier because of the dual list, a list based upon a test that has not been changed in a number of years. Since that happened, the test changed every year and the test scores are now the same among Blacks and Whites, with more parity among the scores. Mr. Abrams said at this time, he doesn’t know if M-M transfers really matter a lot, but the only thing the district is being held to is the M-M transfers. The question is, is it worth getting the community’s support to say we don’t like what is going on in the schools and get the Justice Department stirred up to oppose it. If so, this could cost the district a large amount of money to litigate. Mrs. Armstrong stated that was her reason for asking the question about the benefit for filing unitary status and Mr. Abrams added he believes the past is behind us. Mrs. Armstrong asked if this will prevent the district from moving forward in this process? Mr. Abrams said he doesn’t believe it will, but the potential is that someone could attempt to make a claim; even though the last time this was done, the Courts ruled the Justice Department said it could protect everyone which is what happened in 2000 when people filed for it to stop, and the Justice Department said they could not and threw out the case.

With the makeup of the board and its power and ability to make decisions equally, Mr. Abrams said this will go a long way in how the district is operated in the future. Mrs. Armstrong asked if it is the attorney’s opinion that the board should leave this issue alone? Mr. Abrams said the last time it came up, staff asked but they were slow to respond. Mrs. Armstrong stated that is fine because it will not inhibit the board from doing anything it might choose to do in this process the district is following at this time. Mr. Abrams stated as long as we are not doing anything based on race or anyone alleges that what we are doing is based upon racial makeup at a school.

Mr. Rachal stated he believes he has a little better idea of the process we must follow to envision the Vision 2020 plan. He also expressed his thanks to Superintendent Dawkins for having the guts to delve into it and address it publicly. He noted that sometimes money is not always the answer and he is asking his questions because the school in his district is losing 400-600 students to the magnet program, and he would like to know how the magnet schools are hurting the neighborhood schools. Mr. Rachal asked what affect are the magnet schools having on the neighborhood schools, what is the impact? Mrs. Woodard responded that staff has been running the data and will provide the detailed information to the board as soon as it is compiled. She added that we are really pulling more from the private sector than from the other public schools and finding that in neighborhoods with a large number applying to Caddo Middle Magnet, for example, that if they go into Middle Magnet – fine, but if they don’t go in, they are going private. She said she believes we are pulling approximately 8-10% of the students from University to test for magnet and maybe 10% of them get in. Mrs. Woodard added that she doesn’t believe the impact is as great as the talk, but more solid numbers will be coming in the next few days.
Mr. Rachal said it seems as though removing a child from magnet and putting them back in the neighborhood school is punishment and he doesn’t want this viewed as punishment, but that getting into a magnet school is a privilege and is a loss of that privilege if placed back in the neighborhood school. He asked how many M-M transfers are there? What affect do they have on the schools? What is the cost? What are the positive impacts vs. the negative impacts of being declared unitary or being removed from the Consent Decree? He said he is looking for this information from a benefit analysis basis, because he believes there could be some negative impacts and he would like to know this before moving forward.

Miss Green asked Mr. Abrams to clarify further the discipline policy for magnet schools. Mr. Abrams responded that if any student in a magnet school has four out-of-school suspensions, they will be eliminated from that magnet program and returned to their neighborhood school. He further explained that the board imposed this approximately two years ago that students have this as a privilege and this is a penalty provision to make sure they act right. He said it also includes expulsions from magnet schools and students could go back to the magnet school, because within the contract, the principal can allow students to stay or not. Miss Green asked what policy applies to the neighborhood school. Mr. Abrams explained that the discipline policy is followed and four out-of-school suspensions mean they are sent to an alternative school.

Mrs. Crawford asked about Choice and M-M transfers and the list of schools that qualify and the overcrowding issues at schools such as University and Walnut Hill. She asked if there is a limit as to what a school can take relative to the transfers? Mr. Abrams explained that the statute under Choice does not allow for capacity as a defense. If you run out of capacity, they allow for the district to contract with charters, other school districts, etc. with the intent to eliminate the school that is not performing. In Caddo there are some schools that were a lot larger than they once were and if we go down the capacity issue, we have to refer to real capacity. Kathy Gallant shared with the board information on School Choice and the Federal Regulations. Relative to capacity, she explained that it basically says they don’t care if we don’t believe we have the physical capacity, because it states that students enrolled in an AU school must be given a Choice transfer and they even offer possibilities for districts who do not believe they have the physical capacity.

Mrs. Crawford requested clarification on homeless students and that a child living with their grandparents and considered homeless, does not have to changed schools if they move back to their parents’ house. Mrs. Woodard explained that homeless is Federal and their guidelines are very strange and strict; but a child considered homeless could be living with a grandparent and if the grandparent moves, the child moves with them and they may choose to keep the child in their previous school. Mrs. Parker responded that if a parent wants their child to return to their school of origin, they have that right and the district is obligated to provide the necessary means to get the child to that school. Mr. Abrams further explained that they do not want the stigma of “homeless” so they do everything possible to accommodate that student and family.

Mr. Riall asked Mr. Abrams about the student handbook and the section on schools that qualify for M-M transfers and noted the fact that the schools listed are those set up to receive Black children into predominantly White schools. He asked if there are any schools set up to receive the reverse? Mr. Abrams said there is supposed to be and it so states for minority races and there should be one going in the opposite direction. Mr. Riall asked Mr. Abrams if he understands that when the magnet program was established that it was established as part of the Consent Decree also? Mr. Abrams responded that is correct. Mr Riall asked about principals and staffs being required to recruit aggressively to bring students into that magnet area? Mr. Abrams said that was correct. Without totally doing away with magnet schools, Mr. Riall asked if it is possible that the board could change the recruiting policy? Mr. Abrams said that is possible because the magnet schools have been released from the Consent Decree and the board can make that decision.

Mr. Hooks asked Mr. Abrams if there is a policy for schools that says you can’t have all White administrators and staff, or all Black administrators and staff at a school? Mr.
Abrams said there is not; and referencing when this began, it was part of the Consent Decree and you could not identify a school as being one race. They thought the best thing to do then was to mix the administrators up and he doesn’t know that this is a point any more, mainly because of how things have changed since 1965 and how people are identified. He said we do not use that criteria in selecting administrators, but we use a race-neutral process, and the board changed the policy last year on how this is done to make sure race does not enter the picture. Mr. Hooks stated that the district might not discuss race, but it sure is a problem and asked why do we have White principals from North Highlands to the Texas line and no Blacks? Mr. Abrams responded that the process utilized for applying for jobs and positions is race neutral and is not a part of the application process, nor is it an appropriate question to ask anyone when they are interviewing for any job. At this point, Mr. Abrams said he believes our biggest argument with the Justice Department is that we have minority administrators making decisions from the superintendent down. Mr. Hooks said he believes the members of the interview committee know.

Mr. Ramsey asked Mr. Abrams if we should pursue release from the Consent Decree, because it appears that recent rulings would be a plus and another argument would be how this administration has handled the AU school situation with the budget incorporated and put into place for these 10 schools, along with the enhancement of Booker T. Washington. Mr. Ramsey also referenced the diverse magnet program at Southwood that began with 40 students and 16 students graduated in the first class. Because of this, he doesn’t understand why the hesitation. He said he doesn’t believe there are that many M-M transfers, because the implementation of the Caddo Plan has taken care of these. He asked if these are not all good points for moving in that direction to eliminate this? Mr. Abrams said in a vacuum, he would say yes; but in the community, he doesn’t know and is a decision the board will need to make. As an attorney, he believes the district has a very good chance based upon what has been done in the amount of time it has taken. He reminded the board that a lot of local persons brought the initial action and may be a good place to start. He said he doesn’t believe the Consent Decree provides any benefits to minorities getting into schools they may have had difficulty getting into before and we are seeing testing procedures that show them equal across the board and this is the only advantage he saw since he has been board counsel to having the Consent Decree in place.

Mr. Ramsey referenced unitary status in the documentation shared with the board and the use of the term dual and that document resulting from the Cavalier case has brought the elementary and middle magnet programs into a new status, because we do have more diversity than we have ever had. Mr. Abrams shared his agreement and stated that the testing prior to Cavalier was not fair testing, but after the Cavalier case and the determination as to how testing was done and the modifications, it is now fair across the district, and discrepancy between scores of those taking the test is not seen. Mr. Ramsey also asked the superintendent if there is something we can do relative to policies to place a cap on those programs that are not pure magnet? The superintendent responded that is the reason for this process and he believes from this will come some policy changes since he will not bring a plan to the board without considering what has been discussed. Mr. Ramsey said he doesn’t believe the magnet schools are the problem for his schools, but it is the curriculum transfers.

Mrs. Crawley stated that in theory she agrees with No Child Left Behind because no child should be left in a school that is not meeting his/her educational need. She asked if it is possible with Choice to create new schools with separate faculties within the physical site of the school identified for school improvement, corrective action or restructuring (Choice Academies within AU schools)? Dr. Dawkins responded that it is possible to have schools within schools and is an option to be explored. Mrs. Crawley stated that Choice really affects both schools, the school the child leaves by limiting programs because of the reduced enrollment and the school they transfer to because of the overcrowding situations. Mr. Abrams reminded the board that this does not eliminate Choice, and Mrs. Crawley asked don’t we assign the students? Mr. Abrams said we do not, but they are given options. Kathy Gallant explained that Federal Law states we must offer the students at least two choices. She added staff has looked at this option in the past and the con is you must have a separate administration and separate faculty, so when you talk about being able to keep a music program, this doesn’t keep the program there,
because the school’s students would not be able to attend any of the classes the Choice students attend. It has to be a totally separate school within the school and no bleeding over. Mrs. Crawley asked if these programs could be after-school programs? Dr. Dawkins responded that these are the implications that must be looked at when trying to establish a separate school. Mrs. Crawley asked the superintendent if he or any staff members are familiar with an open enrollment policy district wide? Dr. Dawkins stated that this is done in Seattle and when it gets to a capacity issue, it becomes an issue of where to place the remaining students, which can result in some interesting dynamics. Mrs. Crawley stated if we looked at something like this, then Choice might be taken care of. Mr. Abrams informed the board that Seattle has had a lot of litigation over this issue.

Mrs. Trammel stated that in 1965 the school system began with this change and since that time a lot of magnet components have been put into place and she asked how is a magnet component measured to determine if it is working? She cited the example of the magnet component at Booker T. Washington (telecommunications) and why this has not attracted more students? Mrs. Gunn stated that when options are offered to parents, they choose which one they want and is something we don’t have control over. Mrs. Trammel asked for clarification on the tool used to measure a magnet component’s success. Mrs. Gunn responded that she does not believe a thorough evaluation of these programs has been done. Dr. Dawkins stated that in his review of the information, he believes there is an inconsistency in the entry requirements and this is an opportunity to also look at this for a formal evaluation. Mrs. Trammel also asked since households are in these districts, where are the students (BTW and Woodlawn)? Dr. Dawkins responded that because of the options for students to attend schools outside of their neighborhood school, students from these districts are attending schools all over the parish.

Ms. Priest directed her question to the board, asking if we, as a board, are prepared to work with LSBA and our Congressional Delegation to repeal No Child Left Behind; because if this repeal occurs, then Choice would go away. Ms. Priest also inquired about the curriculum transfer and asked that all curricula in the high schools be evaluated to help eliminate this transfer, especially when they are requested for basic courses. Dr. Dawkins responded that it is the desire that all children have available to them all courses available at other schools, and we have the use of technology to make this happen; and there should not be a high school in the district that is not offering a comprehensive set of courses at every level.

Kevin Fortson, visitor, thanked the board for a job well done, but concerning the Vision 2020 plan, he believes everyone’s comments and concerns have been recorded; however they still feel like the board is hearing, but not listening. He said it is believed that the community meetings were held to give the appearance that they have a voice and the board is concerned, when they really don’t have a voice. Mr. Fortson said they need to be heard and their emotions not suppressed. He said if the board is hearing, then board members will vote the voice and cry of the constituents, and the children and families of Mooretown, Queensborough, Lakeside and the MLK area that have been strategically neglected long enough. Mr. Fortson said if the board uses its vote to offline, close, tear down or destroy any of the taxpayers’ property in these communities, then they expect no less than state-of-the-art technology, technologically advanced, and the best teachers Caddo Parish has to offer with pay incentives to attract them. Stating that attending a magnet school is a privilege, he believes that privilege is the foundation for segregation. Mr. Fortson also shared his problem in trying to get his children enrolled in the public schools from a private school and the fact that even though he lives down the street from Judson, his children cannot attend Judson. He also stated that in the attorney’s description of the magnet process and the intent to draw White students into Black communities, he believes the district made a mistake by putting magnets in every school.

Brenda O’Brock, visitor, encouraged the board to be careful in the Vision 2020 plan to not run any more citizens out of Caddo Parish. She stated that when working in the Bossier Parish School System she realized the number of people that leave Caddo and go to Bossier, and her belief that the district is shrinking because things (electives) were requested, but denied. She asked the board to keep its eyes open, to do the research and listen to the people who are attempting to lift the schools that are failing. Regarding Vision 2020, she noted comments from Ms. Brown with MPC about the need to invest in
people and encouraged the board to do so and not invest in buildings. She reminded the board that many of Caddo’s schools do not have the books they need, the supplies they need, many students come to school hungry and asked how the board believe that $700 million in new buildings will fix this. She encouraged the board to do great things with what we have.

Mrs. Bell asked someone to explain a hardship transfer? Ms. Everett explained that when someone requests a hardship transfer, staff takes all diligence in determining the ability of the hardship. She said hardship requests usually apply for younger children, for parents needing their child to be closer to their work, or because a parent’s work schedule means they must depend on someone that may live in another school zone or a day care to provide childcare before and after school. Mrs. Bell said she realizes we can’t do anything about M-M transfers, but asked if it is possible to remove hardship and curriculum necessity transfers in an effort to return some of the students to neighborhood schools?

Mrs. Crawley asked about the possibility of those living within a certain radius of a magnet neighborhood school being able to test for entry the same as siblings?

Mr. Hooks stated that he did not get an answer to his first question relative to why there are all White principals from North Highlands north to the Texas line. Dr. Dawkins stated that Mr. Abrams responded to the legal aspect and that race is not a factor in deciding on principals; and while he has not had occasion to assign principals in those schools, he assured them that he is looking for the best principals for a fit. Mr. Hooks asked if he understands that the superintendent doesn’t have any qualified Blacks? Dr. Dawkins said he did not say that, but that he is looking for excellent principals. Mr. Hooks asked about the assignment at Blanchard, and Dr. Dawkins said yes and he believes the best candidate was placed there. Mr. Hooks asked if racism is the biggest issue for why we have Vision 2020? Dr. Dawkins responded that the information is the school district’s history and all the remedies that have brought the district to where it is now. He said the system is a majority African-American school district and Vision 2020 is an attempt to give every child a quality education.

Mrs. Crawford stated that she believes BTW has the same problems as Broadmoor Middle Lab, and that is perception of not being safe and not able to get a good education. Mrs. Crawford asked how we can change the perception in the schools and cited the success at Mooretown and Oak Park?

Mr. Rachal asked about the possibility of routing magnet students’ scores back to their neighborhood schools; and if this is possible, what would be the impact? Mrs. Woodard explained that the accountability commission originally established that the district could decide to make a school routing or not when this began in 1997. After 10 years, it could change and in 2007-2008, a district decided it would route the scores from the magnets back to the neighborhood schools. Because BESE believed this was an effort to circumvent the accountability system, BESE changed the guidelines stating that magnet school scores could not be routed anywhere. Mr. Rachal asked if we could find out what the impact would be, if any, on our neighborhood schools. Mrs. Woodard said it can be done, but it will require some extensive calculations that may take weeks to complete. Mr. Rachal asked that a summary be put together of all the questions and responses of board members.

Mrs. Armstrong addressed why we have hardship and curriculum transfers in place. She shared the example of Huntington’s Law Magnet component that includes a court room and a law library; and if she understands what is being said, the same would need to be in every high school if a curriculum transfer to Huntington is disallowed. She said the same is true for the Engineering Magnet Component at Captain Shreve. Mrs. Armstrong also said if we do away with hardship transfers, it will create a hardship for some parents relative to before and after school child care.

Mr. Hooks stated he accepts the profound answer given by the Superintendent; but given the fact that we are being asked to keep BTW and close Fair Park when the community
and alumni support sending their children to Fair Park and BTW seems to be lacking, he wants to know how we can get Whites to buy into Black non-magnet schools?

Mr. Ramsey asked what are we going to do to address the competition we have, i.e. private schools offering leadership scholarships? He believes virtual classrooms are an answer if we don’t address the product we are offering our schools. Dr. Dawkins responded that part of Vision 2020 is to enhance the educational programs and the goal has to be to make all our schools great schools. He said the curriculum has to be strong, the environment has to be safe, the staff has to be top-notch and we have to do a better job of selling what we have. Mr. Ramsey added that he doesn’t believe dismantling the magnet program is how to do this and asked if the superintendent has any plan to do so? The superintendent stated that he has no plans to dismantle the magnet program.

Ms. Priest asked about M-M transfers and that we provide transportation only when they transfer to the school closest to their current attendance zone. She asked if we are adhering to this transportation clause, because she believes not. Dr. Dawkins stated that transportation is another huge part of this along with the policies that dictate transportation as well as laws and the practices that we have put into place. Ms. Priest also addressed the marketing and perception of our neighborhood schools and asked about plans to improve and increase the marketing of all schools, because neighborhood schools are not adequately marketed as it relates to curriculum, conflict resolutions, etc. She said it is not the school’s responsibility on a day-to-day basis to market their school. Dr. Dawkins responded that staff will share with the board the marketing plan.

Ms. Priest thanked everyone for coming and announced that two additional meetings are scheduled, with the possibility of more being scheduled. She also asked if anyone filled out an index card with questions to please turn it in so staff can respond.

The meeting adjourned at 7:07 p.m.
The Caddo Parish School Board (CPSB) held a special work session in its office at 1961 Midway, Shreveport, Louisiana at 11:30 a.m. on Tuesday, January 11, 2011 with President Lillian Priest presiding and the following school board members present being a quorum: Steve Riall, Jasmine Green, Curtis Hooks, Mary Trammel, Bonita Crawford, Larry Ramsey, Ginger Armstrong and Dottie Bell. Also present were Secretary Gerald D. Dawkins, and Reginald Abrams, legal counsel. Mr. Riall led the prayer and Pledge of Allegiance.

President Priest announced that today’s meeting is an opportunity to continue dialogue that began last week on Vision 2020 and there will also be a time for visitors to make comments relative to the Vision 2020 plan.

Dr. Dawkins stated that these meetings were scheduled to have necessary dialogue on last week’s overview of policy issues as well as the packet information shared before Christmas on input from the community forums held in the fall. He announced that staff is still working on questions and issues raised last week, because these are legal, policy and procedural issues and will bring answers and additional information to the board.

Mrs. Bell reiterated her comments about the hardship transfers and she wants to really look at the reasons for requesting hardship transfers and see if those requesting them are not doing so just because they like that particular school rather than a legitimate hardship reason. She said the same is true for curriculum necessity; and if we are going to make everything equal (what is needed in order for a student to graduate), we need to make sure that the main courses are taught in every elementary, middle and high school. Mrs. Bell stated that it’s also important for the employees to feel good about their school and not talk negatively about their school. She said she believes academics will push Vision 2020 and we must make sure the curricula are the same. Mrs. Bell asked staff how many students actually live in each School Board Member’s District? Dr. Dawkins responded that staff had this discussion this morning and hopes to more definitively determine the number of students that attend Caddo schools, those who don’t and attempt to track those students in each district relative to the attendance they live in and where they attend school. He said in the past, the district has not had the best system to determine this information; however, the district is moving in that direction.

Mrs. Crawford asked for clarification and that she understood that every school had the basics, i.e. English, Math, Sciences. She said when Northwood wanted to offer Algebra II or Geometry to a minimum number of students requesting it, it was done through Distance Learning through Byrd High School and students were even able to interact with the other students during the class time. She said she believes this was a successful program and asked if staff could explain. She also asked about the academic plan and if the superintendent would be weaving it back into the Vision 2020 plan? Dr. Dawkins said the academics portion is part of his work and will certainly be a part of whatever final recommendation is brought to the board relative to Vision 2020.

Mr. Hooks asked Superintendent Dawkins how he, being here less than three years, can justify coming to Shreveport to close schools, destroy communities, bring persons from out of state and pay them more money than employees that have worked in the system for 30 or more years, inflict pay cuts and demote principals that have dedicated themselves to Caddo and ask these same people to support the Vision 2020 plan? Superintendent Dawkins said he was brought to Shreveport by the Board of Education to do the work to improve the school district, and steps have been taken to begin to do that. He said we will ultimately find out whether or not the board approves this plan.

Miss Green asked about the schools taken over by the state and how long before we can try to get them back? Dr. Dawkins explained that according to state law, it is a five-year process, but the state has recently implemented new rules as to how this process will happen which includes petitioning by the school board and/or outside entities to get the schools back.

Mr. Riall asked the superintendent about the information in the packet that before we can address specifics relative to Vision 2020 it is necessary to address certain policies. He asked if at this time the board is only talking about the needed changes to policies relative to hardship, curriculum necessity, Choice, and magnet schools or is the board about to make plans for changes? Dr. Dawkins explained that the board is being asked to look at the laws, policies and
procedures because whatever Vision 2020 plan might be adopted, it is important for the board to understand what we currently have since the system has been built on a series of laws and policies and he wants to make sure everyone has a clear understanding about all the aspects being discussed. He said staff will take the board’s questions and begin to either shape new policies, revise existing policies, address legal challenges if the district keeps the Consent Decree in place because we cannot create something that is counter to the policies and the laws in place.

Mr. Ramsey asked Superintendent Dawkins to look at some additional plans for tracking high school over age students, because at this time the state has given a directive that these students be placed in high school and many are three, four or even five years behind. He is concerned that we are not providing the skill training for these students who may never go to college. He stated he desires to get these students exposed to a curriculum that will offer them the opportunity to earn a living. When it comes to capacity, is this on the table? Dr. Dawkins said it is correct that we have over-age students and steps have been taken to address these students even though we have not adequately addressed the skill training for those that may need this avenue. He said this is on the table not only for high schools, but middle schools as well; and while we have made some progress, it is necessary and important that we make more progress.

Mr. Riall asked the superintendent about the state-approved alternate curriculum for students who are not planning to attend college. He said he believes the first year we had the option to opt out, but asked if a decision has been made to incorporate this program into our curriculum?
Mrs. Turner responded that we are currently working on some of these options with the building principals in terms of incorporating it into the curriculum. She further explained there is a process that must be followed and staff can share this information with the board. Mr. Riall asked staff how long will it be before the process is fully operational? Mrs. Turner explained that staff has identified and met with students who would qualify for the Career Diploma, but that is an option that students must agree to. At the state level, she further explained that we are still looking at additional pieces that need to be in place to make it really workable for our students.

Mr. Hooks responded to Mrs. Crawford’s comment and that he is well aware of the fact why the board chose Dr. Dawkins, but he is concerned because he has been in the system for 34 years and he looks around and sees those who qualify for the positions and someone else is put into those positions. He also stated that given the information he received last week, it seems we are putting the cart before the horse; and with him being strictly academics, we need to find out where we are headed five to 10 years from now. Mr. Hooks shared with the board the superintendent’s response to his request of how many AU schools did Caddo have in 2008, 2009 and 2010 and how many have remained as AU in 2010, sharing that there were six schools that were consistently labeled Academically Unacceptable and now Caddo has 11 schools. Mr. Hooks asked what will happen if Vision 2020 is approved and we build new schools, and enhance and add on to old schools, and the state takes over? Dr. Dawkins agreed with Mr. Hooks comment that we need to address the academic needs of our students and much sooner than in five years. He also explained that he will not bring a recommendation that does not include what we will continue to do with academic improvement, and all of the AU schools have shown gain, but not as much as we would like. Dr. Dawkins said he also is anxious to bring these schools out of AU status; however, the district will be faced with additional challenges when the SPS score is raised next year and the year following so we will need to raise our efforts and scores as well. He added if the state comes in and takes over additional schools, he believes it will be done based on criteria the state used before; but if we are doing what we are supposed to do, then we minimize the numbers. He reminded the board that while we could have lost 11 of our schools, we only lost two, and we continue to keep our focus on all of our schools. Mr. Hooks stated he is concerned that the money is not going into academics but into facilities and compensation studies. Dr. Dawkins explained that approximately 76% of the district’s monies goes into academic support of our schools, and staff continues to drive these funds into the classroom. He said while the facilities study is a part of Vision 2020, nothing will be recommended to the board that would put anything above or before the academic needs of the students. Mr. Hooks said that it may be part of the study, but it did cost the district quite a bit, and Dr. Dawkins said it did cost approximately $1 million, but the district did not have any information on the facilities and this data was needed.

Ms. Trammel asked if there is a projected budget for the Vision 2020 plan? Dr. Dawkins responded that there is a ballpark number that has been used, but before a final recommendation, this number will be given to the board. Ms. Trammel referenced the suggestions submitted by the MPC representative relative to revitalizing the inner city and the need to restructure the schools and land in the inner city; and she asked what will we do if the schools are closed and the community dies, what will happen at that time? Dr. Dawkins explained that as part of the plan involving facilities, staff will present to the board some options to address buildings no longer in use, because the district currently has approximately five buildings that stand empty with no plans to do anything with them.

Mrs. Bell asked Ms. Priest to clarify whether or not the Vision 2020 Plan was implemented to evaluate needed change and when asking if we are doing what we should be doing, she believes evaluating the building is essential, because it is difficult to teach in cold buildings, and the same is true for academics in that it is hard for students to learn in cold buildings. Ms. Priest responded that the purpose of Vision 2020, as any municipality or governmental entity or business, is to periodically assess and inventory what you have in place, and based on the study, determine the direction you will go in the future. With Vision 2020 the district understands that with the growth factor not being there and we have unoccupied facilities, some facilities are at capacity and some are not. At this time, the district is at approximately 10,000 students less than what it was built on. All (facilities, academics, cost, conditions, etc.) aspects must be looked at so the community and the board can move forward. At this time there is nothing set in stone and it will be the board and the community to say what they want and come up with a solution based on the final recommendations brought to the board. Mrs. Bell thanked Ms. Priest for the
explanation and asked staff to look at placing vocational plans back in all middle schools. She said she believes the Career Center is great, but there is a need for another one somewhere in the district that will take in over-age students and those not interested in attending college, and also offer these students the courses they need to finish high school or get their GED.

Mrs. Armstrong agreed with Mrs. Bell and asked that consideration be given to a union apprenticeship for vocational credit recovery as she believes this will be a way in which we can help train students who might become dropouts without some type of direction. She also suggested that rather than transporting these students, she agrees with opening a facility where these students could attend all day and get their academics and when appropriate, incorporate the students in a vocational field program. Mrs. Armstrong also addressed the perception of neighborhood schools and that often they are not perceived as having a quality program equal to another neighborhood school adjacent to them. She stated that some schools seem to have an open door policy and if you show up, they will take you and assist you in coming into their facility. She said if parents are doing whatever they need to do to get their child enrolled in a particular school based upon perception, she believes this could be a difficult problem to address. She added there is a need to do a more thorough investigation of the positive things in our schools and do a better job of communication throughout the district of these positives.

Mr. Ramsey stated that he has served on the board for eight years and everything he has heard in the last two meetings he has heard for the past eight years. He said he is also reminded of Board member Burton’s statement at appropriate times that “it is time to fish or cut bait.” Mr. Ramsey said he believes if we address the discipline and over-age issues, whether real or perceived, the neighborhood schools will be more acceptable. He said parents try to make the best decision possible for their children’s education and if anyone reads the minutes for the past eight years, they would receive an education at its best. The cry for addressing the needs of the students falling behind, and the state’s track to address these needs, has been the focus, and administrators and teachers in these schools will be charged with getting these students to grade level when they are walking into the school with zero credits, can’t read and write, nor add and subtract. He said the answer is tough, but we can’t keep doing the same thing and get different results, and he hopes that the many things being discussed and what will be done in the months to come will have an impact. Communication is a key component of the process and he only asks what are we going to do?

Ms. Priest stated that she reviewed the feedback from the community meetings; and in most of the 15 public meetings, equity was an issue. She believes that whether this perception is real or perceived, many would agree it is an issue that needs to be addressed. She asked the superintendent to bring to the board at one of the future meetings the top three to five things that can be done to address the equity factor. Ms. Priest stated that in her opinion it should not be necessary to have a curriculum transfer because a student should be able to get the academic curriculum they need to graduate in any of Caddo’s high schools.

Ms. Green asked how many students are at Newton Smith and how many classrooms are needed to offer the students at Newton Smith a world class education?

Mr. Hooks referenced comments relative to career schools and that he is the one that initiated the middle school career school and reminded Mr. Ramsey that he voted to initiate this program and he wonders what is being done with this program today.

Mrs. Crawford stated that all board members are pretty much on the same page when it comes to attendance, transfers, and neighborhood schools, but she would like to know when will we move on to the real important next step in the process? Dr. Dawkins responded that staff presented the board with a lot of information and would like to exhaust all questions board members may have before moving forward.

Ms. Priest stated that Mr. Rachal also asked that a compilation be provided of all the questions and staff’s responses and staff is in the process of doing this.

Mrs. Bell asked for clarification on the hard part, because she believes all of it to be hard? Mrs. Crawford responded that she believes the hard part will be when people are told schools will be combined, that attendance areas will be changed, etc.
Craig Lee, visitor, stated that he believes the core of the Vision 2020 plan is it should have been combined with the City’s Master Plan. He said that in terms of the M-M transfers, Choice, hardship, and curriculum equity as noted by President Priest, he believes it is inequity and inequity did not begin, contrary to Attorney Abrams’s comments, in 1965, but it began during slavery when it was illegal for Black people to read or write. With Caddo Parish Public Schools being a 70% Black School District, you have a lot of systematic designs within it, and now you are only getting to the issue of perception versus reality and inequities that actually exist. Mr. Lee said at the core of everything is also the word “value” and most of the perception is the schools (the Fair Parks, the Woodlawns, the Green Oaks) don’t have the necessary value and unfortunately those who are making those affirmations are not even involved in these schools. He said he understands the difficult job the superintendent has and he will do what he can to help him in this area. He also corrected Attorney Abrams on the fact that at the core of the magnet school concept which initiated in the mid 60s, was stopping White flight from the neighborhood schools to private schools. He encouraged the board to keep the schools open.

Jackie Lansdale, Caddo Federation of Teachers/Support Personnel, stated that she thought she heard some over simplification when discussing the policies that should be changed. She said whenever students decide to go to other schools, it is not the children or the teachers, but it is the parents who make that decision. She added the data presented shows parents want to know that they will be safe here, that there will be a disciplinary code of conduct and expectation, and standard of behavior regardless of their home life, and asked the board to not discipline teachers in these instances. She also stated that teachers do not get to decide where they will teach, because a recommendation comes from a principal before a teacher can teach at a school. Mrs. Lansdale also stated that if the board really wants equity, it should talk about what equity is; and if it means there is a standard of conduct for every child at every school or disciplinary codes of conduct, this should be equity.

Brenda O’Brock, visitor, asked about the academic instruction at every school and why can’t we have satellite at every school to incorporate this in every classroom. She stated that she is not against routine maintenance, but she is against spending money that is a wrong decision and will hurt our students. She asked if all the new buildings being proposed for Vision 2020 will help discipline and apathy? She said the magnet schools are a draw for students who want to learn and she wishes the $700 million would be invested in those students who have not learned to use their brain yet, i.e. vocational training. She said a newer building is not necessarily the answer and she believes we need to invest our money in people and not buildings, i.e. get students more counseling, determine if they do or do not want to go to college, determine how students are preparing themselves for the future, etc.

Ms. Priest announced that the next meeting will be held on Thursday, January 13, 2011 at 4:30 p.m.

The meeting adjourned at approximately 1:00 p.m.
January 13, 2011

The Caddo Parish School Board (CPSB) held a special work session in its office at 1961 Midway, Shreveport, Louisiana at 4:30 p.m. on Thursday, January 13, 2011 with President Lillian Priest presiding and the following school board members present being a quorum: Steve Riall, Jasmine Green, Willie Burton, Charlotte Crawley, Curtis Hooks, Mary Trammel, Barry Rachal, Bonita Crawford, Barry Rachal, Larry Ramsey, Ginger Armstrong and Dottie Bell. Also present were Secretary Gerald D. Dawkins, and Reginald Abrams, legal counsel. Mrs. Crawley led the prayer and Pledge of Allegiance.

Ms. Priest announced this is the fourth board work session on Vision 2020, in addition to the 15 community meetings held to give the general public an opportunity to provide their input. She said the four board work sessions were specifically designed to discuss the Vision 2020, to give the board members as a whole the opportunity to review the feedback and the input from the community, to receive this information in a public setting and to begin the dialogue with the superintendent and staff to work through any questions, issues, concerns and legal matters related to the Vision 2020 process.

Superintendent Dawkins began his presentation with a work flow chart that reflects the schedule to this point and what is on the schedule from this point forward. Dr. Dawkins explained that input was received from the community and from the board and this information compiled and reviewed by the board. He also shared a list of all the questions raised by board members in the previous two work sessions; and he encouraged board members to let staff know if it appears that staff misunderstood the question or information being requested. He also stated that the community survey will be shared with the board and will become a part of what is done. Dr. Dawkins stated staff will bring a list of recommendations to the board covering academics, operational, facilities, policies and legal. He highlighted each area and assured the board that the number one goal continues to be academics. When looking at what we can do to raise the achievement level of our students, to increase the graduation rates, to decrease drop-out rates, to improve discipline in schools, to enhance and address the needs of children with special needs, to address the needs of over-age students, staff will bring recommendations on how to address these issues in addition to or in place of what we are currently doing. Dr. Dawkins said he will also bring recommendations on the operational efficiency of the organization because staff believes we can be a much more efficient organization and redirect funding to the most serious needs in the schools and classrooms. The superintendent also stated that there is a need to train employees how to operate in a changing environment because the environment for educators will no longer be the same with the new daily challenges to address. Regarding facilities, Dr. Dawkins noted much that staff has heard about the facilities study and he will bring recommendations that will be impacted by what was heard in the community. He reminded the board that the last meeting focused on policies, and the fact that it is obvious there are outdated policies, policies that are no longer useful, policies that need to be revised and emerging policies so as to not to create a Vision 2020 that does not have the foundational, legal, and policy support of the board and the laws surround it. Finally, Dr. Dawkins reported that the board will receive legal recommendations after the necessary research is concluded in order to determine if the district should seek unitary status, and whether or not there are other legal issues needing addressed based on the creation of Vision 2020 that will withstand all legal challenges as well as meet the letter of the law and also give parents and students options.

Dr. Dawkins also reported that staff will make a recommendation regarding phasing and scheduling and cost and efficiency of Vision 2020. He said that the phasing element component and schedule addresses when the recommendation can happen, along with the cost and efficiency of the components. He also said the cost attached to any of the recommendations will be very clear to the board and if there are efficiencies to be gained, these will also be obvious to the board. He further explained that phases mean we will tackle some of the issues right away, and they will happen very quickly upon board approval and others will take one to two years to materialize. Dr. Dawkins clarified that he does not see the board going to the public for a bond issue any sooner than 2012 or 2013 because priorities must be established in Phase I; and the academic needs of the students, order and discipline in the schools, efficiency in how business is conducted in every area of the district must be addressed. He said this kind of attention will bring the board closer to understanding what a future bond issue might be. Until everything available to us is exhausted, he said we will not know what this dollar number might be. Dr. Dawkins also stated it is very important for the district to show improvement prior to going to
the public for any assistance. The superintendent announced that on March 1, 2011, the board will receive a recommendation that will consist of the following areas listed – phasing, schedule, cost and efficiency, as well as a complete review of the areas from a legal and policy perspective. Once the recommendations are submitted to the board, ample time will be allowed for the board to review it. Again, he clearly stated that what was heard from the community is very important and will guide the recommendations. He believes the district has an opportunity to address the issues ailing the school district and is what his recommendations will be.

Mrs. Armstrong referenced two comments made at Tuesday’s meeting – (1) we all feel the need for vocational programs and the expansion of these programs in the school system, and (2) everyone acknowledges the over-age students in the district who can only be reached through some of the hands-on opportunities, and she would like to look at the expansion of the vocational arm at Ingersoll for over-age students. While she believes the opportunities in place are great, the hands-on skills will give students what they can use when they get out of school. She also stated that at one time she taught special ed and one of her main concerns was the fact that she could see her students would not very often be eligible for the Caddo Career Center; but they were very good with hands-on opportunities. She asked that staff look at the creation of a middle school vocational center in one of the projected facilities for closure. Mrs. Armstrong said she believes many educators are realizing that we are losing or beginning to lose a lot of our students, and maybe we can recharge them with a vocational program where they can get their core subjects and also participate in a shop-like environment similar to what many had a number of years ago in the schools. In noting Dr. Dawkins announcement to bring recommendations to the board in March, she asked the superintendent to consider bringing in February what could possibly be implemented for the next school year.

Mrs. Bell asked for clarification and that we will not be asking the public for a bond issue for a while. The superintendent responded there are issues that need addressing prior to going to the public for this in order to define an accurate number for meeting the needs of the district. Mrs. Bell stated her agreement with Mrs. Armstrong’s comments and sometimes there are things that can be changed without going to the public with a bond issue. She also noted that Ingersoll is set up and all we need to do is bring in the real over-age students and offer them some real skills (shop, mechanics, etc.). Regarding discipline problems, she believes Hamilton Terrace is set up for this. Mrs. Bell asked the superintendent about the cost for putting this at Ingersoll? She also stated that it is important to address the middle school student that does not have a 4.0 average, and is not interested in attending college. Mrs. Bell asked Mrs. Armstrong if her request is to provide a career center for middle school age students with no stipulations? Mrs. Armstrong said it is, and she envisions offering the opportunity for average students that desire a different school environment that provides core subjects along with the vocational courses, and it would be a school for students all across the parish, similar to opportunities offered at magnet schools.

Mrs. Bell asked about the school district’s operations, and Dr. Dawkins explained there are many – transportation, business, finance, food service, etc. in order to service all the students; and it is important that we insure we are as efficient as we can be in providing the needed services.

Mr. Riall stated that in reviewing the information presented, he also went online to look at the state’s plan of 1999 to have SP Scores at 100 by 2009. He said the state started out at 69.4% and the reporting today reflects an SP Score of 91. On the average, the SP Scores with a concentrated effort statewide, came up on an average per school of less than 4%. In the coming school year, the score is 65; and the following school year, the score will be 75. He asked if at the present rate we do not increase scores, is it true we will have 13 schools in the first stage of Academically Unacceptable status? And, if these stay at the present level then the following year Caddo will have 27 schools in the first year of AU status, six of which are high schools. Mr. Riall said his concern is as the scores go up, how many students will be overwhelmed and feel that the goal is out of their reach. He asked the superintendent how this will be addressed? The superintendent stated that this is an answer that will be shared with the board as staff is aware of the scores increasing and there are some challenges, some serious, in some of our schools and we can’t afford to allow them to slip backwards and add schools to the list. He said it will be necessary to intervene in ways we have not before and for people to be accountable in ways they have not been before. He noted there are subgroups whose scores are atrocious and it will be necessary to do some things that will be a shock to some in the system but will be a part of the recommendation.
Mr. Hooks clarified that what Mrs. Bell and Mrs. Armstrong are referencing is vocational programs in middle schools, and Caddo has this at the Caddo Middle Career and Technology Center. Mrs. Armstrong said that she is talking about expanding hands-on opportunities more than what we currently have at Caddo Middle Career and Technology. Mr. Hooks asked if she has been there to see what the program is about? Mrs. Armstrong said she did know; however, if the program has been added to/expanded, she is not aware of this; but what she is talking about is more hands-on opportunities, i.e. shop, tools, fine arts, graphics design, etc. She would like to offer a well-rounded opportunity for these middle school students and challenge them in a way that we haven’t had opportunities to do before with some of the unique opportunities available.

Mr. Hooks responded that if we are not doing it at Caddo Middle Career and Technology, what makes you think we are going to do anything with this program. He asked the superintendent if any staff member at Central Office knows anything about the program at CMCTC? Dr. Dawkins said there are many people that know about it and Mr. Hooks said he doesn’t think so because no one came when he was there. Mr. Hooks said he is on board with Mrs. Bell and Mrs. Armstrong’s idea in this area. He also asked the superintendent about academics being the number one priority and his concern about how we can improve academics when morale is very low and because it is, he does not believe the children are receiving a quality education.

Mr. Rachal pointed out statistical information on Caddo Parish’s population increasing and schools built as a result of that increase in population. He added that between 1980-2000, the population dropped by approximately 200 and he believes three schools were built. In looking at schools built as a result of that increase in population. He added that between 1980-2000, the number of schools in southeast Caddo.

Mr. Rachal also referenced the information on the utilization and energy efficiency of Caddo’s schools. He shared the numbers relative to energy conservation (simple energy payback measures) and that the U. S. average is in some cases 1/3 of what Caddo has, and the National average is 5.5 years and Caddo’s is 15.2 years. Mr. Rachal reminded the board that Caddo just spent close to $50 million in air conditioning; and when looking at upgrading existing buildings, he doesn’t believe we should consider just the initial cost, but also what the payback will be. He asked Superintendent Dawkins if we will be going to the public with an RFP for energy conservation? Dr. Dawkins responded we are in the last phase of that process. Mr. Rachal noted the fact that the district has just completed the projects for the $88 million bond approved by the voters, and he is concerned that we are now getting this report. Mr. Rachal referenced the utilization of Caddo’s buildings and the approximately 12 elementary schools with over 100% utilization. In looking at these numbers, he was unable to see one elementary school that the enrollment and capacity were any more skewed than University Elementary. He again stated he does not believe one elementary school is equitable and at the next meeting he asked for maps.
showing where all the schools are and the areas they cover so the public can get a good view of the areas that have multiple schools in the attendance area. He shared with the board that he discussed with the superintendent the possibility of changing the recommendation of an elementary school to a combination K-8; and he knows if other board members had these issues with no neighborhood schools in their district, they would say the same thing.

Mrs. Crawley asked the superintendent, if when mentioning March 1st and board action, to not bring a plan to the board and expect immediate board action. She also asked the superintendent about all-day long reading for students having difficulty with reading and is it possible to have a reading center, i.e. what Shreve Island is doing? Dr. Dawkins responded that reading is fundamental to the educational process but there are some extreme cases where we may institute programs that will focus only on reading because we can’t afford for students to get beyond the second grade and not be able to read. He said it is a drastic measure, but he is willing to take drastic measures to help these students who are having difficulties. Mrs. Crawley asked if the superintendent and staff are studying models or model schools? Dr. Dawkins responded they were. Mrs. Crawley said she appreciates the need for vocational opportunities, because if you are not successful and not planning to attend college, it appears you are wasting high school, and we need to change that so the goal is to be able to make a living, to take care of yourself and your family, and to be a good citizen. She also said when improvements are made to these schools, she does not want to make them more attractive for the state to take them over and make charter schools as was done with Linwood. She stated a reorganization needs to be looked at so that the school doesn’t exist, it can’t be labeled AU, and you have a different school. Mrs. Crawley said she also doesn’t want to antagonize any board member, but believes there are two sides to every coin and you can’t add onto something that is dead. She referenced the independent school districts in Texas and the extremes; and with the exception of Byrd, there are no neighborhood schools in her district. Mrs. Crawley also encouraged the importance of studying why students go to private schools and if can we meet that need. She also asked about the possibility of adding neighborhood components to South Highlands, Eden Gardens, Fairfield, etc. to help the inner city neighborhoods.

Mrs. Crawford stated that in 1997 voters voted down building a school in southeast Shreveport and in 2004, the bond issue was given to the voters, and the voters approved it, so she believes the board needs to more careful about what is put in front of the voters. Mrs. Crawford asked the superintendent if he believes the public is expecting the board to take action to combine schools to make new schools, well before the possibility of a bond issue. Is it possible to plan certain things now and when school begins in the fall to have in place new, combined, changed, etc. schools that will save money and help in the academic arena. Also, do you think this would build confidence in the board since she believes at this time the public doesn’t have confidence, but it is something that could be built again by doing some things now without calling the bond election. Dr. Dawkins responded that the first phase is to do precisely that and all the possibilities mentioned are on the table. Mrs. Crawford also shared with the board that the property taxes from District 9 are no different than the property dollars paid from District 8 or District 12, and to her it is an insult to everyone that pays property taxes when the board gives the impression that a district deserves it because they pay more money. Mrs. Crawford also agreed with Mrs. Armstrong regarding the need for a middle school for vocational training; however, she believes students signing up to take certain electives is how it should be offered.

Mr. Burton stated his appreciation for the opportunity to expound on his desire to improve his community with the help of the school board and the city. He said in talking about inequalities, all one has to do is look at schools in the Allendale area because some of these schools are depopulated because the area has been depopulated for various reasons. He said there are many things he needs for his high school; however in talking with the superintendent, he has agreed to postpone this until we address Vision 2020. He also stated his appreciation for board members bringing up the development of a vocational skills program similar to the one that used to be at Booker T. Washington because some students have second motor skills; and there are not enough courses available at all the schools and to address the need to develop these lost skills. He also referenced the program at Hamilton Terrace whereby students would spend a part of their day at the vocational center to participate in hands-on projects, because the students must also need to know how to read, to do math, etc. Mr. Burton also reminded the board that if the board is not together in support of this, the community will not support this.
Ms. Trammel stated that several years ago under another administration, something similar was done and some of the same things were said, and she said now it is important to focus on the goal and what outcome we want to reach. Dr. Dawkins said Ms. Trammel is correct and in looking at some of the school board history, we are at a place where the board can make a historic decision or not; but the focus in the first phase will be to address the academic issues and the efficiency in operations. Ultimately, the superintendent stated that the board will have to decide, based on the work over the next year, whether or not this is the direction it wishes to go. He said there are some things that must be done upfront in the schools, classrooms, supporting the teachers, the students and making sure the academics are in place and efficiency in the operations will go along with it.

Ms. Priest stated that, when looking at the timeline and the recommendations, she believes action definitely needs to be taken and whatever is done, there are some things that need to happen in Phase One; and in moving forward, we need to be prepared to do some things for the upcoming school year. She said the vocational program is definitely needed in Caddo Parish, and especially for the middle school students; since, if they are not going to be on the college track, this offers them the opportunity to pursue skill options while getting the required core classes, and is an opportunity for a “super” middle school. Ms. Priest also stated that the older schools are in the inner city and they are not obsolete and she hopes that whatever recommendations are brought to the board that we not lose focus and only follow the urban sprawl. She said it’s what happens in the buildings that is important and the hub of a community is downtown, working its way out into the neighborhoods. She said if you have something good that works, people will come to it. She also asked the superintendent to include cost saving measures in whatever recommendations he brings to the board along with the reconfiguration and cost savings as it relates to utilities, transportation, etc. so these resources can be used in instruction.

Mrs. Bell asked that consideration be given for an elementary neighborhood school in Greenwood. She also said that Walnut Hill has needs as well as Timmons, and she also asked what will we do with schools in trouble, as she is concerned about Bethune and the fact that it has been in corrective action for 7-8 years and the possibility that the state will take Bethune. Dr. Dawkins responded that Bethune is a part of the Caddo Plan, along with several others, and all of them are in jeopardy. While we have seen some progress in these schools, it is necessary that it is accelerated. Mrs. Bell reminded the board how hard it worked to save Linwood and Linear and it is possible that the board has to implement some things that the community doesn’t necessarily want.

Mr. Riall asked about District 9s request for more schools in southeast Shreveport and the fact that they are recommending building schools in his district and his district doesn’t want them, so he would gladly give his schools to District 9. Mr. Riall also asked about the absenteeism rates for the AU schools and Dr. Dawkins responded that there is improvement over last year. Mr. Riall stated that we do have some programs in place, but if achievement is to be improved, we must also improve attendance.

Mrs. Crawley asked that whatever staff brings relative to reconstituting schools, to please have a plan for any empty buildings other than just closing them.

Mrs. Armstrong stated that one of the difficulties in the past has been when the board has addressed needs in the parish and there has not been a consistent long-term leader and she wants to know that the superintendent is not going to lead the district down this trail and keep going without them. She said she believes the bottom line is she doesn’t want to go through another superintendent search and that without consistent, long-term leadership going into Vision 2020, we are doomed before we start. She said the short term is it won’t work. Because of the tremendous amount of money that has been invested in consultants and the time from the community, staff and board, she hopes the board can count on the superintendent to stay at the helm until Vision 2020. Dr. Dawkins responded that he appreciates the comments and while certainly superintendents serve at the pleasure of the board, superintendents also take on these projects that are sometime daunting. He said the needs of the children are paramount and he is in this truly to improve the lot of Caddo’s students; and as long as we can make improvements and work together to achieve this, he will work hard to get this done. However, when things don’t happen, and the goal is something other than looking out for children, then it becomes problematic for everyone involved. Dr. Dawkins again stated he enjoys this work, and what he is seeing is not new, but is something he has seen before, and it is whether or not we have the
will and courage to work together as a team. Mrs. Armstrong stated her belief that the focus needs to remain on what’s best for children, because she believes that everyone on the board is involved for the betterment of the students and schools. She also asked that what she has said be taken very seriously, because she feels this is where the district lost ground in making needed improvements. Dr. Dawkins added that he does believe this is the right focus and as long as we keep this focus, we can move forward.

Mr. Ramsey asked what is the big deal, because it’s long-range planning in motion at last. He said it is a big deal and all these processes are necessary. He has heard comments about the facilities study and it is necessary so that the component parts are in place and we are now in the dialogue of what do we do. Mr. Ramsey added that he has used the term vocational education and because vocational education of today is a skill transition, we can’t do it if students can’t read, write or do arithmetic. He said he believes under the superintendent’s direction, the district has seen some excellent options programs and he is asking about the expansion of this. Knowing there are some state rules and guidelines that will go against some of the board’s comments in this process, he believes these are issues the board will have to get over if it is committed to consolidation and how to play the games it appears the Governor and others are playing with Louisiana’s education. Mr. Ramsey said that he hopes the superintendent is developing with expertise from his staff because it will not mean a lot if it can’t be implemented under the directions and state laws, Court Consent Decree, etc. He asked the superintendent if March 1st is too soon? The superintendent said the staff was looking at a later time, but staff made a decision to push and see what could be accomplished by March 1, because the longer it is delayed, the further back we will be. He also stated that we will not get it all, but it will be done in phases and there are some things that must be done quickly; and unless we do that, we lose too much ground and that may not be favorable to the Caddo School System. Mr. Ramsey said he doesn’t know all the rules and guidelines that will need to be followed, but he knows that it is important for the board to be together on this no matter what the date. He also applauded the superintendent for publicly stating that the board is not pushing to take a vote on a bond issue and he is anxious to be about the business of coming up with a plan. Dr. Dawkins stated that Mr. Ramsey’s statement is key in if we are not all together on this, going down this road is futile; and unless the issues that are affecting the students and staff members are addressed, then there is no chance to bring about change to improve everything for all students in the community. He said it always works better when the board and the administration work together and if this can be done, we will set up the community and students for future success. Mr. Ramsey also asked the superintendent to keep in mind that past successes have been because of strong public support and is something that needs to be pursued and nurtured.

Mr. Rachal stated that something everyone agrees on is early childhood education and asked if we are turning away children due to capacity? Dr. Dawkins said while he doesn’t have specific numbers, he believes we are accommodating most students. Mr. Rachal stated that early childhood education is one of the most beneficial things we can offer our children and hopefully they will see the benefits of it early on and put a value on education later on and expand it.

Mr. Hooks reiterated Mrs. Armstrong’s comments about Dr. Dawkins leadership and that if he is going to stay, he will have to gain the trust of the employees, because they don’t trust him. He said if Vision 2020 is to pass, there must be trust. Mr. Hooks said he says this because he does get around in his district and has heard this. He encouraged the superintendent to build the trust with the people.

Brian Salvatore, LSUS employee and resident of southeast Shreveport, stated that he has a 9-year old at University Elementary; and while he has no complaints about University Elementary, he is looking at the bigger picture. One of the things that stands out to him is pursuing unitary status and he believes this is highly presumptuous since we have not addressed the problem. Mr. Salvatore said the crumbling of the core of the city and the overcrowded periphery of the schools are problems and there is not a solid resolve to the problem. His philosophy and experience is that you eventually get what you want by helping others first and with regard to the problems with the neighborhood schools and the core of the city, he believes everyone can come together if the members of the board reach out and engage other avenues and expertise in the city. He said he doesn’t believe LSUS can tackle this job in a few short days, but he believes a partnership is the answer.
Frederic Washington announced that he has received phone calls from residents in District 5 regarding the Vision 2020 meetings; and when he was told to attend the meetings, he went and when he missed, he viewed what he missed on video. In watching the Vision 2020 video, he shared that he was greatly disturbed and he doesn’t believe the title of these meetings should be used to denounce anyone. Mr. Washington shared he does have concerns about the welfare of the district; however, as a person, we need to be more in-depth with the discussions held relative to the needs of the district, i.e. value added teacher law and how it will affect our schools. He said another issue that needs to be looked at closely is Professional Development. Mr. Washington noted that many times he hears board members ask questions and requests information when the information is in the Mini-Facts brochure. Regarding School Performance Scores, he said all that is necessary is read the data. He said the administrative staff needs a break because their work is already more than in-depth.

Jon Glover, employee, addressed the board on the concerns and recommendations to be brought to the board for March 1. She noted the times in the past that it has been proven that board members may not all agree on what matters. She asked the board to make certain it is in full agreement or disagreement with the information brought forth, because it has been proven in the past that the board may not have been fully versed on the information and should take the time to make sure it is well versed so answers can be provided to constituents’ questions.

Craig Lee stated that he is glad the focus is on academics and the need to assure that the curriculum must be elevated at all levels in the AU schools to include a coachery based character enhancement component. He said we are now looking at most of the students in the low-performing schools who do not even have an identity. Mr. Lee said the reality is that things must be done to enlighten people and turn around low morale. He also highlighted important aspects of the vocational educational opportunities and areas. He asked the board how does a child become an adult and be enlightened to become a trash collector or dish washer?

There being no additional questions/speakers, the meeting adjourned at 6:33 p.m.
January 18, 2011

The Caddo Parish School Board (CPSB) met in regular session in its office at 1961 Midway, Shreveport, Louisiana at approximately 4:30 p.m. on Tuesday, January 18, 2011 with President Lillian Priest presiding and the following school board members present being a quorum: Steve Riall, Jasmine Green, Willie Burton, Charlotte Crawley, Curtis Hooks, Mary Trammel, Bonita Crawford, Barry Rachal, Larry Ramsey, Ginger Armstrong and Dottie Bell. Also present were Superintendent Gerald Dawkins and Legal Counsel Reginald Abrams. Mrs. Crawley led the prayer and Pledge of Allegiance.

Mr. Burton moved, seconded by Mrs. Crawley, to approve the minutes of the December 7, 2010, December 14, 2010, December 16, 2010 and January 4, 2011 CPSB meetings as submitted in the mailout. Vote on the motion carried unanimously.

PRESENTATIONS AND RECOGNITIONS

Tricia Grayson, director of marketing and communications, on behalf of the CPSB and staff, presented the following special recognitions. The president and superintendent greeted and presented each honoree with a certificate/award. Administrators, families and friends present were also recognized.

From the Top Award. Marcus Rose was recognized as the recipient of the From the Top Award presented by the non-profit organization known for its NPR and PBS programs featuring America’s best young classical musicians. Marcus is a senior at Caddo Magnet High School and will receive a $10,000 Jack Kent Cooke Young Artist Award which can be applied towards instrument purchases, summer music camp, travel expenses, tuition and fees. Marcus studies viola, plays the piano, is a member of his church choir, plays with the Marshall Symphony and is part of the American String Teachers Association National High School Honors Orchestra.

Science Education Award. Cathy Williamson, recognized as a non-classroom teacher who has made extraordinary contributions to the advancement of science education, received the distinguished informal Science Education Award. Ms. Williamson has been at Sci-Port since 2001 after teaching in the classroom for 27 years. Ms. Williamson has also been nominated to receive the National Award.

Bus Driver. Ms. Pauline Marshall, Caddo bus driver, was recognized for her quick thinking and alertness that saved the students on her bus from serious injury when a car ran a red light.

Corrective Action Plan (CAP) Report. Dr. Robert March reported that he began working with the parish three years ago on the Corrective Action Plan issues that came up on a complaint filed in 2006 involving the needs of special ed students, especially students who were suspended and expelled and were denied their educational rights. He explained that there are six pieces to the plan and each piece was looked at school by school; and the specific data being looked at is the suspension rate across schools across the parish. At this time, it appears that approximately 60-64 schools will exit the CAP by the end of this school year. Dr. March shared with the board that the National average for suspensions for a school is from 3.3% to 13.2% and when work on the Corrective Action Plan began, one of the schools was suspending 67% of its students and two schools were suspending 50% of its students. It is expected that the two schools at 50% suspension rate should be below 25% by the end of this school year which is significant. When looking at each school, suspensions for tardy behavior, dress code violations, i.e. non-violent behaviors were considered. In looking at handling behaviors such as fighting, the district has implemented the Fight Diversion Program, and they would like to see this program utilized more in schools that still have high suspension rates, as well as the Volunteers for Youth Justice Program. He reported that as a result of implementing these programs, only 30 of the 356 that completed the program got into another fight. Dr. March also reported on their work on the Blue Book (Student Handbook) which is something reviewed each year and the district will continue to annually review. He said things such as electronic devices have become a major issue and they will be making some recommendations regarding the loss of instructional time for students

who bring these devices to school and how it can be addressed. Dr. March reported they are still looking at and working with the special education department to look at how individual education plans are being written and the State Department will be in the district next week for a pre-monitoring visit to tell us where we are before we develop an exit plan to submit to the state by February 16th.

Mrs. Crawford asked if the final plan will have some type of maintenance in the exit plan. Dr. March said the idea is to train those alongside during the process through General Ed, school safety and security with Dr. Barzanna White, on campus training on a variety of topics related to the corrective action, as well as training a group through the Special Ed Department to go into the schools and address documenting IEPs, as well as monitoring. One of the maintenance features is training those in the parish to become leaders and basically train themselves. Dr. March said they also worked with JPAMS, the data management system, to develop some regular data reports for directors’ use when they go into the school buildings and hopefully they will share this with school principals.

Mrs. Crawford also asked about Positive Behavior Intervention and the feedback that it is a difficult program to work with. Dr. March clarified that PBIS is not a program, but the state has enacted some guidelines saying that every school needs to at least document positive behavior intervention. He also explained that the state requires every school to have six things in place and those are: (1) clear set of behavior expectations, (2) plan for teaching those expectations, (3) staff needs to be trained in how to supervise non classroom settings, (4) verbally acknowledge when students do the right things, (5) use data to make decisions and (6) meet regularly to review the data. He said the idea is if every school does these six things and invests in prevention, they will have less to do in terms of response or reaction. This is what the state requires and is part of what he was mandated to bring. Dr. March added that some of the problems, he believes, is a lack of understanding. Mrs. Crawford asked if this is for the classroom or school wide? Dr. March said the answer is both, and in Louisiana it is mandated school wide; however, there are also features of PBIS that can be applied to individual students. Dr. March encouraged board members who may not have attended one of the trainings to do so when they are scheduled.

Mr. Hooks asked Dr. March if he understands correctly that one of the biggest problems is fighting? Dr. March responded that it is a big problem because it presents a problem around school safety; however the biggest problems are disrespect and willful disobedience. Mr. Hooks said he hears the biggest problem is battery and assault on employees. Dr. March said that the frequency of the numbers of those occurrences might be significantly lower than the other behaviors. Mr. Hooks asked if teachers are still asked to complete the Louisiana Department of Education school behavior forms? Dr. March said he is not certain. Mr. Hooks explained that it takes a teacher at least 20 minutes to complete this form which means 20 minutes is taken away from instruction. Dr. March said the schools can develop a pro-active behavior plan that teaches behavior, and teaches adults about supervision. He also stated that he believes everyone is on the same page and agrees that sending students to the office or suspending students is taking away instruction time, and we are trying to minimize the loss of this instruction time due to discipline.
Mrs. Bell asked Dr. March if he has anything to do with the charter schools and private schools, and Dr. March said he does not. Mrs. Bell said one of the problems is once a charter school suspends a student, and the student has an IEP, the students come to Caddo but the charter does not send the student’s records with them and is there anything that can be done about this? Dr. March responded there are significant problems with the RSD and they will soon be under their own corrective action plan.

Dr. Dawkins announced that a team from the State Department will come to assist Caddo in its CAP activities next week and on February 17th a team will meet with the plaintiffs in Baton Rouge to hopefully begin the process of moving toward exiting this CAP.

VISITORS

Jon Glover, employee, stated that she has been coming before the board for months expressing displeasure about the compensation, specifically the support employee salaries. She said she finds it hard to believe that the board could expend a total of $1 million to do a facilities study when the district has a maintenance department that performs services for all the buildings. Why would you not look over the maintenance of those buildings and possibly avoid such an expenditure? She said the maintenance employees are employees the district is paying to maintain these facilities. Ms. Glover asked the board to take the following into consideration - $1 million for a facilities study, $700,000 for a compensation study, additional unknown expenditures – these should have put a strain on the budget as a whole. Notwithstanding the fact that there are new employees, administrators that duties changed and giving these an additional $500 should have been a burden on the district as well. With the board insisting that this compensation plan is the best for all employees, Ms. Glover asked where is the logic? She said the sum total of this matter appears to be selfishness to her. She also asked where did the funds come from for the $10,000 that was given to the superintendent, and while he has a contract, the district is in a budget constraint.

Jackie Lansdale, president of the Caddo Federation of Teachers/Support Personnel, stated that in 2009-10 Caddo hired 552 new teachers. Of that number, approximately 141 have left the district. This year Caddo hired 431 new teachers and 83 have already left the system. She said the district is already facing further academic burdens as well as tighter funding in the state and she believes this deserves our attention. Mrs. Lansdale noted that the district’s budget reflects a $6 million line item for recruitment so it appears that losing a new teacher is costly, and shared that data indicates teacher turnover can cost from $17,000 for a large district to $5,000 for a small district. When looking at Caddo’s data, Mrs. Lansdale used Barret as an example when veteran teachers were displaced and a grievance was brought before the board. She said in 2009-10, Barret hired 10 new teachers and at this time four (40%) are no longer in the district. Mrs. Lansdale stated that she believes this should raise the board’s awareness especially considering state academic data. She also shared a similar example of turnover at Booker T. Washington and that the common denominator is inadequate administrative support, followed by low salaries and discipline issues. Mrs. Lansdale also stated that every board meeting one can see the board beat up on teachers with assaults on employees on the agenda, including today’s agenda item to vote to terminate a temporary teacher as well as a recent decision to deny an appeal. She said the ability to appeal to the board has been a practice of the board for a long time and this is just one more piece of negative energy that they are forced to address. She also asked that the board take the following into consideration when looking at Vision 2020 and the budgetary process – consider the millions being poured into recruitment and look at teacher turnover, address discipline and remove the idea that real teachers teaching and students learning should take a back burner to how discipline data looks to outside consultants. She also encouraged the board to look hard at salary schedules and use every available resource in school and not let Wall Street be the priority over a quality stable work force. She closed with saying that everyone has a role and those who have ownership are more likely to stay. Closing the achievement gap is vital to the district and the community and high turnover schools are a huge drain on resources that can be spent to improve teacher quality and academic achievement. She also acknowledged the City Council for recognizing the importance of giving their employees respect and a voice in their working lives.
Superintendent Dawkins highlighted the proposed agenda for the January 18, 2011 meeting and the following discussion ensued.

**Approval of 2010-2011 CAP and Budget.** Superintendent Dawkins stated that the CAP budget was approved with IDEA funds for this year.

Mr. Rachal asked about items on the agenda with no support documentation. Ms. Priest stated that backup documentation for all the items for board action has been submitted. Mr. Rachal asked about item number 8.02? Ms. Priest responded that it was emailed to all board members. Mr. Rachal said he looks for the backup documentation on BoardDocs.

President Priest announced that items 6.02, 6.04, 7.01, 8.01, 8.03-8.05 are the consent agenda. *Mr. Riall moved, seconded by Mr. Burton, to approve the consent agenda as presented. Vote on the motion carried unanimously and the following is a summary of the board’s action.*

**Item No. 6**

**6.02 Requests for Leaves.** The board approved the following requests for leaves as recommended by the superintendent and submitted in the mailout.

- **Certified**
  - Catastrophic Leave, January 18, 2011-February 1, 2011
  - Davis, Nellie, Teacher, Fair Park High/Math/Science, 16.5 years
  - Guess, Melissa M., RN/Teacher, Caddo Career & Technology Ctr., 15 years
  - Lofton, Rebeccah, Teacher, Ridgewood Middle, 12 years
  - Leave Without Pay, January 3, 2011-June 1, 2011
  - Hathorn, Katy, Sp. Ed. Inclusion Teacher, Northside Elementary, 1 year
  - Sabbatical Leave (Medical), Spring Semester 2011
  - Greene, Cindy, Teacher, Broadmoor Middle School, 9 years
  - Lofton, Rebeccah, Teacher, Ridgewood Middle, 12 years

  Joyslyn Sams was approved for Medical Sabbatical Leave at the August 17, 2010 for one semester. Her medical condition has not improved. She is eligible to retire and the board approved her request to be relieved of her obligation to repay monies received while on leave.

**6.04 Renewal of Promotional or Administrative Appointment Contracts.** The board approved the renewal of promotional/administrative appointment contracts as recommended by the superintendent and submitted in the mailout.

**Item No. 7**

**7.01 Bids (Purchasing).** The board approved the following bid as recommended by staff and submitted in the mailout on the bid tabulation sheets: (1) Pendley Music, LLC dba Pendley Piano Gallery, totaling $20,503.00 for the purchase of piano labs.

**Item No. 8**

**8.01 Approval of legal services—Dale Cox, individually.** The board approved the transfer of legal files from Bradley Murchison law firm to Dale Cox and continuation of use of Dale Cox as legal counsel based on the same terms and conditions as approved for Bradley Murchison as recommended by general counsel.

**8.03 Assignment of Oil, Gas and Mineral Lease.** The board approved assignment of state agency lease No. 20439 whereby Paramount Energy, Inc. assigns all of its right, title and interest to Chesapeake Louisiana, L.P.

**8.04 Approval of 2010-2011 CAP and Budget.** The board approved the 2010-11 CAP and Budget as presented in the mailout.
8.05 General Fund Budget Revision Requests. The board approved the budget revision requests as recommended by staff and submitted in the mailout.

AUTISM TRAINING

Mr. Hooks announced that the superintendent provided him with additional information on this item; however, he would like to postpone this item until he has time to review the information.

SUPERINTENDENT’S REPORT

Update on Superintendent’s Target Schools. Superintendent announced that he and staff have been working with the RSD and a packet is provided on the information Mrs. Turner is sharing with the board today. With questions being raised about the schools that have been added to this list, Dr. Dawkins reported that several schools have been added whose score is close to 60 to give them the structure and attention they need to not slip back.

Mrs. Turner shared with the board that the Superintendent’s Target Schools are under the Memorandum of Understanding and under the Memorandum of Understanding with the RSD (Recovery School District), we are required to have regular monitoring and support and a quarterly monitoring site review conducted each year. The latest monitoring review took place in the fall of 2010. The schedule for these reviews included a three-member team onsite for an entire school day, visiting all or most of the classrooms. The site visit includes interviewing teachers, principals, and assistant principals, and evaluated the schools with qualitative and quantitative instruments. Mrs. Turner explained that the QMSR reports provide a snapshot of assessment, evaluating the performance of essential practices of successful schools. She also highlighted a summary and ratings from the site visits as well as the Distinguished Educator’s activities and involvement at their particular school. She also reported that the new AU schools are included in the monitoring process on a volunteer basis and were monitored in November receiving additional support to work toward improving their academic scores. Mrs. Turner also reported that Dr. Amy Westbrook met with each school (Superintendent’s Targeted Schools and new AUS schools), and their administrative teams, teachers, instructional coordinators, etc. to discuss the monitoring report. She further explained the scores given in the different areas and that the monitoring report includes an Essential Practices Survey which speaks to what should happen to maximize instruction in the classroom. Mrs. Turner also shared the change in the schools’ scores and that the information being shared is included in the folder (handout) provided. Comparisons from last spring and the fall were highlighted for each school. Mrs. Turner also reminded the board that the new AU schools are involved in the volunteer monitoring with the RSD; and will receive the additional support of a Distinguished Educator at each of these targeted schools similar to the Superintendent Target Schools. These schools will receive additional professional development, additional support with administrators as they monitor classrooms to identify areas they could strengthen, and additional coaching support with the teachers and administrators. She reported that district level teams are involved through other School Improvement Teams in working with the schools as well. Additional professional development identified by those in the buildings has also been provided. The RSD monitoring schedule for the Winter 2011 began last week. Mrs. Turner announced that all the Superintendent’s Target Schools did increase their SP Scores; Oak Park and Caddo Heights have been released from the RSD monitoring and Barret is still under monitoring because of their lower increase in their SP Scores as well as the two middle schools and four high schools. She added that district teams will be utilized to conduct the monitoring specific visits at Oak Park and Caddo Heights to continue with this support and not leave them completely.

Mrs. Turner said areas the staff continues to work hard on include the constant rigor in the classroom in terms of expectation, structure, students on task, response intervention when students are struggling, data analysis when received and modifications that need to be made in order to make a difference and improve student achievement.

Ms. Priest commented that the majority of the schools are meeting minimal practices, fundamental practices or Best Practices; however, she shared her concern over the inconsistencies in those schools who had Best Practices in May and dropped to Fundamental Practices. She asked staff if there is any reason why this happened? Also, she asked staff if sufficient data is available for J. S. Clark since she understood their scores increased to where they could be moved out of AU status. Ms. Priest also shared that we had 11 schools added and
she encouraged staff to do a better job in the area of communications, because we are not where we were when we started and we are improving and accomplishing things in the district. Mrs. Turner responded relative to the change in the rating system for some of our schools, and shared that it is not unusual for a school to go from Best Practices in the Spring to the Fundamental in the Fall. She said this will happen because of a change in staff and the expectation for the Superintendent’s Target School has been raised, and also because of a new staff being in place in a school. Next year, she believes we can expect to see increases from the schools’ fall scores to the spring scores. Regarding J. S. Clark, Mrs. Turner reported that when Dr. Amy Westbrook contacted Caddo about the SP Scores, there was some confusion relating to this score and whether or not it was high enough to move J. S. Clark out; and the overall score was not.

Mr. Riall asked if there is a new or revised action plan after each quarter of operation? Mrs. Turner said there is. Mr. Riall asked Mrs. Turner who devises this action plan and who monitors it to make sure it is followed? Mrs. Turner stated that with each QMSR Report (monitoring report), under recommendations, they will tell us what we need to focus on, and each school team works with the Distinguished Educator, the area director, the content supervisor and district team to work on action plan areas on steps they need to take for improving in the areas of recommendation. She said the distinguished educator also monitors how this process is working.

Mrs. Bell stated her concern about Bethune and the only thing she sees in the paper is Bethune has been on the list for 7 to 8 years. She shared her fears that eventually Bethune may not make the score, because they are continually raising the score. She said she knows in the next couple of months, BESE will come up with something different and the constituents do not understand how this is working. Mrs. Bell asked what can we do to save Bethune, because they are not hearing us? Dr. Dawkins stated that what Mrs. Bell said is correct and there is no question about the information on each school and the RSD has the information. He said what Caddo has attempted to do is intervene and it is imperative that we accelerate this movement.

Mr. Rachal asked someone to clarify the expectations and if there is a written goal or target, because don’t we want all the schools to be at fundamental? Mrs. Turner said with the Superintendent’s Target Schools the initial goal was Fundamental for all of these; and the goal this fall is to begin with a Fundamental Rating, but with the next visit, which is right now, she anticipates seeing a significant change. Mr. Rachal stated that all the schools listed understand that they need to be at Fundamental? Mrs. Turner responded that is correct, fundamental or higher; and they are still in training with the new AU schools. Mr. Rachal said it is hard for him to understand why we have not reached Fundamental yet, and why there is such a huge difference among the schools? Mrs. Turner stated that they are looking at several different levels and what is being measured from the day they arrive, but the goal for an elementary in terms of comprehensive curriculum looks different than it does at the middle school level. Also, the high school is very different in terms of the AB Block; however, each of the groups should be able to achieve a Fundamental status with staff teaching the comprehensive curriculum and doing all the other things simultaneously. Mr. Rachal stated his understanding of the explanation presented; however, knowing where each began and knowing what the ending point is, he believes we should see more consistency in moving up versus such a variance of one versus the other. Dr. Dawkins stated that this request is one that goes right to the core of this work; and while we are in the midst of this plan, he believes last year’s scores gave some indication that there could be forward movement, and it is important that all of these schools did move forward some. The superintendent said we are expecting some larger gains this year and expect even more next year, and we are trying to give them the structure and monitoring to ensure that. Mr. Rachal requested a summary page of all the schools on the same page from start to finish.

Mrs. Crawford shared her concern that some of the schools were not AU but AA and she expected them to be ahead of the game, because she thought we began backing these schools with some things to turn them around. She also asked about increasing best practices and looking at the other AU schools to see what we have done there. Mrs. Turner said staff has shared information with all the schools relative to essential practices. Mrs. Crawford also asked about the letter sent last time Caddo had schools that came out of AU status asking to be released from the monetary fees and that we write the same letter again.

Mrs. Crawley stated she understands the concept of planning for success, but she believes the state is the one that is doing all of this. She asked staff if she understands correct that it’s the monitors from the state that prepared the reports, the comments, etc. and what they are looking
for. Mrs. Crawley also stated that she doesn’t understand why we are not all facing Best Practices in that it’s just creating paperwork for teachers. She stated she doesn’t see anything about the execution and that the planning is demonstrated by how well the students do on tests. She also doesn’t see a connection in the monitoring and test scores. Mrs. Turner explained that when the teams visit the school buildings, they have conversation with students to determine what they are learning, what were their directions, what they are currently working on, so there are some critical conversations and observations as it relates to student learning, and this is also how they receive the rating. Mrs. Crawley added that seems sort of subjective and it doesn’t seem to be a very valid way. She also stated that she sees where students should be treated with respect, but she doesn’t see where it says students shall respect school personnel. She noted her understanding that we must demonstrate a behavior so the students will learn it, but she doesn’t see any tool in place that will indicate results of what teachers are required to do. She believes this should come from the state also and that as a result we might know ahead of time what the score might be. Mrs. Turner explained that this is a snapshot of a certain point in time and they would need to visit us every week or so in terms of really knowing what is going on in the classrooms. She said administration is also responsible for monitoring the results. Mrs. Crawley asked if it is possible to get the results of the tests at the beginning of the year so we can see how they are progressing throughout the year and the improvement at the end of the year? Mrs. Turner said there are benchmarks and assessments as well as the focus quizzes on the Superintendent’s Target Schools; and at this time, we have not begun these things on the new AU schools. Mrs. Crawley asked if the state looks at these quizzes? Mrs. Turner responded they are available for them to review. Mrs. Crawley stated pieces of paper are easy to evaluate and she believes this is where they are going with this, because all she sees is planning, planning, planning.

Mrs. Crawford referenced discussion on improving our SP Scores by improving student attendance and asked if anything has been done to help improve the teachers’ attendance? She also noted that the board used to get on a regular basis a report on teachers’ absences. Mrs. Turner explained that last year, with the Superintendent’s Target Schools, many staff members received incentives because of their increase in attendance at the building level and that percentage was at 90%. Mrs. Crawford stated she knows there is a concern about teacher absenteeism.

Mr. Hooks asked how many of the Superintendent’s Target Schools were placed on the AU list in 2010? Mrs. Turner responded that five schools were added.

Mrs. Trammel asked if the team does three-day monitoring? Mrs. Turner clarified that for this monitoring visit, they are at each school for one day, beginning when the students arrive in the morning and they stay the entire school day.

Superintendent Dawkins announced that Mrs. Woodard will share with the board the impact letter grades assigned to schools will have on school districts. Mrs. Woodard stated that the movement of the Accountability Commission is to redesign the accountability system, and the recommendations coming from that committee reflect a large increase and is the state’s attempt to take away the star status. She explained that what BESE adopted was much more rigorous than what the state’s educators recommended; and that looking at the numbers, one can see that any school below a 90 is going to have a grade of D or F. She also reported that they are presently refining this so it is possible we will hear more in the next couple of months. The superintendent announced that staff will keep the board abreast of any developments in this matter, which is believed will do nothing to help schools who are trying to improve and will send the wrong message to the staff and students.

Mrs. Bell stated that this is ridiculous and she believes it is setting everybody up to fail, and this is something the public needs to know.

Mrs. Crawford stated that it is time the public has a lesson on what BESE, the Governor and the State Superintendent are doing. She believes we need to begin speaking up about the decisions they are making that are affecting our students and schools.

Mr. Hooks again stated his concern about the new schools labeled academically unacceptable and asked how many of the five schools are under watch? Ms. Priest responded that they all are.
Mr. Rachal stated that he would like to invite Walter Lee to address the board on this decision, on how he voted, and on the justification for this decision. He said he believes it would have also been nice had Mr. Lee, as the district’s BESE representative, shared this with the superintendent and/or board president to get our input. Dr. Dawkins shared that while he has not talked to any BESE member about this, there have been discussions at the regional superintendents meetings. Mr. Rachal stated this doesn’t make any sense and shared this will adversely affect the district and community.

Mr. Hooks commented that Louisiana is not pushing its own schools, because he went to a meeting last week in Baton Rouge and Mr. Lee did not attend, so he feels sure he will not come to Caddo. He also stated that he went to Baton Rouge to hear from the Governor as to why he is taking the districts’ money, and the Governor was not in attendance either.

Mrs. Crawley asked Dr. Dawkins if this applies to charter schools as well? Dr. Dawkins responded that it is his understanding that it will. Mrs. Crawley stated that she is curious to know their scores.

Ms. Priest stated that if we talk about what is in place, this is a concerted effort by the Governor, State Department of Education, LABI, and CABL, organizations working together to help destroy public education. She said she believes this says to the boys and girls as well as the educators that are providing the boys and girls their education, that as a board, it’s an opportunity to begin doing something for the community and to educate the general public about what these organizations are doing. She said there are eight BESE members and with this year being an election year statewide, she said we have an important obligation. Mrs. Woodard corrected a previous statement regarding the top SP Score that can be earned is 240. Ms. Priest said it is also important that we do a better job of educating the local media.

Mrs. Crawford stated that in looking at BESE’s web site, Mr. Lee did support raising the SPS for the next three years; however, he voted against the grading of schools.

Mr. Riall stated with the budget shortfalls, the only two things they can cut are health and education; and as they cut education, they get us fighting among ourselves and then they are able to move their agenda. He said this is something the board needs to be aware of.

Mrs. Bell asked about town hall meetings and a possible meeting with the media and editorial board. Ms. Priest said she will get with the superintendent and the district’s communications person.

ANNOUNCEMENTS AND REQUESTS

Miss Green announced that she is collaborating with Southern University on a program to promote community and parental involvement, with a meeting scheduled for January 21 and 22 from 9 a.m. to noon. She stated she has additional information for those interested in attending. She also expressed appreciation to the board and the superintendent for the warm welcome to the board and the outstanding orientation.

Mrs. Bell requested that staff provide information on why employees are leaving.

Mr. Rachal asked for a list of consultants the district is currently using, the terms with them (length, cost, purpose and how funded), an absentee report for each school for the first semester, why we do not have a grant writer and when will we have one, and are we looking at making any changes to the AB Block and the rotation, and the possibility of a 7-period day?

Mrs. Trammel asked that the superintendent use whatever method necessary to make the Governor, State Superintendent and BESE members aware of the board’s sentiments relative the letter grade policy. She also thanked the superintendent and board members for assistance in making the transition to the board.

Ms. Priest asked that staff look into why bus drivers performing extra work for field trips must wait long periods of time for payments and why those payments are spread out. She would also like the Superintendent to move expeditiously forward with setting up the meeting between the Caddo Parish School Board and the Louisiana Legislative Delegation before this year’s Session.
to discuss Vision 2020 issues and issues that education is facing. She also encouraged board members to forward to her any issues they feel we need to address with the Legislators.

Mr. Hooks expressed his appreciation for the response to his request, but he needs to get the annual salaries for the Superintendent’s Executive Staff to include the superintendents, directors and supervisors. Mr. Hooks said he would also like to get a breakdown by school in District 5 on how the money is disbursed, i.e. Fair Park receives $15,000 for the Caddo Plan, and $1300 for the Medical Careers Program.

Mr. Burton stated that in following up on the recommendations for making some changes it is important to not only getting involved in the board meetings, but also in the Louisiana School Boards Association and other state organizations. He said it is also important to involve the community, citizen groups, etc. Mr. Burton requested that contact be made with LSBA and possibly even get on the agenda. Ms. Priest responded that we can check into the resolution committee as well.

Mrs. Crawley asked the superintendent to check into the directive from Central Office for the teachers to take up textbooks and bar code them; because even though the board was told that it did not come from Central Office, her sources tell her that the assistant principals at certain schools directed the teachers to do so per a directive from Central Office.

EXECUTIVE SESSION

Student Readmission Appeals. Mr. Riall moved, seconded by Mr. Burton, to approve staff’s recommendation for C.M., T.L., T.C., L.H. and D.D. Parents are in agreement with staff’s recommendation. Vote on the motion carried unanimously.

Legal Update and Recommendation in the Matter of Cathy Golston/Roslyn Carter v. CPSB, et.al., Case No. 09-CV-1978, U.S. District Court, Western District, Louisiana (Shreveport Division). Mr. Rachal moved, seconded by Mrs. Bell, to approve the recommendation from legal counsel relative to the matter of Cathy Golston/Roslyn Carter v. CPSB, et.al., Case No. 09-CV-1978, U.S. District Court, Western District, Louisiana (Shreveport Division). Vote on the motion carried unanimously.

Termination of Temporary Employee. Mr. Riall moved, seconded by Mr. Rachal, to approve the termination of a temporary employee in accordance with the recommendation of the superintendent. Vote on the motion carried unanimously.

Adjourn. Mr. Burton moved, seconded by Mr. Riall, to adjourn. Vote on the motion to adjourn carried and the meeting adjourned at approximately 6:42 p.m.
February 1, 2011

The Executive Committee of the Caddo Parish School Board (CPSB) met in regular session in its office at 1961 Midway Street, Shreveport, Louisiana, at approximately 4:30 p.m. on Tuesday, February 1, 2011 with President Lillian Priest presiding and Steve Riall and Dottie Bell present being a quorum. Other school board members present were Jasmine Green, Willie Burton, Charlotte Crawley, Curtis Hooks, Mary Trammel, Bonita Crawford, Barry Rachal, Larry Ramsey and Ginger Armstrong. Also present were Secretary Dr. Gerald Dawkins, Legal Counsel Reginald Abrams, staff and other visitors. Mr. Hooks read Psalms 121 and led the Pledge of Allegiance.

PRESENTATIONS

As a point of personal privilege, Board member Dottie Bell introduced Willie L. Burton and shared an opportunity afforded her to visit the JROTC Program at Huntington High School and how proud she is of the young men and women in this program.

Comprehensive Annual Financial Report. Tim Green and Cindy Thomason, Allen, Green and Williamson, shared with the board and audience the audit report ending June 30, 2010. Mr. Green presented a synopsis of the annual audit report consisting of the financial part of the audit and the single audit by the Federal Government since the district receives more than $500,000 in Federal awards. He explained that the purpose of their presentation is to discuss the financial aspects of the operation and focus on the financial, internal control and compliance testing. He expressed their appreciation to Jim Lee, Jeff Howard and other members of the staff for the help provided in conducting the audit and getting it filed appropriately. In the comprehensive annual financial report, Mr. Green noted that the School Board received two certificates from National organizations for its comprehensive annual financial report and that the district must have a clean opinion to receive these rewards. He also shared that the independent audit report, is an unqualified report, meaning they did not note any exceptions in the financial reporting, and so Caddo received a clean opinion. Mr. Green also highlighted a comparison on the General Fund revenues and expenditures and that the major change this year from previous years is the decrease in the MFP dollars Caddo receives, and expenditures exceeded revenues this year by $8 million. Some of the increased expenditures were insurance and retirement costs paid to the state and the impact it is having on the local district.

Additional areas highlighted included the Title I Program, Capital Projects (construction projects for which bond money is designated), Caddo Educational Excellence Fund (CEEF), and the Child Nutrition Fund. Mr. Green shared highlights of each of these funds, including how they are set up, how they are funded, and the expenditures in each.

Areas that the board should be aware of include the General Fund relative to the 2010-11 year knowing there is a budget that is showing some dire results and could compound the previous loss reflected. With the proposed cuts being made, he believes that the increase in the retirement costs and increase in health care costs will greatly impact school board districts’ budgets.

Relative to the Statement of Net Assets, Mr. Green explained the $67 million negative net asset and that a couple of years ago the Governmental Accounting Standards Board (GASB) required governments to begin reporting this post employment benefit, recognizing as a liability those commitments that the School Boards and other government entities have made to employees when they retire. Prior to the adoption of this standard, Mr. Green reported that they did not require governments to report this long-term liability; but now that it is being reported, the district has a large deficit number to report.

Mr. Green also stated that the Single Audit Report did not show any findings and that the agreed upon procedures are state mandates that certain schedules submitted to the state must be reviewed by the auditor to make sure that the data included in these reports is accurate and he reported no findings in this report. Relative to the decrease in the General Fund Balance, Mr. Green noted that this is a concern and while the School Board currently has approximately 15% expenditures in the undesignated reserve, the School Board will soon be below 5% and this is a great concern. He also stated that the increase in the State Retirement Rates is an expenditure that is really hitting the district’s budget hard.
Ms. Priest stated that she believes an area the board definitely must address is Caddo being on the “watch list” because of the district’s decreased fund balance. She asked that administration provide the board with those things we need to do to tighten our belts and build up this reserve fund balance. She also asked about Title I and since this is in essence a reimbursement, are these dollars the district receives that must be in reserve to spend and once they are spent, the district can request reimbursement? She questioned how much the district should have in reserve at any given time? Mr. Lee responded that with any Federal and State funds, the district must spend the money to get it back immediately. He further added that requests are made monthly and the district gets approximately $2 million back. Mr. Green referenced the receivables that are outstanding at the end of the year, and explained there is approximately $13 million worth of costs incurred that the district is entitled to and has made requisition to the State for reimbursement. Dr. Dawkins responded that certainly the budget staff brings to the board will include a fund balance and a restoration plan.

Mrs. Bell asked about Caddo being on the watch list? Mr. Lee explained that this is the first year Caddo has been on the watch list. He further explained that each year the state does a fiscal risk assessment and one of the things looked at is the undesignated fund balance and if it is below 5%, they have the same concerns as the school district. Mrs. Bell asked if she understands correctly and this is serious? Dr. Dawkins responded that it is absolutely serious. Mrs. Bell also asked if she understands correctly that it is the State Department of Education that puts districts on the watch list? Mr. Lee answered that is correct. Mrs. Bell clarified for everyone that it is the state that is doing this and not a member of the Caddo Parish School Board.

Mrs. Crawley asked when the state is looking at the undesignated fund balance, do they take into account the $35 million that is designated, but it is not a legal, required designated fund? Mr. Lee responded that it does not matter. Mrs. Crawley stated it is her opinion that Caddo’s frugality has hurt the district rather than helping us. She added that our main goal needs to be educating the students the best we can and not just looking good.

Mr. Hooks asked if we are looking at the possibility of laying off employees? Ms. Priest responded that at this time budget sessions have not been held; however, there are some issues that the board will need to address during the budget process.

Mr. Rachal stated that about four months ago the State Superintendent made a comment that Caddo had too much money and he believes that he was trying to figure out how to get our money. Now it appears that the district is being punished because we have “little money”. He also asked about the capital projects fund balance and the $23.4 million undesignated capital projects fund and the difference in the $31 million on the landscape attachment. Mr. Green explained that the $10 million is for contracts in place, but the money has not been spent and the $23.4 million is the portion in which contracts have not been let to date. Mr. Rachal asked if he understands correctly that the $23.4 million in capital projects can be spent on capital projects, and there is nothing attached to it at this time? Ms. Thomason clarified that there are no legal contracts attached to them, because there may be projects planned but there are no contracts on the projects. Mr. Lee explained that this is the remains of the proceeds of the bonds and there is a project list for these funds; but at this time, we do not have contracts for the individual projects. Mr. Rachal stated that as we go through the budget process, he would like to know the obligations we have for the $23.4 million.

Mr. Riall asked if there is any other criteria in which the state judges the district on besides our fiscal health and academic health, i.e. Arkansas judges on fiscal, academic and attendance numbers. Dr. Dawkins stated that he is only aware of the fiscal and academic. Mr. Abrams added that a part of the academic piece is if you have too many schools in AU status, they can take facilities and place them into the Recovery School District. Mr. Riall asked what action will the state take and at what stage will they take action on the district in regard to this fiscal watch? The superintendent stated that his only communication with the state is they want to work with districts to help them; however, at this time, that help has not been defined and the help needed is additional funds and he has not seen any. Mr. Riall asked if we know of any other parish that has been on a “watch” list in a similar situation and they took action. Dr. Dawkins said he believes there are at least 10 districts, but he is not aware of the specific action taken. Mr. Riall said if this information is available, he would like to receive it.
Mr. Hooks shared that budget is one of his main concerns and asked if we are being completely honest with the public about the budget. The superintendent responded that we are sharing everything we have from a budget perspective, and this audit is a part of that along with the upcoming budget process.

Mr. Burton commented on the $23 million in the capital outlay from the bond issue and asked if there is anything outlined that is directed toward these funds? Mr. Lee explained that we do, but at this time the contracts have not been let, i.e., QZAB is being used for upgrading technology and electrical at the schools and the bonds are used for air conditioning and since air conditioning is completed, the remaining is to be used to update lighting.

Mr. Rachal thanked Mr. Lee and the staff for the work they do and for the awards received. He asked if the state is saying we are on a bad financial list and what are two or three main reasons for the hits we experienced in the district’s revenue? Mr. Lee responded that we had a decrease in the MFP revenue which comes from the state, and we experienced an increase in the retirement cost (from the state), and health care. Mr. Rachal stated that he finds it interesting that the state has put us on a fiscal "watch" list because of our financial issues and the state is the one who has cut revenue to the district and increased our cost in the retirement.

Ms. Priest announced that last week many board members attended the Louisiana School Boards Association Governance Workshop on Act 705 required training and one of the training sessions addressed budget for every district in the state relative to revenue, sales tax, property tax, etc.

Compensation Study Update. As requested by board members, Chief Operations Officer Woolfolk shared an update on the compensation study. He highlighted the process that got the district to where it is today, the objective and goals, the project activities for achieving the goals and objectives, the implementation, results of implementation, and future actions.

Mr. Woolfolk stated that in 1995 Arthur Anderson conducted a compensation study for Caddo. Out of this study, a Personnel Evaluation Committee was established to administer this study on an on-going basis. He said during this time the guidelines for the administration were never updated and the time between the studies should not have exceeded three years, there was a lot of mistrust with committee members, and as a result we received numerous complaints and grievances.

In June 2008, Mr. Woolfolk reported that the CPSB approved a new study and in October 2008, the RFP was received from Rahmberg, Stover and Associates and approved by the board to put together a compensation study, 13 years after the Arthur Anderson. The objectives and goals for this study were to provide an appropriate salary structure that reflected the current market rate for similar positions in the region, as well as be internally equitable and externally competitive by using a third party administrator who would objectively develop and maintain an updated salary structure. The steps Rahmberg followed included sending letters to all employees requesting position information, interviewing and addressing compensation grievances, reviewing classification for specific positions (at least 18 positions), developing and distributing job analysis questionnaires, reviewing job descriptions, developing position evaluation ratings, etc. He explained that positions were evaluated based upon 1,500 job analysis questionnaires and job descriptions were reviewed by interviewing individuals (directors and other employees). Two sets of criteria established and utilized to evaluate positions were (1) factors for professional and non-administrative positions, and (2) factors for administrative positions. Mr. Woolfolk explained that the market analysis used was the Louisiana Department of Education Profile of Educational Personnel Reports, and occupational wage surveys.

Regarding implementation, Mr. Woolfolk explained that at the completion of the study the administration had three options to consider before implementation: (1) use the Arthur Anderson Study Table for one more year, (2) use the Arthur Anderson and Rahmberg study tables for a transition year, or (3) implement the new Rahmberg study table. He stated that the decision was made to implement the study by Rahmberg which was a two-year old request and needed to be implemented upon completion. He said the step cost to the district was approximately the same as the Arthur Anderson study and would also put the board in the position of immediately correcting the inequities as they were brought to staff’s attention. With implementation, all employees were given the closest step increase within their new pay grade on the Rahmberg Pay Schedule and those who had reached their max would not be reduced, but red circled until the
schedule for that particular position reflected an increase in actual pay. Red-circled employees are considered to be red circled when their rate of pay exceeds the maximum rate or top salary for their assigned pay range. Mr. Woolfolk also reported there were 59 employees that were red circled, about 350 employees that moved up a grade and at the lowest level at that grade. He also reported that approximately 2,500 employees did receive an increase even though it may not have been as much as employees would like to have received. He said 18 discrepancies were sent to the consultant and it was reported that he believed two of them needed to be changed. Also, the implementation of the Rahmberg study cost approximately $700,000.

As we move forward, Mr. Woolfolk noted there may be a need to change how we do business and there may be some situations in which it will be necessary to look at our compensation structure. If so, the reclassification procedure will be used. In using this process, it will also be important to review the salary structure every two years for its adequacy within the fair market. Mr. Woolfolk also explained that a memo was sent to the employees relative to positions that were reviewed as well as the grievances.

Mr. Hook asked staff to explain no one had a pay loss. Mr. Woolfolk responded that nothing in the study created a reduction in pay; however, if someone, for example, was a coach and they are no longer a coach, their salary may have been reduced by the coaching amount. Mr. Hook also noted Mr. Woolfolk’s statement that no salary will be reduced because of the study, and Mr. Woolfolk said that is correct. Mr. Hook said in the 9 months he has been on the board, he has not had one person thank him for a raise, but he has had people to tell them they are making less than those working in classified as well as a great many of administrators. Mr. Woolfolk said if he had names, he could investigate specific situations; but if he doesn’t have the names, he doesn’t know how he can investigate the matter. Mr. Hook said he believes this is a total rip off.

Mrs. Crawley stated that she believes when people say they got a cut or loss in pay, they were talking about what they were expecting if they got the step increase on the Arthur Anderson pay scale. Mr. Woolfolk said it could be that they took a cut based on what they anticipated they were going to receive. Mrs. Crawley asked, relative to reclassification procedures, if there is any way for employees who believe that their supervisor has rewritten their job description and added things to it that they can get this addressed other than through their immediate supervisor. Dr. Dawkins said we would hope it could be done through the immediate supervisor, and that the job description cannot be changed without the supervisor being a part of the process. He added that individuals cannot make these type changes by themselves. Mrs. Crawley said she understands chain of command, but at times there may be a conflict, so she believes there needs to be an alternative for these situations. Dr. Dawkins stated that something will be put in writing.

Mr. Riall asked Mr. Woolfolk about the salary schedule being re-evaluated every other year and will this be done by Rahmberg, Stover or will it be in-house. Mr. Woolfolk responded that the reason why Arthur Anderson did not work is it was not updated in a timely manner and staff is recommending that this be updated in a timely manner and that it be done by an outside consultant. Mr. Riall asked the superintendent about Rahmger’s cost, and Mr. Woolfolk said approximately $100,000.

Mr. Rachal referenced Mrs. Crawley’s comments and Mr. Woolfolk’s response; and knowing that many addressed the board on this issue, he believes having someone at arm’s length away from it gives relief. He also stated his agreement that the time between studies was too long and asked if there are any current grievances reflective of the pay schedule. Mr. Woolfolk said one. Dr. Dawkins responded there is one on the agenda and another in the pipeline. Mr. Rachal also stated that he believes those who are saying they lost money are referencing future income had they been on the Arthur Anderson pay scale. He also stated he agrees with the plan to revisit the plan every two years.

Mrs. Bell commented that the board did not do this study just because they needed something to do, but because there were so many complaints being voiced to the board every month. She said she is looking out for the employees and 13 years was too long without looking at this to determine where the problems might be, and is why she supported moving forward.

Mrs. Trammel stated that she was a part of both studies, but because job descriptions are so generic, she believes updating job descriptions would help tremendously.
Mrs. Crawley asked about the number of employees that are red circled and if the identified 59 employees is a correct number. Mr. Lee responded that this is the original from Rahmberg, Stover; however, he is working on updating this number. Mrs. Crawley also shared that because she was upset with the outcome of the compensation study, she wants people to know that she did not sell out; however, after meeting with the superintendent, Mr. Woolfolk and Mr. Lee, she now understands the implementation of the compensation study. She also stated that her issue was that we rushed on making the decision and she never saw the three possible implementations.

Mr. Hooks stated his main concern is some people on the committee was like putting the fox in charge of the hen house and he can’t agree with this.

Mrs. Armstrong asked about the third party administrator and if that person will make recommendations of changes or upgrades to the superintendent and will the superintendent automatically accept the third party’s recommendation? Mr. Woolfolk responded that he believes it will be up to the superintendent whether or not he accepts any recommendation; and Dr. Dawkins said he would not automatically accept recommendations, but will rely heavily on their expertise and evidence before making a decision. Mrs. Armstrong asked about Mr. Rahmberg and his firm doing the review every two years and is this the best way to address it? Dr. Dawkins responded that it is best to have consistency in this, so it would be his preference to have this company do the review.

Mr. Riall asked about the step increases on the Arthur Anderson plan and if the step increases on the Rahmberg plan are in line with them? Mr. Woolfolk responded they are not, because the Arthur Anderson table and grades are different than the Rahmberg table. Mr. Riall asked if employees would have gotten a greater step increase on the Arthur Anderson plan than they did on the Rahmberg, Stover plan? Mr. Woolfolk responded that some would have. He added that staff budgeted $800,000 for step increases on the Arthur Anderson plan and the Rahmberg plan was approximately $700,000 and all the Rahmberg plan did was bring employees in line with the market. Mr. Riall asked if this program is re-evaluated every other year, will the district get into a situation where every other year people will not get their step increase and we will experience the same as with the implementation? Mr. Woolfolk responded that it is possible; however, if you re-evaluate more frequently, the changes will probably be minimal. Dr. Dawkins added that it is almost unheard of to wait 13 years without reviewing a compensation plan, so if we don’t do it more frequently, it is a disservice to the employees.

Mrs. Armstrong asked the superintendent about the summary of classification reviews and if there were 18 positions reviewed by Rahmberg or is our administration doing this? Mr. Woolfolk clarified that these have been reviewed by Rahmberg when they conducted the study. Mrs. Armstrong stated she remembers Dr. Robinson being moved into the one position, but asked the superintendent to explain who is holding the remaining three positions. Dr. Dawkins stated that the Area Director for School Performance is being held by Mrs. Gunn and the other two positions remain unfilled. Mrs. Armstrong asked the superintendent if he anticipates keeping these two positions open? Dr. Dawkins said he will fill them as soon as he finds the best fit for them. Mrs. Armstrong said she believes we need a freeze on filling positions at this time. Dr. Dawkins said there is a freeze on everything which has caused him to not move quickly on these positions, but at some point he hopes to move forward with filling them. She also asked if the additional positions have been assessed and/or acted on? Mr. Woolfolk explained that all of them have been reviewed by Rahmberg and closed. Dr. Dawkins added that No. 15 on the list of positions is on the February agenda for the board’s consideration.

Mr. Hooks asked the superintendent about the summary of classification reviews and if there is something to be done or will it be left the way it is? How did Rahmberg justify this? Dr. Dawkins explained that this is an issue where elementary/middle school principals and administrators are paid on a schedule and in the mix is K-8 administrators, and this is being clarified by the middle school APs. He has held an initial meeting with this group and they are putting together additional information.

**Update on Blue Cross/Blue Shield.** Randy Watson, director of insurance, shared with the board an update on the recent agreement between Blue Cross/Blue Shield and Willis Knighton and Willis Knighton and their physicians will remain in the network. He explained how this
works and that the large number of health care providers in the network agree to (1) discount their rates, (2) file claims, and (3) not balance bill the members. He stated that Willis Knighton is one of the largest providers in the Blue Cross network in this market and they were finishing a three-year contract renewal. Because an agreement had not yet been made on a contract that would end March 1, 2011, state law requires that the insurance notify members in advance if a provider is going to pull out of the network. Thus, Blue Cross had sent out some early warnings to some of its larger clients; however, Blue Cross and Willis Knighton did come to an agreement so there will not be any changes. Dr. Dawkins said he asked Mr. Watson to bring this to everyone’s attention and expressed appreciation to Mr. Watson for his work and leadership that were important in making certain there was no interruption in services.

Communications Update. Tricia Grayson, director of communications and marketing, noted that in the recent PTA Newsletter, Dr. Dawkins shared that next week is National School Counselor Week and she read a proclamation recognizing Caddo’s 117 counselors and the important part they play in the success of Caddo’s students. Mrs. Grayson stated that she has been in her role as Caddo’s communications director for almost a year; and in response to the questions of what she does and why the school district needs a public relations person, she shared with the board accomplishments and plans for the Communications Department. She explained that if there is not someone to manage the public opinion function of the organization, then the critics’ voices are the only voices heard. She reported that their department manages crisis communication, obtains input from the community, supports two-way internal and external communication, and supports the schools and students. Mrs. Grayson said when she came into her role, she was given three primary goals: (1) helping the district speak with a unified voice (consistent processes and messages), (2) effectively communicating and receiving feedback to build public trust and correct misperceptions, and (3) developing an effectively utilized community partnership. To get there, she said we will communicate more with the employees (more newsletters, etc. for communicating better internally); build a strong district “brand” (an experience, what feeling people get when they interact with the district); utilize technology (current, appealing, user friendly web page), develop uniform communications and marketing guidelines; put together a communications advisory group, and continue media relations workshops for administration and principals. Additional responsibilities of the Communications Department are partnerships (We Care, United Way), Teacher of the Year, Senior Recognition, Superintendent’s Action Line and Feedback, Parent Notification System, logos and graphic advertising pieces. Also the Communications Department works to market the Caddo Schools through the various media avenues available. She also highlighted the updates to the web site and how it is used to highlight activities in the district. Mrs. Grayson also shared that when she first came to Caddo she had heard that most of the media coverage was negative, so in tracking Caddo’s media coverage, she found that the media coverage is not all negative, but mainly neutral (no slant one way or the other). While she noted approximately 25% of the media coverage as negative, she also noted that approximately 30% was very positive which she believes represents opportunity for growth. Mrs. Grayson also noted recent increased positive exposure as a result of partnerships, i.e. We Care, Bullying Video, Chesapeake Energy’s Discovering Tomorrow’s Leaders, and most recently Channel 6’s Bus Stop Forecast where they highlight Caddo’s students and activities they are involved in at their schools. She also stated that everyone in the district is in the business of public relations, because phone calls, emails, etc. are interactions with the community.

Mr. Rachal asked for additional clarification on the Alert Now program? Mrs. Grayson explained that the Alert Now is connected to the JPAM System as the calling component which allows her to, even from home, notify all parents and employees, for example when the district is closed. Mr. Rachal asked if one followed Twitter, would this mean they would be updated that quickly also? Mrs. Grayson responded that is correct, and the web site should be updated soon so anyone can access through Caddo’s web site. Mr. Rachal also inquired about persons wanting to find out what school their children would attend. Mrs. Grayson shared that when she received his concern, a link was added on the home page “Find My School”. Mr. Rachal also expressed appreciation to Channel 6 for this outstanding way to recognize our students.

Miss Green asked if Channel 6 is willing to do this everyday and if it is possible to get the schools in her district involved in this program? Mrs. Grayson said she had two meetings with principals about this and reminders and encouragement to the schools are always helpful.
Mrs. Crawley asked if “Alert Now” calls board members? Mrs. Grayson indicated that it can. Mrs. Crawley also expressed her appreciation to Channel 6.

Superintendent Dawkins stated that he has asked Mrs. Grayson to place board members on the “Alert Now” list and if there is anyone that does not wish to get these alerts to let us know.

Mrs. Armstrong said she appreciates the “Alert Now” and that she has received a number of positive feedbacks for this.

Mr. Ramsey commented that these things don’t just happen overnight, and he believes this is a great report and that the relationships being built in order to achieve these many things he believes will pay dividends for years to come. He also noted the importance of the web page development and that he believes it is looking very good and moving in the right direction. He shared his appreciation for the Communications Team’s aggressiveness in moving forward.

Mrs. Bell asked that she be notified when her schools might be featured on the Bus Stop Forecast.

Ms. Priest expressed her appreciation to Mrs. Grayson for how the incident at J. S. Clark was handled and how the parents were alerted. She also shared a letter she received from The Times in appreciation for Mrs. Grayson’s cooperation and efforts in working with the media.

Mr. Hooks also expressed his appreciation to Mrs. Grayson for all that she does.

The superintendent expressed his appreciation to Mrs. Grayson and that she has brought a lot of expertise to the position and she has brought great response and results on expectations.

Mr. Burton stated that discussions have been held in the past about getting the positive viewpoints out to the public, i.e. featuring students on the site and in the media. Mrs. Grayson explained that this is something they are aiming to do on the Caddo Spotlight (on the web page).

ESTABLISH THE AGENDA FOR THE FEBRUARY 15, 2011 CPSB MEETING

Superintendent Dawkins highlighted the items for the board’s consideration on February 15, 2011.

**Bids (Purchasing)**. Dr. Dawkins explained that this PEP Grant is 100% grant funded and is for fitness equipment. Mrs. Turner said it is for the Superintendent’s Target Schools, middle schools and elementary schools, as well as professional development for the physical education teachers and the curriculum development. Dr. Dawkins stated that staff will provide the board with a list of the schools, and Mrs. Armstrong asked if Keithville can be added to the list.

**Revised Compensation Configuration/OTs/PTs**. Mrs. Crawford asked about the cost to make these changes? Dr. Dawkins said it will not be any additional cost to the budget, but it will affect new employees in these positions. Mrs. Armstrong asked that it states adding back the 10% premium for OTs/PTs and is this what is being discussed? Dr. Robinson said it will not, because no one lost any money in the transition from Arthur Anderson to the current plan, so they were literally frozen; however, new employees will be paid based on the new salary configuration recommended by Mr. Rahmberg.

**Resolution of Continued Employment**. Mrs. Armstrong asked for an explanation of this item, and Dr. Dawkins explained that annually the Federal and State Laws provide schools exclusion from eligibility for unemployment compensation for the break during the summer months for certain employees. Mrs. Bell asked who is included in this group? Dr. Dawkins explained that it is for anyone who has a gap in the 12 months, i.e. support, classified employees, and it is a reasonable assurance that they will return to work.

**Resolution Calling for State Mineral Board to Lease Minerals on Various Properties**. Mr. Ramsey asked Mr. Abrams about the $7,000 bonus per acre and Mr. Abrams said the attorneys put this amount in and that the company had offered $6,500. He also said that the number of properties listed are more than what he believes we have mineral rights, and while the initial approval is for all the properties, it could come back a fewer number. Mr. Ramsey asked if all
the properties are catalogued? Mr. Abrams responded that is correct and is why he believes the number is not correct.

Mr. Rachal asked for a great legal description and GM number, and if possible a plat that pinpoints these areas?

Mr. Riall asked Mr. Abrams who offered the $6,500 per acre? Mr. Abrams responded that the company offered this amount.

**Proposed Change in Board Meeting Dates.** Mrs. Crawley inquired as to why it is being proposed to change the board meeting dates? Ms. Priest explained that Dr. Dawkins is scheduled to be out of town the week of February 14th and is why it is being proposed to move the meeting from the 15th to February 22nd. Regarding the March 1st Executive Committee meeting, because the Superintendent will be out for an entire week and he is to bring the Vision 2020 recommendations to the board at the first meeting, asked that the meeting be postponed. Mr. Abrams explained that the only way the board could vote to change the regular board meeting would be if a special meeting was called to vote on this issue. He further stated that the agenda item should be to change the March 1st meeting to March 8th and the board will have to handle the other issue in a different manner. Ms. Priest announced that for the February 15th date, the superintendent has advised he will have a designee present.

**ADDITIONS**

Mrs. Crawford asked that an item “Proposed Policy for an Appeal Process for Non-Tenured Teachers” be added to the agenda. She will provide the backup information

Ms. Priest asked that an item be added for the “CPSB to Draft a Letter/Resolution to LSBA and the LSBA President Stella Lasseigne, to develop a plan to actively encourage other districts to develop lobbying and to become advocates against the letter grade and other issues coming before this session”.

Mr. Rachal asked if BESE has already approved the Letter Grade? Ms. Priest said that is correct. Mr. Rachal asked if this has to go to the Legislature? Dr. Dawkins responded that it is now law. Mr. Rachal asked if the letter/resolution can be left open for additional input? Ms. Priest agreed.

Dr. Dawkins requested that the following two items be added to the agenda: (1) School Calendar, and (2) Funding for OPEB Liability for funding future retirement costs.

**CONFIRM THE AGENDA AND CONSENT AGENDA**

President Priest announced that the consent agenda items are 6.03, 7.01, 8.01-8.07. **Mr. Riall moved, seconded by Mrs. Bell, to approve the proposed agenda and consent agenda for the February 15, 2011 CPSB meeting as presented. Vote on the motion carried.**

**POLLS AUDIENCE**

Jackie Lansdale, president of the Caddo Federation of Teachers/Support Personnel, shared her concern regarding the Reconfiguration of Compensation for OTs and PTs because there is an ongoing grievance that is at Level III; and if the board passes something, where does it leave the grievance. She also expressed her appreciation for the Superintendent’s Advisory Committee and the opportunity to exchange ideas. Mrs. Lansdale said that one of the things that they continue to bring to the board is the concern about making the right choices for Caddo Parish, and she noted the fact that the DeSoto Parish School Board has conscientiously made a decision to pass Haynesville Shale money on to the employees. In looking at the item addressing funds from the Haynesville Shale, she encouraged the board to conscientiously make overtures to its employees. She also said she believes a lot of the sting from the Compensation Study would have been removed had the board addressed the employees earlier in the year, and she encouraged the board to do something positive for the employees. As she has stated to the superintendent, Mrs. Lansdale said she would have loved to have been a part of the compensation study, because the employees never asked for another study, but only asked that something be done about the PEC, and this issue could have been addressed in the Arthur Anderson study. She also encouraged the board to update this compensation study.
Jon Glover, employee, addressed the board on the Compensation Study, and that she came ready to
hear an explanation from the superintendent as to why he thought the compensation plan was
in the best interest of the support personnel; however, she did not get that. She said she is in awe
at the presentation and the details of the plan did not do it. She said she is amazed at the
cleverness of the design of the plan and how it was manipulated to show the board what they
wanted the board to see. She said the support employees are still faced with the same questions
because no one has provided any resolution to what has been asked. Ms. Glover reminded the
board that the support staff is looking at this from their perspective because it is the support
employees who got hit with it. While staff reported that the report was looked at from the
market share perspective, she wants to know if it’s the market share that told the district to
devalue its support employees? She doesn’t think so, but yet that is what Caddo continues to do.
She said she hears what is being said, and that is to trust; but while the support employees
understand that the reason they are here is for the children’s education, there will not be any
world class schools for world class students without the world class employees. She reminded
the board that the support staff has the expertise and skills that should demand that these
employees be paid adequately; however this is not the case. Ms. Glover again stated that the
board has not addressed the issue brought to the board some nine months ago to address the
grievances. She believes that rather than addressing them, they hid them in the compensation
plan and it is disheartening that it has come to this point.

Shannon Jett, employee, addressed the board on the compensation study and what she thought
the board was going to do about it. She shared with the board that under the old salary schedule,
employees would have gotten a step increment in September and that with the implementation of
the new compensation study, she was not moved on the scale at her years of service, but she was
moved to the place on the scale closest to her last year salary. This move, because of increase in
taxes, insurance, dental, retirement, reduced her check instead of increasing it. She noted that the
study noted that the teacher’s aides were $17,000 underpaid and she believes whoever looked at
this said there was no way they could give that amount of money. She also shared her concern
that when someone does not show up and they have to fulfill that person’s responsibilities in
their absence, they are not getting paid for it. Ms. Jett encouraged the board to take into
consideration why the support employees are so upset about what was done.

Adjourn. Mr. Riall moved, seconded by Mrs. Bell, to adjourn. Vote on the motion to adjourn
carried and the meeting adjourned at approximately 7:17 p.m.
February 15, 2011

The Caddo Parish School Board (CPSB) met in regular session in its office at 1961 Midway, Shreveport, Louisiana at approximately 4:30 p.m. on Tuesday, February 15, 2011 with President Lillian Priest presiding and the following school board members present being a quorum: Steve Riall, Jasmine Green, Willie Burton, Charlotte Crawley, Curtis Hooks, Mary Trammel, Bonita Crawford, Barry Rachal, Larry Ramsey, Ginger Armstrong and Dottie Bell. Also present were Superintendent Gerald Dawkins and Legal Counsel Reginald Abrams. Mr. Hooks led the prayer and Pledge of Allegiance.

PRESENTATIONS AND RECOGNITIONS

Tricia Grayson, director of marketing and communications, on behalf of the CPSB and staff, presented the following special recognitions. The president and superintendent greeted and presented each honoree with a certificate/award. Administrators, families and friends present were also recognized.

Queensborough Percussion and Dance Group. Students from the Queensborough Percussion and Dance Group shared with the board an exhibition of music and dance in celebration of Black History Month. Geraldine Walker is the music teacher and Beverly Cole is the principal.

Caddo Public Schools 2010-11 District Students of the Year. The following students were recognized as Caddo’s Students of the Year for 2010-11: (1) Carson Basinger, South Highlands, Elementary Student of the Year; (2) Neil Nathan, Caddo Middle Magnet, Middle School Student of the Year and also one of 18 finalists in the state; and (3) Marshall Watts, Captain Shreve, High School Student of the Year. Neil also was selected as the Louisiana’s Top Youth Volunteer in the 2011 Prudential Spirit of Community Awards Program and Marshall Watts will attend Texas Christian University on a full scholarship.

Intel Science Talent Search Semifinalist. Allison Wang, Caddo Magnet High School, recently was recognized as the semifinalist in the Intel Science Talent Search. Mrs. Grayson stated that Miss Wang was chosen from nearly 2,000 applicants and is the only student in Louisiana to be recognized in this competition which awards what is known as the Jr. Nobel Peace Prize. She also announced that Miss Wang participated in the Science and Medicine Academic Research Training (SMART) Program sponsored by Biomedical Research Foundation and LSU Medical Center, with her research focusing on the identification of two potential targets for chemotherapy drugs in treating breast cancer. She and her school each will receive $1,000.

2011 Louisiana Junior Science and Humanities Symposium. The following Caddo Magnet High School students were recognized as winners in the 2011 Jr. Science and Humanities Symposium: Alexander Ross, Daniel Wheeler, Hannah Thompson, and Joy Shan.

2010 Siemens Science Competition Semifinalists and Regional Finalist. The following students were semifinalists in the 2010 Siemens Science Competition: Jessica Cruzan, Danny Felty, Yoon Jee Kim, Allison Wang and James Young from Caddo Magnet High School. Joy Shan was the regional finalist in this competition.

State Wrestling Tournament. Congratulations were extended to Jeremiah Thornton, Louisiana State Wrestling Champion at Weight Class 189, and Deyonta Horton, Louisiana State Wrestling runner-up at Weight Class 171. Jeremiah and Deyonta are students at Huntington High School. Also recognized were freshmen students Decoreyon Howard and Xavier Wilson, as well as Andreas Sloan and Reginald McRae. The Wrestling Team Coaches at Huntington High School were also recognized. Mrs. Bell said her only disappointment was these students were not featured in the newspaper and she has shared this with the education writer for the Times as well as Channel 3.
VISITORS

President Priest acknowledged members of Boy Scout Troop 316 and welcomed them to today’s meeting to observe the work of the elected officials.

Felicia Edwards requested a meeting with School Board Member Curtis Hooks regarding her son, a student in Caddo Parish Public Schools.

Frederic Washington shared that recently the State Department released a list of schools that are called high performing, high poverty schools and he would like the board to look at the two schools recently added to this list (Claiborne and Judson) and determine if they are in fact high performing, high poverty schools. He said he believes the goal in doing this is to make everyone aware that there are schools with a high number of students who live in poverty and this is their justification for the harsh reform. He shared with the board that according to the Department of Education, a high performing, high poverty school is one that is 90-90-90, which means that 90% or more of the students are minority, 90% or more made basic or above, and 90% or more are on free or reduced lunch. He further stated that according to recent reports in the newspaper, 40 of Caddo’s schools will have a letter grade of a D or F; and he urged the board to send a resolution to the State Department of Education in opposition to the letter grade and that we will not acknowledge these schools as high performing, high poverty schools.

Jon Glover shared with the board her disbelief in the board’s willingness to accept the explanation given on Tuesday, February 1, 2011, regarding the compensation plan. She said the extent exercised in delivering such, she believes, was unique at best. Ms. Glover said in totally understanding there may be a need to address the salary schedule, more timely than had been done, it just doesn’t provide the essence of what was shared. A market study was done and the results determined that the support personnel was being paid adequately based on one’s perception and inadequately as was shown in the compensation plan. She said she believes the need to devalue the employee’s worth is truly evident; and with the system currently being in a financial crisis, as reported by those who oversee the budget, yet when she looks at the budget, she wonders why. Ms. Glover stated that it is more than obvious because when funds in excess of $1 million are expended for a project, $700,000 to implement another project and $193,800, one can see why these crisis have arisen. She said that each project alluded to had sufficient staff to perform the task associated therewith, yet we opted for outside sources. Ms. Glover noted that she came through the system when the schools were separate, Black and White, and saw those who fought diligently to end segregation and endured adapting attitudes and behaviors that were inconsistent with what they knew. She said when something is new and very few understand the newness, it leaves others blind; and when integration came aboard, it was known that equality was the focal of the fight and ultimately is what they thought they were getting, but in the end this was not true. Just as integration had its own demons, so does the compensation plan in that the employees were given only the information that those in power thought was pertinent and everything else was left to chance. Ms. Glover said support personnel came to the board in good faith with issues and concerns about their salaries and the board turned a deaf ear the same as those who devised the Civil Rights Act of 1964 when they hid things in the act that promoted their own interests and not the interests of those that needed the attention. She said she believes everyone can agree to disagree that this plan is less than effective and it offered no relief to the support personnel. Also, she stated if the present market value of a support employee has diminished, she wonders what it has done to the administrative employees, and is it true that the rich only get richer and the poor remain poor. Noting that a few support employees did well above what was expected, but the vast majority lay dormant with their salaries; and if the effects of the economy are so devastating, she wonders why the administrative personnel are not complaining about their salaries as the support personnel are. She asked the board to remember that all are employees of the Caddo Parish School System and all contribute to making the system world class for world class students.

Hayden Flint, student, shared with the board his experience in attempting to get assistance from staff in changing his schedule so that he can spend more time at work since he has far exceeded the requirements toward graduation. He shared with the board the steps followed and the time it took to get a response, which he still has not received. He also said he met with the superintendent who reprimanded him for contacting the State Department about this issue, and told him it should have been handled at the school level. This is when he told him that it had not
been handled at the school level, and the superintendent dismissed him saying that the Chief Academic Officer needed to address this issue. Mr. Flint provided copies of documentation of his request and asked that he be given a response as soon as possible, along with an explanation as to why it could not be handled at the school level and why it took more than four weeks to be resolved.

Darrel Robinson, Caddo Association of Educators, shared with the board on the new grading system for Louisiana’s schools and referenced the letter penned to the Louisiana School Boards Association and printed in the Times. He also noted a case where Colorado adopted a proposed plan by a coalition of businessmen forcing education reform that endorsed the same strategy and how they quickly adopted and launched this plan, but they quickly abandoned it because it did not work. He said he questions if everyone is willing to ban together and get this repealed. Following his previous comments to the board on the new grading system, he spoke with employees and they are not aware of the grading of schools and value added, thinking that a lot of what is happening is as a result of the local board. Mr. Robinson stated that he believes it is incumbent upon the board to make all the employees aware that these things are coming from the state department. Mr. Robinson also shared that Paul Pastorek recently stated that we have finally begun to not only reform, but to transform education of the United States and that public education has been a monopoly for over 100 years. Until we dismantle the monopoly, create a competitive environment and create places where creativity initiatives thrive in the school buildings, we will never be successful. He asked why is public education a monopoly when there have always been private schools, church related schools, home schools, and all types of charter schools? He asked are thousands of Louisiana children not thriving and succeeding in Louisiana Public Schools? He asked are not children in public education in Louisiana subjected to some of the most creative and self-motivated teachers in the country? Or is Pastorek speaking of being successful in destroying public education as we know it and replacing it with some corporate board room thought out clandestine scheme to privatize education in the name of reform or to put public education money in the pockets of for-profit education companies? He said he believes it is important that those being affected must play this game together.

Jackie Lansdale, Caddo Federation of Teachers/Support Personnel, stated that the Federation has recently joined “Better Choices for a Better Louisiana”, sharing the concerns of many non-profits that there needs to be a more balanced approach to solving Louisiana’s budget problems. She said they believe it’s important to look at ways to fill budget needs in our state instead of taking the approach that cuts are the only answer. She said we are facing a $1.6 billion deficit which is the first fiscal crisis since the great depression. Mrs. Lansdale said the question is how does a state with a healthy budget a couple of years ago end up this way? She referenced the current economic recession felt by the entire nation, but mostly we find ourselves cutting health care, and education and other programs important to supporting a healthy middle class because of the choices the state government has made. She said she believes joining with “Better Choices for a Better Louisiana” will offer the opportunity to elevate our voices by saying lets make better choices, lets be transparent in our choices, lets evaluate every single funding string and save, but not at the expense of the future of the State. Mrs. Lansdale said the request is being made of the Caddo School Board, the overseers of Caddo’s budget, to take the same approach. She compared the current fiscal state with the fiscal state in 2003 and when it happened in 2003, the board stated it would not happen again on their watch, and she asked what happened? Seeing a failure by the State to fund any increases in the MFP, and knowing that the increase in insurance and retirement costs created a one-two punch, they are asking the board to be transparent in its fiduciary decision making and examine and pursue every funding stream possible - choosing the school house over Wall Street, choosing employees over consultants, and choosing to make better choices for a better Caddo.

**ESTABLISH THE AGENDA AND THE PROPOSED CONSENT AGENDA**

Chief Academic Officer Turner highlighted the items on the agenda for the board’s consideration. President Priest announced that items 6.02-6.03, and 8.01-8.07 are the consent agenda. Mr. Riall moved, seconded by Mr. Burton, to approve the consent agenda for the February 15, 2011 CPSB meeting.

Mrs. Lansdale brought to the board’s attention her concern regarding Item 8.01 and the fact that there is a grievance coming to the board regarding the Occupational Therapists and the Physical Therapists and the issues they have beyond what is on the agenda. She asked the board to
reconsider whether or not it is prudent to pass this at this time; and if so, they will proceed with the Level IV grievance.

Regarding Item 8.06, Mrs. Lansdale stated that according to her calculations, the monies from the leases total approximately $800,000, and shared with the board a write-up in West Virginia on the DeSoto Parish School Board approving an extra payment in December from the Haynesville Shale, as well as noting that employees in Red River Parish received a pay increase of an additional $2,500. She also said the information stated that the southern one-third of Caddo Parish had a gas well every square mile and how well the parish has done in leasing public land for exploration having put approximately $40 million in the bank to date. She said she finds these facts interesting and also that the districts were willing to pass these monies on to the employees. She asked the board to make sure that any extra dollars available go to the classroom and not pet projects.

Vote on the motion carried unanimously and the following is a summary of the board’s action.

**Item No. 6**

**6.02 Requests for Leaves.** The board approved the following requests for leaves as recommended by the superintendent and submitted in the mailout.

**Classified**
- Catastrophic Leave, February 2, 2011-March 16, 2011
  - Jo A. Sellers, Teacher, Summerfield Elementary, 18 years
- Catastrophic Leave, February 18, 2011-April 8, 2011
  - Sharon Schule, Teacher, Keithville Elem/Middle, 11 years
  - Ashley Wachal, Teacher, North Caddo High School, 2 years
- Sabbatical Leave (Medical), January 18, 2011-June 1, 2011
  - L. D. Addison, Teacher, Captain Shreve High School, 8 years
- Leave Without Pay, February 22, 2011-June 1, 2011
  - Audrey Sullivan, Teacher, Herndon, 7 years

**Classified**
  - Mickey Ferguson, Bus Driver, Transportation, 1 year

**6.03 Other Personnel Transactions Reports.** The board approved the other personnel transactions reports for the period of November 2, 2010 through December 9, 2010 and November 20, 2010 through December 17, 2010 as submitted in the mailout.

**Item No. 8**

**8.01 Revised Compensation Configuration/OTs/PTs.** The board approved the recommendation to reestablish the base pay + 10% premium as the salary configuration for this group of employees, effective immediately.

**8.02 Resolution of Continued Employment.** The board approved the resolution directing the superintendent to write letters of reasonable assurance of continued employment as recommended by staff and submitted in the mailout.

**8.03 2009-10 Financial Audit.** The board accepted the 2009-2010 Comprehensive Annual Financial Audit as submitted.

**8.04 Approval of Beverage Contract-Northwood High School and Louisiana Coca-Cola Bottling Company.** The board approved the beverage contract between Northwood High School and Louisiana Coca-Cola Bottling Company as submitted in the mailout.

**8.05 Beverage Contract Proposal-Caddo Middle Magnet and Louisiana Coca-Cola Bottling Company.** The board approved the beverage contract proposal between Louisiana Coca-Cola Bottling Company and Caddo Middle Magnet as submitted.
8.05 Resolution Calling for State Mineral Board to Lease Minerals on Various Properties. The board approved the resolution regarding oil, gas and mineral leases on various properties owned by the Caddo Parish School Board as submitted in the mailout.

8.07 Approval of Board Representative on Discipline Review Committee. – The board approved Bonita Crawford as the CPSB’s representative on the Discipline Review Committee.

8.10 Letter/Resolution to LSBA. The board approved the proposed letter to the Louisiana School Boards Association as submitted in the mailout.

BIDS (PURCHASING)

Mr. Rachal pointed out that these are grant dollars and the board at one time received a report on the amount of dollars we received in grants. He asked staff to provide him with the report that shows the amount of grant dollars we have received.

Mr. Riall asked staff what schools will benefit from this grant? Mrs. Turner responded M. J. Moore, J. S. Clark and Woodlawn.

Mr. Rachal moved, seconded by Mrs. Bell, to approve the following bids as recommended by staff and submitted in the mailout on the bid tabulation sheets: Rhodes Strength Training Systems, totaling $45,878.70 and Fitness Expo, Inc., totaling $65,990.56 for the purchase of PEP Grant Exercise Equipment. Vote on the motion carried unanimously.

CHANGE IN MARCH 1, 2011 CPSB EXECUTIVE COMMITTEE MEETING DATE

Ms. Priest announced that she visited with the superintendent regarding the Vision 2020 report that is to be brought to the board at the first meeting in March. With the superintendent being out of town for a week, this will allow additional time to prepare the report for the board. Mrs. Turner further explained that the recommendations are still being fine tuned and the superintendent will be scheduling individual meetings with board members to explain the Vision 2020 recommendations.

Mrs. Bell moved, seconded by Mr. Burton, to change the March 1, 2011 CPSB Executive Committee meeting to Tuesday, March 8, 2011. Mrs. Armstrong inquired of the dates the superintendent will be meeting with the board members? Ms. Priest responded that she doesn’t have the dates, but in meeting with him, he explained to her that he would be calling to meet individually with board members. Mrs. Armstrong stated that she asked this because of the dates the LSBA Convention will be held. Ms. Priest said that the superintendent is aware of these dates. Vote on the motion carried with Board members Crawley and Armstrong opposed and Board members Riall, Green, Burton, Hooks, Trammel, Priest, Crawford, Rachal, Ramsey and Bell supporting the motion.

SCHOOL CALENDAR

Mr. Ramsey moved, seconded by Mrs. Bell, to adopt the calendars as proposed by staff.

Mrs. Crawford stated that some of the schools’ graduations are scheduled for 8:00 p.m. during the week and she believes using students to work at the graduations could be a problem. She asked that all high school principals whose graduations are being held at this time to determine if the scheduled date and time will work for them. Mr. Rachal asked if the administration met with the employee groups and organizations and everyone is o.k. with what is being proposed? Mrs. Turner responded that Dr. Dawkins did meet with various groups of principals and shared this information with them. Mr. Rachal asked if everyone was involved in the process that should have been involved? Mrs. Turner responded she does believe that effort was made and noted that suggestions were made and the group provided suggestions. Mr. Rachal asked if the process of setting the calendar is working more smoothly than it has in the past? Mrs. Turner said she believes staff is working very hard toward that area. Mr. Rachal said to him, he believes it is going a lot smoother than it did years ago and commended everyone for the hard work in bringing these calendars in advance.
Miss Green stated she loves the format for the graduations at the convention center, but she is concerned that 5:00 may be too early because of parents not getting off work until 5:00.

Mr. Riall stated that he is seeing the 2012 graduations on BoardDocs and he doesn’t find 2011 and asked if he missed it. He asked if he is correct in that everything this year is on Friday and Saturday and why are we not having on Monday, Tuesday, Wednesday? Dr. Sara Ebarb explained that the 2011 graduations are more than just the weekends and this schedule was already set before she began working on the 2012. She did explain that one reason the graduations are spread out in the way proposed is to allow room for everyone in the convention center. She added that an attempt was also made to complete the graduations before the Memorial Day Holiday weekend since it appeared it was a problem for those who desired to be out of town.

Mrs. Armstrong asked about a copy of the 2011 schedule, because it has come to her attention that Southwood’s graduation is scheduled for 8:00 on a week night, and her opinion is that this is too late for a graduation for one of the district’s largest high schools. She said if that is still the set time, she is asking that staff address this.

Mrs. Bell asked why is it changed, because she thought it went well last year on the weekend. Dr. Ebarb explained that what she is working on is for the following year, because the graduations for 2011 were set before she was assigned the calendar – early July last year; but the 2012 dates are shared with the board so they can be set at the convention center. Dr. Ebarb also explained that one of the items discussed was the amount of time between the graduations and the need to allow more time to get people out and in and for parking.

Reginald Abrams explained that he understands contracts have already been signed for this year and the schedule presented for 2012 with Southwood’s graduation set for 5:00 on Sunday. Mrs. Bell said she is looking at the graduation schedule for this year and it is fine, but she doesn’t understand why change what was a great schedule? She added she understands about the problem of Memorial Day, and believes we need to look at the 2012 schedule.

Ms. Priest explained that the motion is to approve the 2012-2013 calendar.

Mr. Riall moved, seconded by Mr. Burton, that the board approve the 2011-2012 calendar with the exception of the 2012 Spring graduation schedule. Mrs. Armstrong asked how soon do we have to make contracts with the convention center to reserve the spaces for graduations? Mr. Abrams explained that the last contracts were done by Mr. Thomas, but were not signed until November. Mrs. Crawley said she believes Memorial Day weekend is a good time for graduations and we are not going to be able to please everyone. She also reminded everyone that graduations in the past were held on Mother’s Day weekend.

Vote on the substitute motion carried unanimously.

Mr. Ramsey asked for clarification and that the motion approved only one calendar and there were two on the agenda. Mr. Abrams explained that he understands the calendars presented (2011-2012) also included dates, i.e. test, retest, that were not on the original calendar so staff was asking for this to also be approved. The substitute motion did not address that, but only the 2012-13 calendar, so a motion is needed to approve the 2011-2012 calendar as amended.

Mr. Riall moved, seconded by Mr. Rachal, to approve the 2012-13 calendar. After discussion and clarification, vote on the motion carried unanimously.

RECOMMENDATION TO CONTINUE TO FUND GASB/OPEB LIABILITY

Mrs. Bell moved, seconded by Mr. Ramsey, to continue funding the GASB/OPEB Liability as recommended by staff and included in the mailout. Mrs. Crawford noted that two years ago discussion was held on changing the policy relative to retirement so that anyone who came to Caddo with the majority of their time from another parish could not retire from Caddo and cause Caddo to pay their retirement. Randy Watson, director of insurance, noted that Mrs. Crawley asked this question at the last meeting and he provided a response, which he believes was sent to the board. He explained that because the district receives state funds, we have to follow the Office of Group Eligibility (OGB) who makes the rules relative to eligibility. He further
explained that the law states that if one is on the insurance at the time of retirement, they are allowed to keep that insurance. In researching Caddo’s retirees, Mr. Watson announced there are about 75, in approximately 3,500 retirees, employees that retired with less than five years, and this includes those that took medical retirement. Mrs. Crawley stated that she still would like to look at this further, because it bothers her that someone could retire after one year in the district. Mrs. Crawley said she asked that this item not be on consent so she could ask the superintendent, who recommends items for the agenda, and the president, who actually places items on the agenda, to submit money items during the work session so the board can ask questions in order to understand it. She expressed her appreciation to Mr. Watson for answering her questions, but she believes the public needs to hear this since they do not want the board to spend money that they have not discussed. Mr. Burton called for a Point of Order and stated that the reason it isn’t always possible to have everything at the work session is because the board only meets twice a month; therefore, there will be items that come up that need to be addressed. He said this was discussed before and no one can know what might come up and needs to be addressed. Mrs. Crawley asked that she would like to have these type items at the work sessions if at all possible.

Mr. Watson responded this is a windfall for Caddo and the $1.2 million is not costing Caddo anything and was money received through the Federal Government Early Retiree Reinsurance Program. This program is a part of the healthcare reform law where Congress set up a $5 billion fund designed to reimburse employers that offer retiree health care coverage for retirees between the ages of 55 and 65 that do not qualify for Medicare. He explained it is a very involved process and we were notified and received these funds in the middle of January. In anticipation of the funds coming in, the OPEB Trust Fund Committee, which the board approved several years ago to put retiree drug subsidy monies into that fund, met in January and is putting together a recommendation to the board that this found money be put into the OPEB fund. He said what the committee wanted to do is research what these funds could be used for, and in seeking counsel learned that the money could only be used for healthcare cost and not in the General Fund for general purposes. He said while it was brought up at the work session, at that time, staff did not have all the complete details. He also explained that we are required by law to send out a notice promptly upon getting the funds to all the employees and let them know we have received the funds and how the funds will be used, which is why it is on the agenda for approval.

Ms. Priest said even though it is a law, she believes sometimes we can question the law and maybe we can move forward through the Louisiana School Boards Association to look at changing this law.

Vote on the motion carried unanimously.

Introduction. Mr. Rachal introduced Noah (from the visiting Boy Scouts) and announced that Noah actually cast the vote on the school calendars. He stated that he appreciates the Boy Scouts being in attendance at today’s meeting.

SUPERINTENDENT’S REPORT

Chief Academic Officer Turner announced that there is not an update on the Superintendent’s Target Schools, but that staff did have information on the Bullying Video that they wished to share with the board. Mr. Burton reminded the board of the Sunshine Law and the fact that staff cannot discuss any item that is not going to be put to a vote and asked that the item Miscellaneous Items to be removed from the agenda.

ANNOUNCEMENTS AND REQUESTS

Mrs. Armstrong asked that this year’s graduation schedule be reviewed, i.e. Southwood’s is scheduled for 8:00 on a week night.

Mrs. Armstrong asked if when a student completes the Fight Diversion Program, is it correct that all the records are to be expunged, because JPAM is still showing a student’s personal information regarding incidents that occurred. She asked staff to look into this.

Mrs. Crawford announced that she and Dr. Robinson attended the Federal Relations Network Conference in Washington, D.C., having the opportunity to visit with Louisiana Senator Mary Landrieu. She said even though they did not get to meet with the others, they did advise their
aides of the issues local school districts are facing, i.e. No Child Left Behind. Mrs. Crawford also announced that they asked each of our representatives in Washington to speak to the State Superintendent and Governor about supplanting of MFP funds with the EduJobs funds and is the issue they were able to talk with Mary Landrieu face to face.

Miss Green thanked Dr. Dawkins for attending her “Work it Out” session as well as Mrs. Bell for bringing the welcome. She also thanked CAE member Ms. Savannah for attending this session. Miss Green announced that she visited the schools in her district and she is very proud of the hard work she is seeing to get test scores up. She also shared her disappointment at what she saw at Newton Smith and it is important that this issue is addressed very soon. Miss Green also shared with the board that she visited Green Oaks and she is very impressed with them and the yearbook that the students actually published.

Mr. Hooks announced that he is not the board member from Caddo Heights; and as he has expressed before, he believes there are a lot of teachers harassing others, including students, and is something he wants addressed quickly.

Mrs. Crawley asked that staff look at the policy that says we can’t modify a schedule to help a child succeed and how we need to proceed to address this.

Mrs. Crawley asked how can we proceed to collect the funds from the state that the Federal Government sent us or is there a Class Action Suit against the state? She said we do not want to wait until the Governor takes it out of that.

She also stated that Byrd’s graduation is also long, and it can’t begin at 8:00 p.m.

Mrs. Trammel asked about clarification on the line that divides Caddo Heights? Ms. Priest responded that following the meeting, they will review the district maps.

Mrs. Bell stated that she and Mr. Riall share Timmons and she and Mrs. Armstrong share Walnut Hill, but she asked months ago that we file a lawsuit against the education department for our money and she is again requesting this to happen.

Adjournment. Mr. Riall moved, seconded by Mr. Rachal, to adjourn. Vote on the motion to adjourn carried and the meeting adjourned at approximately 6:20 p.m.

Dr. Gerald D. Dawkins, Secretary

Lillian Priest, President
March 8, 2011

The Executive Committee of the Caddo Parish School Board (CPSB) met in regular session in its office at 1961 Midway Street, Shreveport, Louisiana, at approximately 4:30 p.m. on Tuesday, March 8, 2011 with President Lillian Priest presiding and Steve Riall and Dottie Bell present being a quorum. Other school board members present were Jasmine Green, Willie Burton, Charlotte Crawley, Curtis Hooks, Mary Trammel, Bonita Crawford, Barry Rachal, Larry Ramsey and Ginger Armstrong. Also present were Secretary Dr. Gerald Dawkins, Legal Counsel Reginald Abrams, staff and other visitors. Ms. Trammel led the invocation and Pledge of Allegiance.

President Priest announced that today’s meeting is being broadcast in Room 1 to allow for overflow seating since the Fire Marshall has indicated everyone needs to be in a seat.

PRESENTATIONS

Vision 2020. The board and audience viewed a DVD presentation that highlighted how the world has been touched by the current economic conditions. The presentation presented how stock markets have continued to fluctuate and how school districts around the country are being affected as they are expected to do more with less. School districts are seeing an increase in the accountability standards, public education is under the microscope and is being attacked like it never has before. It was reported that the state, in the past year, underestimated the number of public school students and this estimate was approximately $42 million short; and on top of that, the State is facing a $1 billion shortfall on its own. It was noted that Caddo is at a crossroads and where the same old way of doing things will not cut it anymore, Caddo can choose to be a victim or it can choose to step out and make pro-active decisions that support the students and staff. Vision 2020 is about building upon what works and taking another look at what doesn’t; it’s about working more efficiently and effectively; it’s about making the choices or having them made for us; and doing nothing is not an option because our children and community deserve better.

Superintendent Dawkins shared with the board and audience staff’s recommendations for implementing Vision 2020. He said this is a historic juncture for the school district in that it will be a long-term course and direction for all of Caddo’s students and staff. He said the plan will focus and re-focus our resources on academic achievement and the safety and welfare of all our students, as well as solidify long-term instructional, operational and fiscal stability for Caddo Parish Schools. He also stated that this plan will insure the viability of Caddo Parish Schools so that the current and future students will have the opportunity to attend world class schools from preK through 12th grade.

Dr. Dawkins highlighted the Vision 2020 process to date, a process that began shortly after he began his tenure in Caddo. Meetings with community leaders were held to discuss the school system, what affects the school system, instructional programs and operational efficiencies, as well as those things that were perception or real. He stated that a facilities study was conducted with board approval to look at the infrastructure of Caddo’s schools because superior instruction must be supported by superior infrastructure. Community and staff surveys were conducted last spring, presentations were held during the summer, feedback was received from parents, students, staff and members of the community. The feedback submitted was presented to the school board and an additional survey to determine whether or not people felt like they had an opportunity to meet with us, with over 15 community meetings being held. He reminded the board that from the feedback, 98% of the people surveyed noted that the school district was among the top five most important issues in the community. He said the primary concerns expressed by students were uniforms and discipline, and noted that our students do want discipline. Dr. Dawkins stated that parents in the community said that facilities and technology was important to them, and teachers and staff said attendance (students being in school everyday), and communications within the schools and with parents is important. He also added that everyone said that equity of resources was a top concern. In the January survey, Dr. Dawkins shared that 91% of those surveyed indicated they were satisfied or very satisfied with the opportunities for input. He also reminded everyone that over the last 20 years the Caddo Parish Schools population has
declined by 8,000-9,000 students, and the demographics have changed. The superintendent also reminded everyone that the mission is to improve the academic achievement of all students, every student, and the overall district effectiveness. He said we also must operate at a high level and high pace to be as efficient as we can in our operations. The vision to create world class schools is every student should be afforded every opportunity to compete in a global society. He said every child must have the benefit of all the resources that are available to them. Dr. Dawkins announced that the recommendations being brought tonight are in the areas previously discussed with academics being the main reason for being in business and anything else being secondary. The areas include (1) academics, (2) operations, (3) facilities, (4) policies, and (5) legal. Dr. Dawkins explained that the proposed plan will be presented in three proposed phases.

PHASE I - ACADEMICS

Superintendent Dawkins said that the academic achievement under Phase I will be that all students will read on grade level by the end of the second grade. He said staff has reviewed data for the past couple of years, and he believes we need to do a better job with youngsters coming into our system and not allow students to leave second grade without reading on grade level, and we will refocus some of the district’s resources and energies to make sure this happens. Improving classroom management and student behavior are also important areas to address so teachers can teach and students can learn free from distractions. Dr. Dawkins stated that it will also be important to eliminate any ineffective instructional practices and programs, as well as expand career, vocational and technical options at the middle school level. Increasing graduation rates as well as job and college readiness in order for students to graduate and be able to attend college or have the necessary skills to get a job and be a contributing member of society are also key areas we will address. He said it is also important that we find ways to get parents engaged in the success of the students and to support teachers and principals in the schools when they try to do their jobs. Superintendent Dawkins also stated that we need to expand our outreach efforts to create effective community partnerships and be better in connecting with agencies in our community.

Chief Academic Officer Turner shared with the board that in terms of academic achievement the current data reflects that at the end of the 2nd grade, based on Dibels Assessments, that 60% are at grade level, meaning 40% are not on grade level. When looking at all tested students in the area of English Language Arts at the 4th grade level, and looking at unsatisfactory and those students not quite at Basic but approaching, there is 35% (17% unsatisfactory and 18% approaching basic). In looking at the English Language Arts state assessment scores at the 8th grade level, one will see 46% falling into this area. Looking at the graduation rate, 58% are on target, 40% are not. This translates into four out of ten students are not ready to graduate, which impacts the graduation cohort rate. Mrs. Turner also made the board and audience aware that 1/3 of the kindergartners enrolled is what will be enrolled for the next school year; and she noted that 2/3 of the students come into our kindergarten without the privilege of Caddo’s preschool experience. She said staff is currently working with early childhood agencies to communicate the needs and resources available to parents and students at the kindergarten level. Areas the district is faced with, and that the staff is concentrating on, are robust vocabulary development, number sense, alphabet recognition, etc., to work together to develop readers and thinkers for the future. The pre-kindergarten through second grade instructional staff need the support in making sure we have created the strong foundation in these areas. She reminded the board that in preK-2nd grade, students learn to read; however in the third grade, students read to learn. She stressed the importance of the parents receiving this very clear message and that we are all working toward the same end, to improve the literacy in our schools, our students and our families.

Mrs. Turner said that in improving classroom management and student behavior, we expect and want comfortable learning environments, optimal learning environments in our classrooms, and in order to accomplish this, a move will be made to district wide screening in three areas to make certain that teachers have the information they need to educate the children: (1) reading and math at every level, (2) behavior to identify
students that may be at risk and support those students so we can connect them with services they need, and (3) learning styles to bridge gaps and capitalize on each student’s strength. The data from these three screenings will be used to create individualized learning paths and plans.

She said this information will be very critical to a teacher’s planning. With the elimination of programs, expanding the technical optional program, and increasing graduation rates, it will be important to reconfigure the feeder patterns to the schools to reduce transitions and reallocate staff and resources. She explained that in order to maximize our resources for the reading of instruction, and the support of the teachers. Mrs. Turner stated that according to the Louisiana State Accountability System for 2009-2010, and reviewing the schools with different configurations, the following data was found. In schools that are preK-12, zero of the 55 schools in the state are in AU Status. In configurations with preK and K-8, zero of the 23 schools in the state are in AU Status. She also reported that there are 22 schools with the 6th – 12th grade configuration and only one is in AU status and it is a new configuration that has not completed the test cycle. In the 7th-12th grade configuration, there are 39 schools and zero of the 39 are in AU Status. In an 8th-12th grade configuration there are 66 schools and 5 of these are in AU Status.

Relative to where the district is with technology, Mrs. Turner stated that the SDE survey from 2009-10 shows that 15.3% of the 8th grade students are proficient with technology. Fourteen (14%) percent of the 10th grade students are proficient using the same survey, and 43.2% of the teachers are proficient with technology, based on the same survey for teachers. She also reported that 59% of the administrators are considered proficient.

Regarding Professional Development in the area of technology, Mrs. Turner reported that 1,617 teachers and staff have attended training during the 2010-11 school year; with 112 training opportunities being provided during this school year through the Caddo Teacher Technology Center.

Chief Academic Officer Turner also explained that based on a survey completed by the schools, 17,236 computers are connected to the internet, 2,735 teachers have internet access at home and 24,253 students have internet access at home. She said she believes this identifies the areas of technology that we can strengthen by utilizing on-line resources for the district’s schools. She also highlighted the on-line available book resources at the elementary, middle and high schools that are under utilized.

When talking about increasing graduation rates, college and job readiness, utilizing technology, and the expertise and professional development support of Caddo’s teachers, Mrs. Turner said it is believed that the district is in a very good position to move forward in these areas, requiring parents and guardians to be a part of the plan for student success. She added that it is very important that all pertinent data is shared with the community and that we are able to identify needs and use community expertise in assisting the district to accomplish what needs to be done in the area of academic achievement.

Dr. Dawkins clarified that every child in grades K-2 will be able to read on grade level by the end of the 2nd grade even if it means students need to read 4 hours or more a day, because we cannot afford another student to leave the school district without the best reading skills.

PHASE I – OPERATIONS

Superintendent Dawkins stated that information is being brought to the board relative to balancing the 2011-12 budget, because if we do not do what we need to do within the confines of our resources, there are problems. He said it is also very important to restore the district’s fund balances to acceptable levels. He explained that it costs the district a little over $1,000,000 a day to operate, and at this time Caddo has a fund balance for approximately four days. The superintendent said it is also important to improve the transportation and fleet efficiency because Caddo transports over 22,000 students each day on about 500 buses. He said staff does its best to move the students as efficiently as possible; however, he believes we can be more efficient. Dr. Dawkins said it will also be
important to eliminate inefficiencies in support staff and services if there are duplications of work; and if the work is not tied to student success, he believes a strong look should be taken at this. He also stated it is important that the district provides skills in leadership training to effectively support the schools.

James Lee, director of finance, shared with the board the challenges and increased demands the district if facing. He shared with the board how the video reflected what is happening in the country relative to finances and education, and how it is carrying over in Louisiana. Mr. Lee shared with the board that the draft budget reflects basically the same as the 2010-11 budget with the only exception being they rolled into it the salary step increases for employees, as well as the estimates for increases in retirement costs and in health care costs. In referencing the bottom line, and if the decision is made to do nothing, Mr. Lee reported that there will be a $20 million deficit next year. At this time, changes need to be made to have a balanced budget. Mr. Lee also explained that while adjustments are made to break even for the coming school year, it will be necessary to make adequate changes so the district does not find itself in the same situation again. Mr. Lee stated that he envisions a fund balance in the range of $10-$15 million so that when issues arise, there are funds to take care of them.

For the sake of the students and for the future of the district, Mr. Lee said it is important that we maintain our financial liability. Options (emphasized) being considered over a three-year period include reducing travel and supplies at Central Office in each department by 25% ($200,000), foregoing the salary step increments ($1.5 million); eliminating the base incentives at target schools ($4 million annually); increasing the student teacher ratio in all classes at all schools by two students ($6.4 million); reducing the use of substitute personnel ($2 million annually); and eliminating the $200 teacher allotment for supplies ($600,000). Mr. Lee stated that while these are only options being considered at this time, it will be necessary to make up the proposed $20 million deficit in the coming year.

Chief Operations Officer James Woolfolk began his comments by stating that when staff began looking at the proposed deficit, a group of staff members met in a room to begin brain-storming anything and everything that could be done to address this matter, a time for everyone to open up their minds to not doing things the way they have always been done, but to the future possibilities. He said staff understands that some of these ideas may not be approved, but the important thing was to open up our minds and think of ways we could address the issue. Mr. Woolfolk addressed improving transportation and fleet efficiency, eliminating inefficiencies in support services, and providing skills and leadership training to effectively support our schools. He stated that the main subject he will address is the elimination of any inefficiencies in support services, because the number one priority is educating all the children and number two is to make sure they get to school and home safely. Mr. Woolfolk stated that one of the main goals will be to eliminate late buses and one way will be to centralize all buses so we know where buses are at all times, and to do so we will incorporate GPS systems in all the buses. In looking at operations, he believes it is necessary to do a better job of communicating with the parents by making sure our phone service and our customer relations are accurate and polite. Mr. Woolfolk stated that he believes there needs to be a focus on how transportation can be redesigned so the department is handled in a more efficient way. He also said there is a need for more flexibility and efficiency in transporting routes and in doing this, staff will look at direct routes, exchanges, bus loading, time on the buses, etc. that can be put into the software in order to determine if the buses are being used as effectively and efficiently as possible. He also said that alternatives will be looked at for transporting students (alternate means i.e. use of city buses in the inner city). With over 400 buses, 256 fleet vehicles for a total of 656 vehicles that we maintain, staff will look at how we service and/or replace parts, doing in house or having someone else do the work. In eliminating inefficiencies in support services, Mr. Woolfolk explained that every department in Support Services will be reviewed for cost effectiveness. He further added that Central Office Reorganization will be looked at from the angle of removing the walls between the functions, creating cross functional work. He said we will not be able to continue to survive as we move forward when there is a lack of cross functional work. Duplicate assignments, vacant positions, positions reclassified are areas that will be addressed. Regarding absenteeism, it is hard to determine what happens when
someone is absent and there is a sub filling in and how it affects the program. We will also look at technology and what it is doing for us to make the district more effective and efficient. It is very important to look at everything we do as a district and determine if it is more efficient for us to do it ourselves or is it more cost efficient for someone else to do it. Mr. Woolfolk also stated that staff will look at the consolidation of duplicate functions. Lastly, he added that it will be important to provide skills and leadership training to effectively support our schools (employee development) and district, because it is not only important for teachers to promote world class schools for world class students, but it is everyone’s responsibility. He said it is our job to make everyone the best they can be and good leadership is important in making this happen, and it will be important that skills are developed so everyone in a particular category (i.e. bookkeepers) is doing the same thing and the same way.

PHASE I – FACILITIES

Superintendent Dawkins stated that in looking at facilities, we want to make sure we maximize facility utilization and reduce excess capacity. He said as mentioned in his opening comments, Caddo cannot afford to continue to operate facilities with excess space. In talking about the configurations, liquidating vacant buildings and unused properties, it is a great liability for the district to continue to be responsible for these facilities.

He referenced the line item in the budget in the capital projects fund for addressing health and safety issues and the board has supported those issues which support health and safety, i.e. leaking roofs, air quality issues, etc. and he will continue to ask the board for this support. Dr. Dawkins said it is also important that we ensure the energy efficiency of all our facilities. QZAB funds have been a source of funding that has allowed the district to upgrade the data, security, cameras in the buildings. He also stated that updating of attendance zones will be a part of this plan.

Steve White shared with the board that the Phase I projects being proposed will be ready for the 2011-12 school year, with the primary concentration being the consolidation of schools that can be done with current available funds. Mr. White said this list includes (1) reutilizing Donnie Bickham as a K-8 facility, combining the existing Donnie Bickham with the existing population of Blanchard and taking Blanchard off-line (anticipated savings of $1.2 million), (2) reutilizing Ridgewood as a K-8 facility, combining the existing Ridgewood with the overcrowded portions of Forest Hill, Summer Grove and Southern Hills. He said a 6-12 configuration would be looked at for Green Oaks, combining the existing Green Oaks with Newton Smith and placing Newton Smith off-line (anticipated savings of a little over $1 million). Mr. White said staff will also look at a 6-12 configuration for Booker T. Washington by combining the existing BTW with the existing J. S. Clark and placing J.S. Clark off-line (savings of $1 million). Staff is also looking at a 6-12 configuration for Fair Park, combining a portion of Fair Park with the northern portions of Bethune and M. J. Moore, placing Bethune off-line, and reutilizing Bethune as a support facility (anticipated savings of approximately $2 million). It is also proposed that Woodlawn become a 6-12 facility, combing the existing Woodlawn with the southern portion of Bethune and southern portion of M. J. Moore, and bringing M. J. Moore off-line. He said staff is looking at combining Mooretown ECE with 81st Street ECE, with one section of each grade 1 through 5 returning to their home schools (anticipated savings of $950,000). A single campus concept for Huntington-Turner is being considered as a K-12 facility, with 6-12 being housed at Huntington and K-5 at Turner, combining the existing Hillsdale with Turner and bringing Hillsdale off-line ($850,000). Mr. White explained that staff believes all these recommendations can be implemented with the 2011-12 school year with current funding and the total overall savings in the next year would be approximately $6.3 million. Regarding questions relative to revised attendance zones, Mr. White shared the proposed revised attendance zone for the Ridgewood K-8 facility, as well as the new Forest Hill, Summer Grove, and Southern Hills attendance zones.

Dr. Dawkins also added that staffing configurations, building configurations and issues of safety and flow of students will also be considered and documented as part of the work.
PHASE I – POLICIES

Superintendent Dawkins explained that there will be recommended changes in policies that directly impact the district’s charge to improve effectiveness and efficiencies in academics and operations, as there are some policies that hinder the work we need to do. Dr. Dawkins also stated that it is also recommended that a professional service be contracted to assist the district in the tedious task of addressing the district’s policies and helping us stay current with the state laws.

Dr. Mary Nash-Robinson stated that the policy manual is 800 plus pages and it is obvious that the way things are done will need to be changed. Currently the policy manual has been subdivided into nine sections with staff assigned to review each one, charged to review and identify what they believe to be procedural content. These recommendations will be reviewed by the superintendent and submitted to the board for consideration. She said there are some policies that will become priority quickly, i.e. staffing formulas, class sizes, leaves, movement of students, transfers, appeal processes, retirement incentives, graduation requirements and student schedules. Dr. Robinson also stated that staff will also pose a proposed policy addressing general fund balances since one does not currently exist. She said staff is conferring with ForeThoughts, a consultant company that works in Louisiana providing these services in 61 school districts with a wonderful track record of operation and success. Dr. Robinson stated that the sub-committees will share with the board the progress of the work, with staff constantly assessing the budgetary end.

PHASE I – LEGAL

Dr. Dawkins announced that Legal Counsel Reginald Abrams will address this aspect and the Consent Decree. Mr. Abrams highlighted the history of the Consent Decree and that prior to 1965 the CPSB, along with most of the South, operated a dual school system, meaning a system engaged in the intentional segregation of students by race, and unitary is getting rid of the vestiges of that dual system, and is what everyone has been trying to achieve since the 60s. In 1965 the parents of 7 Black children sued the CPSB seeking desegregation of the Caddo Public Schools. In 1973, the CPSB was ordered by the court to implement a desegregation plan and a plan was developed and implemented. He further stated that in 1976, the school board filed a motion to have the School System declared unitary; and that the U. S. Government intervened in the suit to “oppose the motion.” In 1977, the district court ruled that the school board had fully complied with the 1973 court ordered desegregation plan and declared the system unitary and dismissed the suit against the School Board. The U. S. Government then filed a motion to amend the judgment, which suspended the finality of it, after which the U. S. Government and the CPSB entered into negotiations in 1979-80 that resulted in the 1981 Consent Decree. The district court determined that the plan implemented was reasonable and appropriate for the desegregation of the district, and magnet schools were established in order to have a projected racial enrollment at each along with how the district would meet the projected enrollment so that the school system could be as racially equal as possible. In 1987, the School Board filed a notice of compliance and requested that the court rule that the school system had achieved unitary status; and in April 1990, based on a joint motion by the U. S. Government and the School Board, the district court entered into an order indicating that the Consent Decree was terminated. This order basically said there were three areas the CPSB still had to comply with: (1) to be fully unitary, the assignment of principals to schools, which was an old method of not being able to identify the school with a white or black principal, but you had to mix the administrators; (2) enhancement programs established at one-race schools; and (3) the establishment of the majority to minority transfer (M to M) encouraging students to transfer from a school where they were in a majority to a school where they were in the minority. Mr. Abrams stated that in 2005, the U. S. Court of Appeal indicated in the Cavalier case that the School Board had been released and it was not necessary to do anything other than these three things. As a result of the 2005 decision, Caddo Parish no longer uses two lists when it comes to racial enrollment and a different method of testing is now used to make sure everything is fair and equitable. Mr. Abrams said the effects of a unitary system is basically when the system actually can operate its own school system by the twelve members of the board based upon what the constituents want. He also explained that a unitary system is one
that in good faith complies with the Desegregation Decree for a reasonable period of
time, eliminating the effects of past discrimination to the extent practical, and
demonstrated that it will not return to the discriminatory manner in which it formerly
operated under the dual system. He noted the current and previous makeup of the board
members and the fact that the district in recent years has had two minority
superintendents. Mr. Abrams added that he believes the district has certainly shown it is
maintaining the status of being a unitary system. When declared unitary, Mr. Abrams
explained the district is released from the judgment and from core supervision and can
develop all its policies without any concern other than not having any discriminatory
policies (which is a standard rule). Legal Counsel Abrams again stated that the only three
areas we must be concerned with are: (1) showing the Justice Department that we have
complied with the assignment of principals to schools, (2) that we have enhanced the
programs at one-race schools, and (3) the M to M transfer provision has been complied
with. Based on this, it is his opinion that the Caddo Parish School Board has complied
with the 1981 Consent Decree and it could be declared unitary at this time.

PHASE II – ACADEMIC ACHIEVEMENT

Superintendent Dawkins noted that again under academic achievement in Phase II the
board will see the provision of reading support for our teachers, extended learning
opportunities for teachers, reassigning staff to school teams to address student behavior,
piloting foreign language exploration, and expanding middle school technical career
education.

Mrs. Turner explained that ways of providing reading support for classroom students,
will happen by: (1) individual screenings and assessments for students across the district
at all levels and specifically to those who are struggling by providing training for teachers
in these levels to make sure they can be confident and competent about helping the
children learn to read, (2) availability of on-line resources, as well as individuals working
one on one with the classroom teachers to maximize their job imbedded application of the
teaching of reading as a support piece. Mrs. Turner said that for the students, breaking
down what they do not know or cannot do, the following ways will be implemented for
addressing this: (1) reallocating the reading interventionist and specialist to support early
elementary, specifically in the area of reading, (2) Saturday school to provide additional
time for students to learn to read utilizing community resources and reading specialists
and reading interventionists. After-school tutorials, intercessions, extended year (if
needed) are things that will be implemented if that is what is needed to make our schools
successful. Summer Reading Workshops and Reading Camps will be implemented to
help our students. Staff believes if we take the 40% and raise it before the end of the
second grade, we can make a difference in the district’s achievement and graduation rate.
Mrs. Turner announced that we know Caddo has the expertise in its district when it
comes to reading instruction, and we want to make sure we are supporting our classroom
teachers to make this happen. In talking about reassigning school staff to school teams to
address behavior, it is because not having disruption in the classrooms and a safe learning
environment is critical. Thus, staff is looking at redeploying the special ed support staff
into classrooms with teachers, and looking at behavior interventionists, child
psychologists, instructional coordinator and specialists to assist in this process as it
relates to student behavior. She said discussion has also been held on collaboration with
outside mental health agencies for targeted behavior of our students and support for the
families.

Mrs. Turner reminded everyone that we all know the world that our students will
encounter as adults will be vastly different from what we know today. Because of the
rapid development of telecommunications, it is incumbent upon the district to offer
students foreign language as early as possible so they will be at a comfortable level of
using a foreign language in their job and their careers as a part of their communication.
She explained that it is believed that by piloting foreign language at the elementary-
middle level and extending what is already in place at high schools, we will provide a
more equitable situation for foreign language acquisition across the district.

Mrs. Turner also stated that in order to project the future and understand consequences of
today’s actions, it is equally critical to do drop-out prevention for students at all ages.
She said that based on the data, incorporating career and life planning themes into academic subjects, that teachers will find students more motivated by topics relevant to their developmental needs and ultimately be able to achieve the goal that we want them to achieve. By expanding the middle school career and technical education program, students will learn a life and career planning process that they will be able to use on a daily basis, and academic subjects will take on new meaning within the middle and high school levels. Journey to careers, keyboarding, and introduction to business computer and application are three courses in place and it will be important to not lose sight of career exploration at the middle school level. Technological enhancements in all classrooms is necessary and it is critical that teachers have the materials they need to enhance instruction and professional development will be provided to make that happen. Reading support at every level will see remediation activities embedded into every middle and high school schedule in English Language Arts and Mathematics.

PHASE II – OPERATIONS AND FUNDING

Dr. Dawkins stated that the consolidation of funding for the 2012-13 budget is necessary to ensure that all the funding sources are consolidated as much as possible to maximize the district’s dollars. He added that staff will assess and evaluate security operations, purchasing and inventory. Mr. Lee explained that in order to get to the 2012-13 budget, the district will need to get through the anticipated deficit for 2011-12 and it is important that the district build its fund balance up so it does not have the financial insecurity in the future that it is experiencing at the current time. This will be done by looking at additional cost savings.

Roy Murry, director of security, explained to the board that in the surveys conducted early in the process, the students ranked their most critical item as school safety. He said it is staff’s goal to make the schools as safe as possible for the staffs and students and to continue to make school safety a priority. Mr. Murry stated that for approximately the last 10 years, assessments have been done annually, and often when looking at our process, it may be that it is not looked at with as critical an eye as is needed. The district recently applied for and received the REMS (Readiness and Emergency Management in Schools) Grant from the Department of Education for approximately $500,000. This grant will be used to bring Safe Plans Incorporated from Missouri to do a risk assessment on every facility in Caddo Parish. He explained that these assessments will give staff an unbiased look at the level of security on every campus. While not all security measures provide the same level of protection, Mr. Murry stated that Safe Plans will rate each campus accordingly, i.e. they will rate a full time police officer on a school campus higher than they rate a camera system. In looking at the total operations, they will look at on-site law enforcement security on campuses, proximity of resources to the schools, school’s intruder response plans, training school personnel how to handle intruders on the campus, making sure classrooms are all securable, making sure the threat assessment program is operating how it should, access control, visitor management, communications and video surveillance. He also stated that a detailed report will be provided for every facility and the assessments will help the district in the planning and allocation of security resources in Phase II of Vision 2020 and beyond. Once the assessments are completed, Mr. Murry reported that recommendations will be formulated and reminded the board that because safety is a priority of this district, any recommendation will not reduce the level of safety on any campus.

Dr. Dawkins assured everyone that the staff’s and children’s safety is priority and the security grant will allow staff to secure the schools when unfriendly things are happening on our campuses.

Tim Graham shared information with the board relative to the district operating more efficiently and being able to ensure that all resources get to the children. Mr. Graham explained that in order for this to happen an assessment and evaluation of the purchase and inventory process will be done by consolidating the current processes. He shared with everyone how consolidating facilities, reproduction centers (currently there are three), and updating the Central Purchasing whereby each school is not purchasing shredders and copiers will help. Regarding textbooks, many times PTAs raise funds to purchase textbooks. The inventory technology needs to be upgraded by making better
use of everything via the internet. If all these things are done, it could mean a savings between $400,000 and $500,000.

PHASE II - FACILITIES

Steve White shared with the board that goals in Phase II of Vision 2020 are unchanged and we will continue to attempt to become as efficient as possible with the facilities. Mr. White said the only thing that will change will be the projects available for completion for the 2012-13 school year. In looking at the facilities, it is being recommended that J.S. Clark be converted to a K-5 facility, bringing in components from Central Elementary and West Shreveport Elementary, placing Central off-line and reutilized as a possible support center, and placing West Shreveport off-line. Mr. White said the plan also includes redistributing the staff at Building 6 to the schools and placing Building 6 off-line for sale. He said these would be available for the 2013 school year and the operational savings for the consolidation of the J.S. Clark facility and bringing Building 6 off-line is approximately $1.7 million which does not include any proceeds available from the sale of Building 6.

PHASE II - POLICIES

Dr. Robinson, relative to policies, stated that Phase II is self-explanatory and when procedures are pulled from the manual you are not eliminating them, but looking to revise them, abandon, etc. and the subcommittees are charged with this task. In Year 2 it is anticipated that professional services will be secured to assist in making sure that the district is in compliance with its policies and procedures. Dr. Dawkins added that with direction and approval from the Board President, staff will bring a review of these policy items by category to address the most needy areas.

PHASE III – ACADEMIC ACHIEVEMENT

Superintendent Dawkins stated that in looking at the alternative schools it will be important to make certain these are serving the purpose of the students, determining whether or not some redesign needs to take place with behavior modification programs and expanding programs relative to community resources. Mrs. Turner explained that staff will take a look at the data in hand and once evaluated, staff will identify how student needs are being met, taking a close look at programming and all related components, and determining if a redesign is necessary for our alternative schools to better serve our students. She said changes in behavior are expected, thus we may see the alternative schools taking on a different role as behavior overall improves. Mrs. Turner stated that staff will continue to be provided tools for behavior modification, training for all staff and teachers, and to continue to use the social skills programming and curriculum already in our schools to reinforce appropriate behavior on the part of our students. She explained that expanding the programs and the recruitment of community resources requires community input and having a vision on how to move forward for student success.

PHASE III – Operations

Dr. Dawkins explained that in looking at the 2013-14 budget and a possible bond proposal, there is no bond proposal recommendation to the board this year or next year, with it being 2-3 years before anything like this happens. He further explained that the work already presented in this report, he believes, should be done first to ensure that Caddo is the most efficient school system it can be and that all students are given the most opportunities possible, directing all the resources to the classroom before any bond proposal is considered. The $700 million being asked about is not something anyone will see anytime soon, and in fact this amount could be different if all the work proposed is done.

James Lee stated that staff will continue to work with the board and staff to ensure the district’s continued financial well-being. The possibility of there being a bond issue in the future to allow for the changes being discussed could be reduced by $100 million if
they are implemented. He said staff will work with Bond Counsel regarding the best options for funding should it be approved.

Mr. Woolfolk clarified that while Phase II and III may look light, what began in Phase I will continue with the efficiencies, to make sure that waste is taken out of the system. He also emphasized that nothing is being done from the support side to take away from the support of Academics: staff is not cutting things arbitrarily, but will look at what works, what doesn’t work, why are we doing it, can we do something different, and is this the best way to get it done? Central inventory accountability is necessary so that we know where everything is (the move to bar code all the textbooks), so everything can be tracked.

PHASE III - FACILITIES

Superintendent Dawkins again stated that the last portion of facilities in Phase III will happen if there is a bond issue to support it. When a recommendation is made to the board, it will include all three phases that will include a bond issue in 2-3 years.

Mr. White explained that for Phase III, which will take place between 2013 into the future, funding would need to be secured for the new construction and renovation of all remaining facilities. He said included will be a new K-12 single campus on the existing Herndon campus, placing Hosston, Vivian, North Caddo and Oil City off-line. It would also include construction of new K-8 schools in southeast Caddo Parish and in western Caddo Parish, placing Mooringsport and Timmons off-line. Also included will be the construction of a new K-5 on the existing Barret Padajna, placing Creswell off-line; and converting Oak Park from a K-5 facility to a K-8 facility. He explained that the anticipated annual savings when bringing the above referenced facilities off-line will be approximately $5.8 to $6.0 million. Dr. Dawkins again reminded the board that Phase III is dependent upon a successful bond proposal.

PHASE III – POLICIES

Dr. Mary Nash-Robinson stated that in conversations with the professional agency, staff is told that it will take three years to standardize Caddo’s Policy Manual and to re-write procedural matters. She also said that in the third year, we will talk with the agency about contracting to continually monitor the district’s policy manual and make appropriate changes in the procedures.

Superintendent Dawkins reiterated that implementing Vision 2020 will improve academic achievement of Caddo’s students and district effectiveness; and we will ensure that the resources available go directly to the classroom, which is the core of the district’s work. To do this, the district must be effective in all the other work in which it is involved. He said this is an educational institution and we should always be reminded that the children are first and last in the entire scheme. He said we will provide for the safety, security and support of the students and staff at all times, because if they can operate in a safe environment, they can certainly increase their learning. Having heard equity of all students throughout the process, this plan will address that and we will eliminate ways and improve efficiency, ensure the fiscal viability and health of the district (and noted that it takes $1 million a day to run the district), and ensure that policies are in place to support the work that needs to be done. This is not a quick fix, but a complete fix, and it is our time.

Mr. Ramsey asked the superintendent about the sources of the savings referenced in the presentation? Jim Lee responded that anytime you talk about consolidating schools, not as much staffing is needed; and part of the savings will be in staffing. Also, when a school is taken off-line there are no utility or maintenance costs. Mr. Ramsey asked if these costs are arrived at by pro-rating? Mr. Lee said staff will work with Human Resources to determine the required number of staff at each school separately and at the consolidated school. Mr. Ramsey asked if the new boundaries were carved out of the existing boundaries (in his district)? Steve White responded that is correct, and highlighted the numbers coming out of each of the elementary schools.
Mr. Ramsey asked how many students will come out of Summer Grove, Forest Hill and Southern Hills? Mr. White responded 100 students from Forest Hill, 140 students from Summer Grove and 127 students from Southern Hills to get an 85% utilization. Mr. Ramsey asked staff what the target enrollment is for the new K-8 Ridgewood? Mr. White said 863 (86% utilization). Mr. Ramsey asked about some of the proposed sections for the new Ridgewood and if they are a part of the original Ridgewood and Mr. White responded they are existing attendance boundaries.

Mrs. Crawley referenced Mr. Lee’s statement of adding two students to every class and that the schools in her district are already four students in each class above the state’s legal limit, and how this could affect parents sending their children to private schools and Caddo ultimately losing those MFP dollars. She stated that we will not put that many kindergartners in one classroom. Superintendent Dawkins stated that adding students is not the preference, but it is an option that is being looked at when looking at everything. Mrs. Crawley stated there are also classes in her district that only have 10 students in them. She also referenced centralizing ordering and, using computers as an example, advised the superintendent that she received a call from someone who received a grant and the district wanted them to order the computers through the district; however, they did not want to because they said when computers come through Central Office, they take the new processing unit out and put in an old processing unit. Dr. Dawkins responded that he has not heard of this and if it is happening, he wants to know about it. Mrs. Crawley said she wants to know that, when money comes to the schools as a result of a grant a teacher(s) may have written, it is all going to the teacher and they get what they pay for. Mrs. Crawley stated that this came to her attention approximately four months ago and she can provide the superintendent with additional information. Mrs. Crawley shared that she loves most of the Vision 2020 plan; however, she believes it to be a little too narrow because some of the districts (hers) have nothing to buy into, because we are not looking at what we can do to enrich the schools so that those in private schools want to come to public schools.

Mr. Ramsey stated that he will closely review this information and will call with his questions. He added he believes that the laws that exist, i.e. No Child Left Behind and Choice, need to be considered and how these changes will affect the schools involved. He said he believes one of the reasons students are leaving the inner city schools is because students in AU schools have the option to move to another school through Choice. Dr. Dawkins responded he believes the proposed plan would begin to correct this, because the answer is to improve all our schools. At the present, we will, of course, adhere to the laws as we move schools since they are still under an agreement, and monitoring and improvement efforts in those schools will continue. Mr. Burton added that in reference to the Consent Decree and the question of whether or not we have
honored the spirit of the Consent Decree, which means that things are not supposed to change, that you have reached this status and you need to remain at that status; however, he does not believe we are remaining at that status when you can go to a magnet school and see all White students in one class and all Black students in another. Mr. Burton asked about the physical facilities when considering the 6-12 configurations. Dr. Dawkins stated that different age students in one building has been one of the questions frequently asked, and it is important to configure the schools in such a way that it will accommodate the younger students, and all of this is being considered. He also stated that he has come out of two districts where 6-12 was successful and the things in question were overcome. He said it’s not a new concept and there are 60 plus schools like this in Louisiana.

Ms. Priest said knowing all the things that must happen to open school, she asked the superintendent the latest date he is looking to the board to take action in order to move forward and prepare for the opening of school in 2011-12? Dr. Dawkins responded that it is important to have schools prepared for opening and it will be critical to not go much beyond the first or second week of April without some approval to move forward. He said he hopes that the board will take whatever time it needs to meet to discuss and get all questions answered; however, if a decision is beyond April, it will be difficult to make an August start. He added that when looking at the logistics of moving things around, Mr. White and his staff along with Mr. Smith and his staff, are ready and able to do the work to make it happen.

Mrs. Bell noted that 6th graders need special attention, and asked the superintendent if he could look at placing 6th graders back to elementary and have a 7-12 configuration, and work on the 6th graders transition before they move to the middle-high school? Dr. Dawkins explained that he understands the care in addressing the 6th graders because every transition is important for the students. He also stated that the physical layout of the buildings, staffing, support services, start times, lunch time, ending time are all a part of what staff is considering. In referencing a single campus, she stated that around the country these campuses are known as “super” single campuses, and parents have the ability of tracking their students from ECE through the 12th grade. She said she believes this is a good idea and may be a way to return some of the students to the neighborhood schools.

Mr. Rachal, after sharing a scenario, stated that sometimes we can’t keep doing things the same way because it no longer applies; and while change is not always easy, he believes the superintendent and the board have been very pro-active in this Vision 2020. He said no one knew that the economy would get as bad as it is or that the state would do the things that it is doing when work began on this. Mr. Rachal added that because Caddo has been pro-active, we are in a better situation than others that are closing schools. Mr. Rachal stated that in reality, he believes what is being proposed for Phase I could have been done years ago, but it has been avoided and it has only gotten worse. Knowing these will be difficult changes, he would like for the benefits of why these configurations were chosen to be provided, along with the money savings, to the public. He also asked the question “what if we do nothing”? His feeling is if we make these changes, it will be good; however, if we do nothing, it will be bad.

Mr. Hooks stated his agreement with Mrs. Bell and Ms. Trammel because he was a middle school principal for 16-17 years, and an assistant principal for four years; and 6th graders will not conform to the high school transition. He believes if we do this we are setting them up for failure. Mr. Hooks shared that he attended some of the community meetings and he saw parents at Donnie Bickham cry and walk out of the meeting. While he agrees there is a need for change, he believes the change should be done in a proper and adequate way so that the children are not hurt. He referenced the possibility of eliminating the $200 M & S teacher allotment; and with the cost of gas increasing and the district not able to provide employees with a raise, he believes this is a slap in their face to take this away from them. Mr. Hooks asked the superintendent about the mention of a consultant, because he doesn’t remember discussing this since he has been on the board. Dr. Dawkins explained that there is no consultant, but staff is proposing that, under the needed policy revamping, a consultant work with the board to make sure the board’s policies are current. At this time, we do not have a consultant and this is something the
board can choose to approve or not approve. Mr. Hooks asked about the cost for this consultant? The superintendent responded that this information will be brought to the board, but he believes there is a fee plus a $4,000 annual cost. Mr. Hooks said that is what he gets ticked off about, because we pay all this money on facilities and studies and nothing is going into the classroom. He said he is for change, but even though he was told when he came on the board that it would not affect the classroom, he believes it is affecting the classroom. Mr. Hooks also stated to the board attorney that there is no way Caddo can be declared unitary, and encouraged him to visit the schools in his district, and if the vote is yes it is, then it’s a lie.

Mr. Riall stated that, in response to District 4’s response that they do not have anything to buy into, the talk is about closing eight of the ten schools in his district, with the majority of this being in Phase III. While he understands progress because he knows northern Caddo Parish is going to change with the completion of I-49, and he is concerned about Phase I and the capacity for Donnie Bickham. Mr. White responded that the capacity is 1,217 and the enrollment goal is 85% of that figure or 1,161. The utilization of the current Donnie Bickham and the existing Blanchard brings the enrollment to 1,165 which is four students from the 85% goal. Mr. Riall stated he believes that is 97% utilization. Mr. White responded that also included is a scheduling factor and it will be important to not get up to 100% capacity. Mr. Riall asked Mr. White about the cost to retrofit Donnie Bickham so that it can accommodate this elementary school. Mr. White answered approximately $200,000 with the major concern being pre-k and first grade components that require a restroom in the facility. Mr. White said he believes there are 12 units that must have bathrooms installed and they must remain on the first floor. Mr. Riall said Blanchard is utilizing 36 classrooms that are being utilized and they have 530 students: Donnie Bickham has 48 classrooms and today he found 22 classrooms being used for something besides classrooms, i.e. special education, computer labs, etc.; and when he does the math with these 22 rooms, he believes there are approximately 10 that are used for something besides regular classrooms, leaving 12 classrooms. He asked if Blanchard is occupying 36 classrooms now and if they are moved to Donnie Bickham, how will they be accommodated? He said he knows the original plan was to build a wing at Donnie Bickham, but with the extension of the attendance boundary, and the adjustments that will have to be made, he believes implementing this for next school year will not work and will only cause many hardships. He said he has some alternate plans that he will share with the superintendent that would possibly move Blanchard to Phase III and reinstate the wing.

Bonita Crawford asked the superintendent about the stated statistics and is it possible to get a copy of this information to reference in studying the proposed changes? The superintendent responded that staff will provide the board this information as well as post it to the web site for the public. Mrs. Crawford stated her agreement with the comments relative to the $200 M & S for teachers and she hopes staff will look closely at this.

Miss Green stated that if one visited Newton Smith today they would see how overcrowded it is there and she knows change needs to take place. She asked Ms. Priest when will the board vote on this? Ms. Priest said today’s meeting was to receive the proposal and if additional sessions are needed to discuss and ask questions, that will be done before a voting meeting is scheduled.

Mrs. Crawley talked about the six possible items for savings and the fact that three of them directly impact the classroom. She stated that she noticed the first item listed was to reduce Central Office travel and supply costs, but she did not see anything that said reduce Central Office personnel. Mrs. Crawley reminded the superintendent that when she saw the adjustment in the pupil teacher ratio, she told him she would rather see the superintendent come in and turn the lights on himself rather than increase the pupil teacher ratio. She asked to see something about reducing Central Office. She said the state is trying to push student-based budgets on the districts and six volunteer districts to start taking the money the district receives and divide it by the number of students and that amount goes directly to those students, and they are trying to eliminate Central Office. She said she believes if we show that we are in the process of minimizing Central Office, because the principal is in charge of academics at their school, and she does not understand the role of supervisor and director and she believes they are redundant. Mrs.
Crawley again stated that she would like to see a reduction of personnel in that area and leave off the pupil teacher ratio and the teacher M & S allotment as possible reductions. Dr. Dawkins drew attention to the operations section where a Central Office reorganization is listed as an option for reductions. Mrs. Crawley asked if, when school closures were considered, staff considered the success of that school versus it being an AU school? She said to her all the AU schools are sitting ducks; and while she understands geography, she also understands successful community schools and if it is not broken, don’t fix it; and if it is badly broken and on the list for 8 to 10 years, something else needs to happen. Dr. Dawkins assured Mrs. Crawley that staff has looked at all of this, i.e. location, performance, capacity, etc. in this plan, and presented areas that need to be addressed. Mrs. Crawley stated that as a board member and employees, we are suffering from PTSD on consultants, and asked the superintendent’s team looking at the policies to focus on those that hinder the district and correct them ourselves. Relative to the proposed step increases, she believes it’s really for non teachers, because she believes the teacher’s increment is a state step. Dr. Dawkins responded that staff is looking at all of it and whatever is not legal, the district would certainly not break the law. She said she is not sure this would be legal, but she would like to know.

Mr. Ramsey stated that he spent time with the superintendent and staff since Vision 2020 began and he appreciates Mr. Rachal’s comments. He said all these things being discussed have been discussed in the past and he is concerned that the public is not picking up on all the details. Mr. Ramsey asked that the Communications Department place all the information on the web site and that we do everything we need to do to communicate this information to the constituents. Mr. Ramsey stated that he believes he is hearing that staff has a pretty good handle on the number of classrooms needed at each location, how many bathrooms need to be constructed as the makeup of each school is implemented and he believes this information will be helpful if communicated to everyone as we move forward. He added he has put some things on the table that are somewhat different than what came out, but he is encouraged to see some changes that the staff has made in the process in addressing concerns that have been expressed from the board. He said he sees changes and adjustments made, however, he is concerned about the savings we are anticipating and what are we actually getting, what are the benefits versus the cost? While he knows I-49 will change what happens north of town, maybe something needs to be done similar to what was done in northern DeSoto Parish. He understands that some may not like the changes at first, but we are lucky that we do have 60 to 80 acres close to I-49. In looking at the balance sheet and the potential for a $20 million deficit, Mr. Ramsey said he wants to believe that the board will look at this collectively and come to an expeditious conclusion. Recognizing that we are at a crisis level, he stated we do have time to react and he understands that with the number of schools in his district, there will probably be someone upset at every location. Mr. Ramsey concluded with whatever the final decision, he only hopes that it’s made with the right information and will be able to tell everyone the process followed and why the decisions were made. Some of the things he is concerned about include one K-8 school in southeast Shreveport not being enough since this area is continuing to grow. Mr. Ramsey also stated that we have many problems and he doesn’t know how many opportunities we may have to straighten them out. He also said that a lot of this should have been done and there are some tough decisions ahead. Dr. Dawkins said staff looks forward to working with the board in future sessions at the board’s discretion.

Ms. Trammel asked if, relative to the population at University Elementary, the board will address the attendance lines in order to relieve the overcrowding problems by bringing some students closer to their homes? The superintendent responded that it will give some relief to some schools. Ms. Trammel also asked about AU status and School Choice and if it is possible for parents to circumvent the whole process by selecting, after we complete this process, their neighborhood school? Dr. Dawkins responded that Choice has some time restrictions, but it is still a tool to be used. He also stated that in addition to individual questions and options, he is proposing to the board that in addition to the work session on March 17th, that an additional work session be held on March 22nd and a voting meeting on Thursday, March 24th.

Mrs. Armstrong stated that is her point, and if we are not ready to vote next week, she believes we need at least one additional regular meeting and that immediately after.
Spring Break, the board should be ready to address this no later than April 5th. She also shared her concerns about the staff being able to consummate what is being talked about and the final product being ready in August. She believes any delay beyond April 5th will not allow adequate time to be prepared for the start of school. Dr. Dawkins confirmed that it definitely will put the staff in a bind to be ready by start of school. Mrs. Armstrong stated she believes all necessary work sessions and a special meeting called in order to take action should be held before Spring Break.

Mrs. Bell stated her concern with comments regarding consultants because to her you must be proficient in what you do; and maybe the concern is we need to look within our own city or state, because we can’t pull a consultant from the school board to do what needs to be done. She added that Dr. Robinson’s comments about the policies and the fact that there is a committee that met and changed more policies dealing with our employees and the compensation study came out from that. She did agree that we need to look within the city, parish and state; but if it’s not someone who can do the job, then we may need to get a consultant. Mrs. Bell asked the superintendent if, when he off-lines some of the schools this year, he will consider moving the attendance department to one of these schools because of the number of people who visit this department and the congestion in the office at the start of school. The information discussed is confidential and encouraged the superintendent to look at this as a possible option. Dr. Dawkins said we do have some excess space and will be using that space to do some of the things discussed as a part of the reorganization of Central Office. In Phase III, Mrs. Bell asked if all the remaining schools will be renovated, and that staff follow through on all the schools. Dr. Dawkins assured the board that every school will have access to resources and be a part of the plan.

Mrs. Bell stated her agreement with Board members Rachal and Ramsey and we cannot wait. She stated the need to apply a date to some of these changes and move forward, because it will take time to make some of the proposed revisions that need to take place.

Mr. Rachal said he believes everyone is reasonable and we will come to reasonable answers. He stated that the information given to him is he believes the people will be concerned that this can’t happen by the start of the next school year. While he knows staff will have it all together, he believes the public needs to know the information. Mr. Rachal reminded the board that he has addressed overcrowded schools in southeast Shreveport; and according to the numbers he has, he knows that one K-8 school will still not meet the demands in that area. He said the proposal being put together is one that he believes will take the district into the future; but to provide the type education we desire our students to have, we can’t keep repairing buildings. He believes the additional information relative to benefits will be helpful in everyone understanding it. Mr. Rachal said he understands the concern for overcrowded schools, and it is important to meet as much as necessary to address this important matter.

Mr. Hooks referenced Mrs. Bell’s words “to look at the budget.” He said when he mentioned consultant, he was referencing money, money that we do not have. He reminded everyone if we say we can’t afford to give raises, etc., he doesn’t understand why we are discussing hiring a consultant and where will the money come from for the consultant? Dr. Dawkins explained that staff will determine how this can be added to the budget because there will be some savings in closing some of the buildings and in reduction of inefficiencies to hopefully pay for it; however, if we can’t find a way to pay for it, staff will not bring a recommendation to the board. Mr. Hooks asked if a budget could be put together to give the employees a raise? Dr. Dawkins responded that staff is looking at all available dollars to do what we have to do for students and employees.

Mr. Riall asked about abandoned buildings being included in the plan? The superintendent apologized to the board for the slide on vacant buildings, available properties, etc. being left out of the presentation and will get this information to the board and on the web site. He said there will be a recommendation on these to either maintain them, get rid of them, demolish, etc. Mr. Riall asked the superintendent to follow up on the truancy rate and the process for them to go through the Volunteers for Youth Justice. Mr. Riall also asked that JPAM be brought up to full speed in the coming school year.
Ms. Priest expressed appreciation to the superintendent and staff for the in depth work done; and while the district has been blessed, she understands if we don’t plan, we are subject to fail. Ms. Priest added that except for the children, there is no need for any of us. Dr. Dawkins expressed his appreciation to staff and for spending the time needed to put this information together and for the input from the board and audience.

**ESTABLISH AGENDA AND CONSENT AGENDA FOR MARCH 15, 2011 CPSB MEETING**

Superintendent Dawkins highlighted the items for the board’s consideration at the March 15, 2011 CPSB meeting and the following discussion ensued.

**Bids (Construction).** Mrs. Armstrong asked about the cost for the elevator at Vivian in light of the proposed changes in the Vision 2020 Plan. Steve White responded that the approximate cost is $800,000-$850,000 and is a project approved by the board last year. Because it was bid late last year and there was not time to get the elevator and parts in, it was delayed until this year. Mr. White stated he understands any concern for expenditures such as these, but believe it’s a decision of providing the accessibility to a building. He explained that staff has talked to legal counsel in order to bring a complete recommendation to the board. Mrs. Armstrong agreed we need accessibility; however, if it is possible this building will be closed in two years, can we accommodate the students that need this elevator until we know for certain what will happen. Mr. White indicated that this is a unique facility and some limited access can be provided with ramps; however there are other issues with this project and the limited location possibility. Mr. White explained that he has discussed the matter with the superintendent and detailed information will be provided to the board. Dr. Dawkins explained that staff is still attempting to find a solution because when making a sizeable investment such as this and discussing possible changes, a solution is needed to address the needs of these students.

Mr. Rachal asked to see other options and their cost in order to provide the accessibility. Mr. White assured the board that staff will take every step possible to minimize the cost, to comply with legal requirements and to provide what the students need. Mr. Rachal asked if staff has already looked at other options, he would like to see what these are.

Mr. Riall said he believes one of the reasons we need to address this at this time is Vivian has a rather large percentage of special education students, a number of which are severe and profound.

Mr. Hooks said he is concerned that this school may be put off-line, yet we are discussing putting this kind of money into it. Mr. White stated that was his hesitation and felt that if Vision 2020 is supported and we can stay on target with it, construction of the proposed K-12 campus could be as far away as four to five years. From a business point of view, would we get a return on this investment in that short time, probably not since the life expectancy is longer than five years. Because a bond issue has not been approved, the realistic expectations of the Department of Justice allowing us to stay in non-compliance for five years under the possibility a bond issue may pass, then where would we be. He added it is something that has been in effect since the 1980s and this has not been addressed, it is actually something that has been neglected for 30 years and the idea that the Department of Justice would allow the district to escape penalty for five years at the possibility that a new structure is proposed (without a funding source), would be very remote. He said you also need to look at protecting a structure, because legal counsel has advised that it would be very hard to defend doing so and not make an accommodation for special needs. Mr. Hooks said he appreciates the comments, but it seems as though we are throwing good money after bad money. Mr. White reminded the board that this should have been addressed when the Americans with Disabilities Act was passed in 1983; however, what we have been doing is an understanding with the Department of Justice that the expectation of Caddo Parish to address every building at one time would be financially unreachable, so they were agreeable with the aspect that Caddo would develop a plan to address this one school at a time.
Mr. Abrams concurred with Mr. White’s comments and stated he will provide a legal opinion to the board that will help them with making a decision in this matter. He reminded the board about similar issues at Fairfield.

**2011-12 Critical Capital Projects Health and Safety Priorities.** Ms. Priest asked that staff add to this list, as has been requested in the past, information on the design and engineering companies and how they are meeting the satisfaction and criteria as it relates to Opportunity Caddo relative to minority employment, sub contractor opportunities, etc.

**Approval of Textbooks for Adoption.** Mr. Rachal said he knows this is a list that the State approved and the local board is required to adopt, and he noted the stipulation of ebooks being available for these. He said this is an example of how technology is moving forward and that we will see students carrying fewer textbooks because they will be available electronically, so we need to be prepared for that when it happens.

**ADDITIONS**

Ms. Priest added an item scheduling March 17 and 22 at 4:00 p.m. for work sessions on Vision 2020. Mrs. Armstrong asked that a special called meeting be scheduled for March 24th to vote on a final configuration for Vision 2020 prior to spring break. Ms. Priest stated that a special called meeting will be scheduled for March 24th.

**PRESENTATION OF PROPOSED AGENDA FOR THE MARCH 15, 2011 CPSB MEETING**

President Priest announced that the consent agenda will be Items 6.02-6.03, 7.01-7.02 and 8.01-8.05. Mr. Riall moved, seconded by Mrs. Bell, to approve the proposed agenda and consent agenda for the March 15, 2011 CPSB meeting as presented. Vote on the motion carried unanimously.

**POLL AUDIENCE**

Daryl Roberson, Caddo Association of Educators, referenced incidents at a Caddo middle school in the media last week, and the fact that we do not want these type things happening in our schools, nor do we want it aired by all the local media. He said anything that can be done to keep these type incidents from occurring will be to everyone’s advantage. Mr. Roberson stated that the Caddo Association of Educators through its affiliate the Louisiana Association of Educators and the National Education Association offer many proven self-development inservices that are designed to aid building administrators and staff to manage behavior of students and to help prevent these conflicts from taking over our schools. He said many times these are offered at no cost to the district and they stand ready to offer all assistance possible to help minimize these type problems in classroom management, bullying and fighting. Mr. Roberson said the CAE believes working together with the schools, administrative staffs, parents and students can keep Caddo schools safe for everyone. Handouts in these programs were also shared with members of the board.

Jackie Lansdale, Caddo Federation of Teachers and Support Personnel, referenced the Vision 2020 reports relative to the budget and the option for monies that can be saved, i.e. freezing step increases, salary lanes, $200 supply monies, pupil teacher ratio. She asked if this is a given regardless of what else is done with the plan? She said she doesn’t believe this has been communicated as clearly as it could have been and several things stated tonight, i.e. common contract for copier machines, is something they have long favored. She said there are some things, i.e. the alternative school situation, they would like to see moved from Phase III to an earlier timeframe.

Cindy Bickham addressed the board on the proposal that will affect Blanchard Elementary. She shared with the board the uniqueness of Blanchard Elementary and the support the school receives from the community. She asked the board to please consider that (1) Donnie Bickham is not conducive to lower elementary school children, (2) the increased population in northern part of the parish, (3) parents and community’s
participation in the community Vision 2020 meetings and asked that additional meetings be scheduled before the next meeting.

Meg Davis, parent and teacher at Blanchard, stated that she would like to address the big gray elephant in the room and that is magnet schools. She said she believes magnet schools is pulling the cream of the crop from the neighborhood schools, putting them in the magnets and leaving the neighborhood schools behind that are now academically unacceptable. Ms. Davis said she believes if you take the highest achieving students from the neighborhood, along with their highly involved parents, you can’t expect anything else. She said because Blanchard is such an exceptional school, they have not been as affected by this; but she asks why is Donnie Bickham at only a 51% capacity? She said it is in one of the fastest growing areas in population, so she doesn’t believe there is any reason for this. She knows that Shannon Wall is a great principal, but when she drives to school each day, she knows she passes 50-60 children that are not five minutes from Donnie Bickham, yet they are going to Herndon Magnet. We are paying for the fuel to transport students over 30 miles one way; and in looking at ways to cut costs, this does not make any sense to her.

Carrie Gaskin, Blanchard PTA President, addressed the board on the proposal to change Blanchard. She shared with the board that this school is the anchor to the community and she believes that the community meetings were misrepresented since no immediate closures were never discussed. She said she believes the board needs to go back to the community with the now proposed plan to get feedback. Ms. Gaskin shared with the board what the community and the PTA have provided to the school, i.e. playground equipment, smartboards, laptops, elmos, because the school board could not provide these for the school. She said she believes the proposed changes will hurt the morale of the area and the students. Ms. Gaskin talked about the continued improvement in scores at Blanchard; and they believe an increase in the student teacher ratio will negatively affect the school’s scores. She believes the back door approach is wrong and asked that the plan be brought back to the community.

Adjourn. Mrs. Bell moved, seconded by Mr. Riall, to adjourn. Vote on the motion to adjourn carried unanimously and the meeting adjourned at 8:40 p.m.
The Caddo Parish School Board (CPSB) met in regular session in its office at 1961 Midway, Shreveport, Louisiana at approximately 4:30 p.m. on Tuesday, March 15, 2011 with President Lillian Priest presiding and the following school board members present being a quorum: Steve Riall, Jasmine Green, Willie Burton, Charlotte Crawley, Curtis Hooks, Mary Trammel, Bonita Crawford, Barry Rachal, Larry Ramsey, Ginger Armstrong and Dottie Bell. Also present were Superintendent Gerald Dawkins and Legal Counsel Reginald Abrams. Ms. Trammel led the prayer and Pledge of Allegiance.

CONSIDERATION OF MINUTES OF THE FEBRUARY 15, 2011 and MARCH 1, 2011 CPSB MEETINGS

Mr. Riall moved, seconded by Mr. Rachal, to approve the minutes of the February 15, 2011 CPSB meeting as submitted in the mailout. Vote on the motion carried unanimously.

PRESENTATIONS AND RECOGNITIONS

Tricia Grayson, director of marketing and communications, on behalf of the CPSB and staff, presented the following special recognitions. The president and superintendent greeted and presented each honoree with a certificate/award. Administrators, families and friends present were also recognized.

Erase Bullying Video. Tricia Grayson shared with the board that last week was bullying awareness week in Caddo Schools with schools holding assemblies, rallies and other events to bring awareness to bullying as well as providing tips to parents on identifying and dealing with bullying. A video shown to the middle and high school students was shared with the board and audience.

North Louisiana Football Hall of Fame Award. Gary Taylor, senior at North Caddo High School, was recognized as the recipient of the North Louisiana Football Hall of Fame award. Ms. Grayson stated that this award is given to 14 students in the state, and it is based on a GPA of 3.25+, must be an All-District Football Player, a high school senior and excel in civic duty.

DECA students. The following students won first-place awards in the recent Louisiana DECA Conference: Hayden Flint, Emily Christie, Brianne Hamilton, Quarry Edwards, and Keaiuna Evans, C. E. Byrd High School; and Chamijah Wright, Fair Park High School. Also recognized was Allen Germany, Caddo Career and Technology Center, as recipient of the outstanding DECA Advisor for the State. DECA advisors present were also recognized.

President’s Award for Outstanding Civics Teacher. Leslie Brown, teacher at North Caddo High School, was recognized as the recipient of the President’s Award for Outstanding Civics Teacher. This award is annually given by the Louisiana State Bar Association to one or more teachers in recognition of their law related education work.

Presentation by LSU AgCenter 4-H Program. Brittany Rushing, sophomore at Northwood High School, shared with the board an update on the Caddo 4-H program in Caddo schools, highlighting the number of programs in the parish, their annual focus this school year, and various activities the local chapters were involved in this year to promote and develop leadership skills. Miss Rushing also reported they will participate in a conference in the near future to teach young teens how to market and manage a business. Activities and opportunities at individual schools were also highlighted that will help students and teachers to develop leadership, citizenship and life skills. She expressed appreciation to the board for its support.

VISITORS

Susan Reeks, 81st Street ECE, addressed the board on the proposed changes to 81st Street and encouraged the board to revisit the plan based on bricks and mortar and more carefully look at the needs for the children at 81st Street. She highlighted things in place at 81st Street that she doesn’t believe one will find at another site like Mooretown and Barret, i.e., a special P.E. room along with a great desire from the staff to minister to the needs of these students. More free-standing schools are needed for early intervention where future leaders can be trained.
Niccie Johnson, 81st Street ECE, addressed the board on the proposed changes to 81st Street and that she has worked for the past 40 years with pre-school students. She said she has seen many pre-school age children read for the first time in their life. Ms. Johnson explained that three expectations are taught at 81st Street ECE: talk to every child, be respectful, be responsible. Ms. Johnson reported she is responsible for providing the best educational possibilities for 253 pre-school age children daily and for providing a safe school environment. She expressed her appreciation of support for 81st, however, she believes she would be irresponsible as a person to the children if she heard something being prescribed that will harm children and not speak for them. She asked the board that before they vote, to please make the time to visit 81st to verify what is being told; because if we are to make certain every child is reading fluently by second grade, it is important to serve as many pre-school children as possible.

Cindy Bickham, Blanchard parent, shared a video on Blanchard Elementary School, it’s programs, community partners, PTA and parental involvement, growth in academics, etc. in support of keeping Blanchard Elementary open.

Mandy Wall, Blanchard parent, addressed the board on the proposal to close Blanchard. She said with the mission to improve academic achievement of students by closing academically unacceptable schools, she doesn’t believe this applies to Blanchard since it is not in AU status and does not need a fix. She shared with the board and audience the following statistics on student achievement: (1) Blanchard labeled as a school of exemplary academic growth with a current school performance score of 104.6, placing Blanchard in the top five in the neighborhood schools. (2) Blanchard is a three-star school and has made adequate yearly progress (AYP), thus they are not in academic assistance and are not academically unacceptable. The last growth target was three points; and Blanchard exceeded its target by increasing four points. She added that even though Blanchard is a three-star school, the teachers, parents, students and administrators are continually striving to increase their school performance score. She invited board members to visit Blanchard and see what is going on at their school and to vote no.

Daryl Roberson, Caddo Association of Educators, addressed the board on the Vision 2020 Plan and expressed appreciation for the hard work in presenting the information to the board and the community. He said they were also pleased that the board scheduled multiple work sessions to discuss the plan so everyone has a full understanding of the plan and how it will affect their communities, children, jobs and careers. He said he believes these meetings will ensure that the best possible final plan can be brought to and voted on by the board to ensure the best educational opportunities for the children and the best working conditions for the Caddo Parish employees. He encouraged the board to listen closely to the constituents and to each other and acquire as much information as possible as deliberations continue over the issues that will ultimately shape the Caddo Parish School System through each phase of implementation and into the future. He also reminded the board that it is their duty to do what is in the best interest of the children and all employees of the Caddo Parish School System and all eyes are on the board.

Jackie Lansdale, Caddo Federation of Teachers/Support Personnel, referenced President Obama’s speech on reforming No Child Left Behind, speaking about the harm in labeling schools, which they agree with him on. However, she stated there are also those issues, i.e. merit pay, that give them concern. Mrs. Lansdale also noted his comment that teachers in Korea are called nation builders and are considered instrumental in the success of their society. She said she wonders if the Caddo Parish School Board members view educators in that way. If how the board spends its money is what is important, she asked about the loss of funding screens from the State, the appeal of the Stelly Tax, tax breaks to the movie and gas industry, loss of MFP, failure to fund programs, i.e. National Board Certification, and the $65 million plus the $20 million deficit created by spending or setting it aside for Wall Street and pet projects. Mrs. Lansdale stated that in light of the proposal to freeze salary steps, increase the teacher pupil ratio, the possible loss of the supply monies, the possibility of not honoring incentive pay for employees at the AU schools, and not securing Haynesville Shale and EduJob funds, it will be naïve to believe that teachers and school employees here are considered nation builders, but believes it to be more like chopped liver. She said steadfast teachers and school employees are taking the brunt of the board’s shortfall. Mrs. Lansdale added that she believes there are some positives in Vision 2020, but for it to realize its full potential, there are areas that must be addressed now, i.e. stop teachers from leaving and return discipline to the classroom. She said they are not buying into the truisms that times are hard and we must do more with less, because it does not ring true when it is
coming from the mouths of those who are not doing more with less and they continue to bring in consultants to do the jobs for those already being paid to do them. Mrs. Lansdale also referenced the increase of the cost of benefits and how Vision 2020 and the upcoming budgetary process will be defining moments for the district.

Frederic Washington addressed the board on the proposed Vision 2020 Plan and that he believes the long and short of it is that 1 + 1 does not equal 2 in Caddo Public Schools. He says this because at least four board members and members of the administration stated that we would not see any works with Vision 2020 for some years down the road, and he believes we are falling victim to something that was in the media, i.e. the stories about Webster Parish and other local school districts. Mr. Washington stated when people who have never had an opinion about the public education system now have an opinion, you know it’s bad. He said it makes no sense to close North Caddo and Vivian that are surrounded by businesses and homes and move into the middle of nowhere. He said if Caddo doesn’t get it together, the voters will resort to their own independent school districts, which is happening in other Louisiana cities. He also stated that in the report that of the 22 6-12 configuration schools in Louisiana only one is in AU status, it failed to reflect how many of the 22 are currently on academic watch and academic assistance. He also stated that when talking about the urgency of things, he believes the biggest urgency is Eden Gardens and why are they not moving to a temporary spot to relieve the enrollment at University. As one of his professors at LSUS said, we are trying to save a dollar on the backs of the rural and Black schools.

**ESTABLISH THE AGENDA AND PROPOSED CONSENT AGENDA**

The superintendent highlighted the items for the board’s consideration. President Priest announced that 13.02 “Recommendation for the termination of a non tenure probationary employee” is pulled and items 6.01-6.03, 7.01-7.02, and 8.01-8.04 are the consent agenda.

**CONFIRM THE AGENDA AND CONSENT AGENDA FOR THE CPSB MARCH 15, 2011 MEETING**

Mr. Riall moved, seconded by Mrs. Bell, to approve the consent agenda. Vote on the motion carried unanimously and the following is a summary of the board’s action.

**Item No. 6.01**

**6.01 Requests for Leaves.** The board approved the following requests for leaves as approved by the superintendent and submitted in the mailout.

**Certified**

- **Catastrophic Leave, March 7, 2011-April 18, 2011**
  Micheleen S. Cook, Compliance Specialist, Special Programs, 18 years
- **Catastrophic Leave, March 24, 2011-May 11, 2011**
  Patricia G. Haynie, Teacher, Caddo Middle Magnet, 32 years
- **Catastrophic Leave, February 15, 2011-March 4, 2011**
  Mary Jo Mitchell, Teacher, University Elementary, 1 year

**Classified**

- **Leave Without Pay, February 13, 2011-April 20, 2011**
  Kenneth Gilliam, Teacher, Academic Recovery, 24 years

Kenneth Gilliam’s request to be relieved of his obligation to repay monies received while on medical sabbatical leave was approved.

**6.02 Other Personnel Transactions Reports.** The board approved the other personnel transactions reports for the period of January 26, 2011 – February 25, 2011 as recommended by the superintendent and submitted in the mailout.
6.03 Renewal of Administrative Contracts. The board approved the renewal of administrative contracts for Walter Brown, Lynette Everett, Pamela Fite, and Renea Leone as recommended by the superintendent and submitted in the mailout.

Item No. 7

7.01 Bids (Purchasing). The board approved the following bid(s) as recommended by the superintendent and submitted in the mailout on the bid tabulation sheets: (1) Paula Educational Supply for 15% discount for the purchase of full-line school supplies – catalog; (2) Fruhauf Uniforms, Inc., totaling $39,577.41 for the purchase of band uniforms for Woodlawn Leadership Academy; (3) ABC Auto Parts, Ltd. and Tri-State Battery Supply, Inc. for the purchase of vehicle batteries; and (4) DF Music Enterprise, Inc., totaling $19,978.00 and National Educational Music Company, totaling $36,738.25 for the purchase of musical instruments.

7.02 Bids (Construction). The board approved the following bid(s) as recommended by the superintendent and submitted in the mailout on the bid tabulation sheets: (1) Carter Construction with a Base Bid, for the sum total of $962,000 for Vivian Handicap Accessibility/Elevator, Project 2011-202.

Item No. 8

8.01 Salary Reconfigurations. The board approved reclassification of positions as recommended by Rahmberg, Stover and submitted in the mailout.

8.02 Legal Services. The board approved provision for legal services in accordance with the following motion at board members’ work stations.

Move that in Response to the RFP for Legal Services that all deficiencies in any proposal documents received by the Caddo Parish School Board be waived, but further that any and all proposals as proposed be rejected to the extent any such proposal in part or in whole does not reflect the Legal Services Program (with designated attorneys) proposed in the remainder of this motion herein below, and further move that the CPSB Adopt the following System for Legal Services, (becoming effective and fully implemented April 1, 2011).

CPSB’s General Counsel shall continue to be Reginald Abrams (referred to at times herein as General Counsel) of Abrams & Lafargue. General Counsel shall have a direct line of supervision and accountability to the Caddo Parish School Board. General Counsel shall attend all CPSB meetings, shall represent the CPSB in all contractual and adverse dealings and negotiations with the Superintendent, shall have general over-sight and shall be responsive to the CPSB in dealings with any other attorneys, shall counsel the Board during grievance, expulsion and employee appeal hearings, shall represent the Board in preparation of contracts, shall be prepared to provide the Board with general counsel at all times, shall monitor and review legal billings of all other approved CPSB legal counsel prior to payment, shall provide services and assign CPSB legal matters in accordance with proposal submitted by Abrams & Lafargue in response to RFP-22L-11. Compensation for Abrams & Lafargue legal services shall be as described in proposal as submitted by Abrams & Lafargue in response to RFP-22L-11.

The Superintendent, and designated staff, shall be administrative liaison to all attorneys (other than the General Counsel to the Board).

Risk Management:
At any time that the Department of Risk Management finds a deficiency in the legal handling of a claim, it shall promptly report same in writing to the Superintendent and the General Counsel. The Department of Risk Management shall monitor and maintain a claim file on the following types of claims and litigation:

Personal Injury Defense;
Construction Litigation;
Other litigation involving personal and/or property damages; or
Workers Compensation Claims.
1. Abrams & Lafargue is approved to provide legal services to the Board in all the areas described in the Firm’s response to RFP-22L-11. Abrams & Lafargue shall assign legal work to law firms that are approved by the Board taking into consideration any special expertise of the firms, the workload of Abrams & Lafargue, and the needs and best interest of the school system.

2. The following law firms are approved to provide legal services submitted in their proposal other than general counsel and bond counsel services to the CPSB:

- Law Offices of Fred Sutherland
- Cook, Yancey King and Galloway
- Lydia M. Rhodes
- Law Offices of Ronald Lattier
- Law Office of Dale Cox
- Smith Law Firm
- Law Offices of Zelda Tucker
- Wiener, Weiss & Madison
- Mayer, Smith & Roberts
- Immigration Relief Center
- The Malone Law Firm
- The Davis Law Office

Attorneys retained under this section shall be compensated at the rate proposed by the law firm with a cap of $185.00 per hour. Paralegal time shall be compensated at the rate proposed by the law firm but not more than $75.00 per hour.

SPECIAL COUNSELs are approved as needed as follows:

- Foley & Judell, LLP as general Bond Counsel if necessary at a fee not to exceed the Louisiana Attorney General’s approved fee schedule for bond counsel services. The board designates Jacqueline Scott as local co-bond counsel along with Foley & Judell, LLP at a total fee not to exceed the Louisiana Attorney General’s approved fee schedule for bond counsel services.
- Murov & Ward, LLC will be continued as Immigration counsel for the Filipino H1 b issues previously engaged until conclusion at $300 per hour for attorney services and $100 per hour for paralegal services.

3. General Guidelines

Attorneys shall take reasonable efforts to minimize the CPSB’s legal fees. More than one attorney should not bill for the same service provided by a Firm for the CPSB. Paralegal(s) shall be supervised at all times if utilized for CPSB work by an Attorney/Firm. The Attorney/Firm shall be fully responsible for the work product of any paralegal they utilize. Paralegal time shall not be billed for a service and/or provision, which is also billed by an attorney. All legal services shall be billed monthly, with a copy of all billings sent to General Counsel.

By the end of each March, June, September, December, all firms providing services shall provide (at no additional cost to the CPSB) a summary of any litigation they are handling, by sending the summary to the General Counsel.

4. Other Provisions:

The Board shall have the right to terminate the services of any attorney by providing 15 days notice by mail to their last known address.

In addition to the other services provided by the General Counsel, and notwithstanding the legal assignments herein, the General Counsel shall be expected to take necessary action on an expedited basis at any time he deems it necessary to protect the interests of the Caddo Parish School System.

When necessary, the CPSB may direct General Counsel to review and make recommendations about the services, billings and legal affairs of any other Attorney/Firm providing services to the CPSB.

Travel expenses for any firm shall not be allowed unless preapproved by General Counsel.
Each and every attorney/firm listed herein above, must provide to the CPSB written confirmation of acceptance to terms provided herein, which must be received within ten days of March 15, 2011, that the Attorney/firm accept the terms and provisions of the CPSB's action and expressly agree to accept the rate proposed by firm not to exceed $185.00 per hour for attorney time, and $75.00 per hour for paralegal services under the terms and conditions of this system. This written confirmation of acceptance shall be evidenced by proper documentation to establish the capacity of the person signing the confirmation. In the event the Attorney/Firm does not timely accept by written confirmation, then that Attorney/Firm shall be removed from the legal services system.

Each and every attorney/firm providing legal services to the Board shall maintain at all times professional malpractice liability insurance having coverage for the CPSB in an amount at or exceeding $1,000,000.00 per claim.

Each April 1st, or at any time upon request of the superintendent or Board President, each attorney/firm providing legal services to the CPSB shall provide a certificate of professional malpractice liability insurance having liability limit coverage at or exceeding $1,000,000.00 per claim.

If at any time, the Board is required to provide the Superintendent with independent counsel, the CPSB President shall authorize the provision of such counsel, which counsel shall be selected by the Superintendent, but which attorney shall be subject to the same payment for service as the attorneys selected in Paragraph 2 above.

Any pending litigation shall be handled as follows:

All pending litigation shall be handled by the law firm that is currently assigned to the matter.

8.03 2011-12 Critical Capital Projects Health and Safety Priorities. The board approved the 2011-12 Critical Capital Projects Health and Safety Priorities as recommended by staff and submitted in the mailout.

8.04 Approval of Textbooks for Adoption. The board approved the adoption of the recommended textbooks as submitted in the mailout.

ADDITIONAL VISION 2020 WORK SESSIONS ON MARCH 17 AND 22 AND SPECIAL CALLED MEETING ON MARCH 24

Mr. Rachal moved, seconded by Mrs. Bell, to approve additional Vision 2020 work sessions on March 17 and 22 and a special called meeting on March 24. Mrs. Crawley stated it was brought to her attention that this is the week of testing; and, after seeing the impact on teachers and the communities, she question if we should do it this particular week. Mr. Riall asked about meeting times for these meetings, and Ms. Priest stated each meeting will begin at 4:00 p.m.

Vote on the motion carried with Board member Crawley opposed.

SUPERINTENDENT’S REPORT

Dr. Dawkins recognized Mrs. Turner who provided an update on the quarterly monitoring of schools from the Recovery School District. Mrs. Turner reported that another monitoring visit with the RSD has been completed and reminded the board that a team goes on site for an entire day, meeting with faculty members and evaluating all five essential practices and components. She shared copies of the complete QMRs for each school, and reported that the Superintendent’s Target Schools were visited in January and the new AU schools in February. She said the RSD will also do a follow up visit to talk with individual school teams the week of April 6th and 7th. Mrs. Turner also reminded the board of the components that comprise the monitoring reports and what each rating meant. In looking at the individual school results, Mrs. Turner highlighted where each showed improvement as well as those areas staff continues to work to make the ratings consistent. One of the requirements when a school receives an Insufficient or Minimal is that the school must prepare an action plan addressing each of those issues. She reminded the board that the new AU schools are on a voluntary basis and the RSD will do some additional monitoring and assign Distinguished Educators to each school. Additional consultants will also be available to work with the Distinguished Educators and individual building staffs. Mrs. Turner reported that district level teams continue to observe and provide feedback at those
buildings and professional development is taking place in the area of need for those particular buildings. She also shared individual school reports on the new AU schools.

Superintendent Dawkins announced that after board review of the provided information on each school, staff is available to answer any questions board members may have.

Mrs. Crawford recognized the Best Practices on Oak Park’s report, and with the continued Minimal practices seen, asked what is being done to change that? Mrs. Turner explained that when going deeper into the report, one will see that in some instances a school received a “Minimal” because they were one off, barely missing it. She said if it is a professional development issue, an instructional strategy issue, etc., staff is addressing these in a job embedded way one on one with teachers.

Ms. Priest recognized Booker T. Washington and Green Oaks’ Best Practices in the areas of school culture and climate to learning and believes this needs to be stressed to the remaining schools.

Mr. Rachal noted the obvious improvement and asked if in the future, he could get a copy of the report prior to the presentation to the board so he is better prepared to ask questions or make comments. He also recognized notable improvement at Booker T. Washington, Fair Park, Green Oaks, and Oak Park, and he is sure at others, and the staffs should be commended for their efforts in this noted improvement.

Mr. Riall asked about the variance between Oak Park and all the other schools and why are we not implementing what they have done in other schools. The superintendent stated that Oak Park’s staff has made a 150% commitment to make sure they handle those issues that impact learning and we expect to see accelerated growth in the remainder of the year. He recognized the outstanding work of the leaders in the schools. Mrs. Turner also explained that Sabrina Brown is meeting with principals and she is holding workshops at her school to share those things that are working. One of the things Oak Park believes is making a great difference is the individual student learning plan, and identifying the strengths and weaknesses of the students.

Mr. Hooks stated that, as an old veteran principal, what works for one school may not work for another school, and this must be considered.

Mrs. Bell said she believes there is leadership and commitment from the teachers and believe in what they are committed to do.

Miss Green asked Mrs. Turner if the same was not done last year, because she would like to get a copy of last year’s report for comparison. Mrs. Turner stated she will provide the requested information, but the new set of schools will not have data to compare as this is their first year.

Mr. Ramsey requested that the superintendent and staff build a report on the things that can be duplicated from the Oak Park program. Also, he added he would like to see the school performance scores added to these reports because the bottom line is are the children learning.

Mr. Rachal asked if administration would provide him with an opinion on the top three reasons why Oak Park has accomplished what it has in a short period of time. Mrs. Turner said it starts with the approach to instruction that the Oak Park principal and teachers have identified by looking at individual student data. She said the principal meets with every teacher of every classroom regarding the achievement of students. Mr. Rachal asked if that is happening at every school or just at Oak Park? Mrs. Turner responded that it is happening at Oak Park at a different level, and it is not happening at every school. She said their approach to all the students being successful has sent a different message to all the students in terms of expectations and every effort is celebrated. Also, maximizing classroom instructional time has also been thought through, planned out and adhered to, limiting interruptions. Oak Park has organized its data in a different way and teachers find it useful, they reflect on it and modify it based on the needs of their students.

Mr. Riall also noted that Oak Park’s absenteeism went from approximately 12% to 4%; and if you compare all the data, generally the schools with the lowest scores have the highest absenteeism.
Mr. Hooks thanked Mrs. Bell for her compliment, but said the principal is only as good as the teachers make them. Dr. Dawkins noted that we can’t underestimate the parent and community partnership, because this is a critical piece and the principal has done an outstanding job to provide this type support.

Mrs. Crawley referenced the principal’s stable factor at Oak Park and the faculty in place that has continued with the principal. She also noted a slight reconfiguration of some of the students who were sent to some of her schools that went down.

Ms. Trammel asked Superintendent Dawkins and Mrs. Turner about the rating scale designed by the Recovery School District which has nothing to do with what Caddo has, and they come to Caddo, spend one day in each school monitoring, and base everything on this; and we are responsible for abiding by what they say. She asked if we have seen comparisons with other schools being monitored? Mrs. Turner said we have not and the superintendent explained that the format is the same for all school districts.

Mrs. Bell talked about the changes in some of the schools’ leadership and the need to make changes. She also noted that many in the schools get new leadership and want to continue what they have been doing and don’t want to change. Mrs. Bell stated when a new leader comes on a campus, they need to do an assessment and given a chance to make needed changes. Her concern is attendance because there are some who come to school one week and the next week they have a doctor’s excuse and are absent for several months; but because of the laws, the principal cannot do anything to permanently replace that staff member. She said this makes it hard for a principal to go into a school and address those not doing anything, those that do not want to be a part of the team. She said there are also schools that don’t see the parents until there is a problem and the school gets the blame. Mrs. Bell said she applauds the superintendent and the leadership at any of the schools that go in and assesses the school and weed out those who are not committed. She referenced the problem of teachers on the payroll when they are not in the classroom teaching and we continue to have subs in those classrooms.

Ms. Priest said that Oak Park had issues and was in AU, but success draws people and more involvement and she believes there was a time when they did not have the support, but it is now different. Ms. Priest also noted the strong principals throughout the district and asked if, when doing staff/leadership development, we are using these principals to help develop and mentor others within the district? If not, she would encourage staff to look at this.

Ms. Priest also asked that staff look at absenteeism because we can’t say anything to students about absenteeism when we have staff that do not want to come to work. The superintendent responded that we are using some of the district’s outstanding principals and will be doing more with them to mentor current administrators and those who desire to become administrators. He also responded that staff has randomly looked at schools’ attendance numbers and some of the data is not very pretty, so staff is pursuing to get this data on every school and will report this information to the board.

Mr. Hooks noted he was Mr. Washington’s principal in elementary and middle school and he believes the problem in all the low-performing schools is discipline, because good discipline is needed for any type learning to take place. He said if there is good discipline, the school scores will go up.

**EXECUTIVE SESSION**

**Litigation Update:** Wilson v. CPSB et al., 475,644 First J.D.C. Caddo Parish. Mr. Riall moved, seconded by Mr. Ramsey, to approve settlement as recommended by legal counsel. Vote on the motion carried with Board members Crawford and Armstrong absent for the vote.

**Adjournment.** Mr. Burton moved, seconded by Mrs. Bell, to adjourn. Vote on the motion to adjourn carried and the meeting adjourned at approximately 6:03 p.m.

Dr. Gerald D. Dawkins, Secretary  
Lillian Priest, President
March 17, 2011

The Caddo Parish School Board (CPSB) held a special work session in its office at 1961 Midway, Shreveport, Louisiana at 4:00 p.m. on Thursday, March 17, 2011 with President Lillian Priest presiding and the following school board members present being a quorum: Steve Riall, Jasmine Green, Willie Burton, Charlotte Crawley, Curtis Hooks, Mary Trammel, Bonita Crawford, Barry Rachal, Larry Ramsey, Ginger Armstrong and Dottie Bell. Also present were Secretary Gerald D. Dawkins, and Reginald Abrams, legal counsel. Ms. Trammel led the prayer and Pledge of Allegiance.

President Priest announced that the meeting is also being broadcast in Room 1 for overflow seating.

Vision 2020. Superintendent Dawkins stated that tonight’s meeting will again focus on the elements of the Vision 2020 Plan and staff will also share the financial aspects of the plan, the plan to address efficiencies in the district, and to address facility utilization and academic initiatives, which is the most important part of the project. He reported that meetings have been held with principals to receive their input as well as may others. Dr. Dawkins stated that staff has spoken with the Superintendent of the Recovery School District who is in charge of our MOUs with the low-performing schools. He said the consideration and input from board members has been valuable and assured the board that the final recommendation to the board next week will be reflective of what has been heard from the board, the community, parents and the students, and the decision will be what is best for the students.

Mrs. Turner, chief academic officer, highlighted again the items under academics in Phases I, II and III. She explained that the intensive reading focus will be a district wide assessment for every student at every level and more time between preK and 2nd grade in reading instruction, specifically a model for teachers to have demonstrated in the area of reading instruction. She said individualized instruction for enhancing the reading expertise of our teachers with monthly targets being set for reading progress. Mrs. Turner stated that additional activities related to reading will include assistance for parents in the area of helping their children with reading, recruiting community resources and support persons to help with one-to-one tutoring for those students struggling in reading, and partnerships with early childhood providers and other agencies to determine the readiness level of students coming into kindergarten. Classroom management and student behavior assessments will be done district wide to identify students relative to behavior and with that information provide additional support to classroom teachers for those students who are at-risk. She reported that professional development will be provided in the area of positive behavior strategies as well as behavior modification in order to minimize disruptions and increase instruction time.

Mrs. Turner also addressed the elimination of ineffective instructional practices and programs, as well as the duplication of instructional programs within the school system. This will be done with feedback from the building staff as well as principals. In expanding the career, vocational and technical options at the middle school level, Mrs. Turner said we will establish a minimum of three CTE courses at every middle school, 6-12 or K-8 configuration. As part of this expansion, we will also include those that are already a part of the plan which includes keyboarding, introduction to business and computers, and journey to careers. Staff will also expand on exploratory type activities in the areas of math and science because that is where the work force jobs will be. Regarding increasing graduation rates and improving job and college readiness, Mrs. Turner said that staff is looking at aligning the curriculum in the high schools with college entrance requirements and readiness qualifications. She also reported that staff is looking at the district collaborating with employers and colleges to ensure we have real world examples for our students. Part of this program would be the English/Language college teachers sharing with Caddo’s teachers so they can always be aware of the job readiness criteria they should be teaching the students. She said staff will also work closely with employers in establishing expectations of what a good employee looks like and the knowledge and skills needed to be successful. At the middle school level, this will imply and require some career decision making and planning on the part of the middle school students relative to think about what they are interested in.

Regarding parental involvement in student success, Mrs. Turner stated this will mean making sure parents are informed of the expectations for the students’ level of success in the core content
areas and beyond. She said it is important that all the parents understand what is expected of the students and how we can support that effort, expanding outreach efforts with the community partnerships.

Mr. Hooks asked if there are figures on how much it will cost to consolidate and close schools? Mrs. Turner responded this will be shared with the board under Operations.

Mrs. Crawley asked about the estimated cost of the reading focus? Mrs. Turner responded that it will involve professional development of which we will reallocate the monies that we currently have to focus on pre kindergarten through 2nd grade. Mrs. Crawley stated that she needs more information on what will be done; because she knows reading is the key, but she wants to know the program, what exactly will be done and how much does it cost. Mrs. Turner said at this point it is not one single program when talking about professional development, because staff will assess the students’ needs and the teachers’ needs in the teaching of reading. Dependent upon the level, i.e. pre-school, it will be oral language activities, vocabulary and additional components such as phonemic awareness, and basic structures and strategies that will accelerate what we are looking for in that development. She said we plan to have teachers within the district, and possibly bring in experts if necessary, to demonstrate how we can model most effective teaching strategies and best practices in Caddo. Mrs. Crawley asked for clarification and if bringing people on board means current staff? Mrs. Turner responded it means first utilizing our staff, i.e. reading specialists, reading interventionists, support from local universities. Mrs. Crawley asked Mrs. Turner if she anticipates an additional cost? Mrs. Turner responded only in the area of professional development, and, only if they are funded the same way as they are this year, because we would be in a position to reallocate these funds toward that particular need. Mrs. Crawley asked about a list of ineffective instructional practices and programs? Mrs. Turner said we do not have a complete list at this time because more input is required from the various schools. Because the district has a large number of programs, staff is taking those programs first that are at the majority of Caddo’s schools and discussing and comparing them to results and whether or not a particular program stays or is eliminated. Mrs. Crawley stated that these are great programs, but they are so general and she does not know if there are savings or expenses, when will be begin assessing these programs, since she thought we assessed all the time. Mrs. Turner explained that assessment instruments, different types in different places, and the consistent across-the-board includes Dibels as a starting point. Mrs. Turner further explained that one of the assessments that would be a cost is a district-wide assessment, one common uniform assessment, for all of our students at every level in the areas of reading and mathematics and would be an approximate cost of $300,000. Mrs. Crawley asked if staff sees any of the facility changes as counterproductive to parental and guardian involvement and community partnerships. Mrs. Turner responded that the parental involvement piece in the area of academics is focus on instructional support with individual schools. Staff will continue to work on community partnerships because we are looking for support in the areas of tutorials, one on one read to, read by, etc. to assist preK, Kindergarten, 1st grade teachers. She said strategies will also be in place to train these volunteers in order for them to support what is going on in the classroom.

Mrs. Crawford stated that in years past, board members have asked about programs that are working and those not working, and they have not received a list of those. She asked that when staff brings general comments to the board to look ahead and see what detailed questions might be asked and hopefully avoid being put on the spot. Mrs. Turner explained that as staff lines up the list of programs, the board will be able to see the challenge staff has in determining which ones are working or not, because programs may work in one place and not in another. Mrs. Crawford said she is of the old school and feels that maybe phonics and sight words might be the best way and will mean fewer programs. Mrs. Crawford also asked about the one common assessment to test all second graders. Mrs. Turner responded that this is the universal screening and the $300,000 is not just to test second graders, but it is to test district wide all grades, all levels. She said we will also have behavior screening at no additional cost. She also asked about increased graduation rates and college and job readiness and the need to do anything different, because she thought the district was already working toward this. Mrs. Turner responded there are two pieces that staff is extremely mindful of and they are coming quickly, i.e. the decision to be responsible in terms of finances and the instructional work required for the students and teachers and the state’s consideration of college and career readiness standards that will dictate to the district those specific things that must be addressed. She added that staff has identified what it wants to do, and can put those in place, but they may be modified quickly within in the coming
months, if the staff and teachers have been trained to work on a set of standards that may be modified and require additional training, it is necessary to make sure the two can be married and do a thorough job one time and do it well. Mrs. Crawford asked if this can be done for next school year? Mrs. Turner explained that the standards will be identification of expected outcomes and we will be able to identify those things we are already doing so not to duplicate efforts once they are established, and the state will bring training sessions in both areas. Staff will need to make sure we combine the state’s requirements with what we are planning before the state decided to roll this out and thus not tax the teachers or staff in any additional way. Mrs. Crawford asked about the required parental involvement in a student’s success and the possibility of taking advantage of assistance through the PTA in accomplishing this. Mrs. Turner said that we certainly consider the relationship with the PTA to be one of the district’s major community partnership, and the district will utilize the resources and work very closely with this group. She added that staff is also looking at technology in terms of how we can present information because we have heard the district needs to do a better job of communicating the opportunities available for the students.

Ms. Priest asked staff about expanding the career, vocational and technical options at the middle schools and looking at the elimination of the admission requirements currently in place as it relates to middle school options. She said she believes there are students that have the aptitude for being in a career program, but because of the admissions standards, they are not allowed to participate and is a population being left out.

Ms. Priest also asked staff if we will utilize the job trends from the Labor Department to look at and forecast where the projected job markets will be over the next 10 years so those are the curriculums we are putting at the middle school level and carrying over to the high school level? She also asked if vocational and technical options will be available in each middle school and what modules will be used? Mrs. Turner stated that initially staff will begin with the three that are already in place (journey to careers, introduction to business and computers, and keyboarding). She said is looking to provide this opportunity for middle school students to achieve high school credit if it is taught by certified teachers in those areas.

Mr. Riall addressed the required parent guardian involvement in student success and how we will address this? Mrs. Turner explained that the plan will be to include communicating to parents the value they bring to the table when they understand the comprehensiveness of the educational program. When a parent will work with staff, it provides an opportunity to reinforce not only in school, but in the home, the expectations for behavior, for career awareness, for college readiness and working with the students so there is an understanding in grading, requirements for homework, etc. that will support what is happening in the classrooms. Mrs. Turner stated that what is important is to establish a positive atmosphere for parents to want to be a part of working with the system and allowing for their student to be more successful. Mr. Riall asked if there is anything in place for students whose parents are not involved? Mrs. Turner responded that staff will be looking for additional adult mentors, the teachers and staffs will continue to serve as contacts for the students to encourage and support them to be successful as well, and recruiting additional community support.

Mrs. Bell shared her concern for 6th grade students being placed in the 6-12 configuration, because she believes it can be done, but, as a sixth grade teacher for 10 years, she knows how it will be. She asked Mrs. Turner how staff plans to address this, i.e. 6th grade academy? She knows the 9th grade academy is working on the Huntington campus, but she would like for staff to provide a list of things staff will do to address these concerns. She asked the superintendent if when he turns these high schools into 6-12 schools, how much resources will we have? She shared with everyone that she had heard rumored how much resources will the district have if from day 1 it has been said that it is true we will have all the students coming from one school with 40 students in a classroom. She asked the superintendent to tell her what resources will be in place for the 6th graders and what is being planned to help them adjust to being with high school students, how will we address the children’s safety? Dr. Dawkins noted that staff has been receiving these type questions and in mentioning the 6th grade and 9th grade academies, specific staff members will be assigned to work with these students in that transition. He said there are successful 6-12 models in Louisiana and visits to those schools will be scheduled to allow staff to observe how these configurations are implemented. Superintendent Dawkins noted that as long as we can keep students, they stand a better chance of graduating from the school where they began. Mrs. Bell inquired about the required parental involvement for student
success and how are we going to do this? Schools that have PTAs will sometimes only have a handful of parents show up, thus she believes we need to be realistic and that it is the teachers who sometimes are responsible for getting parents more involved. She asked for ideas on how we can use the PTA to help these schools improve student achievement.

Mr. Hooks stated his agreement with Mrs. Bell’s comments and he hopes we can come up with a solution to keep the 6th graders off the 6-12 campuses. He said this is a difficult transition for 6th graders and they do not need to worry about the problem of bullying. Being for the children and the employees, he assured everyone that their children will be safe. He added that all this looks good on paper, but he wants to know how we are going to require parental involvement and what will it cost? Mr. Hooks said he also wants to know how many middle schools are we talking about expanding the career technical program to? Mrs. Turner responded that whatever the board decides, then we will know which middle schools will require which courses. Mr. Hooks said he was placed in a situation where his school was the only middle school that had a program that consisted of career and technology; and when the superintendent left that helped him implement this program, staff did nothing for that program. Mr. Hooks asked staff what is being done to help the Caddo Middle Career and Technology program today? Mrs. Turner responded that the option there will be expanded like the others. Mr. Hooks asked staff what is being done to help this school today? Mrs. Turner said staff is supporting what the school has going on as it relates to career awareness. Mr. Hooks stated that if Mrs. Bell did not have the end of the year program in place each year, he doesn’t believe the school would have made it, because she secured additional funding for the school that the district did not provide. Mrs. Turner explained that the plan is to achieve what is being presented to the board and it will require organization on the staff’s part as well the community. Mr. Hooks asked about expanding outreach efforts to create effective community partnerships, because the community has lost confidence in the school system. Ms. Priest reminded everyone that the purpose of this meeting is to ask questions about each Vision 2020 recommendation to be implemented, and she encouraged everyone to stay focused to that end. Mr. Hooks said he wants an answer and how will we regain the confidence of the communities that has been shattered? Ms. Priest stated that the question should be how will we expand the outreach efforts to create effective 2020 partnerships? Mr. Hooks said that is what it says on the paper, but his question is how can we regain the confidence? Mrs. Turner said staff is working with many different community partnerships in a number of capacities, i.e. with the universities relative to mathematics, social studies, turn around principals, etc., training for teachers in the areas of mathematics, social studies and science, teachers participating in institutes for either history, career technical, and we will continue to build on that platform. She said staff is also communicating with Head Start and other early childhood providers to build on these relationships. Mr. Hooks said he appreciates that, but he wants to know how he can regain the confidence of those who voted for him when we were told that nothing would happen for 3-5 years or more and now we are forcing these students to move? He said he believes children learn best when they are where they want to be, and not where they are forced. Dr. Dawkins stated that his concerns are certainly the staff’s concerns and he wishes that these discussions were not necessary; however, the district has challenges in the district and the state that we have to accelerate in order to make this district a viable school system. Ultimately, something must happen this year; and if not, what must happen will double. Restoring confidence is what this is all about, and what is presented comes from concerns expressed by the board and the community. He said there are certainly some things that need to change and what is being presented reflects those changes.

Ms. Trammel asked that something be included relative to absenteeism in the middle and high schools under academics and she would like to know the projected amount for each bullet item. Regarding the sixth graders, Ms. Trammel stated that she is not able to fathom them being in the high schools and wants to be assured about the safety of the sixth graders.

Mrs. Armstrong asked if the district wide testing is scheduled for this coming fall? Mrs. Turner answered that is correct and at all grade levels. Mrs. Armstrong asked if this is considered a pre-test? Mrs. Turner said it is a universal screening. Mrs. Armstrong asked if these same students have a post-test in May prior to school being out in order to register some factor of growth? Mrs. Turner said there will be an assessment of the grade level standards, but this initial assessment gives a starting point so we know where the students are starting and so we can plan their lessons according to their needs. Mrs. Armstrong stated that her interest is that we have a post test using the same instrument so we can determine if there has been growth. She said the teachers would then be able to determine how the lesson plans need to be adjusted or what other objective needs
to be implemented. Mrs. Turner explained there will be an assessment and the universal screening is something separate and assessments will be used in between them to measure growth. Mrs. Armstrong asked if she understands correctly that we are not using the same tool for the post-test. Mrs. Turner said we are not, because it is a universal screening used initially to determine where the students are. Mrs. Armstrong stated her concern is the same as with the Leap and iLEAP because you are measuring a different group of students and in this case, you are using different instruments. She believes there is a need to find some type of consistency in order to have some determination on a level playing field as to whether there is growth or not. She said there will be interventions and testing along the way, but unless the same pre-test is used, you cannot determine if the interventions worked. Mrs. Turner said that is something that can be done for comparison purposes.

Mr. Ramsey asked if JPAM will be fully operational next school year? He asks this question because there is a notification process contained in it that if a student scores poorly on a test, there is an instant notification. Also, as it relates to attendance there is also a notification so that parents know their child is at school or not. The superintendent responded that this was the first year JPAM has been operational and staff is looking at those areas that have not been used as well as those areas that need to be used at a higher level. He said there will be a review of the program in the coming weeks and discussion on aspects that have not been used, i.e. special education, etc. Mr. Ramsey asked if we will be eliminating ineffective instructional practices and programs before adding any new practices and programs? Mrs. Turner explained that the goal is to eliminate anything that duplicates itself so teachers are not charged with implementing programs simultaneously that are doing the same thing. She said it is also staff’s goal to take those programs that are successful and make sure all schools have the opportunity to take advantage of these programs and practices. Mr. Ramsey asked if the discussion will get into the details on how we plan to address and improve graduation rates and job readiness? He commented that most of the discussion has been bullet items, and he would like to get to the details and discuss concrete plans for addressing academics.

Mr. Burton asked the superintendent about what is happening at Booker T. Washington with the proposed 6th grade coming there? Dr. Dawkins responded that Booker T. Washington is a new technology high school and J.S. Clark is a microsociety school and both programs are showing gains, and that is expected to continue. He explained that the configuration will be a 6-12 campus and would operate as a middle school and high school on that campus. Dr. Dawkins said staff believes it has the capacity to do this and staff is still working on the details to merge these. Mr. Burton asked about the two-year program at Booker T. Washington and J.S. Clark, because he is concerned about the facility and will get with the superintendent regarding specifics.

Mr. Rachal stated that the total package has five areas of recommendations that are not mutually exclusive from each other and all work together. He said he wants to hear what we are talking about in academics and how it fits in and how does it benefit us when it comes to the proposed changes in the facilities? He used Blanchard as an example and the successes it has seen, but there are many other successful programs in Caddo Parish, and he asked staff to explain some of the most successful programs in Caddo Parish? Mrs. Turner responded that she believes the K-8 instruction component is working well, the pre-school is building toward where it needs to go, and we need to continue working on literacy as it relates to a larger portion of the student population to ensure that we are moving forward in this area, i.e. islands of excellence in the area of foreign language, enrichment and career tech areas based on their programming and leadership. Mr. Rachal said he believes it would be good that these large generic bullets include details. He also asked if the Gateway Program is successful? Mrs. Turner again stated that islands of excellence is in place with the Gateway Programs and there are ways to enrich and increase the rigor of the current gifted programs to expand and build on them. Mr. Rachal referenced information from July 2010, and in his effort to put all the pieces together, he would like to know if the consolidation of schools will help reduce the drop out rate; and if so, how? Mrs. Turner said in talking about grade configurations, you are defining the structure of the environment; but where the rubber meets the road in terms of drop-out prevention and increased student achievement, this happens in the classroom one by one and teachers with students. Thus the configuration could be a K-8, a 6-12, a 7-12, but in talking about drop-out prevention and increasing student achievement, it has to happen in a teaching and learning environment. Mr. Rachal stated his agreement, but asked if the consolidation will help with the academic side to reduce the drop-out rate and increase the graduation rate. Dr. Dawkins explained that if all the schools were excellent schools, which is our goal, we have building capacity in our schools that
is not being utilized, some buildings being almost half empty; and moving programs is one thing, but having space is another and is something that must be addressed. He said it is believed it is beneficial to have the students for a long period of time, giving them a structure that follows them for a longer period than just elementary, or just middle. He said while there a numerous reasons for looking at these configurations relative to academics, there are capacity issues that cannot be overlooked and issues that should have been looked at years ago. Mr. Rachal said he is one that has said that, but in looking at the academics, he wants to know the benefits from K-8, 6-12, 7-12 configurations, and he would like to get this information prior to a meeting in order to review it and better be able to ask questions. Ms. Priest stated that she believes additional information on each of the bullets presented is something all the board members would like to receive prior to the next work session. She also reminded the board members that information on K-12 configurations was provided to them in the past.

Mrs. Turner continued to present information on Phases II and III of the plan as follows. In continuing to provide reading support in phases beyond Phase I, Mrs. Turner explained that we will look at the roles of the reading interventionists and reading specialists, as well as creating reading locations and support systems within each school for them to come in and work with the teachers. She said extended learning opportunities for teachers will be provided through job embedded support as well as on-line support in the areas of behavior and reading instruction. Mrs. Turner addressed reassigning school staff to address student behavior and how instructional specialists and psychologists will be used to address identified behaviors and problematic areas and provide staff support and strategies to reduce disruptions and distractions in the classroom, and maximize teaching and learning. She also shared how staff plans on expanding the middle school career and technical opportunities and technological enhancements in all classrooms by being in a position whereby students will have the capacity to use laptops anywhere within their building and that teachers will have smartboards and the technology support within their classrooms.

In Phase III, Mrs. Turner explained that in looking at redesigning alternative schools, staff is looking at some of the Best Practices relating to alternative schools so we can capitalize not only on the behavior modification, but also connect students with career technical options within the alternative school environment. She said we will continue to work with teachers and staff on behavior modifications and expanding the career technical education programs at the middle and high school level, aligning what’s happening in the middle school with what the career assessments are reflecting, and building on the 8th grade graduation plan so 8th graders know what their high school program will look like. She said staff will continue to concentrate on the recruitment of community resources and volunteer support based on the career expansion, technical vocational and the reading areas, as well as support from mental health expertise within the community to address behaviors.

Mrs. Crawley noted a letter at her station, which she hopes other board members also received, and that we may be on the wrong trail and possibly should be looking at the district’s deficit instead of Vision 2020. She also asked about reading support and if she understands we will hire more non-classroom teachers at the same time we are going to increase the pupil teacher ratio, and she believes this is saying we will need additional persons to help these children who will not behave or that have reading problems. Mrs. Crawley asked about the master teachers in place at one time in the district who pulled students from their classroom to provide help, and she does not believe this was effective. She thinks it would be better to support a classroom teacher with the fewest number of children financially possible. Mrs. Turner said we are not talking about hiring more non-classroom teachers at this time, but we are talking about the reallocation of those we have. Mrs. Crawley asked if she understands we will be increasing the class size? Dr. Dawkins responded that we are not adding any staff, because we believe we have ample people if they are refocused and redeployed to areas to assist in the classroom. Mrs. Crawley asked if she sees we are going to increase the pupil teacher ratio, and she believes this is saying we will need additional persons to help these children who will not behave or that have reading problems. Mrs. Crawley asked if a questionnaire has been sent to teachers for input on the elimination of programs, because what works for one teacher may not work for another teacher. She said she believes the teacher is the one in the classroom or not using something and should be the one to determine what will work in her classroom. Mrs. Turner explained that as staff looks at the assessments and results, they are looking at the existing programs in each particular school, and this is information staff will utilize to determine which programs in the schools are working. She also explained that staff has begun meeting with the
building principals on what is working and what is not working, and staff will definitely involve staff in this communication. Mrs. Crawley said she believes the bullet points could have been written by any person who can read and has read any education literature and never set foot into Caddo Parish. She said they are all Best Practices, but they don’t tell Caddo what it should do. Mrs. Turner stated her understanding and that staff can certainly provide more details.

Mrs. Bell stated that she is not on the board to attack anyone and asked staff to provide information on the end of course test that begins in the 9th grade and the phasing out of the Graduate Exit Exam. She asked if she understands that this year’s 9th graders will be the first to take end of course tests in Biology, Algebra and Geometry on-line? She stated that parents of 9th graders need to be prepared for this test in May. She also referenced this is something new at the state level that may help the district with graduation rates and asked that an explanation of this new process be included as a bullet.

Mr. Ramsey asked if the redesign of all the alternative schools and behavior modification training in Phase III can be done earlier in the plan to specifically address over-age students at each level (elementary, middle and high school)? He said he believes there have been too many interruptions in academics; and while he believes it has gotten better, he asked if some of the issues can be addressed sooner. Mr. Ramsey also referenced the benefits of the various configurations and he would like more points/discussions on K-5 versus K-6, 6-12 versus 7-12, 8-12, etc. With this being many of the questions from constituents, he believes we need a clear explanation of how and why we would place 6th graders in the high school setting.

Mrs. Crawford asked about the pilot foreign language exploration classes and if placing a foreign language in those schools not performing adequately (according to Paul Pastorek’s formula), will help or will it be a hindrance? She also asked if, since Caddo is such a large district, and some of Caddo’s schools may not be in AUS or AA status, they may be piloted in those schools. She also asked if we are doing this program school wide or specifically to those schools listed in the academic 2020? Dr. Dawkins explained that the plan presented is for all schools and the pilot for foreign language is for those in AU status needing more exposure in foreign language. The pilot would be in schools of different status. Mrs. Crawford referenced Dr. Dawkins’ comment that it helps students stay in school, and she believes if students do not have a problem staying in school, she believes having one less transition between middle and high school helps them stay in school through the 12th grade.

Mr. Hooks stated his agreement with Mr. Ramsey’s comment on the over-age students and the urgency in removing them from the regular campus. He doesn’t believe it to be safe to have 11-13 year old students on the same campus with elementary students. He also doesn’t believe it is safe to have 14-16 year olds on middle school campuses. Mr. Hooks said he believes a look needs to be made at a school for over-age students because they are hindering the other students from learning because of their behavior.

Operations

Mr. Lee explained that operations for Phase I (2011-12 school year) is looking at a deficit budget of $20 million. He shared with the board various options that might be available to help the district in finances as well as the curriculum area. The options are: reduce travel and supply expenditures at Central Office (25% cut initially), eliminate salary step increase for all employees, eliminate the base incentive for the target schools, increase the staffing formula by 2 students per classroom (approximately $6.5 million), reduce the usage of substitute personnel by looking at how we use subs throughout the district ($2 million), and eliminate $200 teacher supply allotment ($600,000). Mr. Lee explained that Mr. Woolfolk is also looking at areas to improve the transportation/fleet efficiency, looking at inefficiencies in support staff that could possibly save approximately $500,000. In Phase II, Mr. Lee said staff will continue to look at the budget and the projections for 2011-12, as well as the 2012-13 school year. The fund balance is also an area. Ineffective programs will be looked at closely for any that may be eliminated. He said staff will be looking at all its financial strengths (General Fund, IDEA, Title I, etc.) to see how well it can be put together to best serve the children in Caddo Parish. He said the security operations will be assessed as well as the purchasing department, consolidating duplicate processes, and possibly save $1+ million. Mr. Lee also reported that Phase III will include the annual review of the budget to ensure that we are financially fit; and if the board approves moving forward with the plan, it will be at this point that further discussions will take
place about a possible bond proposal to provide necessary funding. He also explained that staff will look at the central inventory system and how we track textbooks and the possibility of e-books, we could see a savings of approximately $1 million.

Mr. Hooks asked how much will it cost to implement Vision 2020? Mr. Lee responded that further in the presentation and discussions, Mr. White will be sharing not only the savings, but also the costs. Mr. Hooks asked how can the board vote on something without the figures? Mr. Lee said Mr. White will share the requested information. Mr. Hooks asked for clarification in the elimination of inefficiency in support staff and services. He said he checked and there is the Superintendent’s Executive Staff, two chief operations officers and he doesn’t believe we need but one, we have an area director, and additional directors and why is staff talking about cutting support staff when they are already at the bottom? He asked about the possible elimination of administrative staff at Central Office, elimination of positions at the top and not at the bottom. Mr. Woolfolk explained that they are saying eliminate inefficiencies in the process, not people. Mr. Hooks asked for an explanation of what eliminate means, and Mr. Woolfolk said it means eliminating processes, which could result in people being moved or doing different duties than they have in the past. He said it does not first assume that there are too many people, but that the process is broken and it needs to be fixed. Mr. Hooks said he has a high school diploma and a college degree, and he still has not heard what eliminate means and you cannot define a word with the word.

Dr. Dawkins said that staff is trying to explain that it is necessary to look at everything and nothing has been decided on. When a final decision is made, specifics will be given to the board, including the positions if at all.

Ms. Trammel asked staff to explain forgoing the salary step in 2011-12 and if this can be revisited, because she knows many staff did not get an increase or step this last school year and this is a way we can encourage the staff. She also asked staff to look at not eliminating the $200 supply money for the teachers. Relative to eliminating inefficiencies, Ms. Trammel said she worked in the office and knows many processes in place are a duplication. Mr. Woolfolk added that while people may be affected, staff is first looking at the duplication of processes and if we can do some things better and more efficiently.

Mr. Riall asked Mr. Lee about the projected fund balance deficit of $20 million and if he understands correctly that $11 million of that amount is related to retirement cost, in addition to increased health care costs. Mr. Lee responded that is correct. Mr. Lee asked about the $11 million and if this is something we must put in escrow or can it be dedicated on paper. Mr. Lee explained that as payroll is processed each month, that amount deducted from the employee’s check along with the district’s portion must be sent to the retirement system.

Mrs. Bell asked the superintendent and the president if the board does not pass this proposal, what will it do for this school system beginning in June-July? Dr. Dawkins explained that in looking at next year’s budget and planning for Vision 2020, the $20 million is something that has to be addressed and by state law, the district must have a balanced budget. To find savings of $20 million, Dr. Dawkins explained that the first phase of Vision 2020 provides some opportunities to find some of these savings. He said if this plan is not approved, the savings will have to come from somewhere; and with 85% of the budget being comprised of staff, staff is looking at ways to save that will not affect the classroom, i.e. attrition and cuts away from the classroom, to ensure that the district has a viable education program for years to come.

Ms. Priest stated that the district is already on the State Department of Education’s “watch list” fiscally because we have less than $5 million in our reserves. She added that to operate the district, it costs approximately $1 million a day and this means in the event of a catastrophic event, we will only be able to run the district 5 days. Ms. Priest also stated that with some of the school buildings underutilized, some only 45% occupied, it is still a cost to heat and cool the entire facility and implementing some of the proposals in Phase I would be a savings in utilities, maintenance, insurance, etc. She also said with 43,000 plus students in the district and approximately 396 bus routes with buses not full and the cost of diesel fuel, this is another area that can be assessed and inefficiencies eliminated. Dr. Dawkins added that the inefficiencies being referenced are the fact that we can move schools into other schools without making renovations because there is room for them. He also stated that you will eliminate programs, processes or you will eliminate people. Mrs. Bell stated that she understands and she wants
others to understand what we are facing. She asked if in reducing the use of substitute personnel, it is possible, with the new law in effect, to have a pool of retired, certified teachers and pay them substitute pay? She believes this would be a savings and at the same time have certified substitutes in the classroom. Mr. Lee stated that staff can look at this, but there are certain requirements when hiring a retired, certified employee relative to what they are paid. Mrs. Bell said she believes the new law will be grandfathered in and began June 30th. She also asked staff to revisit the $200 supply allotment for the teachers. Mrs. Bell also agreed with the inefficiencies in transportation by transporting students all across the parish for students outside their neighborhood school district and that we should look at guidelines in transportation for these students and the parents responsibility.

Miss Green asked staff in what fund will the approximate $1 million in savings be reflected in the consolidation of Newton Smith and Green Oaks? Mr. Lee said it would be a savings in the General Fund, helping to offset the $20 million deficit. Miss Green asked if additional wings will be built with these funds to help the schools that are consolidating? Dr. Dawkins responded there will not be any new wings built, and the only construction will be in the third phase if a bond proposal is passed. He said the consolidations in Phase I will help the district get out of the deficit it is in.

Mrs. Crawford stated that she doesn’t believe the numbers add up. Dr. Dawkins responded that it is because changes are continually being made. Mrs. Crawford asked that staff revisit the recommendations relative to pay step increases and the $200 allotment for teachers. She also said she believes some of the underutilized buses might be students going to DECA or Career Center and asked if it would be more economical to use a smaller bus or a van to transport these students? She also asked about the fleet of cars used by supervisors and would it be a savings in fuel, insurance and maintenance to do away with these vehicles? Mrs. Crawford asked if she understands correctly that if the board votes “yes” for this proposal in its final form, we will not be voting yes for the budget, but that is something that will come to the board at a separate time? Mr. Lee responded that is correct. Dr. Dawkins also added that is correct, but some of the numbers will impact the budget. Mrs. Crawford also asked if the $20 million includes the amount for the medical retirement that must be reflected in the budget? Mr. Lee said the $20 million does not include that, but only General Fund operations.

Mrs. Armstrong asked staff to look at cross training among staff members in an effort to eliminate inefficiencies. She said she believes every year there are approximately 300-400 employees that retire or resign, so is she correct that we will not lose any staff? Mr. Woolfolk responded that staff looked at the approximately 400 persons hired every year and are the ones that would be looked at maybe not filling or possibly using present employees, moving from within. Mrs. Armstrong asked about the cost of diesel fuel and when will the rebid for fuel be up for renewal. Mr. Woolfolk explained that it is annually in July. Mrs. Armstrong asked if it is a one-year contract or three-year? Mr. Woolfolk responded that it is a three-year contract with two annual renewals. She asked if the district is on the first renewal of the three-year contract? Mr. Woolfolk said that is correct. Mrs. Armstrong also asked staff to revisit staff salaries and be supportive of our staff; and if it is necessary to look at the elimination of the $200 supply allotment for teachers, that staff would, as a last resort, look at eliminating no more than $100.

Mr. Ramsey asked for clarification of forgoing step increases, because he understands the teachers will at least get the MFP component. Mr. Lee explained that staff is looking at this to see if it can be applied to all employees. Mr. Ramsey asked staff to look at the rule relative to what portion goes to teachers’ salaries. Mr. Lee said it does, but the district provides them salary schedules each year showing the annual step increases. Mr. Ramsey asked if individual departments have their own budgets and if those budgets have been reviewed? Mr. Lee responded that staff is currently looking at these budgets and they are looking at those items that can be consolidated? Mr. Ramsey asked about a target for savings in this area? Mr. Lee stated not for the overall, but only the target savings for M&S and travel, which for most is the biggest part of these budgets. Mr. Ramsey asked about the overall impact of Central Office M&S and travel on the budget and that he understands the amount to be very minimal? Mr. Lee said that is correct, but staff felt it important to look at reductions here as well. Mr. Ramsey asked can we really save $1.4 million by removing duplicate or redundant job processes and some examples? Mr. Woolfolk explained that eliminating duplicate or redundant services could include half-filled buses, repairmen working for child nutrition and repairmen working for maintenance, repairmen in transportation for security cameras on buses and repairmen in security for security cameras in
buildings, inventory control persons located in transportation, in maintenance, books, textbooks, four reproduction areas, etc. These along with eliminating redundant services, processes and inefficiencies, staff believes will generate the predicted savings. Mr. Ramsey also added that there are a lot of employees that will retire or resign and he believes that will be where the savings will come from; so in looking at budget reductions, he believes a lot will depend on the use of employee force we have. He asked that staff provide these type details as the board goes through this process.

Mr. Woolfolk indicated that one reason employee development is being recommended for the support staff so staff is prepared to be flexible and agile and able to do more than one job which will save a lot of employees from not having a job when they can be retrained inhouse and placed in another position and eliminate reductions.

Mrs. Crawley stated her agreement with the comments to keep in place the step increase and the teacher supply allotment, and asked about increasing the staffing formula at the middle and high school levels, and asked if we are talking about increasing Caddo’s staffing ratio or the state’s, because they are different. Mr. Lee responded that it is increasing Caddo’s. Mrs. Crawley asked if she will be able to go into a classroom and count them and there may possibly be 3 more students in the classroom, but not 4, 5 or 6. Regarding substitute personnel, Mrs. Crawley asked if this will require teachers to take their planning period and substitute in classes, because this is what teachers will see in this. Dr. Dawkins said that is not what this is about, but there are certified employees that work in Central Office that may be asked to sub from time to time. Mrs. Crawley asked if it is legal to take away the UPR days in the coming year, because many people use this as personal days to do whatever they want to do. She asked that the possibility of freezing use of these two days be looked into. Mrs. Crawley also asked if it is illegal to eliminate the school based incentives at the targeted schools because of the MOUs and agreements with the teachers to go to these schools for three years. Mr. Lee said staff is looking into this and discussions are being held with the RSD. In talking with personnel, he doesn’t believe an agreement was signed. Dr. Dawkins assured the board that we will definitely not do anything that is illegal and this is one of the ideas that came up and was placed on the table and staff is looking into it; and if it can’t be done, it will not be done. Mrs. Crawley stated she appreciates these meetings, but to say we will vote on this on the 24th is not, to her, urgent and she believes we should set this aside until the budget is addressed. Mr. Lee responded that is what will be done. Mrs. Crawley said she knows, but she believes they are being held hostage by doing this first; and she understands we did the very same thing last year with the compensation plan when the board was not given the budget until the compensation plan was approved. She said she thinks it is ugly to say we have to do this or the world will come to an end and even strangers are saying we should look at the budget first. She asked if teachers have been asked for input on what they believe could be eliminated to save dollars and not rush in doing this.

Mr. Hooks asked the superintendent if teachers will still be compensated under the Caddo Plan for 2011-12 school year? Dr. Dawkins said they will still be compensated, but staff is attempting to determine how much of it will happen. Mr. Hooks agreed with Mrs. Crawley and he doesn’t believe the board should vote on anything until they see some figures. He asked if he will get the figures on the cost to consolidate? Mr. Woolfolk stated he will bring that information Tuesday, but it will be $1.2 million to consolidate. Mr. Hooks asked if there will be figures before the board, because he believes it was a ramrod with the compensation study. Mr. Woolfolk stated that the board members will have the figures in front of them. Mr. Hooks stated that Mrs. Bell and Mrs. Armstrong referenced retirees, and there will not only be a lot of teachers retiring, but there will also be a lot of teachers moving to another parish. He asked if a job fair is planned for this school year? Dr. Robinson said the job fair for April was cancelled because staff is looking at reducing the numbers of new persons who will be invited to come into the district as we are taking care of those persons already employed by the district. She said applications will be processed and made available to principals, administrators, and others who will be filling vacancies. Mr. Hooks stated that he believes we will lose teachers to other parishes. Mr. Hooks asked if there is a shortage of bus drivers in transportation? Mr. Woolfolk responded there is a serious shortage of sub bus drivers, and staff recently completed recruiting and training last month. Mr. Jones announced that of the 40 applicants, we were only able to use 10-15. Mr. Hooks asked if there is a reason for this? Mr. Jones responded that this is not just a local problem, but a state and national problem, and we are not finding those who are interested in this type work. Mr. Hooks asked about the report of using 18-year old bus drivers, and Mr. Jones
indicated that this is the state law at this time. Ms. Priest said there is a proposal being floated before the Legislature in April, but at this time, it is uncertain if it will make it to the floor.

Mr. Rachal asked about the numbers presented for the total savings for Phase I of $22.9 million and if it includes the recommendations/options presented? He said he would like to know the effect of the Vision 2020 plan and how it impacts the budget. Mr. Woolfolk explained that it does include the savings in the area of operations as well as in the facilities portion that looks at everything in Phase I. Mr. Rachal said he know it will cost $1.2 million to make the renovations needed, but he would like to know how much it will save in the budget. He said he would like this separated with a clear understanding how it will help us. Mr. Lee referenced page 4 and the savings of $6.3 million in Phase I in the consolidation of schools. Mr. Lee also reminded everyone that the $1.2 million to save the $6.3 million and emphasized that the $6.3 million will be an annual savings in the General Fund. Mr. Rachal asked that staff explain how we will reduce $2 million in substitute personnel. Mr. Woolfolk responded that staff will be presenting to the board proposed changes in policies that will address some issues in attendance that creates the need for substitutes (all substitutes), and how can we improve by doing things different. Mr. Rachal referenced frequent comments about the school system being top heavy and asked if we are top heavy in buildings and facilities? Dr. Dawkins agreed that we do have too many buildings. Mr. Rachal stated that if we are too heavy in management, then he believes we need to look at facilities also.

VISITORS

Alfred Cole III, parent, addressed the board on the recommendation to close 81st Street ECE and the need to keep 81st Street open. He highlighted the outstanding programs and staff at 81st Street and that he believes moving them from this community will be detrimental. He encouraged the board to keep these schools open.

Sandy Hearron, parent, shared with the board that she and her family built their home in Blanchard in order to send their children to Blanchard Elementary. She now wonders with the proposed changes if they made a mistake. Mrs. Hearron said she finds it hard to believe that Donnie Bickham can be ready in August to receive over 500 elementary students. She said she has only seen four available rooms and the halls are already crowded and doesn’t understand wanting to create such a nightmare for teachers and principals. She said there are many unanswered questions, i.e. limited cafeteria space, lack of ample gym space, lack of restrooms for the 12 classrooms for kindergarten, recently purchased playground equipment at Blanchard and play areas for the children, parking, etc. She said the restlessness and risks are not good for this community and she added that this move is affecting her property value. She pleaded with the board to not make this change.

Brittany Gaskin, student at Blanchard Elementary, shared with the board why she does not want Blanchard closed. She encouraged the board to vote no and save Blanchard Elementary.

Leann Anglin referenced several years ago when she requested information and plans for changing/closing some of Caddo’s schools, she did not receive those plans nor any answers. She said when the Vision 2020 meetings were scheduled, she looked forward to seeing the specifics of the Vision 2020 plan and at the fall session she requested specifics and was told she would see them in January 2011 and she is still waiting to see the specifics of this plan. Regarding the reading programs and assessments, staff said they did not have the information at this time, we need more input. Another reference was made relative to ineffective instructional programs and the response was once the complete list is seen, and these remarks make her very sad and they bother her. She wonders if we will ever see a specific plan and if there is a specific plan, will it be placed on the web site for other to see, and will there be a plan that has concrete objectives, specific actions and activities, specific date of implementation and completion, specific persons responsible and specific budget on each item. Ms. Anglin reminded the board that a plan is hard to implement unless it is specific, realistic and complete, and a good plan needs good people who will follow up. She asked the board to consider not rushing something that is not complete.

Johnny Digilormo, mayor of Town of Blanchard, shared with the board on behalf of the Town of Blanchard, the growth Blanchard has seen since the last census and the future growth with the completion of I-49 north. He also announced that the Town of Blanchard has invested $15 million in a new water plant, as well as $2 million to expand the sewer for future growth.
Finally, Blanchard Elementary has been the heart and sole of Blanchard for many years and they believe it is imperative to keep this school open. He also stated that Blanchard Elementary is one of the main reasons people come to Blanchard and one of the main reasons why Blanchard has grown so in the last 10 years.

Paige Carlisle stated that relative to the budget and the possible $20 million deficit, she believes included in that amount is the $17 million being carried forward from this year’s budget and that maybe the possible deficit is $37 million. As a taxpayer, she said this is very troubling; and being on the state’s watch list, she is concerned that this is no where near getting out of the financial situation we are in. Ms. Carlisle asked what will we gain by being declared unitary and what actions will we gain that we cannot do now, how will it impact the school system. She also asked about the reconfigurations and the statistics that reflect there are 55 pre-K through Kindergarten schools, none of which are in AU status; 23 pre-K through 8th, none of which are in AU status; 22 6th through 12th grade schools, one of which is in AU status; and 39 7th through 12th grade schools, none of which are in AU status. She asked if staff can provide demographics on each of these schools, programs that are working and how they compare to Caddo Parish. With Louisiana being at the bottom of the list in the nation, she also asked if it is fair to say there are 39 other schools in Louisiana functioning in a certain configuration and is this what we want to base reconfiguring these schools on?

Laquisha Green, parent, shared with the board her concerns about changes being made in her child’s school and that her 13-year-old daughter may have to attend high school. She also believes if the classrooms are larger, it will be more difficult on the children.

Carrie Gaskin, PTA President at Blanchard, addressed the board on the potential closure of Blanchard Elementary. She shared the positive role Blanchard plays in the community and she highlighted the many positive aspects of the program and staff at Blanchard. She asked the board to not rush with this decision and she presented a list of over 3,000 signatures in support of keeping Blanchard open. Mrs. Gaskin said moving these students to another campus on this short notice is not satisfactory and asked that other options be considered for Blanchard.

Michael Williams addressed the board on the proposed Vision 2020 Plan and the recommended changes to Booker T. Washington, J. S. Clark and West Shreveport. While he does not have any children enrolled in Caddo schools, he is a product of neighborhood schools and is very proud of the education he received from these schools. He said if the cornerstones (schools) are removed from these communities, it will be devastating. In trying to breathe life into these decaying communities, taking away these schools will be taking away these communities. He asked the board to consider redrawing the lines and make every school a magnet school, make every school diverse, and relook at the M to M option. He encouraged the board to think this through and consequences that may occur by mixing 6th graders with 12th graders.

Tammy Phelps, former school board member, addressed the board on her concerns relative to the Vision 2020 Plan. She said she is sad when she observes what is going on and she doesn’t understand why it has taken over two years to get an assessment of how students are doing, but a rush decision is being made in four months in redeveloping the entire parish. She said there is talk about a plan that no one has specifics on and board members are placed in that position to serve by the people in the audience and the parish taxpayers and she does not understand why there is a rush to approve a plan for 2013 out. She stated her opposition to the plan and to a bond issue and asked why are we just now looking at the deficit? Ms. Phelps also questioned how much was spent that was not in the budget and why are we not asking VVJ for the $100,000 contribution to be returned, are we asking for a reduction in the administration’s salaries, and are we asking the superintendent to decline his non-performance bonuses? Ms. Phelps also referenced the program implemented at a new school configuration in Oil City two weeks before school started and the year prior, a time change was implemented two weeks before the start of school, and we are now looking at doing the same thing right before school starts. She said she hopes that the board has listened and will take into consideration everything that the community, the taxpayers, has said.

Daryl Robinson, Caddo Association of Educators, addressed the board on the many unknowns relative to the Vision 2020 plan. He said it is important that people know in concrete terms how the plan will affect the employees of the district, certified and classified. Mr. Robinson stated that in looking at the implementation of each academic phase of the plan, it is important to know
if the custodial worker, the cafeteria worker, the teacher’s aide, the clerical worker, other paraprofessionals, teachers, and administrators still have a job. He said that job security makes for harder workers and more dedicated employees. He asked the board not to balance the budget on the backs of those who work the hardest and work with the children. He reminded the board that all eyes are on the board.

Walter Autrey, parent, stated that he does not see any vision in the Vision 2020 plan, but he sees division, destruction, in an already failing society. Mr. Autrey said the board should not place 11, 12 and 13 year olds in a setting with senior high school students and expect something good to come from it. He shared with the board the positive experience his children have had in his neighborhood schools and that they are excelling in these schools, so he doesn’t understand at what expense the district is looking to revamp and reorganize. He said he doesn’t understand how we will build a better community when the district is constantly doing things that takes the mind off the education of the children. He shared his disagreement with moving children to schools with older students, and asked the board to take the time to look closely at this plan and vote no on implementation of the proposed plan.

Betty Gibbs, Hillsdale parent, shared with the board the economic and cultural impacts she believes will result with the implementation of this plan. She said she doesn’t believe this plan is transparent, and that pros and cons of the plan were not shared with the people. Ms. Gibbs also shared with the board her positive experience at Hillsdale, and how she believes putting the younger children with the older children will be putting them in unstable environments. She encouraged the board to consider the negative impact these proposed changes will have on the children.

Henry Wesley, parent, said he believes if this is done the correct way, it will be a good thing; but we need to ask the question how will doing this make someone want to attend and graduate from school. He said he believes the magnet schools destroyed the communities and took away community pride. Mr. Wesley shared with the board that he sent his child to Eden Gardens and to Middle Magnet, but she attended Booker T. Washington High School. He said there are young and older children at the community centers with no problems, and he also reminded the board that you will see a senior cheerleader mentoring and teaching 6th graders how to cheer. He said he believes the elementary schools should stay in the community, but when it comes to middle school, he believes it helps the students to have pride in their school by being there from the 6th through the 12th grade.

President Priest announced that the next work session on Vision 2020 will be at 4:00 p.m. on Tuesday, March 22nd and it will pick up with discussion on facilities, legal and policies.

The meeting adjourned at approximately 7:04 p.m.
March 22, 2011

The Caddo Parish School Board (CPSB) held a special work session in its office at 1961 Midway, Shreveport, Louisiana at 4:00 p.m. on Tuesday, March 22, 2011 with President Lillian Priest presiding and the following school board members present being a quorum: Steve Riall, Jasmine Green, Willie Burton, Charlotte Crawley, Curtis Hooks, Mary Trammel, Bonita Crawford, Barry Rachal, Larry Ramsey, Ginger Armstrong and Dottie Bell. Also present were Secretary Gerald D. Dawkins, and Reginald Abrams, legal counsel. Ms. Trammel led the prayer and Pledge of Allegiance.

President Priest announced that the meeting is being broadcast in Room 1 for overflow seating.

Vision 2020. Ms. Priest announced that during the last meeting staff covered academics and operations sections of the proposed Vision 2020 plan, and today the meeting will pick up with the areas of facilities, legal and policies.

Superintendent Dawkins stated that today’s discussion will begin with facilities and will include an overview of the benefits of the proposed 6-12 configurations at five high schools with the focus on what we are doing to address graduation rates and the overall academic performance of all our schools. He said the public has said to have the financial house in order before asking for more assistance now and in the future and staff will continue to work on this report and the report will reflect several recommended changes based on the board, staff, and community input. Dr. Dawkins explained that he has directed staff to (1) move the Blanchard-Donnie Bickham school consolidation to Phase III, (2) to move 81st Street ECE-Mooretown consolidation to Phase III, and (3) to off-line Hosston Alternative School to Phase I and these students will be reassigned as staff examines the alternative programs in the parish in Phase I. He said at the board’s request, he explained that the items strictly associated with Vision 2020 are included in the recommendations, and the items associated with next year’s budget will be discussed during the budget remarks. He added that he, along with staff, has been intimately involved in all aspects of this proposal and Vision 2020 is rooted in the academic and fiscal strengthening of the school district; and contrary to what others may think, this plan and its impact on the upcoming budget, as well as the Vision 2020 plan, is inescapable and inseparable. He announced that the impending fiscal crisis of the state and the district are real and must be dealt with, and he shared with the board and audience some of the realities surrounding districts are having to address. Dr. Dawkins also stated that the plans to upgrade, close, reconfigure, or shift boundaries of all or part of the district has been the district’s reality for the past 10 years. He said the current plan represents the feedback from many persons, citizens and students. Ample time for input has been provided over the past years, and those whose concerns are being expressed at the end of the process appear to want nothing to happen to address the real issues that the Caddo School District faces. Dr. Dawkins explained there are numerous ways to achieve the established objectives and over the past, options have been considered, i.e. close schools, propose different configurations, maintain all the schools while continuing to address the academic challenges and going broke at the same time. He assured the board and the community that we will still be right where we are today having similar conversations, because no one wants to see any school close; and we can leave all the schools where they are, but we will still need to address the budget issues. He added if Vision 2020 had never happened or been proposed, and we did not have the expense of the schools under the MOUs, then the discussion would still need to be held in order to address the budget issues. Dr. Dawkins explained that if we do what some suggest and do away with the Vision 2020 process, it would require an immediate reduction of 400 plus staff members to meet the budget deficit. He said the academic improvement will always begin and end with classroom teachers and building leaders. The building leaders and teachers are the essential elements of the district’s academic improvements in the district and the attempt to avoid lay offs is a major driver in utilizing consolidations and off lining underutilized buildings as a method of addressing the budget issue. Finally, Dr. Dawkins reported that he and staff have been in touch with Dr. Amy Westbrook of the Recovery School District, Superintendent for Northern Louisiana; Paul Vallas, State Superintendent for MOUs with AU schools, and we are compliant with the MOUs in this plan and a request has been submitted to be released from Bethune’s MOU, as well as any other release that we may achieve. The worse case scenario appears to be if we keep the current MOUs in place, and we will continue to work with them in that regard.
Antionette Turner, chief academic officer, began the discussion by sharing with the board and audience information and perspective on the various grade configurations and grade spans. She stated that the system has 13 years with students in grades K through 12 and there are 2,300 indicators, GLE standards K-12 and ELA, Math, Science and Social Studies, as well as the number of days a student spends in school from Kindergarten through 12th Grade, and 70 represents the number of teachers a student might encounter between Kindergarten and the 12th grade. In reflecting on these numbers, Mrs. Turner assured the board and audience that staff understands the commitment, the work, and motion that go into putting a school configuration together and taking grade spans and changes into account as it relates to instructional programs. Mrs. Turner stated that Caddo has a number of K-8 configurations and there are also a number of these throughout the state of Louisiana, and they have been very successful in terms of performance. She stated that educational benefits of K-8 configurations include parents are involved in these settings longer, there are less behavior problems, there is better attendance and less dropouts, there is a sense of community and family, test scores of 5th and 8th graders outperform their counterparts, etc. Mrs. Turner shared that it is known that students make more academic gains in K-8 settings and the 8th grade achievement was significantly higher than in a 5-8 configuration and the 6-8 configuration. She said other districts are embracing this configuration and the number of K-8 configurations is increasing in districts across the nation. Benefits of K-12 campuses include 6th and 7th graders in Louisiana performed higher academically than 6th and 7th graders in a middle school or junior high setting. She said there are fewer transitions which means less stress for the students, resulting in fewer dropouts and an increase in the graduation rate. Mrs. Turner also explained that students in 6-12 configurations performed as well or better than those in a 9-12 setting, and K-12 students have also scored higher in other measures, i.e. attendance, lower suspensions, lower expulsions, and a lower drop out rate in a K-12 setting. Relative to 6-12 configurations, Mrs. Turner explained that it makes for easier transition, it helps students to build long-term relationships, it gives continuity to curriculum, and it keeps children on the right path and guides them to graduation, based on the kind of programming in those settings.

Mrs. Turner also reinforced the planning involved in implementing the 6-12 configurations, i.e. science and mathematics, and that students who take advanced courses in these areas will have an advantage for entering into career and technical courses as well as individualized graduation plans and beyond. She added that it is known that students who do not take advantage of these courses put themselves at a disadvantage in terms of their prerequisites, i.e. foreign language, advanced placements, etc. Mrs. Turner shared that staff believes the 6-12 configuration at the five high schools will stabilize the learning environment, it will provide additional time for intervention and academic support at every level, it will reduce the number of transfers between schools, and improve the neighborhood enrollment by offering a more comprehensive instructional program, as well as additional staff and resources.

Roy Murry, director of security, shared with the board the preparations for the 6-12 configurations in these schools. He reported that he has met with capital projects and needed wiring is already in place at four of the five schools, and work will begin immediately on wiring in the fifth school. With the many concerns expressed about bullying, etc. if the sixth through eighth graders are placed at the high school, Mr. Murry stated that the majority of the students come to school everyday and do exactly what they are supposed to do. He also stated that there was a recent story in the media about the administrator at one of these schools regarding how much safer the school is since this administrator has been at that school. Mr. Murry added that this is what he hopes everyone will understand and that is the first line of security is the teachers, principals, administrators that work on these campuses doing what they are suppose to do. He explained that in these configurations there will be separate drop off and pick up places, middle schools will have a 6th grade academy that will keep the 6th graders together, and the 7th and 8th graders will be in a separate location. The high school students will be placed on separate floors and wings in different parts of the building. Starting and ending times, breakfast and lunch times, and also transportation will be different, in addition to a different bell schedule, so when middle school students are changing classes, the high school students will be in class. Mr. Murry shared there are two things you do to keep schools safe – control access to the campus and supervise students. He said to help schools do this, staff will put an IP based camera system on all these campuses and site surveys have begun. These schools will also have their campus assessments conducted first in conjunction with implementing the REMS Grant. He also said that access will be controlled by installing card activated magnetic locking systems and cards will be used in conjunction with the student identification card and staff can designate on these
cards what students can open what doors. Mr. Murry announced that all these things will be in place before the next school year begins. Bus transportation issues have been discussed with the transportation department to work out separate starting and ending times.

Steve White began the discussion on facilities by sharing with the board and audience Phases I, II and III of the proposed plan. He reported that one of the main things will be to maximize facility utilization and reduce excess capacity; and recommendations for accomplishing this include combining a portion of the student population at Forest Hill, Summer Grove and Southern Hills to create a preK-8 campus at Ridgewood; off lining Newton Smith and combining it with Green Oaks to create a 6-12 campus at Green Oaks; off lining J.S. Clark for one year and combing it Booker T. Washington to create a 6-12 campus; off lining Bethune, with students from the northern portion of Bethune and M.J. Moore attending a 6-12 configuration at Fair Park and the students from the southern portion of Bethune and M.J. Moore attending a 6-12 configuration at Woodlawn; and off lining Hillsdale to combine with a preK-12 configuration, a single campus concept at Huntington and Turner, with 6-12 grades at Huntington and the preK-5 at Turner. Mr. White explained that additional recommendations include off lining Hosston Alternative School with the possibility of combining with North Caddo (exact location unknown at this time) for a projected total savings in Phase I of approximately $5.1 million which is a recurring savings each year and a one-time expense of approximately $625,000 to make the modifications. He added that also in Phase I staff would look at the liquidation of vacant schools, abandoned sites and vacant properties, and capital project funds will be used to promote health and safety issues throughout the district, insuring that energy efficiencies are paramount through all district facilities. QZAB funds are recommended to use for upgrading data systems, security systems, and facilities. Attendance zones would need to be analyzed for area alignment over the course of the Vision 2020 Plan through the entire district. He also explained that the use of capital project funds will continue to be used to promote health and safety issues in the district and ensure that all facilities are energy efficient. QZAB funds will also be used in Phase II for data security and facility improvements and continue to update attendance zones as changes are made throughout the district. Mr. White reported that the recommended changes in Phase II will reflect a total savings of $1,720,000 annually, and a one-time cost of approximately $700,000 to make these changes possible.

In Phase III, Mr. White explained that these recommendations are dependent upon approval of a bond issue for renovating all remaining campuses in Caddo Parish. Staff will also revisit off lining Blanchard Elementary and combining it with Donnie Bickham dependent on growth and viability in the northern part of the parish, as well as off lining 81st Street and combining it with Moorretown to create a preK-Kindergarten campus. He said Phase III would also include the possibility of off lining Vivian, North Caddo and Oil City to construct a new K-12 campus on the existing Herndon campus; constructing a new preK-8 configuration in southeast Shreveport to address overcrowding issues; off lining Mooringsport and Timmons and constructing a new preK-8 in west Shreveport; and off lining Creswell and creating a new preK-5 configuration on the existing Barret Elementary campus. If all these recommendations are addressed in Phase III, the potential savings could be $7 million, which is recurring, and a one-time expenditure of $575,000. Mr. White reiterated that all the costs in Phases I and II would be funded through the use of capital projects funds with no affect on the General Fund budget; and items in Phase III would be funded by a bond issue or other sources.

Mr. Burton asked staff about the 6-12 configuration at Booker T. Washington. Mr. White explained that staff has looked at a component to officially utilize the BTW structure and because the attendance zone for J. S. Clark does not exactly match the attendance zone for BTW and it is felt that it is best for the children to have continuity so a modification of the attendance
zone would be necessary. He also explained that to do this, staff looked at lowering the attendance zone for BTW which will encroach upon the northern boundary of Fair Park’s attendance zone, picking up approximately 46 Fair Park students to attend BTW. He said he believes there are approximately 476 students matching the J.S. Clark attendance zone with the BTW attendance zone, so when these students arrive at BTW they will remain for the full seven years and provide continuity. Mr. Burton asked if there is enough space? Mr. White said staff has looked at the numbers, and based on 25 students per classroom, 40 classrooms are needed in addition to the labs, band rooms, and there are currently 57 classrooms at BTW. Mr. White also reported that these numbers will also bring the total enrollment at BTW to 946 and there is a capacity of 1,073 students, which will put BTW at an 88-89% utilization.

Mr. Hooks stated that he is confused because there were questions from the meeting last Thursday and he has not heard answers to those questions. He asked Mr. White what the cost will be to combine all these schools? Mr. White again explained that the estimated cost is $675,000 for Phase I. Mr. Hooks said he wants an itemized statement of the expenditures to implement these changes. Mr. White explained that at this time absolute numbers are not known, since these projects have not been bid; however, staff believes the expenditure amounts presented are good ballpark amounts. Mr. Hooks said we are dealing with taxpayers’ money and if we are in the red $20 million, he believes we need to know where the money is going. Dr. Dawkins responded that the information provided is generally what is presented, but staff will get the requested information. Mr. Hooks asked when will he receive it and the superintendent said he will get it tomorrow. Mr. Hooks asked staff why was A.C. Steere and Arthur Circle not bothered? Ms. Priest reminded everyone that the discussion is strictly about Vision 2020, and Mr. Hooks said he is talking about the facilities. Mr. Hooks stated enrollment numbers for A. C. Steere and Arthur Circle and asked why is staff recommending tearing up Central and West Shreveport? He stated that he invested 46 years in the Caddo system and is a product of the Caddo School System, and his point is when talking about numbers, why are these other schools not being touched? Mr. Hooks said we can’t blame anything on Dr. Dawkins, because the voters voted the board members in to make sure their money is taken care of; and he wants to know how he can justify a $20 million deficit and a $65 million spin off, because he has been asked this question and he was unable to answer it. He said if we destroy these schools, we will destroy these communities; because in the South, the two things that make a community are the church and the school. Dr. Dawkins explained that staff has been working on this for a couple of years and the schools being taken off line are underutilized schools. Mr. Hooks said he has gone to these schools and they are utilized. Dr. Dawkins explained he has also been to these schools.

President Priest called for a recess at approximately 4:58 p.m. and the board reconvened the work session at approximately 5:22 p.m.

Mr. Hooks said he has a charge to keep and this is about business and is why he is on the board. He said he is concerned about the safety of students when mixing 6th graders with 12th graders, and asked the superintendent to consider not putting the 6th graders on the high school campus. He said bullying is real even though some principals don’t want to admit it; and in doing his job as a board member, he asked that we think about the safety of these 6th grade students. Mr. Hooks also asked about the names of the facilities being moved into another facility? At this point, Dr. Dawkins stated that the names will remain the same, because staff has been focused on the logistics of the move. Mr. Hooks stated that is a big issue, and Dr. Dawkins stated that there are no plans to change the names of Fair Park or Booker T. Washington.

Mrs. Crawley referenced Dr. Dawkins’ comments and that in the first Vision 2020 plan options were presented for balancing the budget; and asked if the board votes on Thursday for Phases I, II and III, is that not part of Vision 2020? Dr. Dawkins said that is correct, but only the bullet items presented. Mrs. Crawley asked about the recommendations of reducing Central Office, forgoing salary step increases, and the superintendent explained that these will be in the 2011-12 budget for consideration. Mrs. Crawley asked if she understands correct that the items Mr. White explained have a cost attached to it will be included? Dr. Dawkins responded that is correct, and only those things associated with the moves and renovations will be on the table Thursday. Mrs. Crawley thanked staff for the information on Phase I she requested; and while she understands the spirit of compromise and moving Blanchard and 81st Street to Phase III, she still cannot vote for these in Phase III. Mrs. Crawley asked about the 6-12 configurations and how many principals will they have? Dr. Dawkins said the configuration is not finalized; however, staff will have the necessary amount of administrators to handle the schools, with most
of them being a school within a school so the leaders will be the same. He said this is also an opportunity to reassign staff to other areas of the organization to give extra support. Mrs. Crawley also asked about taking Hosston Alternative off line; and while she understands we don’t want to tell students they are bad, but there are some people who choose not to stay in regular bounds and she wants to know what we will do with these children? Dr. Dawkins responded that another place will be created for these students. He said we will use this time to look at restructure what is being done in our alternative schools; and even though it will be an alternative setting, it may look different than what we are presently doing. Mrs. Crawley asked that they not be placed in the regular classroom, and the superintendent said that is correct.

Miss Green asked about the total savings with the combining of the schools. Mr. White responded that the savings is reduced in Phase I since Blanchard has been moved to Phase III, as well as 81st Street, increasing the savings in Phase III. Miss Green asked why did Blanchard and 81st Street move to Phase III? Mr. White explained that because it has been stressed that growth in the northern part of the parish as a result of I-49 North may increase drastically, and staff wants to make sure that off lining schools, that overcrowding or overutilization situations are created and take time to look at the housing of students. He also said staff wants the opportunity to revisit 81st Street and Mooretown and determine if both of these are viable solutions or is consolidation the answer. Miss Green asked if there will be any additional changes between today and Thursday? Dr. Dawkins explained that staff continues to receive feedback, and staff will be meeting with board members for any final revisions.

Mrs. Bell asked about the 7th grade and what will it take to keep the 6th graders in the K-5 configuration? She asked that staff look at keeping the 6th graders in the elementary school and make 7-12 configurations. Dr. Dawkins said staff has looked at all these configurations and one of the issues is the capacity at the sending schools, i.e. Northside and Pine Grove. Mrs. Bell reminded everyone that Pine Grove and Northside students are being combined. Dr. Dawkins stated that at this time the K-5 is 107% utilized and there are t buildings there as well. Also, in asking that the 6th graders remain at the elementary buildings, Dr. Dawkins said there is a cost of doing this as well. Mrs. Bell asked if it is possible that 6th graders could wear a different color uniform if implementing 6-12 configurations. She added that she likes the plan, but if possible she would like to see the 6th graders staying at the elementary level rather than going to the high schools. Mrs. Bell also asked about the enrollment at Hosston. Dr. Dawkins said 59 students.

Mr. Riall asked about the proposed new campus on the Herndon campus and what will happen to the Herndon Magnet program, which is the only magnet program in northern Caddo? Dr. Dawkins explained that staff has it figured in the complex. Mr. White said staff has figured that the Herndon campus will stay in the overall capacity of the school which is proposed to be a K-12 campus. Mr. Riall asked if, in building a new campus, the recommendation is to totally tear down the structures and build everything new? Dr. Dawkins said there are 80 acres where Herndon sits, and decisions will be made as to the best use of the land. Mr. Riall asked what will determine the building sequence of the proposed new facilities in Phase III? Dr. Dawkins stated that we will have to prioritize what is most important since you can’t do them all at one time. Mr White said consideration would be given to what the board believes to be most appropriate, with his concern being not to overload the construction market. He said as experienced in the past when bidding 16-18 air conditioning projects at a time, there may be 12-14 bidding on them, and in the end of the process there may only be 1-2 bidders, which limits the district from getting the most bang for the buck. He stated that having the latitude to look at this and the market as well as the massive renovations that would be taking place also. He also explained that any prioritization would have to come back to the board. Mr. Riall stated that the original Vision 2020 plan reflected a total cost of approximately $700 million; however, it looks like the total now is in the ballpark of approximately $600 million. Mr. White responded that it is in the $600 million ballpark; however, staff is trying to address some things with other funds, i.e. capital projects funds, QSCB funds, etc. and hopefully it will be significantly less than what was originally brought to the board. Mr. Riall asked if the schools slated for closure in Phase III will be prohibited from any needed improvements? Dr. Dawkins said that is not correct and reminded the board about a recent board decision to put an elevator in a school, because as long as students are in a school, they will receive full services, full support from all the necessary resources. Mr. Riall asked if, when we begin to seek approval of a bond issue, it will be done in increments, i.e. $200 million at a time, and prioritize what that amount will be used for, and will that bond be paid off before another one is done? Dr. Dawkins said it is likely that is the way it
Mr. Ramsey asked the superintendent to elaborate on what the district must do to get BESE to change these schools under MOUs? Dr. Dawkins said he has been in contact with the Recovery School District, Dr. Westbrook, and she has shared it with the State Superintendent and the Superintendent of the RSD. She understands the plan and a summary of the plan has been sent to Baton Rouge. At this time, the only issue is moving programs and we hope because we are closing Bethune, we can get out of this MOU since the school no longer exists. Relative to the others, it is hoped the district receives some relief since we are reconfiguring. However, if we do not, Dr. Dawkins said we will still have what we currently have and there will not be any additional ones passed on to the district. Also, at this point, we are not certain if it must go to BESE and are waiting to hear back from the state department.

Mr. Ramsey asked if reality is that we have to approve a plan before we can send it to them to get approval? Dr. Dawkins said that is correct, and reality is they could come in and take several schools as well. Mr. Ramsey stated he believes all the board members are concerned about safety issues for the 6-12 configuration. While he appreciates the work staff has done on this item, he asked if staff could address these concerns? At this time, Mr. Ramsey said he is having trouble getting his arms around the 6-12 configuration, and he asked why do we not have a plan in place to close some high schools and set this aside? Dr. Dawkins responded that the original plan had a recommendation to close a high school and staff has looked at many other options and could bring to the board from the archives the closing of several high schools as well as other schools. He said in receiving the input, he said it is believed that the proposed plan will address the needs short and long-term and also provide a foundation from which to build on in the future. He said staff is ready to do what needs to be done; and if we move forward, and conditions continue to go the way they are currently going, a decision will have to be made relative to what to do with 11 high schools. He said what is presented is a start of long-range planning that has not been seen here and there will be a need to revisit this annually and make needed changes.

Mr. Ramsey asked the superintendent to elaborate more on the “school within a school” concept. Dr. Dawkins shared with the board that Caddo has a New Technology high school at Booker T. Washington with 300 plus students and a Microsociety Program at J. S. Clark with 400 plus students. He said these programs are unique and distinct, both showing academic gains, and we hope we will now see the type gains the programs are designed for. He said both programs will remain intact and the leadership will be organized to ensure that they retain their integrity and we implement with the fidelity it takes to get the results needed. Explaining that there are many high school models around the country, and there are four or five distinctive and separate type schools. Mr. Ramsey asked the superintendent to look at addressing alternative schools sooner rather than later. Dr. Dawkins noted some of the changes made last year that resulted in some good tracking in the areas needing addressed; and he reminded the board that alternative schools should not be a growth area, but we must determine how to address their issues where they are. He said the models that we have need to be further enhanced by adding programs that have shown results in other places. Mr. Ramsey said he doesn’t necessarily expect to form a school to get them out of the regular school setting, but to add some academics, skill training, etc. that will help them be successful. Dr. Dawkins explained that part of the program would be to give these students more job-embedded skills, linking them with businesses that will give them that training. The superintendent added that we have to address all these issues in the schools because we are now being challenged by Virtual Schools that have the ability to enroll students who do not have to attend our schools; and unless we are committed to making all Caddo schools excellent schools, we have the challenges of those we are competing with. Mr. Ramsey asked about Phase III and the line item addressing Oak Park being converted to a K-8, and can a grade be added next year to give them an opportunity to begin making this transition. The superintendent explained that he has met with the principal and discussed if it is possible for this to happen earlier, because there are space issues at this site. He said if it can happen next year, steps will be provided to make it happen, because he has seen some successful K-8 Microsociety schools. Mr. Ramsey indicated he believes this is an opportunity to keep 6th graders out of high school. Mr. Ramsey also asked about the proposal for 81st Street and if the program on the table actually expanded this program and if sending the program to Mooretown adds another grade to it? Dr. Dawkins responded that it did not, but it kept the program

Mrs. Armstrong asked about the MOUs and will a base line be established if a new configuration is formed; and if so, will they have three years for new base lines? She stated her excitement
about the proposed mergers and asked about J. S. Clark 6th graders being included? She said she would like to retrofit J. S. Clark to accommodate Kindergarten through 6th grade, because the upcoming 7th graders would go into the BTW system.

Mrs. Armstrong also expressed her concern that the attendance boundaries for a proposed K-8 at Ridgewood Middle School be nailed down as soon as possible. Mr. White shared that it is his understanding that the boundaries will have to be brought to the board for consideration. Dr. Dawkins said staff wants to make sure the board is clear in understanding where this fits in and the staff, by board policy, must bring it back to the board for consideration.

Ms. Trammel stated that she visited the possibility of placing the 6th graders at Woodlawn, as well as the population at the Caddo Middle Career and Technology Center. She said there are currently 428 students at the CMCT and at current the capacity is 759 and the enrollment goal is 85% or 645 students. Ms. Trammel asked where will staff draw the students. Steve White said this has not been considered at this time. Ms. Trammel asked if we could consider the 6th grade students to go to the CMCTC. Dr. Dawkins responded that staff will look at this possibility. Ms. Trammel asked about discussion on the over age students being in the elementary and middle school and with the younger students being in the high schools, they will be mixed with all age students. She said she doesn’t understand how staff will be able to totally segregate the students. Dr. Dawkins said staff will be arranging some time for board members to visit some of the configured schools throughout the state.

Mr. Rachal asked for clarification that implementation would reflect an annual savings of approximately $13.82 million. Mr. White confirmed that is correct. Mr. Rachal also asked if he understands correctly that the plan we use must go to the state for their blessing? He also asked if in the event the district approves and the state does not, is there be a backup in place? Dr. Dawkins stated that he anticipates the state providing some direction on their requirements; and if it does not meet their plan, the district will have something Mr. Rachal stated that if the board is unable to implement the changes that have a direct impact on the children, he wants everyone to understand that it is the state holding the district hostage again, and he hopes this does not happen. He also stated that this should have happened six years ago when the district had the $88 million bond. Dr. Dawkins explained for clarification that if the state requires the district to go back to square one and with the impending school year and the need to make decisions, he said it will be necessary to consider reduction in staff to meet some of these things rather quickly; however, staff will make certain that the state helps the district through this process. Mr. Rachal reiterated what the superintendent said in that if the board does not do something, it means possibly getting rid of staff. Mr. Rachal also stated he is glad to see the change for 81st Street delayed to Phase III. In Phase II it is being recommended to redistribute the Building 6 staff to schools to save $120,000, and putting the building up for sale. Mr. Rachal asked why this can’t be done in Phase I? Dr. Dawkins said that staff plans on beginning this process in Phase I, because there are a number of employees in that building. Mr. Rachal asked how many people work in Building 6? Dr. Dawkins responded there are approximately 300-400. Mr. Rachal said he would like to see this happen expeditiously. Mr. Rachal also stated that regarding Herndon Magnet School, he knows this school has served a great number of people; and he understands that without the bond issue this is almost mute, and Phase III will need to be totally renovated anyway. He also stated that his desire would be that the magnet program remain and he doesn’t know how it fits into the overall plans. Dr. Dawkins said this school is strategically located and he concurs that it would make full service, comprehensive offerings for persons. He believes his is a discussion the board needs to have.

Mr. Rachal asked for clarification and that Phase III is contingent on the bulk of it being accomplished through bonds, which means that whatever is approved on Thursday in Phase III, the bulk of it will have to go back to the board to be voted on before the bonds can be presented to the public for approval. He also stated that in Phase III if we do not get the bond, will we still have discussions or will we be held to anything because of the Consent Decree? Mr. Abrams said there is not. Mr. Rachal also asked if what the board is being asked to vote on is just a plan or is it a vote to implement these items? He said in Phase I, he can see that this is meant to be immediate implementation? He also asked if staff is asking the board to vote on only what we are addressing in Phase II? Dr. Dawkins said that he will be crafting his recommendation to the board on Wednesday and assured the board that the recommendation will implement all three phases. Each are interdependent and he will make this recommendation to the board. He said this represents the district moving forward in some immediate and long-term planning. Dr.
Dawkins said he has not found this method since he has been in Caddo... Mr. Rachal also asked if the board will be voting on a plan that is somewhat a moving target, because in Phase II, it is recommended that J. S. Clark, West Shreveport and Central Elementary that in the 2013 school year the board may have to look at this again. Dr. Dawkins said the plan is a three-year strategic plan for three years and staff will meet with the board bi-annually to update the board on where the district is. He reminded the board that this becomes the district’s most important work because there are staff rehired on a continual basis? For him, Dr. Dawkins said this is a three year package and many of the items will happen in year one, and also, it could be that some things come off the table in Phase II, but at least there is a structure to plan the work of the district for the future beyond one year. Mr. Rachal stated his agreement with long-range plans is that one year in planning will not be successful and it makes it easier to make decisions along the way. Mr. Rachal also stated that because the district has assets including (building facilities and land), and he knows that this will need to come back to the board for approval.

Ms. Priest thanked Mr. Ramsey for bringing up Oak Park and he asked about the recommendation in Phase I to off line Hillsdale and move them to a single campus at Huntington. She asked about the possibility of moving the Hillsdale students that reside on Monkhouse East and in the Pines Road area. She said she understands we are looking at Attendance Zones, i.e. in Phase I. She also asked if staff can look at the plan and if an earlier phase might be considered.

Regarding the attendance zones, and in talking about off-lining Hillsdale, has staff looked at the attendance zone for the Monkhouse East location, and possibly moving into the Turner complex, moving some of the elementary students to the Turner complex and some to the Midway complex because of proximity. Steve White stated that he has looked at this and currently Midway is 85% utilized and if we move a large component of the Hillsdale population, we could quickly over utilize mid way.

Ms. Priest asked if the board decides to go for a bond issue in 2013-14, and the bond issue passes, when is the projected time, based on construction experience, before some construction will be seen. Mr. White responded approximately one year, with approximately 6-8 months for design and major renovation projects, and beginning as soon as the students are out of school.

Mrs. Crawford asked for clarification on Mrs. Crawley’s question when the board votes on Thursday, everything under operations in the first document received on the 17th, will not be voted on, and Dr. Dawkins responded that is correct. Mrs. Crawford asked the superintendent to clarify that the board will receive a clean copy of the recommendations on Wednesday for the board’s consideration on Thursday? Dr. Dawkins said that is correct. Regarding the MOUs, Mrs. Crawford asked if the board decides to combine these proposed schools, will we then be under one MOU, or will we continue to be under separate MOUs? Dr. Dawkins responded that these question are ones that staff has asked the state department, and they understand that we are under some type MOU. Mrs. Crawford shared her agreement with how Mr. Murry explained the security would be handled at the 6-12 at BTW. She also referenced J. S. Clark’s Microsociety Program and the great potential she saw in this program, and that is home-growing entrepreneurs for the small businessman, and she sees this happening at BTW. She also asked if the recommendation will be worded specifically so the public know that in a certain year we will be asking for approval of a bond issue? She stated she believes at this time, and because it is important that the public knows they can trust us again by showing the public in Phases I and II what can be done, and then it will change the perception and the outcome when we need to go to the voters for a bond issue. Mrs. Crawford asked the superintendent if it could be worded so that it doesn’t reflect that the board will definitely be asking for a bond proposal in three years, because that is what the public is concerned about at this time.

Mr. Hooks asked the superintendent how we will save money by closing schools? Dr. Dawkins responded that we do have insurance on buildings, and the savings comes by removing duplicate services, utilities, etc., because when you consolidate buildings, you don’t need the same number of people to do the same thing somewhere else. Many times these employees are handled through attrition, you don’t have to pay for upkeep, etc. Mr. Hooks said he believes J. S. Clark has three floors and he is concerned about the younger ones going up and down the stairs. Dr. Dawkins stated that staff knows that the younger students must be on the ground floor because of the law. Mr. Hooks stated his understanding that children should be watched at all times, but it is always possible for one to slip away and get hurt. He is a child advocate and he believes he is
only watching out for their safety. Mr. Hooks asked if we move these children and the Vision 2020 passes, but the bond proposal fails, what will we do with these children? Dr. Dawkins said if we get to Phase III and if a bond issue does not pass, we will not have the ability to upgrade all the schools, but we will continue to provide a quality education to the students in Caddo. Mr. Hooks asked that staff also provide the cost of moving the Microsociety program and technology program to Booker T. Washington? Mr. White explained that the backbone infrastructure for the technology component exists at BTW, so every class is set up to house 35 computers, simply moving the components from J. S. Clark to BTW should be a perfect fit. Mr. Hooks said he does not want to waste the taxpayers’ dollars. Dr. Dawkins reminded Mr. Hooks that in the wireless environment we can get away from some of the things that would have to be done in the past.

Mr. Hooks referenced his tour of the program and he would hate to disband it. Dr. Dawkins said it will not happen. Mr. Hooks said he believes there is a need for a building for the Attendance Department because of the number of people this department serves.

Mr. Ramsey asked the superintendent about the information on Ridgewood and that this year Ridgewood began the year with 60 more 6th graders than previous years. He reported that this year Ridgewood will be sending out 300 invitations. He reminded the superintendent that Southern Hills is not losing population, so he would like the superintendent to look at projected enrollment numbers before beginning to build restrooms for K-2. Mr. Ramsey stated that he would like to also see if we can hold on to the high school population, it will be just as easy to transition the 6th or 7th grade back to the k-8 configuration. Mr. Ramsey said he hopes when we do get the district boundaries straightened out, there will be an opportunity to build pride back into the neighborhoods. He stated his appreciation for the information provided.

Mrs. Crawley apologized for showing the old Vision 2020 plan and asked about page 2 of the Vision 2020 plan and what part will not appear for the meeting on Thursday? Dr. Dawkins responded that all of the ones listed below are not included in the Vision 2020 plan, but will be a part of the budget discussions. Mrs. Crawley also asked about page 7 and that she would like the superintendent to leave this page out for the board’s consideration of recommendations on Thursday. Dr. Dawkins explained that even if the board decides not to do this plan, it will be important to begin reviewing policies on Thursday as well. Mrs. Crawley reminded the board members that it is the board’s responsibility to set policies, and where there are conflicts, she encouraged the superintendent to bring those proposed changes to her. Regarding the Worley Observatory, it is being recommended to lease, sale or rent and what does this mean? Dr. Dawkins explained that a vote in favor would be to give the Superintendent authority to lease the building. Mrs. Riall stated that the board’s attorney reminded him that this item is not under operations. Mrs. Crawley also addressed moving Blanchard and 81st Street in Phase III, and she stated she is not in favor of moving them to Phase III, because of morale and revisit next year.

Mrs. Bell stated the capacity of Turner is 1,149 students with a break out as of February 1st of 6th graders – 177; 7th graders – 163; 8th graders – 164. Regarding Huntington High School, Mr. White reported that Huntington had 923 students. Mrs. Bell asked the superintendent to look at Huntington’s autistic classes and Mr. White reported that they had met with the principal at Huntington about keeping the autistic rooms close to their grade area. Mrs. Bell asked about Phase III and the possibility of taking Timmons off line, and in looking at Walnut Hill, Walnut Hill has many upgrades they need because they begin eating lunch at 10:00 a.m. She asked the superintendent and staff to continue to monitor the growth west and north of town. Mrs. Bell asked the superintendent to further explain the single campus of K-5 and the 6-12 proposal at Huntington. Dr. Dawkins explained that DeSoto Parish currently has a single campus, and the superintendent encouraged board members to visit this single campus to see how it is working by providing continuity for the students. Mr. Bell also stated that she wants her community to come back and she wants them to be offered everything they are currently not being offered, and she wants the parents to know everything that will be available for their children.

Mr. Riall asked about Phase III and the six construction projects, and asked staff to explain if renovations will be prioritized before new construction. Mr. White explained that some of the new construction can eliminate pressure in some of the schools by opening up sites to move students from overcrowded situation into, because at the present time there are overcrowded facilities and no place to move those students while the renovation is being done. Mr. Riall also inquired about the wording in Phase III and will the board have to again vote on to call a bond issue, and the superintendent responded that is correct. Mr. Riall asked what will happen if it is not approved? Dr. Dawkins explained that after Phase II, it will mean that we will not have the
opportunity to renovate all of Caddo schools and build the new facilities to ease the pressure of
over utilization. Mr. Riall asked if this means we will have to go back to the drawing board?
The superintendent responded that it means they will stay exactly as they are.

Mr. Hooks asked the superintendent if he would consider to pull Blanchard and 81st Street
completely out of the plan instead of moving them to Phase III? Dr. Dawkins responded that
they are in Phase III, and staff will bring an annual assessment to the board and if the population
is growing, there could be a different issue to address, and he believes it is important to keep
them in.

Mrs. Armstrong asked if we are looking to Phase III in the renovations to include multi-purpose
units for those schools that do not have them? Mr. White responded that at this time, the capital
projects plan is brought to the board each year; and at this time, staff is addressing the health and
safety issues until we know which direction the plan may go. He said there are numerous
schools that need a multi-purpose facility, and staff had not only looked at this, but to also at
doing away with the cafeterias and provide strictly cafeterias at those schools, along with full
auditoriums and full gymnasiums. Mrs. Armstrong also asked about Walnut Hill and because of
the overcrowded situations for any event involving parents and grandparents, is this being
considered as well in Phase III? Dr. Dawkins explained that it is necessary to prioritize the
health and safety issues, but major renovations are in Phase III, and Walnut Hill would be
included in that Phase also.

Miss Green asked if it is too late to move another facility in Phase III? Dr. Dawkins said it is
getting late; however, he encouraged Miss Green to get with him about any suggestions she may
have.

Mrs. Crawley asked the superintendent if just because something is not listed in the plan, i.e.
year round schools, does it mean it will not be brought to the board over the next three years?
The superintendent said that is correct. Mrs. Crawley stated there is not much going on in
District 4 with this plan, so she doesn’t want the schools in District 4 to be forgotten. She also
asked that staff eliminate the phrase “off line” from Phase III, because she believes if it is needed
in three years, then a decision can be made to close the school(s).

POLICIES

Dr. Mary Nash-Robinson shared with the board that it has become obvious based on the
conversations relative to the Vision 2020 plan that it is necessary to change the way we operate
in facets and explained the following areas for consideration.

Under Phase I it will be recommended to change policies that are directly impacting the charge
to improve our effectiveness and shared examples such as the need to look very soon at the
movement of students and whether or not we want to continue curriculum transfers, student
teacher ratios, teacher transfer issues, student and staff attendance issues, sick leave policies,
entry requirements for some of Caddo’s programs, i.e. educational and technical. She said staff
will also look to secure an in state professional service for policy revisions and maintenance.
She explained that ForeSight Consultants was at the last Louisiana School Boards Association
annual conference and that 61 districts currently use the services of this company. Dr. Robinson
further explained that we will secure the agency for a cost of $20,000-$21,000 and maintenance
fee of $4,500. She explained that an immediate review of the policy manual will take place and
at this time, nine subcommittees are meeting and separating the procedural from the actual
policy. In Phase II, she explained that the subcommittees will establish the procedures since we
do not get rid of them, but they will streamline the components in this area and implement an
assessment to track what is being done. Dr. Robinson said the agency has explained that this
effort will take approximately 10 years. She also said that a lot of discussion has been held on
how the district can revitalize and rebuild the trust between us and the public. The committee
knows two things we can do are make sure we are in compliance with Caddo’s policies, and
assure that the policies streamline all the operations and make the most efficient use of our time,
resources and the energies of our people. Mrs. Crawley stated that she is not in favor of any
consultants, because it is the board’s job to hire a superintendent and make policy. She said the
district does have a large policy manual as a result of being so sophisticated. Mrs. Crawley
stated that she doesn’t believe a consultant is needed and staff can give to Dr. Dawkins what
policies are giving them heartburn and they can be brought to the board.
Mrs. Bell asked if Mrs. Crawley means the board will actually be the one going through the policies? Dr. Robinson explained that there are nine subcommittees in place and they have begun this process to identify those policies that are obsolete, and staff will bring recommendations to delete or change this policy. These proposed changes will be brought to the board during work sessions for discussion.

Mr. Riall asked if the labeling of the policies (letters) is a standardized format? Mr. Abrams explained that it was a policy service initially used and the policy manual reflects policies Caddo has by listing them in bold print. Mr. Riall noted that it is impossible to find policies, and referenced how their catalogs are broken down and could something similar be done for Caddo’s policies. Dr. Dawkins said he has complained about Caddo’s policy manual since arriving in Caddo and this is something that will be addressed through this process.

Mr. Hooks asked for an explanation on why we need to hire a consultant? He said we have a professional staff and an attorney. Dr. Dawkins responded that this is brought from the result of a board member request. Mr. Hooks said he believes the line on spending needs to be drawn somewhere.

Mr. Ramsey asked about the subcommittees looking at the policies? Dr. Robinson responded that each of the nine subcommittees is comprised of staff appointments and she highlighted which staff members, principals, etc. are assigned to the look at the policies. Mr. Ramsey asked Dr. Robinson how many hours are they committed to this project and how much does it cost the district for the highly professional staff go through a Policy Manual to consolidate these type issues. Mr. Ramsey asked Mr. Abrams for his opinion and how much it will cost. Mr. Abrams stated that he visited with a company (Forethought) at the Louisiana School Boards Association. This company provides a service, which the board would have to accept, and they would go through the entire manual and would also monitor new legislation enacted that may affect Caddo policies. He further stated they also provide an administrative policy manual so whenever new superintendents come to the district, there are administrative procedures in place on how things are to be done. This administrative manual can also be revised by the superintendent and includes references i.e. reference to the law, reference to the policy, and minutes where it was passed. Mr. Abrams said he believes this will be a great service for the district to take advantage of. Mr. Ramsey said he believes the staff’s resources would be better if applied toward academics than toward doing this type project. Mr. Ramsey also expressed concerns about the facilities in Phase III, and asked if a comment can be added that the superintendent will bring recommendations to the board and list them.

Ms. Priest asked Dr. Robinson about the bullet to recommend changes in policies that directly impact districts charged to improve effectiveness and efficiencies in academics and operations, as well as policies relating to transfers, magnet programs and allowing students to transfer from their neighborhood program to another school that has a magnet component. Dr. Robinson stated that staff is very much aware of the issue, and Elnora Salone from the Attendance Department is responsible for reviewing these policies to submit proposals addressing this to the board.

Mrs. Armstrong asked Mr. Abrams if he got a cost on engaging a company and how we would pay them for a review over a three-year period or once they complete the work? Mr. Abrams responded that he did not have this discussion with them, but they would have to submit a proposal for the board’s consideration, and he assumes staff will be required to work with them to put this together; but he believes the maintenance for the proposal submitted would be in the neighborhood of $3,500-$4,000 a year to update, and approximately $21,000 fee for reviewing and getting the policies updated over a three-year period. He said they will send us a copy of the approved manual and the staff will work with them to have a single repository for the policies, laws, procedures, etc., providing needed continuity for years to come.

Mrs. Bell asked if transfers for students from Huntington to Byrd, as an example, are only for academic reasons and not athletic reasons? Dr. Robinson explained that in this particular example there is a reference to three different entities, Louisiana High School Athletic Association (LHSAA) requirements, M to M transfer and curriculum transfers, all of which have stipulations.
Mr. Abrams shared that he has previously provided a history of the Consent Decree and in 2005, it was made clear to the Caddo Parish School Board that some of the things the district was doing were thrown out and the district is basically only responsible for three sections – M to M transfers, enhancement of one-race schools, and administrative assignments. He explained that Caddo has clearly complied with the M to M transfers and we now only have to advertise that they are available. He also explained that an example of enhancements to one-race schools would be Booker T. Washington and the fact that it has received more enhancements than probably any other school and has clearly met the charge here. The administrative assignment portion is probably an area that is not even done anymore, because in the 60s there was a concern that schools were identified by the administration, i.e. minority school had a minority administration. Caddo did meet and comply with this 20 years ago and is now no longer being utilized as a test as to whether or not a district has met the standards for unitary status. Mr. Abrams stated that in answer to the question should the district pursue unitary status, we can ask the Justice Department to consent going with a joint order to the federal judge and ask to be declared unitary or file a motion on our own and ask to be declared unitary and if there is no opposition within 30 days, the judge will sign an order declaring the district unitary. He reported that contact has been made with the Justice Department and they have said they can work with Caddo Parish; therefore, he believes this indicates they would not be opposed to Caddo seeking unitary status. Mr. Abrams said they requested information concerning the assignments and this has been provided. He said based on the fact that the Justice Department has said they will provide a joint motion order with the Caddo Parish School Board to declare unitary status, he believes we should do that. The only area he believes there may be issues is M to M transfers and he noted that this will no longer be an issue. At this point, Mr. Abrams said there is no opposition from the Justice Department and they agree to join with the Caddo Parish School Board, then he believes the School Board should do that.

Mr. Hooks asked Mr. Abrams if the Justice Department suggested that we not seek unitary status? Mr. Abrams said no, the Justice Department has said they could work with Caddo Parish, meaning that they believe we have complied with the Consent Decree. Mr. Hooks asked how this would affect the magnet schools? Mr. Abrams explained that the magnet schools have already been released so if Caddo Parish decides to maintain magnet schools, it is because Caddo Parish wants to. If Caddo Parish decides to eliminate all the magnet schools, it can do so. Mr. Hooks asked the superintendent if the system is unitary? Dr. Dawkins said at this time the district is still under the Consent Decree, but this would be to seek unitary status. Mr. Hooks asked for clarification on what the board is being asked to vote? Dr. Dawkins responded that even though the recommendations have not been finalized, based on what Mr. Abrams has explained, we would recommend seeking unitary status. Mr. Hooks said he cannot agree with that. Mr. Abrams added that when seeking unitary status, it means that the board can operate the district as a board without worrying that anyone will tell you what to do. The board can be the governing body is designed to be, and not have to get the judge to sign something or go to the Justice Department just to be able to conduct the business of the district. He explained that being declared unitary is not about the schools having racial components, or if it is majority White or Black, but it is about whether or not the district is being operated fairly in order to make sure that all children get an appropriate education based upon a board that can make that decision for all children in Caddo Parish. If declared unitary, you cannot use race as a component to decide how district lines are drawn.

Mr. Riall asked Mr. Abrams if declaring unitary status has any effect on the Choice Program? Mr. Abrams responded that it is Federal, but it is also Federal statute; and when your schools are declared AU, a district must offer students the option for their children to attend a school that is not in AU status.

Mrs. Crawley asked what type of funds will be involved in this process? Mr. Abrams responded that if it is a joint order, it can be done pretty inexpensively by filing a sheet of paper.

Mr. Lee shared with the board that the total savings for the three phases if the board supports this plan is $31.8 million, which includes savings for consolidation of schools, taking schools off line, and the options to help with the $20 million deficit. Without the budget, Mr. Lee reported that the Vision 2020 plan will save $13.8 million. He explained that on Thursday, these are the figures the board will be looking at, and the savings that Mr. White presented will be savings to
the General Fund. Relative to the questions about the cost, Mr. Lee explained that these will not be paid out of the General Fund, but out of Capital Projects. Finally, with the suggestion to take Blanchard and 81st Street out of Phase III, if this happens, it will reduce the savings by approximately $1.5 million a year.

Mrs. Crawley asked about the $22 million budget and when did we receive the EduJobs money? Mr. Lee responded that staff put in a request for the EduFund monies and he has not seen it. Mrs. Crawley indicated that this amount is not reflected, and Mr. Lee reminded the board that for the Edujob monies Caddo received, the state reduced the MFP monies for that amount, so it was an offset of the reduction of MFP monies. Mrs. Crawley asked if the MFP amount was reduced? Mr. Lee said that is not reflected in these numbers, but when discussions are held on the budget, staff will explain the reduction in the MFP and how we accounted for the EduJobs monies. Mrs. Crawley asked for a summary of the grant for the EduJobs funds. Mr. Lee said there is a summary and it all went to salaries and benefits.

Mrs. Crawford reminded the board that when in Washington, D. C. the Federal Legislative Delegation was reminded about the EduJobs. She said they shared with them the belief that this is supplanting the MFP funds and asked Mrs. Landrieu. She encouraged any who wanted to be involved in this to notify the Governor, Paul Pastorek, etc. and encourage them to not pass this. Mrs. Crawford also reported that she has been asked to serve on the Louisiana School Boards Association and this is a topic that will be discussed.

Mrs. Bell asked Mr. Lee to explain the reduction in the MFP and the money we received from EduJobs and that this was not new money. Mr. Lee said that is correct, and it was done as an adjustment and if we were supposed to get $200 million, the state adjusted it down to $196 million.

Mr. Hooks stated that according to his contact, Kim LaMont, Office of Management and Finance, Louisiana Department of Education, Caddo requested the money on March 7, 2011 and that we should receive $5 million and it is here. Mr. Lee stated that we did make the request and it was for $4 million; and if it is here, he just has not seen it yet.

Ms. Priest thanked the staff for the work put into the presentation and in this process. She also asked board members who have additional questions to please get these to the superintendent.

VISITORS

Curtis Joseph spoke on behalf of 81st Street and expressed appreciation for moving consideration for change to 81st Street to Phase III. However, he said he would like to see 81st removed from the Vision 2020 plan all together. He shared his involvement in 81st Street and encouraged the board to reconsider slimming down versus shutting down.

John Oswalt stated that even though the merger of Donnie Bickham and Blanchard have been moved to Phase III, he wanted to encourage the board to consider removing changes to Donnie Bickham from the Vision 2020 Plan. He highlighted the opportunities offered students at Donnie Bickham and the outstanding leadership at Donnie Bickham. Mr. Oswalt explained that when built, Donnie Bickham was built to house 1,200 students; however, he explained how some of the classrooms are used for those students with exceptionalities and for computer labs, which he believes changes to these will be detrimental to the program at Donnie Bickham. He encouraged the board to not go forward with this merger now or in the future.

Shatorriyae Starks shared with the board that she has a daughter in kindergarten and a son in 5th grade and that she doesn’t understand her children being merged in facilities with students three times their size. She asked that in looking at the needed changes that the board consider keeping the students with their equals and not placing the 6th graders with 12th graders. She also said that bullying is real in the schools; her child experienced this and the principal is addressing it.

Brian Odell addressed the comment at a recent school board meeting that they cannot foresee all negative impacts, but he has three children and the fact that they will be sharing facilities with teenagers is not acceptable. Mr. Odell said while you may not be able to predict all the outcomes in these schools, he believes the negative impacts will far outweigh the positive. He said he doesn’t understand how it will help by placing these younger students with teenagers, because he
believes it will lead to bullying; he doesn’t understand how it is helping students by increasing classroom sizes; and he believes in the next couple of years this will create a chaotic, non-learning situation. He shared his love for the Blanchard community and Blanchard Elementary and he is concerned about the recommended changes. He encouraged the board to look at the busing issues and expenditures because busing is a perk and is a perk that maybe should be eliminated in order to save money. Mr. Odell also shared that he does not agree with moving Blanchard to Phase III, but asked that consideration be given to removing it from the plan.

Labo Desalu shared with the board her concerns as a mother and physician relative to keeping 81st Street open. She said this school contains both early childhood and special education; and even though it may appear to be under utilized, she knows from experience that this school is important for those students with special needs. Ms. Desalu said she believes this would be a great mistake and would destroy this community. She said it is a model program for early childhood and special education, and moving it will affect the children tremendously.

Aaron Dobynes addressed the board on the proposed changes for J. S. Clark School and commended the board and staff for the task before them. He encouraged the board to reconsider not closing J. S. Clark because they have moved 11 points in the last year in its scores, it has several community partnerships that focus on mentoring, it has a Microsociety Program in place. Knowing that the issues of bullying, teenage pregnancy would be real issues in moving these students with the high school students, he encouraged the board to reconsider and leave J. S. Clark as it is.

Alfred Cole address the board on the proposed closing of several Caddo schools. He referenced the comments made that they are being closed because they are not being utilized, and he believes the schools are being used by teachers and students. He said if a school is not being utilized, it is not functioning, and if it is not functioning, the school would be closed down and at this time, that is not the situation. He reminded the board that 81st Street has had some of the most successful students and if it is closed, he doesn’t understand breaking that tie and forcing them to attend another school. Mr. Cole said he would love for his child to attend J. S. Clark and BTW, and putting the 6th graders with the 12th graders is not going to work. He shared that he believes one of the problems was created 20 years ago when transfers and magnets were implemented and students were put into these schools that were away from their neighborhoods.

James B. Gardner addressed the board on the proposed closing of 81st Street and that he is an advocate for all children and particularly those with disabilities. He shared with the board his experience of having a child with special needs and the battles he fought to get her what she needed, because there was no 81st Street to meet her needs. Mr. Gardner explained that 81st Street has been evolving since 1983 and it has spent lots of money to provide new and appropriate playground equipment and handicap accessible facilities. He doesn’t understand how the staff believes it can support the program by moving it to another facility. Mr. Gardner asked that staff may be changing the wording that in two years you would evaluate the needs and future of the preK program at 81st Street and Mooretown.

Michael Myers, CFT/SP, special ed teacher, addressed the proposed Vision 2020 plan and in appearing before the board many times in the past, as a tax payer, he would love to be more informed. He stated that every time he comes before the board that it appears the board members want to be informed. He shared with everyone how Governor Jindal had appeared before the people and declared that he would be an education governor and how he would be an education governor and would be transparent. He responded that transparency does not mean the public will find the board doing something wrong, but it will mean that people want to know what is going on and not kept in the dark. Mr. Myers noted surpluses in the millions of dollars in the classroom and how the misuse of funds in the classroom have always been a problem. Mr. Myers said it is important that people see the figures, detailed breakdown of the money, for these proposed changes.

Scott Hughes, Alliance for Education, addressed the board on the proposed Vision 2020 Plan. Since the board has decided it will vote on the plan on Thursday, Mr. Hughes said he believes the board has already made its decision; and he shared his concerns about what the board will be voting on: that these ideas are academically solid and that schools are not being set up to be taken over by the state, that the board believes it can get DOE to agree to this plan, that the board believes it can pass a bond vote, and that this plan will solve the problem. He said he believes
the problem is a $37 million deficit because the board will use $17 million in cash to buy it down to $20 million and you will not have solved the problem.

Sharon Ketchum, Forest Hill parent, shared with the board her concern to redraw Forest Hill’s attendance zone and send a portion of its students to a proposed K-8 configuration at Ridgewood. She is concerned about where the lines will be because what she has seen is not clear and feels like she is in the dark. Mrs. Ketchum shared that she has a special needs child and they personally chose their home across the street from Forest Hill so that her special needs child will be across the street from her. She shared the positive experience at Forest Hill and she believes other Forest Hill parents are concerned about whether or not she will be affected. She also said she doesn’t want to see her elementary students on a campus with 8th graders. Mrs. Ketchum said she is also interested in receiving some specific definites regarding the plan.

Janet King, parent, addressed the board on the proposal to close 81st Street and encouraged the board to reconsider this recommendation and keep it open. She shared with the board her positive experience at 81st Street for her special needs child, and asked the board to consider keeping its doors open.

Jackie Lansdale, Caddo Federation of Teachers/Support Personnel, said she believes it is all about message and that the first presentation was all doom and gloom. She said there are conflicting messages being sent from one presentation to the next and one conversation to the next about the plan and the budget. Mrs. Lansdale said it is very obvious the governor does not want public education and is trying to get all the district’s money. She said this board is the same board that said what happened eight years ago would never happen again on this board’s watch and here we are facing freezes and threatening layoffs; however, the board is still hiring consultants, staff is still driving around in company cars, still setting aside money for bonds, and lack of interest in the EduJobs funds. She asked the board if its intention is to say that it is not its job to fund public education, because that is what it sounds like and is that the message the board wants to send.

Daryl Roberson, Caddo Association of Educators, stated that he spoke last week about job security for the employees and while he can appreciate the validity of the Vision 2020 Plan, he has major concerns about the safety of children in the following areas: (1) the problem of bullying, (2) separation of age levels and that parents are assured their children are in age appropriate associations with their peers, (3) classrooms are becoming over crowded because of students being packed into schools, and (4) that merger of attendance zones in which students do not get along and fight in the schools where they get away with it with less consequences. Regarding the schools in the Martin Luther King area, Mr. Roberson said he worked in the schools in this area, and asked the board to consider making Newton Smith a 6th grade center and not placing the 6th graders on the same campus as 12th graders.

Precilla Tramiel, parent, shared with the board her concerns that this plan is targeting the lower African American schools and she doesn’t understand why A. C. Steere, University, South Highlands, etc. are not being affected. She also shared her concern about non handicap accessibility accommodations at these schools. She also asked if the lack of parking at Turner has been taken into consideration. Ms. Tramiel encouraged the board to consider these concerns.

Walter Autrey reported to the board that he has received 196 signatures against putting the 6th-8th graders with the high school students. He said he doesn’t believe the board has any vision when considering combining these students and schools. He said he believes this will show more problems than imaginable, and it’s the taxpayers that pay the salaries and that they deserve respect as well as their students needing respect. He encouraged the board to table this item and never bring it up again.

Kirsten Richmond, student at Hillsdale, addressed the board about the proposed change for Hillsdale and asked the board to not take away their school.

Jamiya Owens, student at Hilldale, encouraged the board to reconsider not closing Hillsdale and leaving it open so she will not have to attend Turner.

Batine’ Park, grandmother, addressed her concerns for her grandchildren at Turner and that she does not want her 11 year old grandson attending Huntington High School and she does not want
her granddaughter to attend HHS. She asked that the board find another way to make this work without putting these young students in an environment that will not be good for them.

Janie Richardson, Women’s Philanthropy Network, shared with the board that this Network has given approximately $500,000 to education over the last five years; and with over 40% of Caddo’s schools on the Academically Unacceptable or Academic Watch List, maybe it is possible that the Caddo School System has honestly earned that it has lost the public’s trust. She said the urgent and important issues at this time are improving academics and reducing the deficit. Ms. Richardson said it is important to find out what the real cause of the deficit is and she believes there are ways to save funds in the budget in addition to closing schools. She said she agrees there has been a reduction in the population. She noted the line item in the budget of $5,400,000 for recruitment and that last year Caddo recruited approximately 400. She said she doesn’t know if this is an error, but if it is correct, she believes it is absurd. Ms. Richardson said she believes an outside expert is needed, one who is knowledgeable in Louisiana education that can look at Caddo’s budget and help get it under control. She also said another issue is the academics and in the strategies shared there was no mention of teacher evaluation, and research shows that great teachers can make a difference for students of every background, and it is known that the quality of the teacher at the front of the classroom is the most important factor. She said there was also no mention of fitness and wellness, year round schools for middle and high school students, or no mention of creating more magnet or magnet prep schools, or making every school a magnet school, and no mention of measuring outcomes.

There being no additional business, President Priest announced that the meeting is adjourned at 9:15 p.m.
March 24, 2011

The Caddo Parish School Board (CPSB) met in special session in its office at 1961 Midway, Shreveport, Louisiana at approximately 4:00 p.m. on Thursday, March 24, 2011 with President Lillian Priest presiding and the following school board members present being a quorum: Steve Riall, Jasmine Green, Willie Burton, Charlotte Crawley, Curtis Hooks, Mary Trammel, Bonita Crawford, Barry Rachal, Larry Ramsey, Ginger Armstrong and Dottie Bell. Also present were Dr. Gerald Dawkins, secretary, and Reginald Abrams, legal counsel. Ms. Mary Trammel led the invocation and Pledge of Allegiance.

President Priest announced that according to the Fire Marshall everyone in the chamber must be seated and there is overflow seating in Room 1.

As a point of personal privilege, Board member Hooks apologized to the staff because he understands he hurt some feelings; and if he did hurt anyone’s feelings, it was not intentional. Mr. Hooks also apologized to the board members. However, he said he makes no apology for what he said on Tuesday or at any other board meeting regarding the character or person he is and will always be. He said it wasn’t anyone around the horseshoe that voted for him on October 2, 2010, but it was Jesus that put it in the hearts of the people of District 5 to vote for him to represent them and that he will do. He also said he will never attend another recess of the board like the one on Tuesday.

President Priest stated that for the last year there has been a planning process for Vision 2020 and two attitudes to planning need to be held. We need to be prepared for what may lie ahead which may mean contingencies and flexible processes, but on the other hand our future is shaped by consequences of our own planning and actions. Planning is a process for accomplishing purposes, and it is a blueprint for business growth and a road map for development. She said a plan can be long-range, intermediate-range or short-range, but it is a framework within which it must operate. Preparation of a comprehensive plan will not guarantee success, but lack of a sound or comprehensive plan will almost certainly ensure failure. Ms. Priest said planning helps in forecasting the future, it makes the future visible to some extent, and it bridges between where we are and where we will go.

Dr. Dawkins reviewed with the board and audience the final recommendations for Vision 2020. He clarified for everyone items of importance so everyone had a more complete understanding of some of the elements of the plan. He stated that Vision 2020 is not the budget and the budget is not Vision 2020. He said cost savings that will result from Vision 2020, if approved, will indeed impact next year’s budget; and in fact, our ability to address inefficiencies and lessen the impact on possible staff, services and program reductions in next year’s budget. The superintendent stated that staff has been preparing for next year’s budget for the last couple of months and will begin sharing the preliminary budget with the board after spring break. He said that all elements and components of the budget will be reviewed and presented to the board for discussion and ultimately approval. Dr. Dawkins said that it is no secret that the district is facing tremendous budget challenges, but failure to address the district’s fiscal crisis is not an option and hard budget decisions will need to be made, some may be even harder than tonight’s decision, but there is no choice but to face them. The superintendent also shared that the approval of Vision 2020 by the board is not an approval for a bond issue or a bond election; but Vision 2020 seeks to provide equity in resources for all students. He said when we begin to define the real and actual needs, a proposal will be brought to the board about possible scenarios regarding a possible bond issue. He reiterated that tonight’s recommendation is not a request for the approval of a bond issue, but only includes the possibilities for the board to consider a bond issue in the future. Over the next two years, real needs will be identified, and only then, will consideration be given of proposing to the board a recommendation to pursue bond funding to meet the needs. Whenever this might occur, however much it may cost, and over what period of time, will be determined only after in-depth discussions with the board, staff and the community. Finally, and most importantly, Dr. Dawkins stated that Vision 2020 will begin to focus on short-term and long-term efforts to educate each and every child in Caddo Parish, because it is important that each one of them perform at their highest level every day, from the lowest performers to the national merit scholars. He said we can never again be without a planned future for the school district, the students and the community. Change is not easy, but it is important that we break towards the future like never before, because the opportunities in front of the students will redefine them, the district, and this community for many years to come.
Areas of concern and underperformance over the years are acknowledged and we are committed to continuous improvement in every classroom, every school, and every department. Dr. Dawkins said that all are responsible for the students, starting with the superintendent; and it is important to change the picture of all students, and we pledge to work with those in the community who desire to change the lives of the children. He expressed appreciation to all who have come to the many meetings over the past year and he looks forward to working with them in the future.

Superintendent Dawkins highlighted changes in the proposed Vision 2020 plan since the last meeting as follows. Page 1 of 10 under Academics, Phase I – addition of redesign of alternative schools. On Page 2 of 10 under Operations – addit Reorganize Central Office with final board approval. Also on Page 2 of 10 under Phase III – addition of possible bond proposal for Spring 2013. Dr. Dawkins explained this is added so everyone is aware and reminded of that possibility. On Page 3 of 10 under Facilities – change 6-12 configurations to 7-12 configurations for the schools affected (Green Oaks, Booker T. Washington, Fair Park, Woodlawn and Huntington), and 6th graders will be housed in other facilities to be determined in the coming few days. Dr. Dawkins also noted that no site has been determine for off lining the Hosston Alternative program and work continues in this area. Also on Page 3 of 10, the superintendent explained the addition of all analyzing all attendance zones for efficient alignment over the course of the Vision 2020 plan with board approval. On Page 4 of 10, Dr. Dawkins noted the first bullet in Phase II that to off-line West Shreveport and Central Elementary; reopen J. S. Clark to become a PreK-6 with students from West Shreveport and Central Elementary; and converting Oak Park MicroSociety from preK5 to a preK8 has been moved from Phase III to Phase II, and the possible K8 configuration at Ridgewood Middle School will be assessed during the coming year to determine if the population growth supports moving forward with the proposed K8 plan. Under Phase III Facilities (2013-14), Dr. Dawkins said he will bring to the board a proposal regarding a bond proposition which could include the recommendations presented and noted there is no proposal on the table, and nothing has been submitted to the board. If and when a decision is made to bring something, only then will the board decide if there will be a bond proposal. Also, Dr. Dawkins announced that moved to Phase III is the recommendation regarding the merger of Blanchard and Donnie Bickham, and that the growth at Blanchard will be reassessed to determine the needs and if the growth continues in the current trend, there could possibly be other considerations brought to the board. He also announced that moved to Phase III is the recommendation regarding 81st Street and Mooretown, and the staff will reassess the enrollments at these two facilities to determine the capacity in each of these programs and if there is a need for more seats in preK. On Page 6 of 10, Dr. Dawkins stated that the recommendation to secure in-state professional services has been revised to include with board approval and if the board desires to do this, staff will bring it to them for approval. On Page 8 of 10, the superintendent shared that additional information is presented regarding the total savings for Phases I, II and III, along with the expenses. The bottom line is that to make these improvements and to see these savings of approximately $12 million in general fund savings by off lining facilities and other inefficiencies, with a one-time expenditures of approximately $1.3 million.

VISITORS

Christy Tyson shared with the board her concern that with the closing of the Hosston Alternative School, it is possible the students will be moved to North Caddo. She also stated that she believes Vision 2020 means clear and accurate, and that the plan presented is not clear and accurate. Ms. Tyson said she believes the schools in Vivian are treated like ugly stepchildren in a dysfunctional relationship. She said if the schools in Vivian are closed, you might as well close down the town. She also stated the wing that should have been built at North Caddo was never built and asked where is this money?

Michael Williams stated he is seeing a spirit of cooperation and some common ground to compromise by not moving the 6th graders to the high schools. He commended the board for this; however, he believes there needs to be equity and fairness in education for all students. Living in a multi-cultural, diverse community, and when talking about diversity, he referenced the fact that there are those that will sleep at the schools (Captain Shreve, Byrd and Magnet High) to get their students in certain schools; but if we put great programs in all schools, people will come from everywhere to get into the school; and if you put a great program at BTW, you will save BTW. Mr. Williams said he believes people will be more acceptable of change if they
are included in the decisions that will affect them. He stated the board should be looking at responsible change that offers justice for all students, change that is a win-win solution so all can come together and work together, and don’t take from the poor to give to the rich.

Jiordano Maxie concurred with the previous speaker because he too had a problem with the Vision 2020 plan, and he just heard the recommendation to place 6th graders at the high school level. He encouraged the board to look at every school and not just the majority Black schools.

Scott Young, pastor of Mooringsport Baptist Church, shared with the board that Mooringsport Elementary School is intimately tied to the community and the viability of the community is dependent on the school. Mr. Young said taking the school from the community will hurt the children and the expectations in the community. He said the proposed campus in the Herndon area is a problem because there is no water and there is no municipality in that area to bring water to the school, so it will be necessary for the district to build a water plant, bring the water in from a great distance, as well as build a sewage treatment plant. He believes all this has not been taken care of in the costs associated with these changes.

Karen White stated she heard the recommended changes, but she still wants to share her concerns and thoughts with the board. Ms. White said she was among the first set of 6th graders that graduated from Newton Smith Elementary many years ago and recalled her transition from 6th to 7th grade as being a very frightening one even though the students were only one to two years older. She stated she doesn’t understand the reasoning for placing 6th graders on the same campus with students this much older than them. She encouraged the board when voting on this plan to vote for the children and to vote unselfishly, because it is about every district in the school system and every student in the district. She asked the board to do what is fair and vote with their hearts, minds and souls and not be swayed by race, creed, color, nationality, disability or locality, and encouraged board members to take a stand for what is right.

Carrie Gaskin, Blanchard PTA, said that while most of her comments don’t apply with the changes in the recommendations, she still wants to share her concerns for why the district found itself at this place anyway. She said she is bothered that the first option presented directly impacts the classroom first and this is the last place that should be affected by changes. Changes should begin with administration, maintenance, etc. first. She asked the board to consider possible realignment of the school board network, i.e. administrative contracts, less bonuses, etc. She said since every meeting retros back to the dollar, she encouraged the board to run the district like a business and not provide administrators with vehicles, bonuses since the business is currently not lucrative. Mrs. Gaskin also stated that she is concerned because every board member in the last three weeks has asked for budgetary breakdowns and she doesn’t believe they should have to ask for this information, but it should have been information automatically provided to the board. She encouraged the board to look at the numbers and then decide what can be done.

Shamell White shared her appreciation to the board and staff for reconsidering and not shutting down 81st Street and for not putting the 6th graders with the high school students.

Meghan Thomas, student at North Caddo High School, shared with the board her concern about the decisions being made relative to Hosston Alternative School and the possibility of moving the students to North Caddo; and if this happens the negative impact on the students at North Caddo. She encouraged the board to vote no on this recommendation and keep North Caddo a magnet school.

Gary Taylor, student at North Caddo High School, shared with the board a petition of students from North Caddo opposing the merging of North Caddo with the students from Hosston Alternative. He said he has a problem with bringing these students to North Caddo when they were removed from the regular classroom and placed in an alternative setting. He also said the majority of the students at Hosston are from Shreveport, so he does not understand why they would be relocated further north away from Shreveport. Mr. Taylor also shared other negative aspects of such a decision and urged the board to reconsider this recommendation.

Caroline Caldwell, student at North Caddo High School, addressed the board in opposition to merging Hosston students with North Caddo students. She shared her belief that this change will
have more negative consequences than positive consequences and that safety would be a major concern.

Jeanie Patterson shared that she recently moved back to Louisiana from Texas, having never lived in a small town. When she moved to Oil City, her niece moved from Herndon to North Caddo High School and with these schools being the heart of these communities and for these students, she encouraged the board to rethink the closing of these schools and be sure that the decision made is the best decision for the students.

Scott Hughes, Alliance for Education, stated that tonight the board will vote on a version of Caddo’s future and addressed what he believes this vision will actually achieve. He said there was a time when public school boards held a monopoly position, and the public’s only real other options were private school or to move. However, today, the board no longer holds the monopoly for educating Caddo’s children and a yes vote tonight will be looked back upon as the catalyst that launched Caddo into the new world. He shared that data clearly shows that people are opting to move to Bossier and North DeSoto; and since the relative cost of private school, especially new church schools, has dropped, the private schools have steadily grown. Mr. Hughes added he believes it is the new options, i.e. home schooling and charter schools, that should give the board real pause. He also stated that the board’s powers come from the State Constitution in the form of a local education authority act, being granted the boundary in Caddo Parish. However, Zachary and East Baton Rouge has shown that parts of an LEA can vote to break away and form its own school district. When this happens, the local district can then lose a major portion of its tax base. He said despite all the work to complete I49 north, this proposed plan will close all but two schools in the north, and what message does this send to the neighborhoods in northern Caddo Parish. Mr. Hughes also said that while the message sent clearly states that southeast Caddo Parish is the place to live, it fails to provide the adequate infrastructure for continued growth while asking this part of town to fund over $500 million in new taxes. He said today a vision will be achieved, but it will be a vision of unintended consequences and the story of opportunity lost.

Levi Ashby shared that he is an alum of Blanchard Elementary and the students attending Blanchard have had the opportunity to stay together throughout middle and high school. He shared that he understands that a K8 will create a sense of family; however, he believes the age gap of the children will create a dysfunctional facility. He referenced the Leap and iLeap results. Mr. Ashby also shared that while they appreciate being moved to Phase III, he would like the board to be aware that those interested will continue to make their voices heard.

Alfred Cole expressed appreciation to the parents and staffs of all the schools for their support and asked why Broadmoor, Youree Drive, Captain Shreve and Byrd were not mentioned for possible consolidation. With everything being out in the open, he asked why was the plan presented recommended, were the students the focus because he still sees 7th and 8th graders with 9th through 12th graders. He said he does not see any sense of respect toward the citizens that make the decision. While he doesn’t have any problems with the magnet schools, he believes that the neighborhood students should go back to their neighborhood schools to succeed. He said he also believes these are landmark schools and there is a landmark law in Caddo Parish. Mr. Cole expressed his appreciation to the board for keeping 81st Street open and that we have unused property on this campus.

Diana Kropp shared with the board that she has three children at Forest Hill Elementary and in hearing the talk about problems with 6-12, she has a problem with K-8. She said she cannot see a six year old in the same school with 13 and 14 year olds. She doesn’t understand how such a school can be structured to ensure safety, which is her main concern. Ms. Kropp also stated that she doesn’t believe the needed changes can be accomplished in four months, and she asked why are maps on the web site without detailed information? She said teachers are already over loaded with students; and since the students today are different than previous generations, the number being proposed for a classroom is too many. Ms. Kropp also shared her disagreement in taking away the teachers’ m & s money and encouraged the board to put student safety and learning first when making its decision.

Sharon Ketchum addressed the board on the proposed changes for Forest Hill and she bought her home directly across the street from Forest Hill so her three children could attend Forest Hill, Ridgewood and Southwood. She is concerned with the proposed changes and not knowing if her
children can remain at Forest Hill or if they will attend the K8 configuration at Ridgewood. She is also concerned about her special needs child being at a K8 school rather than at Forest Hill where the administration and faculty have been very accommodating to her needs. She referenced the uncertainties about the proposed changes so that she can correctly relay the information to her parents and peers, and asked the board not to make any changes to Forest Hill.

Mandy Wall stated that she came to the meeting tonight to ask the board to remove the recommendation to off line Blanchard Elementary from the plan and thanked everyone who listened to the concerns and made the change. She also said that the next time she speaks to the board she hopes it will be to ask the board to build a wing at Blanchard Elementary because of the growth.

Lloyd Thompson shared his concern about placing 6th graders on the high school campuses and shared with the board his involvement in J. S. Clark. He asked the board to look at all the inner city schools and how we can save these schools rather than close schools. He said he believes the entire plan needs to be looked at more closely as to how schools can be saved and not closed, because closing schools will hurt the community.

Jackie Lansdale, Caddo Federation of Teachers/Support Personnel, said she was not to be here tonight but was scheduled to be at a conference out of town. However, as an education organization that represents 2,600 of Caddo’s employees, she believes it is her obligation to be here to speak about academics and discipline, which she does not see in the plan. Mrs. Lansdale referenced the budget and concerns about the CEEF funds, EduJob funds, and Haynesville Shale dollars and discussions are being held with appropriate legislative representatives to address these budgetary issues. Relative to discipline and discussions about getting students to return to their communities, Mrs. Lansdale said that they will not if they don’t feel safe. She also shared an incident last week where a student had a gun at school; and only after they made a lot of noise about it was it addressed. She also shared other incidents that are happening in the schools where there is a lack of discipline being enforced.

Daryl Roberson, Caddo Association of Educators, stated is what is really important to approve the Vision 2020 plan with a few modifications made after pressure from a few groups, and is it prudent to hastily move forward with many unanswered questions from the community. He said there are many questions that have been asked since the plan was first unveiled and these questions still have not been answered. He said it is his hope that the board will postpone action on the Vision 2020 plan until there is more clarity and answers to these questions.

Camryn Smith, staff member at Hosston Alternative School, stated that she is hurt by what the students at North Caddo have said today and shared with everyone the positive things that are happening at Hosston and the great strides that students are making while at Hosston. She said these students are not bad kids, but are students that have made bad choices.

Shane Barberaux, teacher at Hosston, shared that he has been at Hosston for eight years and that they are at Hosston to help students who have made bad choices turn their lives around. He compared Hosston to a business and the board as the owners, and as the owners, he encouraged board members to visit Hosston and see first-hand the learning that is taking place at Hosston. He said he believes if these students are placed in another environment, he doesn’t know if the learning they need will happen like it is happening at Hosston with smaller classrooms.

Irma D. Rogers, president of the Martin Luther King Community Development Corporation, said that she understands with the new changes delineated the 6th graders will remain in a middle school setting. She shared with everyone that with concerns expressed about sending 6th graders to a school with 12th graders, suggestions were made from PTAs, alumni associations in the MLK area, to at least leave the 6th and 7th graders together in a middle school setting, and only send the 8th graders to Green Oaks. She believes this is a better alternative to the current plan. She also believes a needs-assessment is needed in the MLK area due to growth; and while there may be challenges with the 2010 census, there is still clear delineation that there has been growth in this area. Mrs. Rogers also stated that other questions from their area include what prompted this action by the board, was a study done before this vision was to be implemented; and if so, was a longitudinal study done to support the school closures, and if so, she would like for it to be shared with the community. She added that since the citizens of the MLK area pay the same taxes as other areas, they believe they deserve the same answers. The board’s efforts in many
things were applauded; but she believes this is crucial, as schools are a crucial part of the neighborhood. She encouraged the board to give grave consideration to the decision it makes.

Mr. Rachal moved, seconded by Mrs. Bell, to approve Vision 2020 Plan Phases I, II and III, as submitted by the Superintendent.

Mrs. Crawley moved, seconded by Mr. Hooks, to table Vision 2020 and begin as soon as possible to get to the budget work that needs to be done and then come together as a caring board to get a plan that has a vision for the best and safest education system for all children.

Mrs. Crawley stated that we could have voted on this on March 8th and it would have passed, and it will pass tonight. She said a couple of board members have worked very hard to get it as less terrible as possible. She shared that on Tuesday night a lady asked her how she would vote on this and she told her it would really not affect the children in her district, and if they want to shoot themselves in the foot with this plan, then why shouldn’t she let them do that, because her kids would not be in chaos in August. She said at that point the lady looked at her as though she had slapped her, but she told her she could not do that because her heart is heavy. This lady also reminded her that she doesn’t just represent District 4, but all the children in Caddo. Mrs. Crawley thanked Dr. Dawkins and his staff for their work, and she understands that some of the things that needed to be done could not be proposed because of political constrictions. She added that she believes the budget needs to be addressed and the budget will alleviate some of the combination configurations. We don’t need to mess up middle school children because of budget. Mrs. Crawley said she believes Mr. Hughes’ comments hit the nail on the head.

Mr. Hooks said he doesn’t believe in killing the inner city schools and entire communities. He said if we are going to take, we need to take where it needs to be taken from and a lot has already been taken from us. He said a lot of work was put into this plan; however, he is not satisfied and it needs to be put on hold, and he will not vote on anything that he cannot see.

Vote on the substitute motion failed with Board members Green, Burton, Crawley and Hooks supporting the motion and Board members Riall, Trammel, Priest, Crawford, Rachal, Ramsey, Armstrong and Bell opposed.

Vote on the main motion carried with Board members Crawley and Hooks opposed and Board members Riall, Burton, Trammel, Priest, Crawford, Rachal, Ramsey, Armstrong, and Bell supporting the motion. Board member Green abstained.

Adjournment. Mr. Riall moved, seconded by Mrs. Bell, to adjourn. Vote on the motion to adjourn carried and the meeting adjourned at approximately 5:25 p.m.

Dr. Gerald D. Dawkins, Secretary
Lillian Priest, President
The Executive Committee of the Caddo Parish School Board (CPSB) met in regular session in its office at 1961 Midway Street, Shreveport, Louisiana, at approximately 4:30 p.m. on Tuesday, April 5, 2011 with President Lillian Priest presiding and Steve Riall and Dottie Bell present being a quorum. Other school board members present were Jasmine Green, Willie Burton, Charlotte Crawley, Curtis Hooks, Mary Trammel, Bonita Crawford, Barry Rachal, Larry Ramsey and Ginger Armstrong. Also present were Secretary Gerald Dawkins, Legal Counsel Reginald Abrams, staff and other visitors. Ms. Priest led the invocation and Pledge of Allegiance.

PRESENTATIONS

Reapportionment Update. Gary Joiner, Precision Cartographics, shared with the board information on the current census statistics per school board member district. He explained that according to the census, there are 254,969 people and when divided equally by the 12 districts, an ideal district should be 21,247. He said in the last 10 years when the school board was put into apportionment by him, the numbers were within the allowed +/- 5% (10% range); however, because of the movement of people, that is no longer correct. He explained the changes seen in each district and that along the Ellerbe Road corridor shows an almost 30% increase in population with central and northern Shreveport population being down. Mr. Joiner explained the breakdown of the population numbers and that the numbers are not voters, but potential voters (those 18 years and older). Additional information shared included information on individual districts with the number and percentage of each category. He explained that if the deviation numbers are positive, we will want to get those numbers to below 5; and if they are negative, we will want to get the numbers up above minus 5, which will be done by moving precincts into and out of districts. Mr. Joiner further explained that when the parish commission does its reapportionment, which he is doing and it has to be done by the end of May, they will create the voting precincts. He said the key in what they will do is not the polling place, but the boundaries of that precinct. When the commission does theirs, they will not change the outline of the precinct, but it may be necessary to split a precinct. State laws that must be followed include you cannot create a precinct with less than 300 voters nor can you have a precinct with more than 2,200 voters. He also explained that those precincts that have been split alphabetically will now be brought back under one. He also said that while we have had precincts that were identified with only a number, they may now be identified with an A, B, C, and D. Mr. Joiner explained that this will help because Caddo has the most extensive problem with what is called ballot management in the state, because it has to have ballot styles for every variation. The more voting machines, the less precincts we have and the easier it will be to conduct future elections, and the state is not buying any voting machines and is not allowing any kind of change in these precincts; so if they can be reduced, it will free up some voting machines to work with. Mr. Joiner encouraged board members to meet with their counterparts on the commission to discuss these numbers and a possible plan. He said he has created a plan, and he is trying to make sure he can get together with the parish commissioner and school board member from the same district. He also added that because there are so many streets and roads, and most precincts are bound by streets and roads, it may be that someone may only have one side of a street in their district. Mr. Joiner explained that he can use any visible line in any precinct in the parish, so it is possible that some of the new splits could possibly be bound by city limit lines. He reminded the board that some districts are huge in area and in population; and at this time, he is developing possible precinct cuts and if there are any that the School Board can viably use, which is another important reason for School Board members to be in touch with their Parish Commission counterpart. Mr. Joiner also encouraged board members to contact him to schedule a time to meet and discuss their individual districts regarding those areas within their district that they want to keep. He asked board members to email him this information, and he will build a plan based on the information provided, and then meet with individuals to review and make changes.

Ms. Priest asked Mr. Joiner when talking about several precincts that are split, i.e. 5A and 5B, will these be combined, and Mr. Joiner explained that these are precincts that can be looked at to possibly cut. He asked board members to not fall into the trap of looking at letters, because the Registrar of Voters office can produce a report out of Baton Rouge called a 1A report, and he will request this information and forward to the board members.

Mr. Rachal asked Mr. Joiner how the AB division is beneficial? Mr. Joiner responded the benefit is from the state side and it keeps from adding a lot of precincts, and referenced when the
state went to digital voting machines and the number of squabbles with vendors over pricing and programming. He said there are not a lot of extra voting machines and it is difficult to get any extras from Baton Rouge; and when a large precinct is split, it must be set up with a new commissioner and those who will work it and at least two machines. It is all about getting the machines, and trying to keep it as simple as possible. Mr. Rachal asked for clarification and what Caddo Parish School Board has to do with the Commission and their districts? Mr. Joiner said the law is on the Parish Commission’s side, because parish governing authorities are allocated the power of determining voting precincts. They man them and they can change them. Since the School Board is not a parish governing authority, it has to play by the Commission’s rules. Mr. Rachal asked if he could get a map that shows the precincts in his district. Mr. Joiner announced that each board member will get maps of all the individual districts.

Mrs. Crawford stated that last time Mr. Joiner visited with the board on the variations of +/-5% and if board members are within that range, will the district stay the same? Mr. Joiner responded no, because if a district is fine, but a surrounding district(s) are facing change, it is possible that an o.k. district will gain some precincts. Mrs. Crawford asked if it is necessary for her to attend a meeting of representatives from District 7? Mr. Joiner explained that he will be meeting with board members individually followed by a meeting with school board and commission representatives. Following these meetings and a viable plan for the commission and school board, community meetings will be scheduled to get the public’s input as well.

Mrs. Armstrong stated that she understands we are looking at the percentage of deviation and it is 5 percent; and if she is 10+ and districts 10 and 12 are at 3%, she would lose precincts and districts 10 and 12 would gain precincts. Mr. Joiner said that is almost correct and shared details of what 10 and 12 can accept in order to have buffers and allow room to grow. He also shared how changes in one district will ultimately affect the remaining school board districts. Mrs. Armstrong shared with the board that she has been through this process with Mr. Joiner at least twice and she knows he will serve the board well through this process.

Mr. Joiner reminded board members to email him any concerns and he will begin scheduling individual and group meetings to discuss and relay each other’s concerns. He also stated he will work closely with the District Attorney to work through the legalities of the submissions.

ESTABLISH THE AGENDA AND CONSENT AGENDA FOR THE APRIL 19, 2011 CPSB MEETING

Superintendent Dawkins shared with the board the following items for the board’s consideration at the April 19, 2011 CPSB meeting.

**Additions**

Ms. Priest added an item to schedule 2011-12 Budget Work Sessions on April 13 and 18. Mr. Abrams reminded Ms. Priest that the board will not meet until the 19th. Ms. Priest added the item without the dates and announced that she will provide board members with the dates.

Ms. Priest also added Superintendent’s Contract Extension to the agenda for April 19th.

**Presentations and Recognitions.** Mrs. Armstrong asked that the Keithville Girls and Boys City Championship Teams be recognized at the meeting. Superintendent Dawkins responded that staff will contact the principal.
**Bids.** Ms. Priest asked about the truck maintenance for $117,000 and the item truck maintenance for $75,000? Tim Graham explained an adjustment was made, and there is only one truck in the bid pricing and it will be for the $75,000 truck only.

Mr. Riall asked about the $3.2 million and what does it cover? Mr. Graham explained that this is an annual estimated expenditure for Food Service and we typically bid it out for the upcoming school year, for the whole year.

Mrs. Armstrong inquired as to who is doing the truck maintenance and if the one listed is a refrigerated delivery truck? Mr. Graham said it is a dump truck, and it is for the Maintenance Department. Mrs. Armstrong asked for further clarification. Mr. Graham explained that the current dump truck is over 16 years old and has over 300,000 miles. Mrs. Armstrong asked if we outsource the maintenance, and Mr. Graham responded no we don’t and this is a new truck for the Maintenance Department.

**Revisions to CPSB Policy GCG.** Mrs. Crawford asked for clarification and if this addresses the appeal process? She noted the portion of the policy that states the teacher is allowed to present documentary evidence and it sounds as if there are two meetings. Mr. Abrams explained that it’s not an appeal, but this cleans up the process. The rules currently state that the superintendent will provide a recommendation to the board with valid reasons for termination, which we have done. He further stated that it is being recommended to change the policy and create an opportunity for the employee to provide any evidence they may have to refute or rebut something the superintendent presented. Mr. Abrams explained that because of the process, generally it would be in an executive session or the employee would stand in open session and state their disagreement. This recommended revision to policy will provide notice to the teacher that they are being recommended for termination with the reasons 20 days prior to presentation to the board, and then the superintendent will provide reasons and documentation to the employee and they have 5 days before the board is to take action to submit a rebuttal. When the board meets, the information will be provided on BoardDocs and a decision made based on the information presented. Mrs. Crawford confirmed that it is in writing and nothing is oral and Mr. Abrams confirmed that is correct.

**Revision to Policy GBM.** Mr. Ramsey stated he has in the past asked for revisions to this policy, and agrees with everything the attorney has done at this point; but asked that this be postponed until May to allow legal counsel time to further refine this policy in Levels 1-4 and determine if the process can be streamlined further. Mr. Abrams said he talked with Mr. Ramsey and believes revisions can be made to streamline this process. Mr. Abrams said he also talked to the employee organizations and will continue to do so regarding modifications to the process.

Mr. Hooks shared his agreement with Mr. Abrams and believes this can be done. He believes our employees need to be afforded the opportunity to be heard.

**Battle on the Border Football Showcase.** Alan Carter, supervisor, explained that the City of Shreveport came up with the idea of Battle on the Border and invited six teams to play at Independence Stadium, and one of the teams is from Caddo Parish. Mr. Carter said they are asking that the Caddo Parish School Board give the right to negotiate the contracts, which is a formality in Caddo. Mrs. Armstrong confirmed that it will be local and Mr. Carter said it will.

**Caddo Educational Excellence Fund.** Mrs. Crawley stated that last year this committee met and requested that this money be used for teachers, and asked if it can be used for this year’s budget. Dr. Dawkins stated we can possibly use some of the money, but it wasn’t $600,000. Mr. Lee explained that last year it was about $18,000 and the committee decided not to distribute any of the funds. She asked how much money is expected, and Mr. Lee said it will be $80,000 to $100,000 but it cannot be transferred to the General Fund, and it must be distributed through the CEEF fund. Dr. Dawkins reported that the guidelines will be provided to board members.

Mrs. Armstrong reminded the board that we can only spend the interest; and because this amount was so small last year, a decision was made to not touch it but put this year’s interest with it.

Mrs. Bell said that Joyce Bowman phoned her about this interest to discuss the fact that since the Caddo Parish School Board is faced with a $20 million deficit, she believes legislation can be
introduced to turn this process around and use these funds in the event of an emergency. Mrs. Bell stated that it may be necessary for us to appear before the Legislators to pursue this.

Mrs. Crawford asked if principals can be told that this money must be used for the teachers. Mr. Lee responded that it will be the board and superintendent’s decision, and it must be used for instructional enhancements.

Mr. Riall asked Mr. Lee how many type funds does Caddo have where it can only spend the interest? Mr. Lee said the CEEF is the only one. Mr. Riall asked him to clarify where this fund originates? Mr. Lee said it comes from the casinos in Caddo Parish and the money goes into a trust. Every January a committee looks at what the interest for the year might be. Mr. Riall asked if the principle continues to grow? Mr. Lee responded that is correct.

Ms. Priest stated that Commissioner Bowman discussed this and a trip to the Legislature may be necessary to discuss and present our proposal.

Mr. Abrams explained that the district was contacted and the possibility of changing a local bill was advertised. He further explained that the intent is in the event of an emergency situation to come up with an act that would allow the Caddo Parish School Board an open window during which this money would be available and how much would be available.

Mr. Riall asked how much does the principle grow each year? Mr. Lee responded that it has been slow over the past few years because of the economy, but it grows approximately $800,000 to $1 million each year.

**Pepsi Beverage Contract with Fair Park.** Mr. Abrams explained this is the basic beverage contract providing $2,000 up front and another $2,000 at the end of the year with a commission of 30% based on the amount of sales. He said it is a 3-year contract with a 2-year extension.

**Extension of Superintendent’s Contract.** Mr. Abrams announced that he will meet with the superintendent to discuss his contract, because state law requires that the board, 90 days before the expiration of his contract, contact the superintendent as to whether or not the board will renew or extend his contract.

**CONFIRM THE CONSENT AGENDA FOR APRIL 19, 2011 CPSB MEETING**

President Priest announced items 6.02, 7.01, 8.01-8.08, and 8.10-8.11 as the consent agenda. Mr. Riall moved, seconded by Ms. Priest, to approve the agenda and consent agenda for April 19, 2011 CPSB meeting as submitted. Vote on the motion carried.

**POLL AUDIENCE**

Daryl Roberson, Caddo Association of Educators, addressed the board on the proposed revisions to CPSB Policies GCG, GDG, and GBM. He thanked the board for postponing possible revisions to Policy GBM and asked that the employee organizations be kept in the loop when addressing revisions to these policies that affect Caddo’s employees.

Jackie Lansdale, Caddo Federation of Teachers/Support Personnel, expressed appreciation to the board for indulging to work on Policy GBM with the employee organizations. She invited board members to attend the Most Improved Student Banquet on Thursday, April 24th at C E Byrd High School, which is a time to recognize those children who have turned their lives around.

Jon Glover, employee, asked if item 8.07 on the agenda addresses employee salary increases? She also asked if information for the Superintendent’s Contract Extension will be available to the public and will they be aware of what the proposal might be? She also asked if additional monies will be included in the contract extension; and if so, where will these funds come from since the district is in a budget crisis?

**Adjournment.** Mr. Riall moved, seconded by Ms. Priest, to adjourn. Vote on the motion to adjourn carried and the meeting adjourned at approximately 6:07 p.m.
April 19, 2011

The Caddo Parish School Board (CPSB) met in regular session in its office at 1961 Midway, Shreveport, Louisiana at approximately 4:30 p.m. on Tuesday, April 19, 2011 with President Lillian Priest presiding and the following school board members present being a quorum: Steve Riall, Jasmine Green, Willie Burton, Charlotte Crawley, Curtis Hooks, Mary Trammel, Bonita Crawford, Barry Rachal, Larry Ramsey, Ginger Armstrong and Dottie Bell. Also present were Superintendent Gerald Dawkins and Legal Counsel Reginald Abrams. Ms. Priest led the prayer and Pledge of Allegiance.

PRESENTATIONS AND RECOGNITIONS

Tricia Grayson, director of marketing and communications, on behalf of the CPSB and staff, presented the following special recognitions. The president and superintendent greeted and presented each honoree with a certificate/award. Administrators, families and friends present were also recognized.

Recognition of High Schools Holding Blood Drives. Tricia Grayson presented to Superintendent Dawkins a plaque from LifeShare recognizing the staff and students at Caddo high schools who regularly give the gift of life to help others.

Future Business Leaders of America. The following students from Caddo Career and Technology Center were recognized for their outstanding accomplishment at the State’s FBLA Conference: Terrell Dedeaux, 1st Place, Accounting, Captain Shreve; and Connor Maloney, 1st Place, Cyber Security and Networking Concepts, Caddo Magnet.

Regional History Day Contest. Southwood High School students Kalee Jones, Velvet Fuller, Zanobia Hogan, Shadarrius Williams, Shadona Lathan, and Kristen Giglio were recognized as state winners in the History Day Contest. They also will compete in Washington, D.C. this summer. Mrs. Grayson explained these students design their project, conduct all the research including trips to the LSUS archives, and defend their project before a panel of judges. Summer McCall, Social Sciences teacher, won the PBS Teacher of Merit Award for this program.

Yale Distinguished Music Educator Award. Jessica Wright, music teacher at Arthur Circle, was congratulated for receiving the Yale Distinguished Music Educator Award.

Schools Recognized for Growth. Flags and letters from the state department were presented to the following schools for increasing their school performance scores. Recognized for Academic Growth were Fairfield Magnet, Kathy Barberousse, principal; J. S. Clark Microsociety, Patrick Greer, principal; and C. E. Byrd, Gerald Badgley, principal. Recognized for achieving Exemplary Academic Growth were Claiborne, Marilyn Johnson, principal; Eden Gardens, Janice Hughes, principal; South Highlands, Keith Burton, principal; Lakeshore, Travis Smith, principal; and Oak Park Microsociety, Sabrina Brown, principal. Mrs. Grayson also recognized Sabrina Brown for her recent recognition as one of the top 10 leaders in Shreveport worth knowing.

Southwest Shreveport Rotary. Gayle Flowers was recognized by the Southwest Shreveport Rotary Club (Charles Beaird and Ron Adams) as a Paul Harris Fellows, which means an endowment in the amount of $1,000 is added to the foundation in her honor, and for her tangible contributions and life that exemplifies the educational and humanitarian objectives of the Rotary Foundation. Mr. Beaird said that since founded in 1917, the foundation has received over $1 billion in contributions to further humanitarian needs, health, education, peace and understanding all over the world. Mr. Adams also commented that on April 28, 2011, the Caddo Career and Technology Center Foundation will present between 30 and 40 $1,500 scholarships to children. He said Mrs. Flowers was the inspiration behind this effort that began in 1996 with three $500
scholarships; and the Foundation will award the 514th $1500 scholarship on April 28, 2011. He Adams challenged the board to provide a scholarship in the Caddo Parish School Board name.

VISITORS

Jon Glover, employee, addressed the board on issues she feels the board should address that will impact the upcoming budget, i.e. the Superintendent’s Contract. She questioned the logic for voting on this today, when a budget work session is scheduled for tomorrow. She asked if, since the budget is in crisis, a renewal of this contract will not have additional funds attached and where will they come from? Ms. Glover also said that Vision 2020 is supposed to bring about a savings; however, those very savings are already designated for new projects such as building new schools and the likes thereof. She said that while this is being done, there still is no mention of a salary increase for support employees despite increases in gas, food, utilities, etc. She also noted the increases in the health insurance co-pay, in the premiums, and no increase in salary. Ms. Glover also questioned the possible reduction in work force, and encouraged the board to look at possible reductions through the sub employees, retirements and other attrition factors. She said if the team is to survive, everyone must come together and do their best in an effort to create world class schools for world class students despite the never-ending challenges.

Jiordano Maxie addressed the Superintendent’s Target Schools and Vision 2020 and how Green Oaks has and is being affected. He said Black History is the beginning of all history, Green Oaks is a part of history, and he believes Black History is missing from the world’s history books so no one will know how great they are. Mr. Maxie said the board can stop this from within so true Black progress can begin, because this is not about us, but it is about the students.

Scott Hughes, Alliance for Education, congratulated those schools recognized for academic growth, specifically Lakeshore and Oak Park, two true community schools. However, he noted that in May, Caddo will see that 50% of the Class of 2011 will not cross the stage. He addressed the superintendent’s contract on the agenda and that he doesn’t believe there is a real decision on this item today, since the board crossed that bridge two weeks ago with the Vision 2020 vote. He said he believes the board must renew the contract of the person they have chosen to provide leadership for this vision for Caddo schools. Mr. Hughes said that while he may disagree with the board’s vision, he respects the decision and choice to pick the district’s CEO. He also shared his concern about the options in the selection process: (1) why today, since over the next 30 days the board will look at a budget with access to academic data for the current school year, both important before engaging in a multi-year contract; (2) why only a 2-year commitment because if the board is truly committed to embarking on a community vision that is at least three years in the making, then why not contract with a leader for 3 years; and (3) what is the focus of the contract, because all he sees are changes that could best be described as exit strategy concerns and asked where is the focus on academic performance outcomes and fiscal responsibility?

Jackie Lansdale questioned only being allowed 3 minutes when the policy has been 5 minutes. Mrs. Crawley moved, seconded by Mr. Hooks, to overturn the ruling of the president. Vote on the motion carried with Board members Priest and Bell opposed. Mrs. Armstrong abstained.

Jackie Lansdale, Caddo Federation of Teachers/Support Personnel, addressed the information previously shared with the board on the percentage of new teachers, those hired since 2009, who have already left the district. Since that time, she explained they have also determined that 26% of this group has not only left the district but possibly the profession. She said she believes this affects the budget process and shared that national studies indicate that new teachers are 51% more likely to leave than their older colleagues, which costs the nation $7 billion annually, and in Caddo approximately $1.5 million. Mrs. Lansdale shared with the board how this should be addressed by explaining that there is a group of teachers referred to as Gen Y teachers and studies indicate that these teachers start out with the intention of making teaching a life long profession. In order for them to stay in this profession, Mrs. Lansdale said there is a need to provide them the opportunity to collaborate with their peers and to share successes and setbacks in a non-threatening manner. She said they are eager to draw from their colleagues from past generations as they want quality and frequent input, and not left to sink or swim by waiting for formalized evaluations. They need much more quick checkpoints to make certain they are on track and access to technology and other resources to help them facilitate student learning, professional development targeted to their needs, and evaluations that are not totally tied to standardized test scores. Mrs. Lansdale stated that these teachers want to be rewarded for
successes, and they want to stay in a profession where they can make a difference. She said these teachers want to make teaching their profession and to do that they need the board’s support, and all they are hearing is consideration of freezing their pay, taking their supply money, not honoring the incentive pay for AU school employees, and press releases about what will not be tolerated. Mrs. Lansdale stated their organization is concerned about the next generation of teachers, because they know those things they can and should do and believe their willingness to work with the district has been demonstrated in many ways. She said they will not sit passively by and see the profession diminished by the board’s decisions. She said there have been millions set aside by the board and millions spent on consultants and they will not tolerate the freezing of any salaries, teachers or support. She announced a press conference on Wednesday and their participation in a Legislative Day on Friday, April 28th. She also expressed appreciation for board members and staff who attended the 8th Annual Most Improved Student Awards and for their support.

Frederic Washington, former CPSS student, shared with the board and superintendent that over the years the board has expressed frustration with the State Department of Education, i.e. BESE and State Superintendent, and noted the board’s consensus that the SDE has made several revisions deemed irrational and insensitive to the concerns of LEAs such as the Caddo Parish School Board. Mr. Washington referenced repeated complaints by one Caddo Board Member regarding the total disrespect from State officials, and compared it to the same disrespect board members have for those who elected them to the seats in which they serve. He said the community cried out to the board and the board said one thing and did another, so he questions how the board can expect the State to show them respect when the board is not representing the people? He also shared his agreement that elected officials need to attend workshops, but he knows it was in bad taste for the district to send eight officials to California when it claims to have financial issues. Mr. Washington stated that while eight from Caddo Parish School Board attended the conference in San Francisco, he is the only one going to Baton Rouge to fight for education in Louisiana. He also addressed concern in the areas of leadership, excellence, accountability and dollars (LEAD) and referenced the summer of 2003 when he was leaving Hollywood to attend Booker T. Washington and how the district was facing the same financial issues under that superintendent as are being faced today. He also referenced the issue of buying a piece of land when we did not have a superintendent and when a superintendent came on board and many had received their pink slips, that superintendent reinstated 300 of the almost 400 employees with the remainder eliminated through attrition. He said he believes the action of that superintendent proved that a quick fix to off line schools and cut teacher resources is not the only option; and the district went from being in the red to being in the black, as well as improving morale and passing a bond to upgrade maintenance and central air. He said he hears many say we never had a plan; but if not having a plan gives this result, he believes it is better to have no plan than to have a wrong plan. Mr. Washington further compared board decisions to not give this particular superintendent an increase in salary, but when she left, the board hired a consultant firm that cost twice as much to hire a superintendent and pay that superintendent $200,000, thus his comment one plus one does not equal two.

John Milkovich addressed the board in opposition to renewing the superintendent’s contract and that his comments are not against an individual, but in favor of a new direction for the school system. He stated the people of this parish have had an agenda shoved down their throats that they do not believe in; and for the purposes of cost, he asked the board to not save us any more money if saving comes by plans such as the Vision 2020. With the board proposing to ask the property taxpayers for $600 million, and with the budget currently reflecting a $20 million deficit, he believes we are also going in the wrong direction when talking about closing North Caddo, Vivian, Oil City, Mooringsport, Timmons and Creswell, since closing schools causes communities to die. He suggested that the board get back to basics, i.e. values, respect and discipline, and noted principals in the system that have instituted these values in their schools with results. He said he believes what the board is looking at is a magic money cure to fix the educational system that will cost taxpayers $600 million, when leadership is what is needed.

ESTABLISH THE AGENDA AND THE CONSENT AGENDA

Superintendent Dawkins highlighted the items for the board’s consideration at today’s meeting. Ms. Priest announced that Item 8.10 “Approval of Beverage Contract with Pepsi – Fair Park” is pulled and the Level IV grievance under Executive Sessions is postponed. Ms. Priest announced that the consent agenda items are 6.02-6.03, 7.01, 8.01-8.08, 8.11 and 13.01-13.04. Mr. Riall
moved, seconded by Mrs. Crawford, to approve the consent agenda. Vote on the motion carried unanimously. The following is a summary of the board’s action.

**Item No. 6**

6.02 Requests for Leaves. The board approved the requests for leaves as recommended by the superintendent and submitted in the mailout.

6.03 Other Personnel Transactions Reports. The board approved the other personnel transactions reports for the period of February 26, 2011 through March 25, 2011 as submitted in the mailout.

**Item No. 7**

7.01 Bids (Purchasing). The board approved the following bids as recommended by staff and submitted in the mailout on the bid tabulation sheets: (1) Pliler International, totaling $75,278.16, for the purchase of Truck for Maintenance; (2) Conco Food, Gerlach Meat and Louisiana Food for the purchase of Canned and Frozen Food, Fish, Poultry, Eggs, Meat and Specialty; and (3) Carefree Janitorial, totaling $91,232.65; Conco Food, totaling $259,507.00; Long’s Preferred, totaling $2,379.70 and Louisiana Food, totaling $9,405.25 for the purchase of Food Service Paper and Supplies.

**Item No. 8**

8.01 Revision to CPSB Policy GCG (Probation and Tenure Teacher) and Proposed New Policy GCG-R (Probation and Tenure Termination Procedures). The board approved revisions to CPSB Policy GCG (Probation and Tenure Teacher) and the proposed new policy GCG-R (Probation and Tenure Termination Procedures) as submitted in the mailout.

8.02 Proposed Policy GDG (Probation and Tenure Bus Operator) and GDG-R (Probation and Tenure Bus Operator Termination Procedures). The board approved the proposed policy GDG (Probation and Tenure Bus Operator) and GDG-R (Probation and Tenure Bus Operator Termination Procedures) as submitted in the mailout.

8.03 Student Support Manual. The board approved the Student Support Manual as submitted in the mailout.

8.05 Battle on the Border High School Football Showcase. The board approved the resolution authorizing C.E. Byrd High School to enter into contract with the City of Shreveport for the Battle on the Border High School Football Showcase September 10, 2011 and September 8, 2012 as submitted in the mailout.

8.06 Shreveport Job Corps Cooperative Agreement 2011-12. The board approved the Cooperative Agreement between the Caddo Parish School Board and Shreveport Job Corps Center for 2011-12 as submitted in the mailout.

8.07 Approval of Employee Payment. The board approved payment to the temporary teacher terminated on September 28, 2010 for the difference between the certified teacher salary and substitute pay for September 29 – December 8, 2010 as recommended by the superintendent and submitted in the mailout.

8.08 OPEB Trust Investment Manager. The board approved Reliant Investment Management, LLC as the OPEB Trust Investment Manager as recommended by the superintendent and submitted in the mailout.

8.11 Youth Enrichment Program (YEP) Facilities Usage Agreement for 2011-12 SY. The board approved the facilities usage agreement between YEP and the CPSB for August 18, 2011 through May 31, 2012 as submitted in the mailout.
Item No. 13

13.01 Student Readmission Appeal Hearings. The board approved admitting students JH and DT into the Caddo Parish School System as the parents are in agreement with staff’s recommendation.

13.02 Reconsideration of termination of probationary teacher. The board moved that the request for reinstatement of WA be denied and that notice of Board’s action be sent to his last known address.

13.03 Recommendation of termination of probationary bus operator. The board moved that the probationary bus operator QD be terminated in accordance with recommendation of superintendent and that staff send notice of Board’s action to last known address.

13.04 Recommendation of termination of two (2) probationary teachers. The board approved that probationary teachers KJ and GA be terminated in accordance with recommendation of superintendent and that staff send notice of Board’s action to their last known address.

CADDIO EDUCATIONAL EXCELLENCE FUND

Jackie Lansdale, Caddo Federation of Teachers/Support Personnel, shared her concerns about the supply monies and that she has talked with Foster Campbell, as the originator of legislation creating the CEEF, and the possibility of using the interest from these funds for supply money for teachers, and Mr. Campbell said the district could. She stated that when looking at the recommendation from the committee that different portions will be given to different size schools, she wonders if the board is o.k. with this recommendation. Mrs. Lansdale asked if it would not be more feasible to take a lump sum of money from last year and this year and divide it among the certified employees and supplement to get to the $200 for each teacher, because the way it is set up now, some teachers will not receive anything. She also said she doesn’t believe this was discussed at the work session and encouraged the board to postpone this item until time is allowed to discuss further during budget considerations and to possibly look at dedicating this CEEF money as a permanent fixture for supply money every year, a steady funding source.

Mrs. Crawford moved, seconded by Mr. Rachal, to accept the recommendation. Mrs. Crawford asked for clarification on the total amount. Mr. Lee responded that it is approximately $55,000 which is the interest for last year and this year. He further explained this has been the process every year with a committee meeting and submitting a recommendation for the interest to the board for consideration. He added that last year the interest was way down and the committee made a recommendation to the board, that was approved by the board, to not distribute the interest last year but to hold it until this year. Mrs. Crawford asked if this is usually not done until budget time? Mr. Lee responded that it is usually presented to the board in March. Mrs. Crawley said at the work session the total was mentioned to be about $80,000. Mr. Lee explained that he thought the two years combined was approximately $80,000, but the actual is $55,000 for the two years. Mrs. Crawley said she doesn’t like to send the money straight to the principal for spending and not to the classroom. Mr. Rachal asked for the total amount for the $200 materials and supplies for teachers? Mr. Lee said it is approximately $600,000. Mr. Rachal asked if there is anything wrong with allocating these funds to offset the materials and supplies for teachers? Mr. Lee said we only have to insure that these funds are used for instructional enhancement.

Mr. Rachal moved, seconded by Mrs. Crawley, to postpone action on this item to allow time for further discussion. Mrs. Crawley said because board members are supposed to get the information at the work session and this is new information, she believes if the board votes on this tonight, it will not be following its own policy, and she is more in favor of looking at the budget when looking at these items.

Mrs. Bell said she believes we need to look at this in a way that we make sure the money goes to the teachers and every teacher gets the same amount.

Vote on the substitute motion to postpone carried unanimously.
SUPERINTENDENT’S CONTRACT EXTENSION

Mrs. Crawford moved, seconded by Mrs. Bell, that the superintendent employee contract be extended until August 11, 2013 and approved with the changes located at board members’ stations and placed on BoardDocs.

Mrs. Crawford stated that the board has evaluated and the scores came up and it is now time for the board to consider this no matter the timing, and she does not hesitate in making this motion. Mrs. Bell stated her agreement with Mrs. Crawford’s comments. She also said that when she came on the board all she heard was the need for change; and while everyone is not always receptive to change, change is necessary. This is what the board asked the superintendent to do, and she agrees we need to allow the superintendent to continue to do what was asked of him in the original contract.

Mr. Abrams shared with the board a copy of the extension of the superintendent’s contract; and to clarify comments relative to the timing, he explained that state law requires that prior to contract renewal, the board must renew or advise the superintendent whether or not the contract will be renewed 90 days before the contract’s expiration. The final date for this to happen is May 11th, and if the board does not, the superintendent gets an automatic one-year extension anyway. Mr. Abrams further explained that only the revisions to the contract are presented, as the complete contract includes the performance objectives. One provision in the contract extension addresses the superintendent’s annuity, and he explained that there has been an issue regarding this in the past relative to the superintendent’s ability to put funds into an annuity of his choice, there has been difficulty with the company handling annuities for the district; however, if this is an issue, it will be addressed. He said it could also possibly include a management fee if another company deals with it. Some of the additional revisions include various housekeeping matters, i.e. hearings, 2/3 vote for termination (which is required by state law), disability provision, renewal provision term of 6 months, etc. Other than these, the contract remains the same and it does not include any salary increases, or any of the other benefits.

Mrs. Crawley moved, seconded by Mr. Hooks, to postpone until May 3rd at a special called meeting. Mrs. Crawley stated she understands this must be done by May 11th but believes it’s a public perception issue. She said she appreciates the conditions of the contract, but she would like to begin the work on the budget. Mr. Hooks said he believes there are too many uncertainties at this time; and in calculating there are 12 AU schools; it appears there are more now than when the superintendent came, so he doesn’t understand the report of improvement.

Ms. Trammel asked for a point of order, and Mr. Abrams explained that the current discussion is on the postponement. Mr. Riall stated there are three board members who were not on the board when the original contract was approved; and he would like to see the original contract also.

Vote on the substitute motion to postpone failed with Board member Riall, Crawley and Hooks supporting the motion and Board members Green, Burton, Trammel, Priest, Crawford, Rachal, Ramsey, Armstrong and Bell opposed.

Mr. Rachal asked the superintendent about the request for six months and if at that time the district is in the middle of a project, would the superintendent be amiable to an extension of a month or more? Dr. Dawkins responded that he would be open to that discussion.

Mr. Hooks moved, seconded by Mrs. Crawley, that the CPSB extends the superintendent’s contract for a period of one calendar year. Mr. Hooks explained he believes there are many plans in a state of flux and there is a need for more time before making a decision. He further stated the board also voted in the Caddo Plan and he doesn’t believe the results from this plan will be seen until the current year’s test scores are received from the state. Mr. Hooks also stated that the board a month ago approved moving forward with the Vision 2020 plan and a budget has not been approved to go along with the plan. Also, Mr. Hooks reminded the board that the Vision 2020 plan has been submitted to BESE for approval and a response has not been received, nor have we heard from the Justice Department declaring the system unitary. He said in the budget process, it may become necessary to eliminate some positions; and the system’s long-term employees have not received a pay increase in two years, not even a step increase. In the upcoming months, the board will go to the voters to approve a $600 million bond issue; and at
this time, we are entering into the last contract under different conditions than the previous bond issue. Based on these reasons and other, Mr. Hooks asked the board to make a prudent decision.

Vote on the substitute motion to enter into a one-year contract extension failed with Board member Hooks supporting the motion and Board members Riall, Green, Burton, Crawley, Trammel, Priest, Crawford, Rachal, Ramsey, Armstrong and Bell opposed.

Ms. Trammel asked for clarification on why we are looking at a two-year versus a three-year extension. Dr. Dawkins explained that extensions are usually for one or two years. Ms. Trammel said because the board is working on a plan and it usually takes three years to set something in motion, she doesn’t understand why we are not looking at three years. Mr. Abrams explained that the board and superintendent can always extend and modify the contract at anytime; however, the board is limited by state law as to the length of a contract during a particular board’s term. If the board wishes to come back to extend the contract again, any board member can do so.

Mr. Hooks said that he was trying to comment on Mrs. Crawford’s comment and pressed the wrong button; and his vote should have been a “no” vote, because things will change because the results of the test scores will change.

Vote on the original motion carried with Board members Riall, Crawley and Hooks opposed and Board members Green, Burton, Trammel, Priest, Crawford, Rachal, Ramsey, Armstrong and Bell supporting the motion.

UPDATE ON SUPERINTENDENT’S TARGET SCHOOLS

The superintendent shared Mrs. Turner’s report on meetings with Dr. Amy Westbrook, RSD, and the administrative teams from the target schools. He said staff will be very disappointed if major gains are not seen in the scores because they are on track, monitoring has helped and support from Caddo’s own staff along with the State’s support staff has been very helpful.

ANNOUNCEMENTS AND REQUESTS

Mrs. Crawford announced that she is on the Legislative Committee for the LSBA Board of Directors and attended a meeting in Baton Rouge on Monday to discuss all the pre-filed bills. She said a copy of these pre-filed bills along with LSBA’s stance on each will be placed at board members’ stations on Wednesday, April 20th. She said it is possible to continue to post bills until May 4th and LSBA will continue to send notifications about these pieces of legislation.

Mrs. Bell applauded the Caddo students who performed in Yazzy on Friday evening. She also announced that these students will perform again at the end of the summer.

Miss Green stated that the CFT presented the Missile Award and asked the superintendent for information on the incentive pay for employees in the AU schools.

Mrs. Crawley said this is the first year that the day letters went out regarding magnet assignments she did not get a lot of phone calls. Mrs. Crawley also asked that the information received on consultant fees be revised to include the date the board approved these expenditures.

Larry Ramsey asked that the policy revision for GBM be placed on the May agenda.

Mr. Riall commented on a meeting held at North Caddo on Monday evening and questions including where the students at Hosston will move to, along with the five programs in place at Hosston. He also was asked how the district will utilize fewer substitutes.

Mr. Hooks stated his agreement with Mrs. Bell’s comments relative to the Yazzy Program and the outstanding job these students did. He also asked the superintendent to explain what will be done with the six graders? Dr. Dawkins explained staff is working to address these challenges.

Ms. Priest asked about the list of consultants and the possibility of identifying which ones are paid from grants and the grant name. President Priest reminded the board that the first budget
work session will be on Wednesday, April 20\textsuperscript{th}, from 4-6 p.m. The second session will be held on Tuesday, April 26, and the public is invited to attend these work sessions.

Ms. Priest also announced that the CPSB will host the Parish Intergovernmental Committee meeting (City Council, Caddo Parish Commission and the Caddo Parish School Board) on Friday, April 29\textsuperscript{th}, 11:30 a.m. at The Port. A tour of the Port is scheduled at 11:00 a.m. for those who are interested. Mr. Hooks announced he will be out of town on April 29\textsuperscript{th}.

\textbf{Adjournment.} Mr. Riall moved, seconded by Miss Green, to adjourn. Vote on the motion to adjourn carried and the meeting adjourned at approximately 6:15 p.m.

Dr. Gerald D. Dawkins, Secretary  
Lillian Priest, President
April 20, 2011

The Caddo Parish School Board (CPSB) held a special work session in its office at 1961 Midway, Shreveport, Louisiana at 4:00 p.m. on Wednesday, April 20, 2011 with President Lillian Priest presiding and the following school board members present being a quorum: Steve Riall, Jasmine Green, Willie Burton, Charlotte Crawley, Curtis Hooks, Mary Trammel, Bonita Crawford, Barry Rachal, Larry Ramsey, Ginger Armstrong and Dottie Bell. Also present were Secretary Gerald D. Dawkins, and Reginald Abrams, legal counsel. Ms. Priest led the prayer and Pledge of Allegiance.

President Priest announced that today’s meeting is scheduled for 4-6 p.m. and is the first in a series of work sessions on the 2011-12 fiscal year budget. She encouraged people to tune in, listen and attend meetings during this process. Ms. Priest stated that on February 1, 2011, the CPSB received its comprehensive financial annual report covering all the finances for the year ending June 30, 2010. The district is required to have an annual audit by an outside auditor and Caddo’s auditor is Allen, Green and Williamson. The comprehensive financial report includes the statement of assets, activities, governmental fund balance sheet, the governmental statement of revenue, expenditures, changes in fund balances, the General Fund ending fund balance, the capital assets and the long-term liabilities; and she announced that it was a clean audit. As the work session began, Ms. Priest said we are beginning anew as we go through the budget process for 2011-12. She also noted that board members received a copy to work with.

Superintendent Dawkins stated that staff appreciates the opportunity to share information as we move into the budget season. He said it is important to address comprehensively the issues facing the school district and this meeting is designed to address concerns expressed by the board, members of the community, and staff. He announced staff is prepared to schedule one hour work sessions with individual board members to review the financial statement since moving forward board members will receive this monthly. Dr. Dawkins also announced that tonight’s meeting staff will present the elements of the budget so everyone has a common understanding of the issues; and at a second budget work session on April 26th; staff will bring recommendations to the board on how to address the issues shared at this meeting.

Jim Lee, director of finance, shared background information for the benefit of the board members not familiar with the budget process. He began by stating there are many internal and external factors that affect the General Fund budget, with one of the biggest areas being the MFP (Minimum Foundation Program). He explained that 2011-12 will be the third consecutive year that BESE has taken a no growth MFP formula to the Legislature for approval. This will mean that the base per pupil amount that is given to the districts will not go up even though there is to be a 2.75% increase in the base per pupil amount each year. For the last two years, the Legislature has approved the no growth formula, and it is reported they will approve it for the coming school year as well. Mr. Lee reminded the board that the retirement expense was discussed with the board last year and detailed discussions will be held on this again this year. He said that retirement cost to the General Fund alone last year was approximately $12 million and the district’s cost this year will possibly be approximately $8 million, something that will definitely affect the budget. Also, health care costs continue to increase and reminded the board of discussions last year to change the plans and keep the increase down as much as possible; however, the district is ending its two-year contract with the providers, and an increase is anticipated for all policies, possibly up to $6-$7 million. Mr. Lee also addressed the many unfunded mandates, i.e. national certified stipends that the State Legislature gave to teachers but did not fund, remediation programs, as well as increases in the overall cost to operate the district (about $1 million a day), i.e. fuel, utilities, etc. He also addressed questions relative to designated and undesignated fund balances, balances in capital projects funds and debt service funds and if any of these funds can be transferred into the General Fund, and CEEF funds.

At this time, board members asked staff questions relative to the information presented to this point.

Mr. Rachal asked what insurances are included in the $6-$7 million increase in insurance? Mr. Lee responded it includes insurances that affect the employer portions for the district, i.e. health and life; and there is a possibility that this will increase. Mr. Rachal clarified that this has nothing to do with liability insurance, et.al., and Mr. Lee said it only has to do with employees health insurance. Mr. Rachal also asked about the retirement costs; and Mr. Lee indicated this is
not something the staff was to present at this time, but he can provide the requested information on Tuesday night. Mr. Rachal asked about the percent comparison from last year? Mr. Lee explained that in 2009 the employer contribution was 15.5% and it went up this year to 20.2% and next year 23.8%.

Mrs. Bell asked for clarification on the unfunded mandates and how much did the state pay before for the certified counselor positions? Mr. Lee explained that it was approximately $5,000 and the Caddo board approved to pay them approximately $1,000; however, at this time the district will pay approximately $6,000 because Caddo picked up the $5,000 the state dropped. He clarified this is for teachers and counselors only, and social workers, speech pathologists only get the $1,000. Mrs. Bell asked that staff provide the board with a list of other items that will increase in cost as a result of increase in fuel, etc. Mr. Lee stated that this would not affect the General Fund, but would affect the Child Nutrition Fund. Mrs. Bell also asked staff to clarify undesignated and designated funds. Mr. Lee shared an example of a fund the board set up years ago with $5 million in the event there was a catastrophe at one or more schools that would be used to help rebuild that particular school.

Mr. Riall asked what caused the increase in retirement costs? Mr. Lee referenced the OPEB trust fund where the district is establishing a fund for the future health care cost for the employees. He also noted the two main retirement systems are the Teacher Retirement System of Louisiana and the Louisiana School Employees Retirement, with the largest group being the teachers.

Mrs. Crawley stated that when the district began Vision 2020, someone brought to her attention the $1 million a day it takes to run the school system; and her awareness that several school systems have gone to 4-day weeks by adding an hour to the schedule. She believes if this saves $1 million a day, it is something she would love to get on board with.

Mr. Lee also reported there have been many questions on what have we done to get ourselves into this financial situation. Additional items affecting the district’s financial stability include less state funding, increases in retirement costs, as well as health care costs. Targeted schools have also seen an increase in expenditures.

Mrs. Armstrong asked if we will continue the added hour at the end of the school day? Dr. Dawkins responded that at this time it is still a part of the plan.

Mr. Ramsey asked staff to share with the board the details in the $15 million. Mr. Lee reported that he will bring this information to the April 26th meeting.

Mrs. Bell asked if someone signs a contract for three years, and they have one year left on the contract, will they receive that money (remainder of their incentive), because she believes they should?

Mr. Hooks asked about the incentives and sponsors of extra curricular activities. Mr. Lee explained it is only for the targeted schools. Dr. Dawkins explained that this amount is included in the budget presented. Mr. Hooks also asked about those who signed contracts and left to go to another school? Dr. Dawkins explained that if they are no longer working there, but are at another school, they would not be eligible for the incentive. Mr. Hooks asked about a teacher under a contract, but staff moves them to another school. Dr. Dawkins explained that if they are still at the AU school, their contract is still in place. Mr. Hooks said in talking about fairness, he doesn’t believe it’s fair when teachers come to a school for the incentive and they are transferred somewhere else.

Mr. Abrams explained that the only persons who signed contracts (with the AU schools) are the administrators and the contract is specific and states they can be moved by the school district; and if they are moved, they are not eligible for the incentive. He also stated that going into this, everyone is aware of where they are, so the fairness part is they agree to this when they came in.

Relative to national board certified teachers and counselors, President Priest asked that staff provide for the next meeting the breakdown of the number of counselors, number of teachers, and what schools they are in.
Mr. Rachal asked that staff provide the budgets for the past 3 years for comparisons and he also asked for numbers on the revenues we receive via millages. The superintendent announced that this information will be covered in the budget sessions. Mr. Rachal also noted that Senate Bill 6 is being proposed this session that would mandate all Louisiana school districts to continue to fund retirement for all teachers including those that leave the system and go to a charter school. Mr. Rachal encouraged board members to send the author of this legislation emails in opposition to this proposal.

Mrs. Crawley referenced contracts and the attorney’s explanation that only administrators sign contracts, because the teachers did sign an agreement at a faculty meeting and were told to leave it there without getting a copy. Whether it is verbal or not, she knows they agreed to it as did the board. She also said she believes the $11 million paid to consultants is the fourth largest issue that helped us get here on the budget and asked that it be added to the list.

Ms. Trammel asked about the incentive pay because after visiting several schools where the teachers receive this pay, there is a great deal of absenteeism; and she believes it should be in writing that those who receive this incentive money need to be at work. She asked if guidelines could be included in the agreement to address this matter?

Mrs. Bell clarified that her intent for bringing this up and to her it is the same whether it is a contract or an agreement. She also believes if someone signs up to go to a particular school and they no longer want to be there, then they should be removed from that school. Also, if the employee does not want to stay at that school for the length of the agreement, then the money (incentive) should not follow them. She said she agrees the contract or agreement should address absenteeism; and if it is not adhered to, administration has a right to move them.

Mr. Riall asked about the consultants and which ones are funded by grants, and if staff could define each consultant, which ones are funded by grants, etc. Dr. Dawkins responded that staff is presently working on responding to this request and it will be coming to the board.

Mr. Lee continued by explaining the difference between designated and undesignated fund balances, i.e. the undesignated fund balance is the amount we ended the current school year with ($4.8 million) and it can be used at the board’s discretion. It is not set aside for anything and is what is available above the expenditures in the budget. Reserve funds are designated for specific purposes and Caddo has several. Designated funds are put into place by the board at the recommendation of staff. Mr. Lee highlighted each of these funds: unemployment reserve and the workmen’s compensation reserve, which are set up in the event of a large unemployment rate; and the insurance reserve fund ($5 million) which are funds set aside in the event of a catastrophic event that may destroy any of the district’s schools and/or buildings. The data processing reserve fund is in the event something happens to the data center, we can insure the schools and central office are not out for any length of time. The technology enhancement fund was set up in conjunction with the Qualified School Construction Bonds the district received in 2009. The future retiree health care obligation (OPEB) includes the hiring of an investment manager (approved by the board) to reserve this by moving from the reserve fund into a trust fund. Once it is in an irrevocable trust fund, it can be used to reduce this liability. A reserve fund was established for the Filipino teachers to address immigration expenditures. All these reserve funds total approximately $33 million and $4.8 million in undesignated for a total fund balance of almost $38.5 million.

Ms. Priest stated her understanding that these designated funds cannot be used at the board’s discretion for other things the board or the general public may want to do; and the district has not spent this $34 million but has earmarked the $34 million for these specific purposes. The undesignated funds are those that can be spent at the board’s discretion, and Caddo’s projected fund balance is $38 million.

Mrs. Bell echoed Ms. Priest’s comments and that the board has not spent this money and she appreciates getting this information.

Mr. Riall asked Mr. Lee if we are self-insured on workmen’s compensation? Mr. Lee responded he will get this answer from risk management. At Mr. Riall’s request, Mr. Lee restated that in 2009 Caddo received, as part of the stimulus package, approximately $17 million for qualified school construction bonds to be used for specific purposes. The board accepted this, we received
it at zero interest, and we are paying it back over 15 years. Anticipating that during the 15 years, we would be able to pay that money back, the board allowed this money to be set aside to cover that debt in the event the General Fund had bad years.

Mr. Hooks asked the superintendent about the $16 million that Joyce Bowman brought to our attention and if there is anyway we can add something to this and give the employees some type of supplement? Dr. Dawkins stated he believes it is necessary to see the whole picture and when this process is complete and there is a time where it is possible, he will make a recommendation; however, at this time, there are some things that need to be addressed before this is considered.

Mr. Rachal shared information with the board on State Senator Butch Gautreaux and asked staff for more details on the purpose of the data processing reserve fund? Mr. Lee was not sure exactly when this fund was implemented, but he assured Mr. Rachal that he would have the report at the Tuesday budget work session. The data center at Central Office controls everything from the General Ledger, payroll, student information systems for all the computers at all the schools. If there should be a fire, or some other catastrophe, Mr. Lee said it is set aside to rebuild the data center if the need arrives. Mr. Rachal asked if this is something we continue to contribute to and Mr. Lee responded it is not other than any interest that may be earned. Mr. Rachal asked if the district did not recently receive some additional revenue that could be used to help upgrade the Caddo systems? Mr. Lee explained it is the Qualified School Construction Bonds. Mr. Rachal asked if it is necessary to continue to carry this fund; if so, do we need to carry this amount in the fund, have we ever had to use it? Mr. Lee compared it to an insurance policy that you may never touch, but in the event we need it, it is available to help in a financial crisis. Mr. Rachal asked if it is possible to justify the number presented. Dr. Dawkins responded that staff continues to look at the numbers and possibly dropping the expenditure is a great suggestion. Mr. Lee said he will look at this over the weekend and will provide an answer.

Mr. Rachal also asked about the same scenario with the unemployment fund. Mr. Lee responded that staff will get with the superintendent to fine tune the amounts in the reserve funds to determine what is actually an adequate balance in these reserve funds. Mr. Rachal also asked the board attorney when he believes Caddo will be in the clear of the Filipino reserve fund? Mr. Abrams said he believes it may be this year and the Department of Labor is aware of this fund, but we have not received any response to date. Mr. Rachal asked if the superintendent will advise that the district continue to maintain this. Dr. Dawkins responded that staff will continue to monitor and his recommendation will be to continue with this because there are some unknowns.

Mrs. Crawley asked if the insurance reserve and the data center reserve are a double reserve, because if something happened to the data center, couldn’t the insurance fund be used? Mr. Lee responded staff is looking at all these funds very closely.

Mr. Riall asked Mr. Lee about the proposed $20 million deficit and if this will be based on the undesignated fund balance? Mr. Lee responded that is correct. Mr. Riall asked about those funds that may be moved from the designated funds into the undesignated fund balance and will they counteract? Mr. Lee said that is correct. Mr. Riall noted the importance placed on the undesignated fund balance, i.e. bond ratings, etc.

Mr. Hooks asked if any of the technology reserve funds are being spent to improve the program at the Caddo Middle Career and Technology Center? Mr. Lee responded this money is not; however, the loan Caddo received affected every school, so a portion did go to the CMCTC.

Mr. Ramsey asked for clarification that staff is scrubbing every area possible and will bring to the board those things that can and will be eliminated and if this information will be available at the next meeting? Dr. Dawkins responded that staff will have an incomplete list of those items being considered with a cost attached to it. Mr. Ramsey said that is what he is looking to see. Dr. Dawkins further explained that the intent for this work session was to give everyone a common background on where the district is because numerous questions have come from the board members relative to the information presented tonight.

Relative to the capital projects fund, Mr. Lee explained that Caddo presently has three different capital project funds. The first fund is for parishwide projects and is funded by property tax millages that generate approximately $16 million each year for capital projects, improvements at
the schools and based on propositions approved by the voters for construction, renovation, repair and maintenance of facilities. He explained that Caddo received in 2009 $17 million in Qualified School Construction Bonds; and based on what the government requires, these can be used for improvements to the facilities and infrastructure only. The construction funds are those funds left over from the air conditioning bonds and can be used only to replace the old window air conditioning units or for lighting retrofit. He said the balance in these areas totals approximately $23 million.

Mrs. Bell thanked staff for explaining this to the board so the board is aware what is available to use and what is not.

Mr. Riall asked Mr. Lee about the Qualified School Construction fund ($17 million) and the Technology Enhancement Fund ($16,700,000) set aside to pay for it and if we have spent this amount? Mr. Lee responded we have spent approximately $14 million earmarked, but construction has not happened at this time. Mr. Riall asked if we have begun to repay these funds? Mr. Lee said yes, and this year the $1.1 million will be paid from capital projects.

Miss Green asked staff how the money received in 2009 for capital projects and infrastructure, was broken down and prioritized? Mr. Lee responded that most of the funds are used for infrastructure, wiring for electrical and technology for all schools.

Mr. Rachal asked about the $14 million and if we are preparing for the future and not hard wiring all these buildings? Steve White explained that the QSCB projects are being wired to support both a wireless and hard wired configuration in the classrooms – wireless to support 35 computers (33 for students, 1 for the teacher and 1 for teaching), and hard wire for the teacher location, the teaching device and one outlet that can distribute to the 33 additional computers. Mr. White said that all the common areas also will be supported with wireless. Mr. Rachal asked if it has been determined where these funds will actually be distributed? Mr. White said that bids will be let next month in order to implement over the summer in the remaining high schools, middle schools and elementary schools.

Mrs. Crawley asked if we are going to do anything at the middle schools scheduled to close? Mr. White said if a middle school is scheduled to close with the implementation of the Vision 2020 plan, then it was excluded from this. He also stated that he does not recommend removing what is in place at middle schools that will be closed next year (i.e. Bethune), because in the event a bond issue is passed, space may be needed when moving students out of schools for renovations. Mrs. Crawley asked that time be allowed for cleaning up projects at the end of construction and before students begin arriving for the start of school. She also asked about the $16,750,000 set aside to pay back for the technology and she doesn’t understand why it was taken out of General Fund and not this fund. Mr. Lee explained that it was taken out of General Fund, but the QSCB funds were transferred back into the General Fund. Mr. White also stated that the board approved a line item in the capital projects fund for the QSCB funds.

Miss Green asked Mr. Lee about the assessment that is made on transferring capital projects funds? Mr. Lee responded that technology and capital projects go to the schools and assess what each has. Mr. White explained that this is a continuation of QSCB 3 which included all the high schools that were not in the targeted schools group, and then completed the middle schools and the elementary schools. At this time, there may not be enough to complete all the elementary schools, but seeking additional QSCB funds in the future might be a possibility. Dr. Dawkins reminded the board that in addition to these assessments, staff prioritizes as well the other projects based on health and safety issues.

Mr. Hooks asked Mr. White if there are plans to renovate Fair Park? Mr. White responded there are and it is included in Vision 2020 Phase III if a bond issue is approved. Mr. Hooks stated that he would like to get with Mr. White regarding this since Fair Park is on the National Historic Register. Dr. Dawkins assured Mr. Hooks that if we get to that phase of the plan there will be meetings with the communities on how to address needs.

Ms. Priest asked about the debt service fund and Mr. Lee explained that this fund is used only to repay outstanding General Obligation Bonds. Mr. Lee said there is approximately $110 million outstanding in General Obligation bonds; and it is similar to capital projects and is established by a property tax approved every year when the board approves the millage. As the district repays
the debt and it does not incur any additional debt, the district will eventually reduce this. Mr. Rachal asked for an updated list on what millages we have and the dates they are scheduled for renewals.

Mr. Riall asked Mr. Lee about the total millage, and he responded it is approximately 78 mils.

Mr. Lee shared with the board that the CEEF (Caddo Educational Excellence Fund) is monies (fees) from the two riverboats in Caddo Parish that are deposited in a permanent trust fund. The current law states that we cannot touch the principle, but each year we draw the interest and distribute it to the schools for instructional enhancements. He explained that a committee meets and recommends how these funds should be distributed to the schools.

Mrs. Bell announced to everyone that Joyce Bowman has advised that she is on top of this issue to hopefully get it changed, working with the attorney to address how this fund is set up.

Mr. Rachal stated for the record that if we do get any of this money, he will only support it for one-time expenditures and not recurring expenses.

Mr. Riall asked how long has Caddo been receiving this money? Mr. Lee replied since 1997. Mr. Riall asked how much does Caddo receive each year, and Mr. Lee explained that this amount varies and is based on the current interest rate. He said last year’s and this year’s total is $55,000; however, in past years the district has received one-half a million dollars. Mr. Riall asked if these two casinos pull out, what happens to the money? Mr. Lee said the money belongs to the district and is there for as long as it will last.

Mrs. Armstrong asked if she understands correctly that someone is pursuing the possibility of getting the funds in the permanent trust? Mrs. Bell explained that Joyce Bowman told her she worked to get this money for the school system to help in education; and she doesn’t understand why, if there is a need, the district cannot have access to some of the money to help during this financial crisis. Ms. Priest asked the superintendent, finance and the board’s attorney to take the lead in this matter, investigate it, talk to the right people, and bring back recommendations to the board. Mrs. Armstrong asked if she understands the stipulations will remain the same and it will be used only for program enhancement at the school level? Mr. Lee said it would take a change in the law and would be dependent upon the wording of the modifications. Dr. Dawkins stated that Mr. Abrams has engaged in conversation with Mrs. Bowman and others on this matter.

Mrs. Armstrong asked if she understands correctly that someone is pursuing the possibility of getting the funds in the permanent trust? Mrs. Bell explained that Joyce Bowman told her she worked to get this money for the school system to help in education; and she doesn’t understand why, if there is a need, the district cannot have access to some of the money to help during this financial crisis. Ms. Priest asked the superintendent, finance and the board’s attorney to take the lead in this matter, investigate it, talk to the right people, and bring back recommendations to the board. Mrs. Armstrong asked if she understands the stipulations will remain the same and it will be used only for program enhancement at the school level? Mr. Lee said it would take a change in the law and would be dependent upon the wording of the modifications. Dr. Dawkins stated that Mr. Abrams has engaged in conversation with Mrs. Bowman and others on this matter.

Ms. Trammel asked if this fund ever matures? Mr. Lee said no but the district can only use the interest on the amount deposited. She asked if she understands it will be necessary to know the legalities before any decision can be made? Mr. Lee said it’s an attempt to change the laws and Dr. Dawkins added that is why it is critical that Mr. Abrams is involved.

Mrs. Crawley asked if this money is invested so we get the largest amount of interest? Mr. Lee said the highest interest rate possible was secured; and it must be structured in a way that we can draw all the interest every January. He added we don’t want to tie it up in a rate for two or three years; because as interest rates change, you do not want to be locked into something. Mrs. Crawley asked did we not in essence tie it up for two years because nothing was done with the interest last year since it was so low? Mr. Lee said by law we still had to draw the interest and move it into the operating fund, but a distribution was not made because it was so little.

Mr. Hooks stated that this information has been helpful and he now understands how this fund can and can not be used.

Mrs. Crawford asked if she understands the smaller schools are getting more per pupil than the larger schools? Mr. Lee said it is not based on a per student, but it is based on the number of students enrolled. Ms. Priest announced that she attended the committee meeting and that the decision on the recommendation was unanimous. Mr. Riall explained that the recommendation was any school with enrollment up to 600 students will get $750, schools with 600-1200 students will receive $850 and schools over 1200 will receive $950.

Ms. Trammel asked for clarification on the board’s action regarding the CEEF funds at the board meeting on April 19th? Ms. Priest explained that the board postponed action on this item.
Dr. Dawkins announced that he received some good news over the past couple of weeks and this will be noted in the presentation on the proposed budget. Mr. Lee shared with the board the last three years actual results and the current budget as it stands last year and the proposed budget for the 2011-12 school year reflecting a deficit of approximately $14 million as opposed to the original $20 million deficit. He explained that this difference is due to some change in revenues that were not expected, and it will come to the board in the form of a formal budget revision. He explained that this budget does not yet reflect all the requests made for next year. Mr. Lee further explained how staff arrives at a projected budget by looking at those items they know will change, i.e. increase in retirement, increase in health care, changes in MFP, etc.

Mr. Ramsey asked if these are recurring revenues or one-time windfall? Mr. Lee said yes and no. Mr. Ramsey asked staff to continue to maintain the conservative approach in the property taxes. In going through the budget sessions, Mr. Ramsey asked staff to structure a two or three year reduction plan; because despite the numbers, it appears the current expenses far exceed the recurring revenues and the shortfall is still far greater than the projected $14 million; and, if we don’t address this difference, the district will continue to have these problems. Dr. Dawkins restated that his opening comment was that this was only a bit of good news, and there is a monumental task ahead and staff will bring to the board recommendations in areas that staff is looking at. Mr. Lee stated that in years past the district had the luxury of assuming it would receive a decent increase in state funding; but noted the reduction in the last few years in this amount. He also shared with the board the sources of revenue as follows: local (property and sales taxes), state (MFP and some others), and federal (miscellaneous grants, ROTC salaries, etc.).

Mr. Ramsey asked if staff looked at the total revenues, total expenditures and the total of $35 million; because while it may be possible to pull some of the reserves, the board should be wise in what it does because there is not a lot of slack to pull from in the funds he has looked at.

Mr. Rachal referenced the long-range planning and Vision 2020 and the savings in Phase I of the plan. Mr. Lee responded that the first phase (first year) after adjustments is approximately $5.2 million. Mr. Rachal asked if this amount is primarily in facilities, and Mr. Lee responded that it is in facilities, staffing, everything. Mr. Lee also explained that the savings numbers are not included in the first year’s numbers. Mr. Rachal asked if it is believed the state will continue to ask the district to fund unfunded mandates? Mr. Rachal said it appears the community continues to contribute more and more while the state continues to ask and give districts unfunded mandates, but is giving less and less. From 2007-08 to 11-12, he said the percentage from the local sources has increased by 10%.

Mr. Hooks asked Mr. Lee how much will we spend in the 2011-12 school year on the buildings being closed as well as those that are already closed, i.e. insurance, etc. Mr. Lee explained that the $5 million savings he presented is for the schools scheduled to go off line.

Ms. Priest reminded the board that tonight’s meeting allowed for the board to receive the framework for the process for the 2011-12 budget year, and financial statements were provided for board members to review prior to the next scheduled budget work session on Tuesday, April 26th. She also said the process the administration and the board are following will allow the board to no longer sit idly by and allow others to develop the district’s message. She said this budget process is a new step for defining the district’s message; and while we will not be able to squash all the misinformation, the board and district will take its message to organizations, groups, rotary clubs, etc. and eliminate a lot of the bad information that gets out in the community.

There being no additional discussion, the meeting adjourned at approximately 6:05 p.m.
The Caddo Parish School Board (CPSB) held a special work session in its office at 1961 Midway, Shreveport, Louisiana at 4:00 p.m. on Tuesday, April 26, 2011 with President Lillian Priest presiding and the following school board members present being a quorum: Steve Riall, Jasmine Green, Willie Burton, Charlotte Crawley, Curtis Hooks, Mary Trammel, Bonita Crawford, Barry Rachal, Larry Ramsey, Ginger Armstrong and Dottie Bell. Also present were Secretary Gerald D. Dawkins, and Reginald Abrams, legal counsel. Ms. Priest led the prayer and Pledge of Allegiance.

President Priest announced that today continues discussions on the proposed budget for the 2011-12 school year. She shared with everyone that the board members who recently attended the National School Boards Association Annual Conference will give a full report at the May 3rd work session. She reported that the General Session speaker talked about what is happening in public education and that based on research and statistics that the NSBA has conducted, 78% of districts across the country have had to tighten their belts and cut their budgets. Ms. Priest reminded everyone that this is the exercise Caddo is now going through, but it is reality that must be faced.

Superintendent Dawkins stated that staff will today go through the second part of the proposed budget and share with everyone those areas that will be addressed through the budget process. He said the list shared tonight is not a complete list, but it is one that will continue to evolve. He said staff will present information and receive the board’s input along with the input from the Superintendent’s Advisory Group. He also encouraged board members to call staff with any questions they may have. Dr. Dawkins also stated that he will be asking the president to schedule additional budget work sessions to address the issues in the budget before staff finalizes a budget recommendation for the board’s consideration. The superintendent reminded everyone that it is staff’s goal to present to the board a balanced budget as well as a reasonable fund balance and to ensure the long-term fiscal health of the school district through the budget process and through the fund balance restoration plan.

Mr. Lee began the presentation by reminding everyone where the last work session ended with discussion on the budget projection for next year of approximately $14 million deficit. He shared responses to board members’ questions from the first budget work session, i.e. breakdown of the eight millages Caddo currently has, and when each expires; because at that time, the board would need to decide whether or not it wishes to go to the voters to renew them. Mrs. Bell asked that she be scheduled for a one-on-one meeting on this topic so she can better understand it.

Mr. Rachal noted that 17.34 and 6.95 mils (24+ mils) will go to the voters next year and this is over 1/3 of the total millage. He asked Jim Lee to explain how much 1 mil generates for the district? Mr. Lee said he will call or have this information by the next meeting. Mr. Rachal said that he would like to see a breakdown of the mils. Mr. Lee explained that when staff provides the board with a full budget package each year, it will include a very detailed breakdown of all the revenue lines and millages. Mr. Rachal stated that the three years he wishes to have copies of and to discuss has details. Mr. Lee indicated he will have this information available by the next meeting.

Mr. Lee noted that several board members have asked many questions regarding the unfunded mandates and shared with the board a list of the top seven or eight that Caddo receives little or no funding on anymore, i.e. National Certified Teachers and Counselors (including benefits), remediation, health care costs, retirement system increases, leaves. Ms. Priest asked Mr. Lee how easy is it to go on sabbatical leave, and what is the criteria? She stated that she assumed sabbatical leaves were for pursuing study. Mrs. Holliday responded that sabbatical leave is a state law and is provided for those who hold a teaching certificate. These employees must serve at least three years (six consecutive semesters) to be eligible for one semester sabbatical leave. She said that sabbatical leave can be taken for study or for medical reasons, with employees receiving 65% of their salary while on a sabbatical leave. If an employee has 12 consecutive semesters, they can take up to a year. Mrs. Holliday further explained that employees on sabbatical are required to return and work for the length of time on the sabbatical to fulfill the requirements of the sabbatical, and then an employee can become eligible for another sabbatical upon working the six or 12 consecutive semesters. Ms. Priest asked about the cost of health care and the law that says Caddo is responsible for the health care for persons that come to work in...
Caddo upon leaving another district no matter how long they may work for Caddo before retiring. Mr. Lee responded that there have been issues relative to those who have come late in their career to Caddo, they retire and they stay on Caddo’s plan. Mr. Lee explained that we have to offer the insurance benefits for those that retire from Caddo, but some districts that have set up a vesting schedule and in order to get the 75% that Caddo pays, you would need to have worked for Caddo "x" number of years. Ms. Priest asked why does Caddo not have such a schedule? Mr. Lee responded that one draw might have been the concern that it would be detrimental to recruiting. Randy Watson shared from an insurance perspective that anything that will reduce costs we would be supportive of; however, until recently, Caddo has had a difficult time in recruiting highly qualified teachers. Since we do have to offer insurance, some districts have stepped out and said they will charge a higher employee portion of the premium. Mr. Watson added that health care reform is on the horizon and any changes made to our premiums and benefits will jeopardize Caddo’s grandfather status, thus it would be very treacherous in his opinion to step out at this time and make any changes to Caddo’s plan. Ms. Priest stated she understands the health care costs and the competitiveness for teachers; however, when talking about finances and the projected increase, these are things to talk about. Mr. Watson said that statistics have shown, there is only a small percentage of people that came to work for Caddo and worked less than five years in Caddo; and many of those retired because of health reasons. He also stated that the only abuse Caddo has seen was during the aftermath of Katrina. Dr. Dawkins added that it is something that can be looked at in moving forward.

Mrs. Bell asked if there is a policy whereby a teacher can begin teaching at the start of school, work a month, take a leave for a month, come back with continued doctor’s statements; however, this teacher is being seen working in the yard. In trying to save money, it is not right for this to be abused when a principal cannot hire a full time teacher to replace such a person. Dr. Robinson explained that there is policy that governs extended sick leave; and once an employee has used all their current and accumulated sick leave, they can go to extended sick leave.

Employees earn 90 days of extended sick leave every six years and at the end of the six years, the 90 days is renewed or placed back in the bank. Doctor notes are required after five days of absence and a doctor’s note is respected as such. Dr. Robinson stated that staff has heard stories of possible abuse; however, the security department does not investigate this type of thing and the staff respects the doctor’s notes and allow the employee to utilize the time that is verified by the physician as ill. Mrs. Bell stated she understands we respect the doctor’s notes; however when will this stop. She also asked if the doctor’s note is the only thing staff uses. Dr. Robinson said the doctor’s note is all that is required by policy. Mrs. Bell said as soon as the budget process is complete, she will be looking at this policy. Dr. Robinson said there are more cases where the extended leave is a benefit employee because there are employees that are honestly ill. Mrs. Bell asked if a person can take a sabbatical leave and teach in another parish? Dr. Robinson said they cannot. Mrs. Bell stated that she is aware of a case where a teacher has taken a sabbatical leave and is teaching in another parish full time. Dr. Robinson explained that someone can take a leave without pay, but not a sabbatical leave. Mrs. Bell asked about someone taking a year’s leave from Caddo and stating that they are coming back to Caddo and will teach full-time at another parish. Mrs. Bell stated she does not understand why we would hold a place (not fill with a permanent teacher) for someone that is teaching in another parish. Dr. Robinson responded that we are doing that. Mrs. Bell said she believes we need to look at this policy also. Dr. Robinson clarified that human resources always recommends that a person resign, but it is the employee’s choice. Mrs. Bell said she does not believe this is fair. Dr. Dawkins added that on the sick leave and sabbatical leaves, there are certain restrictions, and staff will be reviewing these in the policy review.

Mr. Abrams explained that leave without pay is approved by the board, so the board is the gatekeeper to this through the personnel transactions reports. He also stated that when the board is dealing with extended sick leave, it is provided for and our policy tracks identical the state statute, and there is no discretion. He further added that Caddo is following the state statute and what is required; but a couple of years ago, the state went in and made the extended sick leave go across a lot of those that were not covered before. It was also then the district saw increases in extended sick leave usage. He explained that the statute is what says what you rely on and that is why Caddo’s policy also says that. Mr. Abrams explained to the board that they cannot second guess that. Mrs. Bell asked about listed the board receives on these matters, but she doesn’t understand why the board members do not get this information. Mr. Abrams said he will look closer at this, make a decision and bring it to the board, but the superintendent makes a presentation to the board, through the personnel transaction reports, with a recommendation to
approve or not approve. Mrs. Bell said this is money and these are things that need addressed in the budget.

Mr. Rachal asked if staff could clarify the unfunded mandates for the health care cost? Mr. Lee explained that this is the unfunded retirement mandates. Mr. Rachal also inquired about the $40 million unfunded mandates in insurance costs. Mr. Lee said this is being called this because we have to provide insurance. Mr. Rachal stated to him this is a short list. Mr. Lee said he has looked at area school systems and these appear to be those that affect Caddo the most. Mr. Rachal inquired if there are others besides extended sick leave and sabbatical leaves that staff is looking at? Mr. Lee said the only additional one might be the catastrophic leave, which is something the board did in addition to the extended sick leave and it allows a certified employee to take 30 days extended sick leave at 50% their daily rate of pay. Mr. Rachal noted the cost to Caddo for charter schools and can’t this be classified as an unfunded mandate? Mr. Rachal asked for a total cost to the district for the two charter schools.

Mrs. Crawford referenced conversations when in south Louisiana regarding not granting sabbatical leaves, so if it is an unfunded mandate, does Caddo have that option? Mr. Lee stated he believes this requires a change in the Legislation; however Reggie Abrams referenced the policy and that he will research and provide an answer. Mr. Lee stated Caddo typically has approximately 15 sabbaticals a semester. Mrs. Crawford noted that the cost for these comes to approximately $70 million; and in addressing the requests for leaves, she doesn’t believe it’s worth cutting if it is not substantial, i.e. $600,000 for the $200 M&S. Mr. Lee said if you took 10 people on sabbatical for one year, it would mean about $650,000; for 15 people on sabbatical, the cost would be approximately $1 million. Mrs. Crawford asked if a teacher is on leave without pay, does Caddo pay their retirement? Mr. Lee said we do not.

Mrs. Armstrong asked if a person is required to get a certain number of college hours as well as present the results of the sabbatical study leave? She believes there should be something in place, if it is not already, to address failing these courses. Mrs. Holliday stated thatnine hours are required for under graduate study and six hours are required for graduate study. Mr. Lee said they not only have to pay back the 65% salary they earned while on leave, but also the benefits Caddo paid for them. Mrs. Armstrong asked if the 35% they do not earn while on leave goes toward the substitute used during their absence, and Mrs. Holliday said that is correct. Mrs. Holliday explained that the principal is able to replace the teacher with a certified teacher, not necessarily a substitute, and pay them full teacher pay.

Mr. Hooks shared that when he had teachers abuse leaves, he would always help them by showing them they were wrong or the street. He said this was going on long before Superintendent Dawkins came to Caddo.

Miss Green asked if someone is on sabbatical, does she understand that the position is not filled with a substitute, but a substitute teacher? Mrs. Holliday said if one is available, they can be hired. Miss Green asked who fills positions on extended sick leave? Mr. Lee stated that is filled with a substitute. Miss Green asked about substitute pay before the 10 days? Mr. White responded that substitute pay is $55 a day for diploma, $60 for a two-year associate degree, and $75 a day for a bachelor’s degree. After 10 days, it is classified as long term and long-term subs with a bachelor’s degree are paid $100 a day, and without a bachelor’s degree is $90 a day.

Ms. Trammel asked if staff has an answer to the question from the first budget meeting regarding Caddo being self-insured? Mr. Lee stated he is still working on getting this answer. Ms. Trammel asked how is money collected from employees who take sabbatical leaves and do not return to work? Mr. Lee responded that since it is typically a lot of money, especially if the leave was for a year, a payment plan can be set up for the employee to repay the money over the same length of time as the leave. Ms. Trammel asked if this is done by deducting it from the employee’s paycheck? Mr. Lee said we can deduct from their paycheck. Ms. Trammel asked if this process works, and Mr. Lee said it does.

Mr. Lee highlighted the cost of the superintendent’s targeted schools for the three-year period (2009-10, 2010-11, 2011-12). He explained that the total amount is $15 million and highlighted the breakdown by year.
Mrs. Bell asked staff if in starting a new school year, and some of the employees may leave the targeted schools, and we will hire new employees in their place, will these employees get the incentive for the one year? Dr. Dawkins stated that there is a three-year agreement with the targeted schools and the individuals working there will get the incentives. If someone comes in, they will fall under the one year. Mr. Lee noted that the amount shown is for three years and after the 2011-12 school year, the board will decide if the programs are continued.

Mrs. Crawley asked about the incentives and that the agreement was a certain amount for coming to the AU school and a certain amount for achievement. She asked staff if the amount reported is the actual amount paid out or is it the projected amount if there is total achievement? Mr. Lee responded that last year it is actual; however, this year is not complete yet, and next year is an estimate. Mrs. Crawley asked that the board members receive this information so they can see how we are achieving this and the actual breakdown of where the dollars went and determine if it is working. Dr. Dawkins responded that Mrs. Turner has the information and can share it with the board.

Mr. Rachal asked if he understands we are looking at three-year numbers and dealing with next year’s budget? Mr. Lee said that is correct. Mr. Rachal asked staff to break this out for next year. Mr. Lee said that is in the information staff will share with the board.

Mr. Hooks said the key word is achieving and for the teachers receiving incentive pay at the AU schools, should they be paid if they have not shown achievement for two years? Mr. Lee explained that the way it was set up we would pay the base amount, which is the largest portion, and if they reach their goals, there is an extra amount that is set aside for those.

Mrs. Bell asked about the RSD monitoring cost of $350,000 for three years? Dr. Dawkins confirmed that this is for three years and it is for the monitoring team and part of the MOU that the board agreed to. Mrs. Bell asked if this can be broken down? Mr. Lee reminded the board that when the MOUs for each school were approved, there were two different monitoring items that were built into the MOUs totaling approximately $46,000 a school each year. He explained that it has actually been more than the $350,000, but we have been reimbursed money from the first year, which reduced the cost. Mrs. Bell asked how long will Caddo be under these MOUs? The superintendent responded that as long as Caddo has schools not achieving the state-accepted score.

Mrs. Crawford asked if there is anyway the program cost amount can be reduced? Mr. Lee said it is all based on three-year contracts, and costs for materials, supplies, and the cost the vendor charges Caddo for using the programs, i.e. New Tech High School. Mrs. Crawford asked how much is coming out of the budget? Mr. Lee said it is roughly $1.5 million for the three years for the RSD monitoring and program costs, and about $500,000 is budgeted for next year with approximately $4.8 million for the incentives.

Mr. Riall asked Mr. Lee how many students are enrolled in the two charter schools? Mr. Lee said there are approximately 600. Mr. Riall asked if these schools can be operated in the black if we had those back? Mr. Lee responded probably not Linear because they have only 200 students. Mr. Riall asked about the timeline for the other MOUs? Mr. Lee said next year is the third year and the contracts were for three years.

Relative to the General Fund budget summary, Mr. Lee indicated this was the last thing the board saw at the last meeting; and he shared the three year actual figures and the proposed budget for this year, as well as next year’s projection. Mr. Lee also stated that he would be bringing to the board a revised budget recommendation for consideration during the month of May. Dr. Dawkins reminded the board that the $14 million deficit seen is what we must come up with in order to have a balanced budget and it does not include a fund balance which the district needs to have as well. Mr. Lee reiterated that what we are attempting to do is not only balance the budget, but to also rebuild our fund balance. Mr. Lee highlighted the breakdown of anticipated expenditures and reminded the board that instruction is the largest area and we are required by law to have at least 70% of the district’s expenditures in the instruction area. He said the large items in this area included instructional services bringing the percentage of the budget for instruction to approximately 78%, which is well above the target amount expected by the state. He also pointed out that an approximate amount for Central Office can be seen in the figure reflected in General Administration ($5.2 million) This includes the board, the
Mr. Riall asked staff to further explain the increase by approximately $50 million in the instructional services expenditures over a 5-year span and what was the student enrollment in 2007? Mr. Lee said it has not changed a lot. Mr. Riall asked why would we spend $50 million for the same number of students? Mr. Lee responded step increases, incentives for the target schools, and noted in the budget from last year the possible increase in staffing, etc.

Mr. Rachal asked if the $50 million includes benefits, health care, etc.? Mr. Lee said that is correct as well as the increase in the retirement. In 2008-09, where a substantial increase is reflected in “Revenues”, with most coming from the MFP. Mr. Rachal asked about the substantial change in the revenues, and noted the $23 million in 2008-09, asking what was put in this? Mr. Lee explained that because it was such a great year, the board authorized placing this money in reserve, i.e. technology account to repay the QSCB loans. Mr. Rachal also reiterated what the superintendent said and the board is not looking at just $14.5 million, but a lot more.

Mrs. Crawford asked staff when will the board see an adjusted budget showing the savings as a result of the Vision 2020 and facilities study, as well as the proposed cuts? Dr. Dawkins explained that some of this information is coming to the board later in the meeting; and while the board will not get the complete budget, as staff has not completed it, staff will be sharing with the board members where this process is.

Mr. Ramsey recommended that the line above the balance beginning of the year (excess/deficiencies of expenditures over revenue). Mr. Ramsey referenced conversations about the great ending balances in the district’s contingencies, but the fact is we have always been able to find more money than we have coming in. He said the prediction is we will spend $34.6 million more than we have coming in, and these expenses are recurring. He believes the deficiency is $35 million to get even, not $14.4, and he questions if $35 million is enough.

Mr. Hooks asked if the expenditures are board approved? Mr. Lee responded everything is approved by the budget and any changes once the budget is approved must come to the board for approval. Mr. Hooks asked why does he hear board members ask why and when if the board approved these?

Mr. Lee highlighted the current school year budget summary and noted the $4,400,000 that the district started the year with and how we finished the year, which is a projection at this time since we have not completed the current fiscal year. He said that he believes staff has been very close in their projection at this time. Mr. Lee also shared a list of items that staff has brought to the board for approval or that board members brought to the table and approved which altered the ending balance. Also affecting the ending balance are some increases in revenue in ad valorem taxes and the adjustment made as a result. Another adjustment was in the additional MFP as a result of the October 1 count and the Edujobs funds. Mr. Lee further explained that Caddo received the Edujobs aware of approximately $4.1 million and that there was also a direct reduction of our MFP for $4.1 million. Over spring break, the state notified the district of a supplemental Edujobs award of approximately $4.9 million of which $2.5 million would be reduced in the MFP funds. However, Caddo did receive additional one-time fund of $2.4 million which is new money. He also referred to the $12 million amount for 2010-11 and the projected beginning balance of $20 million, and stated that this is where expenditures are reviewed and predict what the next year will start off with. Most of the change from $12 to $20 million is as a result of the revisions presented and the additional revenue.

Mr. Rachal asked if he understands Caddo had a $4.1 million amount and a $4.9 million amount in Edujobs funds? Mr. Lee said that is correct. Mr. Rachal asked if the State Department received this $9 million? Mr. Lee explained that it went from the Federal Government through the State and the state allocated it. Mr. Rachal asked if the State was mandated on how the funds were to be used? Mr. Lee explained that there were guidelines for use as salary and benefits. Mr. Rachal asked if he understands correctly that $9 million should have been allocated to Caddo Parish and we received $2.4 million in new money. He asked where did the rest of the funds go?
Mr. Lee responded that the State reported a maintenance of effort issue and they had to shift money from MFP to higher education so they could meet the criteria for Federal funding in higher education. They reduced the MFP funding and then said they would give us the Edujobs funding which in essence replaced what they took from MFP. Mr. Rachal asked if the expenditures added total approximately $1 million over what was originally approved? Mr. Lee said that is correct and that staff will be asking the board to approve two additional items, i.e. monitoring and program cost for the target schools, and some additional expenses for high school graduation at the convention center. Mr. Rachal asked if the $650,000 will go to the State also? Mr. Lee responded a portion will and part of it is program cost, i.e. New Tech High, Paideia, and part of it goes to the RSD. Mr. Rachal asked how much goes to the State? Mr. Lee responded about a third of it.

Mrs. Crawford shared that when she went to Washington, D.C., she reviewed Edujobs language and it indicated you could not supplant state funds, and asked is this not what they are doing? Mrs. Crawford encouraged board members to email Vitter, Fleming, and Landrieu regarding this matter. Mr. Lee reminded the board that staff attended a joint session in Baton Rouge to dialogue on this matter and the explanation given was that if they did not shift the funds, we would not qualify for any of the funds. Ms. Priest reiterated that there was a group of staff and board members that attended to hopefully get a portion of the $147 million.

Dr. Dawkins stated that the final area covers the general fund budget and budgetary considerations and items staff is looking at with dollar amounts in an effort to begin shaping the General Fund budget. He announced that this work is ongoing and staff will be asking for additional budget work sessions. Included in the information being presented are those items staff is continuing to check on legal aspects or any other restrictions that might apply.

Mr. Lee stated that Phase I of the Vision 2020 plan and consolidation of schools are predicted to provide savings of approximately $7-7.5 million. Additional areas for possible savings include increasing the staffing formula by two at the high school level and by one at the middle school level, reducing the number of retirees returning to work by 75, cutting transportation to magnet schools, postponing the purchase of school buses and staff cars, reducing Central Office out-of-parish travel by 50%, reducing Central Office by 25 positions, and restructuring the purchasing and warehouse departments. Other considerations include restructuring the staffing at Building 6, more job embedded professional development, variations of school calendar models, additional staff reductions, and elimination of ineffective programs. Dr. Dawkins commented that the job embedded professional development was discussed with the employee organizations and ways in which the after school professional development could be eliminated, utilize the staff and eliminate some of the expenses associated with professional development. Dr. Dawkins commented that information has been received and staff is reviewing various school calendar models and ways the year can be structured. He said staff is currently looking at those things that are not working and will eliminate those that are not giving return on the investment. The superintendent also announced that additional meetings will be scheduled with principals, teachers, etc. to get additional information and suggestions. He also encouraged anyone with additional ideas to present them so staff can explore them.

Jim Lee said that while it is hoped the staffing numbers can be addressed through attrition, he knows it may not be possible on the support side and the implementation of the RIF policy could be possible. Dr. Dawkins reiterated that staff is trying to do everything possible by policy to avoid this situation; however, it may be necessary to bring such a recommendation to the board and this could be soon because of notification requirements associated with implementing this board policy. Mr. Rachal asked about the first three line items with the long-term planning in Vision 2020 and if the number reflected under the support side is what may not be able to handle through attrition. Mr. Lee said that is correct. Mr. Rachal asked if he understands correctly that the $7.5 million of the $19.9 million will be addressed through long-range planning? Mr. Lee responded that is correct. Mr. Rachal noted that to him it appears that the bulk of this is being addressed through the classroom and the teachers and he knows that at some point cuts will have to be in this area so that we do not go below the 70% mark. Mr. Rachal asked the superintendent about additional areas being looked at for cuts? Superintendent Dawkins explained that in looking at additional staff reductions, the focus is Central Office and every department is on the table for potential change. Mr. Lee reminded everyone that while a lot of this is staffing, 85% of the budget is people, and when making these kind of cuts, it is people that will be affected. Mr. Rachal noted that past budgets have reflected the numbers of employees in each area and he...
would like to see these again. Mr. Lee explained that this is done every year when the budget packet is brought to the board for approval and it incorporates any changes the board might make. Mr. Rachal asked staff when can the board expect to see this? Dr. Dawkins responded that the preliminary will possibly be some time in the next couple of weeks.

Mrs. Crawford asked if when staff looks to cut retirees, will it be cutting Central Office retirees or will staff also be cutting the retirees being used in the classroom? Dr. Dawkins responded that cuts will be made in every classification. Mrs. Crawford inquired if we will be looking at the math if there is a shortage there? The superintendent explained that staff actually has a list of approximately 100 retirees and there may be some specialized among those. Mrs. Crawford also asked for clarification on how cutting positions will affect the block schedule in high schools?

Mrs. Crawley stated to the superintendent that the board is accustomed to receiving the budget package and working from it, so they are aware oh how many you had last year compared to what is the projection for the coming year. She said she doesn’t believe this is the most productive type of budget meeting, because she believes you get the real productive ones when you have this package. Dr. Dawkins explained that this is a preliminary budget work session and to bring it all to the board at one time with the level of engagement of many people, notifying those who might be affected, it is important to be very deliberate and he takes full responsibility. He said when the draft budget is brought to the board it will include all the items included; however, he believed it to be very important to have a consistent understanding going into the budget process so everyone is on the same page relative to the elements. Mrs. Crawley stated that it appears the amount saved by making cuts at the 13 middle schools and the reduction of 25 Central Office employees are about the same amount of money, which tells her the Central Office employees are low-income persons. Dr. Dawkins explained that it is a mixture and some are classified, some certified; and this is a beginning number and this number may change. Mrs. Crawley asked about the cuts to high school and middle school because last year the areas cut were i.e. band, etc., and she wants to know if the same groups will be affected. Mrs. Crawley referenced the two policies relative to staff cars and if the district is compliant with staff members that have cars? Dr. Dawkins assured Mrs. Crawley that the district is compliant and there are approximately 11 vehicles assigned to staff with the remainder being trucks (200 +), all of which staff is looking into at this time. Mrs. Crawley asked about the 48 certified positions since the number of middle school students remains the same and they are only moving from the middle school to another building. Dr. Dawkins responded that this detailed information will be brought to the board; and while he cannot give those details from the top of his head, they were factored into the considerations. Mr. Lee added that HR has been working on this in compliance with the staffing formula. Mrs. Crawley shared with the board that she has done a lot of reading on the 4-day school week, and she learned that some states implemented this in the 70s. She also reported that a Texas Legislator is currently pushing it for the entire state of Texas. While she doesn’t agree with this decision coming from the state, she believes it is a local issue. She also noted the positives and negatives with the research and compared the year-round programs in Caddo. Her research also reflected that test scores did improve, as did graduation and absenteeism, and she believes it would save the district approximately $17.5 million.

Ms. Priest shared with the staff and board information from a presentation made at the National Conference by the Miami-Dade County School System who had a $150 million plus deficit. She reported on things they did to reduce their deficit as well as getting some buy in from the employees. She said they reported a lot of resistance initially, but they were able to get the buy in. She said they also worked closely with the principals at the schools; and she also shared that when at the city and going through budget cuts, administration would look to every department for cuts to be made. Dr. Dawkins reiterated that they will all have the same opportunity. Ms. Priest also asked if we are following Act 591 when looking at retirees so we are not penalized for not appropriately advertising the requirements associated with this Act. Ms. Priest announced she will bring to the board by next meeting additional information on how it is possible to reduce programs vs. eliminating programs, i.e. music, arts, etc.

Mr. Hooks said he needs to see a budget ahead of time to allow him time to study it and be prepared. He also referenced his request to receive a copy of the Superintendent’s Contract and all he received was a proposal. He shared with the Superintendent and the Superintendent assured him that someone would deliver it to him. However, he never received it. He encouraged everyone to stop jumping before looking and his agreement that the board needs the information weeks in advance. Dr. Dawkins explained that staff plans to have it to the board in
advance, even though the budget is not due until the June meeting. Staff’s plan is to have it to
the board in May following the work sessions. Mr. Hooks said he only asks so that he can read
and review it more than once. The superintendent added that staff intends to be very deliberate
with this and it will not be something that will be quick, but time allowed for needed dialogue,
and this process is developing the budget, not the budget. Mr. Hooks asked staff about the
suggestion to eliminate transportation for magnet students? Mr. Lee responded that Mr. Abrams
is looking at whether or not the district is required to provide transportation for students to
magnet schools as opposed to their home school.

Ms. Trammel stated that transportation at one point in time was not provided, and she asked if
this is a Federal or State mandate? Dr. Dawkins responded there are some mandates regarding
transportation, and there are also some legal requirements that Mr. Abrams is looking at as it
relates to the Consent Decree. He confirmed there are school districts across the country that do
not provide transportation in some programs, magnet schools being one of them. Ms. Trammel
clarified that her statement was not just transportation for magnet schools, but for other reasons
as well. Ms. Trammel referenced discussions on positions and people and that she would like to
see what positions are being affected and what areas. Ms. Trammel also asked that staff not
consider scattering staff in different locations. Dr. Dawkins explained that part of the plan is to
utilize facilities in other locations.

Mrs. Armstrong referenced the staffing formula and stated her understanding that this formula
was increased; however, she wants everyone to be mindful and closely monitor so that we are
not topping out some of the classes with so many students that a teacher cannot be successful
with those students in her classroom. She said as the district is moving into the new process, it is
important to monitor this very closely. She added that last year or year before there was a move
to a four-day work week for Central Office for the summer and a considerable savings was seen
as a result of that move. Mrs. Armstrong added that if four-day weeks are considered for the
remainder of the population in the School System, she believes we could possibly see a
substantial savings. Mrs. Armstrong also referenced, when looking at the school calendars, and
the calendar provided by Mrs. Crawley, there is a need to look very clearly at bus routes; and that
when they are being restructured, that one route is not being replaced by two buses.

Mrs. Bell referenced information she brought back from the National School Boards Association
Conference and that the San Francisco School District does not provide transportation for any of
its high school students. Referencing magnet schools, she believes it is by choice that parents
choose for their children to attend the magnet schools. Mrs. Bell also asked about some of the
teachers and the possibility of using them as substitutes and not going outside the public school
system. Regarding Professional Development, Ms. Bell stated she believes it to be important to
do a teacher academy for new teachers, even if it is one day a month.

Mr. Riall asked about the savings from Building 6, reduction in use of substitutes, Central
Office travel reductions, closing schools, and where this amount might be saved. Mr. Lee
explained that the information prepared to present to the board are those things staff would like
for the board to look at very closely.

Mr. Rachal asked staff to provide him with a total number of students affected (if transportation
is eliminated for magnet students), and track the quantity of students the district may lose, as
well as the net effect of the students in University.

Ms. Priest announced that Senior Recognition begins at 6:30 p.m. at East Ridge Country Club.
She announced that all public work sessions are being shown on the Live Feed and all are
couraged to follow these discussions on the budget.

There being no additional business, the meeting was adjourned at approximately 6:05 p.m.
The Caddo Parish School Board (CPSB) met in special session in its office at 1961 Midway, Shreveport, Louisiana at approximately 7:05 p.m. immediately following the executive committee/board work session on Tuesday, May 3, 2011 with First Vice President Riall presiding and the following school board members present being a quorum: Jasmine Green, Charlotte Crawley, Curtis Hooks, Mary Trammel, Bonita Crawford, Barry Rachal, Larry Ramsey, Ginger Armstrong and Dottie Bell. Also present were Dr. Gerald Dawkins, secretary, and Reginald Abrams, legal counsel. The prayer and pledge were omitted.

VISITORS

Leann Anglin stated that in working in a non-profit in the community, return on investment and transparency are two important phrases. She said these two things are expected of them and they hold them very high in their organization. Ms. Anglin shared with the board that due to the tough economic times, they have decided to do away with all transportation, even though there is value in learning from others around the nation. When listening to the board’s review of the national conference, she heard things she already knew; and asked the board if money is spent to send board members to these conferences, what are you hearing and what are you implementing upon return to home. She referenced the comments on community, not ignoring the voice of the community, productive conversation, and the importance of public confidence. She questioned the document the board discussed because she could not find it online; and while she knows it is not final because of revisions, she could not follow along in the discussion. Ms. Anglin said the public has good ideas, but they are unaware of what is happening. She also asked how will the responses to board members’ requests be made public, how will they be shared with the community. She noted the response of “we will look into it” and she would like to know how the public know will know what has been looked into and what is the final proposed plan. Ms. Anglin referenced Vision 2020 and the requirement for parental involvement and her attendance tonight instead of home with her family because she believes communication is part of that involvement. She asked the board to meet parents half way and provide the plan as well as what the board is looking at to the public.

Bids (Construction). Superintendent Dawkins presented proposed bids for repairing the foundation at Northside Elementary as well as Phase IV of the Lee Hedges Stadium repair. Mr. Ramsey moved, seconded by Mr. Rachal, to approve the following bids as submitted in the mailout on the bid tabulation sheets: (1) Henderson Construction with a Base Bid, for the sum total of $361,650 for Project 2011-073, “Northside Foundation Repair”; and (2) Venderberg Construction with a Base Bid and Alternate 1, for the sum total of $950,500 for Project 2012-204, “Lee Hedges Stadium Structural Repair to Stadium, Phase IV”. Vote on the motion carried unanimously.

Executive Session. Mrs. Bell moved, seconded by Mr. Rachal, to go into executive session for a Student Readmission Appeal for 15 minutes. Vote on the motion carried and the board went into executive session at approximately 7:15 p.m. The board reconvened in open session at approximately 7:28 p.m. Mr. Rachal moved, seconded by Mr. Hooks, to uphold staff’s recommendation with the stipulation that V.M. be given the opportunity to do his makeup work. Vote on the motion carried with Board member Crawley opposed and Board member Trammel abstaining.

Mrs. Crawley moved, seconded by Mr. Hooks, to uphold staff’s recommendation for R.H. Vote on the motion carried.

Adjournment. Mr. Rachal moved, seconded by Miss Green, to adjourn. Vote on the motion to adjourn carried and the meeting adjourned at approximately 7:30 p.m.

Dr. Gerald D. Dawkins, Secretary
Lillian Priest, President
May 3, 2011

The Executive Committee of the Caddo Parish School Board (CPSB) met in regular session in its office at 1961 Midway Street, Shreveport, Louisiana, at approximately 4:30 p.m. on Tuesday, May 3, 2011 with President Lillian Priest presiding and Steve Riall and Dottie Bell present being a quorum. Other school board members present were Jasmine Green, Willie Burton, Charlotte Crawley, Curtis Hooks, Mary Trammel, Bonita Crawford, Barry Rachal, Larry Ramsey and Ginger Armstrong. Also present were Secretary Gerald Dawkins, Legal Counsel Reginald Abrams, staff and other visitors. Mrs. Crawford led the invocation and Pledge of Allegiance.

PRESENTATIONS

National School Boards Association Annual Conference. President Priest announced that the 2011 National School Boards Association Annual Conference was recently held in San Francisco and board members who attended will share a report on information gained that can possibly be used in Caddo’s comprehensive planning. Ms. Priest explained that the National School Boards Association is a non-profit organization representing state associations and school districts fostering excellence and equity in public education through school board leadership. The eight basic areas this organization encompasses include establishing a clear vision of student achievement as priority, set standards for student performance, establish assessment and strong accountability, align resources, positive climate, collaborative relationships and continuous improvement. This organization also helps board members find solutions, demonstrate accountability and work together to improve student achievement. She reported there are over 14,000 school board members and superintendents from across the country that attend this annual conference each year. Keynote speakers at this year’s conference included former Secretary of State Condoleezza Rice, Lamar Burton, Daniel Pink, and Juan Enriquez. The following board members shared key highlights from the various workshops attended. Steve Riall reported that he attended a session on student transition from middle to high schools at which they shared the most difficult time in a student’s life is the transition from 8th grade to 9th and most of the high school drop outs occur in the 9th and 10th grades. He also shared that statistics show students fail the 9th grade more than any other grade and some of the reasons why 9th graders struggle at this point. One program that showed a higher success rate for 9th graders was the development of an orientation program for these students as they entered the 9th grade.

Mr. Riall also shared information from a work session he attended on characteristics of a highly effective rural school district that included schools who are on their own. He shared that he believes some of the things presented could relate to some of the schools in his district since they are so far out and sometimes feel they are out of sight and out of mind, and it is the communities and rural businesses that support these rural schools. A solid freshman year was highly stressed, as well as themed schools that provide a pathway for students, i.e. engineering, technology, etc., and courses pertinent to these careers taught with this in mind. Apprenticeships were also a part of this program to help students be prepared and ahead of the game when they graduated from high school. Mr. Riall stated he believes attendance at this meeting and sessions provided him with insight to many unique ideas that, if we choose, we could also incorporate in Caddo.

Miss Green reported that she attended a Learning by Design workshop and information shared included the importance of infrastructure in a student’s performance. She said it is known that creative environments are an important component of successful teaching and learning, and this creativity can be achieved through something as simple as lighting. Miss Green shared, for example, that lighting in a building should always be conducive to learning and how lighting can affect students, i.e. too bright will cause headaches, too dim can cause students not to focus. She also shared an example of a drama teacher not being able to get the students to participate, but when the auditorium was redesigned to look more like a stage for plays, it encouraged the students to become more involved and others to become involved. She also shared how solar panels in schools are used to teach students how sunlight and the solar panels are used to light the schools. Miss Green also shared how the presenter talked about the importance of community involvement by elected officials using the schools for their meetings and in turn giving back to the schools.

Mr. Hooks reported that he attended 12.5 sessions and one of the sessions addressed maintaining safe and bully-free schools and what a district must do is have very strong leaders on campuses, teachers need to get involved, custodians must get involved, cafeteria workers must get involved because all of these interact with the students on a daily basis. Mr. Hooks stated that bullies can
be identified as a student and a school employee. He further stated districts also need to be aware that bullies are mean and hard to identify, bullying creates a negative school climate that diversely impacts academic performance, as well as costing a district a significant amount of money as a result of vandalism. He added it is beneficial to organize a safe school ambassador program that is student centered since students see and hear things that adults do not, students can intervene in ways adults cannot, students are often the first to arrive on the scene of an incident, and students determine the social norms while adults make the rules. He reported that the consultant told him if a teacher knows about someone being bullied, the teacher is held as accountable as the one doing the bullying. Mr. Hooks also said if the principal or superintendent is aware that bullying is taking place and nothing is done, they also are a part of the bullying. Mr. Hooks reported he also attended a session on defending your honor as a board member and strengthening public confidence. Highlights of this session included not ignoring the voices of your community, board members wondering if their efforts are making a difference, what can one person do or what can a district do when there is a lack of awareness or interest, individual actions with practical strategies for leading positive conversations relative to public education, if a board member is not truly for their community it will provide for a negative frame of mind that zaps one’s energy, if a board member is not truly for their community it will weaken your confidence, if a board member is truly not for their community it will hurt your creativity and problem solving skills, if a board member is truly not for their community they will be truly emotionally drained and damaged, if a board member is not truly for their community, students are not motivated, educated or inspired, and if a board member is not truly for their community, it will break the spirit, damage companionship and one’s career. Mr. Hooks stated that as a new board member, he expressed his appreciation for the opportunity to broaden his knowledge and understanding during these economic challenging times.

Mary Trammel shared that attending this conference was a total learning experience for her as a new board member. She reported that the sessions she attended were very well planned and informative. Ms. Trammel stated that she attended the National Teacher of the Year presentation and this person shared with them what she believed the successes in her classroom could be attributed to; i.e., hands-on, one-on-one techniques. She said this teacher’s major focus was one child at a time, one lesson at a time, and it was important to note that she provided opportunities for other teachers to use her tactics by sharing this information with them. Ms. Trammel also reported that she attended the session on bullying and realized that this is a world wide problem, i.e. internet, phone, physical, mental abuse are all ways this reality happens in the classroom and on the playground at all schools. She added this is something that is real, it is something that must be addressed, and noted what Caddo is doing. She also noted the importance of parental involvement in any bullying situation, as well as all staff and faculty members being involved. Ms. Trammel also attended a session on evaluating the superintendent and that board members are to be reminded that their main objective is to set the policies and budget for the district and the superintendent is hired by the board to do their job as it works in the parish. She said they also shared in this session that it is important for board members to learn in doing an evaluation to make sure they research what is being said. She added the board’s role in strategic planning provides an opportunity to compare to our district’s strategic planning and she believes we are doing a pretty good job in our number one role of student success. Ms. Trammel expressed her appreciation for the opportunity to attend.

Ms. Priest highlighted the following work sessions she attended. The session she attended on challenges of using funds and resources in urban districts and Miami Dade Florida school district sharing their experience of addressing a $150 plus million deficit. Challenges they shared with attendees in their experience of digging out from under this type deficit included a spending moratorium, a hiring freeze (with the exception of teachers and security positions), renegotiation of all vendor contracts, realigned resources, taking advantage of attrition, benchmarked clerical applications, adjusted school staffing formula, and implementation of the Reduction in Force policy. She said they also encouraged districts to not start the budget where you are today, but use good financial data, and look at reducing programs before eliminating programs. Ms. Priest also shared that with K-2 students, Miami Dade offered art and music with the elementary teachers, which saved them approximately $15 million. Adjusting bell schedules in the transportation department saved about $4 million as well as giving each school a 10% reduction allowing them to make the decision as to where their reductions would be. She also reported on increasing the graduation rate by 40% and decrease the drop-out rate by 30% and that information in this session included dealing with discipline problems, and identifying teachers who would use discipline problems as a reason not to teach. She said there was also a focus on
education and the awareness of the importance of education to the community, and a campaign “Dropping Out of School is not a Badge of Honor”, was also implemented. Miami Dade would track students who dropped out because they did not pass the test and remediation was set up to attract the students back to school. She said transfers into the district were tracked as well as from where they transferred. Ms. Priest also stated that they implemented teacher training that was data driven and involved a lot of student assessments; with a key element being if a student has an ineffective teacher for one year, it takes two to three years for the student to recoup. She also shared this district’s statistics from 2005 that reflected a 59.8% drop out rate and completion rate of 30.7%, and graduation rate of 29.7%, but through the years since the drop-out rate significantly went to 42.7%, graduation rate to 43%, and for 2008, the completion rate was 84.5% and their graduation rate was 65% and drop-out rate 10.8%. Ms. Priest also reported on a “Recovering your Drop-Outs” session and provided a packet for each board member. She said the leaders of this session shared the number of reasons why students drop out of school, but through this program, which is on-line, of identifying these drop outs, this company will provide them with a laptop and work with them to provide what these students need in order to graduate. Ms. Priest said they also referenced the “Captain Kangaroo” teachers and the Game Boy students examples that compared sitting still and listening to the action and movement of today. Mega schools are also across the country, and the majority of school districts falling into one of three types, elementary, K-6 or K-8, or high schools, grades 9 and above or grades 7-12. There are not more pure middle schools. Ms. Priest also reported that most districts the size of Caddo, approximately 43,000 students, have approximately 41-50 schools.

Mrs. Bell reported on going early to attend the CUBE (Council for Urban Boards of Education). She reported she attended a work session for districts whose student population is 20,000-50,000 students and a number of districts shared what they are doing, i.e. closing schools, combining schools. She also attended the bullying session and bullying is real across the country. Mrs. Bell also shared her experience of going on a site visit to Abraham Lincoln High School whose graduation rate is 95% compared to 84% for the district and 78% for the State of California. She reported that transportation is not provided for high school students in the San Francisco high schools but that the parents decide on what high school their children will attend and they are responsible for getting them to the school. She also said that the parents will pay approximately $500 a year for their children to use the public transit system. Mrs. Bell said their campuses are also open campuses, i.e. at noon, everyone leaves the campus to go into the neighborhood and eat lunch, because the cafeteria at the school will only accommodate 600 students (out of the 2,300). She said this has been accomplished on the trust policy because the school said if they fed 2,300 students, it would take 3 hours out of their instructional day. Mrs. Bell said there were a lot of questions about transportation and they learned this is something done all over the country.

Ms. Priest said these reports are why we participate and it helps the board to be abreast of what is happening across the country and not continue to do things the way they have always been done. President Priest also reported that attendance at these conferences is also required in order to obtain continuing education credits as required by the State Statute. She shared with Superintendent Dawkins another example of a Vision 2020 plan from a Texas school district. She announced that the 2012 conference will be held in Boston, Massachusetts.

Mrs. Armstrong thanked the board members for bringing back these insights and how rewarding it is to hear some of the ideas that are being expounded upon throughout the country.

ESTABLISH THE AGENDA AND PROPOSED CONSENT AGENDA FOR MAY 17, 2011 CPSB MEETING

President Priest announced she will leave at 5:30 p.m. for a speaking engagement and First Vice President Riall will chair the remainder of the meeting.

Superintendent Dawkins highlighted the proposed items for the board’s consideration at the May 17, 2011 meeting and the following discussion ensued.

Bids – Construction and Capital Projects. Mr. Rachal asked how much of the QSCB money is remaining? Mr. Lee responded at the end of March there was approximately $12-$13 million remaining from the original $17 million received. Mr. Rachal asked about the projects figured in the budget? Steve White responded that the total of all QSCB projects for the summer is $7.5
million. Mr. Rachal asked if he could get a copy of what is budgeted for? Mr. White said he will provide that information and it is also included on each bid tab.

**Transportation Bus Requests.** Mr. Burton announced that he will need to abstain from voting on this item because Southern is his employer.

**Finance Revision General Fund Budget.** Mr. Hooks inquired if the ending balance includes transportation or no transportation for all magnet schools? Mr. Lee responded it is not, but that this amount is where it is projected the year will end this school year, and the magnet school reduction is not being considered until next year. Mr. Hooks also asked staff about the graduation expenses at the Shreveport Convention Center? Mr. Lee said the amount now is approximately $50,000. Mr. Hooks asked if staff has looked at returning to the schools for graduations as a means of saving money? Dr. Dawkins explained that staff has not looked at the schools, but are looking at other sites. He added that some of the schools could be used, but most of the high schools are not large enough to accommodate graduations. (At this time, President Priest relinquished the chair to First Vice President Riall.) Mr. Hooks noted that while he knows the Convention Center is a great location for the graduations, we need to be good stewards of taxpayer dollars.

Mrs. Bell reminded board members that the reason graduations were moved from the schools was there was not enough room, and it may be necessary to spend the money so that there is ample room for the graduates, their families and classmates. Mr. Hooks stated he was not on the board when this decision was made.

Ms. Trammel noted the cost and the fact that staff did work on this in an attempt to find a venue for graduation and one of the problems was finding a place that was suitable. She said the Hirsch Coliseum facilities were inadequate, many times raining in the building; and because staff continued to receive complaints, they pursued a location that was nice and acceptable to the parents for the graduations.

**Finance Millage Rate.** Mrs. Crawley asked Mr. Lee if this is where we talk about rolling forward the taxes so we collect the same amount? Mr. Lee explained that the recommendation is to leave them in tact, and rolling it forward would be rolling it back to the previous rate before the last assessment, which will increase the property tax revenue to us. Mrs. Crawley asked why are we not increasing it, and Mr. Lee responded that is a decision at the pleasure of the board. Mrs. Crawley asked if, to do this, the board would have to vote “no” and then vote to do it the other way? Mr. Lee said that is correct. Mrs. Crawley asked Mr. Lee how much money this would generate? Mr. Lee explained rolling all of them forward would generate approximately $4-$5 million. Mrs. Crawley asked why are we not doing this? Mr. Lee explained that last time it was presented to the board to roll forward, the board rejected it. Mrs. Crawley asked that staff provide additional information on rolling forward. Mr. Lee clarified that if the board does this, it is required by the tax assessor that this be done by June 15th and he does not believe that the June meeting is prior to the 15th. Mrs. Crawley stated that she only wants people to know that this is a possibility. Mr. Lee further explained that rolling forward would also require a different resolution than is submitted in the backup information.

Mr. Hooks asked Mr. Lee about the millage and if this is the tax whereby the School Board profits off the taxpayers when they pay their property taxes? Mr. Lee said that is correct.

Mr. Rachal stated for the record he agrees with the recommendation made and he will not vote for a roll forward.

Mrs. Bell said she wishes to meet with the finance director to explain this.

Mrs. Crawford stated she believes the public has been clear and they do not want to pay more taxes, so she also cannot support a roll forward.

**Revisions to CPSB Policy GBM.** Larry Ramsey reminded everyone that this item was postponed last month until the May meeting to allow Attorney Abrams to further review and bring additional revisions for consideration. Mr. Abrams explained that he is working on this and a meeting was tentatively scheduled for Monday; but since all the people were not in attendance, he is attempting to reschedule a meeting with this group before the May board
meeting and bring the recommended changes. He said the old one is trying to be updated so it is more efficient and hopefully make the process more smooth. He highlighted that some of the changes for revision included cutting out the hearing at the oral argument level, as well as changes at each level relative to who will hear the grievance. Mr. Abrams said the Level I would be with the administrator, supervisor or principal, and Level II would be the supervisor of whomever heard the hearing at Level I. He further explained that the Level III hearing would include the superintendent or his designee with the goal of resolving the grievance without going to a transcript; however, if not, then a full hearing (Level IV) would be heard by the board with full documentation and transcripts without oral arguments unless the board desires otherwise.

Mrs. Crawley said she wants to be consistent with the board’s rule about information being available at work sessions; and since the information is not available, she believes the item should be moved to June. Mr. Abrams reminded Mrs. Crawley that the board was provided a copy of the current draft. Mrs. Crawley responded that it is not a current draft and it needs to be a draft that the board will be voting on. Mr. Abrams explained that it doesn’t have to be what the board votes on, but only that information is provided. Mr. Ramsey reminded Mrs. Crawley that the information was provided at the last meeting, and he postponed it until adjusted. Mrs. Crawley said she understands, but she has the floor; and the information was provided before the CFT, CAE and A+PEL met for input, so it doesn’t count.

Mr. Ramsey clarified that the board attorney explained we are still within the policy that information was provided. Mr. Abrams explained that a board member can raise the argument that it wasn’t presented; but in actuality, the board has been provided information prior to the meeting, even though it may not be the final document the board votes on.

Ms. Trammel asked for clarification and was not this item postponed from the previous meeting, at which board members had the information? Mr. Ramsey said that is correct. Ms. Trammel asked for someone to explain what is being changed? Mr. Abrams explained that because the item was postponed, the question was raised about possibly streamlining the processes; and a board member can request that the board vote on what is presented without any tweaking. Mr. Ramsey clarified that he would like this brought back in its original form and utilize the documents posted on BoardDocs and he may have a different motion at the meeting.

Mrs. Crawley asked that the process be made legitimate by meeting with the organizations before the board votes on this policy. Mr. Abrams explained that a meeting will be held with the organizations. Mrs. Crawley stated that is the spirit of it and that the information from meeting with the organizations is not available at the work session. She further stated that the true spirit is for the public and the employees to provide feedback so we do not vote on something in haste and no one knows what was voted on. She stated the board can do whatever it wants, seven members can get together, but it is the spirit of did we allow for input.

Mr. Rachal clarified that this was on the agenda last month and asked if this information was shared with the other organizations? Dr. Dawkins responded that a meeting with the organizations is scheduled next week. Mr. Rachal asked if the information on the web last month has been shared with the organizations? Dr. Mary Nash-Robinson explained that a meeting was scheduled for Monday, May 2, 2011 that would include the professional organizations. She said members of the organizations did not receive notification of the meeting, so the only exposure the professional organizations had was what was posted on BoardDocs. She said a meeting is scheduled for May 11th at 9:30 a.m. in Room I.

Mr. Hooks echoed Mrs. Crawley’s comments and that he needs something that he can review and digest before he comes to a meeting to vote on something. He said if he had worked like this, he would have been fired many years ago. Mr. Hooks stated that the superintendent and staff answer to the board and the board does not answer to them and asked that the board be given the information in advance of the meetings.

Dr. Dawkins explained that this agenda item is a board member’s request and Mr. Abrams and Mr. Ramsey are working on this item.

Mrs. Bell stated that this was on BoardDocs last month and she read the information. She further stated that the board member postponed because of concerns; but the policy in its entirety is on BoardDocs.
ADDITIONS

Dr. Dawkins requested that during the special session, the item “Proposed Revisions to Policy GCA” be postponed and added to the May 17th agenda. He explained that as we go through the budget process and staffing for next year, the staff is presenting information on whether or not to increase class sizes at the middle and high school levels. Several scenarios are being presented with no recommended increase at the elementary level, but only at middle and high school.

Mrs. Crawford asked staff to provide information on how the change in the pupil teacher ratio will affect high schools with the A/B block. Knowing that the A/B block requires more teachers, Mrs. Crawford stated that she would be hard-pressed to ask the principals to do something without giving them the appropriate number of faculty members.

Mrs. Crawford also asked staff to share with the board if the impact from revising the staffing formula will be greater for the larger schools than the smaller schools. Dr. Dawkins explained that this has been proportionately laid out and asked Mrs. Holliday to further explain one of the scenarios. Jan Holliday, director of certified personnel, shared with the board how proposed revisions to Policy GCA will affect the staffing. She stated that the first policy provided is GCA in its current format; the second option with +1ms and +2hs increases the staffing ratio and does not necessarily equate to class size, but it is the allotment of teachers to the school, and ultimately fewer teachers when dividing the enrollment by a larger divisor. She also explained the principals have discretion in determining how they will use their teachers within certain guidelines. Mrs. Crawford noted that information in the past showed that high schools will lose approximately 53 teachers, and asked if that is still accurate? Mrs. Holliday explained that if we do nothing to the teacher ratios and apply the staffing formula for the positions above the teachers, and use the consolidations and reconfigurations at schools, the result is 45 fewer teachers, in addition to some of the other positions. If the option of +1ms and +2hs is used, the end result is approximately 101 fewer teachers (13 fewer at the middle school level and 88 at the high school). Mrs. Holliday also shared that with no change at the middle school and increasing the formula at the high school level by 1, the end result is 67 fewer high school teachers, based on what is proposed.

Mrs. Crawley asked if this is not actually a budget item and we are taking the budget item by item, or are we trying to revise the policies so we can then place it in the budget? Dr. Dawkins responded that it is a policy item that certainly has budget implications and staff wanted to get this information to the board as staff also brings budget information. He said principals need to know what their staffing will be for the next school year. Mrs. Crawley asked if the board does this, this is part of the budget; and asked if Spanish is included in core classes, because she is aware of Spanish classes that have 40 students? Dr. Dawkins said they are not, but core classes are English Language Arts, Math, Science, Social Studies. Mrs. Crawley stated that she wants to know exactly what will be cut, i.e. music, art, etc. Dr. Dawkins explained that principals have discretion in making these decisions, but the goal is to support a Fine Arts program in the schools. Mrs. Crawley said she knows that is what will happen because they have to teach the core subjects. Dr. Dawkins further stated that it starts with Core subjects. Mrs. Crawley also noted that she is aware of many 4th grade classes that have 28 students in them and the policy says 25, and she is not aware of any high school Core classes that are between 20 and 27 in her area of town. She again stated she does not understand how this will be applied equitably. Dr. Dawkins explained that in studying all these scenarios Mrs. Crawley is right that the size of the school has an impact. Mrs. Crawley stated that she is not in favor of balancing a budget by using children and she knows we are not doing this because we need to change our policy, but to balance a budget. She wants to find a better way to do so.

Mrs. Armstrong asked if the numbers relative to middle school include 6th grades figured in with the elementary schools? Mrs. Holliday responded that is correct and are according to best projections at this time, with 6th graders being calculated separate from the 7th and 8th graders. Mrs. Armstrong stated her agreement with Mrs. Crawley relative to Fine Arts and we must keep these intact. She said it is a discretionary move on the part of the principals; but board members need to make it mandatory that Fine Arts are in place for the children at any cost. She noted that statistics reflect that students exposed to the Fine Arts are better students. She shared an additional concern relative to making sure the class sizes are capped, because if we increase the pupil teacher ratio in the middle and high schools, it is important that the classes are capped and
that accurate numbers are being monitored. She said high schools are especially prone to be over the cap.

Dr. Dawkins responded that staff will keep this in mind, because he believes a complete education includes these extra activities, but staff has to give this information so the board can consider all aspects.

Mr. Rachal asked staff to provide him with a current list of the quantity of counselors at every school, including if we are above or below. He also asked about the first option and there would be 45 fewer teachers. He asked Mrs. Holliday to further explain what is meant by “above teachers”? Mrs. Holliday explained that we have not had the configurations (7-12, K-12, K-6), so included in the proposal has to be how we will staff principals, assistant principals, counselors, librarians, etc. Mr. Rachal inquired as to the number that would be eliminated above the teachers? Mrs. Holliday stated that according to her projections, we will need 7 fewer principals, an increase of 3 assistant principals, decrease of 4 librarians, and decrease in counselors of .5. These numbers are due to reconfigurations, consolidations, off-lining. Dr. Dawkins reminded the board that these are not final numbers, and Mrs. Holliday added they are only projections. Mr. Rachal asked about the number of teachers alone and Mrs. Holliday responded 45, if the ratios are not changed and applied to the new school configurations. Mr. Rachal asked about the total elimination with the new ratios? Mrs. Holliday explained for the plus one at the middle school level and plus two at the high school results in a reduction of 13 middle school teachers and 98 high school. Mr. Rachal asked if it takes more administrators per student in elementary than in middle school? Dr. Dawkins explained that middle schools typically have a principal and some assistant principals and elementary schools have a principal and some have an assistant principal and some do not. Mr. Rachal asked about an administrative assistant in schools K-8, but there is not an administrative assistant in 6-8, and there are more assistant principals if enrollment is above 1,200. Dr. Dawkins shared that the current configurations are presented and is everything in place. He also indicated that he is not accustomed to having administrative assistants on the campus when there are assistant principals, but once again, the superintendent assured the board that staff is looking at every title in the school buildings as well as Central Office and individual departments. Mr. Rachal asked if the superintendent is saying if you have a middle school with no administrative assistant and the same quantity students as K-8 does the K-8 not need an administrative assistant? The superintendent further explained that he is saying that the current system is what has been approved by the board and he is looking at whether or not it should stay this way. Mr. Rachal said he is asking specifically if the superintendent believes there is enough difference there when it comes to an administrative assistant? The superintendent said he is looking at whether or not some of these things are needed. In the K-12 and other new configurations, Mr. Rachal asked why would you not have one principal and an assistant principal? Dr. Dawkins explained there are different variations and staff is looking at all these possibilities. Mr. Rachal asked if this is a recommendation or is it just information at this time? Dr. Dawkins responded that it is only information for the board at this time and staff continues to work on this and bring a recommendation to the board. Mr. Rachal asked for further clarification on the option of no change at the middle school and adding one at the high school? Mrs. Holliday answered that the changes in administrative staff remain the same, but below the line, the number of teachers is a decrease of 67 high school teachers. Mrs. Holliday again reiterated that these numbers are estimates based on where the children will attend school. Mr. Rachal asked if the configuration of no change at the middle school does not have any affect at this level. Mrs. Holliday stated that only the initial effect with the current ratio of approximately 45 fewer teachers; however, she said she does not have these figures broken down.

Mrs. Bell stated her concern is the large number of students in schools with smaller numbers. She said she believes if the board does what it needs to do with regard to the transfers to make sure the right thing is being done in approving the transfers, we would not have 2,300 students in a school. She said it is very important that the policy in place be followed. Mrs. Bell said that it is important to look at the transfer policy and the unfairness of over-crowded classrooms as a result of these policies. She said this is another reason it’s important to make sure the students are in the correct school. She asked the superintendent to make certain that ample resources are in place in the new configurations to address the needs of filling these buildings. Dr. Dawkins said the charge to the staff is to work as hard as possible to provide for every school the best programming we can provide with the resources available and to ensure the staffing is in place for academic programs and safety of all Caddo students. He further stated he believes staff
would be remiss if it did not inform the board and superintendent what is out there. He also stated that at some point, everything will be straight with the schools and then everything else will fall into place, because we will no longer be talking about schools anymore, but other parts of the organization. He reminded everyone that 80% of the School District is school based in staffing and instructional programs, all of which must be considered during this process. Mrs. Bell asked Mr. Abrams about the policy for transfers and if we are really following the guidelines. Mr. Abrams stated that the M to M policy is provided for in the Consent Decree and we are not released from that portion of the Consent Decree and cannot change it. Mrs. Bell asked about transfers that people are using in order to send their children to a certain school and all they have to do is get a utility bill in their name. She said when talking about classrooms having 27 and 28 children, she believes she could go into many of those classrooms and identify two or three students that are out of their home district.

Mr. Hooks stated his agreement with the superintendent regarding administrative assistants and there is no need for this position when there are assistant principals on the campus, and if a school says they need this position, he believes it’s because someone is not doing their job. He also referenced overcrowding and his agreement with Mrs. Armstrong, because the more students placed in a classroom, the more discipline problems a teacher will have. Mr. Hooks asked if this is a plan to over work these teachers and at the same time freeze their pay increase? Dr. Dawkins stated that no one has made a recommendation relative to salaries, etc., and while we certainly don’t want to over work anyone, the district definitely has some challenges to face. Mr. Hooks said he believes we are talking about working these teachers like slaves.

Ms. Trammel asked staff about the staffing formula and how staffing works; because she also believes overcrowding in a classroom will not help the teachers or the students, and this is not something that will work if we want to have world class students. She said she believes some of the problems are a result of Choice which is a mandate that the district has no control over, because if the parents select to send their children to another school, we cannot tell them they can’t. In a situation of where there are 2,300 students in one school and 700 students in another that will hold approximately 1,500 students, what can be done about this without putting too many students in the classroom. Dr. Dawkins stated that this is certainly not staff’s intent, but to add 1 and 2 to the formula from a budgetary and organizational standpoint is something he wished the district did not have to face at all; however, it is something that has to be faced and is a routine school districts follow every year to determine how many staff members are needed to teach the children. Ms. Trammel asked about the administrative assistants and what their job responsibilities include? The superintendent stated that there is a system in place in Caddo for a number of years and this is part of looking at everything.

Miss Green stated she does not want to see the student teacher ratio in her district increase and she would like to meet with the superintendent and appropriate staff members to fully understand.

Mrs. Armstrong referenced the discussion and questions relative to administrative assistants and the fact that having taught for years in a school where there was an administrative assistant, she knows they do earn their pay. She explained that in a K-8 configuration, oftentimes the administrative assistant is the liaison between the principal and the elementary school and if there is a situation with an elementary student, this person is the one that handles this matter. She said the assistant principals in K-8 configurations, there is one for administration and this person handles discipline for the middle school students as well as elementary disciplinary problems. She further explained that a second assistant principal is over instruction mainly for the middle school side of the school. A coordinator handles elementary side of the K-8 schools.

Mr. Rachal asked if when receiving the numbers, he would also like to see the dollars and the effect on the budget. He said he also has issue with the high school numbers, because we will have high school teachers (especially if it is a small high school) with fewer students than the regular classroom. Mrs. Holliday asked board members to keep in mind that this is not necessarily a pupil teacher ratio, but it provides the staffing allotment, the number of teachers allotted to a school, and one will impact the other; however the 18:1 ratio does not necessarily prescribe that there are 18 students per class. Mr. Rachal stated that this could mean a class could have 23 students in it, and Mrs. Holliday stated it is possible depending on the number of courses taught at the school. Mr. Rachal asked for clarification on it stating 18:1 pupil ratio? Mrs. Holliday explained that it doesn’t say pupil teacher ratio is 18 to 1, but that is the staffing
formula, and further explained that there is a mathematical formula that allotted teachers to high
schools in a different way than teachers are allotted to elementary schools. She said in looking
strictly at the high schools, you take the number of students at the school and multiply it by 8, the
number of courses/classes a high school student takes, which will result in the number of seats.
Then staff takes this number and divide by the divisor as is noted in the staffing formula, and this
number is then divided by six because that is the number of classes a teacher will teach. Mr.
Rachal said in looking at the staffing formula, we are not really talking about how many students
are in a classroom. Mrs. Holliday said it can result in a number, but it does not drive that to be the
number. Mr. Rachal stated that in looking at the ratio number in the past, he has thought this
was the targeted number of students in a class, and even though it has an impact on the class
numbers, it is only a staffing number. Mrs. Holliday responded that is correct. Mrs. Holliday
added that Kindergarten and 1st Grade classes are staffed at 20 to 1 ratios in the classroom, but it
is a different method/formula for staffing those grades. While there may be many other courses
taught, Mr. Rachal stated he wants to know the rationale and the numbers we have for using an
18 to 1 formula. Mrs. Holliday explained that when coming up with the formula for the A/B
Block Schedule, staff started by talking to the principals and getting their input relative to what
would work for them in order to implement this schedule. She said there was also the past
experience of the 4 x 4 at Southwood High School prior to this to determine how the staffing was
proposed when implementing the 4 x 4. She said the existing formula provided the principals
with adequate staff. In some cases, principals did not need all the positions they were allotted to
implement the A/B Block. Mr. Rachal noted the 2 bottom tiers relative to the staffing formula and
how this better helped him understand. Dr. Dawkins explained that if this is done at the
smaller schools, the numbers will not work in terms of the classes and course offerings in a
smaller school. Dr. Dawkins announced that staff will provide board members copies of actual
staffing now and the numbers that may be helpful for the board to see. Regarding the K-12, 7-12
and 9-12 configurations and there is nothing in the numbers for offering music, art, etc. Mr.
Rachal asked how will these be staffed? Mrs. Holliday explained that staffing will be done in the
same manner it has been done in the past, i.e. it comes out of the allotment.

Dr. Dawkins said there is no change in this and the process the principals will follow will be the
same as far as making sure these policies are followed. Mr. Rachal asked if it is possible that the
principal will have to offer art, music or band and the principal will decide if he wants to offer
Spanish III or something else. Dr. Dawkins responded that principals have done this before and
they insure that the necessary programs are there; but, again, staff is attempting to lay everything
on the table to determine how much and what can be offered. Mr. Rachal stated that it is his
opinion that if there are enough students that want to take art at any given school, regardless of
the staffing formula, we should provide the teacher to teach whatever if there are enough
students wanting it. Dr. Dawkins stated that staff does not disagree, but it is necessary to find
ways to provide these even if it is a half-time teacher at two different locations.

Mrs. Crawley stated her appreciation for working through this, because if we increase the pupil
teacher ratio we are going to eliminate teachers as well as eliminate subjects and those subjects
will not be English or Math. She said we can say we don’t want it to happen; but if the formula
is changed, it will happen. She also shared her experience when teaching in an elementary
school and the principal allowed the faculty to vote on whether or not a P.E. teacher was added;
however it is harder in a high school setting because of the many electives offered. She further
explained that if you have a small high school, the staffing allotment will be low and you won’t
be able to offer the classes students need to graduate. Mrs. Crawley said it is not a matter of
having enough students that want to be in band, for example, but it is whether or not we will pay
the teacher to do it. She said she does not want to look at this as a budget item rather than a
policy item and she wants to do the budget first and then look at this.

Mr. Hooks echoed Mrs. Armstrong’s comments regarding K-8 and administrative assistants;
because he recalls when he was at Vivian K-8 as an assistant principal, he did not need an
administrative assistant because he did his job. He believes administrative assistants are doing
the job for the assistant principal; and if the assistant principals are not doing their jobs, we are
wasting taxpayers’ money and he doesn’t agree with the need for this position.

Mrs. Armstrong stated that when she came on the board, she asked that the board approve
positions for art, music and P.E. as mandatory in the elementary schools and that they are figured
outside the staffing formula, whether itinerant or not. She asked if the same thing can be done at
the middle and high schools so that they are not a part of the formula, but the schools will have
those positions and that it is made a part of policy. Dr. Dawkins responded that staff will look at this.

Ms. Trammel requested that the superintendent schedule a work session with Human Resources relative to staffing to ensure that board members fully understand what we are attempting to do, either individually or by groups.

**ESTABLISH THE AGENDA AND PROPOSED CONSENT AGENDA**

FVP Riall announced that the following items are consent agenda items: 6.01-6.03, 7.01, 8.02, 8.04, and 8.06. Mrs. Bell moved, seconded by Mr. Riall, to approve the agenda and proposed consent agenda for the May 17, 2011 CPSB meeting as presented. Vote on the motion carried.

**POLL AUDIENCE**

Jackie Lansdale, president of the Caddo Federation of Teachers/Support Personnel, addressed the board on the following matters of concern to the Federation. Regarding the millage (Agenda Item 8.03), Mrs. Lansdale stated that it wasn’t brought out, but she believes one of the things voters would like to know is how much would rolling the millage back cost property owners? She said she wants the board to make sure it understands before balancing the budget on the backs of employees and students.

Jessica Carscadden, teacher in Caddo, addressed the board on the possibility of eliminating transportation for magnet students. She said the board members represent all the children in Caddo Parish and before considering eliminating transportation for any of Caddo’s students, she encouraged the board to remember that these children need to be in school, because they cannot be taught if they are not in the classroom. Ms. Carscadden stated that all children deserve a quality education no matter what neighborhood they live in or who their parents might be. She said we need to get students to school by public school bus transportation. She reminded the board that the law states unless a student lives more than one mile from the school, the school district will provide transportation for them. She asked what are students to do if their parents do not have enough gas to get their children to school? She said she doesn’t believe it is in the best interest of children to eliminate their bus transportation. She also encouraged the board to consider very carefully adjustments in the staffing formula that would add students to the classroom.

Irma D. Rogers, president of the Martin Luther King Jr. Community Development Corp., addressed the board on agenda items 6.01 and 8.02., and she stated that she forwarded a list of questions to the superintendent, but has not received answers to the questions. Questions Mrs. Rogers asked are as follows: (1) Where are the scores from last year from Green Oaks, Newton Smith and Pine Grove schools? (2) Where are the plans and studies that support the Vision 2020 Plan? (3) Where will the 6th graders go in the fall? (4) How and where will (a) the displaced teachers and administrators be place? (b) how will each level be supervised? (5) What education plan are you basing the effectiveness of high schools with grades 7-12? (6) How many meetings were held with parents and neighborhood groups about the final changes to the plan? (7) Will Green Oaks be renovated to accommodate younger students? (8) What will happen to Newton Smith since it is a large community? (9) What will happen with all the buildings and grounds affected by the changes? (10) What will be done to keep all services and make Green Oaks equivalent to the performing arts? (11) Parents want to be reassured of protection and that they are safe. (12) Don’t let there be any lack in services to students as a result of this restructuring. She said the citizens in this area do not want to see their tax dollars going across town.

**Adjournment.** Mrs. Bell moved, seconded by Mr. Riall, to adjourn. Vote on the motion to adjourn carried and the executive committee meeting adjourned at approximately 7:05 p.m.
The Caddo Parish School Board (CPSB) held a special work session in its office at 1961 Midway, Shreveport, Louisiana at 4:00 p.m. on Thursday, May 12, 2011 with President Lillian Priest presiding and the following school board members present being a quorum: Steve Riall, Jasmine Green, Charlotte Crawley, Curtis Hooks, Mary Trammel, Bonita Crawford, Larry Ramsey, Ginger Armstrong and Dottie Bell. Also present were Secretary Gerald D. Dawkins, and Reginald Abrams, legal counsel. Mr. Ramsey led the prayer and Pledge of Allegiance.

President Priest stated that today’s session is the third budget work session and reminded everyone that in a working session, everyone has an opinion and has the right to ask questions as we work to come up with a balanced budget for 2011-12 and will allow us to continue to provide the type of services the boys and girls should have to get a world class education. She announced that questions from the last work session will be addressed and noted that board members will continue to receive information on the proposed budget for review and to have ample time to review and get questions answered before being asked to vote on a budget.

Superintendent Dawkins noted two documents presented, Consolidated Annual Budget Work Session and Budget Summary. He reiterated what President Priest stated that tonight’s purpose is to address issues and questions from last week’s session. Dr. Dawkins announced that staff’s plan is to have to the board by the end of next week (Friday) the full recommendation from staff on the budget. He also reiterated Ms. Priest’s comments regarding the goal to not only balance the budget and begin to plan for the future and provide all that our students need, but to restore the fiscal stability of the district by rebuilding the fund balances.

Jim Lee began the discussion by sharing with the board the comparison of the last three years revenue and expenses, as well as a prediction of how staff believes we will finish the 2010-11 year. He noted that the previous prediction of a $14 million deficit has changed as a result of additional changes. Mr. Lee referenced the trend of spending more than is taken in and the need to address and reverse this practice.

Mr. Hooks asked about information received last week reflecting the 2008 ending balance of $40 million plus and the beginning balance for 2008-09 is the same. He said the 2008-09 ending balance was $40 million and the beginning balance for 2009-10 and it was the same. When looking at the ending balance for 2009-10, he noted a balance of $33 million and approximately the same for the beginning of 2010-11. However, he noted $12 million for the beginning of 2011-12 and asked if staff could clarify this discrepancy. Mr. Lee explained that in going from the $12 million to the $20 million beginning balance, the first three columns are actual results and how we finished out the year; however, the last two columns are budget. When we started the budget this year, we began with what we actually ended with last year ($12 million). In order to get a beginning balance for the next year, staff follows a process of looking at every budget and determine how we feel we will end up, so instead of starting off with the budgeted ending balance for this year, staff is presenting a complete and true picture of what staff believes next year will hold for the district. Mr. Hooks asked if this is saying we will not fall short? Mr. Lee responded that the district will still fall short, and clarified the $8 million difference between the $12 million and $20 million, and staff believes we will end the school year with an approximate $13 million deficit.

Mrs. Bell asked for clarification on transportation and the buses. Ms. Priest noted that we are not on this item. Mrs. Bell shared that she did verify that as long as the Consent Decree is in place in Caddo, we will have to provide transportation to the magnet schools. Mrs. Bell referenced the proposed savings of $2 million as well as her observation of buses with only four or five students. Ms. Priest asked that the questions follow the first two pages of Mr. Lee’s presentation. Mrs. Bell shared her concern about the proposed $2 million savings and that she brings this up for clarification and are there not buses with only four and five magnet students on them and could these be combined in some way? Mrs. Bell also asked how staff came up with this savings amount in the area of transportation? Dr. Dawkins explained that it is all transportation, i.e. combining routes,
restructuring routes, etc. He said there are approximately 400 buses and the transportation staff has been working on rerouting and will continue to do so in order to find savings. Magnet transportation, even though they knew there were challenges, was discussed because of exchange bus locations and ways we can be more efficient with our resources. Dr. Dawkins explained that staff has held a preliminary meeting with SporTran representatives, the city transit system, as a possible means of transportation also. Mrs. Bell asked if staff has an exchange route in the northern part of the parish and the western part of Caddo to come to the Fairgrounds? Ms. Priest explained that the specifics relating to transportation are on the agenda later in the meeting.

Mr. Riall asked Mr. Lee if the savings reflected in the approved Vision 2020 Plan, i.e. $14 million in operations, school closures, will be in the proposed budget when it is presented to the board? Mr. Lee explained that they are not reflected in the current documents being discussed; however, they are reflected in the numbers presented in the second document. Mr. Riall asked about the draft and under expenditures, it appears that transportation has basically stayed on target over the last five years and not increased. He said he sees the biggest increase in instructional services and asked how long will we be able to take a $10 million a year hit, or continue the $5 million increase each year for the last 5 years in instructional services, will it be for another 5-10 years? The superintendent answered absolutely not. Mr. Riall stated that it appears that 85% of the expenditures are in people and we are trying to cure 85% of the budget woes with the remaining 15% in expenditures. Dr. Dawkins noted that the percentages are correct, but it is necessary to cure from a mix.

Mr. Ramsey stated that when talking about savings, he doesn’t believe staff has been specific in how staff generated these dollar numbers and he really needs to understand the devil in the details, i.e. if we do close the school, where are the numbers coming from? Dr. Dawkins explained that staff has not given the board a budget today, but has continued to work through the questions generated through the proposed budget. Dr. Dawkins also announced that staff will provide to board members. Mr. Ramsey asked if he is not correct that the details in approving the budget is it must be done by June 30th. Mr. Ramsey said the public has interpreted some the board’s discussion as recommendations; however, the board does not have a recommendation. Because the board has a tremendous job before it, he appreciates getting the details and having as much time as possible prior to the vote to review and ask questions.

As far as inquiries relative to where the School Board’s revenue comes from, it is through sales tax, property tax and MFP, in addition to a few other minor sources. Mr. Lee explained the millages, where they go, and when they are up for renewal. He also noted questions regarding the rolling forward of property taxes, and shared with the board and audience that the board can approve a roll forward of property taxes, which means we get from the tax assessor a reassessment of all properties in the parish every four years. When we do, if the property values go up the millages go down in such a fashion that we receive the same amount of revenue each year, and it does not mean that if the property taxes increase that we receive more money. Mr. Lee further explained that if the school board chooses to do so, it may roll forward property taxes by approving a resolution that will go back to the last assessment and reset the millages to the higher rate in 2008. If the board chooses to do this, it will raise the millages from 78.2% to 82.81 millages for an increase of approximately 4.6 mills which will generate an additional $5.4 million for General Fund and $1.1 million for capital projects. He added that these millages will only be good for one year because 2012 is another reassessment year. Mr. Lee also shared what affect this would have on homeowners’ property taxes if the board does choose to do this. He explained that if the board chooses to roll forward, it will have to be advertised in the local media twice with the second advertisement being 30 days prior to the board voting on it. Since this means the second ad would have to be placed by May 20th, Mr. Lee said it is too late to consider this in May, but it would have to be done in June. It will also be necessary for the board to adopt two resolutions, one the way the assessor has set them at the current rate, and then the board would have to approve a second resolution to roll the millage rate back to the higher year, which must be approved by at least eight members of the board.
Mrs. Crawley asked if sales taxes are up, and Mr. Lee said they are. She also asked if property taxes are up, and Mr. Lee said they are. She verified that the MFP fund is flat and Mr. Lee confirmed that is correct. Mrs. Crawley asked if this means with other increases, this is actually going down? Mr. Lee said that is correct, the expenses are increasing, but the revenue is flat. She also asked staff if this amount is the assessed value of the home and not the appraised value? Mr. Lee said that is correct. She asked Mr. Lee how the assessed value relates to the appraised value? Mr. Lee stated that is something he does not believe he could answer tonight. Mr. Abrams explained there is a process on assessments whereby one can challenge the assessment which has occurred and the next time is in 2012. Mr. Abrams added that the assessed value should be close to the appraised value, and if someone believes theirs is too high, they can challenge it.

Mr. Abrams stated that, speaking for himself, historically his assessment has been less than his appraisal. Mr. Abrams stated that most homeowners want their home assessed lower, and when there is a challenge, the other homes in the neighborhood are compared. Mrs. Crawley asked about the reference to homeowners paying these property taxes; but she believes it to be true that even if you rent or lease property, you also pay property taxes even though it may be in the rent you pay. Mrs. Crawley stated she believes parents would be willing to pay what the increase would be to insure their children have the fine arts programs. She also stated that even though you can say don’t cut music, art, when changing the pupil teacher ratio, you cannot cut core subjects, and it is the fine arts classes that will be cut.

Mr. Riall asked staff if the board opts to roll forward, will it be in the property taxes at the end of this year? Mr. Lee responded that is correct. Mr. Riall asked if these funds, or a portion of them, can be designated? Mr. Lee responded that he will get him an answer to this question.

Mrs. Crawford stated that she believes in looking at the numbers, it doesn’t look like it is a lot of money, and if that were the case, everyone would be willing to write a check. However, in 2008 some of the homeowners assessments in her neighborhood doubled. She stated that with another reassessment next year, and the possibility that these could increase again, and while it may be good for the budget, she does not believe it would be a good PR move and it would make homeowners very angry. Mr. Lee pointed out that while the numbers do not look like a lot, it is only the increase amount that homeowners will see. Mrs. Crawford reminded everyone that teachers’ taxes have increased, and to roll forward the millages would not be the wisest decision the board could make and this should only be considered when there are no other options.

Ms. Priest stated she believes this information is very important to have on the table and the issue is the timeline in which we would have to move forward. Understanding the assessments, Ms. Priest also noted she remembers getting a refund on taxes paid as a result of assessments being doubled. Ms. Priest asked when was the last time the millages were rolled forward? Mr. Lee stated he believes it was 2003-2004. Ms. Priest stated that one of the things to possibly consider might be is this a way to generate additional revenue, because we do have homestead exemption and when looking at the number of homes in Caddo Parish above the homestead exemption, she understands some would be upset. She reminded everyone that staff was asked to bring every possible thing to the table during the budget process and this is only one of the things on the table.

Mrs. Bell said she cares about children, but she also cares about the parents. She said her taxes doubled and she knows that even though it looks like it is only an $80 increase, it is more than that. Mrs. Bell said there are other ways to balance the budget without rolling forward the millages, but the children and families are the ones that will suffer, and this is the wrong message to send to the public during these tough economic times. Mrs. Bell said we have not voted on anything, and she knows her phone is going to start ringing about this.

Mr. Hooks stated his agreement with Mrs. Crawley and if you change the teacher pupil ratio so music and art can be in the schools, he believes it will make a big difference. He reminded everyone that some of these students excel in these fine arts and are able to secure scholarships to help with their college education. Since we are here for the
welfare of the children, we need to regain the trust of the public before we take anything to the public.

Mr. Ramsey asked how much do businesses pay property taxes because he does not see that listed in the information. Mr. Ramsey stated that he believes passing this on to the consumer through businesses could cost some people their jobs. He encouraged everyone to consider all these angles and the impact on our clients and customers which include students, grandparents, parents and businesses in the community. He also referenced other community meetings he attended with city and parish groups and they are quick to point out that it is the School Board that gets the greatest share of these taxes.

Mrs. Crawley stated that this is not the first thing and she listed a lot of things that have come before the board, i.e. busing, reduction in force, increase in pupil teacher ratio, which she believes is a very bad thing to do and she would do the property tax before this. She reminded everyone that when the teacher pupil ratio was raised last year without the board voting on it, those schools and the parents had the money to hire the teacher that was cut (Drama Teacher). She said there were 12 items and they did not add up to $20 million so she knows something must give and she is only trying to come up with something to make up the difference, because she does not believe we will come up with $20 million by cutting people who just walk around doing nothing.

Mrs. Crawford stated that we gave an air conditioning business an exemption and asked if there are any businesses today that are exempt from paying taxes, because she believes if they paid their fair share of the taxes, we would not be having this problem. She also referenced the music and the fact that this was part of the $750,000 EduJobs funds and we received an additional $2 million that was to go toward jobs, which you had to have the jobs and the plan to get the money. She explained that the first page of this was reinstating the music, but the board voted to hold off on the second half of this. She asked if the $750,000 should go toward restoring the music as the board voted? Mr. Lee reported that the total amount of EduJobs funds we will be receiving is $9.1 million, but almost $7 million covers the district’s reduction in MFP funds. Mrs. Crawford asked about the extra $2 million that was reported we would receive? Mr. Lee confirmed that it must be used for salaries, and it is a one-time money allotment and staff would need to find another source. She also shared her misunderstanding of this particular situation. Mr. Lee stated unfortunately it is the way the state handled these funds.

Ms. Trammel asked if PTA funds can be used to pay for a teacher? Mr. Lee said he would need additional information, because if they are, the money should be submitted to the school board to pay the salaries.

Ms. Trammel asked if there is an additional tax for rural areas of Caddo Parish? Ms. Trammel asked when will the board receive something in black and white? Dr. Dawkins explained that much of the information is being brought to the board so that hopefully it will not be necessary to change a lot of the original budget. He also explained that at this time, staff is trying to respond to the many requests for information and this is one of many. He announced the board will have a copy of the budget Friday, May 20th.

Mr. Hooks said his solution is the board needs to stop approving things it should not be approving, and then we would have a balanced budget. He referenced the $10 million for consultants, facilities study, and programs that did not work. Mr. Hooks said if the board wants to get back on its feet, it will be important for the board to begin saying no.

Mr. Lee announced that the sales tax brings in approximately $75 million a year and is what we budgeted for this year; and at this time, we are doing better than budgeted. He added that in talking with the tax assessor’s office, we are going into the third year of the oil and gas leases and he believes they will begin drilling so they do not have to pay the bonus amount again. Regarding MFP, this is flat with this being the third year of the no-growth formula and minimal growth for the coming year. He also noted again that instructional services is the largest area and in every area, people is the largest expense. Mr. Lee shared with everyone the current budget with a projected 2011-12 budget which reflects a $2.5 million ending balance. Referencing the previous report of a $14.4 million deficit, he reported that staff has made some changes to get the ending balance to this
amount. He also stated that he didn’t want anyone to think that he is saying this is enough, because it is not; and he noted those items that were incorporated to result in this change, i.e. sales tax revenue, staff reductions, building costs in the consolidations, reduction in the retirees that have come back to work, transportation, postponing adding staff cars, Title I set aside for Choice transportation, reduce Central Office out-of-parish travel, reduction in Central Office staff, restructuring purchasing and warehousing systems, one-time transfers from reserve funds, and one-year only leave the annual amount for OPEB in the General Fund.

Mr. Lee also highlighted items not yet in the proposal that staff is considering, i.e. support staff reductions with the consolidation of schools and in other areas; property tax roll forward and freezing the step increase for one year. If the board is agreeable with everything staff has brought, it would generate an ending balance of approximately $11 million. Additional items staff is looking at include restructuring the year-round schools and additional areas of reduction. Dr. Dawkins added that staff will also pull together a group to look into the four-day week and the impact it could possibly have. All this information will be pulled together and the details presented to the board to the board next week. Mr. Lee also shared with the board a copy of the information on reserve funds. Dr. Dawkins noted a board member’s comment about areas of duplication and Mr. Lee noted those that appeared to be double duplication, i.e. Technology Enhancement Fund and Data Processing Reserve Fund may look like they are the same but the first one (Data Processing Reserve Fund) is sometimes used for large needs in technology or an emergency in the Data Center. Mr. Lee also explained that funds not completely used in the line item for operations, it is transferred into the Data Processing Reserve Fund. Mr. Lee also explained that the OPEB money, within in the next month, probably will be moved to the trust and monitored by the investment manager recently approved by the board.

Mrs. Crawley asked about the $8,500,000 in the OPEB and is this amount not like a drop of water in the ocean. Mr. Lee said it can be viewed that way, but it is also showing the agency is doing something about this. Mrs. Crawley asked what total amount is needed in this fund? Mr. Lee responded about $600 million. Mrs. Crawley asked for clarification and where will the $2 million from transfer funds be? Mr. Lee explained that $1 million would be coming from the Technology Enhancement Fund and $1 million would be coming from the insurance reserve fund. Mrs. Crawley asked about the General Fund and the 12 items needed, and if the certified staff reduction is increasing the student teacher ratio. Mr. Lee said it is. Mrs. Crawley said if you mark this off, would you then need $4,700,000? Mrs. Crawley asked if retirees returning to work is $1,800,000 and the difference in what a lower paid person will cost and is this really what we pay? Mr. Lee explained that we pay a teacher starting out $40,000 plus benefits. Regarding magnet school transportation and if the $1,900,000 includes bus drivers as well. Mrs. Crawley asked about the reduction in force for Central Office and is this an actual layoff and will Caddo have to implement a RIF? Dr. Dawkins said that is an option on the table for consideration, but he and the staff are exhausting all other options first. Mrs. Crawley noted that it is listed as one of the 12 items, and asked if it is correct that we can’t do a budget until we do RIF? Dr. Dawkins explained that RIF is the result after exhausting everything else, and RIF could be a part of it; and if there isn’t an agreement on what it will take to balance the budget, then the option is to implement RIF. Mrs. Crawley asked if she supports all 12 items listed, would we have to do RIF? Dr. Dawkins reminded them that the list is not complete at this time. Mrs. Crawley asked if she votes for the 12 items presented, will she be voting to implement RIF? The superintendent responded that staff will bring a RIF if it is needed; because RIF means that people are separated, some of these people will be absorbed through attrition or they may be doing something different. Mrs. Crawley stated she knows if we vote for a budget, then we need to do RIF. Dr. Dawkins explained that staff has worked close with the board attorney who is guiding them through this; and that in his world, this language would have come a long time ago, but Caddo’s policies are different and they cause the process to be a little different. Mrs. Crawley asked about the certified staff reduction and is this why the policy was rewritten to increase teacher pupil ratio? She added when it is shown, she wants to see music, art, Spanish, etc.
Mrs. Bell expressed appreciation for the staff’s work and asked the superintendent about the certified staff reductions, the number of certified staff, their position and the money, and the building costs. She referenced retirees returning to work and that they do make $50,000-$60,000 and it is important that the board knows how many of these retirees will be lost in reducing the budget by a million dollars. Mrs. Bell said she wants to know the details of positions that will be lost and the dollars each represents. She also asked about magnet transportation and how all transportation can be combined and she would like to see the explanation on paper. Mrs. Bell said she also wants to know the details on the number of cars we have, the cost, transportation for Choice students. In reducing Central Office staff, she would like to know if this is five secretaries, five supervisors, or five maintenance, etc. She said everyone has been nice, but it is now time to put these details on paper for the board and the public. Dr. Dawkins stated that this is unprecedented work in the district and staff will be giving the board exactly what has been asked with the details so that it will all be very clear to everyone.

Mrs. Crawford noted a suggestion that she sent in and has not seen on any of the sheets, i.e. Tulsa, Oklahoma shut down 24 schools and used Central Office personnel to do sub work. She referenced a 2.5 page list of supervisors and rather than paying $3.1 million for subs, she believes supervisors can be used to fill these positions before paying subs. Dr. Dawkins explained that staff is looking at this and referenced his experience in doing this. Mrs. Crawford also asked about the savings through implementation of the Vision 2020 plan and if they are reflected in the numbers presented? Mr. Lee responded they are, i.e. $430,000 listed in utility costs plus the maintenance cost on the buildings as well. Mrs. Crawford asked about the libraries and the books, and if these will be moved to the new locations? Dr. Dawkins explained the resources will follow the children. She too commended the staff for their work on providing the board with this information.

Mr. Ramsey asked the superintendent if it is possible the district will receive some additional Federal dollars? Dr. Dawkins said we are hopeful that the reauthorization of the Elementary and Secondary Act (No Child Left Behind) may yield some of this. He also announced about the approval of some School Improvement grants that will help with some of the training and hopefully additional flexibility with these funds. Mr. Ramsey referenced Mr. Lee’s comment that all the savings and additional costs are reflected in this budget; however there are no details, and he believes if this is in the documents, that information should be available to the board. Regarding staff reductions, have the area directors, principals, etc. had input in these discussions? The superintendent responded that segments of the organization have been involved. Mr. Ramsey said he believes we are ignoring a valuable resource in those that will have to implement this, and he has a problem with this. He added that before a budget is approved, he believes we need to draw from the knowledge of these before any cuts are made, as they work with this day in and day out. Dr. Dawkins responded that this is not totally accurate. Mr. Ramsey asked about the Title I reimbursement for Choice students and have we ever done this before? Dr. Dawkins explained that Title I has set aside provisions for parental education in several areas, with transportation being one. He said he believes staff has found ways to increase the use of these funds. Mr. Ramsey also restated his concern about not taking advantage of these dollars in ways that will relieve the pressures on the General Fund and appreciates the superintendent taking this step.

Ms. Trammel asked about staffing in Central Office and the use of supervisors in the classroom. She asked if their job descriptions will be rewritten so they can sub, because she believes with all they are responsible for, it could mean removing some of the items already in their job descriptions to be able to sub in the classrooms. Ms. Trammel also asked about the step increases and previous mention that staff not recommend taking this from employees this year.

Mrs. Armstrong expressed her concern over the number of staff reductions and the fact that morale is extremely low at this time because this is being discussed. She said she is hoping these things can be addressed through attrition without letting people go. She also asked that staff provide the board with a list of specific positions being considered; as well as the security numbers because she believes there are some schools that do not need security personnel. While she understands some schools security is worked in different ways, she has observed and wonders if we really need all the security personnel we have
in some of our schools. Mrs. Armstrong also asked for a comparison of the grant dollars we are receiving now as compared to when we had an active grant writer and if we are still getting as many grants as we once received. Also, are teachers still getting as much help in terms of grant dollars. She also referenced the discussion on Title I and asked how many parents participate in the Title I workshops.

Mr. Hooks asked if he is hearing that employees will lose jobs, because before Vision 2020 was approved, he believes the board was told that no employees would lose their jobs. He asked if the board saw this coming when they voted on the Vision 2020 Plan? He shared his confusion as everything being asked of the Superintendent he thought was included in the Vision 2020 Plan. He also thought everything asked of Mr. Lee was in the Plan and asked Mr. Lee to further clarify Instructional Services on the first page. Mr. Lee explained that includes the schools – teachers, teacher aides. In 2008-09, Mr. Hooks noted the expenditure of $13 million and in 2009-10, it was approximately $9 million; and 2010-11, approximately $9 million was spent, for a total of approximately $27 million even though no teachers have received a raise in three years. Mr. Lee explained that even though a permanent pay raise was not given, the annual step increase or any one-time supplements are included in these numbers, as well as health care costs (increased $12 million this year and possibly another $8 million in the coming year), which helped show the increase in these numbers. He added that this is the majority of the employees and is where you would see the major increase. Mr. Hooks said he is concerned that they have not received a raise in three years and we are now talking about freezing salaries.

Miss Green asked about clarification of the staffing and Vision 2020 and will the teachers know where they are going and are they included in these numbers for reduction? Dr. Dawkins explained that staff is in the process of working out the assignments and there is a seniority (process) that will make people wind up where they will. He said staff has not made any recommendations for reductions yet and people will be in different places as we look through attrition and hopefully through attrition, there will not be as many if any at all. With regard to the student teacher ratio, is it planned for this to increase? Dr. Dawkins explained there are several options on the table; however, staff has not brought the final recommendation. Miss Green asked this question because she has lost a school and she does not want to put any more on anyone else and asked that the resources follow the students and she also does not want the student teacher ratio increased.

Ms. Priest stated her understanding that the district has almost 6,000-7,000 employees and there will be reductions, which it is hopeful that much will be done through attrition. However, she said she is also a realist and understands the decisions the board will have to make. She asked if staff has thoroughly looked at the advanced technology at all school plants, and the amount of automation that can happen without an individual. With the amount of money that has been spent on technology, she asked if staff has looked at consolidation of responsibilities? Dr. Dawkins responded that he just met with a department head to discuss this very thing and with the changes in technology and the way we do work, there are job titles in place that are no longer applicable to the work they are doing and has become a part of staff’s deliberations.

Ms. Priest asked if, in doing the budget, we are using the principals out in the field, because they may know where specific cuts can be made in their schools. She also asked about transportation routing and efficiencies in this area, as she understands that high school students once rode city buses and if this is a possibility being researched.

Mr. Ramsey said he hopes that we can lay to rest the idea that we are going to discontinue bussing for magnet school students. The superintendent stated that it was only an issue put on the table, and we knew at the time there were some legal issues that had to be looked into. He added that transportation is an area staff continues to look into; and, there is not plan to eliminate transportation for students in magnet schools.

Ms. Trammel stated that in considering high school students being transported by SporTran, she believes Shreveport must be getting a new system since she does not believe the current system is a reliable one. The superintendent explained that staff has held preliminary discussions with representatives from SporTran.
Ms. Priest expressed appreciation for the board’s attendance and participation in this budget process for the 2011-12 year to prepare for the decisions that need to be made.

Superintendent Dawkins stated that staff has brought to the board items staff is exploring and some of it will change as a result of information received at today’s work session and board members will be receiving the details requested. He said this has been a very deliberate process because it is unprecedented in the Caddo system and staff wants to make sure the board receives the correct information needed in making the best decision for the district. Dr. Dawkins said none of this will be easy for the board, for the staff, but it is important to take steps to insure the fiscal stability of the district.

Mrs. Armstrong recalled that when Keithville School opened one of the first questions asked was relative to teacher input, as the architects had never built a school and as a result, there was a lot of wasted space. She encouraged the superintendent to get teacher input on some of the items discussed because they are the ones in the trenches every day.

Mrs. Bell asked the superintendent to look at travel expenses for the board and the possibility of cutting travel at the board level.

There being no additional discussion, the meeting adjourned at approximately 6:05 p.m.
May 17, 2011

The Caddo Parish School Board (CPSB) met in regular session in its office at 1961 Midway, Shreveport, Louisiana at approximately 4:30 p.m. on Tuesday, May 17, 2011 with President Lillian Priest presiding and the following school board members present being a quorum: Steve Riall, Jasmine Green, Willie Burton, Charlotte Crawley, Curtis Hooks, Mary Trammel, Bonita Crawford, Barry Rachal, Larry Ramsey, Ginger Armstrong and Dottie Bell. Also present were Superintendent Gerald Dawkins and Legal Counsel Reginald Abrams. Mrs. Crawford led the prayer and Pledge of Allegiance.

President Priest announced that the May 3, 2011 minutes are not complete for board approval.

Mrs. Bell moved, seconded by Mr. Burton, to approve the minutes of the April 19, 2011, April 20, 2011, and April 26, 2011 CPSB meetings as submitted in the mailout. Vote on the motion carried unanimously.

PRESENTATIONS AND RECOGNITIONS

Tricia Grayson, director of marketing and communications, on behalf of the CPSB and staff, presented the following special recognitions. The president and superintendent greeted and presented each honoree with a certificate/award. Administrators, families and friends present were also recognized.

Regional Science and Engineering Fair. The following students were recognized as winners in the International Science and Engineering Fair: (1) Elementary – Caroline Brakeville, Katelyn Grice and Laura Derbonne, Eden Gardens; Hunter Breedlove and Miriam Peters, Riverside; Solomon Price, A. C. Steere; Tylon Robinson and Cameron Carter, Judson; and Nicholas Erwin, Eden Gardens (Elementary Overall Regional Winner); (2) Middle – Neil Nathan and Alexandra Wells, Caddo Middle Magnet; Geoffrey McCutcheon, Youree Drive; and Kyle Dockendorf, Caddo Middle Magnet, Middle School Overall Regional Winner; and (3) High Schools – Charles Weston Graham, Cole Weinland, Daniel Wheeler, Delaney Lake, Hanna Thomson, Henry Lin, Joy Shan, Luke White and James Young, (High School Overall Regional Winner), Caddo Magnet High. Also recognized were Rugh Bishop, Caddo Magnet High, High School State Winner; and Ethan Skaggs, Caddo Magnet High, High School Overall State Winner.

2011 Louisiana Skills USA Contest. The following students were recognized for outstanding accomplishments in the Louisiana Skills USA Contest held in Shreveport last month: Cady Tucker, Samantha Cummings, Cameron Miller, Hunter Lyman, Logan Shoalmire, Jordan Criwell, Trinity Williams, Michael King (elected State Officer), and Joshua Taylor.

Character Education Poster & Essay Contest Winners. The following students were recognized as winners in the Character Education poster and essay contest: Elementary Division, Christyona Sanders (Cherokee Park), ECE 1st Place; Seveon Ragster (Cherokee Park), Kindergarten 1st Place; Mallory Atkins (Arthur Circle), 1st Grade 1st Place; Shakera Webb (Central), 2nd Grade 1st Place; Aaliyah Shepard (Sunset Acres), 3rd Grade 1st Place; Trinity Knight (Barret), 4th Grade 1st Place; Aidan Killer (Arthur Circle), 5th Grade 1st Place; and Darius Hall (Lakesore), Overall Elementary Winner. Middle School Division, Rickey Brooks (Alexander Learning Center), 6th Grade 1st Place, JaMiracle Taylor (Caddo Middle Magnet), 7th Grade 1st Place; Jessica White (Caddo Middle Magnet), 8th Grade 1st Place; and Kendrick Granville (Ridgewood), Overall Middle School Winner. High School Division, David Tarver (Northwood), 10 Grade 1st Place; LaBrittney Griffin (Northwood), 11th Grade 1st Place; Caroline Cobb (C. E. Byrd), 12th Grade 1st Place; and (4) Allison Waddell (Capt. Shreve), Overall High School Winner.

Keithville Middle School Basketball City Champions. The following members of the Boys and Girls Basketball Teams at Keithville Elementary/Middle School were recognized as City Champions: Boys – JaMarea Applewhite, Al Atkins, DeSabian Bossett, Gabriel Devezin, DeAndrea Drew, Calvin Daniels, Daterrius Hubbard, Kajuan Johnson, Dominique Martin, Coriel Parker, Charles Reynolds, Aaron Roberson, Richard Rose, Phillip Steward and Octavian
Alexander. The boys’ coaches are Billy Davis and Otis Taylor. Girls – Valerie Adams, Tajah Brunson, Eraka Harris, Dajja Hicks, Caitlyn Jenkins, Ariele Jones, Ronesha Murff, LaShun Porter, Genieve Reyes, Kylah Snow, Chazity Thomas, Alexis Webster, Africa White, and Zykeira Wilson. The girls’ coaches are LeTerrence Williams and Tony Williams.

Recognition of CPSB Members for Meeting Continuing Education Requirements of LRS 17:53. Attorney Reginald Abrams explained that what was at one time Act 380 is now referred to as LRS 17:53. This statute was revised in 2010 to increase the required training and instruction each year to six hours. He announced that the statute was also revised to allow board members to receive credit for attendance at the National School Boards Association annual conference. Mr. Abrams also explained that board members receiving 16 hours of continuing education credits in 2011, and 6 credits for three consecutive years, will also be available to receive the designation of distinguished school board member certification. Requirements met must be recorded in the school board’s minutes and districts with schools in AU status must earn two hours credit a year in this area. Dr. Dawkins announced that Board members Green, Hooks and Trammel will not receive this recognition today as Mr. Hooks was filling an unexpired term in 2010 and Ms. Trammel and Miss Green were not on the board until January 1, 2011. The following board members were presented certificates of compliance of LRS 17:53 for the year 2010: Steve Riall, Willie Burton, Charlotte Crawley, Lillian Priest, Bonita Crawford, Barry Rachal, Larry Ramsey, Ginger Armstrong and Dottie Bell.

VISITORS

Irma Rogers stated that on May 3rd she submitted questions regarding schools in the Martin Luther King Jr. area and she still does not have the answers to her questions. She also shared needs and requests from parents and other concerned community persons. Mrs. Rogers prefaced another speaker on this topic and petitions secured. She said many are very concerned about this merger (JS Clark and BTW). She explained that the petitions are asking to rescind the Vision 2020 Plan to allow more time to study the implications it will have on the children and the future of the schools. Ms. Rogers also stated that she contacted the Chief Academic Officer more than two weeks ago and there has not been anything provided in writing thus the parents and the community are being left out of this process. She noted the affect closures will have on these communities and asked that their questions be answered and for the process to be fair.

Middle Farrow shared with the board 1200 petitions regarding their concern about the 13 schools being closed and busing the 7th and 8th grade students. She noted that the Vision 2020 Plan presented is different than the plan originally presented at the high schools. Ms. Farrow also said it is a concern that if they had been outside the school board picketing and saying they would not allow their schools to be closed, maybe it would be different today. The board and the superintendent were asked to rescind this plan and allow the community to provide input, as well as businesses, and avoid what they believe will cause irreparable damage to the students and young parents. They do not want these schools closed.

Jon Glover, employee, reminded the board the number of times she has appeared before the board and superintendent prior to the compensation plan and its inadequacies. She said this plan devalued the work of the employees and today she addressed the 2011-12 budget being discussed and the importance that every board member understands every aspect of the budget in its entirety before implementation. Ms. Glover stated that the purpose of the aforementioned statement is to enlighten the decision makers that this budget will affect many lives, internally and externally. With a $14 million projected deficit, she said it is incumbent upon each board member to make certain no stone is left unturned in rectifying this situation without further destruction to the workers of the Caddo Parish School System. She said the employees are depending on the board to make a conscious decision whereby the system can operate effectively with a budget that meets the needs of the system without destroying and devastating this institution. Ms. Glover stated that attending the workshops has not divulged any specific information and she hopes that being privy to the budget on Friday, May 20th will put employees’ minds at ease. She said the responsibility falls on each board member that the budget adopted will benefit the school system as a whole and not placate something that is not visible to the naked eye. Ms. Glover noted that Vision 2020 will impact the lives of the employees of the system, but the students as a whole and it is a necessity that the board revisit this plan and make sure this plan is in concert with what was presented to the public. If the budget does not mirror the Vision 2020 Plan, she said there is a need to realign the board’s
decision when making a decision to accept or deny the budget. She said she has tried to understand the budget work sessions; however, she doesn’t feel like she knows anymore today than she did when they began. This budget should bring about a continuity of all that will be affected, and she reminded the superintendent and the board that hurrying through a process has grave impact and it should be approached in a manner that will bring about the best for the Caddo Parish School System as a whole.

Jeremy Green, parent, shared with the board the trouble and obstacles he encountered for three weeks in working with the Attendance Department to provide the necessary documents needed to enroll his child in preK.

Frederick Henson, BTW Alum, addressed the board on the new configuration of Booker T. Washington and J. S. Clark. He noted that the initial plan suggesting that Fair Park be closed; however, when the people stood up, it was changed. He noted the same for Blanchard, but when the people stood up, it was changed. Mr. Henson said he believes the burden of the budget is being put on the African American community schools. He said when leadership fails, it is time for the people to stand up; and he invited the superintendent and board members to attend a meeting at Mt. Canaan Baptist Church with the BTW Alumni regarding the closures and changes being made as a result of budget cuts.

Myisha Sanders, parent, addressed the board about her concerns as a parent and BTW alumni because her daughter, a middle school student, is too young to be in the same facility with high school students. She noted how J. S. Clark is continuing to improve daily and she believes this decision is pulling the rug out from under the principal and the students. Ms. Sanders stated that BTW is not an option and she will send her child to a private school. She encouraged the board to step back and look at other possible solutions.

LeAndrea Humphrey asked the board to explain what is being done to test the students’ intrinsic values, do you know what they like to do and are teachers encouraging them in their studies in that direction. His belief is if this is done, the district will see a decline in the drop-out rate.

Daryl Roberson, Caddo Association of Educators, shared his understanding as an educator and a parent that to get the best for our students after all the niceties fail it is sometimes necessary to scold them to get their focus. He noted the scolding the board received at the April 19th board meeting, and he hopes the community has gained the board’s attention; but despite everything released in the media, posted on the website and attending the meetings, they still do not understand what is going on with the public school system. He noted there are still many questions relative to Vision 2020, the budget for 2011-12, proposed increase in classroom sizes, transportation, no step increase, etc. Mr. Roberson said the citizens do not feel the board is hearing them or that it cares about their opinions, and he reminded them that it is the citizens who elected the board members to represent them. He also stated the insecurity Caddo employees are feeling during this time, and if the board is on the employee’s side.

Jackie Lansdale, Caddo Federation of Teachers/Support Personnel, referenced information shared last month from a national study regarding new teachers to the profession, and that they are 50% more likely to leave the profession than their older counterparts. While new teachers do not start out with this intention, there are things that are moving them to make this choice. Mrs. Lansdale shared that they have asked new teachers to Caddo to share their experience and the responses they received. She said while they can’t speak for the board, she encouraged the board to take into consideration the consequences of its decisions. She added that balancing the budget on the backs of educators and students is counterintuitive to providing a quality education program. Staffing ratios only make sense when there is parity, and not having some schools take the brunt while others don’t, having some teachers sacrificing pay increases, so others can have lower pupil teacher ratios, and not allowing the use of available resources so Caddo can compete with other districts. She noted these choices are harmful to the district and the profession. Mrs. Lansdale also shared that they have many times expressed the willingness to work with the board and the administration; however the deal breaker will be when they are convinced that the consequences of the board’s choices are harmful to those that they serve.

ESTABLISH THE AGENDA AND PROPOSAL CONSENT AGENDA
The Superintendent highlighted the proposed items for consideration. He asked that Item 8.03 “Finance Millage Rate” be postponed for further study and that Item 8.07 “Proposed Revisions to CPSB Policy GCA (Staffing Formula)” be postponed and included with the complete budget being provided to the board on Friday. President Priest announced that items 6.01-6.03, 7.01-7.02, 8.02, 8.04-8.06 and 8.08 are the consent agenda.

**Update on Superintendent’s Target Schools.** Dr. Dawkins announced that staff is awaiting test scores and hopefully they will be available on Wednesday.

**Update on Construction Projects.** The superintendent announced that this information will be brought to the board at the next meeting.

**CONFIRM THE CONSENT AGENDA**

Mr. Riall moved, seconded by Mr. Hooks, to approve the consent agenda for the Tuesday, May 17, 2011 CPSB meeting as presented. Vote on the motion carried unanimously and the following is a summary of the board’s action.

**Item No. 6**

**6.02 Requests for Leaves – Certified and Classified.** The board approved the following requests for leaves as recommended by the superintendent and included in the mailout.

**Certified**
- Catastrophic Leave, May 10, 2011-June 1, 2011
  Sherrie Nave, Teacher, Summer Grove Elementary, 9 years
- Catastrophic Leave, May 31, 2011-June 1, 2011
  Darron K. Harvey, Teacher, Newton Smith, 17 years
- Catastrophic Leave, April 21, 2011-June 1, 2011
  Jennifer Thomas, Teacher, Midway Elementary, 5 years
- Catastrophic Leave, May 4, 2011-June 1, 2011
  Rosetta P. Smith, Teacher, Sunset Acres Elementary, 41 years
- Catastrophic Leave, March 7, 2011-April 25, 2011
  Michele S. Cook, Compliance Specialist, Special Programs, 18 years
- Sabbatical Leave, April 11, 2011-April 15, 2011
  Deborah Bostwick, Librarian, Northwood High School, 27 years
- Sabbatical Leave, Fall Semester 2011-Spring Semester 2012
  Joseph Bonds, Teacher, Southwood High School, 16 years
- Sabbatical Leave, Fall Semester 2011-Spring Semester 2012
  Tara V. John, Teacher, Arthur Circle Elementary, 6 years
- Sabbatical Leave, Fall Semester 2011-Spring Semester 2012
  Joseph Bonds, Teacher, Southwood High School, 16 years
- Sabbatical Leave, Fall Semester 2011-Spring Semester 2012
  Megan Colvin, Teacher, 81st Street ECE, 6 years
- Sabbatical Leave, Fall Semester 2011-Spring Semester 2012
  Megan Colvin, Teacher, 81st Street ECE, 6 years
- Sabbatical Leave, Fall Semester 2011-Spring Semester 2012
  Jennifer Gallant Traweek, Teacher, Caddo Middle Magnet, 3 years
  Kaci L. Kimball, Teacher, Vivian Elem/Middle Magnet, 3.5 months

**6.03 Personnel Transactions Reports.** The board approved the other personnel transactions reports for the period of March 26, 2011 – April 25, 2011 as submitted in the mailout.

**Item No. 7**

**7.01 Bids (Purchasing).** The board approved authorizing staff to advertise for the Agricultural and Hunting Lease for the Carver Property and to permit parish school boards in Louisiana to piggyback on CPSB Science Supplies and Equipment Catalog Bid (15S-10).
7.02 Bids (Construction). The board approved the following bids as recommended by staff and submitted in the mailout on the bid tabulation sheets or placed at board members’ stations: (1) Camus Electric with a Base Bid, for the sum total of $962,625 for Project 2012-QB1, “QSCB Data Security Wiring at C.E. Byrd, Turner, and Youree Drive”; (2) Jack Moorman Electrical Contractors with a Base Bid, for the sum total of $747,232 for Project 2012-QB2, “QSCB Data Security Wiring at Keithville, Vivian and Walnut Hill”; (3) I.D. Electric Company, Inc. with a Base Bid, for the sum total of $748,351 for Project 2012-QB3, “QSCB Data Security Wiring at Ridgewood, Herndon and Caddo Middle Magnet”; (4) Rimmer Electric, Inc. with a Base Bid and Alternate 1, for the sum total of $149,900 for Project 2012-404, “North Highlands Lighting Retrofit”; (5) McNeer Electrical Company with a Base Bid and Alternate 1, for the sum total of $187,000 for Project 2012-408, “Vivian Lighting Retrofit”; (6) Camus Electric with a Base Bid, for the sum total of $896,215 for Project 2012-QB4, “QSCB Data Security Wiring at Huntington, North Caddo and Northwood”; (7) HMR Electrical Contracting, with a Base Bid and Alternate 1, for the sum total of $361,900 for Project 2012-405, “Ridgewood Lighting Retrofit”; (8) Thermo-Technics Air Conditioning, Heating & Refrigeration, with a Base Bid, for the sum total of $228,000 for Project 2011-075, “A. C. Steere HVAC Upgrade Gym”; (9) Bowman Grading & Asphalt, Inc., with a Base Bid, for the sum total of $221,011 for Project 2012-215, Green Oaks Bus Loop Paving; (10) Bossier Electrical Contractor, with a Base Bid and Alternate 1, for the sum total of $170,400 for Project 2012-406, “South Highlands Lighting Retrofit”; (11) HMR Electrical Contracting, with a Base Bid, Alt. 1, Alter. 2 and Alt. 3, for the sum total of $863,840 for Project 2012-407, “Southwood Lighting Retrofit”; (12) Re-advertise and re-bid at a later day Project 2012-QB5, “QSCB Data Security Wiring for Caddo Career Technology, Caddo Magnet and Captain Shreve”; (13) Hope Contractors of Shreveport, Inc., with a Base Bid, for the sum total of $727,628 for Project 2012-QB6, “QSCB Data Security Wiring at Caddo Middle Career, Donnie Bickham and Broadmoor; and (14) Industrial Roofing and Construction with a Base Bid for the sum total of $377,913 for Project 2012-210, “Herndon Roof Canopies”.

Item No. 8

8.02 Finance Revision General Budget. The board approved the revision to the 2010-11 General Fund Budget as recommended by staff and submitted in the mailout.

8.04 Finance Sales and Use Tax Commission 2011-12 Budgets. The board approved the 2011-12 Operating and Capital Outlay budgets for the Caddo-Shreveport Sales and Use Tax Commission as submitted in the mailout.

8.05 Revisions to CPSB Policy GBM. The board approved the proposed revisions to CPSB Policy GBM as submitted in the mailout.

8.06 Salary Schedule Reassignment Recommendation. The board approved the implementation of the reassignment of the Senior Clerk II/Risk Management position from Grade D to Grade E on the Professional and Non-Administrative Grade structure effective July 1, 2010 as recommended by staff and submitted in the mailout.

8.08. Montessori – Non Adopted Book Order. The board approved the request from the Montessori School for Shreveport for a special waiver to exceed the allotted 10% for non-adopted textbooks and materials of instruction as submitted in the mailout and as required by the Board of Elementary and Secondary Education.

TRANSPORTATION BUS REQUESTS

Mrs. Armstrong moved, seconded by Mrs. Bell, to approve the following requests for use of buses as submitted in the mailout: (1) LaPREP Program at Louisiana State University in Shreveport to transport students for field trips between June 6th and July 22, 2011; (2) Educational Talent Search Program of Southern University at Shreveport to transport students participating in their summer tutorial program; (3) LSU AgCenter/Caddo Cooperative Extension Service to transport Caddo youth to and from Grant Walker Educational Center in Pollock, LA to attend camp from June 13 to June 17, 2011; (4) Shreveport Green/ShrevCORPS to transport students to a free Environmental Earth Camp at Walter B. Jacobs Park between June 1 and July 31, 2011; (5) Yazz Program of Shreveport to transport students who participate in their summer
program June 13, 2011 to July 22, 2011 and (6) Trio Upward Bound Program of Southern University in Shreveport to transportation students who participate in their summer program June 15, 2011, June 22, 2011, June 29, 2011 and July 6, 2011. Vote on the motion carried with Mr. Burton abstaining since Southern University is his employer.

Finance Millage Rate. Mr. Riall moved, seconded by Mr. Rachal to adopt the resolution for the 2011 Millage rates as recommended by staff and included in the mailout. Mr. Rachal asked who and why is this item being postponed because he believes the board should proceed with voting on this to leave them as they are. Mr. Lee explained that the board cannot vote on this item today since proper notification (24 hours in advance of action) was not posted in advance because staff received a request at the budget work sessions to look at rolling forward the property taxes for a substitute motion. Mr. Rachal asked if all the proper notifications took place for the item listed on the agenda? Mr. Lee added that the agenda must be posted on the building at least 24 hours prior to the board meeting that a substitute motion would be brought forth, with advertising 30 days in advance. Mr. Rachal said there is no substitute motion and Mr. Lee explained there was to be a substitute motion. Mr. Rachal asked for clarification and that it is the posting on the building that we did not do, and Mr. Lee said that is correct. Mr. Rachal stated that he is baffled that this is being postponed and he knew nothing about it until tonight and now the board has no choice. Mr. Rachal asked for clarification on Roberts Rules and how this is to be handled? Mr. Abrams explained that Roberts Rules is being trumped by state law because of the state requirement to post specific language 24 hours in advance, and at this time we have not met the requirement to vote on this. Mr. Rachal asked Ms. Priest if anyone calls and asks for postponement, is it granted? Ms. Priest responded that if a board member asks to pull an item, yes; and this has been done before when a board member has indicated they do not want to move forward on that particular item. She also pointed out that this item does not have a board member’s name beside it. Mr. Rachal said he is disgruntled because it was on the agenda to be voted on and it could have been pulled or postponed, but the board could have followed through with what was on the agenda and it could have been postponed in the meeting versus where we are at this point.

Mrs. Bell agreed with Mr. Rachal, but it was posted on the website. Mr. Lee explained that when a millage is adopted, there is certain language that must be added to the agenda and posted at every entrance to the building. This was not done, and he was under the impression he could pull it when he received the request that a substitute motion would be brought forth. He further explained that we are not out anything, but it will be postponed for one month and the board will move to set the millages as they currently are or someone may move to adopt a separate resolution that will roll the millages to the previous amount. Mrs. Bell stated she doesn’t understand how one, two or three board members can make this decision. Mr. Lee indicated it was brought up at the last work session. Mrs. Bell said this is playing games and the board needs to take care of business and vote on this item, and she will not support this at this time.

Mrs. Armstrong asked by whose authority was it pulled? Ms. Priest said the item was on the agenda and there was a request to postpone based on the information from Mr. Lee’s explanation. Mrs. Armstrong stated that she does not remember this discussion. Ms. Priest stated that she was not at the last meeting during that particular discussion; however, Mr. Lee has explained to the board that because the proper notification was not followed through, the board cannot act on this at tonight’s meeting. Mrs. Armstrong stated her understanding, but asked that the next time something like this comes through, we need to follow through and then if the board chooses to act on the item in a different way at the meeting, the board has that option.

Ms. Trammel asked for clarification because Item 8.05 has a board member’s name beside it; however, this item was put on the agenda by the staff, so does that mean it can be pulled at any time? Mr. Abrams explained that this agenda is the board’s agenda and the staff cannot pull anything that the board does not o.k. When the board comes to a meeting and someone requests postponing an item, the board by consensus agrees to postpone or pull the item. He further explained that Mr. Rachal had additional questions and did not want it postponed, so it is still the board’s agenda and it is still on the agenda. At this time, there is a motion and a second on the table that needs to be withdrawn, because the board cannot technically do what needs to be done if it passes. Ms. Trammel stated this item was discussed at the work session last week and no one was notified that it would be postponed or pulled. She asked if someone could explain the process to her in the event in the future she wishes to postpone or pull an item from the agenda.
Mr. Ramsey moved, seconded by Mr. Hooks, to postpone this agenda item until next month per Mr. Lee’s recommendation. Mr. Ramsey stated that based on Mr. Lee’s and Mr. Abram’s comments, he believes we don’t have any choice but to postpone. Mr. Riall asked for clarification and can anyone on the staff or board place an item on the agenda? Mr. Riall asked if he puts an item on the agenda through the president and wishes to pull it, can he do that? Mr. Abrams responded it belongs to the board; however, you can ask for it to be pulled and the board would strongly consider your request. Mr. Rachal stated he believes the board has a better understanding and that this item is being postponed because of the laws. Vote on the motion carried with Mrs. Bell abstaining.

SUPERINTENDENT’S REPORT

The superintendent reported he is waiting on test scores and will provide information to the board upon receiving them. Dr. Dawkins also announced that an update on construction projects will be provided at a later date.

Mr. Rachal inquired about his request for a legal opinion that he asked to be placed on the agenda under Superintendent’s Report.

ANNOUNCEMENTS AND REQUESTS

Mrs. Bell asked if a special meeting could be scheduled to address the millage and the reduction in force. She believes the next meeting will be too long to wait and she believes another budget meeting is needed so everyone knows what is going on. She stated too much misinformation is being put out in the public and she believes it is necessary to address this. Dr. Dawkins explained that he did meet with President Priest and discussed scheduling additional meetings to address these requests.

Mrs. Crawford announced that several buses traveled to Baton Rouge last week and shared the response from those in Baton Rouge on Superintendent Pastorek’s resignation. She also shared with the board a copy of legislation being addressed, supported or monitored by the local Legislative Delegation. Mrs. Crawford also reported on an event she attended at Woodlawn and the positive experience she had in visiting the classrooms.

Mr. Hooks asked, when special meetings are called, that board members’ additional responsibilities and commitments are considered. He also stated that for many years he was an assistant principal, and those in extracurricular activities were paid for that in a separate check. He said he understands the procedure now is to include it in their paycheck and asked staff to look at this.

Miss Green asked about the procedure for getting your school recognized? The superintendent responded that one only needs to submit it to Mrs. Grayson. She asked if the principals typically do this? Mr. Rachal called for a point of order and that these are requests and should not be discussed. Miss Green asked about the procedure for principals ordering equipment?

Mrs. Crawley asked the superintendent to provide his best estimate of how many teachers will be told at the middle schools and high schools that the staffing allotment is being reduced?

Ms. Priest announced that board members received a request from LSBA, re: HB403, which will be heard in House Education Committee on Wednesday, May 20, 2011 relative to public school board members subbing in the public school classrooms.

Ms. Priest also announced that information on the Wanda Gunn Live and Learn Scholarship is at board members’ stations and those interested in making a donation from the board should submit their check to Ms. Lohnes in the Superintendent’s Office.

Ms. Priest asked that staff look at the policy on catastrophic sabbatical leave, especially medical.

Mrs. Bell asked if any other employee worked the number of years in Caddo Parish that Mrs. Gunn worked? She said she believes it would be appropriate to look at naming the Professional Development Center, or other facility, in her honor, and she will bring this back.
EXECUTIVE SESSION

**Student Readmission Appeal.** Mr. Riall moved, seconded by Mrs. Bell, to go into executive session for the purpose of a student readmission appeal. Vote on the motion to go into executive session carried and the board went into executive session at approximately 6:27 p.m. The board reconvened in open session at approximately 6:47 p.m.

Mr. Riall moved, seconded by Mrs. Bell, to allow HH to walk with her graduating class this year at C. E. Byrd High School. Vote on the motion carried.

**Reconsideration of termination of Probationary Teacher.** Mr. Ramsey moved, seconded by Mr. Rachal, that the April 19, 2011 termination of temporary teacher K.J. be maintained and that notice of the board’s action be sent to the last known address. Vote on the motion carried. Mrs. Bell was absent for the vote.

**Level IV Grievance.** Mr. Riall moved, seconded by Mr. Rachal, to go into executive session. Vote on the motion carried and the board went into executive session at approximately 6:51 p.m. The board went back into open session at approximately 7:12 p.m. Mrs. Crawford moved, seconded by Mr. Hooks, to reinstate the $1,500 to the OTs and PTs. Mrs. Crawford shared that she understands the schooling these employees go through and the jobs they do everyday for our children, and she encouraged the board to support the motion. Mr. Hooks reiterated the importance of these employees and their dedication to the children in Caddo Parish. Mr. Rachal shared commendations for this group of employees and for what they do everyday. He encouraged the board to support the motion on the floor. Mrs. Bell shared her support for this group of employees and what they do for children. Vote on the motion carried unanimously.

**Adjournment.** Mr. Riall moved, seconded by Mrs. Bell, to adjourn. Vote on the motion to adjourn carried and the meeting adjourned at approximately 7:16 p.m.

Dr. Gerald D. Dawkins, Secretary   Lillian Priest, President
May 24, 2011

The Caddo Parish School Board (CPSB) met in special session in its office at 1961 Midway, Shreveport, Louisiana at approximately 5:45 p.m. immediately following the budget work session and a brief recess on Tuesday, May 24, 2011 with President Lillian Priest presiding and the following school board members present being a quorum: Steve Riall, Jasmine Green, Willie Burton, Charlotte Crawley, Curtis Hooks, Mary Trammel, Bonita Crawford, Barry Rachal, Larry Ramsey, Ginger Armstrong and Dottie Bell. Also present were Dr. Gerald Dawkins, secretary, and Reginald Abrams, legal counsel. The prayer and pledge were omitted.

VISITORS

Leann Anglin expressed her concern of the public being referred to as the rhetoric in the community. She said the public is seeking answers and if it is not the truth or if the public does not have the information, that is what is out there. Ms. Anglin referenced her question regarding Haynesville Shale money because she heard it in the public and it was clarified, but it was not rhetoric. She said it is the public’s place and right to ask questions. Ms. Anglin also noted the difference in opinion in the definition of transparency and communication and her feeling when the board approved the Vision 2020 Plan on March 24 that none of their questions and concerns were even heard as were expressed at the community meetings. She said she believes the decisions being made are against academic achievement and she finds it unbelievable that the board is even voting on this tonight. Ms. Anglin shared with the board her concerns in cutting art, music and P.E. because these are very important for her child’s learning experience.

Frederic Washington shared that he believes there is a difference in activism and education and that is those who speak and those who do and he speaks and he does do. He shared that he is disturbed about the process for releasing the information regarding the reduction of employees. He noted the 10 positions in the AU schools that are day-to-day subs in the classroom and if there are 100 retirees and the district is not able to attract and retain personnel, when the retirees are done away with, it will only do more harm than good. Mr. Washington said that the board cannot expect the public to intelligently comment on anything regarding the school district when the information is not put out there for the public. He also referenced that the budget work sessions have consisted of more questions than answers and asked when will the issues at hand be addressed?

Frederick Henson referenced how quickly we seem to be moving with the implementation of Vision 2020 that there is not opportunity for needed input. He said he does not believe those interested in BTW and J.S. Clark had the appropriate time to study and provide feedback. He encouraged the board to halt any action in moving forward and to hold a moratorium to make sure we are doing the right thing in closing these schools.

Carol Pabst addressed the board on what appears to be a clear philosophy when stating that you want less teacher-centered teaching and more student-centered teaching, more hands on activities, more labs, more inquiry learning. As a science teacher when she hears about adding two students to a classroom, she wants everyone to understand that classrooms are no longer rows of desks filled with students, but the classrooms are very active places. Also, two students does not sound like very much, but in her classroom, two students do make a lost of difference. In a perfect world, Ms. Pabst said she would have no more than 32 students, 8 groups of four students. While these things are not impossible, she wanted everyone to understand that it makes it more difficult for everyone to engage in the activity, which can eventually become a safety issue. She said she does not need more students in the classroom, but fewer.

Theresa Arkansas, addressed the board on the job reductions and why were employees excused from such a meeting that affected their jobs. She said the public also has a job and they cannot get to the CPSB office by 3:00. She stated there is concealed money, money spent unnecessarily on retreats and bad programs and now the board is asking the loyal and faithful employees in the district to be used as a scapegoat to balance the budget.

Michael Myers, CFT/SP, addressed the CPSB on the proposed budget. He said that employees and the public should always be allowed to participate in the process, and the process should be transparent, making all the information available to everyone. Mr. Myers said that in order to represent the people, the board must be willing and able to listen to the constituents and follow
what the people will them to do. He said meetings should be held after 4:00 p.m. and/or the employees should be allowed release time to attend the meetings. He said he has given and dedicated most of his life to Caddo Parish and there were employees that wanted to attend the budget meeting, but when asked for release time, they were denied. Regarding the Technology Enhancement Fund, and according to Mr. Lee and the figures presented, he asked if approximately $17 million was loaned to the district in 2009 and if we are to pay $1.1 million every year, why is there still $16 plus million in that fund; where did the $2 million went? Mr. Myers reminded the board that they have set aside sacred funds for a rainy day, and it is storming outside. He encouraged the board to use the money as it has been dedicated.

Scott Hughes, Alliance for Education, addressed the board on the staffing formula and he believes we could have been here two months ago. Mr. Hughes stated he is before the board today to reluctantly support the revision to the staffing policy. He noted that he is not a fan of Vision 2020 and believes that we did not get to this time over night and we will not get out of it over night. Mr. Hughes encouraged the board to adopt the proposed change based on the following: (1) after spending four meetings going over things that have no impact on the budget and in many cases are illegal, and could have been taken care of behind the scenes and not in a public forum, the board has finally gotten to where it needs to be – addressing personnel; (2) what is being done is policy-based and most of the difficult changes will be submitted to the principals which may be the first time many of them had any say in this process; (3) cuts do tend to minimize the cuts to the classroom, but the board will have to address staffing and the 300 plus personnel being affected reflect that an attempt is being made to limit cuts to the classroom, and (4) it is a good start. He noted that the board is not adopting a balanced budget and after all is said and done, the board will still be $15 million out of line. He also encouraged the board to begin to look at next year’s budget and continue to provide the public with needed information.

Clevé Arkansas, teacher, shared his confusion and concern when he hears talk of cutting music and art programs. He shared the uniqueness of ArtBreak and all it offers to the students and how experts testify to the fact that these enrichment programs help stimulate learning in the Core subjects. Mr. Arkansas also shared with the board that he will now be merged with a middle school and will be doing these lesson plans in addition to the four or five he was previously responsible for doing. He also expressed his concern that the two grade levels being merged will have different start and ending times and he questions when he will have to report to school and when he will be able to leave with him now serving two grade levels, middle and high school.

Daryl Roberson, Caddo Association of Educators, stated that two months ago on March 24th the board approved the out of kilter straw man version of Vision 2020 without completely understanding all the implications of the plan. He said today they are raising a racket because the modifications to the staffing formula will increase the teacher pupil ratio and put classrooms out of kilter. Mr. Roberson said that one of the obstacles public schools face is overcrowded classrooms where it is not uncommon to find 20 or more in a class, and some may have 30 students or more and only one teacher. He stated that educational philosophers say a lower teacher student ratio results in a higher quality education, and the idea of a student teacher ratio is to provide as much one on one attention as possible for each child. Mr. Roberson asked the board if the needs of the children are really being considered when talking about the proposed changes to the staffing formula? He also shared how the components of planning, management and instruction are all affected by the student teacher ratio in a class. Mr. Roberson encouraged the board to not balance the budget at the expense of students receiving the quality of instruction that will help raise their achievement levels that the schools and the district needs and don’t balance the budget on the backs of those providing direct instruction in the classroom and support at the building level. He also urged the board to look for the dollars in the balance sheet that are being saved for a rainy day.

Donna Henderson, teacher, addressed student teacher ratio and that she has done extensive research on this subject. She shared with the board information on Project Prime Time done in Indiana in 1986 that confirmed that students in smaller class sizes scored higher on tests, they had fewer behavioral issues, and teachers found them more productive and proficient. Ms. Henderson agreed that the board is on the right road to reduction in staff, but it should not be teachers, but in administration because this is where the money is. She also said there has not been a raise for three years while continuing to do their jobs and now the board is talking about not granting the annual step increase. She said she believes we should raise taxes and if we don’t the problem will continue over and over. She also encouraged the board to not fund the National
Teacher Certification because it was the State of Louisiana that said they would do it, and it is not fair for Caddo to fund it and at the same time have to get rid of teachers. Regarding busing to magnet schools, she believes these parents who make the decision to send their children to magnet schools should drive their children to school and not make taxpayers pay that expense.

Jackie Lansdale, Caddo Federation of Teachers/Support Personnel, read from the minutes of October 1996 where the Caddo Parish School Board agreed to start the CPSB meeting at 4:30 p.m. to allow other employees and visitors ample time to travel to the building for the meeting. She said this is an indication that the board encouraged participation in the decision making process. She reminded the board that the fact the meeting was scheduled for 3:00 p.m. today prohibiting employees from attending indicates a lack of transparency to the taxpayer and disrespect to the employees. While they know the need for change, they are seeing a depleted fund balance, a Governor who wants to decrease the MFP and a local board that has set aside millions but will not roll forward the millage. Changing the pupil teacher ratio and reducing the number of certified staff will help the bottom line, but given the fact that salary steps and supply money are remaining in place, she believes it could be palatable with the following caveats: (1) before cutting those who actually stand before students delivering instruction, cut the ones that walk around with a clipboard and never stand before students, and (2) play honest by not understaffing large populated schools on the backs of low populated schools. She reminded the board that more students in the classroom mean more discipline problems. She encouraged the board to make sure the working environment in the classroom is second to none. Regarding the classified layoffs, she asked that the policy written is strictly enforced because there are rumors, and reassess what these employees will be doing, and make better choices for Caddo, i.e. salary schedules, tenure, compressing salary schedules, calendars, four day weeks, year round schools, etc.

Virginia Marks shared that she is in agreement that cuts need to be made; however, raising the pupil teacher ratio is going to be devastating. Understanding that these type cuts must come from personnel, she asked who came up with the plan that it would be the salaried, degreed, highest paid people in Caddo Parish? Mrs. Marks pointed out that there was not enough copies of the budget presentation for everyone and noted the page that listed teachers, administrators, librarians and counselors, but the page listing Central Office staff has bus drivers, mechanics, custodians, library clerks (the lowest paid, least degreed personnel) even thought they also deal with students on a daily basis. She encouraged the board to see how many of the highly paid, degreed positions are being cut, because there is no way to tell from the information provided. She also suggested that the board ask staff to make the same percentage reduction in their work force as in the work force of those dealing directly with students, because they could do it. She said the reductions need to be equitably spread and it needs to come from the highly paid, highly certified credentialed Central Office staff.

Patricia Manning, librarian, expressed that she is concerned and is addressing the board today advocating for those who cannot advocate for themselves – the students. Mrs. Manning shared with the board that the only reason any employee in the Caddo Parish School System has a job, a title, a career path, a salary, benefits and a retirement plan is because of the students. She said anyone not actively involved in the process of educating the students is not essential to this process. She said cuts made at the school level where the students are not an option, because we are not a profit making organization but are the profession that educates the profit-making profession. She said we are the only functioning democracy in the world and we are mandated to educate the next generation of leaders, workers, decision makers and voters and to fail in this process is to initiate our own destruction. Mrs. Manning said she is proud to be a professional, a librarian, and everyone from the sweepers to the principal at her school are strategically involved in the education of the population of learners and therefore necessary. Central Office crunches numbers and the school personnel teach the children.

Kathy Garner, teacher, addressed the board regarding her concerns for the changes in the staffing formula. She said even though the change doesn’t sound like a lot, if it passes, her schools will be staffed with only 12 middle school teachers for 6-8th grade. Ms. Garner said that statistics show the lower student teacher ratio is what brings achievement and that is what we are looking for. She also added that if this passes, they will be looking at up to 33 students in every Core class. Ms. Garner said she lives in Oil City and the middle schools will suffer when they have this many students in a class and the teachers still have to teach additional electives, P.E., art, etc. She encouraged the board to give this additional thought before acting today.
Shane Barbaro, teacher, addressed the board on the closing of Hosston Alternative School and that since they were told Hosston would be going off line, no one has been able to tell them where they (students and teachers) will go. He said they were told no one would lose their job; however, last Friday, one of the teachers received her termination notice. He questions if administration cannot fulfill their promises to the small staff at Hosston, how will the board fulfill promises to the entire parish. He also added that consolidation of the alternative schools is setting up for failure.

Willie Blablock, employee and parent, addressed his concerns in the budget cuts and who will now clean the school, who will do the work. As a parent, he stated he wants to know how his middle school student will interact with high school students and he is unsure about her safety in such a situation. Mr. Blablock said that when the plan was passed, they were not consulted nor had a vote in the decision made.

Sharon Ketchum, parent, addressed the board regarding her concerns for her children who are at Forest Hill. She said the teachers are priceless to the school and the system, but shared with the board the challenges and struggles they face on a daily basis. Ms. Ketchum stated her appreciation for all the teachers do and she does not feel like we show them enough appreciation. She also asked how will the enrollment numbers be promoted in the middle schools to get them up so the elementary school is not affected. Additional uncertainties, i.e. preK program, and concerns were also shared and that increasing numbers will not give the students the best that they deserve.

Donna Judd, employee, addressed the board on the proposed reduction in force and that she believes the CPSB has become too heavy at the top. While it makes sense to cut jobs to balance the budget, she said cutting five jobs at the school level and asking teachers to take 30 students in their classes is not fair. As a teacher, Ms. Judd stated she is appalled that some of her colleagues will be asked to have this number of students in a class when they are held accountable for test scores and for providing small group instruction for struggling students. All will suffer as a result. As a parent, she said she cannot see how the board can justify putting her child in danger of failing by not giving her and other students the best that they deserve and that we can give them. Ms. Judd encouraged the board to rethink eliminating these positions in the schools and be fair to those in the trenches day in and day out.

Irma D. Rogers, president of the Martin Luther King Community Development Corporation, stated that their organization has been and will continue to be an advocate and supporter of education. She said their organization has provided students/schools in the MLK area schools uniforms, school equipment, science lab, etc., but in regard to questions she has asked since April 20th, only two of them were recently answered on the web site. Mrs. Rogers said she believes it is a disrespect to her that she had to get this information from the web site after they did what they did to try and save Linear; and even though it was taken by the state, the community got behind Newton Smith as the middle school for their area. She said they have not received the answers to the questions and needs and she would like to know why. She encouraged the administration and board to reach out in the community and share with the students in that area what will be offered to them in the new school configuration.

**REVISION TO CPSB POLICY GCA STAFFING FORMULA**

Mrs. Armstrong moved, seconded by Mrs. Bell, to approve Policy GCA as presented by the superintendent with the following exception: under high school, 1800 total students changed to 30:1, 1000-1799 total students changed to 28:1. In addition, band, art, P.E. or music will be required at all levels K-12 and figured outside the regular staffing formula. Mrs. Armstrong said she believes the change presented, after talking with staff, will ultimately give some relief to some of the largest high schools and it will not negatively impact their staffs as the recommendation would have. She encouraged the board to support passage of the motion on the floor.

Mrs. Bell stated that she does not understand where the idea came from that we would be losing art, music and P.E. teachers, and shared what the policy states. She said it indicates that the principal has the ability to use his or her teacher allotment in a way that these opportunities are
made available to the students. Mrs. Bell said she is tired that misinformation continues to go to the media and encouraged the board to support the motion on the floor.

Mrs. Crawley moved, seconded by Mr. Hooks, to accept the superintendent’s staffing proposal with the following changes: (1) schools that the enrollment and the actual student count per classroom reaches or exceeds the current Caddo policy for the teacher pupil ratio will not have any increase in the staffing formula or teacher pupil ratio; (2) all schools that are underpopulated will have the staffing formula applied to bring each classroom up to the current Caddo Parish staffing formula or teacher pupil ratio; band, music and art classes will not be affected by the change in staffing. All middle schools and high schools will offer band, music and art. She further moved that the superintendent return with a budget proposal that is balanced and forget the $15 million that is not balanced and leave a minimum of $4 to $5 million General Fund balance. That the recommendation does not include any further changes to the teacher pupil ratio, freezing employee salaries, if the step increase is $500 or below, does not eliminate the $200 supply money or eliminate the AU teacher incentives. Mrs. Crawley said that she believes with this motion the board will truly put the focus in the classroom and for the schools that are already staffed, because the numbers are not reality based. She further stated that her motion is reality based because she says students in the classrooms. She shared examples of three second grade classes that all have 28 students in them, as well as in the 3rd and 4th grade classes. She said reality is we are not adding one or two students, because they are already beyond the formula and they should be left alone. She doesn’t think the board should be going through the details of the budget, because the superintendent has the expertise; and when the board gives the superintendent it’s philosophy that education and the students are the focus, then the superintendent decides which programs are kept or eliminated, which furloughs might be done in Central Office. She added that increasing the teacher pupil ratio is not going to guarantee that all students are reading on grade level by the end of the 2nd grade. Mrs. Crawley said the superintendent can decide to move money out of set asides, to raise property taxes, etc. She said she does not want to go through all these budget meetings, but she wants to tell the superintendent that the board is into education and supporting the students and teachers in the classrooms, and the principals.

Mr. Hooks said he believes we can come up with a budget that can accommodate music and art, because these are gifts from God and we should not deprive students of these enrichments. If we are over populated in the classroom, it is asking for trouble, i.e. more discipline problems, attendance problems, etc. He said he cannot pretend, and will always be straight forward, telling it like it is.

Ms. Trammel asked for clarification on the motions on the floor and when the board votes on the staffing formula, will all the items discussed in the earlier budget meeting, be a part of what the board is voting on? Mr. Abrams stated that he does not have a copy of the substitute motion, but the first motion only deals with GCA, the staffing formula for the schools; and the formula that addresses classified and other support employees, is not in the motion, so it will not cover everything in the budget meetings and will have to be brought back to the board. Mr. Abrams added that the modification made on the original motion will mean a change in the numbers presented to the board. Dr. Dawkins stated that staff will come back to the board with the changes that reflect the directive in the motion passed, and there will be additional changes and the district will not get out of $20 million without staff reductions.

Mrs. Crawford moved, seconded by Mr. Rachal, to postpone the item, including both motions, until next Tuesday to get more information on both. Mr. Rachal stated that he does not believe budget discussions are complete and there are some areas he believes he can see some savings that would offset some of the reductions. While he does not want to increase the pupil teacher ratio, he would like to spend a little more time to look at this more closely and know that everything possible has been done to preserve the teachers. Mr. Abrams clarified for the board that either motion is addressing a reduction in force and the Reduction in Force policy requires a 30 day notice to the individuals affected by the reduction in force, and the budget ends June 30th. Mr. Abrams also clarified that the district needs a budget approved before July 1 and a decision is needed on what the board will do regarding the reduction in force. If it is postponed and extended another month, the result will be a reduction of additional personnel.

Mrs. Crawford stated that she does not understand how the board can vote on either motion until it has information on the dollars that are attached to either one as well as the number of persons
affected by each, and that she does not understand what legal counsel is telling them about postponing this motion. Mr. Abrams clarified that if the board reduces staff, and in order to make it effective based on numbers, the board needs to vote on the budget and the reduction in force at the same time and 30 days in advance of the expiration because 30 days notice must be given to those employees that will be affected. The fiscal year ends June 30th, and the budget is based on a full 12 months. If you cannot give the employees being affected a full 30 days notice by June 30th, the cost associated with those employees will carry over into the next fiscal year and the numbers presented in the budget will be skewed. Mrs. Crawford asked if the board came back on Thursday would the board be within the timeframe, because she needs to know the impact of these motions before she votes.

Mr. Lee clarified that the first original motion on the floor will add back approximately 11 positions representing approximately $720,000 added back to the budget, reducing the potential $6 million to approximately $5.5 million. He added that he doesn’t understand the substitute motion and if the staffing formula is not changed, you will add teachers. Mrs. Crawford asked Mrs. Armstrong if her motion was still two at the high school, one at the middle school, grades 4 and 5 at 25 to 1 and K-2 at 22 to 1. Mrs. Armstrong said the only exception is in the five larger high schools. Mrs. Crawford asked if, at the high school level, it is truly 1:30 or are you still adding two to that number? Mrs. Armstrong said the bottom line for the larger high schools will be 1800 students staffed at 1:30 and not a plus 2. Based on this explanation, Mrs. Crawford withdrew her motion. Mr. Rachal stated he does not approve withdrawing the motion to postpone because he believes the confusion indicates more time and discussion are needed for clarification. Vote on the motion to postpone failed with Board members Crawley, Hooks, Trammel, Crawford and Rachal supporting the motion and Board members Riall, Green, Burton, Priest, Ramsey, Armstrong and Bell opposed.

Mr. Ramsey stated that he is looking for opportunities to make cuts other than the teacher pupil ratio and asked the superintendent what other possible cuts can be done to get the $20 million if cuts have already been identified? Dr. Dawkins responded that staff continually looks at every level, location and classification as well as operational areas for ways and cuts that can eliminate any inefficiencies. Mr. Ramsey asked about the expenditures of $5.6 million under central services because he knows staff needs to stay away from instructional services and look at Items 2-8. Dr. Dawkins said that is correct. Mr. Ramsey inquired about adding central administration and central services together for $10.8 million; and while he is not advocating eliminating all these persons, but in looking for $20 million, and before he can vote this motion, he needs to have an idea of what other possible cuts can be made. The superintendent stated that all of central administration is approximately $20 million, so you then begin to look at the other areas and it will always go back to the school in some way. Mr. Ramsey said that while he may offer ideas and suggestions, he understands that at the end of the day it is the superintendent and the staff that should be offering recommendations and the board adopts or amends them. He added he cannot support the substitute motion without additional clarification.

Mrs. Bell addressed adding more in the substitute motion as well as delaying board action on it, and relative to staffing, the board only voted on Policy GCA. She referenced what the state formula says should be the maximum class size and Caddo is below that number. She further stated that if the formula stays the same and we delay, it will be adding more people, and people need to know if and how they will be affected. Mrs. Bell said the board has had the information and it needs to vote on this staffing formula tonight so principals will know how many teachers they will be allotted and people will know where they will be before school ends this year.

Mr. Rachal called for the question on the substitute motion. Vote on the motion to end debate carried with Board member Crawley opposed.

Mr. Abram clarified that Mrs. Crawley’s substitute motion only affects Policy GCA and it is the only item on the agenda tonight.

Vote on the substitute motion failed with Board members Crawley and Hooks supporting the motion and Board members Riall, Green, Burton, Trammel, Priest, Crawford, Rachal, Ramsey, Armstrong and Bell opposed.

Miss Green said she has heard everyone’s comments and agrees with Mrs. Crawley that music and art should be in every school and students in under populated schools also deserve a world
class education. She said she has talked to principals and asked Mrs. Armstrong to repeat her motion with the numbers. Mrs. Armstrong responded that the change would be in the tiered count for high schools and if a school has greater than 1800 total students, the change would be 30:1; if a school as 1000 to 1799 total students, the change would be 28:1. Mrs. Armstrong offered a friendly amendment to her motion that *band, art and music would be included at the middle school and high school levels*. Mrs. Bell as the second of the main motion agreed with the amendment to the original motion. Mrs. Armstrong stated that she was under the impression when these discussions took place that this had been done; however, when the changes were made at M. J. Moore and Newton Smith, these changes were not incorporated across the board at all middle and high schools. She said she believes if it is made a part of policy then it says how important the board thinks it is to have the arts at all grade levels, kindergarten through 12th grade. Dr. Dawkins clarified for the record that the administration has never recommended eliminating art, music or P.E.

Mrs. Crawley asked if this means we will have to come up with some more money from somewhere, other than the teacher pupil ratio? She also said stated that we will not have to worry about lowering the teacher pupil ratio because increasing the number of students in the classroom will increase the drop out rate. Again, she said the board needs to tell the superintendent what its philosophy is and if no one else shows up for work, that’s o.k., because the principals, the teachers and the students show up for school. Mrs. Crawley added that she cannot vote to increase everyone’s teacher pupil ratio.

Mr. Ramsey said there is a formula listed on the policy for providing art, music and P.E. for student K-8 and asked if he is correct that it guarantees these opportunities are there? The superintendent responded that is correct. Mr. Ramsey said it has been clarified that we will have art, music and P.E. teachers and is included in the formula. Mrs. Holliday added that the column referenced, regarding enrichment teachers, covers the schools that have configurations of K-5, K-6 and K-8 and it does not allocate additional enrichment teachers to the 6-8 schools (middle schools). With the amendment, Mr. Ramsey asked if it doesn’t stretch this policy in to the gray areas covering the same formula. The superintendent responded that is correct. Relative to the staffing formula and talking about positions, Mr. Ramsey asked Mrs. Holliday if the ratio for K-1 is not currently 1:20, and are there situations where classroom limitations impact these numbers? Mrs. Holliday said there are some that have kindergarten classes with more than 20 students; however, she is not aware of any that have as many as 28 in it. The formula also allows for some flexibility as noted on the second page of the policy, and many of the schools that have more than 20 students in a kindergarten or first grade class are the schools in the category of three or more stars. Mr. Ramsey also noted that the policy indicates additional staffing may be allocated by the superintendent with budgetary means to address the needs. Mr. Ramsey asked if there are staffing issues at any schools, does the verbiage in the policy allow the board and the superintendent to add staffing positions as they are needed? He said he believes this policy addresses all the needs and he hopes his peers and principals understand that if there is a serious need, staff can look to restricted funds to address those needs. Dr. Dawkins stated there are always unique needs at schools and staff is always open to adjustments being made. Mr. Ramsey pointed out that staffing needs can be brought to the board for consideration; however, he hopes these needs will be addressed. He reminded everyone we have a serious problem that must be addressed; and with that understanding and if there is an urgent need, he hopes staff will address that need.

Mr. Rachal asked for further clarification of the motion on the floor and that student populations of 1800 and above will be allotted teachers at a 30:1 ratio, student populations of 1000 to 1799 will be allotted teachers at a 28:1 ratio and the net affect is approximately $700,000. Mrs. Holliday said that is correct. Mr. Rachal asked what affect would leaving the elementary numbers the same have? Mrs. Holliday said she was unsure the exact numbers but can get with Mr. Lee and provide that information. Mr. Rachal also stated that the caveats included gives the board the ability to address needs based on policy; however, he does not want this taken advantage of at any particular school. He asked staff how many schools have four stars, and does he understand we will no longer be on the star system, and how will we address this when the districts go to the letter grade system? Dr. Dawkins responded that the star system will go away. Dr. Robinson stated that she does not know the number of four-star elementary schools in Caddo, but confirmed that the conversion to the letter grade system in August even though there will be some delay because of transitions in Baton Rouge. Dr. Dawkins added that Caddo has not received final specification relative to how the letter grading system will apply and once that
is received, staff will bring it back to the board to address. Mr. Rachal asked about any variation in K-1 and the class size of 1:22, will the number ever be allowed to exceed 22? Dr. Dawkins explained that the goal is for it to never exceed the 22, but sometimes there are unique situations, i.e. a kindergarten student moving into the district late in the school year, that the principal would have to consider. Mr. Rachal referenced University Elementary and its size and the possibility of five kindergarten classes at 24:1. Dr. Dawkins said it also becomes a space issue and is something that has to be looked at every school, and the principals are pretty judicious in how they utilize resources; but it is hoped that this policy will build some flexibilities in addressing these situations. Regarding the friendly amendment for arts, music, he asked what will the impact be? Dr. Dawkins responded that staff will have to crunch the numbers after the meeting tonight, and Mr. Lee and HR will have those numbers.

Mr. Hooks asked if all the middle and high schools have music and art? Superintendent Dawkins responded there are some gaps in some of the schools with some having music, art and P.E. and some having music and art; however, the goal is to offer all of them. Mr. Hooks stated that he is against laying off anyone; and he asked if the board supports Mrs. Armstrong’s amendment, will we still have layoffs but the number will be fewer? Mrs. Armstrong said that is correct. Mr. Hooks asked if we vote against Mrs. Armstrong’s amendment, will the layoffs be greater, and Mrs. Armstrong responded that is correct. She also added that the board would mandate that band, art, music and P.E. be protected subjects and staffed outside the staffing formula. Dr. Dawkins clarified that with layoffs, and depending on the final board decision, a degree of that will affect what happens; and if you protect positions, it will certainly add to the budget. Mr. Hooks stated he believes it will be detrimental to add to the teacher pupil ratio and it looks like it’s a matter of the lesser of two evils, but he definitely wants students to have the opportunity to take subjects in the arts.

Mr. Lee responded that if the board does nothing with K-1 and 4-5, leaving them at the current staffing formula, it will increase 45 positions, approximately $3 million. With the $6.3 million ending fund balance; however the changes proposed at the high school level will reduce that amount by approximately $700,000 and this change would reduce it another $3 million, leaving a fund balance of approximately $2.6 million. Mr. Rachal asked what would K-1 be? Mr. Lee responded approximately 30 positions.

Mr. Riall moved, seconded by Mr. Burton, to call for the question. Vote on the motion call for the question carried with Board member Crawley opposed.

Vote on the main motion carried with Board members Riall and Crawley opposed and Board members Green, Burton, Hooks, Trammel, Priest, Crawford, Rachal, Ramsey, Armstrong and Bell supporting the motion.

Adjournment. Mr. Riall moved, seconded by Mrs. Bell, to adjourn. Vote on the motion to adjourn carried and the meeting adjourned at approximately 8:05 p.m.

Dr. Gerald D. Dawkins, Secretary    Lillian Priest, President
May 24, 2011

The Caddo Parish School Board (CPSB) held a special work session in its office at 1961 Midway, Shreveport, Louisiana at 3:00 p.m. on Tuesday, May 24, 2011 with President Lillian Priest presiding and the following school board members present being a quorum: Steve Riall, Jasmine Green, Willie Burton, Charlotte Crawley, Curtis Hooks, Mary Trammel, Bonita Crawford, Barry Rachal, Larry Ramsey, Ginger Armstrong and Dottie Bell. Also present were Secretary Gerald D. Dawkins, and Reginald Abrams, legal counsel. Mr. Rachal led the prayer and Pledge of Allegiance.

President Priest announced that today is the fourth budget work session and will be from 3-5 p.m. followed by a special called session of the board at 5:00 p.m. to address CPSB Policy GCA. She stated that during the first three work sessions, the board was provided the following documents from the superintendent and the administration: student assignment processes and policies, School Choice information, Annual External Audit done by outside auditors, the Comprehensive Financial Statement ending June 30, 2010 as well as the current financial statement for review (July 1, 2010 – March 31 and April 30, 2011). Also, revised “draft” working budgets have been provided at the last two meetings. Answers to board members’ questions regarding the 2011-12 budget have been provided as well as fund balances, funds in the restricted accounts, information made available to help the board make the best prudent financial decisions for the district. Information being presented today was provided to the board on Friday as promised by the superintendent.

Mr. Hooks inquired of the Board President who was responsible for setting the date and time for today’s meeting, and President Priest responded that she did. Mr. Hooks asked if, out of common courtesy, board members’ additional obligations might be considered, because the timeframe for today’s meeting is not convenient for his constituents who work during the day. Mrs. Crawley reiterated Mr. Hooks’ concern, because she believes consistency is a true mark of leadership and consistent would be 4:30.

Superintendent Dawkins stated that in continuing the 2011-12 budget planning process, information was provided to board members that resulted from many hours of debate and dialogue. He explained that staff looked at many options, none of which are painless, and all will require that unprecedented action is taken to insure the long-term education and fiscal health of the Caddo Parish School System’s students and staff. Knowing what the National and State picture looks like, Dr. Dawkins noted some of the same challenges other districts in Louisiana are facing as well as others that will in the days ahead, with school district bankruptcy being a new dreaded term in school districts across the state and the nation. Dr. Dawkins added that staff will continue to refine the information provided based on input, and staff will always look for ways to strengthen the district’s fiscal foundation by seeking input from staff at every level, as well as from the employee associations. He said the budget will protect the Core classes, it will force the district to always plan short-term and long-term. He added even after a budget is adopted, there will be much work to do with salary supplements and increases being two areas that continually are brought to the forefront and they will be addressed after the board is satisfied that necessary adjustments have been made to insure the fiscal stability of the entire district. The superintendent apologized to those who feel like staff has not been transparent with the budget process; however, he will not release information regarding the district until he is absolutely sure the Board of Education has possession of the documents and had reasonable time to assess the information. He further stated that while this budget is unprecedented in its potential impact, it is just short of having to do something drastic if any of the processes are delayed. After input is received tonight, Dr. Dawkins announced that staff will formulate the final recommendation while continuing to assess all aspects of the budget, reminding everyone that there is much work to do beyond the budget. Finally, the superintendent said he will be requesting another budget meeting and special session for May 31st, at the board’s pleasure; and at that time, staff will be complete with the budget recommendation and the language to implement a Reduction in Force for affected staff and staff categories.

James Lee, director of finance, stated that tonight’s budget presentation is based on the staffing formula changes being considered at the special session scheduled following the budget work session this evening. One of the areas board members had questions is Haynesville Shale lease/bonus money, and he explained that Caddo has only received approximately $94,000, not $40 million.
Mr. Lee presented the General Fund summary as has been given to the board. He said the new ending balance of $6.3 million is up from what was sent to the board on Friday ($5.9 million), because of some minor changes made since Friday.

Mr. Hooks asked how sure are we that we will reach the projections in the 2011-12 budget ($374 million plus)? Dr. Dawkins responded that if we don’t, there will be additional problems; however Mr. Lee works closely with the state and his fellow sources regarding projections and this is where he is projecting. While none of the numbers are guaranteed, the State could come in and try to do something different.

Mr. Ramsey inquired about the $6 million projected surplus and that the statement should really be the ending undesignated fund balance. Mr. Ramsey also noted that even with the newly presented draft budget, we are still spending $15.2 million a year over what we have coming in, so this is basically a reduction from approximately $35 million and asked Mr. Lee is it correct that we have corrected $20 million of the spending problem? Mr. Lee responded it is and stated even though this is not where we need to be, it is moving the district in the right direction. He added that restoring the fund balance to where it was a few years ago will take more than one year. Mr. Ramsey asked Mr. Lee to reiterate the numbers and if these adjustments have come after absorbing the major hits from health care costs and retirement costs? Mr. Lee responded that for 2011-12, it is anticipated that health care cost will increase approximately $8 million and retirement by approximately $8 million. Mr. Ramsey verified this means we have an approximate $18 million built in mandate that is a recurring cost, and Mr. Lee said that is correct. He said if the board makes cuts, cuts should be made in a way that least impacts instruction.

Mrs. Crawford asked staff if before the board saw the numbers was everything (non personnel) considered? The superintendent responded that staff considered many different options and initially tried to stay away from the classroom by also looking at inefficiencies in operations (transportation, warehouse, food service, purchasing). He said staff will continue to look at ways even after a budget is adopted that the district can be more efficient, and he agrees with the statement that this is something that should have been done in the past. Dr. Dawkins further stated that staff looked at every area of the organization and received suggestions from all aspects of the organization. He said he knows there may be other suggestions, but he believes all of them will be equally painful. Mr. Lee added that staff has looked at all areas of the operation to determine everything that needs addressed, but he reminded the board that 85% of the budget represents people. Mrs. Crawford said she understands that, but other suggestions, i.e. 4-day weeks, i.e., were mentioned and she only wants to make sure every possibility is exhausted before talking about laying people off. Dr. Dawkins noted that not only was 4-day weeks suggested, but year round schools as well and staff did not believe something that large could be undertaken for next school year; however a team will be put together to look at those possibilities during the summer and possibly bring some recommendations to the board before January. He also noted the impacts of any of the suggestions made. Mrs. Crawford said while she understands how important these discussions are, she also believes Caddo has been very blessed lately when considering those whose homes flooded by the Mississippi or were destroyed by the tornadoes. She encouraged everyone to keep good attitudes through this process.

Mr. Riall asked about the instructional services and the projected $9 million increase, one-half which appears in salaries and the other in benefits; and if, down the road, there are plans in place to address this? Mr. Lee stated that is a good question, but since instructional services is the largest area, the majority of the costs are salaries and benefits. He stated that he realizes this, but his concern is will we be able to finance instructional services for the next 10 years by cutting out everything else? Dr. Dawkins responded that the quick answer is no, and you can’t even go five years, which is why the focus has to remain on the budget even after a budget is adopted. Mr. Riall asked if there are any opportunities to creatively finance the district’s benefits program? Mr. Lee responded that in talking about benefits, we are mandated to pay into the retirement systems, so unless there is a change in state law, we cannot arbitrarily say we do not want to pay into this, but may want to set up 401(k) type plans where the employer contributions are not as much. However, until this law changes, that option is not available. Mr. Lee commended the Insurance Department for their effort to keep the rates down to 6-8 or no more than 10%. Mr. Lee also explained that one thing that will affect the budget in the next 3-4 years is National Health Care Reform and the approximate 2,000 employees that are not on the district’s health care plan. By law, he explained we will have to offer them the opportunity to
join Caddo’s health care plan which will increase our health care costs even more than it is now. Mr. Riall clarified that he wants everyone to understand that he is not advocating doing away with benefits, but he believes there may be some creative ways to finance these things. Dr. Dawkins also shared that the state and national picture will dictate a lot of what will happen in this area. He also said that over the next school year, we will ask the board to review all of its policies because many of them are outdated and impose upon us what we have done ourselves.

Mr. Rachal shared that the rhetoric coming from the public is not the actual reality which has been alluded to earlier in the meeting, i.e. $40 million from Haynesville Shale. He said in looking at the numbers, expenses have been reduced by $7.2 million from the existing budget, gross teacher pay has increased by approximately $4.5 - $5 million annually; operational and maintenance expenses have been decreased by approximately $3.32 million compared to the 09-10 year. Transportation salaries have been decreased by approximately $1 million with benefits increasing approximately $8 plus million dollars. Next year it will be 23 percent. Unfunded mandates from National Certification that Caddo is now responsible to fund, as well as the fact that the state supplanted the funds that were to come to Caddo ($147 million) and they took Caddo’s portion from the MFP funds. During the current year, Mr. Rachal noted the $21.5 million reserve and going from the original budget of $12.5 million to $21.5 million. From the public’s point of view, he believes they believe less and less money is going to teachers and the difference between the current budget and the budget for next year, we are looking at spending an additional $5 million in teacher pay. Mr. Rachal also discussed the property millages and that Caddo has in the next couple of years a millage (17.34 mils) and another at 6.95 mils that will be going to the public for approval (23 of 78). He said he states this because he does not believe this is the time to roll forward. He asked staff to look at with the new block system that students could have almost all their credits and only have to attend high school one-half the day, and at this time, the board has not addressed the ability for a student to only attend school one-half day which could help keep down the pupil teacher ratio at the high school level. He asked if staff has looked at changing the policy to allow for this practice? The superintendent responded that staff has not looked at the policy; however, it is something that needs to be looked into. Mr. Rachal asked that staff look at changing the policy so students that have earned the right can attend an internship and/or take college courses. Mr. Abrams explained that the district’s policy already allows for this. Dr. Dawkins reiterated that it may be more practice than policy. Mr. Rachal stated he believes this would address some of the class sizes. Mr. Rachal also asked about designated for specific purpose funds and where will the $2 million come from? Mr. Lee explained that it will come from three sources: the technology enhancement fund ($16 million) take $1 million and move into the General Fund for operations and the second is the insurance reserve fund ($5 million) and move $1 million from this fund and move it into the General Fund. He added that the third fund is the opposite and each year the board approved for staff to take the Medicare RDS (retiree drug subsidy) money (approximately $1 million annually) and it is placed in the OPEB trust fund (Retiree Benefit Funding Trust). Staff is proposing for one year only to suspend moving that money ($1 million) into the trust fund and leave it in the General Fund. Mr. Rachal asked if the ending number of $6.3 million is because we are shifting money from designated funds into the General Fund. Mr. Lee said that is correct.

Mrs. Bell clarified that designated funds include retirement and health care ($33 million)? Mr. Lee responded that is correct. Mrs. Bell asked if their (five of the board members) retirement and health care is also included? Mr. Lee said that is correct. Mrs. Bell asked Mr. Lee if he looked at cutting the amount budgeted for board travel? Superintendent Dawkins responded that staff did not cut the board travel as that is the board’s decision, but staff will provide the dollar amount in the budget for board travel? Mr. Lee stated that there is a $100,000 reduction in Central Office and Board travel and he will explain this later in the presentation. Mrs. Bell said she would rather see the Board travel cut and given to instruction. Mrs. Bell also thanked the superintendent for the information sent to the board because she went to a community meeting and it was beneficial in explaining to them and respond to their questions.

Mrs. Crawford asked why MFP is shown as $199,000,000 plus and this is more than we have been getting, and also $202 million under state resources? Mr. Lee clarified that there is more than one state source and the $199,000,000 is only one source. Regarding the increase, Mr. Lee explained that the 2010-11 amount was reduced by the amount for EduJobs.

Mrs. Crawley stated that in all the documents the board has received, the board has yet to receive the document, the book where every employee is listed by number and what they do, which she
said is the bible for the district’s budget, and she believes we are working in the dark until we get that document. Mr. Lee responded that the reason this document has not yet been provided is because it is contingent on the staffing formula the board is considering at the special session tonight. He reminded the board that the budget that will come to them is very dependent upon the staffing formula and until staff receives that, the numbers will change. Mrs. Crawley said that as much as she appreciates Mr. Lee, she does not accept that as a legitimate argument and she believes if the board had that document, they could see what we have and what we will have when the cuts are made. Superintendent Dawkins stated that the Board’s next document will be that document.

Mrs. Crawley asked about instructional services and is that only a classroom teacher and their pay? Mr. Lee explained there is more to instructional services and you can get an idea from the budget provided tonight on the first page which will provide the total instruction – regular ed teachers, special ed teachers, vocational teachers, other instructional programs, i.e. ROTC, coaches, driver’s ed, pupil support, nurses, etc. Mrs. Crawley asked if any of the consultants that go to the schools are listed here? Mr. Lee explained that there may be some in inservice training. Mrs. Crawley asked can it be said that when we increased instructional that we increased teacher pay by $5 million? Mr. Lee explained you kind of can, and referenced the increases in regular ed teacher salaries, special ed teacher salaries, and vocational teacher salaries which total almost $5 million. Mrs. Crawley noted the cut of travel by $100,000 out of $20 million, but she doesn’t believe that is a large focus. She said so that it will be equally painful, she believes you must take the children out of the pain and the first two budget saving items are Vision 2020 and the Pupil Teacher ratio. She also expressed her misunderstanding of why we do not take some of the set aside funds in QZAB ($4-$6 million) and why we will not take money out of savings.

Mr. Hooks referenced equally shared and pain and asked how many times will the board be lied to about what is happening? He said he was told to his face that if the board passed the Vision 2020 plan, no one will lose their job, and asked about the $1.5 million under sales tax? He asked how can the board go to a meeting on the weekend and explain anything when the budget was not even complete (two sheets of the budget the same and one sheet missing)? Mr. Lee responded that this was his fault and the correction was sent out immediately upon it being brought to staff’s attention. Mr. Hooks asked if we are going over the budget, why wasn’t this caught? He also asked why does staff believe the sales tax will increase? Mr. Lee responded that there have been some positive effects on the sales tax as a result of the Haynesville Shale even though Caddo has not received a lot of lease bonus payments, the equipment they bring in and drilling rigs, they must pay sales tax on when they bring into the district the first time. In discussing this with the sales tax administration, it is believed that it will be at this amount for another year; and at this time, we are up by $1.5 million over what was budgeted for the year. Mr. Hooks asked about state sources and the Minimum Foundation Program and if Caddo is really expecting the enrollment to be higher this year? Dr. Dawkins responded that it is a combination of things, one being enrollment and another is whether or not the state will give the funding level that they promised, because they kept the $2.75 million from the districts. Based on this, it is a projection and is the best staff can do at this point. Mr. Lee added that this is based on what is received from the state to date. Mr. Hooks asked about the increase in the Total Other Sources amount? Mrs. Lee explained that it is the $2 million in transfers previously discussed from reserve funds. Mr. Hooks asked about the other sources, and Mr. Lee responded the only other sources are the transfers in from reserve funds, and total other sources is a terminology used in accounting and this year their happens to be only one. Mr. Hooks referred back to the $374 million and asked how sure everyone is with this figure? Mr. Lee said he feels very comfortable with this figure and he has documentation. Dr. Dawkins stated that he also feels very comfortable with this figure as Mr. Lee has worked very hard and close with the state and local sources and it looks like we are on target, even though there could be things happen at the State level that could change everything.

Mr. Lee shared with the board the items in the proposal, i.e. revenues, transfers from reserves as well as certified and classified support staff reductions, restructuring of purchasing and warehouse system, building costs for consolidations, reduction of retirees returning to work (approximately 100), reduction of purchase of staff cars and buses, transportation for Choice students out of Title I, reduction of Central Office out-of-parish travel for a combined total of revenue and savings of approximately $20.7 million.
Mr. Riall asked about the $5.1 million savings on facilities as a result of Vision 2020? Mr. Lee responded that at the last budget work session that amount was revised to approximately $3 million because of the 6th grade center situation. Mr. Riall said it is not specifically itemized, and Mr. Lee explained that is what will be highlighted later in the discussion.

Mr. Ramsey asked about the savings projected as a result of restructuring the purchasing and warehouse systems? Mr. Lee explained that the majority of this reduction will be in staff and more efficient operations. Mr. Ramsey asked about the $6.3 million in certified staff reductions and Mr. Lee explained that this amount includes Central Office, non-certified staff and shared with everyone the reductions as a result of the proposed staffing changes being presented at the special session, which changes the staffing formula at the levels depicted. Mr. Ramsey asked about the details on where these teachers are, and Mr. Lee responded that Human Resources has that information. Mr. Ramsey said he comprehends the big cuts that will need to be made and when one begins to look at the positions and the numbers, he believes it will be interesting to see how each school will be impacted. He asked the superintendent about his comment about just short of doing something drastic and asked if the board will have to do something drastic if the proposed budget is not adopted? Dr. Dawkins confirmed that if something is not approved or if there are some additional issues to cause the board to take things off and replace with something else, we will have to be cautious that more pressure is not put on the schools short of having a complete restructuring of all operations which would be drastic. Mr. Ramsey stated he realizes this amount of money will have to be cut to even come close to getting the district’s operations in shape and is why he stated at the last meeting the need to engage people on the ground who will be impacted the most, i.e. principals and teachers at the school sites. He asked if he can be assured that this has taken place in the process to come up with the numbers presented. Dr. Dawkins responded that staff received feedback on a couple of levels, i.e. Superintendent’s Advisory Committee that consists of representatives from the employee associations and principals (5 or 6), as well as feedback from principals through meetings and surveys. He said some of the things they submitted are some of the things shared in this presentation. The superintendent also stated that approximately 10 additional formulas were looked at, all which have implications. Mr. Ramsey asked Mr. Lee to explain what the QSCB reserve funds are? Mr. Lee explained that in 2009 the district was able to obtain funding and sell $17 million worth of QSCB (Qualified School Construction Bonds) at no interest and they can only be used for construction or renovation of facilities or the infrastructure in the facilities. The district pledged its constitutional millage, which does not go away and does not require voter approval, but knowing it was needed for the daily operations, the board allowed staff to establish this reserve fund (approximately $16 million) about 3 years ago to help the General Fund when experiencing years such as this year and possibly next year to repay it (approximately $1.1 million a year). Mr. Ramsey clarified the district was allowed to borrow money interest free, but the money was placed in a restricted fund in the bank to pay that debt off in time. Mr. Lee said that is correct.

Mr. Hooks asked Mr. Lee to explain building costs and Mr. Lee responded that this is the cost at the schools being taken off-line next year, i.e. maintenance and utilities for these buildings. Mr. Hooks said he has a list of costs for those schools going off-line, i.e. Bethune $5,950, Hillsdale $2,159, Hosston $1,468, M. J. Moore $3,194, Newton Smith $2,059 for a total of $18,106. Mr. Lee indicated he would be interested in talking with Mr. Hooks about these numbers. Mr. Hooks asked that someone explain the restructuring of the purchasing and warehousing system. Mr. Lee explained that Mr. Wooffolk and the Purchasing Department manager presented changes that are mostly at the warehouse, but some in the purchasing department and other departments at Central Office and that these changes will allow for more efficient operations. Tim Graham added that staff is looking to restructure the mailroom and mailroom procedures will be done away with and changed so that departmental secretaries will be responsible for handling mail for the departments. Mr. Graham also shared ways that streamlining the warehouse operations will provide efficiency in the operations as well as savings to the organization. Mr. Hooks asked if these services will be contracted out? Mr. Graham said not at all. Mr. Hooks also referenced the line item to postpone ordering buses and staff cars and he believes staff cars need to be cut out with only the superintendent and director of security having staff cars that can be taken home. Additional staff cars should remain at the office and only used during the day for school business, and asked that the superintendent and staff look closely at this. Mr. Hooks also asked how many retirees are now working for Caddo and Mr. Lee said approximately 100. Regarding the one-time transfer from the reserve fund, Mr. Hooks asked for a copy of the list and Mr. Lee responded he will provide this information. Mr. Hooks asked about the results in review and consolidation of bus routes? Mr. Jones explained that this is an on-going process and over the
past four months, the department has consolidated 29 bus routes, and this has freed up 29 buses. The students on those buses have been spread out over other buses. Mr. Hooks shared his concern about this and that students getting out at 3:30 do not still need to be at the school at 4:00. Mr. Jones responded that the consolidation of buses will help free up buses and help with the late bus situations. Mr. Lee explained that we currently have 15 vacant bus driver positions and Mr. Hooks added that leaving students on a campus too long is only asking for trouble. Dr. Dawkins further stated that these route consolidations will allow us to do more, and do more expeditiously by correcting inefficiencies. Mr. Hooks noted the problem with Fair Park buses being late the entire school year. Dr. Dawkins responded that staff will look into this.

Mr. Rachal asked how many staff cars are allowed to go home? Mr. Lee responded that some are for those employees who are on call, i.e. trucks that go home with a mechanic in the event a bus breaks down, etc. Mr. Woolfolk stated that out of 256 vehicles, there are 55 vehicles that go home. These are transportation mechanics, security, maintenance vehicles and explained that sometimes these mechanics need their vehicle in the event a bus does not start in the morning, they have needed equipment to travel to where the bus is parked to fix it. He said the maintenance director and supervisors are responsible for addressing any issues 24 hours a day, and security is the same. Mr. Rachal asked if it costs more if the cars are returned to Central Office, warehouse, etc.? Mr. Woolfolk answered that staff has done a preliminary study on this possibility, and they are still assessing this, because the initial study showed if the stipend of 55 cents a mile is paid versus driving the car home, it could possibly save approximately $55,000. Mr. Rachal asked staff to verify how much school board members are reimbursed for mileage when driving their car to a school board related function? Mr. Lee responded that current reimbursement for any school employee for business purposes is 48 cents per mile, which is expected to increase this year. Mr. Rachal stated that he believes this would be very expensive to the district.

Mr. Abrams stated that employees also get reimbursed for traveling to school sites and there are issues associated with where you begin calculating the mileage, as well as insurance issues because the school board is responsible. Mr. Woolfolk reported that staff is preparing to bring a full report on their study as to how the district should move forward with district cars, stipends, etc. Mr. Rachal asked how many Central Office cars are assigned to staff members? Mr. Woolfolk said he believes there are only four – the superintendent, himself, Antionette Turner, and Dr. Mary Nash Robinson. Mr. Rachal asked Mr. Woolfolk how many miles he drives a day, and Mr. Woolfolk reported that the study indicated 3,100 miles for the year, and Dr. Dawkins was approximately 5,000 miles. Mr. Rachal asked for verification that these vehicles are used for business purposes only? Mr. Woolfolk said absolutely and personal vehicles are used at night. Mr. Rachal also asked for staff to confirm that staff members are reimbursed for out-of-parish travel? Mr. Lee responded that staff has looked at employees’ out-of-parish travel and that if someone takes their own vehicle, they are reimbursed, as well as if employees are going from school to school on school board business.

Mrs. Crawley asked staff to review the policies on use of staff cars and trucks and provide her a list of who is assigned cars as allowed by policy. She also asked about the postponement of buying staff cars and buses? Mr. Lee explained that there is not money in this year’s budget nor next year’s budget for buses, and the $55,000 was for staff cars only and it has been removed from the budget. Mrs. Crawley also asked how many cars will $55,000 buy? Mr. Lee said maybe three. Regarding QSCB, Mrs. Crawley asked if this year is the only year we have paid back the $1.1 million? Mr. Lee said we paid it back last year in May and will again this year at the end of May, 2011. Mrs. Crawley asked what fund was it paid from, and Mr. Lee responded from the General Fund. She asked Mr. Lee to clarify that we can take money from General Fund to go back to this, but we can’t take that money and put it back in the General Fund? Mr. Lee said yes we can and that is what is being done. Mrs. Crawley stated that’s not one of the QSCB payments. Mr. Lee responded that it is, the Technology Enhancement Fund that has $16 million is the money set aside to repay the QSCB and is what is bringing $1 million. Mrs. Crawley asked are we going to pay back the General Fund from last year; but what are we going to do this year to pay it back, i.e. take it from QSCB? Mr. Lee explained that is why a reduction from $16 million to $15 million is seen. Mrs. Crawley stated that doesn’t add up to the $2 million, and Mr. Lee said the second million will come out next year. Mrs. Crawley stated that she believes she understands now that we can go back and forth, but we only need to make sure that the citizens meet their obligation. Mrs. Crawley asked Mr. Lee if we have to have $16 million now for 16 years from now? She added she understands and she doesn’t understand why we can’t
Mrs. Bell asked about the additional sales tax revenue and if this is what we are receiving without an increase? Mr. Lee responded that is correct and clarified that any discussion on a roll forward involves property taxes. Mrs. Bell shared that she has received numerous calls regarding the roll forward option and that they do not support increasing the property taxes. Mrs. Bell also asked about the certified staff reductions in the budget and if it includes maintenance, teachers, etc. to save the $6 million? Mr. Lee explained that is through the staffing formula that the board will be discussing later in the meeting. Mrs. Bell asked if $430,000 is what is being spent on the schools before they were taken off line? Mr. Lee confirmed that is correct. Mrs. Bell asked if Mr. Hooks’ question was what will the district save? Mr. Lee responded that the $430,000 is the amount that was spent on utilities and maintenance on the facilities that are being off lined. She asked about the $18,000 and if that is what the cost will be beginning next year and Mr. Lee said that is correct. Mrs. Bell asked about the information on reductions relative to regular ed teachers and who are the 79.5 teachers? Jan Holliday, director of certified personnel, explained that each year the staffing formula is reapplied to each school based on their October 1 enrollment of the current school year. Mrs. Bell asked if the 79.5 teachers consist of retirees, teachers with temporary certificates? Mrs. Holliday explained these are positions. Mrs. Bell asked who holds these positions? Mrs. Holliday said the information does not put a person with the position, and it could even be a vacant position. Dr. Dawkins added that it could also consist of retirees who returned to work. Mrs. Holliday also stated that it could be a retiree returned to work position and it will not be at that school next year, and some of the positions held by retiree return to work persons will have to be filled next year and not eliminated from the budget because a teacher will be needed in that particular classroom. Mrs. Bell asked if she understands correctly that the 79.5 positions will save the district $5 million? Mrs. Holliday said that is correct. Mrs. Bell said to her that is eliminating 79.5 positions and if we are eliminating 100 retirees that have returned to work, then those 79.5 in the classroom should not be eliminated. She asked if some of the 79.5 will be retiring? Mrs. Holliday shared with the board that there are 91 return to work retirees in teacher positions that will be terminated, 57 persons terminated due to their temporary status of only one year, and 61 teachers who have signed retirement papers. Mrs. Bell also referenced the cuts listed in the support staff areas and that many of these she believes will be covered through attrition, so when this information is put out to the public and people do not really understand it, they get upset with the board and the district. She only wants the public to understand these facts and how the savings will occur.

Ms. Trammel stated that when talking about positions without titles, she is not clearly understanding the numbers listed and where the positions listed are coming from. Ms. Trammel referenced the three different formulas previously presented and the staffing formula presented to the board today? Mr. Lee explained that in looking at the non-certified positions being considered for reduction, staff first looked at those positions that were vacant in each category and then staff looked at the school clerical positions that are tied to the staffing formula and because of requests over the years for additional staff approved by the board, they are now overstaffed. The remaining positions that are not vacant will be done on a seniority basis.

Mrs. Armstrong asked if she understands when there is a position reduction, that there will be some cross training so we might ultimately have someone already employed being retrained for another position? Mr. Woolfolk explained that part of the Vision 2020 is to prepare the employees for cross training so that employees could be moved laterally and prepared to take that position. Mrs. Armstrong asked how many retirees does Caddo have for the classified area? Dr. Dawkins responded that Cleveland White reported that there are 22 return to work retirees and 3 of these 22 are housed at Central Office. Mrs. Armstrong asked about those located at the school sites? Mr. White said there are retirees at the school sites in all categories, and they will be the first to be reduced, all 22 of them, 19 at the school sites and the three at Central Office. Mrs. Armstrong asked about other positions other than return to work retirees who have already submitted their retirement papers? Mr. White said 58 have signed their retirement papers and
these cover all the support personnel. Mrs. Armstrong asked if it is available, could they get a copy of the breakdown on these and matched to the reduction list? Mr. White responded that a list of retirees was submitted to the board members. Dr. Dawkins reminded everyone that these reductions are not final; because at this point, these are only recommendations, and the work in front of us is to match these and find a place for everyone possible. Mr. White added that is definitely part of the process and they will look at all those persons who are coming out as a result of attrition. Dr. Dawkins also stated that staff will do everything possible to get as many as possible in place. Mrs. Armstrong also asked what dates are being used for staffing, May 31st of this year, February 1st or last October 1st? Mr. Lee responded that the student count as of October 1 is used for determining staffing formula for the next school year. Mrs. Armstrong asked about the February 1st date? Mr. Lee said discussion has taken place about using that date since it is a more current count. Mr. Lee stated he does not believe it is a great difference, but it is information staff can provide the board by the next budget work session.

Mr. Lee continued by sharing with the board the breakdown of the undesignated $6.3 million, and highlighted possible savings through reductions in the non-certified support reductions. He stated that the board asked staff to look at things other funds can do to help and that the bookkeeper in the business services area will be paid by Capital Projects which will be a savings to General Fund, and a clerical position in Instructional Services that will be covered by Title I funds. He briefly highlighted reductions in the purchasing and warehousing area as well as the preliminary breakdown of savings in Phase I of Vision 2020 with the consolidation of schools.

Mrs. Crawford asked staff about the 67 school office clerks and school secretaries because these positions are very important to how the schools are operated on a daily basis? She said she is not seeing substantial numbers in Central Office and she believes the schools are taking the greatest hit. Mr. Lee explained that staff looked at the total number of non-certified employees in the district and about 20% of the non-certified employees work in Central Office or the warehouse or other buildings and 80% are in the schools. When looking at reductions and since there is 80% at the school level, it would be expected that the reductions would be in similar proportion and these numbers are within that proportion. Regarding retirees in the classroom, Mrs. Crawford said she doesn’t want to see a long-term sub in a classroom if there is a retiree that is qualified to be in that classroom, and she is not referencing certified subs, and encouraged staff to monitor this to ensure that it does not happen. Dr. Dawkins confirmed that staff will monitor this and staff is aware that there are some retirees with unique skills and will be assessing this option.

Mr. Hooks asked about saving money and what do we do when we take funds from one and move to another? Do we ever replace those funds? Mr. Lee said in the case of the two positions mentioned, the clerical position and the bookkeeper that were being paid out of General Fund monies, will now be paid from a different fund and will become a savings in the General Fund. Mr. Hooks asked when will we really see a savings in these type situations? Mr. Lee said you would see an immediate savings.

Mrs. Crawley asked if return to work retirees (principal, supervisor or Central Office) will be gone? Dr. Dawkins responded it includes all return to work retirees. Mrs. Crawley asked if one is a retiree and is a science teacher; and if we need a certified science teacher, will we rehire that person? Dr. Dawkins said staff will assess that situation. Mrs. Crawley asked for the number of teachers that each school will lose with the staffing formula, because she hates voting without that information. She also mentioned that all clerical workers and their jobs are not created equally so because you work at Central Office, you may be making more money, but if you reduce the same ratio, it is as if you are saying the Central Office secretaries will be missed equally to the school personnel and she is saying no one will be missed more than someone at a school site because that is where the children are.

Mr. Rachal asked for the number of positions that are currently vacant, filled by a retiree, filled with a one-year contract, or people retiring, so the board can see the net affect.

Mr. Ramsey asked about the consideration of several million dollars in stipends being paid to the AU school personnel and how this was taken care of? Dr. Dawkins explained that there was a three-year agreement with the MOUs and in consultation with counsel and staff, we are obligated to do this. Mr. Ramsey asked if the district has received any additional funds? Dr. Dawkins said we have not received any additional funds. Mr. Ramsey asked if all the available funds are
included in the numbers presented? Mr. Lee explained that at the present time, the discussion is about General Fund. Mr. Ramsey asked if there are any additional grants sitting out there that may come in and can be applied to the General Fund. Dr. Dawkins said while there may be some School Improvement grants totaling approximately $4 to $6 million, staff is looking to see how some of this may offset it. Mr. Lee announced that he will get this information. Mr. Ramsey asked if this means there could be some additional funds? Mr. Lee said if it is available and can be used for that purpose. Dr. Dawkins reminded them that the SIG grants are specifically for the schools that have achievement issues and staff will determine if there is any duplication and the possibility of using them. Mr. Ramsey asked how soon will that be determined and the superintendent stated that staff was just notified last week about the possibility. Mr. Ramsey also referenced the staffing formula and asked if, based on what he sees, the 7-12 configuration will have one administrative staff? Mr. Lee said that is correct and the need for fewer principals but additional assistant principals. Mr. Ramsey asked about those situations where we are taking existing General Fund positions and paying them with Title I funds and if there are any legal issues associated with doing this? Mr. Lee responded there are, but the Title I director has shared with staff that this particular position can be paid from Title I funds. Mr. Ramsey said there were several and he believes one was the mail clerk, and Mr. Lee said that is in Child Nutrition funds. Mr. Ramsey said that while he has always believed there were opportunities to offset some of these General Fund budget dollars, it is important to make sure that it is done very carefully and legally. Mr. Lee added that you must be careful when doing it and staff did work with the Title I director to ensure that this position could be paid from a Federal or State grant and you must also make sure the grant paying it will be around for a while, because there would be a question if the grant was eliminated would General Fund then pick up paying for the position or would the position be eliminated.

There being no additional discussion, the budget work session adjourned at approximately 5:37 p.m.
May 31, 2011

The Caddo Parish School Board (CPSB) held a special work session in its office at 1961 Midway, Shreveport, Louisiana at 4:00 p.m. on Tuesday, May 31, 2011 with President Lillian Priest presiding and the following school board members present being a quorum: Steve Riall, Jasmine Green, Willie Burton, Charlotte Crawley, Curtis Hooks, Mary Trammel, Bonita Crawford, Barry Rachal, Larry Ramsey, Ginger Armstrong and Dottie Bell. Also present were Secretary Gerald D. Dawkins, and Reginald Abrams, legal counsel. Mr. Rachal led the prayer and Pledge of Allegiance

Superintendent Dawkins shared with everyone that today was the last day of the school schedule and that he believes the year ended on a positive note. He further explained that today’s meeting is the latest in a series of budget work sessions and that the schedule is to have the complete recommendation to the board by June 7th for board action on June 21st. The superintendent stated that the input has been very important in the process and there is still much work to be done. While the district has been faced with the monumental task of balancing the budget as a result of declining revenues and unfunded mandates, the Vision 2020 plan will consolidate programs and help streamline and reduce costs savings to make the schools more efficient. Dr. Dawkins stated that staff will continue to review all programs at the schools and Central Office to determine what is necessary to maintain a fair and balanced educational program. Alternatives to layoffs, and the intent to use attrition as much as possible to balance this year’s budget, budget work sessions whereby staff presented challenges for presenting a balanced budget for the upcoming school year have all been considered in the budget process. Dr. Dawkins reported that last week, staff presented the teaching allotment formula to help balance the budget, and today will present additional changes to the clerical staff, etc. to address overstaffing that has occurred over a period of time. The superintendent explained that these changes will result in savings to the district and will help balance the budget; but unfortunately it will result in a reduction of staff, which will require the board to implement the reduction in force policy. After analyzing all positions, staff believes it will be able to maintain a balanced and fair educational program throughout the district. He also added that staff will continue to work on the budget recommendations before bringing a final recommendation on June 7th. Dr. Dawkins also explained that there is also still much work to do in Central Office and the reorganizing of it, and this will be reflected in the final recommendation. The superintendent added that it is not the intent to rehire return to work retiree teachers unless staff cannot fill positions with otherwise certified teachers. He also said that it is not the intent to rehire retired administrators and the numbers represented in the reduction in force is less than presented initially and this is because of eliminations through attrition rather than terminating all persons.

Jim Lee, director of finance, shared with everyone the projected General Fund ending balance, a little less than $5.6 million. He explained that it is the same information presented to the board last week, but it includes the change in the certified staffing formula and at this time, the budget stands at a $5.5 million ending balance. He further stated that staff will be asking the board to consider, in a special meeting called for after the budget work session, the clerical staffing formula. Mr. Cleveland White explained that classified personnel was charged with the task of revising the current school clerical staffing formula to address the over staffing of clerical positions that has occurred throughout the years. He stated that the current policy, Policy GDA, was adopted by the board in 1979 and has not been revised since 1987. Throughout the years there have been programs added in many of the schools that required additional staffing and the policy did not reflect those changes which created the over staffing. He said that with the closing of Linear, Linwood, Ingersoll, and Newton Smith Elementary there are many employees that were “double parked” in order to save jobs. Mr. White said some positions were eliminated because policy did not support the positions, i.e. elementary library clerks. Employees that could not be replaced by way of attrition were “double parked” in order to save jobs, but resulting in over staffing. Mr. White stated that the proposed clerical staffing formula addresses the current school levels as well as the newly created school levels, i.e. preK-6 and 7-12. With the majority of Caddo’s schools being evenly staffed, the proposed staffing formula will run a basic bare bones approach to staffing, addressing over staffing and justifying placement of staff where it is needed the most. Mr. White shared a handout of the proposed clerical staffing formula explaining that all schools will have at least one secretary and one office clerk. The 7-12 schools will have one bookkeeper and all high schools will have one bookkeeper. All schools will receive one secretary for 900 and less students. Elementary, K-6, K-8 and middle schools will receive two secretaries if they are greater than and equal to 900 students. All high schools, 7-12,
will receive two secretaries if the student enrollment is between 900 and 1,499. In schools with grades 7-12, and because of increase in student population, they will receive three secretaries if the student population is greater than or equal to 1,600 students. High schools between 1,500 and 1,799 will receive three secretaries. High schools with enrollment of 1,900 and above will receive four secretaries. He also shared that high schools are allowed an additional bookkeeper if the schools activity fund is in excess of $1 million. Regarding office clerks, Mr. White said if a school has less than 900, it will receive one office clerk. In grades 7-12 and with enrollment less than 1,500 will receive two office clerks. High schools with less than 900 will receive one office clerk, and two with greater than 900 students, and the new 7-12 configurations with greater than 1,500 will receive three office clerks and high schools greater than and equal to 900 will receive two office clerks. Mr. White also said there are currently 27 library clerks with most being removed from the elementary schools since policy did not support it; however, the proposed policy says that all schools (elementary, middle or high school) with an enrollment of 750 will receive a library clerk. Schools gaining a library clerk from an increase in enrollment to 750 include Forest Hill, Shreve Island, Southern Hills, Summerfield, Summer Grove, and University. School losing library clerks due to enrollments less than 750 are Academic Recovery, Booker T. Washington, North Caddo, Green Oaks, Ridgewood, Broadmoor, Donnie Bickham, and Vivian. The 270 current clerical positions will be reduced to 197 positions.

Mr. Lee stated that in looking at all the staff reduction, staff attempted to accomplish as much as possible through attrition and that staff is currently looking at a reduction of 313 positions included in the proposed budget before the board. Thus far, he said staff has been able to reduce about one-half of those through attrition, elimination of vacant position, and currently approximately 166 by other means. A list of all positions being considered for reduction was presented along with the areas they cover, representing a total of 225 staff positions. Regarding school based cuts, staff is looking at the part-time custodial and clerical staff representatives, almost one-half of which was addressed through attrition.

Dr. Dawkins announced that staff continued to work on the proposal over the holiday weekend and will continue to work to bring the board a balanced budget for the June 7th CPSB Meeting.

Mr. Hooks stated that in looking at the information received over the weekend that he is concerned about the large amount of money in the line item on recruitment in the Budget Summary. Mr. Lee explained that the large amount in that item ($4 million) was for the incentives paid to the targeted schools. Mr. Hooks said he doesn’t understand how the district can go from plus $4 million to $45,000. Again, Mr. Lee explained that these incentives are now located in another line item and highlighted some of the changes from last year’s to this year’s budget. Mr. Hooks asked when Newton Smith and Ingersoll closed did staff not see this coming. Dr. Dawkins stated that there was some moving of people, as well as the reduction in the number of people and we did see some of this coming; however, what you have is a history of positions that have built up over the years and we are now having to go back and clean it up. Mr. Hooks asked if when combining these schools we will now have two principals, two assistant principals at the same school? Dr. Dawkins responded the formulas were not working and is the reason for going through the staffing formulas. Mr. Hooks referenced the question asked of the superintendent at the forum held at J. S. Clark and the response that no one would lose their job. The superintendent responded that what he has said all along has been that we hope to minimize the impact on jobs, and there is no 100% guarantee of that when you have a $30 million deficit. Mr. Hooks said he will not vote to lay anyone off, because we have allowed ourselves to get into this place. He stated that in April he requested information on the $10 million paid to consultants because he believes that is part of the reason we are in this deficit situation. He asked which ones of the consultants were approved by the board? Dr. Dawkins stated that while he did not know what information was being referenced, he does know that the board approved anything that was spent and a significant amount was Federal dollars for teacher training. Mr. Hooks said he received information on April 19th and he is asking that the superintendent show him in writing the date the board approved these consultants and contracts. The superintendent said staff will provide him with the information. Mr. Hooks stated that he is concerned about any reduction in these positions and asked Mr. White to further clarify the staffing formula because he believes it to be outrageous to raise the bar in such a way since there are not that many elementary schools that come close to 900 students. He also said there may be a couple of middle schools (Middle Magnet and Youree Drive) that may have two, but the remainder are not close to the number to have two. He further said that the neighborhoods are dying and Fair Park will never have what they had years ago, but he believes this is making it highly impossible for
them to stay on target. Mr. Hooks said when you take a bookkeeper, secretary and a clerk from a school, this is a big problem and noted what responsibilities these employees have. While he understands the need to make cuts, Mr. Hooks suggested that money from the $16 million in technology and possibly some of the Title I be transferred and used to keep from laying off people. Mr. Hooks said we are not broke; we have money and asked what is it that is done in Caddo? Is it an assembly line for building cars? No it is not, but it is designated to creating teachers, doctors, lawyers, businessmen; and you cannot lay off teachers because if not for teachers, he would not be here. Mr. Hooks added that the custodians in the schools are irreplaceable. Mr. Hooks asked for clarification on cutting the three mechanics at the warehouses and if one of the three did not just receive a raise when implementing the new salary schedule. Dr. Dawkins answered that he could not respond with those specifics. Mr. Hooks asked the superintendent if he thought it fair for us to change their salary schedule and then lay them off? Dr. Dawkins responded that he was hopeful that we would not have to have this conversation about laying off people and hopefully the final analysis will minimize the numbers even more. Mr. Hooks asked the superintendent and staff to look at his suggestion to transfer some of these funds before a decision is made to lay off people.

Mr. Rachal stated his appreciation for the quick response to his request for additional information and asked for clarification of the following items: Under Section II, General Administration, Budgeted Positions, Mr. Rachal asked if staff has looked closely at the positions and if all are necessary? The superintendent said he believes they are necessary and are consistent with where we are going to be. He added there has been a transition with Mrs. Gunn’s former position and believes this is what is needed from the General Administration. Mr. Rachal asked if he believes there are targeted positions that will stay focused in particular areas? Dr. Dawkins said he does. Mr. Rachal also asked about the five General Administration positions, but six clerical positions. Dr. Dawkins responded that the sixth clerical position is the Board’s secretary. Under Pupil Appraisal, Mr. Rachal asked if this area could be broken out with how many there are in each classification? So that he can better understand the positions and the responsibilities of each, Mr. Rachal asked that staff provide a breakdown and justification of the positions in the Attendance Department. The superintendent responded that staff will provide the requested information, but reminded Mr. Rachal that this is a department in transition along with the Student Services office. Mr. Rachal noted that with JPAMs in place, he believes there should be some streamlining of jobs and responsibilities and asked if this can be budgeted in next year’s budget? Dr. Dawkins stated that he will provide information on what he believes this should look like when presenting the final budget recommendations to the board and this will be done by June 7th. Mr. Rachal asked for clarification on the Instructional Supervisors and can he receive a justification of the positions? Mrs. Turner responded that the instructional supervisors work individually and collectively with teachers in the classroom, training in the content areas, and they monitor DAT teams. Mr. Rachal asked for an explanation on how they break down their time. Mrs. Turner responded that it depends on the content area and if there is more one on one with teachers or another teacher needing assistance on a particular strategy. Mr. Rachal asked if the supervisors specialize in any one Core subject? Mrs. Turner said they are specialized in Core subjects, but they also have specific strategies that will work on improving instruction overall. Mr. Rachal asked that this be broken down so the board can see where the resources are going. He also asked about having someone work full time on grants and if this position is justifiable? The superintendent responded that staff has looked at the grant writer position in different ways: (1) a grant writer that maintains grants since some are repetitive, (2) a grant writer looking for grants outside the regular state level, ie. Foundations, and (3) for hire grant writers that do this for a fee. Dr. Dawkins further explained that staff’s final recommendation will give the board an idea of how staff proposes to cover grants. It is important and there is money out there that the district is not receiving and will have someone to commit their time to this, either full time or not if combined with another position. Mr. Rachal followed up on his response to a request for information on the number of bookkeepers and the justification for the number. Mr. Lee reported that there are three departments in the Finance area, i.e. Finance, Accounting/Accounts Payable, and Payroll Departments. He further explained that the Accounting and the Payroll Departments will have the majority of bookkeepers with the number based on the number of grants and the dollar amount in grants. He said there has been some decline in this area as staff has seen already. In the Payroll Department, there are several systems that staff is responsible for to make sure everyone is paid. Departments that do not report directly to him but have bookkeeper positions include the Insurance Department, Purchasing Department (where there is a reduction proposed), and Auditing Department. Mr. Rachal asked that the bookkeeper numbers be broken down by department. Mr. Rachal noted
the years that the district has received excellent financial reports and while he doesn’t want to get in any auditing issues, he asked about the possibility of reductions in this area? Mr. Lee responded that he agrees that we do not want to do anything that will create any auditing issues. Mr. Rachal also asked for clarification on the Security Department positions and how they are broken down? Mr. Murry explained that the Board wanted to make certain there was at least one security person on every campus and there is no set formula to determine how many are on a campus and he presented various examples of problems at schools, neighborhoods, etc. that factor in when assigning them to the campuses. He also stated that requests are made by schools and by board members and is why there may be more on a campus. Mr. Murry responded that he can provide the breakdown on numbers and where they are located. Mr. Rachal reiterated that there are 313 positions that are being eliminated and at this time 147 are from attrition and also positions that are still vacant. He said any money that can be saved in the areas he has mentioned might help offset the need for those funds in the future.

Ms. Trammel asked if she understands correctly that this staffing formula being discussed is to be presented to the board for action at a special session on this date? Dr. Dawkins said that is correct. Ms. Trammel asked if there is a formula for clerical staffing at Central Office? The superintendent stated he is not aware of a formula. Ms. Trammel said she is asking this question because in some of the areas, there are a lot of clerical positions that need help and we are bringing in subs to help them, and she believes we should be using staff from within and save this money. Dr. Dawkins stated that staff is assessing this during the budget process. Ms. Trammel asked about the General Fund reduction details and reorganization in the Purchasing Department and if this will be done in other departments, looking at repetitious responsibilities. Dr. Dawkins stated that staff can provide this information. She also said that the district received millions, mega dollars when there was a grant writer on staff. Dr. Dawkins said while we did get a lot of Federal dollars, staff continues to look at this proposal and will provide information to the board. Regarding the Maintenance Department, Ms. Trammel stated there is a need to look closely at those being cut in this area because she does not understand why the cuts are those who make the least amount of money. She said she believes we should look at all the warm bodies and not just specific groups.

Mrs. Crawley asked the superintendent if during his interview he mentioned a sign in his board room that said “only children issues come past this door…”. Dr. Dawkins stated that he did not have this sign, but the board had a sign. Mrs. Crawley stated that in going through the budget that is the question she is asking, “what benefits the kids?”, and most employees somehow directly or indirectly do. She said if there is a case where there is a name attached to one particular thing, she clarified that she is not talking about the person but about the number and the position. Referencing number VII, Mrs. Crawley noted the increase reflected regarding clerical staff technician and why this increase when schools are being decreased? Mr. Lee explained that this is a transfer from another department and this position was previously under the Information Technology Department and was better suited to Communications so it was transferred. Mrs. Crawley asked for clarification of the decrease under Information Technology of two positions and where is the other position? Mr. Lee said it is a vacant position and is being cut. Mrs. Crawley asked if it is possible to get by without the Fair Share Administrator because this is not a child-oriented position? Dr. Dawkins stated staff is still analyzing all the positions and this is one of the positions; but the final recommendation will reflect more of the positions that the Board is referencing. Mrs. Crawley asked about the reduction of 68.5 regular teachers and how much money does this represent? Mr. Lee responded it represents approximately $4.5 million. Mrs. Crawley thanked the superintendent for the information provided and asked how many are classroom teachers today and will be cut from the 68.5? Also aren’t the administrative assistants teachers that can be in the classroom teaching math, reading, etc.? How many administrative assistants are there in Caddo and where are they located? Dr. Robinson responded there are two at middle school level (Turner and Keithville), and two at the high school level, (Byrd and Fair Park). Mrs. Crawley asked if Byrd and Fair Park will lose an assistant principal and Dr. Robinson said they are not. She also asked about music and art teachers, elementary coordinators, and if they are part of the pupil teacher ratio so it is necessary to have a coordinator for every 28 students. Dr. Robinson said that is not correct, and Mr. Lee added that coordinator positions are in addition to enrichments. Dr. Robinson clarified that they are included in the count of 2,084 teachers and 705 special education teachers. In response to the question of who was included in the regular teacher count, Dr. Robinson stated the regular count of 2,084 includes classroom teachers, JROTC instructors, administrative assistants, elementary coordinators, enrichment, discoveries, alternative program and other parish programs such as
music, Codofil, dyslexia, technology center, Homebound, Homeless, etc. Mrs. Crawley asked about the 68.5 being cut and what positions they hold and what programs are being affected. Dr. Robinson said while she is not certain she understands the question, the number of teaching positions has been reduced by attrition, retirement and other forms of separation, thus we are not talking about the deletion of any warm bodies. Mrs. Crawley said that is not her concern, but her concern is how many actual warm body children are in a classroom or how many warm body children will not be getting an assistant principal, an administrator, a complete curriculum. Dr. Robinson explained that the district is mandated by the State to provide a comprehensive curriculum so there will not be children who will not be serviced appropriately and according to Bulletin 741. She added that it doesn’t mean we will not have an administrative assistance, but it does mean we have retained an Administrative Assistant for programs like at Fair Park, where the 7th and 8th graders are being added, and their services will be needed. Mrs. Crawley said she knows we cut band at Herndon, as is true at J.S. Clark, and she is asking what positions are the 68.5 teachers being cut, and are we getting this number because there will be more students in a class or do we get it because we are not staffing all the et ceteras? Dr. Dawkins stated that students will not miss any programs; and while the staffing ratio may be up 2 or 3 more students, there will not be 30 to 40 students in a class. He said the Board made a decision last week relative to the staffing policy to ensure that this did not happen and that every child had opportunity for music, art and P.E. Mrs. Crawley asked if we will be adding a band program at Herndon? The superintendent said staff will look at every program and every school, because some schools have every program and others have less and we will make sure that every school has everything they need. Mrs. Crawley said she only wants to know “yes” or “no” that Herndon will have a band director. Dr. Dawkins explained that he thought the intent of the Board’s action last week to insure that students do not go another year without these programs. Mrs. Crawley reiterated that she wants to know if the 68.5 teachers are classroom teachers. Dr. Dawkins stated that staff will follow the formula approved by the Board. Mrs. Crawley shared her concern that she has heard that all the Discoveries teachers are being cut and the Board has not heard this, and she would like to see a list by school of what each is losing. She also asked Dr. Dawkins if there is only $4.5 million, can we not take the 5 million budget balance and $4.5 million from technology (QZAB) for the balance. Also, since we rarely touch the fund balance amount, the QZAB amount would be safe as the balance and we can pay the amount back to the Federal Government and not lose real classroom teachers.

Mrs. Bell asked about the $10 million for consultants and was this not two years ago and was this spent when we found that the State was going to take Linwood and Linear, and that teachers teaching there would receive incentives. Mrs. Bell said that information is being released to the public that is incorrect and she wishes this to be clarified. Because people get the wrong impression, she asked staff to clarify that we cannot use Title I money unless it is for a Federal program or teachers teaching a Federal program? Mrs. Parker stated that the basic tenet of any Federal program is supplemental and not supplant, which means this money cannot be used to provide the same services but it must be used for additional services to enhance the program. She explained that the budget is based on what the schools are doing and sometimes additional teachers are added and paid by Title I, but they are enhancing the regular ed program. Mrs. Bell asked if she believes Turner needs five additional teachers, can she ask for Title I money to pay for them? Mrs. Parker said no, they cannot be paid for regular ed teachers. Mrs. Bell clarified that in changing some of Caddo’s schools, the Board stated it wanted to make sure that all are technology ready for the students four and five years in the future, and we can’t take from the Technology Enhancement Program and expect to provide what is needed and what may exceed $16 million in four to five years. Mr. Lee explained that this money was set aside when the Board issued the Qualified School Construction Bonds ($17 million) to help pay it back. Mrs. Bell asked why do we have a Fair Share Administrator? Mr. Abrams explained that the Board created the Fair Share Program and within the policy it requires that a Fair Share Administrator be hired to administer the program. Mrs. Bell asked Mr. Abrams to explain why the Board wanted a Fair Share Program? Mr. Abrams explained that it is his understanding to make certain that the program was administered properly and make sure that disadvantaged businesses had the ability to do business with the Caddo Parish School System. Mrs. Bell stated that she is only asking that as recommendations are made to remove items from the budget that everyone is only fair. Mrs. Bell asked Dr. Dawkins if the 68.5 teachers are coming out of the 147 retirees, and has anyone said that there will be 30 or 40 students in a classroom? She asked the superintendent if there will be 28 students in a Kindergarten class and the superintendent said that is not the plan. Is it not true that if a first grade class starts the year with 26 students that adjustments will be made to that class to lower the number of students and is the staffing information not listed on
the web site? Dr. Dawkins responded that it is on the web site. Mrs. Bell also reminded the Board that we have day to day subs, and those who are working on their certificate; but she doesn’t understand why people continue to say that the Board is moving warm bodies out of the classroom by laying off teachers and putting more students in the classroom? Mr. Lee responded that the Board did approve increasing the staffing formula. Mrs. Bell said staff has done a lot of work, and she is tired of everyone saying the same thing over and over. She said it is time for the Board to get down to business and let these people know where they are going. Mrs. Bell stated it is all about the children and shared her concern for all students and schools, and asked Dr. Dawkins if Caddo is the only parish going through this? Dr. Dawkins said we are not.

Mr. Ramsey asked for clarification on the proposed clerical staffing changes and the additional bookkeeper if a school has in excess of $1 million. Mr. White explained that when auditors audit the schools, there are finances in some schools that are well in excess of other schools and it is difficult for one bookkeeper to keep up with it all. Mr. Ramsey asked if the bookkeeper numbers for each school are based on the amount of funds, i.e. $250,000, $500,000, $1 million handled by that school? Mr. Ramsey asked if there are any elementary, middle or high schools that exceed the amount of funds that can be handled by one bookkeeper? Mr. White answered that there is currently only one, and the practice has been that one bookkeeper is staffed at schools that have $500,000 or less in funds. Mr. Ramsey asked about the categories of 7-12 and high schools and the requirement of three secretaries if the enrollment is greater than or equal to 1,500, and if a high school’s enrollment is greater than 1,500, the school will get four secretaries. He also asked about the number of office clerks because he doesn’t believe the numbers match up? Mr. White explained that it takes two office clerks at the high schools and staff anticipated some of the high schools growing to over 900 students since they will become grades 7-12. Mr. Ramsey clarified that he what he is asking because it says a school will receive three if the enrollment is equal to or greater than 1,500, and a high school with 900 students will only receive two. Mr. White said that is correct and the numbers were aligned with the current policy and after contemplation, staff came up with these numbers. Mr. Ramsey stated that he believes something could be done to adjust and give them additional assistance. Mr. Ramsey asked about the revised budget under instructional services and if the director of professional development has gone away. Dr. Dawkins explained that it is possible that a combination professional development and grant writer combination may be considered in the reorganization of Central Office. Mr. Ramsey stressed the benefit of the grant writer in the past and he does not believe these two positions can be dropped. Mr. Ramsey also asked the superintendent if we have State Department approval of these changes? Dr. Dawkins stated that staff has met with the State Department and Dr. Amy Westbrook of the RSD, they encouraged the district to move forward in the planning. Even though he does not have in his hand the written document, he received communication from Dr. Westbrook on the revisions to the MOUs and the accountability information regarding test scores and he is expecting to receive this information. Mr. Ramsey asked the superintendent if there will be any additional cost to the district for revisions to the MOUs? Dr. Dawkins said he received a message from Dr. Westbrook’s office late this afternoon and at this time, he has not had an opportunity to review that communication. Mr. Ramsey asked if these issues will be resolved by June 7th and the superintendent responded that his hope is to have them resolved by June 7th. Mr. Ramsey asked if they are not resolved, will it delay approval of the budget? Dr. Dawkins responded that it will just be a matter of the district doing what it must do. Mr. Ramsey also asked about the 7-12 configuration and how the AU status will be affected by this merger? Dr. Dawkins stated that in the meetings with former State Superintendent Pastorek and Dr. Westbrook, they mentioned there were two or three additional school districts with the same reconfigurations and they would make a decision on all at the same time regarding the scores for the schools. Mr. Ramsey asked when these schools are consolidated, will there be some realization of dollars in the budget reduction that will be used for the opening of a 6th grade center and has the board approved opening another school for a 6th grade center? Dr. Dawkins responded he doesn’t know if the Board formally approved opening another school, but he was charged, when the Board approved 7-12 configurations and not 6-12, to find a solution for the 6th graders and this is his resolution. Mr. Ramsey noted there is a lot of work that needs to be done yet on the budget. Dr. Dawkins reminded the Board that staff has another month to finalize the proposed budget before it has to be approved. Mr. Ramsey asked Mr. Abrams if there are any legal issues the Board still needs to address? Mr. Abrams said the MOU is a legal issue depending if the State Department approves it or not and he would like to get this in writing. He said also related to the budget issue that must be addressed by the Board relative to the changes in the school clerical positions and the reduction in force which requires that employees being laid off are given 30 days notice with today being May 31st and 30 days from tomorrow is June.
30th. If the Board does not meet this timeline, the district finances will go into July, which is a new fiscal year; and with the budget built on giving these employees a 30-day notice, going into July will begin eating at next year’s budget and could mean more cuts. Mr. Ramsey also asked if there are any construction issues in the budget that must be addressed by the Board to get these schools ready, and didn’t staff provide an itemization of these costs? Mr. Lee clarified these costs will not be in the General Fund, but in Capital Projects. Dr. Dawkins responded there were significant projects with the 6-12 configurations, but fewer with the 7-12.

Mrs. Crawford asked about the DRAFT document marked 05/02 DRAFT and the deficiency in revenues and ending balances from last week’s draft and this one? Mr. Lee explained that the difference between the budget amount for 2011 and the estimated amount for 2012, and the budget is the amount the Board has approved for expenditures and the estimated amount shows how staff believes the year will end, and it is only a coincidence that these numbers are so closely the same. Mrs. Crawford asked if grants are included in the budget and Mr. Lee responded not in the General Fund. Mrs. Crawford asked when the schools are reopened, will there be budget costs (i.e. Newton Smith), and are they reflected in this budget? Mr. Lee said they are reflected in this proposed budget. Mrs. Crawford asked about the 68.5 teacher positions and would it be supplanting if they were rehired? Mr. Lee said we have a number of Title I teachers and positions in other Federal funds and the more we try to add to those it becomes a supplanting issue because we are doing things that we in the past did with General Fund dollars. Mrs. Crawford asked about the $16 million in the QZAB fund and if the $1 million was paid back from this fund or General Fund? Mr. Lee responded that it was paid from General Fund this year and the Technology Enhancement Fund will be approximately $15 million by the end of the fiscal year. Mrs. Crawford asked when we grant construction bids to the low bid, do we have a significant number of change orders that impact the budget? Ms. Priest reminded Mrs. Crawford that is Capital Projects budget. Steve White explained that there is a minimal number of change orders particularly in remodeling jobs because sometimes when you open a wall, additional items that were not covered when the project was bid must be taken care of.

Regarding staffing for assistant principals, Mrs. Crawford asked if assistant principals from K-8 schools get less than assistant principals in 6-8 schools? Dr. Robinson responded that Policy GCA (Professional Staff) denotes that there is 1 assistant principal if the student population is less than 600 at a K-8 school, 2 assistant principals if the student population is greater than 600 and less than 1200; and 3 assistant principals for 1200 students. The 6-8 schools receive 1 assistant principal if there are fewer than 475 students enrolled at a school and 2 assistant principals if the enrollment is greater than 475. Mrs. Crawford also asked about the possibility of furloughs in an effort to save jobs? Dr. Dawkins stated that furloughs were mentioned during deliberations, but they are not included in the budget at this time. Mrs. Crawford stated that she only wants to make sure that everything possible is looked at for possible savings.

Miss Green asked Cleveland White about the numbers and if Green Oaks will lose any additional positions other than the library clerk position? Mr. White responded that Green Oaks will receive 1 bookkeeper, 1 secretary, and 2 office clerks. Green Oaks currently has 1 bookkeeper, 2 secretaries and 4 office clerks, meaning they are over staffed by 1 secretary and 2 office clerks. She also asked if a secretary was an office clerk before becoming a secretary, will that person move back to an office clerk, will the cuts be done on a seniority basis? Mr. White responded that when RIF is imposed, it will be based on seniority and a person may not be at the same school. Dr. Dawkins also added that performance will also be considered.

Mrs. Armstrong referenced the reduction of two bookkeepers under business services and if the problems with the new computer program have been corrected, because this could be problematic for the bookkeepers if it is not doing the job we need it to do. Under internal auditing, Mrs. Armstrong asked if we will now have only one auditor? Mr. Lee responded there will still be two auditors, one is currently paid by the Child Nutrition Program and the other by General Fund. Mrs. Armstrong also asked about the reduction details and coordinating Repair Technician I and Repair Technician II and are these positions being reduced from five to two? Mr. Lee said that is correct. She also asked if these are reductions through retirements or through pink slips. She added she is concerned because of the thousands of musical instruments in the parish that these technicians work on. Mr. Lee said this will not affect the music program and Tim Graham confirmed this response. Mrs. Armstrong asked for confirmation that we will still have two music repairmen and Mr. Graham responded that is correct. Regarding the 3 security monitors, Mrs. Armstrong asked if these in this position are the persons who open and close the gate? Mr. Murry responded that they are there to monitor alarms and the technicians...
are the persons who install and repair alarms and cameras. Mrs. Armstrong noted it is showing a reduction of two employees and asked for clarification. Mr. Murry said there were two vacancies that are not being filled. Mrs. Armstrong asked how the patrolmen are assigned? Mr. Murry explained that he attempts to work them in two different shifts – evening and midnight shifts and when they work 24 hours, one of them works during the day, as well as a couple of subs. Mrs. Armstrong asked about the attempt to do away with subs? Mr. Murry explained that they are really full time patrolmen. Mrs. Armstrong referenced the proposed clerical staffing and if, in the 7-12 configuration, the 3 in an equal to or greater than 1,500 student population will be split between the middle and high schools. Mr. White responded that they will be staffed separately, i.e. Huntington, Booker T. Washington, Green Oaks, Fair Park and Woodlawn will be staffed 7-12 and Turner will be K-6. Mrs. Armstrong asked if the office staffs will be centralized or will they be separate? Mr. White responded that they will be the same configuration and where they are placed will be based on the design of the building.

As a point of personal privilege, Mr. Riall expressed his appreciation to everyone for their prayers for his wife and announced that his daughter just notified him that the doctor had given them a good prognosis.

Mr. Riall asked about the 294 clerical positions throughout the district and 182 are at school sites and 112 are at sites other than schools. He asked if in order to reach our budget, the 182 in the schools are giving up 72 clerical positions and everyone else is giving up 10, thus schools are being hit with 37% and everyone else with 9%. He said he doesn’t believe this sounds as it should and asked if those in the schools with seniority over those not in the schools will lose their job because they are in a school? Mr. White explained that if a RIF occurs, it will occur in the categories designated and determined within the budget, i.e. if it is an elementary secretary, the RIF would have to occur systemwide, and the same is true in the middle school secretaries category and the high school secretary category. Mr. Riall asked if there is a specific reason why the schools are shouldering the brunt of these cuts? Mr. White explained that these positions are overstaffed positions throughout the years based on the staffing formula and this is realigning the positions based on the formula being proposed. Mr. Riall asked if there is not a staffing formula for other locations, but they hire what they feel they need? Mr. White said that is correct. Mr. Riall said he believes it would be different if the schools were involved in this budget, but he believes the schools are the ones taking the hit on this. Dr. Dawkins stated there was a clerical policy in the district, but it was not being followed. Mr. Riall asked if all 66 from the schools were over the staffing formula, and Mr. White responded that the old staffing formula gave schools more positions than the proposed formula, and schools were over staffed as a result of programs added in the schools over the years.

Ms. Priest asked for clarification of the 19 clerical positions in the Human Resources Department. Dr. Robinson explained that staff had conversations with the superintendent about clerical staff assignments in HR; and with the implementation of SunGard, it is expected there will be changes in this department. She also noted the fewer administrators in HR and how SunGard also will bring change with this. She explained that at this time the staff is studying this and will present a recommendation to the superintendent by the next meeting. Ms. Priest asked about the grant writer and that when we had a grant writer she knew we were receiving $22 and $23 million in grant funds. She has asked staff to look into this as well as the other options available for having a grant writer in place, because she believes we are missing out on a lot of Federal dollars and would like staff to assess and bring back information to the Board on how this position might best be filled.

Mr. Hooks asked the superintendent about transportation (#92) and if this line item is staff cars? Mr. Lee responded this is where you would typically see staff cars, maintenance, transportation vehicles and this has been eliminated for next year. Mr. Hooks requested that staff rethink staff taking cars home other than the superintendent, directors of security, transportation, communications and risk management, as well as a couple of mechanics. Dr. Dawkins stated staff is assessing this area and information is at Board member’s stations on all the automobiles. Mr. Hooks asked the superintendent if he agrees a balanced budget consists of how wise we spend money? Dr. Dawkins responded yes and a lot of other things. Mr. Hooks said he always wants facts and asked the superintendent how many AU schools did Caddo have in 2008-09? The superintendent responded there were seven or eight and a couple under watch. Mr. Hooks asked how many do we currently have? The superintendent responded there are some under AA and some under watch. Mr. Hooks stated $10 million was spent on these schools to get them out
of this status, and he asked Janis Parker if Title I money can be used for teachers and paraprofessionals in Title I schools. Mrs. Parker responded yes and materials and supplies. Mr. Hooks stated that most of the time when he was principal he utilized it for academic instruction, and asked if most of the AU schools are Title I schools? Mrs. Parker stated her agreement, but added every Title I school gets its allocation and the principal at that school, in consultation with the administrative team, parents and teachers, determines how those funds for that school are spent based on need. Mr. Hooks said he believes the need is greater if a school is in AU status and Mrs. Parker agreed, but you must look at the needs at every school. Mr. Hooks asked about the technology funds and that on April 5th he requested information on the $10 million and if $3 million was spent on a new payroll system? Mr. Lee confirmed that the district has about $3 million in a payroll and total financial system (accounting, accounts payable, payroll, purchasing and HR). Mr. Hooks asked if that system is now being used? Mr. Lee responded that it is still in the conversion process. Mr. Hooks said he believes this was money wasted and he is here to see that we get a balanced budget.

Mrs. Bell asked in what area was the grant writer located? The superintendent responded the grant writer was housed in Staff Development. She shared that when she was a teacher, she wrote a $28,000 grant, as numerous other teachers across the parish do, and she asked if these grant dollars were included in the grant writer’s report? Dr. Dawkins said he does not believe they were but they were individual grants. Mrs. Bell said many teachers write grants for their classroom needs and we need to encourage teachers to look at ways to bring in additional funds, but she knows that the grant she wrote was included in the grant writer’s report.

Mrs. Armstrong asked Dr. Dawkins about how the new 7-12 configuration will be staffed with clerical staff and will we maintain a separate administrative and clerical staff for grades 7 and 8 and for the 9-12? Dr. Dawkins responded that the plan is to utilize the resources as efficiently as possible and since there are certain tasks for middle schools and different tasks for high schools, staff will use them collectively where we can and maximize the staffing formula to cover all the tasks for each grade level. She also noted that the former grant writer conducted workshops for teachers and assisted in writing grants that teachers came upon. Mrs. Armstrong said if a grant writer is in Professional Development, perhaps a combined position with the Director of Professional Development Department would be a workable option; however, if that person is to carry both titles and at the director level, it could mean a large salary based on the requirement for a Master’s Degree and years experience.

Mrs. Crawley asked staff when looking at the 248 vehicles and the 56 that are taken home, how much does this cost annually? Mr. Woolfolk responded that approximately $550,000 is spent in gasoline for the 248 vehicles. Mrs. Crawley asked about the purchase price, cost of insurance, maintenance, etc.? Mr. Woolfolk explained that staff is still assessing this area and looking at maintenance at 4.5 cents a mile, insurance at 8 cents a mile, depreciation at 30 cents a mile, with a total expense for the 248 vehicles being $1.3 million a year. Mrs. Crawley asked if the cost to buy the car is included and Mr. Woolfolk stated that it does not include that cost, because it includes the depreciation cost. Mrs. Crawley referenced the policy to purchase vehicles and it appears it is easy to get a staff car. Mr. Woolfolk noted that the policy states that only employees required to be on 24-hour call will have a take home care and of the 248 there are 56 cars that are taken home. He further explained that the 56 cars consist of 19 vehicles based on 24 hour service requirements, 16 are drivers’ education vehicles, and 21 are trucks for bus mechanics. Mrs. Crawley stated she can understand that the superintendent is on call and risk management is on call, and Mr. Woolfolk added that security and maintenance are a part of that number. Mrs. Crawley asked why do the drivers’ education cars go home? Mr. Woolfolk explained that it’s because of the different schedules they have. Mrs. Crawley said she understands but most of them are the highest paid folks in the district, so it is not due to the lack of ability to afford a vehicle. Mr. Woolfolk further explained that the $1.3 million annual cost is everything and that the take home cars came to $55,000 a year. Mrs. Crawley asked if these costs are figured into the budget? Mr. Woolfolk explained that depreciation may not be, insurance may be included under a different area, and also added if we did not provide the vehicles, we would need to budget reimbursement for mileage to use personal vehicles. Mrs. Crawley stated that teachers living in the northern part of Caddo who must drive to Central Office for a workshop do not get mileage.

There being no additional discussion/questions, the fifth budget work session adjourned at approximately 7:00 p.m.
The Caddo Parish School Board (CPSB) met in special session in its office at 1961 Midway, Shreveport, Louisiana at approximately 7:10 p.m. immediately following the budget work session and a brief recess on Tuesday, May 31, 2011 with President Lillian Priest presiding and the following school board members present being a quorum: Steve Riall, Jasmine Green, Willie Burton, Charlotte Crawley, Curtis Hooks, Mary Trammel, Bonita Crawford, Barry Rachal, Larry Ramsey, Ginger Armstrong and Dottie Bell. Also present were Dr. Gerald Dawkins, secretary, and Reginald Abrams, legal counsel. The prayer and pledge were omitted.

VISITORS

Jackie Lansdale, president of the Caddo Federation of Teachers/Support Personnel, stated she would like to see things such as the MOUs in writing and shared her concern that the Consent Decree is on the judge’s desk and anyone could approach her with concerns and everything planned could come to a halt. Mrs. Lansdale addressed the staffing ratio and the great disparity between the assistant principals in the middle schools, concern over losing teacher aides as they many times pick up the slack in over staffed situations, and the librarian at a school in District 10 that has 485 students and has lost her aide, yet if the school had only a few more students, it could have a second librarian. Mrs. Lansdale also expressed her concern that she sees nothing on ISS and how this will hurt the district financially because of the CAP program and students not having a qualified person teaching them in ISS. She also noted the staffing ratios at the high school level and the possibility of job sharing as a resource so everyone shares in the pain. She said she believes sharing the pain district wide when asking everyone to do more with less, and including the Board, will eliminate creating a mentality of distrust.

Scott Hughes, Alliance for Education, stated he believes tonight is sadly another step down the path of the Board’s chosen destination which in many ways continues to be a journey of wandering down an unknown path of uncertain destination. He said every time the Board gathers, it seems not to be able to define the path or the resources to get to the end. Mr. Hughes encouraged the Board that as it continues to get its budget in order to consider the following: (1) none of this should be a surprise seeing that the Board had a half million dollar deficit two years ago, a $6 million deficit last year, and a projected $21 million deficit this year. Even with all the consolidations, school closures and layoffs, the Board will still be $15 million over expenses and the district’s budget staff has been alerting the Board to this for at least three years. He said what seems extraordinary is the lack of real, timely information available to the Board and the community. (2) Regarding approvals, he stated it has come to his attention that the Board’s team has placed resources into the field to begin to rate the schools next year based on the new Vision 2020 Plan. While this seems appropriate, it also seems appropriate for him to ask if we have received approval from the Recovery School District to break our contract with them, not a renegotiation, but a legal contract and enter into a new legal contract. He asked if the Board has seen the new proposed MOUs offered by the RSD to Caddo and the changes they will have on the budget and staffing requirements, because the last ones specifically mentioned financial terms and staffing the schools. He also asked what accountability measures are in place now with the failing schools and he cautioned the Board in moving forward with any implementation of any plan without full approval of the State, and approval of the MOUs by the Caddo School Board. (3) Regarding the Consent Decree, he stated his agreement with the Board’s attorney that Caddo is likely in a position to move forward for unitary status as the district exists today, especially given you only have remaining open selective items such as principal assignments; but he is not completely convinced the new plan has not resulted in a new Consent Decree violation with its race specific solutions for race dominant schools. Mr. Hughes questioned if 7-12 is a good solid solution for Booker T. Washington, Green Oaks, Woodlawn, Fair Park and Huntington, why it was not suggested for Byrd, Captain Shreve, Southwood and North Caddo. He also stated that the establishment of 6th grade centers, which this Board has not formally voted on yet as part of the process to reopen Newton Smith, also seems to cause some transportation and transition issues. The bottom line, this budget process seems to be moving in mysterious ways and playing rather lose with the processes; and if Board members are not being provided all the information they need timely, then how is the public supposed to stay informed and have a fair chance to evaluate what is going on. He said that at some point, the citizens may have to look for other venues for assistance both educationally and legally. Mr. Hughes noted that we have been doing this for several months and today they heard it will be another week before the official recommendation is seen in the final budget and he is at a complete loss at how
this Board continues to allow this. He said like what goes on in Baton Rouge or not, they are required to put a budget up for public review and discussion, as is true with the non-profit he runs; and as of today, we have not seen the final recommendations. He doesn’t understand how everyone is to evaluate and understand where the Board is headed and suggested that the Board begin to act like a Board and require staff to present a final budget and not one piece at a time.

Michael Myers, teacher, reminded the Board of his previous comments relative to transparency and the need for those affected to have the information. He said the Board needs to have all the information before they come to a public forum and shared how their organization’s board discusses the financial statement monthly. Mr. Myers explained that the executive board answers questions and shares information so that decisions can be made together and he expressed that in the future he would like to see the Caddo School Board involve the employees and the public in a way that the information is given to them at the same time it is given to the Board. He also pointed out fund balances in the reserves, especially the Technology Enhancement Fund; and questioned why, if the money was being paid from the fund balance, is there still $16 million in that reserve fund and not reduced by two years’ payments of $1.1 million? He said if there is an extra $2.2 million, he believes a lot of jobs can be saved.

Jon Glover, employee, noted what happened to Enron employees several years ago and that Caddo employees are concerned about their futures; and asked if the Board, in embracing the proposed changes, is concerned about the employees affected by this budget crisis? She said the only concern today is why and how did the district get into this financial crisis. Ms. Glover stated that the concern and intent seems to be not to help the employee, but to destroy the employee. She referenced the step increases and the amount of money associated with each. She asked the Board to look closely at all the various ways the district’s money has been expended and how it can sit back and consider adopting such a plan. Ms. Glover also referenced the Vision 2020 Plan and the many changes that have taken place since the adoption of the initial plan on March 24, 2011. She stated that the original plan was posted on the parish’s website indicating the changes to be approached in Phase I. However, on May 23rd there was another document posting details of Vision 2020 Phase I, which was significantly different than what was adopted March 24th. She said the inconsistencies are evident, but more importantly, each of the Board members approved a vision that was not clear at all. She said the superintendent continues to say that the vision plan and budget are works in progress and are ever changing; however, she needs to understand if the Board approves the budget, will it continue to change as the Vision 2020 plan has changed? She asked if the Board has a clear understanding of what is to be gained by the reduction in employees being proposed; because if the clarity is not evident, then she believes the Board should not affect the lives and livelihoods of the district’s employees without careful consideration of what is being proposed. While change brings about concern, that is where we are and asked if the Board is concerned about the futures of those who have entrusted their lives to the Board. She asked that the Board do the right thing.

Sharon Ketchum, parent, addressed the Board on the loss of warm bodies at Forest Hill. She stated there are those graduating that desire to go into education and she is concerned if there will be a place for them. She asked if the people affected will be rehired after the October 1st count; and as the mother of a special needs child, she is concerned about the possibility of losing special education aides in the classroom. Regarding technology, she said someone brought to her attention the many boxes of computers sitting in the hallways at other schools and her school is in desperate need of additional technology.

Daryl Roberson, president of the Caddo Association of Educators, said there are many questions and he hopes Board members will get the answers they need to make decisions that are in the best interest of the children. He urged the Board to not balance the budget at the expense of the students receiving the quality of instruction that will help them raise their achievement levels to the levels that the schools and the community deserve or on the backs of those that provide instruction in the classroom and provide support at the building level. He also encouraged the Board to look for those dollars that are hidden in the balance sheet for a rainy day. Mr. Roberson also encouraged the Board to do the right thing by rolling forward the tax millage. With this district being the largest employer in the parish, he said we as residents will help pay to keep the district solvent; and remember, all eyes are on you to do the right thing.

Kathy Garner, Oil City, stated there are more than 22 or 25 students in a classroom and encouraged the Board to ask for the student enrollment by classroom so they can see actual class
sizes. Regarding the loss of clerical and custodian staff at Herndon, she shared with the Board the many responsibilities the teacher may normally do, but these employees take care of them, i.e. administering medications, contacting parents of sick children, setting up the auditorium for functions, cleaning up after sick children or those who have accidents. By taking these employees out of the school, it will affect the children, because the teacher has to stop and take care of these responsibilities, taking away from teaching. Ms. Garner also addressed the music, art and P.E. and that it will be required at all levels and her concern of how the school will have the needed staff to cover these subjects. Also, she asked for clarification on cutting teachers through attrition because those teachers are teaching somewhere and the Board is saying that their position will not be filled when they retire.

Frederick Henson stated his amazement that every time he has attended a budget session he hears that more changes are being made. He said it is in those changes that he questions if 7-12 is so great, why isn’t it being implemented at Byrd, Southwood and Captain Shreve? He also asked about the drop-out rate in the African American community and how much more will this affect the changes being made. While he many times does not agree with Mr. Hughes, he does agree with his statement that legal action may be the only alternative to get the Board to rethink or restudy what is happening. Mr. Henson again stated he is amazed because no business can operate this way and stay in business, and he doesn’t understand how the Board can vote on something that has not received approval from the State or Federal Government.

Jo Marie Strother, teacher, addressed class sizes larger than the formula and that in 2008 she had 46 students in a block for 9 weeks. She shared the challenges of having one student in the 8th grade that cannot read and another so smart but he did not know what to do while she was working with the student who could not read nor write. She stated she is a teacher that teaches to the wall 100% of the time and is involved in every aspect of her students’ lives, but this many students in a class is a real problem that needs to be addressed; but she wants the Board to realize if classes do swell, she is proof that the teachers can still do it because of the love for the school and the students. She stressed the importance of becoming problem solvers and solving these problems., and one suggestion would be to have aides available at the beginning of the year to assist in these oversized classes.

Virginia Marks, 9th grade economics teacher, stated there is no way anyone can understand the budget as it is presented. She stated that if her students turned in a budget without page numbers, they know it would be returned to them ungraded until it was corrected. Ms. Marks questioned the travel expense ($53,000) for regular education teachers, $140,000 for special education teachers, because as a teacher she has had to pay for every trip she has made. She referenced a complete 2010 budget and that after hours of working she deduced that quite a bit of Central Office money is hidden and she has some very specific questions that she intends to get answers to. She asked what does Central Office include, what are the positions and what are each paid, why is Central Office with the highest money in the whole system included in the Draft Reduction Budget with the lowest paid positions, why are classroom teachers not in a category by themselves; how many coordinators, facilitators, and specialists are there in the system (they are not mentioned in the budget), and what is the staffing formula for Central Office?

Jo Ann Silvie, teacher at Hosston Alternative School, the only alternative school in the northern part of the parish, asked if the students will now be bussed to another location? She said at this time, she doesn’t know where she will be placed and she and the other teachers need to know.

**REVISION TO CPSB POLICY EEAD (PUBLIC USE OF SCHOOL BUSES)**

*Mr. Ramsey moved, seconded by Mrs. Armstrong, to approve the proposed revisions to CPSB Policy EEAD (Public Use of School Buses) as presented in the mailout. Vote on the motion carried unanimously.*

**CLARIFICATION AND/OR RECONSIDERATION OF ACTION TAKEN ON MAY 24, 2011 REGARDING POLICY GCA**

*Mrs. Armstrong moved, seconded by Mrs. Bell, to clarify Policy GCA to not require art, P.E. and music outside the staffing formula but within the formula for the middle schools and the high schools.*
Mrs. Crawley moved, seconded by Mr. Hooks, that any classroom whose number is above Caddo’s new staffing formula, the actual students in the classroom, that money be taken from QZAB reserve or any other applicable fund to keep the actual student count within the new teacher pupil ratio and one could also use any future savings that staff might identify. Mrs. Crawley stated that she doesn’t understand why anyone would vote against this motion since we would not have any more than 22 students in any K-1, no more than 22 in 2nd and 3rd grade, no more than 24 in the 4th and 5th grade; and the tiering in high school will provide that there will be no more than 30 students in any classroom. Mr. Hooks stated that this motion will allow the public to see which Board members will vote to cut teachers rather than use money available to prevent cuts. He said it will also give Caddo another cycle whereby attrition and retirement can catch up to the system.

Ms. Trammel asked if this includes the same discussion on adding the art, music and P.E.? Mrs. Crawley responded that this will be a true student count per classroom and still do art, music and P.E. from within the staffing formula. Mrs. Armstrong asked about the money?

Mrs. Crawford requested that Mrs. Crawley read the friendly amendment/substitute again? Mrs. Crawley reread her motion that any classroom whose number is above Caddo’s new staffing formula, that the actual number in the classroom is above what we project (22 in any K-1, 22 in 2nd and 3rd grade, 24 in 4th and 5th grade and 30 at the high school level), that the money be found from an applicable reserve fund or any other future savings the superintendent deems he can do. Mrs. Crawley said she is only asking to make it honest when looking at the teacher student ratio so we don’t have 40 in a classroom.

Superintendent Dawkins stated that it will be important that we look at the financial impact of both motions. Mr. Lee explained there is no way to calculate this cost without knowing how many classes could exceed the staffing formula.

Mr. Rachal stated he believes he hears the superintendent asking for direction on the last motion and he would like to know the impact of the staffing outside the staffing formula approved by the board at the last meeting? Mr. Lee responded that it would possibly be two to three positions for each of the middle and high schools for a possible additional 30 positions. Mr. Rachal stated his understanding of the intent of the two motions; however, he does not want a principal to go in and start choosing not to do music or art, because they want to keep their class sizes manageable. He asked the superintendent the best way to address this issue so we are not forcing principals to do it. Dr. Dawkins explained that staff believed the spirit of the motion to be that for the schools without art and music to be brought up to what the other schools had. He added he is attempting to, but still does not fully understand what impact the second motion will have on the budget.

Mr. Lee clarified that with the motion approved at the last meeting, it would mean approximately 30 additional teachers representing approximately $1.8 to $2.0 million. Dr. Dawkins said we are committed to make sure that principals do not have to choose so they will always have art, music and P.E. Mr. Rachal stated he is seeking assurance that the courses are in place for the students because studies show too many positive benefits and he is seeking ways that the Board can address it. Mr. Rachal said he believes the Board needs to look more closely at this item and he does not feel comfortable voting at this time until the Board gets additional information.

Mr. Abrams stated that the staffing formula is an arbitrary number and is what the principal uses to determine how many teachers he will have at their school, and it doesn’t mean there will be a classroom with 22 or 20, but there will be a range without exceeding the state formula. He further explained that the state formula explains that any time the actual number goes over the state number, there would then be an adjustment the district must pay from a different fund. He further stated that it makes certain there is someone monitoring these classes as well. Mr. Abrams stated that the substitute motion makes certain that it is attached to a funding source and there will be budgetary issues with it also. Mr. Rachal stated he would like to table voting on this item at this time since he cannot vote on anything without a number. Mr. Lee, for clarification, stated that if the middle school is staffed at 25:1, the school will not receive another teacher because there might be 26 students in a class, and if you do, he questions whether or not that is being efficient.

Mr. Riall asked for clarification because he believes the major affect will be on the smaller schools, because if you have 47 sixth graders, based on the formula of 24:1, the school would only receive one teacher and you can’t have 47 students in a class. The superintendent stated
that is the reason the formula needs to be addressed, and this has been talked about before relative to the flexibility needed in implementing the formula. Mr. Riall asked if these type situations will be addressed on an individual basis and the superintendent responded they will.

Dr. Robinson reminded the board that the district cannot exceed the State’s maximum number in a class which is based on the grade level, because if we exceed what the State says is the maximum number, the school would receive another teacher.

Ms. Priest reminded the board that staff provided this information on the State’s formula in a previous packet of information.

Mrs. Bell stated that everyone is upset with the Board because it is the Board that keeps saying hold it; and with the teachers only having one day left, the principals need to know so they can tell the teachers the information they need to know. She reminded the Board that it is the Board that every time it comes to a meeting, the Board postpones and there is no way we are going to have 47 students in a classroom and if there is a need to add a teacher, a teacher will be added.

Mr. Ramsey said the friendly or not so friendly motion actually changes the staffing formula and the problem is we do not know how drastically it changes it. He said he knew of a class that was over the state limit and he will get with the superintendent if it happens again. Mr. Ramsey said he believes Mrs. Armstrong’s motion addresses that by simply saying staff can be allocated.

Mrs. Crawley asked if instead of the new staffing formula, new pupil teacher ratio, her motion should read any time a class exceeds the state ratio, they will get a new class. Mr. Hooks, as the second to the motion, agreed with the revision. Mrs. Crawley said this gives a little more flexibility. She also said she asked Mr. Lee if we did not change the staffing formula how much it would cost the district and he responded $4.5 million, so she doesn’t understand how this could be more than that. She also said if we remove all the teacher travel from the budget since teachers do not get paid to travel and if we take a little from QZAB and a little from something else, she believes the superintendent can find $4.5 million. Mrs. Crawley said the public is not going to know what the Board has done.

Vote on Mrs. Crawley’s motion failed with Board members Burton, Crawley and Hooks supporting the motion and Board members Riall, Green, Trammel, Priest, Crawford, Rachal, Ramsey, Armstrong and Bell opposed.

Vote on Mrs. Armstrong’s motion to clarify Policy GCA to not require art, P.E. and music outside the staffing formula, but within the formula for high school and middle school. Mrs. Armstrong said it is very important to understand that band teachers, music teachers, art teachers can also be itinerant and do not have to stay at the same school all day. She said it is extremely important to offer these opportunities to students. Mr. Hooks stated his concern that we have music, art, and P.E. in elementary, middle and high school, but we also have K8s. Mrs. Armstrong explained that the intent of her motion is that every student is offered these opportunities and Policy GCA states that music, band, art and physical education are required at all levels. Mr. Abrams stated that the original motion did not include band, which is on there, but band is not at every school. Mrs. Armstrong noted it is on the policy and we need to make sure that the middle school students in K-8 schools have the opportunity for band. Mrs. Crawford asked if the 1:30 at the top of the page does away with the plus two and Mr. Abrams and Mr. Lowder verified that it was 31:1 and the recommendation is to change it to 30:1. Mr. Abrams stated this is not needed anymore since the motion verifies the intent. Mr. Abrams stated it is filled in the grid and the box can be deleted (on the proposed presented). Mrs. Crawford also asked about the Core Four and the changes made by the state and will we still be able to staff everything so the students can get what they need? Mrs. Turner verified that Core Four and Tops are o.k. Mr. Rachal stated that the way it is worded, it is still up in the air as to whether or not art and music will be taught; and asked if there are 20 students at a middle school wanting to take art, how will this be addressed. Dr. Dawkins stated that the proposed policy formalizes the commitment to ensure that instruction takes place and staff will do what must be done to ensure this. He said he has also heard there are schools that do not have a full complement of music and art and this will insure that all schools/students are provided this opportunity. Even though the configurations are different, staff will find ways to make it happen without being specific to a school. Mr. Rachal asked if we should look at a minimum number of students to be able to have these and is it necessary to have a policy so that staff has immediate
direction for implementation. Dr. Dawkins assured Mr. Rachal that he believes the motion will cover it and the challenge will be to identify the schools, what they already have in place and fill in the gaps. In the smaller schools, staff will look at small schools in close proximity to take advantage of sharing an instructor; and if not, look at the possibility of Distance Learning, for example, to make it happen. Mr. Burton moved, seconded by Mrs. Armstrong, to call for the question on the main motion. Vote on the motion carried with Board members Riall and Crawley opposed. Vote on the main motion carried with Board members Riall and Crawley opposed.

APPROVAL OF PROPOSED CLERICAL STAFFING CHANGES

Mr. Ramsey moved, seconded by Mrs. Bell, to approve the proposed clerical staffing changes as recommended by the superintendent and to revise CPSB Policy GDA to reflect those changes. Vote on the motion carried with Board members Riall, Green, Hooks and Trammel opposed and Board members Burton, Crawley, Priest, Crawford, Rachal, Ramsey, Armstrong and Bell supporting the motion.

APPROVAL OF REDUCTION IN FORCE IN ACCORDANCE WITH SUPERINTENDENT’S RECOMMENDATION

Mr. Ramsey moved, seconded by Mrs. Bell, to approve Reduction in Force as recommended by the superintendent and in accordance with CPSB Policy GDPA in the employment categories listed with appropriate notice being sent to the affected employees.

Mrs. Crawford stated she hopes next year that the Board has plenty of extra time to talk about this and possible options other than a reduction in force.

Ms. Trammel asked if once the Board votes on this motion, will the recommendation go into effect as of today and we will not look in any additional places? Dr. Dawkins explained that staff will continue to look at other places, but this will go into effect tomorrow.

Mr. Hooks asked for clarification that this goes into effect tomorrow and Dr. Dawkins responded that is correct, the notifications will be sent tomorrow effective the end of June.

Mrs. Armstrong said this is very heart breaking to have to make these type decisions and she believes if we can look at additional places it may be possible for some of these being affected to be rehired. She noted that in some cases there may be school student numbers that may swell and additional office clerks and library clerks may be needed.

Mrs. Bell encouraged staff to keep these being affected in the pool and not hire any outside persons, but bring back those affected when there is a need to fill a position.

Mr. Rachal said it is not easy to do this and it would be easier to just say we are not going to cut any jobs, but he believes government bureaucracy has set the stage that it is not the policy to get rid of jobs. He said this happens everyday in the private sector; and hopefully this government body will see past the bureaucracy and take care of business, which is sometimes not easy to do.

Mr. Hooks said he believes his father would turn over in his grave because we have come to the point of cutting people in education. He asked staff if we have exhausted everything possible to prevent this? Dr. Dawkins said staff has looked at everything and will continue to look beyond; and part of the process will be if things improve, we could possibly have a recall. Mr. Hooks said he didn’t sign up for this when he became a board member and it breaks his heart for anyone to get this information.

Mrs. Crawley said if we would only collect the 10 mil property tax which is a commitment for property owners to pay their fair share of the property taxes, then it would alleviate this action by $6 million.

Vote on the motion carried with Board members Riall, Green, Hooks and Trammel opposed and Board members Burton, Crawley, Priest, Crawford, Rachal, Ramsey, Armstrong and Bell supporting the motion.
Adjoin. Mr. Riall moved, seconded by Miss Green, to adjourn. Vote on the motion to adjourn carried and the meeting adjourned at approximately 8:42 p.m.

Dr. Gerald D. Dawkins, Secretary  Lillian Priest, President
The Executive Committee of the Caddo Parish School Board (CPSB) met in regular session in its office at 1961 Midway Street, Shreveport, Louisiana, at approximately 4:30 p.m. on Tuesday, June 7, 2011 with President Lillian Priest presiding and Steve Riall and Dottie Bell present being a quorum. Other school board members present were Jasmine Green, Willie Burton, Charlotte Crawley, Curtis Hooks, Mary Trammel, Bonita Crawford, and Larry Ramsey. Also present were Secretary Gerald Dawkins, Legal Counsel Julie Lafargue, staff and other visitors. Mr. Ramsey led the invocation and Pledge of Allegiance. Ms. Priest announced that Board member Rachal is out of town and Board member Armstrong is ill.

ESTABLISH THE AGENDA FOR JUNE 21, 2011 CPSB MEETING

Superintendent Dawkins highlighted the proposed items for the Board’s consideration at the June 21, 2011 CPSB meeting and the following discussion ensued.

ADDITIONS

Mrs. Crawley requested that an item “Roll Forward Property Taxes” be added to the agenda. She also asked that “Reinstate Employees who had entered into DROP prior to the RIF and set to retire by December 2011” be added to the agenda.

Mr. Ramsey requested that an item “Authorize an Internal Audit of all Departments and Functions of Central Office Staff in the following order: (1) Operations Division, (2) Academic Affairs, (3) Student Support Services, (4) Human Resources, and (5) all other functions that directly report to the superintendent and provide audit reports to the CPSB as the review of each segment is completed.”

WORK SESSION

Millage Rates. Mrs. Bell asked Mr. Lee to clarify what the assistant tax assessor shared with her when explaining rolling forward the millages, i.e. a $100,000 home’s property taxes would increase by approximately $20, etc. and his reference to all the millages? Mr. Lee explained there are five millages in the General Fund and two in Capital Projects, and rolling forward the millages will create approximately $6 million if we do this for one year. We would then reassess next year for a reassessment and new rates. Mr. Lee further explained that they will do a reassessment in 2012, but the way millages are set up, if we are receiving $10 million in revenue and property values increase as a result of the reassessment, the millage rates will be reduced to where we would continue to receive the $10 million. If the board approves a roll forward and it increases our total revenue by $5 million, it raises the millage rate for this year; and when they reassess next year and if property values increase, the millage rates will be reduced to where we continue to receive the same amount. Mrs. Bell asked if we get $5.4 million will we be able to solve RIF? Mr. Lee responded that it will help, but it will not be enough to offset the cost of RIF. Mrs. Crawford asked are these the current millage rates? Mr. Lee said that is correct. Mr. Hooks asked if the board adopts this millage, can the superintendent guarantee there will be no additional reductions in force? Dr. Dawkins said he cannot and this item is the continuation of the current millage. Mr. Riall asked if the current millage rate is 7.82 and we roll forward, will the millage rate change? Mr. Lee said it goes up about 4.8 mils. Mr. Riall asked if the board approves to roll forward, will it be permanent even after the reassessment in 2012? President Priest reminded board members that the discussion is on the adoption of the 2011 current millage rates and when the discussion gets to the item on the roll forward, then Board members can ask questions regarding it.

Approval of 2011-12 Consolidated Annual Budget. Mrs. Crawford asked if reopening Newton Smith is in the budget; and if so, how much will it cost to make it a 6th grade center? Mr. Lee said it and taking it off-line would have saved approximately $400,000-$500,000. Mrs. Crawford asked, in the layoffs, how many Central Office secretaries and clerks were laid off or bumped and how many school secretaries and clerks were laid off. She also asked Mr. Lee if our bond rating will be affected because we are in a budget crisis? Mr. Lee responded it probably will not affect it as the budget stands now; but if we continue to dip into the reserves, there is a greater chance it will affect the bond rating. Mrs. Crawford asked that staff look into this. Mr. Lee said we still have our reserve funds and that is why if we begin to draw down these
funds and if we use them for recurring expenses rather than one-time expenditures, it will have an effect on the bond rating. Mrs. Crawford asked Mr. Lee what is Caddo’s bond rating? Mr. Lee stated that Caddo is a 2A and we are what Standard and Poor’s considers a AA- and it is the lowest A ratings; so if Caddo’s rating is reduced any at all, it would drop at least into the single A ratings. Mrs. Crawford asked Mr. Lee to explain how taking $8 million from the $16 million and placing it back into General Fund, which is where it came from, would affect us? Mr. Lee said he would have to verify this with bond counsel, but he knows they look at the historical amount in designated and undesignated reserves. Since the undesignated is down to approximately $5 million, and if we begin to use the reserves for operations, it will definitely affect the bond rating the next time, if and when, the district goes to the public for approval of a bond issue. Mrs. Crawford said since a possible bond issue was moved to Phase III of the Vision 2020 plan, she believes there would be time to recover the budget. Mr. Lee said he will get additional information, because he has been told in the past by the bond counsel that once a bond rating is dropped, it is years before they will consider raising it again.

Ms. Trammel asked if there will be resources, incentives, available for those employees in the AU schools? Mr. Lee responded they will receive it for this year, receiving the base incentive before they leave (June 30th); however if there are incentives for performance, these will not be released until the Fall. Mr. Dawkins confirmed that those employees will receive the funds committed for this purpose. Ms. Trammel inquired about an in-house budget committee? Mr. Lee explained there is a committee of staff members that meets with the Superintendent. Ms. Trammel asked if there is a group of staff that has worked along with the budget process and Mr. Lee said there is. Ms. Trammel asked if it is this committee that decided who would be included in the RIF. Mr. Dawkins responded that is correct. Mr. Ramsey stated that a lot of the budget is a moot point if we don’t get approval of the MOUs and asked the superintendent to comment on the status with the State Department on the MOUs. Mr. Dawkins reported that he and Mrs. Turner met with Amy Westbrook from the Recovery School District, who is in charge of the MOUs and she shared information on these legal documents that determines our work with them in the school turnaround program. Caddo currently has seven (7) MOUs; however, under the same configuration, Caddo will have four MOUs with the combinations. He said BESE is moving forward with a policy with several districts consolidating schools and Caddo has provided its information to Dr. Westbrook and will be considered by BESE in discussions about this policy. Dr. Dawkins added that Caddo will continue to negotiate the MOUs for the same dollar amount as last year’s MOUs and a copy of the MOU is provided at each board member’s station. Also included in the information is a school improvement grant in place and it is the model all the schools in the state will be using. He further stated that Caddo is poised to get approval from BESE next week. Mr. Ramsey asked the superintendent about the impact this will have on the budget and will there be additional fees? Mr. Dawkins explained that the incentives for these AU schools, along with fees are built into the budget for 2011-12, and it is a three-year cycle. Mr. Ramsey asked if we will in essence be back on the three-year clock and look forward to these fees for at least three more years? Mr. Dawkins explained that Caddo is still negotiating the MOUs for the next year and will determine if it is a three-year agreement or less. Mr. Ramsey asked that staff consider a plan to address ISS by placing a certified teacher in this position so that it is a function of credit recovery and hopefully bring this back into the budget. Mr. Ramsey also asked if there are any dollars in the budget to address bandwidth issues, i.e. problems experienced with E.O.C. testing? Dr. Dawkins said additional dollars for bandwidth have not been considered, but staff has looked into this and will continue to look at it in more detail.

Mrs. Crawley stated she concurs with Mr. Ramsey relative to ISS and asked that principals and teacher representatives be a part of the budget planning committee. On page 11 of the budget, Mrs. Crawley asked for clarification on the $53,000 budgeted for teacher travel? Mr. Lee explained that is something he would have to look into. Dr. Dawkins stated that based on some of the requests he has seen, there is a lot of travel to Baton Rouge, in-state inservices, some regional travel, and he will get specific details. Mrs. Crawley said she would like to take all travel out of the budget and requests be brought to the Board for approval. Dr. Dawkins asked for clarification and she wishes every teacher’s travel to come to the Board, and Mrs. Crawley responded she means something manageable, and she believes staff should know what is manageable since staff has a record of travel. She further stated that if staff needs to leave $10,000 in this line item that the Board would never see because some staff must travel to Baton Rouge, but just teacher travel, she doesn’t understand why there is $53,000 for 3,000 teachers and she believes this could be a lot of travel. Dr. Dawkins stated that this emanates from the
schools and staff will review and give Mrs. Crawley the details associated with this item. Regarding Special Education, Mrs. Crawley noted there is $140,000 and she questioned how many Special Education teachers do we have and asked that staff review and come up with some revision to this amount. Noting that teachers and others traveling go to outstanding places, she believes the Board this year voted not to follow state law when it comes to the district’s teacher pupil ratio, and to not have sufficient secretaries and bookkeepers at the schools. She said she wishes for this to come to the board for approval, at a manageable level, and that they come to the Board for approval. She also asked that “student travel” be left alone. Relative to instructional services, Mrs. Crawley said she believes they did a fair job of cutting theirs, going from $75,000 to $45,000; however, instructional sounds more like instruction which relates to the students in the schools. She also questioned the travel in business services and if part of this expense was for JPAM training? Dr. Dawkins explained that the training was a combination of video conferencing as well as trainers from the company coming to Caddo. Mrs. Crawley said where possible, should would like for students to have opportunities via videoconferencing; and she asked why operations and maintenance’s travel expenditure has doubled? Dr. Dawkins asked for clarification and Mrs. Crawley noted on page 12 the line items on travel and training that two years ago the budget was $9,900 and then it jumped to $24,000, then to $15,000 and this year staff is asking for $20,000 in the budget. She said she doesn’t understand why the budget can’t return to the $9,900 as in 2009. Dr. Dawkins stated there are required training session and while he does not have that list today, he will be happy to provide that list. Mrs. Crawley said she believes the Board needs to have a better grip on the budget since it is the Board that is held responsible for how the taxpayer dollars are spent. She commended transportation for their effort to reduce theirs down to $4,000 instead of $11,000. Ms. Priest asked Mrs. Crawley if there are questions she has on the budget? Mrs. Crawley responded that she wants on the record that she wants staff to look at and reduce to a level the superintendent can manage without sending to the Board and then the additional requests would come to the Board for approval. Mrs. Crawley asked the Superintendent asked for clarification of the listed 27 directors, supervisors, et. al. and the request to keep 29 clerical positions, the ratio of clerical positions at a school compared to this ratio at Central Office? She said she believes it is more than one per adult and asked the Superintendent to rethink this proposal. Under General Administration, Mrs. Crawley asked the Superintendent to determine if one or two clerical positions can be reduced here and someone share clerical, i.e. Government and Community Relations Officer and Fair Share administrator. Mrs. Crawley also referenced page 16 and under Operations and Maintenance of Plant and that over 100 positions were cut from this area, but only one clerical person was cut. Is it possible to cut one more person. In the Transportation Department, she asked staff what kind of clerical work does this staff do, and is it possible to reduce here.

Curtis Hooks asked the Superintendent of the employees laid off, how many employees will $10 million pay for? Mr. Lee said it would depend on the type employee (job category). Mr. Hooks said he means the ones that have been affected by RIF. Mr. Lee said the total cost of the Classified Reduction in Force was approximately $6.3 million. Mr. Hooks asked how many employees would $3 million pay for? Mr. Lee responded approximately one-half of the employees affected. Mr. Hooks asked specifically about the office clerks and secretaries and Mr. Lee said approximately $3 million, but each category is different. Mr. Hooks again requested the dates when consultants were approved by the board during 2010 and 2011 school year and his response was that the Board did not approve but the staff approved, so it is staff that has misused $10 million of the peoples’ money. Mr. Hooks asked that staff show him where in the budget that this money is being used? Mr. Lee responded that on page 11, line 42 “Inservice Training” is estimated to be a little over a million dollars. Mr. Hooks agreed with Mrs. Crawley that in spending this kind of money people need to know what it is spent on, because the Board is held accountable for how the money is spent. Mr. Hooks asked the Board President why is she always calling him down when he is stating facts? Ms. Priest responded that because it is her responsibility to do so. Mr. Hooks said he is addressing the Consolidated Annual Budget and that is what he was doing.

Attorney Julie Lafargue explained to everyone that the purpose of a work session is to ask questions about agenda items and not to give opinions or to make speeches. All the agenda items, and particularly the budget, are very emotional items and the Board will have an opportunity when the budget is debated to give opinions about the budget, but the work session is to ask the Superintendent and staff questions. She said the President has the obligation to run the meeting and direct the members of the Board to ask questions of the Superintendent and
staff. She reminded the Board members that there will be time at the meeting for which the agenda is being set to debate and give opinions about the budget and every item on the agenda.

Mrs. Crawley asked for a point of order and a Board member can give a direction to the staff? Ms. Priest said that is correct. Mr. Hooks said he is not making a statement, but he is asking where did $10 million go. He said each item should be brought to the board for approval and asked if there is a new payroll system that we paid $3 million for? Mr. Lee responded that there was $3 million budgeted and approximately $2 million has been spent and we are working on a payroll system. Mr. Hooks asked how long has the district had this system? Mr. Lee responded over a year, possibly 18 months. Mr. Lee said we purchased two systems from this company and between the two it has been about two years. Mr. Hooks asked if we are using this system and payroll system. Mr. Hooks asked how long has the district had this system? Mr. Lee responded we are not using the payroll system. Mr. Hooks said of those laid off, how many would this $3 million pay for? Mr. Lee said in this case none, because this was paid for from Quality School Construction Bonds which cannot pay for any salaries. Mr. Hooks asked if we just threw $3 million away? Mr. Lee said we are still working on the system attempting to get it implemented. Mr. Hooks asked why are we still trying to get it implemented? Did we not research it before we purchased it? Mr. Lee said there were four companies that came in and presented demonstrations on their products. Mr. Hooks asked if it is true Jefferson Parish tried the same system and it did not work. Mr. Lee said they have installed the financial systems as we have and have not installed the payroll system as we have not. Mr. Hooks also referenced page 3 and asked the Superintendent about the Minimum Foundation Program under State Sources and the recommendation that this will be flat. He asked if the reserves are to be flat, why then, on page 10, number 19, are we showing a $7 million increase over last year? Mr. Lee said we would have had the same amount of revenue, but they pulled out MFP money this year and replaced it with EduJobs which is a Federal fund; and if they had not done this, we would roughly have the same amount of MFP revenue that we anticipate we will receive next year. Mr. Hooks asked about page 4, General Administration, and the listing for Assistant Superintendents since we no longer have these position? Mr. Lee clarified this needs to be changed. Mr. Hooks asked if, since we spent this much money, we can bring this to the Board to approve each item (fund)? He said numbers can say anything, but he believes the Board needs to approve these expenditures. Dr. Dawkins asked if staff is being asked to bring the contracts principals sign and send to us? Mr. Hooks said not necessarily, but for consultants, for example. Dr. Dawkins responded that many of these begin with the principals as a request and Mr. Hooks said that is what he would like to get. Dr. Dawkins stated that staff will look at a way to organize this requested data. Mr. Hooks asked if we still had the $10 million would there have been a Reduction in Force? The Superintendent said if we had $10 million he doesn’t believe we would be having this discussion, but of the $10 million, approximately $8 million was Federal dollars required to support programs such as Title I, etc. and there are restrictions in how these funds can be used.

Mrs. Bell referenced Board members’ questions relative to unemployment and retirement costs and asked Mr. Lee if we pay retirement costs to the charter school teachers? Mr. Lee said we do not currently. She asked if legislation passes requiring the district to pay retirement cost for those teachers working for a charter school, will this be a cost from the General Fund? Mr. Lee stated that the way the question was posed to the district, that is correct, and we would have to pay retirement costs for those teachers working in a charter school. Mrs. Bell said she is not an auditor but she would like to ask if after the district finished paying what it is required to pay next, how much is that? Mr. Lee said it is approximately $5 million. Mrs. Bell asked if this money will be the District’s after this year. Mr. Lee said that is correct. Mrs. Bell asked if it is possible, knowing that we will have that money next year, to borrow it from the QSCB fund and pay it back when we receive the funds? Mr. Lee stated that he doesn’t agree with that because with retirement and health care cost increases this past year, he does not envision this changing. There will be additional costs the district will incur paying what the district must pay into the retirement system as well as the district’s portion for the insurance costs. Mrs. Bell asked if whatever we need, do we need it to be ongoing? Mr. Lee said that is correct; we need to get to where expenditures do not exceed revenues. Mrs. Bell asked if she is correct that this will not help those laid off because it is only a one year thing and next year we would face the same thing. Mr. Lee said that he believes that is correct unless a magical source of money is received. Mrs. Bell referenced page 11 in the budget regarding travel, and she believes the Board said it would not touch anything that affects our children and teachers. She reminded everyone that we are now in the 21st Century and teachers need ample training on the newest technology being used, which may require them to travel. She said she feels the same for vocational education and
Mr. Riall asked staff if based on the input will staff provide a final draft of the budget with changes and does staff expect there to be a lot of changes? Dr. Dawkins said staff will take the input and submit a revised draft of the proposed budget to the Board by the end of the week to allow the Board considerable amount of time to review it before the 21st. Mr. Riall asked what will happen if the Board does not approve the budget on the 21st? Mr. Lee explained that the budget is staff’s authorization to spend and July 1st begins the new fiscal year for the district. If staff does not have an approved budget by July 1st, paychecks will not be written. Ms. Trammel asked about changes in the pupil support services and the reason for “zeros”? Mr. Lee explained that means there is no change and the position remains the same. Ms. Trammel asked when will staff receive a list of the directors for these departments. Mr. Lee responded that at this time those listed with a zero for 11-12, there is no position approved at the present time to be placed and Special Services is the only one showing this at this time. Ms. Trammel asked if there is a Director of Attendance and the Superintendent said there is not and this is part of the reorganization and staff will provide this information to the Board as well. Mr. Lee added that the position is there, and there are funds to place someone in that position. Ms. Trammel asked why no one has been placed in the vacant position? The Superintendent responded he has not found the person he wishes to place in that position. Ms. Trammel referenced the combining of clerical positions and the fact that there are some positions that cannot be combined as they are not related and to put them in the same category to work, it will not function.

Mrs. Crawford asked if there was any increase in the sales tax revenue other than what is shown? Mr. Lee said staff did budget $75.3 million this year and at this time, the estimate is approximately $76 million. Mrs. Crawford asked if Child Nutrition is a part of this budget and Mr. Lee explained that it is part of the package presented, but it is not a part of General Fund. Mrs. Crawford stated that Caddo raised lunches by 25 cents several years ago and it only generated $300,000 and asked why is the Federal Government asking us to add to the lunch cost? Ms. Priest asked that the response be held until discussion is held on this item. Ms. Priest explained that this item is separate from the General Fund Budget discussion and will be discussed later in the meeting.

Mrs. Crawley asked what contributed to Caddo being on a State Watch List if we have a great bond rating? Mr. Lee responded a reduced fund balance. Mrs. Crawley said we took the $16 million out of the fund balance and put it in another place, and asked what are the consequences of being on this list? Mr. Lee said he is uncertain but he has been in conversations with the State on how this situation will be corrected. Dr. Dawkins added that the State has not indicated what, but they have phoned to determine what Caddo is doing to remedy the situation. Mrs. Crawley asked if it is similar to a warning of what the District needs to watch, and Dr. Dawkins responded that is correct. Mrs. Crawley asked the Superintendent if he understands that in her suggestion to
combine secretarial position that she was not requesting that those two particular secretaries be combined? Dr. Dawkins confirmed his understanding.

Mr. Hooks asked about page 80 and the $400,000 budget for asbestos abatement and what schools is this for? Mr. Lee explained that these are Capital Projects and Mr. Steve White responded this is a general allotment for asbestos abatement for all schools and covers a three-year plan, as well as anything that becomes a problem during the year that needs to be handled immediately. Mr. White said the $400,000 is a guesstimate of what we have seen in the past. Mr. Hooks asked the Superintendent if the Board could possibly take some of this money since we do not know if we will spend it or not and rehire some of these persons laid off? Dr. Dawkins said some of these contingencies in health and safety issues require us by law and if it is not there, it could possibly put the district at great risk. Mr. Lee reminded him that this money is funded by tax millage rates through Capital Projects for renovation or construction of buildings and they cannot be used for salaries. Mr. Hooks asked about the amount of architect and design fees totaling $683,000. Mr. White explained that this is for all the projects and the Louisiana State Law requires that if we put a project out for bid, it must be stamped by a licensed architect or engineer and the typical fee for a renovation job is between 9 and 10 percent and on new construction, it is between 6 and 8 percent. The budgeted amount is based on the total capital projects over the course of the year that will require a designer. Mr. Hooks asked if this budget amount is for specific schools and Mr. White said it is for all the schools listed in the Capital Projects Budget. Regarding the line item on handicap accessibility, Mr. Hooks asked if most all the schools are not handicap accessible? Mr. White explained that we have ADA issues throughout the district and we always budget money in the event a specific need arises in a certain area where there is not handicap accessibility, and reminded the Board that a couple of years ago the district was sued over the lack of handicap accessibility at Fairfield Elementary and the Department of Justice came in to oversee the project. Mr. White said staff is attempting to address schools every year and the important thing as noted by the Department of Justice is vertical accessibility and is why the Board will see every year an elevator project in a school. There are still a number of schools in the district that do not have vertical accessibility to all places and staff is working under a program where every year under the cooperation of the Department of Justice where we are attempting to address at least one school and not put an undue financial burden on the district. Mr. White added that if in one year we had to place elevators in every school that does not have one, it would be more than the Capital Projects budget could bear. Mr. Hooks asked about the $1 million budgeted for school equipment and furniture? Mr. White explained that this line item is not spent by the Capital Projects Department, but it is for replacement of chairs, desks throughout the district. Schools that have this need will call into the Purchasing Department. Mr. Hooks asked for clarification and this costs $1 million? Mr. White said it has been excess of that amount in the past. Mr. Hooks asked what fund does this come from and Mr. White explained that it is funded from the Capital Projects fund but it is administered by the Purchasing Department. Mr. White added that it could also include items such as science equipment or any other type furniture used in the classroom.

Approval to Begin the Process of Renaming the Professional Development Center The Wanda L. Gunn Professional Development Center. Mrs. Crawford stated that Mrs. Gunn worked for Caddo Parish Schools for over 50 years in numerous capacities in the instructional area and she is recommending that the district recognize her service and love for the students, teachers, the district in this way.

Approval of Newton Smith 6th Grade Center. Miss Green asked when the Board approved Vision 2020, it was what was recommended. Dr. Dawkins explained that the 6th Grade Center was included in that, but the location was not determined at that time. Because Newton Smith was officially closed, this is to bring the facility back online for use as a 6th Grade Center. Miss Green asked if the Board is being asked to vote on this at the next meeting? Ms. Priest responded that is correct and Miss Green stated that she sure hopes we know what we are doing. Mr. Hooks asked the superintendent if he is aware that Newton Smith is not equipped for a middle school? Dr. Dawkins stated that Newton Smith has been on-line as a middle school and it has some issues with a gymnasium; however, staff is creating some outdoor space that will provide the 6th graders with these experiences. While there were some challenges, he believes the covered space will meet what needs to be done; and we are also working with Green Oaks and Southern to use some of their indoor spaces. Mr. Hooks asked about transportation for students because of the distance Newton Smith is from those who will be attending there? Dr. Dawkins stated we are transporting a number of students anyway, and we believe we can route...
the students so that there is not anything additional in terms of routing. Mr. Hooks asked if Newton Smith is the only 6th Grade Center and Dr. Dawkins explained there is a 6th Grade Center at Caddo Middle Careers and Technology Center.

Mrs. Crawford asked Dr. Dawkins how many 6th grade students will be attending Newton Smith and what is the school capacity? Dr. Dawkins responded close to 400 and the capacity is approximately 500 students. Mrs. Crawford asked if the money has been approved for providing the covered space for P.E.? Mr. White explained there were options, but the Board never approved money for the project. Staff can revisit this with the Board and bring back the options if the Board so chooses. He also explained that an exterior dual port installed on the East side of the school building and a single port on the West side were proposed and staff looked at covering the dual port so the children would have a place in the event of inclement weather for Physical Education. Mrs. Crawford asked if the furniture (desks, chairs) are all appropriate for middle school students? Mr. White responded yes and they were changed to this two years ago. Miss Green asked the Superintendent when will the teachers at Newton Smith know where they will be? The Superintendent responded that is now happening.

**July Meeting Dates.** Ms. Priest stated that it has been the Board’s tradition to have one meeting during the month of July. After discussion of possible dates, it was the consensus of the Board to hold two meetings in July because of the many changes taking place. Mrs. Crawford stated that she too believes it is critical to hold two meetings in July. Mrs. Crawley stated that two meetings are fine, but if the majority of the Board doesn’t support two meetings, she asked that the one meeting be held on July 19th. Mr. Riall stated if there is a meeting on July 5th, he will be out of town and will be unable to attend. Ms. Priest proposed that the two meetings in July be scheduled for July 12th and July 19th.

**Increase in Meal Prices for Child Nutrition Program.** Superintendent explained that embedded in the proposed Consolidated Annual Budget is a request for an increase in the meal prices that the Federal Government is requiring. The minimum increase is 10 cents and that is staff’s recommendation. Deborah Harris, director of child nutrition, explained that in December 2010, the Healthy Hunger Free Act was passed and with the passing of this act, the USDA was directed to increase meal prices of paying students to be equal to at least the reimbursement we receive for a free child. She said the amount received for free students is $2.46 and instead of attempting to raise the meal prices to that amount, it is proposed that the district gradually increase of 10 cents a year so it will not be a great hardship to the parents. Mrs. Harris stated it is felt that the monies are being taken from reimbursements to make up the difference for paying students. Mrs. Crawford asked if this passed in December 2010, why has the Board not addressed this before now? Mrs. Harris responded that it does not go into effect until July 1, 2011. Mrs. Crawford asked if this will only affect paying students? Mrs. Harris agreed. Mrs. Crawford asked how many students does this affect in Caddo? Mrs. Harris responded that for the number of paying students that eat, it represents 123,963 student-paid meals. Mrs. Harris said if the student-paid meals are increased by 10 cents, it will increase the amount to approximately $93,000. Mrs. Crawford asked if any of the money from ice cream sales in the cafeterias can’t be used for the 10 cents? Mrs. Harris responded we can do the difference, but what happens is the use of the funds are used up for that of the paying student and is what the Federal Government is trying to eliminate. Once the Child Nutrition Program funds are used, then Caddo’s General Fund will have to pick up all the funding. If USDA feels that Caddo has not done its part in addressing this concern, they could deny us the National School Lunch and/or School Breakfast Program. Mrs. Crawford responded that is not what she is saying, but only that she does not want to put this on those who are paying. Mrs. Crawford asked staff how many years will we add this 10 cents to the lunch price? Mrs. Harris explained that the district has 10 years to bring it up to the $2.46 reimbursement rate amount, and the Board may choose not to increase this year; but it has 10 years to get it up to that amount. Mrs. Crawford asked staff how much do paying students pay? Mrs. Harris said elementary students pay $1.50, secondary students pay $1.75. Mrs. Crawford asked if she understands correctly that 10 years from now it will a $1.00 more? Mrs. Harris said that is correct if the reimbursement rate does not go up. Mrs. Crawford asked if she is correct that the General Fund gave money to the Child Nutrition Program this year? Mr. Lee said we have not, but they received a small portion of the MFP from the district, but it was not from the General Fund. Mrs. Crawford noted that if it is now $2.46 and a dollar over the year is added to it, we will actually be over this. She shared how she hates adding a cost to the paid lunch because even though 10 cents is not a lot, it is to some.
Ms. Priest noted the equity in school lunch pricing that is under this act and the law specifically states that we have to comply with this and requires the USDA to collect it. She added if we do not comply with this requirement then the district will see a reduction in future Federal funding.

**Roll Forward Property Millages.** Mrs. Crawley said this will generate about $5 million for the General Fund and she will attach to her motion that this $5 million be used to reinstate the most necessary secretary/bookkeepers. She stated that she will ask the superintendent to put together a committee that involves principals and members from his staff. She said if we wait to roll forward next year, it will hit the taxpayers a lot more as a result of homes being reassessed, so it is better to do this now. She added she knows it is a political thing and that is why she is requesting these dollars be designated for rehiring needed secretary/bookkeepers. Mrs. Bell asked the maker of the motion if this is a one time thing, because she does not want to bring these employees back and there not be recurring revenue and have to go through the same thing next year. Mrs. Crawley said it will be $5 million every year. Mrs. Bell asked Mr. Lee to verify that the district will receive this $5 million every year? Mr. Lee explained that at Board members’ stations is a packet of information on rolling forward property millages. He said the drop-dead deadline for Board action is July 15th; and the July 19th Board meeting would be too late. Mr. Lee said there are two resolutions that must be adopted to roll forward property tax millages – (1) one currently on the agenda for June 21st establishing the millage rates as they are currently are with no increase, and this must be done even if the Board chooses to roll forward the millages; and (2) set a Board meeting in July before the 15th to address the roll forward. He further explained that it cannot be done in June because of advertising requirements because of doing this without taking it to the taxpayers for a vote. It must be advertised twice 30 days prior to the Board voting to roll forward and if the Board votes on it July 15th, the second advertisement must be done by June 15th. Mr. Lee also stated that if the Board votes in July to roll forward these millages, it will take us to a higher millage rate at the last reassessment and provide these funds. He also stated if the Board increases the millage this year and the tax assessor reassesses property next year, and we follow the historical trend, the overall tax base in the parish will be higher, but the assessor will adjust the millage rate down so the district continues to get the same amount. One concern in rolling forward the property millages could possibly be upset taxpayers because we passed on taxes to them that they did not have a say in.

Mrs. Bell shared her concern regarding the finances and she does not believe we know enough about this at this time to do this. She stated that she contacted the tax assessor’s office to ask questions and she will study this, but this is only $5 million and it will not bring everyone back and she wonders if this revenue does not continue will we back to this same situation again? Mrs. Bell said we want to make sure if we do this that it is the best thing for all.

Mr. Riall asked Mr. Lee what were the millage rates set at the last time? Mr. Lee said they are set each year and the taxpayer dictates what they will be on a four-year reassessment; and unless a roll forward is done, it is established at the fourth year. He further explained that the three years between each assessment, the millages remain at the same rate set by the assessor unless the Board chooses to roll forward. Mr. Riall asked Mr. Lee to explain how we accumulated this 4.8 mils? Each four years as the property values increase, and they have for many years, the Board can choose to bring it back to the level voted on. Mr. Riall asked if the Board votes to roll forward, will the district receive the additional property tax? Mr. Lee said that is correct in December and January. Mr. Riall asked when they reassess property values next year, will they drop the millage again, but we will reflect the additional $5 million? Mr. Lee responded that is correct. Mr. Riall asked if he understands correctly that to vote on this by July 15th, we must publish two notices by June 15th, because if so, the Board does not meet until June 21st? Mr. Lee said that is correct and we can follow through with the process no matter what the final Board decision.

Mrs. Crawford asked the Superintendent about the numbers discussed when previously discussing this and asked if those numbers are on top of what we already pay? Mr. Lee said that it is on top of what we receive. Mrs. Crawford asked if the roll forward represents an addition to what taxpayers already pay? Mr. Lee said that is correct, the numbers are the additional amount. Mrs. Crawford asked if she understands Mr. Lee’s concern to be millages that we already have due in the next couple of years and the roll forward could possibly endanger those millages passing? Mr. Lee said that is correct if taxpayers are upset enough, it could jeopardize them. Mrs. Crawford stated she understands there are taxpayers in this room, but there is no guarantee that the money would be used to bring all the workers back since we are still spending $15
million more than what we are receiving? Mr. Lee explained that it will depend on how the motion is made, because if the motion is that the money will be used to rehire employees laid off, this amount will not bring all laid off employees back and he does not know how you would choose which ones are brought back. Mrs. Crawford also asked if it is possible there may be additional cuts? Mr. Lee responded that the Superintendent has indicated this is not all, but he has not received any directions. She also asked Mr. Lee if the millages coming will create more than what the roll forward will generate and Mr. Lee said that is correct, much more. Mrs. Crawford said while she understands there are taxpayers in this room, there are also those taxpayers in this room that lost their jobs or their husbands have lost their jobs and benefits. She does not want the Board to make a decision that will jeopardize these further and possibly cause them to lose their house. She added there is much to be considered before making this decision.

Mr. Lee added that when this comes for action, he reminded the Board members that it requires that 2/3 of the Board members are in favor, not 2/3 of those present, but of the total membership. Mrs. Crawford asked the Superintendent if he plans on making additional cuts in the future and the Superintendent responded yes. Mrs. Crawford shared that she only wants everyone to have all the information needed to make this decision.

Mrs. Crawley stated that doing this will not bring back everyone, but she hopes the Superintendent and his committee will choose to only cut the extra positions not needed. She also said that she asked Mr. Lee what the additional taxes would be, and she assumed the $38 quoted is the average increase in additional property taxes, which she doesn’t believe will cause anyone to lose their home. She quoted the philosophy of a bird in the hand is worth two in the bush and now we have this in hand and the pink slip in the other hand. Mrs. Crawley stated she does not believe a bond issue has a chance of passing and that is school site persons. She asked that the amounts be broken down and shared with her, numbers in the top 10 school sites.

Mr. Hooks asked the Board if it thinks it is fair to increase taxes on people that have been given pink slips? To him, this is like a slap in the face. He said we have taken their jobs and their benefits and he does not believe this to be fair.

**Reinstate Employees who entered DROP prior to RIF and are set to retire by December 31, 2011.** Mrs. Crawley requested that staff provide her with information on how many employees would be included in this and what the cost will be? Mrs. Bell asked the Superintendent/staff to further explain and Dr. Robinson stated that the reference is to those already in DROP so the process to come from DROP to actual retirement is a short, abbreviated process and a matter of paper work. Mrs. Bell asked if those affected by this are saying they will retire in December? She responded that they notified personnel prior to RIF that they would be retiring when they came out of DROP. Mrs. Crawley said she is only referencing those that are already in DROP and are scheduled to retire as soon as they come out of DROP and before December 31, 2011. Mrs. Bell stated that she too would like to know the number. Ms. Trammel clarified that if someone is in DROP right now and they know they will retire by December 31st, why can’t that person retire now. Mrs. Crawford explained it will cost them a lot of money, thousands of dollars. Dr. Robinson responded that a person who would choose to retire now as opposed to December 31st would lose six months of compensation that figures into what they will receive the rest of their life. Ms. Trammel said she recently retired and once they did her configurations, her money did not change that much. Dr. Robinson explained that it is individually based on an employee’s salary. Mr. Hooks asked about an employee’s accumulated sick days and vacation days? Dr. Robinson explained that sick days are lost in the RIF policy.

**Authorize an Internal Audit of All Departments and Functions of the Central Office Staff in the Following Order: (1) Operations Division, (2) Academic Affairs, (3) Student Support Services, (4) Human Resources, (5) All Other Functions of Direct Report to the Superintendent and Provide the Audit Reports to the Caddo Parish School Board on the Review of Each Department as it is Completed.** Mr. Ramsey stated that doing this will identify and address appropriate staffing issues, practices, implementations, policy, and just about every other question that has been asked. While he doesn’t know what to expect, he does expect that overall the staff has done a decent job of trying to pursue a difficult task; however, he believes it to be appropriate at this time to do this audit to take an internal look, to quantify,
verify and if there is a need for further staff reductions because of duplication of clerical services, may be forthcoming, as well as how to manage the fleet. He said he believes this audit will also address the technology questions asked and concerns about the payroll system, the HR component, et. al. and he expects that all of these things will be looked at with a detailed report to the Board. If, at that time, there is a need to pursue action, he will be the first to make a motion to pursue such action. He stated this is something that needs to be done on a periodic basis and it has been some time since this was done. He said the bad news is there is still a $15 million spending issue that must be addressed; and while it is not an easy task, it is a much needed process the Board must go through. Mr. Ramsey also asked that the Superintendent, in guiding the school system and making the decisions, to make sure the cuts are done fair and across the board.

Mr. Riall asked about guidelines for what we want? He also asked if staffing efficiency will be addressed in all departments. Mr. Ramsey said the beauty of an internal audit is everything is on the table; and at this time if there are additional questions, maybe the internal auditor would be the one to ask the questions. Mr. Riall stated that in conducting an audit, he shared that he believes it to be important that this auditor answers to the Board and is not overseen by any member of staff and can we be assured that this will happen? Mr. Ramsey reminded everyone that the policy reflects that the Internal Auditor does report to the Superintendent. He also referenced he is familiar with one audit that this individual prepared and it was a very prominent audit. He said such an audit may also reveal some things the Board may need to address. Mr. Riall stated that he doesn’t want to imply anything, but he believes in doing this audit, we need to be totally honest and transparent. Mrs. Crawley asked Mr. Ramsey if the order given is the order in which the expected report should be presented, and Mr. Ramsey said it is, and he expects this report to be done and presented in a timely fashion, possibly 2-3 months or longer.

Ms. Trammel asked Mr. Ramsey if she understands that the person he wishes to conduct the audit is the Chief Internal Auditor, because he is the only one that can do it. She asked will he not be evaluating the positions and departments that he works with? Mr. Ramsey said he will utilize whatever staff resources available that report to him. Mr. Trammel asked if we have done an internal audit before? Mr. Ramsey responded that the only internal audit he is familiar with is one dealing with land acquisition on Norris Ferry Road. Ms. Trammel asked if an audit was not done in this building to evaluate jobs? Mr. Ramsey responded that if Board member Trammel is referencing the compensation study, it is not the same, since there was a consultant hired to do a study. Ms. Trammel asked what was learned from that study? Mr. Ramsey said he believes that is talking apples and oranges, and he believed what the Board learned from the study and what Ms. Trammel learned from the study could be two different things. He further stated that the result of that study was the result of an outcry for a new compensation plan. Ms. Trammel stated she remembers employees having to complete forms on what one’s job responsibilities were and they evaluated them to determine if jobs were the same or overlapping. Mr. Ramsey asked the Internal Auditor to share how he would look at the clerical staff to determine efficiencies and inefficiencies. Mr. Howard said that is correct and the compensation study is not something his department conducted. Ms. Trammel stated she understands, but asked why can’t we take advantage of what was learned from that study? Mr. Howard said the purpose of that study was not to evaluate departments for efficiencies which is what Mr. Ramsey is asking for. Ms. Trammel said she believes that is what the consultant said the compensation study would do. Mr. Howard said he wasn’t involved in that particular study, but he does not believe the purpose was to evaluate inefficiencies and efficiencies. Ms. Trammel asked what will happen when this is completed. Mr. Howard said that he will need to sit down and plan it out and determine what needs to be looked at and come up with a program. Mr. Ramsey stated that one thing that may come out could possibly be redundancies in the clerical staff and perhaps some streamlining could be done.

Mrs. Crawford asked Mr. Ramsey to put a time period on the motion so it does not take a year to complete? Mrs. Bell asked if she understands that the one auditor will be the one to go from office to office to conduct this audit? Mr. Ramsey responded that as he understands it, the Chief Internal Auditor reports to the Board and is the only one that has the authority to direct staff in the conducting of an audit to determine practice versus policy issues, policy conflicts, are we utilizing clerical staff, vehicles, practices appropriately, etc.

Ms. Lafargue explained that the function of an Internal Auditor or the Office of the Internal Auditor is similar in many governmental agencies and it is a staff that does not report to any
single person in that government agency and operates independently even though they are
employed by the organization. As auditors they are trained to review an organization and its
practices, bookkeeping, management, and the organization (the Board) can ask the Internal
Auditor to conduct an audit of aspects of the organization. The sole function of the Audit Office
is to be independent of any other department of the organization and report only to the Board.
They should honestly and professionally give the Board an opinion about how the organization
operates without the need for hiring someone outside the organization to conduct such an audit.
The scope of the authority of the internal auditor is established in the Board’s policies.

Mrs. Bell asked Mr. Howard how many CPAs are in this department? Mr. Howard responded
there are two (himself and one other) and there is a CIA. Mrs. Bell asked why Mr. Howard is the
only one that can do this? Mr. Howard explained that he would use his entire staff to do this.
Mrs. Bell asked Mr. Howard what his current function is as Chief Internal Auditor? Mr. Howard
explained that his department periodically conducts audits of various departments even though it
is not within the scope being asked by Mr. Ramsey. Mrs. Bell asked Mr. Howard who he reports
to and Mr. Howard responded to the Superintendent, but on the organizational chart his position
reflects a line to the Superintendent and a line to the Board. Mrs. Bell asked these questions
because some Board members asked for a time line and she believes if this is done correctly, it
will take some time, and Mr. Howard confirmed it will take some time to conduct these audits.
Mrs. Bell asked if these reports reflect there is an overlapping of clerical, etc. will there be
another reduction in force? While this is a good thing and is something that should have been
done before now, we need to look very closely at this and take the time needed to do this right.
Mrs. Bell stated that her concern is that there are not enough employees in that department to be
able to conduct this audit within a year’s time. Mr. Howard stated that this audit will be done as
expeditiously as his staff can do it and do it correctly.

Ms. Trammel asked if we are saying there is a need to embark on time as it relates to doing this
audit and the Board received information relative to employees being laid off one day in
advance, so she doesn’t understand how we are weighing the difference in time. Ms. Priest
stated that Mr. Ramsey’s agenda item and motion state to authorize an internal audit of all
departments and function of the Central Office and staff in the following order: (1) Operations
Division, (2) Academic Affairs, (3) Student Support Services, (4) Human Resources, and (5) All
other functions of direct report to the superintendent and provide audit reports to the Caddo
Parish School Board as the review of each department is completed. Ms. Trammel stated her
understanding, but the question was relative to the time, and because it didn’t take us a year to do
other things, she does not believe it should take a year to do this audit.

ESTABLISH THE AGENDA AND THE CONSENT AGENDA

President Priest announced that 2.01, 7.01-7.02, 8.01, 8.04-8.12 and 8.14 are the consent agenda.
Mr. Riall moved, seconded by Mrs. Bell, to approve the proposed agenda and consent agenda
for the June 21st CPSB meeting as presented. Vote on the motion carried unanimously.

POLL AUDIENCE

Gae Graham, parent of two students in Caddo Parish, shared petitions with the Board and her
disagreement with the process followed to lay off employees to cut costs, in particular the
secretary and bookkeeper at Eden Gardens Magnet. She stated her understanding that difficult
decisions need to be made, but she believes the principal should be able to choose his/her staff
members. They want their office staff back and asked the Board to reconsider and return these
employees to Eden Gardens.

Kristy Payne, parent, shared her concerns relative to the budget regarding the following items
that need further justification, clarification or review: (1) increase in the remediation program
from $91,000 (2009) to $5,532,000 (this year), (2) increase in summer school from $416,000 to
$915,000, (3) ISS increased $68,000 over the past two years, (4) Inservice training increased
$186,000 over the past two years and this budget reflects almost $1 million, (5) legal counsel
used to be $250,000 and as a result of the restructure, it is now $650,000, and (6) travel expenses
are budgeted at more than $3 million but at Eden Gardens the PTA pays for their travel expenses.
She said there are others such as elections and school board association dues and it is her feeling
that there is no place for extravagant increases in the budget if it costs the school a staff member,
especially when the two fired take no benefits from the parish. She encouraged the board to use
the millage roll forward to reinstate staff only, allow principals to make all final staffing decisions at their school, and do not blanket the entire district but release those employees who are inefficient. She encouraged the superintendent and board to explore these more responsible, sensible options other than sacrificing their best assets.

Christine Tharpe, parent of two children, addressed the Board on the recent decisions to cut staff and presented the Board members with a petition to reinstate the four support staff recently laid off at Caddo Middle Magnet. She asked Board members if they have ever worked in a school office and observed the constant activity and the importance of the role of each of these staff members. She said she believes the layoffs were poorly thought out, it was concealed from the public in an underhanded manner, and it was unnecessary. She addressed the millions of dollars the board has approved in consultants and unnecessary studies. Ms. Tharpe addressed the importance of parental involvement and how hard PTAs work to provide additional needs for the schools; and while she understands the decision to approve layoffs was hard, but necessary, she was disturbed when the reference was made that the school board is like any other business. She said this is different than just any business, because it is the community, our children and home and the staff at the school are members of their extended families. Ms. Tharpe asked what is the $16 million in technology spent on because their PTA has fund raisers every year for new computers and smartboards. She asked the Board to remember who they work for and that the employers are not happy.

James Jackson stated he originally wanted to discuss the closing of Caddo schools, but he believes the Board has voted on something without going to the people who placed Board members in office. He said he knows what is going on and he believes staff should have gotten input from the principals as to who’s doing the work. He encouraged the Board to listen to these who are asking for fairness, honesty and integrity and think about the decisions being made.

Darla Feibel, school secretary at Northwood High School, addressed the Board on the recent reduction in force process recently enforced. She shared her understanding of the critical budget decisions the Board must make; but, also how critical the office personnel are to the operations of the school. She questioned why there are no Central Office secretaries being laid off and why are the Central Office clerical positions more highly valued than the school-based staff? She said she believes high schools will experience the greatest impact when they lose 16 secretaries at 11 sites and Central Office is losing 10 clerical positions out of 130 positions. Ms. Feibel encouraged the Board to reconsider the method of enforcement of the Reduction in Force and keep the clerical staff that directly affects the students of Caddo Parish. She also said if given the opportunity to remain as the secretary at Northwood High School during this financial crisis, she is willing to forgo her salary and work for benefits, because that’s how important her school and her community are to her.

Shannon Fortenberry, school counselor, addressed the Board on the Reduction in Force. She highlighted the training that had gone into JPAM and the Block schedule and tonight saw how much money is budgeted for training and inservices. She shared her concerns that the top two high schools, the top two middle schools and the two top elementary schools have been gutted of their office staffs and the year will begin with someone who does not know how to do high school registration. She talked about how instrumental the front office staff is to the school’s operations. Ms. Fortenberry stated that the problem is how this was handled and how angry parents all over the parish are. She encouraged the Board to reinstate these employees before we have students sitting in a gymnasium for two weeks without schedules.

Michael Roy, 33-year employee, shared with the Board the many responsibilities he has had while working for the system 33 years and he has been laid off. He talked about the importance of having someone with the skills and he has learned that while his position may have been eliminated, there will be someone else doing what he did. He also shared with the Board that he is the employee that is scheduled to come out of DROP in September, but he is unable to use his sick days until that time, and is being told that as of June 30th he will no longer have a job. He also said he doesn’t believe it is fair that employees sick leave time is taken away from them when they need it.

Jana Byford spoke on behalf of the secretary at Northwood High School and the impact that she had on their decision to enroll their son at Northwood. She encouraged the Board to revisit the budget and keep this person at Northwood High School.
Lisa Folsom shared with the Board faces she remembers from her childhood, those who worked in the office where she attended school and how important they were. She asked if the Board has thought about such issues as who will send out report cards, who will hand out band aids, who will give insulin shots, etc. because it is those in the front office that have these responsibilities. Ms. Folsom stated that her concern that students might be sitting in the gym for two weeks at the start of school waiting to be placed in classes and she wants to know how long it will take to get people in these positions. She asked the Board to reconsider the time it will take to train people to take these positions.

Mike Myers, teacher at C.E. Byrd, stated he knows the Board has many hard decisions before it, but he echoed what he heard throughout the horseshoe about a funding source. He reminded the Board that funding public education is a need because it is the most important part of a community. Mr. Myers referenced that a funding source for consideration is the roll forward of property taxes; and while he understands his property taxes will increase, he will gladly pay this if it will save these jobs. He also noted that he does not believe how this was arbitrarily done was not fair, because the basic responsibilities of a secretary are obvious (filing, answer phone, type, computer work). He believes at this time rolling the millage forward is a funding source that can solve these problems today as well as into the future. If the Board is not willing to pay for good education, Caddo schools will fail; and he encouraged the Board to take the initiative and save our schools.

Leann Anglin, parent and citizen, offered her observations of how many Caddo Parish classified persons lost their jobs last week and she would like for the public to see this list and the schools that are affected by next week. She said since the 2009-10 budget two years ago, Caddo Parish has seen a reduction of 27% in school-based clerical workers and the Central Office has seen a 3% reduction in clerical workers. Ms. Anglin also noted that in the 2011-12 budget, 166 classified personnel were cut, 150 from the schools and 16 from Central Office. She stated her concern that in the budget work sessions she attended, never was there a complete budget presented that reflects the whole picture of Caddo’s schools operation, and a final proposed budget will not be available until Friday. She asked if the Board is making the best decisions based on facts, because as of today, June 7th, principals are unable to hire critical positions, subject teachers not in the pool because of waiting on the decision with the budget. Ms. Anglin said she is remaining hopeful that everyone will get answers and will get a detailed proposed budget and that everyone will work together to decide the best solutions and that this process will begin again in January 2012 for the 2012-13 school year.

Tracy Sparaco, Herndon office clerk for three years, shared her concern that whoever is sent to Herndon will be able to meet the many special needs of the students. She stated that she doesn’t believe the effect on the schools was taken into consideration and that possibly it should have been implemented on a school-by-school basis, talking to the principals. She encouraged the Board to consider eliminating expenses such as the employee appreciation luncheon and just express appreciation to the employees by letting them keep their jobs. In the Board’s desire to run the district like a business, she believes as a business, the Board has failed its customers, the children. She encouraged the Board to rethink this decision and do what is best for the children by returning the employees to their positions.

Pat Manning, librarian at Ridgewood, addressed the Board on the recently implemented RIF policy and the important role their secretary/bookkeeper played in the daily operations of their school. Mrs. Manning stated she is before the Board because of her passion for children; and that having a special needs grandchild, she learned that each and everyone is a special needs person, each and everyone is developmentally delayed, and each and everyone has a need for validation. She shared with the Board the time their secretary/bookkeeper spent with a special needs student and how she reinforced what this student was learning in the classroom. Ms. Manning stated the importance of stability in special children’s lives and how moving people in and out of their lives affects them.

Amy Watkins, PTA president at South Highlands and parent, encouraged the Board to reconsider its decision on implementation of the RIF policy because of the negative effect this decision is on the students at South Highlands and Middle Magnet. She stated that the 166 employees let go were done so without any consideration of how they will be replaced, by whom will they be replaced, and the affect it will have on the students. Ms. Watkins stated that South Highlands is
the number one elementary school in the State of Louisiana with revenues of more than $500,000 that the secretary/bookkeeper is responsible for and who trained on her own time for over a year to replace someone who held that position for over 30 years. She also shared her concern for no principal input in these decisions, and she believes the Board’s decision has crippled the schools.

Sharon Ketchum, Forest Hill PTA President, stated that after hearing everyone express their concerns, she understands how important yet difficult change can be, especially for one with a special needs child. Ms. Ketchum also shared how difficult she knows it has been for everyone to come together and cut the budget in ways that can be agreed upon. She also asked if, in the midst of this, anyone has visited a school office to observe all that those do in the school office; and how impossible it will be to replace those that are being let go. She said with this decision, there will be more responsibility and stress placed on those left in the office, and there are many concerns for those that must work long hours and take on additional responsibility and mistakes that can happen when one is overworked and tired. Ms. Ketchum also referenced budget concerns for those that must work long hours and take on additional responsibility and mistakes to replace someone who held that position for over 30 years. She also shared her concern for no

Scott Hughes, Alliance for Education, stated he wasn’t going to speak tonight, because he thinks it is for the employees and he thinks the Board will hear enough from the employees over the impact; but enough things have come up that he has a list he is going to run through as the Board goes through it’s budget process. First is disappointment and he was told very clearly tonight that he would see a final budget; and it has been laid over two weeks for adoption on June 21st. You have failed! Over the past several weeks some amazing statements have been made which the Board has not questioned. At the last budget session under the cost of cars, it was mentioned by one of your highly paid staff people to not worry about the depreciation because it offsets the cost. He said you don’t pay taxes, there’s no depreciation in Government accounting and not a single one of the Board member’s caught that. He said the CPSB cars cost flat out cash and meals were mentioned today; and while he may have misheard, he heard that 126,000 paid meals are served. If you divide that by 160 school days, that is about 750 paid meals a day. Over 74 schools or ten meals per school. Something’s wrong there or we should eliminate the feeding program. Of course, millage, and we have talked about an extra $33 a year for millage, but Caddo Parish is already the highest millage parish in the State, and this is not a revenue problem, it’s a spending problem; and he advised the Board to once again heed the advice of your financial director, who is warning the Board about being careful going forward with a tax roll, because it is not about roll forward anymore; this is about the renewals about the Board’s tax millages next year at this point. He stressed to the Board to be very careful about millage rollage; but for the record, the Board has not listened to the financial director for the past four years, so why start now. He said the Board also talked tonight about preparing that school in reference to Newton Smith; and unless he reads minutes incorrectly, this Board voted specifically to shut Newton Smith down and it has not voted to open Newton Smith again, and any expenditure in preparing Newton Smith for next year will be an illegal expenditure of his tax dollars. Until the Board reopens Newton Smith, Mr. Hughes said the Board cannot spend a dime preparing it unless, like the Lafayette District Attorney had to remind the Lafayette School Board, transparency, unless you are meeting behind the scenes and counting seven votes, and he suggested to the Board that the process suggests that it is. He said nothing has come to this Board that doesn’t seem to have seven votes and he closed with the following, stating that he wants to ask a question that maybe the Board will answer in the next two weeks before the budget is approved. He said there is a rumor going around the community that the Board has also gone to a Federal Judge and asked about unitary status and you were denied, and he would like this Board to address that since he has already opened discussions on unitary status and Consent Decree issues with the new issue on the Board’s Vision 2020 Plan. If we keep having votes come up that appear to be seven votes in the pocket before it gets to the public, then it might be necessary to have the Caddo DA come and explain public meeting law to you.

Jackie Lansdale, president of the Caddo Federation of Teachers/Support Personnel, asked the Board to compare the show Family Feud, where family members are asked to guess the most popular answers of others to certain question, and what would the most popular answers be to the question of “what are the basics of public education?” In addition to school houses, teachers and students, would the most popular answers be Central Office or other non school sites? Mrs. Lansdale stated she believes the team that created the Caddo School Board’s lay-off list
obviously put management at Central Office as number one, and she says this based on the fact that it is the team that created the list that put school secretaries in different categories from secretaries at other school sites, including Central Office. She noted the principal’s secretary being laid off, but the person who took her place at Building 6 was not laid off. Being a part of the committee that revised the RIF policy, there was never any mention of dividing employees based on schools and other sites, because secretaries are all the same grade and the only difference in their separation is in the compensation study. Mrs. Lansdale stated they are also perplexed because the clerks laid off were required to take a parapro test required by No Child Left Behind; thus she questions why office and library clerks be asked to take this test? Is it because it allows Central Office to interchange these employees based on the need? She said it does not make sense that they are interchangeable when hired and working, but separated only when fired? She stated that these questions are posed to the Board to say that layoffs must be based on needs of the district, they should not be based on politics, or who will give the District the least amount of trouble, but based on policy and not subjective interpretations as they have seen in these layoffs. Mrs. Lansdale said they have asked these employees to step forward and avail themselves of the appeals process in Board policy and asked the Board members to take a closer look at the fine print of the Board’s layoffs, the exit strategy, i.e. the 33-year retiree in DROP and only a few months from retirement, the many four-hour custodians, because they deserved more than a letter in a mailbox. Mrs. Lansdale also announced and invited those interested to attend a meeting at the CFT office on Friday to explore the options available to them through the Board’s policy. She also reminded the Board President that there are those in the audience that did not sign a Visitor’s Card yet they desire to speak and that in the past, signing a card to speak at the work session was not necessary.

Daryl Roberson, Caddo Association of Educators, said there are so many unanswered questions and plenty of blame to go around in the implemented reductions. In the Board’s consideration of possibly rolling forward the property millage and creating approximately $5.5 million to understand that this roll forward will, on an average, cost approximately $1-$10 a month for homeowners whose property values are $100,000 to $350,000. He said the Board’s unwillingness to move funds from undesignated funds that are moveable to help the District’s General Fund balance crisis only brings more questions. Mr. Roberson asked at this point who can be blamed, who can be called into accountability, how can we get out of this mess, who will suffer the most from these tough decisions; and again, who can be called into accountability? Mr. Roberson asked if sound decisions have been for the students and employees, who can be called into accountability? He also asked the Board if the decisions being made are sound decisions, will they put the school district on sound financial footing? If not, who can be called into accountability? Mr. Roberson said there is blame enough to go around in poor decisions, decisions made without all the information needed or the best information, self-serving decisions, a lack of vision, a vision that is proving to be costly beyond dollars and cents, and these decisions now have everyone in a blame game. He asked the Board and administration what will be done to make things right? Mr. Roberson challenged and urged the Board to take the draft budget for 2011-12 and go through it page by page, line by line and get a complete understanding of it, because we are in very lean times and there is a great need to trim the fat. He also reminded the Board that all eyes are on the Board.

Sarah Nick stated that she is honored to be Caddo’s District VII Teacher of the Year and will be going to Baton Rouge in July. She shared with the Board that in her home when there is no money, they stop spending. She commended the Board on its stamina, because it is important, and she said she believes the Board is hyper analyzing everything without seeing what is truly important. Ms. Nick said if you take away the people, the warm bodies that directly interact with the students, you have started what will be a disaster. Ms. Nick said she believes the Board should be able to run the district with the monies it has and while she doesn’t understand where the $88 million surplus went, this is something she would be interested in seeing. She also commended Mr. Ramsey on his internal audit; however, to her it sounds like the old cliché “a pound of cure”. Having more children in a classroom will not increase students’ learning, but it decreases it and shared her experiences. She also asked about the phones placed in teachers’ classrooms and the cost to place them there, because she does not have one anymore. Ms. Nick shared with everyone products that she sells to earn money to buy computers for her students. She also shared how the secretary/bookkeeper at their school worked four days beyond her last day at school to make sure the school was left in good order for whomever might follow her without training.
Jean Pomeroy, teacher at Caddo Middle Magnet, asked about all the money and where did it go? She explained that having served in the military and experiencing reductions in force, base closures, etc., she experiences cutting slots and she does not understand how Caddo’s RIF policy is being implemented. She questions where people will come from to fill the vacant positions. Over the past few years she understands there have been accounting irregularities that have gotten a lot people in trouble in this area and around the country and one of the things she does to get much needed items in her school is to do fundraisers. She said their two support staff for the year were let go along with two additional persons and she questions who made the decisions that affected these schools.

Lisa Doyal, Eden Gardens office clerk, shared with the Board her concern over the RIF implementation and the important role the office staff members play in the lives of the students at their school. She asked that if the Board is going to do a true RIF and the only qualification to be considered is time of service, to do the RIF of all classified positions paid from the General Fund regardless of where they serve, regardless of their class, regardless of who they are secretary to. She said while her job may still be affected with this method, but a secretary at a school for 15 years would still have her job. Mrs. Doyal shared that it is unfair that an employee with 33 years has to walk out the door when the district continues to employ persons that have only been employed for one or two years. She said she wants her job back.

Brooke Doyal, daughter of Lisa Doyal, shared her concerns of how people and families have been affected by the Board’s decision. She said she doesn’t understand how the Board can take someone’s job who has served the district for 33 years, and how taking away her Mother’s job could possibly cost her the opportunity been afforded her in clinicals.

Lee Lewis, school secretary/bookkeeper at South Highlands, explained that she took two years to train under the former secretary, and her concern for who will take this position and learn what she trained two years to do, along with the many other duties someone in the office performs on a daily basis. She encouraged the Board to remember that it is the students being affected, and challenged any Board member to sit in her desk for one afternoon and observe what happens in a school office.

Sacha Howard, office clerk at Oak Park, stated that she took this job to better herself and in this job she gained the love of 357 children; and when these children return in August, they will not see Mrs. Howard. She questioned the Board why they would vote for this if they were not for it?

Kimberly Hay, employee in the only budget cut at Keithville, shared with the Board the affect of this layoff on the schools. She stated she served as the attendance clerk, the discipline supervisor’s secretary responsible for inputting any and all discipline for teachers who did not have access to the students records, did court referrals, anything asked of the counselors, and “any other clerical work assigned by administrators” as listed on the job description. She said she will keep her promise to the students that she would see them next school year because she will be there August 4th to help those reporting back so they are not overloaded with the start of school; and when the students report back, she will also be there to help them make transitions.

Adjourn. Mr. Riall moved, seconded by Mrs. Bell, to adjourn. Vote on the motion to adjourn carried and the meeting adjourned at approximately 9:15 p.m.
June 21, 2011

The Caddo Parish School Board (CPSB) met in regular session in its office at 1961 Midway, Shreveport, Louisiana at approximately 4:30 p.m. on Tuesday, June 21, 2011 with President Lillian Priest presiding and the following school board members present being a quorum: Steve Riall, Jasmine Green (arrived at approximately 4:50 p.m.), Willie Burton, Charlotte Crawley, Curtis Hooks, Mary Trammel, Bonita Crawford, Barry Rachal, Larry Ramsey, Ginger Armstrong and Dottie Bell. Also present were Superintendent Gerald Dawkins and Legal Counsel Reginald Abrams. Mr. Rachal led the prayer and Pledge of Allegiance.

PRESENTATIONS AND RECOGNITIONS

Dr. Mary Nash-Robinson, on behalf of Tricia Grayson, Superintendent, the CPSB, and staff, presented the following special recognitions. The president and superintendent greeted and presented each honoree with a certificate/award. Administrators, families and friends present were also recognized.

Music Presentation. Allison Case, student at Youree Drive Middle School, was recognized as the 2011 National Reflections Award of Excellence and 2011 ArtBreak Music Composition Winner. She shared with the CPSB and audience one of her piano musical compositions. Ms. Stacey Hood is her piano teacher, Victor Mainiero is the principal at Youree Drive and Dr. Kathy Retelle is the music supervisor for Caddo Schools.

Louisiana Project G.U.M.B.O. MUDBUG Team. Pam Kerry, coordinator, highlighted G.U.M.B.O. (Games Uniting Minds and Body), a statewide sports program for students with physical and visual disabilities. Statewide there are four competitions each year and the Louisiana MUDBUGS had seven athletes to represent them throughout the state and two of those seven were from Shreveport, as were two of the staff members. She also announced that G.U.M.B.O. has been around for 25 years, and invited those who have never seen these students compete to attend the competition next Spring. Lajarus Marshall, Huntington High School, and Laquiria Taylor, Youree Drive Middle School, were recognized as the students from Caddo Parish. Diane Rose Gates, physical therapist, Jennie Reynolds, adaptive P.E. teacher, and Pam Barker, director of special education services, were also recognized for their exemplary work in providing opportunities for all of Caddo’s children.

Public Hearing on 2011-12 Consolidated Annual Budget. President Priest declared the public hearing on the 2011-12 Consolidated Annual Budget open and the following addressed the Board regarding the budget.

Jon Glover, employee, stated there are still uncertainties about the budget and asked the Board if they fully understand the revisions and the effect and ramifications on our district of what has already been adopted. She stated that this process brings a sense of urgency that will either enhance or begin a path of destruction for the district. Ms. Glover asked, for example, if the adoption of the Vision 2020 plan was really in the best interest of the students or is it in the best interest of the district monetarily? She also noted the concerns expressed about the educational opportunities, or the lack thereof, that were present for inner city students there would not have been a need to close or merge any schools. She said when it is the position of those who are entrusted to bring about equity in education and it is not apparent, it is then that they find the resulting changes instituted. Ms. Glover asked if it is the School System’s intent to recognize inequity of the educational opportunities for the inner city school children?; because if it is, she believes the handwriting is on the wall and the result will be failure. She added that if this change had not been implemented, there would be no need to consolidate schools and if there is no consolidation, there would be no job loss. She said economic status should not matter, but that each student in Caddo Parish is given the best education possible. If the budget is negative,
has anyone looked to see what this is about? Will the children be the ones to suffer or will they be afforded the best education possible?

Scott Hughes, Alliance for Education, stated that much has been said about the financial and the academic issues surrounding Caddo Parish Public Schools. As the discussion on next year’s budget draws to a close, and with the likely adoption of a budget that is somewhere in the neighborhood of $16 million in expenses over revenue, he wants to pause and see where Caddo is. He stated that the issues facing Caddo are self-inflicted while many are just reflective of national economic trends and generations of bad state and local educational funding strategies coming home to roost. He added that surrounding parishes have all experienced financial issues. In watching and listening over the past three months, he said he has been amazed at those same people coming before the Board are now seen as the enemies of public educations. He added no one in the room is an enemy of public education, everyone wants the same thing and have worked for years to improve the Caddo System. In reflecting over the past week, Mr. Hughes said that the work has been more like an intervention and he believes the Board’s friends are present and have been trying to tell the Board there is an issue with Caddo Parish, serious foundational issues in Caddo and this is the fourth year that Caddo has dipped in reserves to keep the ship afloat; and now is the time to come to deal with these issues and right the course. Mr. Hughes noted that righting the ship in Caddo will be painful and will not stop tonight with this budget vote, because the real pain is still ahead, because at minimum the district will be carrying forward the $16 million operational deficit and will add to that the annual increase in health care and other benefits. The projection is that another year of level funding revenue will create the following year’s budget opening at $30 million of expenses over revenue. He said it is a hard reality for the Caddo community to possibly deal with more school closings and more reductions in work force this time next year, but deeper discussions are needed to define benefits and contributions; with the agreement that schools need to be closed, Mr. Hughes said there is only a disagreement on which schools. He said they also agree that the Board will need to right side the work force; and while they have continued to support a policy-based approach, they believe any serious efforts on budget reform must also address Central Office and suggested looking at early retirement and a review of the retirees. He also said there needs to be a look at how information is shared not only with the Board, but with the public. Mr. Hughes said it is his belief that Caddo’s financial job has been pointing to these very problems for years to look at better reporting mechanisms, maybe some from other districts, to present the same data in a better format that is more Board and public friendly. With the past three months not being easy and the future not holding any promise for improving, this will be hard work and as it has for years, the Alliance remains committed to helping seek solutions; however it will be incumbent upon the Board to recognize the problems and meet the District’s friends halfway. The supporters of public education are not the problem, but are here to help and look forward to working together as a whole community to solve the issues before the Caddo School System.

Daryl Roberson, Caddo Association of Education, stated that a house divided against itself cannot stand and challenged the Board to do everything to bring the educational family of Caddo together. Mr. Roberson stated that the last time he addressed the Board, he posed questions calling for accountability from the highest level and he hopes those concerns were not looked upon as expressions of courtesy. He noted there are divisions over Vision 2020, over school closures, over RIF, over middle aged students on high school campuses, budget issues, the roll forward of millages, reserve monies, etc. and everyone needs to come together. 

Michael Roy shared with the Board the inconsistencies in the budget, money spent that did not need to be spent. He noted the time spent last year barcoding all the textbooks to be told this year that those performing that task are no longer needed and the program will be dropped. Mr. Roy said there are numerous things that have been purchased and are no longer being utilized and he believes something needs to be done about this. He added he does not believe it right to get rid of employees when they are trying to help the district. He also shared the ways as an employee that he has helped individual Board members.

Brenda O’Brock stated that she believes the best way to save money is to get rid of some of the supervisors and administration at Central Office. She also said the Board needs to stop running people out of Shreveport by the way you do things and cut some of the administration.

There being no additional speakers on the 2011-12 Consolidated Annual Budget, President Priest declared the hearing closed.
VISITORS

Doris Stevens addressed the matter of merging and closing of the Black schools in the community and that they will not stand by and let this happen. She said smaller classrooms are needed; and she believes if this is done, parents will not send their children to the public school, but will educate them at home. Mrs. Stevens also stated that the students in their community will not be bused any longer unless it is to the Black schools in their neighborhoods. She also stated that she believes merging the middle schools with the high schools will totally destroy the Black minds with abuse, will result in increased teen pregnancies, and assaults on younger boys and girls. This is wrong and she encouraged Black parents to go to Mindtrust.com and learn about what is happening in our communities. Mrs. Stevens said she is here today because she is concerned about her Black race and if the Board denies the Black children, our future leaders, an education, we have no future. White parents know what is good for their children, and the Black parents also know what is good for the Black children. She said the superintendent did not come from Louisiana and she believes the superintendent came to Caddo with this plan and she wants the superintendent and those involved with him in this plan to know that it is not going to work.

Michelle Felicetty shared with the Board her concerns about the budget, change in student teacher ratio, classroom sizes, possibility of her considering private schools for her three children now in public schools in Caddo, and the lack of support from the Board for the roll forward that will provide much needed revenue for the district. She also noted that she had emailed information on research to the Board members relative to where education dollars should be put to use.

Gae Graham addressed the Board on the employees at Eden Gardens affected by RIF. She noted the confusion at the last budget work sessions on simple things like when you can and cannot ask questions and the lack of data this late in budget discussions, i.e. travel budgets, training budgets, staff positions, etc.? The statement was made by a Board member at that work session that they did not want to see any cuts that will affect the children; however, when the Board cut the clerical staffs at several schools, this did affect the children. By the Board laying off these employees, it will affect the schools’ ability to be efficient and successful which will affect the children. With Caddo having some of the most successful schools in Louisiana, she said she does not understand why we would disrupt what is working. Ms. Graham said the cuts should be made on needs determined by the school principal who best knows the school’s individual situation, and the cuts should be based on the quality and skilled level of the individual and not just who has seniority. She thanked Board members who have visited their schools, but if Board members have not visited their schools, she asked why? She noted how hard the office staff at Eden Gardens works and she knows this because she is a parent volunteer there. She also shared with the Board that if personnel cuts are needed to decrease the budget, there are several areas at Central Office where she believes personnel cuts could be made that would not affect the schools and children. Ms. Graham stated that the School Board’s job is to manage the funds properly so our children can have world class schools, but the Board has been trusting in the committee that has set the budget and not asked enough questions.

Ben Feibel addressed the Board on not closing schools and how closing schools affects schools and students when they are moved to another school. He said quality education should be the number one priority. He also expressed concern over the lack of thought that went into the seniority-type layoff and he believes the district is headed in the same direction as our country with mediocrity is the accepted norm and striving for excellence is considered odd. He said he doesn’t understand why the principals did not have any say or input in the layoffs and it is the principals that best know their employees. He questioned that the superintendent has only visited Northwood once since coming to Caddo and he believes the superintendent has led the district as more of a dictatorship, always getting seven votes. He also asked about the projected deficit when in 2008 there was a sizeable surplus and where the money has gone. Being in an economic crisis, he also questioned the opportunity for the superintendent to receive a $10,000 bonus. He encouraged everyone who does not believe that these things are right to stand up and fight for what is right – providing a world class school system or just words. He also understands that a school system should not be run like a business, but rather with care and compassion and he doesn’t believe the superintendent understands this concept.
Jackie Lansdale, Caddo Federation of Teachers/Support Personnel, noted disagreement with a speaker at the last meeting who said we do not have a funding problem, but a spending problem, because Louisiana School Districts depend on the State for a major portion of their funding, and it is a funding problem when Louisiana’s Governor takes almost $9 million in Caddo’s designated Federal fund dollars, when he has not provided the 2.75 percent increase in MFP for the third consecutive year, and when the State continues to add unfunded mandates. Despite this, Caddo is still obligated to provide the opportunity of a quality public education for 43,000 students. She asked the Board if they can truly look in the faces of the 43,000 students and over 6,000 employees and say with all surety and honesty that we are using every available resource and applying every policy in the most efficient manner? Mrs. Lansdale stated their doubts when looking at the impact of the recent Board decision to implement the RIF policy on the schools. She said they are now insisting on answers and will ask these questions through all the available processes in order to get those answers. She requested an explanation on the Board’s interpretation of the Reduction in Force policy in such a manner to gerrymander firing elementary, middle and high school employees only considering seniority with those segments. She also asked the Board if, when it signed off on the implementation of the RIF policy as a financial necessity, it looked at the impact rolling forward of the property taxes would have on the local budget. She stated it is their perspective that when the Board refused to avail itself of the available and essential funds that have been approved by taxpayers, then the Board becomes a part of the problem and is as complicit as the Governor in bringing harm to the school district. This will cripple and strangle public education and will continue to do so until everyone realizes that public education is a human and Civil right; and just like any public service, it must be funded by tax dollars. The Federation is convinced this is the continuation of a process not in the best interest of the school system. Mrs. Lansdale also announced that today the Federation filed a lawsuit in District Court seeking relief. She asked the Board to have the fortitude to reject the budget and require administration to reapply the resources to the schools where they belong.

Rhonda Boston, secretary at Walnut Hill, shared with the Board that she is affected by RIF and has been at Walnut Hill for 14 years, serving as substitute teacher, para professional to a special needs child and secretary for the past four years. Mrs. Boston stated that she chose to stay at Walnut Hill even after her children completed their years at Walnut Hill, and she is now concerned that her job was taken from her without any thought of how this will affect the principal, the school staff and the students. She said she loves her job and the children and Walnut Hill is her family. She doesn’t believe this to be the best decision for the school and she believes there has to be a way of meeting the budget without taking away the secretaries and clerks and asked the Board to reconsider this decision and return employees to their jobs.

Sandy Hearron, teacher, addressed the Board in support of returning the Northwood secretary, who was laid off in the implementation of RIF, to her job. As a teacher she fears the void that will be left by losing this employee because of the valuable asset she is to the entire Northwood team. Mrs. Hearron asked the Board to reassess the lay-off strategy of last hired, first fired because it is outdated and does not allow any consideration of the effectiveness in the position. She asked the Board to allow principal input for possible cuts in other areas as they are fully aware of the strengths of their employees and can also possibly suggest job combining. She said she believes this method will yield the most productive results of all.

Hailey Delira addressed the Board on behalf of the Northwood High School student body for the school secretary at Northwood High School. Miss Delira shared with the Board the outstanding job done by the Northwood principal’s secretary and her inviting and caring attitude enable her to impact students and noted the impact she has made on the lives of students at Northwood High School that contributed to their success. She make amazing contributions to the school and Miss Delia encouraged the Board to consider changing the process for selecting who gets cut. Seniority is not always the best process because it takes away the change for others.

Ginger Marks, teacher, expressed that she has located within the Caddo website various personnel and employee salary lists provided to John Settle. Due to major problems with job descriptions, i.e. duplicate position numbers and non-existent descriptions, she said it requires from forensic to document analysis and over 75 working hours. (handouts 3 and 5). She explained that total salaries for Food Service workers is over $8 million and after closing and consolidation of several schools, she noted that not one food service position has been reduced. Ms. Marks said the rumor is that Central Office is just $10 million of the budget therefore cut to this area will not have impact; however the majority of certified office jobs are included in the
budget and many other office jobs are listed in the Construction number. She noted Central Office salaries totaling $36,052,332.96; but it does not include many expenses, but only some positions that are very difficult for anyone to understand and cited examples. She stated she does not believe the cuts have fallen fairly, noting that 1.37% of Central Office secretaries were reduced while 30.39% of school based secretaries were laid off. She also reported a 2% reduction of office clerks at Central Office, but almost 30% of school-based clerks were laid off. Ms. Marks stated she believes there is much money in the budget that can be cut without reducing jobs that decimate her school and encouraged the Board to reconsider its decision.

Travis Hart, Petrohawk Energy Corp., addressed the Board on their work with Caddo’s Construction Department and Legal Counsel, regarding the purchase of right of way on School Board owned property near Ellerbe Road and Hwy. 175. He explained that they are attempting to get the right of way over an existing road to access a drilling site. Mr. Hart left contact information with members of the Board in the event anyone has questions.

Frederic Washington addressed the Board on the order of its meetings and he believes the media has a presence at the Board meetings because it is all about sensationalism, because he knows they were not at surrounding school board meetings as they discussed budget issues. He noted there are many things the Caddo Parish School Board needs to work on and it is clear that there is a need to be more consistent and not make up rules as we go. Mr. Washington noted a couple of meetings back the Board member from District 5 expressed concerns about a particular agenda item, and the legal counsel present stopped him and advised him that the time was inappropriate to discuss that matter. He also noted the many times that a former Board member from District 6 was gaveled for making comments about an agenda item at a regular meeting. He said it is his understanding that during work sessions, Board members can express concerns and questions. Mr. Washington also questioned why speakers cannot say Board members names when they are addressing the Board. He again asked the Board to be consistent in following the rules and procedures of the Board meetings and make sure everyone is following the rules and to be more receptive to the members of the community. Mr. Washington also asked that consideration be given to moving the Board meeting to another location when expecting large crowds so everyone interested can be in the same room.

Pat Manning noted three questions being asked by employees and the community, (1) what is Vision 2020?, (2) How can the third largest district in Louisiana, and at one time the richest, be hovering over bankruptcy?, and (3) We are not broke and we do not need to lay anyone off. From her personal experience, she believes “vision” is watching a strategic member of their faculty receive a RIF notice and it is someone their school needs and they are asking that they be returned. She also said that she has lost her library clerk and she built the library program around the fact that she would have an assistant, and there is no way she can do her job without an assistant. Without the secretary/bookkeeper, she said there will be problems filling this position for someone who has worn many hats; and she asked the Board if they are not going to reinstate the secretary/bookkeeper and her library aide, to please not make any decisions at all at today’s meeting.

ESTABLISH THE AGENDA AND PROPOSED CONSENT AGENDA

Superintendent Dawkins highlighted the proposed agenda for the Board’s consideration. President Priest announced that items 7.01-7.03, 8.01, 8.04-8.12, and 8.14 are the consent agenda. Mr. Riall moved, seconded by Mr. Burton, to approve the agenda and consent agenda for June 21, 2011 CPSB meeting. Vote on the motion carried unanimously.

CONFIRM THE CONSENT AGENDA

Mr. Riall moved, seconded by Mrs. Bell, to approve the consent agenda items (7.01-7.03, 8.01 8.04-8.11, and 8.14) as presented. Vote on the motion to approve the consent agenda carried unanimously. The following is a summary of the Board’s action of consent agenda items.

Item No. 7

7.01 Purchasing. The board approved the following bids as recommended by staff and submitted on the bid tabulation sheets in the mailout: (1) Economical Janitorial & Paper Supplies, Inc., totaling $5,767.20; AFP Industries, Inc. totaling $10,216.50; Pyramid School
Products, totaling $9,588.40; Dixie Paper Co. totaling $1,150 and Ealy’s & Jae’s Cleaning & Supply, totaling $8,637 for the purchase of Janitorial Supplies; (2) Economical Janitorial & Paper Supplies, Inc. totaling $136,800 for purchase of Janitorial Paper Supplies (Paper Towels); (3) Blue Bell Creameries, totaling $78,016 and Foremost Dairy totaling $1,359,760 for the purchase of Milk and Dairy Products for Child Nutrition Program; (4) IBC Sales (Cotton), totaling $138,950 for Bread and Bread Products for Child Nutrition Program; (5) Foremost Dairy, totaling $1,617,000 for fruit juice for Child Nutrition Program; and (6) Teacher Created Materials, totaling $29,625 for the purchase of Differentiation Strategies for All Core Content Areas.

7.02 Purchasing Lease Approval - Carver Property. – The board approved the bid of Cody Brazzel, totaling $16,000 per year, for the agricultural and hunting lease of the Carver Property.

7.03 Construction and Capital Projects. The board approved the following bids as recommended by staff and submitted on the bid tabulation sheets in the mailout or placed at board members’ stations: (1) Woods Contracting with a Base Bid, for the sum total of $43,240 for Project 2012-212, “North Caddo Roof Stadium”; (2) Camus Electric with a Base Bid, for the sum total of $197,350 for Project 2012-QB5A, “QSCB Data Security Wiring at Caddo Career Technology”; (3) Camus Electric with a Base Bid, for the sum total of $298,685 for Project 2012-QB5B, “QSCB Data Security Wiring at Captain Shreve”; (4) J. D. Electric with a Base Bid, for the sum total of $294,000 for Project 2012-QB5C, “QSGC Data Security Wiring at Caddo Magnet High”; (5) Terry’s Roofing & Sheet Metal, Inc. with a Base Bid, Alternate 1 and Alternate 2 for the sum total of $220,896 for Project 2012-209, “Captain Shreve Roof Main Building”; (6) Louisiana Roofing Contractors, LLC, with a Base Bid, Alternate 1, Alternate 2 and Alternate 3, for the sum total of $218,800 for Project 2012-208, “Caddo Magnet High Auditorium, ROTC”; and (7) Mid Western Commercial Roofers, with a Base Bid, for the sum total of $125,270 for Project 2012-207, “Byrd Roof Gym”.

Item No. 8

8.01 Adoption of 2011 Millage Rates. The board approved the proposed resolutions for adoption of the 2011 millage rates as recommended by staff and submitted in the mailout.

8.04 Approval of Beverage Contract – Coca Cola and Caddo Middle Magnet. The board approved the beverage contract between Coca Cola Bottling Company and Caddo Middle Magnet as submitted.

8.05 Approval of Beverage Contract – Pepsi and Fair Park. The board approved the beverage contract between Pepsi and Fair Park High School as submitted.

8.06 Approval of Pupil Progression Plan Parental Review Committee. The board approved the board member appointments to the Pupil Progression Plan Parental Review Committee as submitted.

8.07 Approval of Special Education Interagency Agreements and Contracts for SY 2011-12. The board approved the Special Education interagency agreements and contracts for SY2011-12 for providing services to students as recommended by the superintendent and included in the mailout.

8.08 Approval to Begin the Process of Renaming the Professional Development Center The Wanda L. Gunn Professional Development Center. The board authorized staff to begin the process of renaming the professional development center The Wanda L. Gunn Professional Development Center.

8.09 Approval of Newton Smith 6th Grade Center. The board approved the re-opening of Newton Smith in the 2011-12 school year for use as a 6th grade center.

8.10 Revision to Reduction in Force List to Remove the Auditor from Positions to be Reduced. The board approved the revision to the Reduction in Force list to remove the auditor from positions to be reduced.
8.11 Approval of Locally Initiated Elective. Move to approve the elective course Freshman Composition (Enriched) as submitted in the mailout.

8.14 Increase in Meal Prices for Child Nutrition Program. The board approved the increase in the meal prices for the Child Nutrition Program as submitted in the mailout.

CERTIFIED AND CLASSIFIED LEAVE REQUESTS

Mrs. Bell moved, seconded by Mrs. Armstrong, to approve the following requests for leaves as recommended by the superintendent and submitted in the mailout. Vote on the motion carried unanimously.

Certified
Sabbatical Leave (Study), August 16, 2011-May 31, 2012
Renee Caldwell, Teacher, Atkins Technology, 6 years
Emily L. Walthall, Counselor, Forest Hill, 7 years
Jane S. Shea, Coordinator, Special Education Center, 20 years
Barbara Prince, Teacher, Green Oaks, 14 years
Catastrophic Leave, January 5, 6, 7, 11, 2011; March 10, 2011; April 6, 20, 2011 and May 6, 9, 10, 11, 2011 – Victoria B. Begbie, Teacher, Mooringsport Elementary, 24 years
Catastrophic Leave, February 25, 2011 – April 14, 2011
Kimberly R. Bundrick, Teacher, West Shreveport, 15 years
Mari Blanch Bush-King, Teacher, Academic Recovery, 4 years
Catastrophic Leave, April 8, 2011 – May 20, 2011
Linda W. Killen, Teacher, Caddo Middle Magnet, 18 years
Beverly Iverson, Teacher, Oak Park MicroSociety, 10 years
Peggy D. Foster, Teacher, West Shreveport 11.5 years
Erica Paxton, Teacher, Stoner Hill Elementary, 2 years
Kenya Claiborne, 8 years (Not approved)

The board also approved Jennifer Gallant Traweek’s request to rescind her request for leave without pay from August 16, 2011 – May 31, 2012 approved by the board on May 17, 2011.

Classified
Catastrophic Leave, May 19, 2011, ½ day, May 23, 2011, ½ day)
Toni Giles, Bus Driver, Transportation, 26 years
Linda Free, Bus Driver, Transportation, 11 years
Catastrophic Leave, April 25, 2011-May 31, 2011
Willie Harris, Bus Driver, Transportation, 3 years

OTHER PERSONNEL TRANSACTIONS REPORTS

Mrs. Armstrong moved, seconded by Mrs. Bell, to approve the other personnel transactions reports as submitted in the mailout. Vote on the motion carried unanimously.

ADMINISTRATIVE CONTRACT RENEWALS

Mrs. Crawley requested that the vote on this item be separated into three separate votes – one vote for the Chief Academic Officer, one vote for school site positions (principals and assistant principals), and one vote for Central Office positions.

Mr. Abrams stated that it will be important to make a motion to approve the positions separately and the President can announce how the vote will be done and if there is no objection, proceed that way.

Mr. Hooks moved, seconded by Mrs. Bell, approval of the renewal of the administrative contract for the Chief Academic Officer. Mrs. Crawley asked who is responsible for bringing contracts to
the board in time for them to be within the timeframe stated in the contract, i.e. 120 days, because the expiration of this particular contract is now 6 days past when it should have been considered? The superintendent said this process comes from Human Resources and staff will make the effort to get these to the board as required. Mrs. Crawley said there needs to be some accountability when a contract is scheduled to expire so that the board receives these in a more timely fashion. Ms. Trammel asked about the contracts being voted on today and that it is apparent that the contracts have been received at different times before and there has never been a question, so is the question today that contracts should be received before time for them to expire? She asked if this is an oversight from the Board? Mr. Abrams explained that it is standard practice of the HR Department to provide all contract renewals prior to the 120 days. Ms. Trammel noted that several have expired in the past and this is not the first time this has been done this way and encouraged staff to solve whatever the problem might be.

Mr. Hooks asked if it is legal since the time has expired? Mr. Abrams explained that if a decision is made not to renew, basically it will extend it 120 days plus one day.

Vote on the motion carried with Board members Riall, Crawley, Hooks, Ramsey and Armstrong opposed. Board members Green, Burton, Trammel, Priest, Crawford, Rachal and Bell supporting the motion.

Mrs. Crawley moved, seconded by Mr. Hooks, approval of the principals and assistant principals contracts as listed in the mailout. Mrs. Bell asked if the principals contract renewal is 120 days? Ms. Priest explained that these will expire 6/30/2011. Vote on the motion carried unanimously.

Mr. Rachal moved, seconded by Mr. Ramsey, approval of the renewal of the administrative contracts for all remaining on the list.

Mrs. Crawley moved, seconded by Mr. Hooks, to postpone Central Office personnel appointments until after the budget process is finished. Mrs. Crawley stated that she does not believe our budget is yet aligned properly and to give someone a contract is your word so she is proposing that action on these contract renewals is postponed until the budget is aligned properly with the focus at the school sites. She said there are items such as salaries, travel, expenses totaling $36 million and she believes it is necessary to find where we can cut $6.4 million in Central Office and that the Board gives the Superintendent the latitude to choose how to cut this $6.4 million from the budget. She stated if we can cut this amount from the schools, we can cut the same amount from Central Office. Ms. Trammel asked if these items are in the budget and is the maker of the motion saying that these jobs can be eliminated if necessary? Mrs. Crawley said she will allow the Superintendent to make this decision. Mr. Hooks stated his agreement with the maker of the motion. President Priest referenced those in the list and that it included the Title I director that is not funded by General Fund. Mrs. Crawley amended her motion to reflect that she is only referencing General Fund employees. President Priest also noted the positions listed on the sheet provided by school board members. Dr. Mary Robinson explained that the titled positions listed for renewal are not General Fund positions but Federal funded positions.

After discussion, Mrs. Crawley withdrew her original motion, and Mr. Hooks withdrew his second and Mrs. Crawley moved, seconded by Mr. Hooks, to renew administrative contracts of all titled positions. Mrs. Bell asked for clarification on the motion on the floor and Mrs. Crawley stated that her motion is to approve renewal of administrative contracts for those positions that are Federally funded. Mrs. Bell moved that the Board approve all the administrative contracts as submitted. Ms. Priest announced that the motion fails for lack of a second and Mrs. Crawley’s motion is on the floor. Mr. Hooks asked if since the Board is voting on this, he believes that the CAO contract should be voted on after the budget process also. President Priest announced that this contract has already been approved. Vote on the motion carried unanimously.

Mrs. Bell moved, seconded by Mr. Hooks, that the Board accept all the contracts for General Fund positions. Mrs. Bell noted that the positions are in place and currently working.

Mrs. Crawley moved, seconded by Mr. Hooks, to postpone General Fund Central Office positions until after the budget is worked out. Ms. Trammel stated that the Board discussed a few weeks ago the importance of keeping Arts in the schools and brought to the Board’s attention that the Art Supervisor’s contract is on this list of administrators. If the Board
postpones action on these administrative contracts, it puts these contracts in limbo and she doesn’t understand what we are attempting to do. She added she knows there are some jobs that can be eliminated and this is not one of them, so she cannot support the motion. Mrs. Crawley agreed that the Art Supervisor is very worthy, but she is saying the superintendent should be in charge of going through these positions; and she is not saying we will not rehire him, but that after the budget is completed, Dr. Dawkins will advise the Board as to what positions must be on the list. She also stated that she is asking for a cut-down list and hopefully the superintendent will not choose this person to go. Mr. Riall asked how long will it be postponed, will it be only until after the Board votes on the budget later in the meeting? Mr. Abrams responded that if there is not a date attached to it, it can be brought back at the next meeting.

Vote on the substitute motion to postpone approval of the General Fund administrative renewals failed with Board members Riall, Crawley, Hooks and Rachal supporting the motion and Board members Green, Burton, Trammel, Priest, Crawford, Ramsey, Armstrong and Bell opposed.

Vote on the motion to approve the renewal of all remaining (General Fund) contracts carried with Board members Riall and Crawley opposed and Board members Green, Burton, Hooks, Trammel, Priest, Crawford, Rachal, Ramsey, Armstrong and Bell supporting the motion.

OFFICIAL JOURNAL

Mrs. Armstrong moved, seconded by Mr. Burton, that The Times be appointed the Official Journal for the CPSB for the 2011-12 year. Vote on the motion carried with Board member Riall opposed.

APPROVAL OF THE 2011-12 CONSOLIDATED ANNUAL BUDGET

Mrs. Armstrong moved, seconded by Mrs. Bell, to approve the 2011-12 Consolidated Annual Budget as submitted in the mailout. Superintendent Dawkins stated that this has been a very difficult budgeting process with increasing health care and retirement costs, and uncertain and diminishing funding from State and Federal sources being the norm rather than the exception. He said the budget process was formulated basically on protecting direct classroom instruction, minimal classroom size increases, minimal loss of teaching staff, principals, assistant principals, counselors and social workers. He said there is no easy magical solution to addressing the budget issues; and hard decisions must be made regardless of what processes are put into place. He reminded the Board that it has been said this is not a one-year fix; and given the educational funding at the State and National levels, next year could be worse. Work on next year begins tonight, and many lessons have been learned from this process, i.e. policies, practices and organizational issues that must be addressed by the Board and the administration. Dr. Dawkins stated that the voice of staff members and community members has been loud and clear that the processes need to be more transparent and inclusive and this work will begin in all areas immediately.

Mrs. Armstrong said she believes everyone is aware that the work is not complete on this budget and there are still a lot of things the Board must do to rectify a lot of problems (financially) within the system. She reminded everyone that by law, there is a deadline to meet in approving a budget, and there is no choice in this matter. Mrs. Armstrong stressed that she wants everyone to realize if the Board approves the budget tonight, the Board is not necessarily approving of everything in it with additional cuts that will need to be made in rectifying this situation. Mrs. Bell stated that a Board member asked Mr. Lee what would happen if the Board did not approve this budget, and his response was no one will be paid. She said approving this budget is required by law, and the Board can always come back and amend the budget; and this can be done after a budget is approved.

Ms. Trammel asked if there is a bi-weekly payroll that needs to be ready on July 1st and she knows it takes time to do this; however, if the checks are not ready on July 1st, it could be a repeat of a similar situation with staff working on Saturday to get the checks to employees. She asked the superintendent to confirm that she understands correctly that there will be amendments to this budget as it relates to items the Board has been discussing? The superintendent said that is correct.

Mr. Hooks moved, seconded by Mrs. Crawley, that we line item transfer a total of $6.3 million to bring back part of the laid off RIF workers and put them back into their positions. Mr. Hooks
stated that he made a request on March 18th and asked if we can move reserve funds (technology, recruitment, travel) back into the General Fund and not lay off any employees. Mr. Hooks asked if the response he received from Mr. Lee is possible when it comes to transferring funds from one line item to another? Mr. Hooks asked Mr. Lee to verify how much is in the district’s reserve funds? Mr. Lee responded that the undesignated fund balance, it is approximately $5.6 million. Mr. Hooks also referenced the information on the list provided where the Board set aside funds for various funds and that staff said there is no current plan to use these funds except to assist in the repayment of the Qualified School Construction Bonds (QSCB). Mr. Hooks asked if he understands the Board can decide to move these funds back into the General Fund account? Mr. Lee said that is correct and the Board has done that to a small degree when it approved moving $2 million from these funds into the General Fund for 2011-12 and is reflected in the budget presented. Mr. Hooks reiterated that most of these reserve funds were set up to help the district through unforeseen future events, and he believes this lay off is an unforeseen event. He said if the Board can transfer these funds, then it is not necessary to lay off any employees. Mr. Lee stated that if this is done, the Board will be in the same shape again next year; because the changes will not save the district $30 million which was the deficit prior to the approved changes. Mr. Hooks asked about the $1 million in furniture, and Mr. Lee confirmed that this amount is in Capital Projects and is not a part of the General Fund. Mr. Hooks asked what will happen with the furniture in the schools that are off-lined. Dr. Dawkins explained that some of the furniture will be moved to accommodate students being transferred and the remainder will be stored and used as furniture needs to be replaced throughout the district. Mr. Hooks noted that he is not seeing any changes reflected in the latest proposed budget based on requests made at the work sessions and he does not understand why he would attend budget meetings and ask that certain things be included in the budget (cut in areas and transfer funds from reserves), but today he does not see those changes? Dr. Dawkins explained that the changes have been made from the beginning of this process. Mr. Hooks noted the difficult situation it puts principals in by not having these things in place. Mr. Hooks asked Mr. Woolfolk about the new payroll system purchased last year and how much did we pay for it? Mr. Woolfolk responded that approximately $2 million has been spent on this system which includes separate modules for purchasing (which is in effect), finance (which is in effect), HR and payroll modules (began last year and anticipate it up and running by September or October). Dr. Dawkins also referenced information sent to the Board earlier today in response to Mrs. Armstrong’s request for a complete overview of the SunGard piece and staff will follow up and get this information to the Board. Mr. Hooks asked if staff researched it and Mr. Woolfolk responded that this software had been purchased when he arrived and installation had begun on the finance and purchasing modules. Mr. Hooks asked Mr. Woolfolk if he is aware that Jefferson Parish had the same system and it is still not working? Mr. Woolfolk said he is aware and there are specific issues to Jefferson Parish that may not be specific to Caddo Parish.

Mrs. Crawley asked for clarification because she agrees with Mr. Hooks about cuts being made elsewhere; however, she asked Mr. Hooks if he is attempting to get the $6.3 million from anywhere and bring back the laid off employees as soon as possible as we see the need. While she would love to see every employee returned to their position, she believes there is a need to make some cuts. Mrs. Crawley also stated that if Mr. Hooks’ motion is simply to find $6.3 million, that is exactly what she was saying in not renewing contracts at Central Office and to find the $6.3 million in areas not at the school site, like Central Office; however some of these funds need to be recurring funds. She also said she believes it is extremely disingenuous to say we are going to make more cuts on this budget, when we have been working on the budget for a month and a half and very few cuts have been made that are not at the school site. She said she doesn’t believe there is any intention of making significant ($6.3 million) cuts.

Mr. Hooks asked if the budget needs to be passed tonight? Mrs. Crawley stated that Bossier is not voting on their budget until July and asked why our calendar is different from Bossier’s? Is it a law, is it a local policy? Mr. Abrams stated he is only aware that the last budget was for July 1, 2010 through June 30, 2011; and after that date, Caddo needs a new budget. Mr. Lee stated that he is not certain what Bossier will do; but because our fiscal year is July 1 through June 30, if we do not have a budget approved by July 1, Caddo will not have a budget to operate under. Mrs. Crawley asked if, at that point, it could be done day by day, can the Board make a motion to continue as we are until a budget is adopted? Mr. Lee said he doesn’t know how you can do that if you do not have a budget to operate from. Mrs. Crawley referred to the statement that the Board must pass a budget today because it is the law, and she would like to know whose law? Ms. Priest explained Caddo Parish’s fiscal year is July 1 through June 30, which means the
budget being voted on today would be effective July 1 and the 2010-11 budget ends June 30. Mrs. Crawley asked if this is in policy, because if so, we can change policy.

Mr. Riall asked Mr. Lee if he understands correctly that if we do not approve a budget to go into effect by the time the current budget ends, will we no longer be able to do business? Mr. Lee stated that it means the Board will not have given the staff a budget authorizing the spending of money. Mr. Riall asked if he understands staff will not be able to write a single paycheck? Mr. Lee said only if the Board meets daily to approve the bills so they can be paid. Mr. Riall stated for clarity that it is not necessarily the law, but it is based on the dates of the fiscal year? Mr. Lee said that is correct. Dr. Dawkins also stated that if you exceed June 30th, you will automatically go into deficit spending.

Mr. Abrams further explained that RS17:88 allows for a grace period and that a budget must be adopted no later than September 15th of each year for July 1st through June 30th budget; however, the way the CPSB operates is a budget year of July 1st through June 30th and the issue is will you be in violation of the state code down the road, which is not an issue the Board wants.

Mr. Rachal called for a point of order and that this should be an amendment to the existing budget.

Based on advice from the attorney, Mr. Hooks reworded his substitute motion, seconded by Mrs. Crawley, to amend the budget and move $6.3 million from the QSCB (Technology) reserve to the General Fund and reinstate the majority of the employees that were in RIF and laid off. Mrs. Bell asked what will you tell the employees next year about their jobs when they are worried about their jobs next year, because this is only a quick fix and does not provide recurring revenues for these recurring expenditures. Will there be a solution next year? She expressed her concern in taking funds from the technology reserve when improving the technology for our students is so important. Mr. Hooks responded we are not breaking technology. Mr. Rachal called for a Point of Order and this is a discussion between two Board members. Mr. Lee clarified that prior to the reductions made, the district was facing a large deficit; and the district will be in the same situation if funds from the reserves are continuously used for recurring expenses; the funds will run out; and the Board is only delaying the inevitable by not addressing the issue tonight. Dr. Dawkins also reminded the Board that Caddo is also on the budget watch list for the State. Mrs. Bell said she wants the public to know that she wants to hire the employees back permanently and this motion is a quick fix. She encouraged the Board to speak facts, tell the truth and adopt this budget before June 30th. Mr. Hooks stated that first of all he said $6.3 million and he doesn’t have to lie to anybody; and is possibly one of the most honest persons in here. Mr. Rachal called for a Point of Order and that he is offended by the comments. Mr. Hooks stated this is not a quick fix, President Priest stated that a Point of Order was called when a Board member questioned the integrity of other Board members. Mr. Hooks said he believes this is a way to fix this so it will not happen again, because the Board has given the superintendent and staff too much authority over our money and the Board needs to take back control over how the money is spent. Anytime $15 million is spent and there is nothing to show for it, something has to change. Mrs. Bell called a Point of Order.

Mrs. Crawley commented that to move it out of QSCB is non-recurring, quick fix; but by passing this motion, the Board is saying the staff needs to come up with another $6.3 million in recurring funds (let staff off somewhere else). She said the Board has been working on the budget, but has not seen any changes made as a result of the work sessions, and this will make it to where it has to be worked on to cut the $6.3 million so we do not return to the same situation. She said we do not want cuts at the school site and money needs to be in the budget so that when students report back and there is a need to split a class, the money is there, we will be able to get off the State watch list. She said we can move the $6.3 million, and the superintendent will have to come up with $6.3 million in cuts at Central Office to cover resources for next year. Mrs. Crawley encouraged the Board to support the motion on the floor.

Vote on the amendment failed with Board members Crawley and Hooks supporting the motion and Board members Riall, Green, Burton, Trammel, Priest, Crawford, Rachal, Ramsey, Armstrong and Bell opposed.

Mr. Ramsey expressed his concern over the MOUs that will impact the budget and the timeline for everything to be in place for the start of school.
Mr. Rachal stated that he has looked at a lot of information and he believes the unfunded mandates are killing the budget and uncertain revenue from the State, which is becoming more uncertain everyday. Mr. Rachal said he will personally bring an agenda item to add a grant writer back in the budget, because he remembers $29.8 million was brought in through grants the first year he served on the Board and two years later, that amount increased to $47.5 million. He said there is a lot of grant money that the district could get and if any Board member wishes to make cuts to the budget, they only have to bring an agenda item to make a cut and the Board will vote on it. He said he believes everyone has probably complained about the Federal government not being able to come up with a budget to work with. Mrs. Crawley called for a Point of Order and the motion on the floor is not to postpone. Mr. Rachal said he is talking about approving a budget. He also stated that the property taxes included in the budget, since 2006, have gone from $63.4 million to $84.5 million, a $21 million dollar increase in local property taxes. He also stated that sales taxes have increased from $64 million to $77 million. He also highlighted additional revenues in 2005 and how they have fluctuated. Mr. Rachal said it is the local constituents that are paying for these unfunded State mandates, for the increased cost of benefits, and in the private sector there is Social Security; however, the district will be contributing 24% of every dollar into retirement, and this is mandated by the State. He also stated that if anyone on the Board has areas in which they desire to introduce an agenda item, he encouraged them to bring them to the Board and let the Board vote on it.

Mrs. Crawford asked Mr. Lee about the supplies and equipment because when adding everything up, she sees an increase in everyone but pupil support. She asked why it increased so much in General Education? Mr. Lee explained that Mrs. Crawford is not comparing like numbers, but the estimated expenditure and the actual budget number. Mrs. Crawford also asked about the addition of a salary under Communications? Mr. Lee said that is a shift in a position that previously reported to Technology and it was better served under Communications. Mrs. Crawford also asked Mr. Lee if he could say that because the State Department is authorizing the Recovery District to license so many charter schools, that it has had a direct effect on our budget, since we fund a part of the charter schools with public funds? Mr. Lee said that is a fair statement. Mrs. Crawford said she spends many hours lobbying legislators to stop the charter schools and encouraged each Board member to do the same. She said until the legislators hear from individual Board members, they are not going to stop funding charter schools. She also announced there is legislation for next year that will make it worse.

Mr. Riall asked in working with the budget, is the Board not at the mercy of the staff and their recommendations since there is no way Board members can know everything there is to know about every department He added he is unhappy about staff’s recommendation and attempt to balance the budget on the backs of custodians, mechanics, library clerks, school secretaries, etc. because when his company works to balance its budget, RIF starts at the top.

Mrs. Crawley moved to amend the budget to eliminate the secretary for communications, eliminate the secretarial position for Fair Share, limit take home vehicles to eight and Dr. Dawkins will decide the most necessary eight, eliminate all travel budgets and ask the Board’s attorney to bring a policy next month whereby the Board approves all travel. Mr. Hooks seconded the motion. Mrs. Crawley said we need to cut the budget and in talking about it and then not doing it, she believes everyone has talked about these positions and she believes it possible to get a handle on these expenditures. Mr. Abrams stated that as to the removal of positions, Board policy requires that the Reduction in Force policy is used in order to pick where employees will be reduced, based on the Superintendent’s recommendation. He further added that it is necessary to go through the RIF policy process; and if there are positions in which there is no one filling them, then these positions can be eliminated. Mrs. Crawley asked if we do not provide the funds for these positions, do we still have to pay the needed funds?

Mr. Hooks asked Dr. Dawkins if we have double standards when it comes to Central Office, because it appears that Central Office can do whatever they want and keep whomever they want to keep. However, when principals lose their secretaries and office clerks, these are just as important as those that serve in the Superintendent’s Office. He reminded everyone that the money is not at the school level, but at the top with the superintendent and his staff. He understands if those in the Superintendent’s area were cut, the superintendent will suffer the same as a result. He added he still believes in his heart that we do not need to make any cuts.
Mr. Abrams explained that the portion of the motion stating positions, and if there are employees in those positions, the Board will be reducing its work force against its own RIF policy, and the RIF is based on a recommendation from the superintendent and based on job descriptions. Relative to the remainder of the motion, the Board can do that. He added that if there is no one in those positions, the Board can remove the positions without any problem. Ms. Priest clarified that since there is someone in these positions, the Board cannot. Mrs. Crawford said there isn’t anyone in those positions. Mr. Rachal called for a Point of Order because if the motion is something the Board cannot do, should it not be reworded or withdrawn? Mrs. Crawley amended her motion to say reduce Central Services by $200,000 and limit take-home vehicles to eight. Mrs. Crawley stated that she is being told that travel is more than employees being reimbursed for mileage and she will bring a proposed policy to address this issue.

Ms. Trammel asked if taking people and changing to a dollar amount of $200,000 and asked for clarification and if there was a two-way RIF, because she understood the RIF was being done across the board, including everyone who is a zero to five year employee. She said she doesn’t understand that to be the case and she would like someone to explain this to her. Ms. Priest explained that with RIF it is categories. Ms. Trammel stated her understanding of categories; however, if RIF was implemented according to categories, she doesn’t believe that is correct. Dr. Dawkins responded that the system in Caddo Parish is different than what he was used to, and it is policy that needs to be addressed. Dr. Dawkins stated that he prefers one that goes across all categories. Ms. Trammel asked if the bottom line is the Board will be looking at policies in the very near future, and Dr. Dawkins said that is correct.

Mr. Burton called for the question on the amendment and the main motion. Vote on the motion to end debate carried with Board members Crawley and Rachal opposed and Board members Riall, Green, Burton, Hooks, Trammel, Crawford, Ramsey, Armstrong and Bell supporting the motion.

President Priest called for a recess at approximately 7:50 p.m. and the board reconvened in open session at approximately 7:58 p.m.

Mrs. Crawley restated her motion to remove line item 97 ($30,000), remove line item 102 ($30,000), remove line item 103 ($40,000) and remove line item 106 ($100,000); and limit take-home vehicles to eight. Vote on the amended motion failed with Board members Crawley, Hooks, Crawford and Rachal supporting the motion and Board members Riall, Green, Burton, Trammel, Priest, Ramsey, Armstrong and Bell opposed.

Vote on the main motion to approve the 2011-12 Consolidated Annual Budget carried with Board members Crawley and Hooks opposed and Board members Riall, Green, Burton, Trammel, Priest, Crawford, Rachal, Ramsey, Armstrong and Bell supporting the motion.

PROPERTY AND CASUALTY INSURANCE RENEWALS 2011-2012

Mrs. Crawford moved, seconded by Mr. Rachal, to approve property and casualty insurance renewals 2011-2012 and that Risk Management reject uninsured underinsured bodily injury coverage on the automobile policy as recommended in the mailout. Vote on the motion carried unanimously.

JULY MEETING DATES

Mrs. Bell moved, seconded by Mrs. Armstrong, to accept July 12 and 19 for CPSB meetings in July. Vote on the motion carried unanimously.

ROLL FORWARD PROPERTY TAXES

Mrs. Crawley asked that this item be moved to the 12th. Mrs. Crawford stated that she will not be in town on the 12th and would very much like to vote on this item. Mr. Abrams explained that the board has an item on the agenda and it is his understanding that the Board cannot actually vote to roll forward tonight, but the Board can vote not to roll forward if there is a motion to do so. However, there is nothing to keep the Board member who has the item on the agenda from bringing it back next month.
Mr. Rachal moved, seconded by Mrs. Crawford, not to roll forward the taxes and maintain them at the current level. Mrs. Crawford stated it has been discussed and Mr. Lee has expressed what rolling forward would do to future millages. She also noted legislation that could possibly endanger the millages even further and she agrees this is only a quick fix, not a long-term solution.

Mr. Ramsey moved to table the item to roll forward. Ms. Priest announced that the motion dies for lack of a second. Vote on the motion to not roll forward property taxes passed with Board members Crawley and Hooks opposed and Board members Riall, Green, Burton, Trammel, Priest, Crawford, Rachal, Ramsey, Armstrong and Bell supporting the motion.

REINSTATE EMPLOYEES WHO ENTERED DROP BEFORE RIF AND ARE SET TO RETIRE BY DECEMBER 2011

Mrs. Crawley moved, seconded by Mr. Hooks, to reinstate any employee or all employees who entered DROP before we started RIF and will retire by December 31, 2011. Mrs. Crawley stated that if someone has turned in a retirement date and if they are in DROP, they will lose approximately $10,600, which is what it will cost the district. She stated she does not believe it fair to include a 33-year employee in RIF that had already decided to retire. Mr. Hooks said anyone who has dedicated 33 years deserves the opportunity to retire and not be terminated. Ms. Trammel asked how many employees are involved in a similar situation? Dr. Robinson responded that to her knowledge, and she confirmed with Mr. Cleveland White, it is one person. Mr. Abrams explained that the RIF policy’s intent is not based on individuals, but on positions that are not necessary for the efficient operation of the system. Mr. Abrams stated that the district is currently in litigation as of today concerning the RIF application, and he cautioned the Board about doing anything that appears someone is getting some type of special dispensation, and the importance to preserve what is necessary in order to defend the lawsuit. Ms. Trammel asked Mr. Abrams if she understands the discussion is now about one person and not about a position? Mr. Abrams said that is correct and the exception is being made for a person and not because the position is necessary for the operation of the system. He further explained that the reduction in force is based upon need and efficiencies and was based on the recommendation from the superintendent on what is necessary to move forward and not on persons. The Board depends on the superintendent to provide it with advice and the recommendation, which the Board accepted. He also added that RIF does not include whether or not persons are ready to retire or about to retire or how many years a person has in the system, and the decision cannot be changed because of an individual. He reminded the Board he previously explained that implementing RIF is first those with overall unsatisfactory evaluation are laid off, and second, seniority. Mr. Abrams also noted an employee in a Custodian I position with many years but they were not in DROP or about to retire. Ms. Trammel said she believes he is hearing there are people in positions that we cannot touch, yet people in these positions were laid off.

Mr. Rachal stated he does not look at this as a person, but asked if this was a specific position in which there was one person in the position/situation? Mr. White responded that Board member Crawley requested the number of employees participating in DROP before RIF and set to retire by December 31, 2011, as well as the cost for reinstating these employees? He said there is one person in DROP at this time that is scheduled to retire December 31, 2011. Mr. Rachal asked what was the position used in RIF? Mr. White responded it is Technician II in the Audio Visual Repair shop. Mr. Rachal asked if there was only one person in that position? Mr. White said there was only one Technician II. Mr. Rachal asked legal counsel if there is any leeway since the position was placed in RIF; and he asked if in the future we must again implement RIF, does the Board have the ability to put in the implementation that if they are in DROP and retiring are exempt? He said he believes this is a courtesy and statement of respect for the employee(s). Mr. Abrams said the Board can, but this RIF was implemented based on the way the policy is written, and revisions were made the last time RIF was implemented. He stated the system also has an employee affected that is 89 years old and this employee is known to be one of the best employees and one with the system for 34 plus years. However, the policy had to be enforced as it is written; and if you change the rules, there is no rule. Mr. Rachal stated his concern over this one situation; and hopefully this will be corrected in the event the Board has to enforce RIF in the future. Mr. Abrams assured the Board that the RIF policy will be looked at in the future to determine how it might better be addressed; however, in the discussions about RIF, changes could not be made because it would appear changes were being made to protect someone.
Mrs. Armstrong asked Mr. Abrams if he is saying legally the Board cannot change it at this point; and Mr. Abrams said that is not what he is saying, that the Board can’t change it, but that is a different issue and he is not recommending it because we are in litigation. Mrs. Armstrong asked if the litigation had not been filed, would it have been possible for the Board to reverse it? Mr. Abrams responded he would give the same opinion because he expected the Board would be in litigation. Mrs. Armstrong stated she understands and appreciates this, but since talking about one position with this one situation, she has a problem that this one would make a difference. While we know we are going to have to address changes in the RIF policy, she has a problem accepting that we cannot take care of this one. Mr. Abrams said the main issue is if you take care of this one, next week you will have another one to address. Mrs. Armstrong said this is the only one in this classification and in this situation, and is why she has a problem not reinstating this employee for this time period.

Mr. Hooks asked if staff could have held that position for three months and then eliminated the position when the person retired? Dr. Dawkins said he is not aware of all the specifics related to this person except that he has retired with the exception of the three-month window and had he not been in DROP, the same thing would have happened. He reminded the Board that the recommendation was not made on persons or DROP. Mr. Hooks asked if staff could have held that position for three months and then eliminated the person. Mr. Abrams clarified that the lawsuit against Caddo Parish was not filed by an employee, but many other long-term employees on the list and that they may say they are planning on retiring by December 31. Mrs. Crawley stated she believes the Board has already eliminated just one person from a position and reinstated them after RIF and she voted for it, and she believes we can do it again. Mrs. Crawley said her only issue is we are giving this employee equal grounds for a lawsuit, because we did reinstate someone, and she doesn’t care where the funds came from. She said she is doing this because she does not believe the Board should RIF a 33-year employee who is in DROP and will lose a portion of his DROP money.

Mrs. Bell referenced the list of classified lay offs and a 34-year employee, a 26-year employee, a 24-year employee. She noted the 26-year employee is a Repair Technician I and the 24-year employee is an Assistant Warehouse Manager for Child Nutrition. She asked if we reinstate one, the Board can request that this position not be implemented as part of RIF until December 31. Mr. Abrams explained that the person reinstated was totally different issue in that the person in that position is not in the General Fund, but paid from a Federal Fund. Mrs. Crawley said we still did it, and she does not know where this position is funded. Mr. Abrams clarified the first reinstatement was a Federal funded position and had nothing to do with the General Fund. The next issue was a General Fund employee and the Board made the decision that we did not need that particular position based upon the superintendent’s recommendation. He said the Board can decide to RIF a position or undo what it decided to do, and it can do that for every employee if it chooses to do so. However, to clarify, Mr. Abrams said just because an employee is set to retire by December 31, they cannot be forced to retire by December 31, an issue that the Board needs to consider. Mrs. Crawley said her only issue is we are giving this employee equal grounds for a lawsuit, because we did reinstate someone, and she doesn’t care where the funds came from. She said she is doing this because she does not believe the Board should RIF a 33-year employee who is in DROP and will lose a portion of his DROP money.

Mrs. Bell asked if the litigation had not been filed, would it have been possible for the Board to reverse it? Mr. Abrams said he is not certain about these employees. Mrs. Bell said if we are going to be fair, be fair to all. Mr. White said the 24-year employee is not paid from Child Nutrition, but from the General Fund, and he may or may not be eligible to go into DROP. Mrs. Bell noted the many other long-term employees on the list and that they may say they are planning on retiring by December 31. Dr. Dawkins reminded them that in some cases, the jobs are not there anymore. Mr. White said each one has to be looked at on an individual basis, because the 34-year employee is a Custodian I and these positions do not have benefits. Mrs. Bell asked Mr. Abrams if we should be discussing this since a lawsuit has been filed and we don’t know if this person is included in that lawsuit? She said we need all the information and the maker of the motion is always saying we can’t consider something since the information was not provided. Dr. Dawkins stated that some of these jobs are looked at on an individual basis and if they are eliminated, the positions are no longer in the district. Mrs. Bell said that is what she is saying – if we restore one position, why would we not restore other’s positions who have years with the system? Dr. Dawkins again stated these are eliminated positions and they will not be coming back. Mr. Abrams clarified that the lawsuit against Caddo Parish was not filed by an employee, but by the Caddo Federation of Teachers. Mrs. Bell stated that it was announced on TV that a lawsuit was filed on behalf of those laid off.
Mr. Riall asked for clarification and if DROP is a prerequisite for retirement? Dr. Robinson explained that it is not. Mr. Riall asked if an employee must provide a specific notice? Dr. Robinson said no and an employee can walk in tomorrow and decide to retire. Mr. Riall asked staff how many years must an employee have to retire? Dr. Robinson explained there is a years’ requirement and age requirement, so it depends on each individual person. Mr. Riall asked if the person in this position meets the requirements; and if so, why don’t they just retire? He asked if a person’s position is eliminated, can they still retire? Dr. Robinson said they can, because their retirement is in tact, but it is their salary they will lose. The employee will also be eligible to apply for unemployment at which time they retire. Mr. Riall asked if they are a part of RIF do they have their retirement? Dr. Robinson said they have their retirement, but the question is their benefits. Mr. Riall asked will they lose their benefits? Dr. Robinson said if they retire, they can keep their benefits. Mr. Riall said he believes it’s the lesser of two evils, because he would rather retire and have his benefits than be laid off and not have the same benefits.

Mrs. Armstrong asked for clarification and if an employee is affected by RIF, do they miss the opportunity to retire? Dr. Robinson said the employee does not. Mrs. Armstrong asked what will the employee lose? Dr. Robinson said he will miss the monies that will be deposited to his DROP account within that timeframe as well as salary and benefits. Mrs. Armstrong asked how long will the benefits (health) be for? Dr. Robinson said it is intact if the employee retires. Randy Watson, director of insurance, explained that the person in question is eligible to retire now or July 1st when RIF takes effect with full retirement and full insurance; and the DROP amount will stop, but the employee will still get full retirement. The only thing the employee loses is the salary (paycheck) they would have earned between July 1 and the end of DROP. He further explained that the employee would need to retire immediately when RIF goes into effect so he can draw his retirement and stay on the insurance. Ms. Priest cautioned about discussing an individual. Mrs. Armstrong asked if this employee has paid into money in the DROP system? Mr. Watson explained that when an employee enters DROP, the years in DROP do not count toward service retirement, so at retirement the employee stops getting the DROP money and it is replaced by their retirement benefit. The three additional months they would have until DROP would not contribute to service retirement because when in DROP, the period of time an employee works does not count toward years of service. The net effect is essentially the person loses a paycheck for three months.

Mr. Rachal asked if he understands correctly that if the employee does not retire immediately upon the July 1 RIF implementation date, they will lose health care benefits? Mr. Watson said that is correct and explained that is a State rule and applies to anyone who goes from employment to retirement;, there cannot be a lapse between work and retirement; they must be coordinated. Mr. Rachal asked if he understands the employee has options, and Mr. Watson stated that his option is to go into full service retirement July 1st and have full retirement benefits and insurance. An employee would not want to risk not retiring on July 1st if their position is part of RIF, because if there is a gap between the time the employee stops work and retirement, they will not be eligible to continue insurance, and this applies to anyone entering retirement.

Ms. Priest asked about the position description for Technician II and if it is a position currently needed in that structure? Dr. Dawkins explained that the job was riffed because it was determined that the system could move forward without that position.

Miss Green asked Mr. Abrams if she understands this person can come back? Mr. Abrams said the employee can come out of DROP, which he understood to be in September and now he is hearing December, and retire; but at that point, no one can force the employee to retire since it is their decision. It is a retirement issue, and it is based upon when the employee wants to retire. Miss Green asked if she supports this, does legal counsel believe there will be many others requesting the same? Mr. Abrams said he does not know, but he believes the Board would receive a lot of calls regarding the issue.

Mr. Hooks said this could have been settled two hours ago when he and Mrs. Crawley attempted to bring back all the employees laid off.

Mr. Riall asked how many positions caught in the RIF are filled with people who are eligible to retire at this time? Mr. White said he does not have that information readily available. Mr. Riall requested that these employees be counseled so they understand. Mr. Watson said he was the
contact person for those affected by RIF to discuss insurance and he personally talked with
approximately 70 persons about their options.

Mr. Ramsey moved to call for the question. Vote on the motion to end debate carried.

Vote on the motion to reinstate employees who entered DROP before RIF and are scheduled to
retire by December 2011 failed with Board members Green, Burton, Crawley, Hooks and
Crawford supporting the motion and Board members Riall, Trammel, Priest, Rachal, Ramsey,
Armstrong and Bell opposed.

AUTHORIZE INTERNAL AUDIT OF ALL DEPARTMENTS AND FUNCTIONS OF
CENTRAL OFFICE AND STAFF

Mr. Ramsey moved, seconded by Mrs. Armstrong, to authorize an internal audit of all
departments and functions of the Central Office and staff in the following order: Operations
Division, Academic Affairs, Student Support, Human Resources and all other functions that
report directly to the superintendent and provide audit reports to the Caddo Parish School
Board on the review of each department as it is completed. Mr. Ramsey said he believes the
issue to have been vetted during the work session and he believes this will answer a lot of
questions and concerns and primarily address some of the things the superintendent is trying
relative to practices and business operations. He said he believes if there are inefficiencies, they
will be pointed out and he knows the superintendent is working to identify some of these that
take place with the activities that will be addressed in the audit. Mr. Ramsey said he thinks this
is something that should have been done prior to the superintendent coming to Caddo, but he
doesn’t think it is ever too late. Mrs. Armstrong stated she totally concurs and has complete
confidence in the district’s internal auditor and his staff. She believes this team can help in the
direction of wise usage of our time and money and she looks forward to receiving the results of
their renderings. Ms. Trammel said she believes this is a good idea; however, she thinks an audit
was done that affected the schools and we should have had input from the principals and staffs
regarding who would be terminated. She questions why we are now going to do an audit at
Central Office because this appears to her that there is a double set of standards as it relates to
this office and she wishes it would stop since this is how the public is looking at it.

Mr. Hooks asked if he could add two friendly amendments to Mr. Ramsey’s motion. Mr. Hooks
moved that the motion be amended to say that the Board seeks the advice of the Auditing
Department and principals to identify which areas may need to be audited first; and secondly
that the Board receives copies of department or special audits so as to get a feel for the results
provided to the administration over the years because board members need to know. Mrs.
Crawley seconded the motion to amend. Mr. Hooks explained that he added principals because
they know their schools and when maintenance responds to a request that it may take them 10
trips before they correct or address the problem, which he believes are instances where there are
those who do not know their job. He said the same is true for transportation and if the same bus
breaks down continually and the same mechanic works on that bus, it appears the mechanic does
not know his job.

Mr. Rachal moved, seconded by Mr. Burton, to call for the question to end debate on the
amendment and the main motion. Vote on the motion to end debate carried with Board member
Riall opposed. Vote on the motion to amend failed with Board members Burton, Crawley and
Hooks supporting the motion and Board members Riall, Green, Trammel, Priest, Crawford,
Rachal, Ramsey, Armstrong and Bell opposed.

Vote on the main motion passed with Board members Green, Crawley, Trammel and Bell
opposed and Board members Riall, Burton, Hooks, Priest, Crawford, Rachal, Ramsey and
Armstrong supporting the motion.

RESOLUTION CALLING FOR A TENURE HEARING FOR A TENURED BUS
DRIVER

Mrs. Armstrong moved, seconded by Mrs. Crawford, to approve the resolution calling for a
tenure hearing for a tenured bus driver on Tuesday, July 19, 2011 as submitted in the mailout.
Vote on the motion carried unanimously.
APPROVAL OF AUS MOUS

Mrs. Armstrong moved, seconded by Mr. Ramsey, to approve the execution of the MOUs and school turnaround plan for the AU schools as recommended by staff and included in the mailout. Mr. Ramsey asked the superintendent about MOUs being in place for the beginning of school because he knows there is much work to be done. Dr. Dawkins explained that the MOUs are not in place because they must have Board approval. He said all the principals receiving MOUs have been under MOUs for the past couple of years. He added they are in the budget and the planning is there with a couple of schools with School Improvement grants already in place. Mr. Ramsey asked the superintendent when he anticipates having these MOUs before BESE for approval? Dr. Dawkins responded we only need Board approval tonight of the template provided from the RSD. Mr. Abrams noted the new change approved by the RSD that removed the provision that after three years if the school did not show improvement, the school will automatically go into the RSD unless the State Superintendent agrees to grant the district another MOU. He said the MOU will not be a problem and once the Board approves them, we will get the copies to the RSD for execution. Mr. Ramsey asked if the RSD’s personnel will be in place and ready for the start of school and Dr. Dawkins confirmed they will.

Ms. Priest reported that she, Dr. Dawkins, and Attorney Abrams traveled to Baton Rouge last week to meet with Amy Westbrook and her concern was that we would be able to get this on the agenda for today and once approved, everything would be on go.

Mrs. Crawley stated that she has never before voted for an MOU and her vote today will be consistent with that position. She said it has nothing to do with our staff, but that she does not believe it is a legitimate set up and that the State has the authority to do this. Mrs. Crawley said she couldn’t believe they had the audacity to ask for a $50,000 increase, and Mr. Abrams verified there is no increase. Mrs. Crawley asked about the increase from $130,000 to $190,000 for the year? Dr. Dawkins explained that the amount increased approximately $2,000 per school, and we have fewer schools this year. Mrs. Crawley asked if they are charging more per school, and Dr. Dawkins said a little more. Mrs. Crawley said she doesn’t believe their experts get any credit for any increase increment, because it is first the students, then the teachers, the parents and the staff and she does not see this helping our schools at all. Mrs. Crawford asked the superintendent how much additional money will need to be spent on these schools, besides the amount stated in the MOUs? Dr. Dawkins responded there is no additional cost, but having three School Improvement grants in the coming year will allow us to do some things that without these resources would not happen. Mrs. Crawford asked if these schools are still under Caddo’s purview? Dr. Dawkins said that is correct and we still run the schools. Dr. Dawkins said our goal is to totally come from under the RSD and not have this engagement at all. Mrs. Crawford asked if there is any way legally we can protect these schools? Mr. Abrams responded that legally the RSD could have taken these schools a few years ago, and the RSD agreed to go along with the Caddo Plan and the MOU process. The MOU is a process used so the RSD does not have to take the schools, but allows the districts the opportunity to turn the schools around. The new turnaround plan is a part of Race to the Top and is what they are using now relative to how the districts are maintaining the schools. All the MOUs have similar language. He reported that it appeared BESE is interested in making sure the schools have MOUs and are able to continue to function, and the monitoring part of the MOU is put into place to protect themselves. Mr. Abrams also explained that this contract, contrary to the previous contract, states that if the school increases to the appropriate performance score, the district is entitled to get out from under the MOU. He also stated that the MOU states that after three years each party has a right to continue in the MOU with each other’s consent.

Mrs. Bell asked everyone to remember Caddo has schools whose performance score goes up to 65 this year and to take these schools off and with most schools not doing well, she believes we need to keep the MOUs as well as do everything we can to help these schools. Mrs. Bell asked the superintendent if Caddo had schools come off this list this year? Dr. Dawkins responded that Oak Park, Barret and Caddo Heights have come off and a few other are expected to come off.

Vote on the motion to approve the AUS MOUs carried with Board member Crawley opposed.

ACT 41 APPROPRIATION

Mrs. Crawford moved, seconded by Mr. Hooks to approve the resolution authorizing Superintendent Gerald D. Dawkins on behalf of the Caddo Parish School Board to sign any and
all contractual obligations relative to the release of funds, $30,000, acquired by Representative Norton to all the receiving schools to purchase technology and other needed instructional supplies and materials. Mrs. Armstrong asked staff what schools will receive these funds? Mr. Lee responded that the Caddo Middle Career and Technology Center, Judson, Oak Park, Fairfield, Caddo Heights and University Christian Prep (private school). Mr. Rachal asked where is this money coming from and staff responded from the State. Dr. Dawkins said that Representative Norton contacted the school system about things she was working on for schools in her area and some monies that were available. Vote on the motion carried unanimously.

SUPERINTENDENT’S REPORT

Superintendent Dawkins stated that a construction update is at Board members’ stations. Mr. Hooks asked Mr. White what is being done at Fair Park and Mr. White said there are two separate projects ongoing at Fair Park – access control for the middle school students and upgraded security system that is being added to the schools with the new 7-12 configuration, and canopies will be added to the entrance to the library so that high school students have access to the library without going through the middle school wing. Miss Green asked about the work at Northside, and Mr. White responded that Northside is having a foundation repair and it is approximately 30% complete. Mrs. Bell reported that she visited Huntington today and expressed appreciation for what the staff is doing to change these schools to accommodate the middle school students on these campuses.

Mrs. Turner reported that on June 6th a meeting was held with Dr. Amy Westbrook for feedback on the monitoring visit in May and announced that results were provided to Board members at the last meeting. She stated that increases were reflected in every school’s rating from the RSD. She reported that the RSD monitors were in Caddo today visiting the summer remediation program and we will receive an abbreviated summary upon completion of their visit.

ANNOUNCEMENTS AND REQUESTS

Mrs. Bell asked staff when will the students in summer school take their tests? Mrs. Woodard stated it will be on Tuesday-Thursday, April 28-30. Mrs. Bell asked how many students are in summer school? Mrs. Woodard responded that approximately 1,600 fourth and eighth graders and there are high school students and other programs probably totaling approximately 2,400 students. Mrs. Bell asked the superintendent about the 7th and 8th graders attending Huntington and how will the athletes (football) be separated.

Mrs. Crawley requested an agenda item for July 12th to vote to roll forward the property taxes.

Ms. Priest asked that the staff analyze the alternative schools to determine if students are staying beyond their expulsion period; and if so, why and how soon this can be rectified.

Ms. Priest asked staff to review and determine if alternative schools can provide FAPE to special education students in order to meet the IEP requirements.

Adjournment. Mr. Riall moved to adjourn, seconded by Mrs. Bell. Vote on the motion to adjourn carried and the meeting adjourned at approximately 9:25 p.m.
July 12, 2011

The Executive Committee of the Caddo Parish School Board (CPSB) met in regular session in its office at 1961 Midway Street, Shreveport, Louisiana, at approximately 4:30 p.m. on Tuesday, July 12, 2011 with President Lillian Priest presiding and Steve Riall and Dottie Bell present being a quorum. Other school board members present were Jasmine Green, Charlotte Crawley, Curtis Hooks, Mary Trammel, Barry Rachal, Larry Ramsey, and Ginger Armstrong. Also present were Secretary Gerald Dawkins, Legal Counsel Reginald Abrams, staff and other visitors. Mr. Ramsey led the invocation and Pledge of Allegiance.

PRESENTATIONS

Dr. Dawkins explained that an update on the SunGard implementation was scheduled for today; however, the SunGard representative could not attend the meeting. He added that he will continue to gather information on the implementation of SunGard and a representative will be asked to attend a future CPSB meeting to discuss the implementation of SunGard.

ESTABLISH THE AGENDA FOR JULY 19, 2011 CPSB MEETING

Superintendent Dawkins shared items for consideration at the July 19th CPSB meeting and the following discussion ensued.

ADDITIONS

Mr. Hooks asked that an item be added to the agenda to address teachers at AU schools continuing to receive bonus money even though they may be moved for next school year.

Mrs. Bell requested that revisions to CPSB travel policies be added to the agenda.

Mrs. Crawley shared with the board a proposed revision to CPSB Policy DLC Travel Expenses and requested that an item be added to the July 19th agenda. She noted that she and Mrs. Bell could possibly work together on their two items.

Mrs. Armstrong requested that making sure all students have opportunities for band, art and music at all grade levels at all schools (k-8, elementary, middle, high) is added to Superintendent’s Report.

Mrs. Armstrong asked the superintendent and staff to look at the necessity for adding interior walls at Fair Park. Ms. Priest announced this item will be under Superintendent’s Report.

WORK SESSION

Agreement RSD-Linear Charter School. Mrs. Bell asked Mr. Lee if Linwood and Linear paid all their bills to Caddo Parish Public Schools last year? Mr. Lee responded they did. She also asked if the charter schools asked for anything more this school year? Mr. Lee responded that Linwood does not wish for Caddo to provide transportation next school year, and the number of sweepers has been reduced as well as the lawn maintenance service.

Mr. Rachal asked for clarification that the charters get to take advantage of the services we have and it is only a flow through cost? Mr. Lee said that is correct; we charge them for services plus a 2% administration fee. Mr. Rachal asked what administrative fee does the State charge Caddo for services such as these, and Mr. Lee said he is unsure what the percentage is. Mr. Rachal noted the interesting fact that the RSD does not mind charging the district a fee; and telling the district it can only charge 2 percent. He said he would like for Caddo to talk to the appropriate persons about this, and asked whom would it be?

Mrs. Bell asked if one person in Caddo takes care of all the business with the two charters? Mr. Lee responded that he does and Mrs. Bell said she believes the district needs to look at charging a fee for this service and consider assigning a staff person solely for this responsibility.

NCLB Deregulation. Ms. Priest presented a proposed resolution asking for relief for America’s schools because NCLB is three years overdue. She added this relief is being sought because of
the accountability requirements and to be released from additional sanctions under the current AYP requirements in the 2011-12 school year, as well as to rescind and modify current regulations and alleviate undue pressure on the Nation’s schools. Mrs. Crawley asked about the outlook and the affect it will have? Ms. Priest said we are following the process for joining the NSBA, LSBA and other school districts in efforts to put the pressure on Congress for the reauthorization of ESEA and the repeal of the No Child Left Behind.

Resolution in Support of Goals and Positions of the Coalition for Louisiana Public Education. President Priest explained that resolutions from several Louisiana districts have been presented to the State Department of Education in support of the Coalition of Louisiana Public Education’s efforts relative to the MFP and freezing the growth factors, and the State Mandate of unproven methods, i.e. student based budgeting and Virtual Schools, etc. She stated that if the board opts to approve this resolution, it will be prepared and sent to the State Department of Education. Mr. Rachal asked if it is possible that someone from the Coalition could visit with the board on this proposed resolution, sharing additional goals etc. Ms. Priest further explained that this group is comprised of members of school boards across the state and were in attendance at a recent meeting in Baton Rouge. Mr. Rachal asked if just school board members are leading this coalition or can other individuals be invited to participate from across the state? Ms. Priest stated that she will be glad to send an email inviting him to attend. Mr. Rachal asked if anyone from Caddo is a part of this coalition and Ms. Priest responded that Mrs. Crawford is Caddo’s representative. Mr. Rachal said he only wants the Caddo Board to be very careful in this process. Mrs. Bell stated her agreement, but added that in addressing the MFP, she hopes the proposal allows the local public school districts to get exactly what the charter schools get per pupil. Ms. Priest also announced that during the Legislative session, LSBA conducted a Day at the Legislature and this organization was sanctioned and approved by the Louisiana School Boards Association and is part of our lobbying efforts.

Shreveport Resolution. Dr. Dawkins explained the district has been engaged with the City of Shreveport for the past couple of years at the Academic Recovery Center whereby resources and activities are provided to the students. He explained this request authorizes the superintendent to sign any and all agreements between the City and the CPSB for the Academic Recovery to receive approximately $20,000 for an after-school program. Mr. Rachal stated he believes this is a very good thing and he is pleased to see the City reach out and express support in this project.

Louisiana Compliance Questionnaire. Dr. Dawkins explained that Board approval of this questionnaire is required in conjunction to Caddo’s annual audit conducted by the external auditor.

Roadway License Agreement with Petrohawk Energy. Superintendent Dawkins explained that this is an agreement for Petrohawk to access a road on the School Board (Carver) property at a cost. He added that Chesapeake and others may also use this access road to get to their work sites. Mr. Rachal asked how much the district will receive? Mr. White said he did not have the document in front of him, but from memory he believes the lease amount for the approximate 3.86 acres will be approximately $58,000 plus approximately $1,500 for the timber that needs to be harvested. Mr. White also explained that other mineral right companies may be interested in access to the property. Mr. Rachal asked if he understands that currently there is one company interested in using the access road, and there are others interested in using the same road and we will receive additional lease monies from them. Mr. White responded that is correct and they would not be allowed to cross the road, because at this time exclusive rights will go to Petrohawk. Mr. Rachal asked if there is anyway Petrohawk can sublease? Mr. White said it allows Petrohawk and their sub contractors and suppliers access to their sites; however, if Chesapeake or Matador want access, they would have to negotiate and provide lease money to do so. Mr. Rachal asked if these funds will go into the General Fund account? Mr. Lee responded that these monies typically are placed in the General Fund as are any other lease/royalty type funds. Mr. Rachal asked if he understands that at this time it is not earmarked? Dr. Dawkins responded that this item is very recent; however, staff will look at possible suggestions for these funds. Mr. Rachal stated that these are funds he believes we could possibly do something specific with; however, he does not want to lock into recurring expenses. Mr. White clarified that these monies are a one-time lease payment. Mr. Rachal asked for how many years? Mr. White responded that he doesn’t have the documents in front of him; however, he believes it is a 10-year initial lease and that they will have access to the road for as long as they continue to pump off the well sites. He also explained that because this land is Section 16
land, we cannot give a right of way agreement and sell the property; it has to be a long-term lease. If this land were to ever be disposed of by the Caddo Parish School Board, it would then be returned to the State of Louisiana. Mr. Rachal asked who negotiated the number for this agreement and is it fair market value? He said he believes for the access they are getting, $5,800 a year seems to be really cheap to him. Mr. White explained that this amount is the going rate for roadway leases. Mr. Rachal stated that we are not the general public and these funds are for the children’s education, so he would like to sit down with them and determine if they might be willing to pay more since it is for education.

Mr. Abrams explained that the CPSB is receiving oil and gas revenues off this property, and Mr. Rachal added that this is no different than anyone else. He shared a discussion he had with a fellow board member and he believes because it is for the education of the children that Petrohawk should be willing to pay double that amount. Mr. Abrams reminded the board that they actually are, because the lease is for five years. Mr. Rachal stated that he would like to sit down with staff and he would also like for Petrohawk to attend the board meeting and justify why they do not want to pay more. Dr. Dawkins stated that staff will follow up.

Mr. Riall asked if this roadway agreement deals with producing wells, does he understand the company still has access beyond the agreement without paying more money? Mr. White said that is correct. Mr. Riall asked if the CPSB can sublet to others even though Petrohawk cannot? Mr. White said that is correct. Mr. Riall asked if there is any stipulation from Petrohawk that, if we do so, it is necessary for them to sign off on it. Mr. White said, in working with Petrohawk, the only thing stipulation is if we bring additional mineral companies on the property, Petrohawk wants the additional companies to share in the maintenance of the roadway.

**Reduce Central Office Operating Budget by 5%**. Mrs. Crawley stated that she believes this is a good statement. Mr. Rachal asked if he understands correctly that we would be asking the superintendent to come back to the board showing a reduction in the Central Office of 5%. Mrs. Crawley said that is correct; over what was passed at the last meeting. Dr. Dawkins noted that he had not received anything on this item, so he could not respond as to what it means. Mrs. Crawley said she is only stating that the board would direct the superintendent to present a revised Central Office operating budget reduced by an additional 5% from what was approved. Mr. Rachal asked the superintendent if he and staff can come up with something in a week. Mrs. Crawley clarified that this is not giving the superintendent a timeframe, but only directing the superintendent to do this, only directing the superintendent to bring something to the board. Mr. Rachal stated that he understands the motion to be that the superintendent would bring to the board a reduced budget and the board would vote on it. Ms. Priest clarified that is not correct and there will not be a reduced budget presented to the board for the July 19th meeting. Mr. Rachal again asked if this is a reasonable timeframe for the staff to bring something to the board? Ms. Priest stated she understands the motion is to direct the superintendent to bring back to the board a budget reflecting a reduction of 5% in expenditures from what was approved by the board. Mrs. Crawley added that once the board directs the superintendent to do this, the superintendent is responsible for him and his staff bringing to the board specific line items to reduce. Mr. Rachal also asked if there is not an internal audit in place? Dr. Dawkins responded that it has not formally begun; however, it will soon. Mr. Rachal asked the superintendent if he would prefer conducting the internal audit first before the board votes on this item. Dr. Dawkins stated if the internal audit is complete, it would certainly make the task easier; however, staff will adhere to the board’s request. Mr. Rachal asked Dr. Dawkins when does he anticipate the completion of the internal audit? Dr. Dawkins responded that the timeline has not been established; however, it will take a minimum of two to three months. Mr. Rachal asked if Mrs. Crawley is willing to wait for the completion of the internal audit and Mrs. Crawley responded she is willing to wait for an additional 5% reduction after the audit; however, she believes an initial 5% reduction can be done before the audit. Mr. Rachal said if this item remains on the agenda, he would like to see where the superintendent will cut 5% before he votes on a directive. Mrs. Crawley explained the cuts will not be taken until the superintendent presents it and the board approves it. This is only a directive of the board’s intent to cut Central Office operating expenditures by an additional 5%.

Mr. Abrams stated his concern that if this motion has anything to do with any additional reductions in force (RIF), it is not the appropriate time to address it that way; however, if it can be done without implementing RIF, the Board needs the information before it votes on this item. He reminded the Board that the CPSB is in litigation as a result of this. Mrs. Crawley stated she is not asking the superintendent to recommend a reduction in force. Mr. Rachal said he believes
we have the cart before the horse and he would rather see it presented before it is mandated. Mrs. Crawley explained the first step is to explain what the board wants and put it together, and it will not occur until the superintendent presents a revised budget with a 5% cut, which will not be voted on until September/October. Dr. Dawkins said he only wants to see and understand the specifics of the motion. Mrs. Crawley encouraged board members to provide her with feedback and she will consider the feedback when making her motion.

Mr. Riall asked staff to explain what comprises Central Office, i.e. departments. Dr. Dawkins said he is reluctant to answer since he does not know what the ramifications in the motion might be. Mr. Riall asked if anyone can tell him what a 5% ballpark dollar amount might be? Mr. Lee responded that in looking at the budget approved by the board last month, there are three areas (1) General Administration, which is the superintendent’s area, $5 million; (2) Business Services, $4 million; and (3) Central Services (IT, Communications, Personnel), for an approximate $15 million, an amount that does not include instructional services. At 5%, Mr. Lee stated you are looking at a minimum of $750,000 to $1 million. He also explained that some of these expenses are intermingled in other budgets as well.

Mrs. Bell asked if someone puts an item on the agenda and pulls it because they will be out of town, should the board be discussing it before the board member brings it back with the necessary information? Ms. Priest clarified that a board member pulled the item, but another board member put it back on the agenda with their name. Mrs. Bell stated that since the initial owner of the item did not give a reason, she believes the board member should given the opportunity to address the item.

Ms. Trammel noted the tendency to not have an urgency on some items, and she would like to see everything on the same playing field. She also stated she believes there are many changes to the agenda and asked if she is correct that the board should allow a board member to include what she desires to include in the material as well as time to look it over before it is made an agenda item? Mr. Abrams stated that Mrs. Crawford phoned and asked that the item be pulled. Mr. Rachal called for a point of clarification and if it is correct that once the item is on the agenda, it cannot be removed until the board votes to remove it? Mr. Abrams clarified that the board is now in an executive committee session to set the agenda.

**AUS Salaries for Teachers.** Mr. Hooks said he is concerned that teachers who transferred to AU schools for three years and received a supplement for this commitment have now been involuntarily transferred to other schools and are no longer receiving this supplement even though they signed a three-year contract to receive a certain amount of money. Dr. Dawkins stated that he does not have the number breakdown on these personnel and asked Mr. Lee to further explain. Mr. Lee said there is approximately $4 to $5 million budgeted for the base incentives for all targeted schools. The amount of the incentive paid to the teacher depends on their degree, i.e. Masters or higher, if they are National Certified, etc. Mr. Hooks said these teachers did not choose to leave, but signed a contract to stay at these schools for three years; and if we transfer them, we are breaching their contract and they need to be paid. He said it is not fair because they have figured this salary in their household budgets and if we move them we need to pay them. Mr. Lee said he doesn’t believe there were contracts signed and Mr. Hooks said there were. Mr. Abrams responded that he is not aware of any teacher signing any contract, but there are signed contracts for administrators. Mrs. Crawley stated they signed agreements at a faculty meeting and were told to leave it there. Dr. Robinson explained there was no contract that committed teachers to the AU programs to three years. She said the three years does come about when discussing that it takes three years to turn a program around and verbal discussion is that “we need you to consider making this commitment for three years so that the turnaround actually happens”. However, there was not a contract. She said there was also not any promise that once an employee was moved from an AU program that the monies would follow them, and only when working in the AU program is someone entitled or eligible for those stipends. Mr. Hooks said a commitment is a contract between two parties. Dr. Robinson said she understands what is being said; however, there is not any written piece of paper that says I have three years. Mr. Hooks said yes they signed it and staff needs to stop trying to pull these games on these folks. Mr. Abrams explained that the administrator contracts include a term in them and they are even told if they leave that specific school they will not longer receive any incentives associated with that school appointment. Mr. Hooks said he doesn’t believe this is fair. He said if the superintendent leaves, the board would have to buy out his contract; so he believes there must be double standards when it comes to Central Office and the school facilities, and this is not right.
He said he is looking for an answer to his question, and Ms. Priest explained that it is an agenda item at this time and staff is continuing to work with those who transferred out of AU programs.

Mrs. Crawley said she has always made the assumption of yes because teachers told her that at the faculty meeting, they were told to sign a piece of paper that they would stay at a school for three years. Since things happen, and if a teacher is not doing what is felt to be a good job at the school, teachers were moved. She said the teachers really did sign something and were told to leave it in a stack on the table and it upsets her for staff to say they didn’t, because that means someone is not being honest – either the teachers are misinforming her or this group is misinforming her. She asked that staff provide the board with copies of those pieces of paper that the teachers were asked to sign. Mrs. Crawley said she asked the teachers for a copy; however, they told her they were not given a copy, but were told to sign the paper and leave it there. Dr. Dawkins responded that staff will provide a complete report of what staff has for administrators and teachers.

Ms. Trammel stated she has the same question; and if the teachers signed something, there should be a copy in their personnel file. Dr. Robinson responded that the piece of paper did not originate in HR, so it would not be a part of their personnel file. She added staff will need to check with individual schools and principals who issued this document for signature.

Mr. Hooks asked if the principal in place at a school is no longer at the school, how will staff know what transpired? Dr. Dawkins said he will have staff look into this issue and provide clarification.

**Board Travel.** Mrs. Bell stated that beginning with the new year’s travel, she would like to devise a plan for travel to conferences/workshops, etc., i.e. find out those more important/critical workshops/conferences, limit the number of board members attending (especially out of state), etc. She said she believes limiting the number of board members traveling to each conference/workshop is the only way the board’s travel can be reduced. While she knows there are some, especially instate, that all members must attend to gain required education credits, she believes most conferences, workshops can be covered by a limited number of board members attending who will return and share information with the remaining board members. Mrs. Bell said once the information is reviewed and discussed, she would like to see these changes, procedures placed in board policy. Ms. Priest stated the board attorney has advised that there are policies that govern board travel; and Mr. Abrams explained that in addition to Mrs. Crawley’s item on revisions to CPSB Policy DLC, which includes a provision that the board president is authorized to approve board travel, the board can revise its travel policy and develop a number for out of state travel (4, 5 or 6) unless otherwise approved by the board president. She added there is no need to put together a committee, but just develop a set number of conferences a year per board member and work this into the policy.

Mr. Hooks explained that he asked the board’s secretary to follow up on any on-line workshops, etc. that might be available for board members; and at this time, there are none available. Relative to travel for the state, Mr. Hooks said he receives reimbursement up to the cost of an airline ticket (since he does not fly).

Ms. Priest reminded everyone that there are certain mandatory requirements at the state level for meeting Act 705, two of which must be in association with ethics issues as well as credits for School Improvement for board members in districts with AU schools.

Mrs. Armstrong said her only concern is there are so many different opportunities at conferences such as the National Conference, and sending only one or two limits the number of work sessions the board is able to attend. She said putting a limitation on the number of delegates puts a limit on the information brought back to the board. Ms. Priest also stated that it is also understood that because people have different careers, the board worked with Senator Jackson, who introduced legislation, allowing for school board members to obtain credits at the regional and national conferences.

Mrs. Crawley stated that capping the number of trips a board member can take is better; and if a board member needs to take an additional trip, then the board president can look at the request. She noted the five main conferences – national, regional, Greater City Schools and CUBE and if the board members need to pick two of these conferences, it will be very beneficial.
Mr. Rachal said he understands the intent; but asked, if we are trying to cap the number of board members that can attend, is this not a line item budget amount? He stated if the board is interested in revising the policy to cap the board members, he is interested in including that if all a board member’s travel is not used, a board member can designate where the unused budgeted funds can go to benefit someone else.

Revisions to CPSB Policy DLC. Mrs. Crawley noted the proposed changes to the approval of out of parish and out of state travel. She said she still desires that the superintendent provide a running total of travel expenses by department to the board so the board understands who is traveling and the expenditure. She also noted she is proposing that the board receive at least quarterly travel reports. Mrs. Crawley also explained she is proposing that out of state travel be approved in advance by the CPSB. Dr. Dawkins asked if the intent is to include all levels of staff for out of state travel and Mrs. Crawley stated that is correct.

ESTABLISH THE AGENDA AND THE CONSENT AGENDA

President Priest announced that items 8.01-8.07 are the consent agenda. Mr. Riall moved, seconded by Mrs. Bell, to approve the proposed agenda and consent agenda for the July 19th CPSB meeting as presented. Vote on the motion carried unanimously.

POLL AUDIENCE

Lee Ann Anglin stated that on Sunday, September 10th she sent a letter to all board members addressing board relations and communications. She said included in the letter was board policy ABA “Community Involvement in Decision Making”. She highlighted parts of the policy noting that the board would take all necessary steps to establish effective communication and dialogue between parents and the board and that the board considers all comments and suggestions and initiatives of parents and others. Ms. Anglin said she only received one response and the board member referenced numerous meetings as well as the roll forward, which she did not address in her letter. She said the board member stated that he did not respond to form letters and her letter was not a form letter. Ms. Anglin said she believes her letter and suggestions were not considered because it was not a form letter and did not address the roll forward. She stated her belief that this board member is confused. She does not get paid to attend the board meetings and for doing the research she has done, but because she is interested in Caddo’s students.

Jackie Lansdale, Caddo Federation of Teachers/Support Personnel, asked if at this meeting the audience is to only ask questions in reference to agenda items, and the board president and attorney confirmed that is correct. Relative to the item on Petrohawk, Mrs. Lansdale noted the amount of money that should be realized from this and the fact that this is not the first time Caddo has received gas royalties. She noted that DeSoto Parish has passed their monies from gas and mineral rights to the classroom and asked the board, when looking at these monies, to consider putting these dollars with other dollars so they will do good things for the classroom. She said the board has had many opportunities from possible resources of a roll forward to dollars in set aside funds that could be used in the classroom. Mrs. Lansdale reminded the board that she will be before the board every time possible in this matter. She also asked for clarification on what is the operating budget for Central Office, because she has never seen one. Even though it was mentioned that the board did not want to implement another reduction in force, she questions how it could be done any way since there is not a staffing formula for Central Office, which is what was used in the past RIF. Regarding the incentive for AU teachers, Mrs. Lansdale said she believes this is creating an aura of distrust, the same as was felt with the roll forward. She asked the board to be public servants and allow people to address the board whether it agrees with what is said or not.

Pat Manning shared with the board that attending the meetings has given her a great respect for the positions held by the board members and the tough decisions they must make. She shared that she learned from the Sunday paper that the district is not broke and there are tremendous funds available for travel, highlighting amounts for airline flights, hotels, registration fees, baggage fees, meals, mileage, tips, etc. and that restoring her library clerk would be priceless. Hunter Lawler shared with the board his concern over the loss of Darla Feibel as a part of the Northwood High School family. He shared with the board the extent of Ms. Feibel’s
involvement in the students’ lives and activities at Northwood High School, as well as how she helps the teachers at Northwood. Mr. Lawler encouraged the board not to tear down the families, but to build up the families.

Sandy Hearron, in reference to agenda item 8.07 and fixed assets, asked the board when will a process for sharing and recycling unused equipment, materials, and textbooks be implemented? She also asked when will a common contract for copiers through the district be implemented? In getting ready for the start of a new school year, she said answers to these questions are needed prior to August 18th.

Ben Feibel stated that according to LRS 39:1305 the total of proposed expenditures should not exceed the total of estimated funds available for the ensuing fiscal year and asked if this is true for the CPSB’s budget?

Darla Feibel asked the board if all financial fund sources were considered in balancing the budget, i.e. property tax roll forward and the technology monies set aside in designated reserves? She said last month she attended the meeting and as a taxpayer and a member of the community, she now realizes the importance of her attendance at board meetings before it directly affects her. She noted that in a meeting the board voted to go through the proper procedures concerning the property tax roll forward, which included advertising in The Shreveport Times for 30 days prior to the board action. Since she knows that an ad in the paper is not free, she asked how much that line item was, and would it not have spoken volumes to the state if a public hearing had been held, indicating that the board heard the people’s voice and that all possible resources were exhausted to balance the budget.

Pat Bryan stated that according to the Open Meetings Law, it is essential to the maintenance of a democratic society that public business shall be performed in an open and public manner and that citizens shall be advised of and aware of the performance of public officials and the deliberations and decisions that go into the making of public policy. He said it states that any public is prohibited utilizing any manner of proxy voting procedure, secret balloting, or any other means to circumvent the intent of the Open Meetings Law. Based on this, he asked the board if it really meant to check “yes” when the questionnaire asked if the board had complied with the provision of the Open Meetings Law?

Mr. Hooks stated he does not wish to be labeled a troublemaker; however, he would like to get clarification on several matters. He asked President Priest if the board is considered the public Caddo Parish School Board and is this a public meeting? Ms. Priest answered yes. Mr. Hooks shared with the board and audience the definition of public, and he asked the President why the superintendent or staff never answers the board’s or the public’s questions? Ms. Priest said she would need some specifics because in accordance with policy, she can’t respond on the policy. Mr. Hooks also asked Ms. Priest why, as board president, she allows the superintendent and staff to get away with such actions as not answering our questions. Ms. Priest said it is board policy. Mr. Abrams further explained that in accordance with board policy, the board does not answer questions from the podium, but may refer it to the superintendent to answer the individual questions. Mr. Hooks asked the superintendent if he believes some board members and the public deserve to be truthfully informed and granted an honest response when a question is directed to the superintendent and staff? President Priest explained to Mr. Hooks that in this setting, the board’s meeting, the superintendent does not engage in dialogue, but must follow the procedures and the board’s policy. Mr. Hooks asked if he could ask the superintendent this question at a board meeting, and Ms. Priest explained that the superintendent must follow the board’s policy. Mr. Hooks said he only wants to get clarity and he cannot get clarity if he cannot get an answer. Ms. Priest reminded Mr. Hooks that as a board member, he always has access to the superintendent. Mr. Hooks asked he believes this should be public notice and asked the superintendent how long he has been in Shreveport, Louisiana and if he is a registered voter? President Priest reminded Mr. Hooks that this is a personal matter, and Mr. Hooks said that is not correct because he checked with the Office of Voter Registration and was told it is public knowledge. Mr. Hooks stated that if either of them ran for dog catcher, Dr. Dawkins could not cast a vote because he is not a registered voter.

Adjournment. Mr. Riall moved, seconded by Mrs. Bell, to adjourn. Vote on the motion to adjourn carried and the meeting adjourned at approximately 6:30 p.m.
The Caddo Parish School Board (CPSB) met in regular session in its office at 1961 Midway, Shreveport, Louisiana at approximately 4:30 p.m. on Tuesday, July 19, 2011 with President Lilian Priest presiding and the following school board members present being a quorum: Steve Riall, Jasmine Green, Willie Burton, Charlotte Crawley, Curtis Hooks, Mary Trammel, Bonita Crawford, Barry Rachal (arrived at 4:40 p.m.), Larry Ramsey, Ginger Armstrong and Dottie Bell. Also present were Superintendent Gerald Dawkins and Legal Counsel Reginald Abrams. Mr. Ramsey led the prayer and Pledge of Allegiance.

CONSIDERATION OF MINUTES OF THE JUNE 7, 2011 AND JUNE 21, 2011 CPSB MEETINGS

Mr. Ramsey moved, seconded by Mrs. Bell, to approve the minutes of the June 7, 2011 and June 21, 2011 CPSB meetings as submitted. Vote on the motion carried unanimously. Mr. Rachal was not present for the vote.

VISITORS

Daryl Roberson, Caddo Association of Educators, reported on his recent attendance at the NAE Conference at which VP Joe Biden was the keynote speaker. He referenced concern over the balancing of the budget on the backs of those who make the least (custodians, clerks, secretaries) through newly revised policies, implementation of the reduction in force policy, and policies that affect class sizes which directly affects student achievement. He said he believes it all began on March 24th when the board approved the Vision 2020 Plan before working out the Consolidated Annual Budget for 2011-12. Mr. Roberson stated that he doesn’t believe the board took into consideration the cost in human capital, and that the Board last week did not take advantage of an opportunity to add dollars through the General Fund to save jobs because of worry over a tax issue at some future date. He again stated that not only is this budget being balanced on the backs of loyal Caddo employees that were affected by RIF, but it also takes advantage of the poor inner city students. With the high schools (Woodlawn, Green Oaks, Booker T. Washington, and Fair Park) blended to include grades 7-12 there are still many questions and concerns that have not received answers despite the fact they have been expressed to the board. He asked if all these schools, their faculties, staffs, and facilities will be prepared for the first day of school. He said public education should be standing ready to help those that are struggling in poverty move to the middle class and asked if the board is moving in the direction that is best for ALL the children? Everyone is wondering if they truly have a voice with the Caddo Parish School Board and if the CPSB has all the children’s best interest at heart.

Jackie Lansdale, Caddo Federation of Teachers/Support Personnel, noted that last year the Caddo Parish School Board employees saw a reduction in pay as a result of the change in Federal reductions and increase in health insurance. She said this was a harder hit for support employees than was forgoing their increment last year. Mrs. Lansdale expressed appreciation for the board including pay schedule increments for classified and certified employees and asked that information be provided defining the parameters on how the $200 supply money is to be spent because teachers are already preparing for the new school year. She noted the word exigency used in the implementation of the reduction in force policy and three criteria used: declining school enrollment, program changes and financial. She said in observation of this word, because the implementation opposed to further actions are paradoxical in nature, and by invoking this issue, the board said it was in financial dire straits but refused to roll forward the property tax which would have brought over $5 million to the General Fund. She also said the board refused to take money from the technology reserve dollars that the board created from General Fund dollars. Mrs. Lansdale also referenced a past bond issue passed by the board with no pay increase for teacher and school employees while surrounding districts passed theirs inclusive of pay increases for their employees. She said it is absolute truth that we are dependent on tax dollars to run a school system regardless of what anyone might suggest; and just because some say that children or education does not mean they support public education, and cited several that appear to be for public education but in fact are not. Mrs. Lansdale called on the board to survey every school site, and use coaches, interventionists, duty personnel, et.al., to alleviate the overcrowded classrooms, to pay close attention to the number and the replication of programs and to not consider any more without careful consideration by the board. She also stated agreement that travel deserves a close look, because it has been more surprising when
management is in town than when it is not. Mrs. Lansdale also noted reference in the reduction in force policy that all feasible alternatives to layoffs will be considered first and she believes that everything stated will fall within those guidelines. She said they are gravely concerned with the diminished ability of the district to compete, but believe that what is wrong in Caddo can be fixed in Caddo.

Michelle Leland, teacher, asked that the board reconsider the laying off of the Northwood secretary. She shared with the board the asset she is to the teachers and students in supporting all in their needs. Ms. Leland said she believes Northwood is too often overlooked and under-appreciated, because they are a family and will go to bat for anyone in the school. She also shared what it means to be a teacher and that in that respect Darla Feibel is a teacher. Ms. Leland noted there are other ways to cut the budget besides the extreme move to lay off staff, cutting positions that directly affect the everyday function of the school. Since many in the community have come to the board asking board members to reconsider the budget cuts, she believes the board should consider the concerns and needs of the schools when making its decisions. She encouraged board members to visit the schools this week and observe how they are struggling to get school opened successfully while adjusting to new staff persons, which is a result from a decision that was not thought through and those that will suffer will be the children. One does not cut one of its star athletes if it wants a winning team, and that is what Darla Feibel was to Northwood. She encouraged the board to reconsider the sacrifice Ms. Feibel has made for the school system and Northwood High School that is way beyond her job description and give her the opportunity to again serve the students of Northwood High School.

Alex Suber, Northwood student council vice president, addressed the recent budget cuts and the loss of the secretary at Northwood High School. Mr. Suber reiterated comments by previous speakers in support of returning Ms. Feibel to Northwood and what she means to the Northwood community. He asked that the board reconsider its decisions in cuts made and bring Ms. Feibel back to Northwood.

Gae Graham, parent, shared with the board her concern of the recent cuts and how the reduction in office staff will affect Eden Gardens. She said she doesn’t believe laying off the office clerks at Eden Gardens was a positive action for the sake of the children, and she also doesn’t see replacing the office clerk with an attendance clerk from a high school without the principal’s input as a positive action for the sake of the children. Ms. Graham said the job description for a clerk does not specify the different grade levels to work with; and while the high school attendance clerk transferred to Eden Gardens is a fine employee, her job description was nothing like what she will be expected to do at Eden Gardens Elementary, i.e. the many additional responsibilities beyond what is outlined in the job description. She expressed to the board that she would like to see Lisa Doyal reinstated at Eden Gardens, but if not possible, please allow the principal input in the hiring of the person who will fill this position. Ms. Graham said the common goal should be for the sake of the children and not just about the budget. She also supported the consideration of reducing the Central Office budgets by cutting positions there also. Ms. Graham also asked when and how will the taxpayers, public, and registered voters get answers to their questions?

Ginger Marks, Caddo teacher, shared with the board information on two different items on which they recently voted without all the facts. She stated that Attorney John Settle recently made a public records request and obtained a list of the salary of every employee in Caddo Parish which is where she learned of the position “student service worker”. She said the job description is not on the web site and personnel was not able to provide a copy either. Through a second request, Mr. Settle discovered the job is a part-time DOE position, positions created in flush times by personnel in Central Office. Since we are not in flush times, there are at least five Central Office positions whose job descriptions mention finding jobs for DOE students in the private sector. She said in the present financial circumstances, she doesn’t believe the CPSB can make work for anyone, and staff should be told to find private sector jobs for these students. Mrs. Marks said that Mr. Settle also learned that the student food worker’s job pays $7.50 an hour; and working in the Child Nutrition office this past school year for 1,079 hours earned $8,090.50, which is quite a sum for a high school senior, but not the $15,000 on the list. She asked that someone explain this discrepancy. She said prior to the board’s vote to raise the teacher class size, teachers said there were large numbers of students in some classes; however, some board members found it very difficult to believe there were classes in the district that were larger than 25 students. She said this should not be discussed since this information is immediately
available to any staff person by using the JPAM’s Program. She also referenced information Mr. Settle received relative to K-5 schools with over 30 students in a class the first nine weeks of last year, and antidotal evidence indicates that the list is incomplete; but even if it is not, there are still 54 classrooms that have a minimum of 37 students with the worse example being over 40 students in one P.E. class and one Art class at Oak Park Microsociety for first grade classes. She challenged any board member to a class with this many first graders and cited additional examples as well. She begged the board to not vote on any issue without the facts, especially when they are so easily attained. Mrs. Marks encouraged the board to ask for a weekly report the first nine weeks of school on every class in Caddo Parish and the number of students in each class by school.

ESTABLISH THE AGENDA AND THE PROPOSED CONSENT AGENDA

Superintendent Dawkins highlighted the proposed agenda and items for the board’s consideration. President Priest announced that items 6.01-6.02, 6.04, 8.01-8.07 are the consent agenda. Mr. Riall moved, seconded by Mrs. Bell, to approve the agenda and proposed consent agenda as submitted. Vote on the motion carried unanimously. The following is a summary of the board’s action.

Item No. 6

6.01 Personnel Recommendations. The board approved the personnel recommendations as recommended by the superintendent and submitted in the mailout.

6.02 Requests for Leaves. The board approved the request for leaves as recommended by the superintendent and submitted in the mailout.

6.04 Administrative Contract Renewals. The board approved the administrative contract renewals as recommended by the superintendent and included in the mailout.

 Item No. 8

8.01 Authority for Superintendent to Sign Teacher Contracts 2011-2012SY. The board authorized the superintendent to sign the teacher contracts for school year 2011-2012.

8.02 Shared Services Agreement RSD-Linear Charter School. The board approved the shared services agreement with Linear Charter School as submitted in the mailout.

8.03 Shared Services Agreement RSD-Linwood Charter School. The board approved the shared services agreement with RSD-Linwood Charter School as submitted in the mailout.

8.04 Resolution in Support of NCLB Deregulation. The board approved the resolution in support of the No Child Left Behind deregulation as submitted in the mailout.

8.05 Resolution in Support of Goals and Positions of the Coalition for Louisiana Public Education. The board approved the resolution in support of the goals and positions of the Coalition for Louisiana Public Education as submitted in the mailout.

8.06 City of Shreveport Resolution. The board approved the resolution authorizing Superintendent Gerald Dawkins to sign any and all contracts and/or agreements with the City of Shreveport for implementing the Project RISE grant awarded by the City to the Academic Recovery & Career Discovery Center.

8.07 Louisiana Compliance Questionnaire. The board approved the Louisiana Compliance resolution as recommended by the superintendent and submitted in the mailout.

ROADWAY LICENSE AGREEMENT WITH PETROHAWK ENERGY

Mrs. Bell moved, seconded by Mrs. Armstrong, to approve the roadway license agreement with Petrohawk Energy Corporation as recommended by staff. Mr. Rachal asked staff to report on any further discussions with Petrohawk. Steve White reported that John Madison, counsel, had further negotiations with Petrohawk representatives on the terms regarding the length of the lease
and Petrohawk will have a five-year lease with a two-year extension, and as long as there is production, they will have access to the road. Further compensation was provided to CPSB, and a copy is provided, of approximately 25% more than what was originally brought to the board. 

*Vote on the motion carried unanimously.*

**REDUCE CENTRAL OFFICE OPERATING BUDGET BY 5%**

Ginger Marks said if the board wants to save money, it should shut down the Central Office cafeteria because it lost $47,411.79 and not one food service worker has been laid off in spite of numerous school closings. She said no school based cafeteria is allowed to operate when students are not present no matter how many adults are there, so she questions how Central Office is allowed to operate such a facility to serve adults when it is losing over $47,000. She asked the board to please vote to support cutting at least 5% of Central Office expenses, proving to the constituents that the board is beginning to be fiscally conservative.

*Mrs. Crawley moved, seconded by Mr. Hooks, that the Superintendent is directed to bring back to the board by the October board meeting a plan to reduce Central Office operating budget and other related budgets spending by an additional 5% of the budget passed on June 21, 2011.* Mrs. Crawley said at this time we have only hired music and art teachers in spirit and she wants them to be a reality in the classrooms. There is a high school that does not have an art teacher and cannot hire one; and at this time, she has not polled all the schools. Since not every child can play instruments, but they may be good at singing. She shared reasons some have given for not having these classes in the school and how students participating in these areas must get the opportunity in another school. She said she knows that at this time the money is not in the budget to hire these teachers but she desires that in lieu of overcrowded classrooms, she wants staff to develop a plan to address this situation before they happen with the opening of school. Mrs. Crawley said the board was told that many additional cuts will be coming to the board and her experience has been adding items to the budget, not cutting the budget. The superintendent responded that he will get an answer to Mrs. Crawley’s questions. She also encouraged the superintendent to bring information to the board as it is developed.

Mr. Hooks said a conversation was held with the superintendent and at that time the superintendent assured him that each school would have art, music, band and choir. He asked the superintendent to confirm that this discussion took place? Dr. Dawkins responded that a discussion did take place on restoring art and music programs in those schools that did not have them and staff is working to do just that. Mr. Hooks asked the superintendent to explain the problem, and Ms. Priest stated the discussion needs to be on the motion. Mr. Hooks said he will get with the superintendent.

*Mr. Ramsey moved, seconded by Mrs. Armstrong, to direct the superintendent to bring back to the board by the February 2012 executive meeting a budget plan for the 2012-2013 school year reflecting a balance between the revenues and expenditures of the General Fund and also provide monthly updates of the process.* Mr. Ramsey said he believes everyone knows there is still a serious budget problem and that the revenues are not matching the expenditures. He said he understands the original motion, but he believes we need to do something more complete and thorough and move toward getting the budget in line as well as a plan by February 2012. Mr. Ramsey noted there is an independent audit under way and it will hopefully help point out some things and he would like to have all this information. He added he is aware that the superintendent is working to find other budget cuts and he certainly agrees if there is 5% in cuts in these areas, he would support doing that; however, at the same time, he does not see how we can do it without enforcing another RIF. If that is something that needs to be done again next year, he only wants to see a more thorough planning process in getting there. He also asked that we work toward a balanced budget where we are not spending more than is coming in and working toward a reasonable fund balance of somewhere between 8 and 15%. He added until we are healthy again, it will be difficult to address some of the needs we would like to address. Also, as a board member, he depends on staff to provide information, making sure it is accurate information, because the only one the board can hold accountable is the superintendent.

Mrs. Armstrong stated that she has some concerns regarding the direction in which we are moving, and she wants a more complete picture of the operations and needs at Central Office before possibly entering another RIF. She said the audit being done will give the board a good picture and the internal auditor after each department is complete, will present a report on the
findings. Mrs. Armstrong also added that she would want to look at making the changes prior to the February work session and believes we need a balanced budget, clarification and opportunities so the superintendent can move in that direction.

Mr. Rachal stated he wishes this were two separate motions because he agrees with Mr. Ramsey about getting the budget earlier; however, he does not want to put off the first motion, because he believes this is a plan that can be worked into along with the audit. Miss Green agrees and also wishes it could be two different motions.

Mrs. Crawley encouraged Board members to vote no on the substitute motion; because while she agrees it is a good motion, it addresses the 2012-13 budget and not the current budget which is the budget her motion addresses. She said her motion is directed to the 2011-12 budget, to alleviate the General Fund balance and to give children music and art, as well as to address overcrowded classrooms. Mrs. Crawley explained that her motion directs the plan be brought back in October and by that time, she believes portions of the internal audit will be complete and presented to the board. She said she believes if someone off the street can say we are going in the hole with the cafeteria, she knows our very knowledgeable staff can find a minimum of 5%. She explained that she has attempted to explain to the public that Central Office does not have a huge operating budget, but she believes they can reduce expenditures by 5% and when the travel is changed, that represents approximately $700,000.

Mrs. Armstrong referenced Mrs. Crawley’s comments relative to the cafeteria and asked the superintendent if the closing of the cafeteria something that is being discussed? The superintendent responded that the closing of the cafeteria and other services are still on the table for consideration. Mrs. Armstrong said she did not want the public to get the idea that some of these things are not being discussed as possible ways to reduce expenses. Ms. Trammel asked for clarification and that when the board is discussing budgets, she doesn’t believe the Child Nutrition Program budget has anything to do with the General Fund budget and we can’t use these funds for anything relative to the General Fund.

Mrs. Crawford stated she was under the impression that when the board asked and voted for the internal audit, that as the board receives the reports from staff and wants to vote to correct any irregularities, the board can do so. She asked if she understands correctly that Mr. Ramsey’s motion works not only for 2012-13, but also for 2011-12? Mr. Abrams explained that the substitute motion gives a parameter. Mrs. Armstrong noted there is so much conversation in the audience that she cannot hear. Ms. Priest stated that the board would like to hear the attorney’s clarification. Mr. Abrams explained that the substitute motion provides a map as to what the maker wanted and if the board agrees, there would be a road map as to how the board wants to proceed. He further explained that the original motion explains that if the board agrees, that is how it will come back. If the substitute motion passes, the parameters would be in place for the superintendent to bring something back to the board. However, if the audit report to the board points out something, there is no reason why a board member cannot make a motion to address it as it has done in the past.

Dr. Dawkins added that staff is proceeding in two directions with the audit of each department, staff is prioritizing those and the others that are ongoing to look at everything that staff is doing as well. He said it is his understanding that staff will report its findings monthly to the board.

Mr. Hooks said he believes he heard Mr. Ramsey and Mrs. Armstrong mention the word RIF and RIF is not a part of this motion. Mrs. Armstrong said salaries.

Mr. Rachal asked for clarification on the substitute motion before he speaks to it. Mr. Ramsey said he is not opposed to cutting 5% of anything unless it involves implementing RIF again; but anytime you get into across the board cuts, you can get into RIF, and he is not convinced that we will not get into RIF. He also commented on the independent audit and the discussion that if we find something wrong, the board addresses it at that time; and if cuts are going to be made, the board would be in a better position to do so if all the information is available. He said the substitute motion gives a road map to get to February 2012; but proceeding in that direction, monthly updates will be provided and the board can take action as necessary.

Mr. Rachal asked the superintendent when will the audit be complete? Dr. Dawkins responded that staff will start and will bring feedback to the board throughout the process, but it will
possibly be the end of the year. Mr. Rachal said he knows that the auditors will be getting information from the staff and he doesn’t believe it to be a bad idea for the staff to also provide information on areas that could be cut. He encouraged those who have suggestions on possible cuts to submit them. Mr. Rachal said he likes both motions and he does not see any harm in putting this plan together at the same time the audit is done.

Superintendent Dawkins stated that the truth of the matter is staff has begun looking at other areas as stated and staff will begin to make these reports to the board. The audit is a separate process, but at the same time a complementary process. He stated his agreement that some things need to be done immediately and we need a balanced budget; and he believes everyone is aware that an additional $15 million is needed to balance the budget and this must be addressed in next year’s budget, in addition to building up the fund balance.

Mrs. Armstrong stated that we keep saying it is a plan, but she sees the substitute motion as a plan and direction not only for the 2011-12 school year, but for 2012-13 also. She said because it will afford the opportunity to make adjustments as we go through this school year and prepared to look forward to next year, she believes the substitute motion affords this opportunity.

Mr. Riall asked if it is possible to eliminate 5% without a RIF? Mr. Lee referenced documents sent to the board last week on Central Office expenses and the various departments at Central Office have approximately $24.9 million budgeted for next year; and if you take out salaries and benefits ($18.5 million), as well as additional contractual commitments ($2.9 million), this leaves a balance of approximately $3.5 million. He further explained that 5% of $24.9 million is approximately $1.25 million so the board will be cutting approximately one-half of arbitrary expenses, i.e. supplies, travel, etc. Mr. Riall asked staff what kind of hardship would cutting these arbitrary expenses put on staff? Mr. Lee responded that there is not a lot of travel to cut, because a major portion of that budget is to reimburse employees for mileage which is something the board must do, i.e. itinerant employees that travel from school to school. Mr. Lee explained that he can look at what makes up the $3.5 million and get with the superintendent and directors.

Mrs. Crawley agrees that the substitute motion can be used as a roadmap, but it is the fact that it was brought as a substitute motion instead of another agenda item, which it could stand on its own, or it could have been brought at the next meeting. She said she believes it is now a roadblock instead of a roadmap and she believes that is its point; and if we are going to continue cuts, she would like to know how many cuts are in this month’s agenda. Mrs. Crawley also explained that she added to her motion “and related budgets” to give the superintendent room. When you talk about hardships and students with diabetes, she doesn’t believe it will look good as board members to support cutting paper clips. Mrs. Crawley said RIP can be done with any motion, but the superintendent must recommend it to the board and the board votes on this recommendation.

Mr. Ramsey said again he is all for cutting expenses as long as it doesn’t involve RIF, and asked the superintendent if he is already looking at cutting these items? The superintendent responded that staff is already looking into this and it is an ongoing process. Mr. Ramsey said he does not see this as a roadblock and encouraged the board to support the substitute motion and move forward with a more comprehensive plan that includes across the board cuts.

Mr. Hooks asked if we laid off employees at the warehouse? Dr. Dawkins responded that is correct. Mr. Hooks stated that he understands from this that we have overspent and there are many supplies on the shelves at the warehouse that are not being used. Dr. Dawkins stated that staff has found more efficient ways to deliver supplies and equipment directly to schools rather than storing in the warehouse. Mr. Hooks said that he was told there were many supplies sitting on the shelves at the warehouse which means to him that we over ordered supplies, so he believes cuts can be made here.

Mrs. Bell moved, seconded by Mr. Burton, to call for the question on both motions. Vote on the motion to end debate carried with Board members Green, Crawley and Rachal opposed and Board members Riall, Burton, Hooks, Trammel, Priest, Crawford, Ramsey, Armstrong and Bell supporting the motion.
Vote on the substitute motion carried with Board members Green, Crawley, Hooks and Rachal opposed and Board members Riall, Burton, Trammel, Priest, Crawford, Ramsey, Armstrong and Bell supporting the motion.

CONTINUED INCENTIVE FOR AU TEACHERS WHO WERE MOVED

Mr. Hooks moved, seconded by Mrs. Crawley, to continue to pay the base incentive to employees who were transferred involuntarily from the Superintendent’s Target Schools for the 2011-12 school year. Mr. Hooks said this incentive pay was the result of the Superintendent’s vacating all the positions at the target schools and putting out a call to apply for these vacated positions with the commitment of paying an incentive to all who came to work at the target schools for three years. He said he believes it will be only fair to continue the base incentive for those employees who accepted the commitment and were transferred away involuntarily, because to renege on a commitment will only set another terrible precedent that the CPSB does not deal with its employees in good faith. Mr. Hooks said he believes the CPSB is financially able to absorb this cost and begin to re-establish a good relationship with its employees. He said the incentive pay is already in the 2011-12 budget and these employees have based their livelihood on this incentive for three years.

Ms. Trammel asked how many employees are we talking about for this incentive pay? The superintendent stated he does not have an exact number, but he believes there are those who left in the first and second year as well and would need to include those numbers as well, along with how much it would cost. Mr. Lee clarified that the amount budgeted is to pay those in these positions now; and to go back and pay those who have left and those who replaced them, that money is not budgeted. Ms. Trammel asked Mr. Lee if we are saying we would pay those in the positions as well as those they replaced? Mr. Lee further explained that if someone relocated and someone took their place, they likely will pick up the incentive. Ms. Trammel asked if this would include the schools that were closed? Mr. Lee responded not necessarily, but if they moved for whatever reason from their school to a school that is not a targeted school, their incentive ended when they left the school.

Mr. Abrams shared his concerns over the motion on the floor and the fact that it will give improper donations to persons not performing a job duty that was asked in receiving the incentive pay. He said the persons at the targeted schools had different duties and were provided incentives to come to the target school and accept the challenge of doing these additional responsibilities. If they are moved to a non-AU school, they will no longer be doing these additional responsibilities, and to continue to receive any incentive is considered a donation.

Mrs. Crawley asked how many are we talking about when referencing “involuntarily” moved? Dr. Dawkins again stated that staff would need to get these numbers. Mrs. Crawley said it was an agenda item and it would have been good information to have today. She also asked if since some schools were combined, will this result in some employees being dislocated? Dr. Dawkins stated some will be dislocated, some will come in and he believes it would only be fair to include all those involved, involuntary or not. Mrs. Crawley stated she is only referencing involuntary.

President Priest relinquished the chair at approximately 6:10 p.m. to the first vice president and returned to the chair at approximately 6:14 p.m.

Mrs. Armstrong asked if any of the employees were involuntarily moved from an AU school because of unsatisfactory evaluations or did they ask to be moved? If so, she believes it needs to be taken into account that we don’t know the numbers involved, and they are not budgeted since someone else took their place. She shared her concern over the board approving a blanket permission for those who are no longer performing duties to receive the incentive pay.

Mr. Hooks said he is only talking about teachers removed because the school was overstaffed. He said this item was on the agenda and he would have thought someone would have him the numbers tonight that would tell him how many persons we are talking about. Mr. Hooks asked the superintendent if he can provide him the information on those teachers that had to leave due to overstaffing for the 2011-12 school year only? Dr. Dawkins responded he will provide the number of employees who involuntarily left administrative positions for all three years. Mr. Hooks stated he is willing to pull the item until additional information is provided.
Mr. Ramsey called for a point of order and the item being discussed now belongs to the board at this time and it can’t be pulled. Mr. Abrams clarified that is correct. Mr. Riall asked if when the incentive originated, was it for people for positions? Dr. Dawkins said it was paid to the people who made the decision to come teach at that school.

Mr. Ramsey moved, seconded by Mr. Rachal, to call for the question. Vote on the motion to end debate carried with Board members Green, Burton, and Crawley opposed and Board members Riall, Hooks, Trammel, Priest, Crawford, Rachal, Ramsey, Armstrong and Bell supporting the motion.

Vote on the main motion failed with Board members Hooks and Trammel supporting the motion and Board members Riall, Green, Burton, Crawley, Priest, Crawford, Rachal, Ramsey, Armstrong and Bell opposed.

**REVISION TO CPSB POLICY DLC (EXPENSE REIMBURSEMENTS)**

Ginger Marks stated that a public records request by John Settle regarding travel expenses makes it clear the staff needs guidance from the board. Knowing that the board works very hard, she believes the board needs to give staff direction relative to spending because for three years freewheeling has been taking place despite reduced income. She shared an example where 13 Central Office staff attended a conference in Chicago, and all but three had been on another trip within the year. Others had attended additional trips across the country throughout the year and she questions if this is reasonable based on the district’s financial situation over the past two to three years.

Jackie Lansdale, Caddo Federation of Teachers/Support Personnel, referenced the finance person stating there were not that many trips, but it also included trips to school sites, and to her this is incomprehensible. She said she knows people go on trips in the Caddo School System all the time; and if the board is dependent on one person providing anecdotal information, then she believes this is information the board needs to become aware of. She said their board gets financial information at every board meeting and she believes there is nothing wrong the with CPSB getting financial information at every board meeting on how many trips were made and the cost. She said the superintendent does not do what one board member wants them to do, but only acts when the board asks him to.

Mrs. Crawley moved, seconded by Mr. Hooks, to approve revisions to CPSB Policy DLC as presented at the last meeting and provided in the mailout to also include that employee trips to conferences outside the State of Louisiana that are paid for through General Fund must be approved in advance by the CPSB. Mrs. Crawley stated that the only change from what was presented at the last meeting is that trips outside the State of Louisiana must be approved by the CPSB in advance. She explained that this is customary in surrounding districts and states, and none of the school boards do not know who, why and how much for out-of-state trips.

Mrs. Bell stated that she wants to clarify that her item strictly addresses the board’s travel and asked Mrs. Crawley if she means all travel? Mrs. Crawley clarified that it is out-of-state travel (conventions). Mrs. Bell asked if this is for the staff and employees. Mrs. Crawley said it is for everyone in the system and it says all out-of-state travel. Mrs. Bell said she cannot support this because she has something she will bring as it relates to board travel. Mrs. Bell also questioned the expense reimbursements and if we are only revising for staff and employees other than the board? Mr. Abrams explained that this revision was drafted with the intent would not be board members because it already states that board travel must be pre-approved by the board president and it has always said this. He further explained there are additional policies that address board travel, and the reimbursement should coincide with the travel policies. Mr. Ramsey asked Mr. Abrams if this is similar to what other districts are doing around us? Mr. Abrams responded he doesn’t know what other districts are doing this, but stated he understands it is similar to something Caddo did years ago and it became a nightmare. Mr. Ramsey asked the superintendent what type of issues are presented by this revision? Dr. Dawkins said he has not seen this type policy in place before and he sees it as something that could take a lot of time and staff will need to determine a process for bringing this information to the board because there is required travel by the state and grants. Mr. Ramsey asked if there are situations that require board approval and there is not a board meeting scheduled to approve it, will the president need to call a special session? Dr. Dawkins stated that he believes it would be
necessary to have a back up plan since these requests and the timelines come in many forms. Mr. Ramsey asked the maker of the motion about amending the travel budget to one-half and once travel exceeds that, the requests must come to the board because while he sees the need to monitor and control out-of-state travel, he also sees potential problems with the meeting dates. Mrs. Crawley reminded the board that she made a motion last board meeting to cut the travel budget in half and it failed. Mr. Ramsey stated he believes we are looking for a process and the ability to monitor travel and he believes this will be worse than cutting the budget. He also said the board could require a monthly report on any travel; and if at any time it appears there is excess, the board can stop travel at that time. He said he believes saying you must have board approval before anything can be done might be too obstructive even though there should be some questions asked about the Chicago trip. Mr. Ramsey said he has difficulty because of the board’s ability to approve in a timely manner.

Dr. Dawkins stated he believes it is very clear that the travel budget needs to be cut and that having monthly reports may be a way to do this; however staff is willing to put something together to address this and keep the board apprised, but this could become a management nightmare for everyone.

Ms. Trammel asked if travel is still submitted manually and not electronically? Staff responded that is correct. Because of this, Ms. Trammel said she believes there could be problems in meeting deadlines for registering, etc. She noted that she learned at a conference she attended districts that handle travel electronically are able to process travel requests more expeditiously. Since Caddo is not doing this electronically, she is concerned about processing these travel requests and still being able to meet deadlines for making early reservations, i.e. registration, hotels, travel.

Mrs. Crawley said she is willing to say conferences because many conferences are scheduled a year ahead and she only brings this because of the budget crisis we are now in and she cannot imagine anyone attending any conference in the coming year unless it is an emergency or someone is receiving a national award or for students.

Mr. Riall agrees with the spirit of the motion but asked if the maker of the motion would amend to reflect “conferences”? Mrs. Crawley agreed to a friendly amendment to include conferences. Mr. Hooks as the second also accepted the friendly amendment.

Mrs. Crawley reread her motion to include the friendly amendment as follows: To approve the revisions to CPSB Policy DLC as presented at the last meeting and in the mailout and that employee trips to conferences outside the State of Louisiana must be approved in advance by the CPSB. Mr. Hooks seconded the motion with the friendly amendment.

Mr. Rachal referenced the $414,000 budgeted for travel and he believes the motion with the friendly amendment may muddy the waters and he preferred the original motion, because he doesn’t believe “conferences” will be clear. He also asked how many do we have traveling out of state? Mr. Lee said in total for the district, it is approximately $500,000 districtwide and of that amount approximately $175,000 was paid out of the General Fund. Mr. Rachal asked Mr. Lee about the other funds and if we are mandated to spend those funds or is there a line item that we must spend it on travel. Mr. Lee said he does not know if we are mandated, and he referred to directors to respond. Pam Barker, director of special education, explained that in the Sped, IDEA and General Fund budgets, travel allocations are included in their travel allotment for personnel travel from school to school. She also explained that mandated professional development is included in that amount. Mr. Lee also added that the General Fund travel budget includes the mileage reimbursement for traveling from school to school as well as instate and out-of-state travel. Mr. Rachal asked about the reference to IDEA? Mr. Lee explained that we
are talking about two different things and clarified that the $414,000 in General Fund travel includes all forms of travel whether we are paying for someone to attend something out of state or mileage reimbursement for instate travel. He added that for out-of-state travel, there was approximately $500,000 worth of travel and $175,000 of that amount came from the General Fund and the remainder from other sources. Mr. Rachal asked about the monies being used for travel from the “other” funds, not General Fund, and can we use these in accordance with the IDEA guidelines? Mrs. Barker said that is correct and their budget is designed based on certain professional development opportunities. Mr. Rachal asked if urgent needs come out of the blue to us within 30 days of an event? Mrs. Barker said she believes we mostly receive at least a 30-day notice. If we implement this policy, he would recommend that requests for travel be made in a more timely fashion. Mrs. Barker said this is an in-house procedure staff attempts to follow.

Janis Parker explained that in addition to what Mrs. Barker presented, the Title I budgets send teachers and principals to out-of-state meetings for professional development. Title I must also include parents in the Title I budget for parental involvement, being required by law to insure that parents have the opportunity to participate in professional development. Mrs. Parker explained that out-of-state travel has been limited in recent years, but to get information submitted to the board 30 days in advance may not be doable since information on some of these conferences comes via email or in the mail with only approximately 30 days notice to get the board approval, to get the information to the schools and hopefully be able to take advantage of any discounts for early registration and booking. Mr. Rachal asked staff how many out-of-state events are mandatory and if there is any other way we can get the information/training without traveling out of state? Mrs. Parker said for Title I, they always try to send representatives to the National Conference because it is an opportunity to gather with leaders of other Title I institutions. Mr. Rachal asked if staff is aware of when this conference is held? Mrs. Parker responded it will be in January, but they currently do not have information on hotels, etc. in order to submit professional leave requests. Mrs. Barker explained her situation is basically the same with IDEA and Council for Exceptional Children which is the national conference for different areas in Special Education. She said there are several conferences throughout the year for specific domains in Special Education, i.e. pupil appraisal, instruction, etc. Mr. Rachal again stated that he doesn’t believe “conference” is very clear.

Mr. Ramsey said there appears to be some confusion because we do not know what all is involved, but he appreciates Mrs. Crawley’s comments regarding the budget crisis and we should not be traveling out of state and board members need to practice what we preach. Mr. Ramsey said he likes adding conference, but he still hears problems with the management of it; but he agrees we do not need to spend tax dollars that we don’t need to spend. Mrs. Crawley said that maybe we should clarify that it is “conferences to out of state and paid out of the General Fund must be approved in advance by the CPSB”. Mr. Ramsey stated that is his question because we are addressing the General Fund budget and should not put these over Special Ed, IDEA and Title I on the spot. Mr. Ramsey asked for clarification and if they actually spend any of the monies in General Fund budget? Mr. Parker stated that she does because since hers come from the schools, the schools sometimes put together a group and if it is more than what the budget allows, the school will combine its money and the funding will come from another fund. Mrs. Barker said she has not used any General Fund dollars for anyone traveling in Special Education, and the only thing from Special Ed that comes from General Fund is mileage for those teachers that are itinerant. Mr. Ramsey asked for clarification and if the schools will attach to the conference and spend General Fund dollars? Mrs. Barker said no, but anyone from a school that submits request relative to SPED professional development, IDEA pays for it. Mr. Ramsey asked Mrs. Parker how she is able to spend General Fund dollars? Mrs. Parker explained that she does not, but it’s a rarity when a school does not have enough funds in their Title I budget to send their parent; but if so, the school may go into their allotment. She also explained that any school in school improvement must budget 10% of their allocation for professional development, which can take various forms, i.e. in parish training or out-of-state conference trip. If it is an out-of-state conference, they are required to return and redeliver to the staff.

Mrs. Crawley, at the request of a fellow board member, repeated the change to her motion as follows: “conferences outside the State of Louisiana that are paid for through General Fund must be approved in advance by the Caddo Parish School Board”.

Mrs. Crawford, for clarification, stated that we have budgeted $414,000 for travel and the $175,000 is what is actually used. Mr. Lee explained $175,000 is not all that was used, but how
much was spent for out-of-state travel, and any remaining was probably instate travel or mileage reimbursement. Mrs. Crawford asked Mr. Abrams if this change means we are taking into consideration conferences that are mandatory by federal and state governing bodies. Mr. Abrams said he did not understand that. Mrs. Crawford cited the time when the state told Caddo that the superintendent and several staff members had to go to Virginia without a choice. Mr. Abrams clarified that at the moment the motion is exclusive of board members and next month will come board travel. He also reminded the board that when it approved the budget, the board approved the $414,000 travel expenditure and this is basically telling the staff they have approval to traveling. At the present time, the board is putting into place a process whereby anyone attending a conference outside the state of Louisiana, and funding coming come from the General Fund budget, must receive pre-approval by the board. Mr. Abrams said in essence if someone wants to attend a conference in Boston, and it is believed it is a conference they can attend and come back and share the information, and if the travel expenses will be paid from the General Fund budget, the person (employee) traveling will need to present the request to the board. Mrs. Crawford said she only wants to make sure we are not tying hands. Mr. Abrams responded that the motion states if the conference will be paid out of the proposed revisions, the board member must appear before the board for approval. Mrs. Crawford stated she believes Caddo is in a good place because she is aware of numerous districts that have eliminated all travel. Mr. Abrams again reminded the board the budget approved by the board authorizes travel and what is being discussed is a procedure to keep the board informed.

Mrs. Armstrong moved, seconded by Mr. Burton, to call for the question. Vote on the motion to end debate carried unanimously.

Vote on the main motion carried unanimously with the change that employees trips to conferences outside the State of Louisiana and paid from the General Fund must be approved in advance by the Caddo Parish School Board.

ANNOUNCEMENTS AND REQUESTS

Mrs. Crawford requested that the board attorney review the contract with SunGard and report back to the board any legal issues regarding implementation of this program

Mrs. Crawford also requested an agenda item to begin the process for renaming the new wing at Shreve Island for former principal Kerry Laster.

Miss Green expressed appreciation to the staff for the work on the transition at Green Oaks. She also shared with the board that she always watches the school board meetings online and after viewing the last meeting, she believes she would be remiss if she did not share how disappointed she was in the last five minutes of the meeting. While she understands we are going through a crisis, and she appreciates everything the board members have done to help her, she believes the board needs to stay away from personal attacks.

Mrs. Crawley expressed her appreciation for the list of academic programs and asked staff to provide the date they originated, who oversees the program, and expenses related to the program.

Mrs. Crawley asked staff to consult with the principals, etc. at K-8 schools related to a need in the office staffing ratio and should they be viewed as two schools and provided a clerk for the middle school grades and a clerk for the elementary grades.

Mrs. Crawley asked staff to provide the board with a plan to alleviate overcrowded classrooms by the end of the second week of school. She shared that one possible way might be to split the classes and let the coordinator run the class until staff hires another teacher.

Mr. Riall reinforced the request relative to the K-8 staffing formula and if it should be in line with the 7-12 formula.

Mrs. Armstrong asked for information on honoring the retirees. Staff announced that we will recognize Caddo’s retirees at a reception at 3:30 p.m. on Wednesday, July 20th in the boardroom.

Mr. Hooks stated that when he ran for office, he made a promise. Mr. Ramsey called for a point of order and the violation of board policy. Mr. Hooks said he made a promise to the people in
District 5 that whatever he knows they will know and he will keep nothing from them until he leaves the position. He will keep them informed of what goes on in the parish.

Mrs. Bell asked for an update on the schools that do not have an art, music or band teacher and why.

Ms. Trammel asked for copies of the internal audits of departments previously requested.

Ms. Priest asked that regarding hiring practices and retirees, she understands Act 591 states that all positions must be advertised twice and should, after the advertisement, the district not be able to find someone qualified, the retiree can only be hired in critical areas. Ms. Priest said she does not want to see Caddo penalized because principals may be hiding some positions for retirees.

Mrs. Bell stated that Act 405 addresses leaves that the district can pay for and those it cannot and asked the Attorney and Superintendent to bring information to the board on this matter.

Ms. Trammel asked for an update on the positions (directors and other departmental heads) still open. Dr. Dawkins reported that a letter of the preliminary assignments was sent to the board, however, it is not complete at the present time.

Mrs. Armstrong asked about schools or Central Office assignments? Ms. Trammel explained that she is referencing positions i.e. attendance director, purchasing director, etc. and will they be filled or will they remain open and placed under someone else.

**EXECUTIVE SESSIONS**

**Student Readmission Appeal.** Mr. Ramsey moved, seconded by Mr. Hooks to approve staff’s recommendation for K.T. to enroll at Woodlawn Leadership Academy on a student behavior contract. The parents are in agreement with staff’s recommendation. Vote on the motion carried unanimously.

**Adjournment.** Mr. Riall moved, seconded by Mrs. Bell, to adjourn. Vote on the motion to adjourn carried and the meeting adjourned at approximately 7:23 p.m.

Dr. Gerald D. Dawkins, Secretary

Lillian Priest, President
The Caddo Parish School Board (CPSB) met in special session in its office at 1961 Midway, Shreveport, Louisiana at approximately 4:30 p.m. with President Lillian Priest presiding and the following school board members present being a quorum: Steve Riall, Jasmine Green, Charlotte Crawley, Curtis Hooks, Mary Trammel, Bonita Crawford, Barry Rachal, Larry Ramsey, Ginger Armstrong and Dottie Bell. Also present were Dr. Gerald Dawkins, secretary, and Reginald Abrams, legal counsel. Larry Ramsey, District 10, led the prayer and pledge of allegiance.

PROCLAMATION DECLARING DISTRICT 3 SEAT VACANCY AND CALLING FOR A SPECIAL ELECTION DUE TO THE RESIGNATION OF SCHOOL BOARD MEMBER WILLIE BURTON

Mr. Riall moved, seconded by Miss Green, approval of Proclamation declaring a vacancy in District 3 and calling for a special election due to the resignation of School Board Member Willie Burton. Vote on the motion carried unanimously.

ESTABLISH PROCEDURES FOR FILLING THE DISTRICT 3 VACANCY

Mr. Rachal moved, seconded by Mr. Hooks, to establish the following procedures for filling of District 3 vacancy:

That the following procedures for filling the District 3 position be advertised in the official journal;

That applications for filling the Caddo Parish School Board District 3 position be addressed to the President of the CPSB and accepted by hand delivery at the superintendent’s office located at 1961 Midway Avenue, Shreveport, LA until 10:00 a.m. on Monday, August 1, 2011.

That interviews of candidates will follow the following format:

FORMAT FOR INTERVIEW SESSION (Up to 10 minutes per candidate)

I. Each candidate will present an opening statement addressing the following:
   A. His or her reasons for desiring to serve as interim board member from District 3;
   B. His or her special skills or experience to offer as a board member from District 3; and
   C. His or her perspective on the role of a board member.

II. Each candidate will be allowed to make any final summary statement if time permits.

Interviews to be held at a special board meeting to be held on Monday, August 1, 2011 at 4:30 p.m. at the Caddo Parish School Board office board room, 1961 Midway, Shreveport, Louisiana. Vote on the motion carried unanimously.

SCHEDULE A SPECIAL BOARD MEETING FOR PURPOSE OF INTERVIEWING CANDIDATES FOR DISTRICT 3 VACANCY AND SELECTING AN INTERIM APPOINTMENT

Mr. Ramsey moved, seconded by Mrs. Bell, that a special board meeting be held on Monday, August 1, 2011 at 4:30 p.m. for the purpose of interviewing candidates for the District 3 vacancy and for selecting an interim appointment. Vote on the motion carried unanimously.

Adjournment. Mrs. Crawley moved, seconded by Miss Green, to adjourn. Vote on the motion to adjourn carried and the meeting adjourned at approximately 4:43 p.m.

Dr. Gerald D. Dawkins, Secretary  Lillian Priest, President
August 1, 2011

The Caddo Parish School Board (CPSB) met in special session in its office at 1961 Midway Street, Shreveport, Louisiana at approximately 4:30 p.m. on Monday, August 1, 2011 with President Lillian Priest presiding and the following school board members present being a quorum: Steve Riall, Jasmine Green, Charlotte Crawley, Curtis Hooks, Mary Trammel, Bonita Crawford, Barry Rachel, Larry Ramsey, Ginger Armstrong and Dottie Bell. Also present were Secretary Gerald D. Dawkins and Legal Counsel Reginald Abrams. Mrs. Armstrong led the prayer and pledge.

Ms. Priest announced the purpose of the special session is to interview and appoint an interim representative for District 3.

Mrs. Bell asked everyone to be in prayer for Chadrick Edwards, student at Huntington High School, who was killed in an accident.

VISITORS

Rev. Joe R. Gant, Jr. addressed the board in support of Jean Ware as the interim appointment for District 3.

Frederic Washington spoke in support of Jean Ware as the interim appointment for District 3.

Debra Bell, PTSA president at Booker T. Washington, endorsed Debra Seamster as the interim appointment for District 3.

Roy Cary spoke in support of Jean Ware as the interim District 3 appointment.

Charlotte Williams spoke in support of Debra Seamster to fill the District 3 vacancy.

INTERVIEW CANDIDATES FOR THE DISTRICT THREE CPSB VACANCY

President Priest announced the format and procedures to be followed for interviewing candidates for the District 3 vacancy. Each candidate’s interview session will be up to 10 minutes; each candidate will present his or her reasons for desiring to serve as interim board member from District 3; each candidate will present his or her special skills or experience to offer as a board member from District 3; and each candidate will present his or her perspective on the role of a board member. Ms. Priest also asked that each candidate when approaching the podium to please state their name, address, that they are a resident of District 3, and whether or not they intend to seek the elected position in the October election. The president also announced if time permits, each candidate will be allowed to make a final summary statement.

The following candidates shared with the board why they desired to serve as the interim board member from District 3: Brenda Alexander (1750 Murphy Street), Njeri Camara (1505 Abbie Street), Gail Griffin (2110 East Algonquin Trail was not present), Roynetta Ortiz (3712 Bobbitt Place), June Phillips (withdrew her application), Debra Seamster (1417 Madison Avenue); Jean Ware (2114 East Algonquin Trail); and Robert “Bubba” Williams (1538 Martha Avenue).

SELECTION OF INTERIM REPRESENTATIVE TO FILL THE CPSB DISTRICT THREE VACANCY

The president announced she will call each candidate’s name in alphabetical order and each board member will have one vote. As each candidate’s name was announced, the following votes were cast: Brenda Alexander (0 votes); Njeri Camara (0 votes); Gail Griffin (0 votes); Roynetta Ortiz (0 votes); Debra Seamster (6 votes – Riall, Green, Priest, Crawford, Armstrong, Bell); Jean Ware (3 votes – Crawley, Hooks, Trammel); and Robert “Bubba” Williams (2 votes – Rachal, Ramsey). President Priest announced that Debra Seamster is the new interim representative for CPSB District 3.

OATH OF OFFICE

Legal Counsel Reginald Abrams administered the oath of office to newly appointed interim board member for CPSB District 3, Ms. Debra Seamster. The board and audience extended congratulations and welcomed Ms. Seamster to the board.

Adjournment, Mrs. Crawley moved, seconded by Mr. Riall, to adjourn. Vote on the motion carried and the meeting adjourned at approximately 5:50 p.m.
The Executive Committee of the Caddo Parish School Board (CPSB) met in regular session in its office at 1961 Midway Street, Shreveport, Louisiana, at approximately 4:30 p.m. on Tuesday, August 2, 2011 with First Vice President Steve Riall presiding and Dottie Bell present being a quorum. Other school board members present were Jasmine Green, Debra Seamster, Charlotte Crawley, Curtis Hooks, Mary Trammel, Bonita Crawford, Barry Rachal, Larry Ramsey, and Ginger Armstrong. Also present were Secretary Gerald Dawkins, Legal Counsel Reginald Abrams, staff and other visitors. Mr. Ramsey led the invocation and Pledge of Allegiance. Ms. Priest was absent.

PRESENTATIONS

Update on PMOC Process. Superintendent Dawkins introduced Col. Durr who shared with the board and audience an update on the process being used to address the district’s most important work. Dr. Dawkins reminded the board that a couple of years ago several Caddo employees traveled to the University of Virginia and learned about Project Management Oversight Committee and Balanced Scorecard and how to organize the district’s work and bring reports to the board in a more sequential and organized fashion. Dr. Dawkins explained that the PMOC (Project Management Oversight Committee) is a representative cross functional team from across the organization. In his overview, Col. Durr reported that it is important to understand while all work is critical, it is also critical to establish priorities and focus our efforts on the most important aspect of establishing accountability. In establishing the goals for the district, projects are begun to support those goals and are prioritized by the PMOC. He stated that he constantly reminds everyone on the PMOC that objectives must be clear, must be measurable, must be attainable, and must be monitored for accountability. Col. Durr explained that the PMOC is a cross representation of Central Office employees with varied experiences, as well as additional personnel throughout the district with additional background. He said that each area has projects that support the focus areas. Col. Durr highlighted the format and process that begins by completing a form on which the project is created and recorded, objectives and task lists are created on these forms, as well as timelines, communications plans, budgets, etc. He said the meeting schedule for PMOC fluctuates from weekly to monthly depending on the project status and how each is tracked. Col. Durr reiterated that staff will bring to the board in the not too distant future a format for the Balanced Scorecard.

Dr. Dawkins reminded the board that staff wants the board to understand this work is detailed out considering all possible resources for hopefully solving the issues and staff is attempting to organize this work differently in order for the board to see the work, offer suggestions, as well as the implications for policy changes, funding needed, plus any additional things that may have an impact on the schools and community.

Mr. Rachal asked how many different projects are being tracked through the PMOC? Dr. Dawkins responded approximately 10-12. Mr. Rachal asked how many projects have reached completion? Col. Durr explained that some may never see completion since they are projects that are ongoing (i.e. JPAMS). Dr. Dawkins added that staff is constantly adding projects as it moves forward and while some, such as bus transportation, may be complete by the opening of school, there are others being added. Mr. Rachal asked if what was presented is actually what the staff works from, and the superintendent responded that is correct. Mr. Rachal stated his belief that with the technology in place, this information could be placed in folders and readily available to members of the board on the web site so they can follow the process. Dr. Dawkins stated that is not a problem; however, staff is continuing to work on the details.

ESTABLISH THE AGENDA AND CONSENT AGENDA FOR THE AUGUST 16, 2011 CPSB MEETING
Superintendent Dawkins highlighted proposed items for the board’s consideration at the August 16, 2011 CPSB meeting and the following discussion ensued.

**Bids (Purchasing).** Dr. Dawkins noted that the office furniture catalog bid will be less than what is seen since excess furniture in schools being closed will be used first before purchasing additional furniture. He also noted there are no construction bids this month and Mr. White and his staff are working diligently to make sure all schools are ready for the opening of school on August 18th. Mrs. Armstrong stated she wants to make sure we are watching spending in this area since we are in a spending crisis. Mrs. Crawford asked if this is why Youree Drive is not getting new cafeteria furniture? Dr. Dawkins explained that he talked with the principal at Youree Drive and the Food Service Director and some of the furniture will be allocated from the closed schools before any furniture is ordered. Mrs. Crawley asked that the board receive an itemized list of items included in this and who will receive them? Mr. Rachal asked for clarification and if this amount is in addition to what was previously budgeted? Mr. Graham explained it is in addition and is a catalog bid sheet in the event we order furniture. Mrs. Crawford asked about the charge for printing services and if it included all the many fliers from the different departments and asked if it is possible for these items to be emailed to the board? Mr. Graham explained this is bulk printing projects for the school board, i.e. large mailouts to the parents and individuals; and at this time, nothing is planned. Mr. Abrams clarified that in this type bid, the board previously budgeted $100,000 for the items listed and with a catalog bid, the board is authorizing staff to purchase directly from the list and not come back to the board each time.

**Begin the Process for Renaming the New Wing at Shreve Island for Kerry Laster.** Dr. Dawkins explained it is his understanding that this process includes the need for Legislative approval. Mrs. Crawford explained that this request came from the Shreve Island PTA since Kerry Laster served as the principal for many years and helped build the program at Shreve Island. Mr. Abrams explained that someone will need to get a Legislator to sponsor legislation for this request and Mrs. Crawford responded that she will, but the Legislature is not in session at this time. Dr. Dawkins stated that Steve White is prepared to help follow through with this request.

**Year of the Healthy Child Proclamation.** Mrs. Bell asked for clarification. Mrs. Turner explained that staff is working with the community partners regarding activities that will be in the best interest for students physical health. She added that while a number of the partners are already engaged in activities, we are attempting to do a better job of coordinating the activities so we can increase the number of activities available for the students. These activities include nutritional, as well as physical fitness, well being and mental health. Mrs. Bell asked if this is similar to the activities at Oak Park? Mrs. Turner explained that those activities will be incorporated into the school’s additional activities because schools will do individual activities at the school and this is a district-wide effort. Mrs. Bell asked what schools will participate? Mrs. Turner said all the schools will have the opportunity to participate.

**NCLB/IDEA Combined Grant.** Superintendent Dawkins explained that this item provides a breakdown of the Federal dollars the district receives under Title I, Title II, Title III, and Part B IDEA. Mrs. Crawley asked when the grant was submitted did it look like what the board received or was it an itemized form? Mrs. Parker explained that it is similar and it is filed electronically. She further explained that she takes all the budgets and pulls them together for totals in the eGrant form. Mrs. Crawley asked if staff could break it down further since she does not understand what is being done with this. She asked if any of the funds will be used to reduce class size? Mrs. Parker said it will and the amount in salaries is for teachers in preK and to reduce class size. Mrs. Crawley asked how does staff know where the monies are going? Mrs. Parker explained that everything the schools do with this money is the principals’ choice after
looking at the needs at their school. Mrs. Crawley asked if there are 40 students in a classroom, would the school split the class and this would pay for an additional teacher? Mrs. Parker responded that it depends on the area and this is Title I money and each school looks at all their programs and determines how they wish to use their allotment. Mrs. Parker added that to answer in detail she would need to look back at each school’s budget. Mrs. Crawley asked if Mrs. Parker knows how much each school will be allotted? Mrs. Parker said she is only presenting this grant in the form that she has always brought it to the board; however, she will be glad to provide any additional information the board may want. Mrs. Crawley clarified that the budget input comes from the principals, and Mrs. Parker said it is not just the principals, but input is received from teachers, staff members and parents. Mrs. Parker also explained the amount for stipends and tutoring, with tutoring being for those teachers who may be in an extended-day schedule. Mrs. Parker also stated that we are required by law to put 10% aside for the highly qualified status. Mrs. Crawley asked if each school indicated they needed a copy machine, for example? Mrs. Parker said that is correct and most of the Title I schools are leasing copiers. Mrs. Crawley asked about the telephone for the Homeless Program? Mrs. Parker explained that we are required by law to reserve monies for this program and some of the things the Homeless Program pays for out of their budget are telephones for staff. Mrs. Crawley said she only wants to understand what she will be voting on, and asked the amount for out-of-state travel? Mrs. Parker explained that it is for principals, staff and sometimes parents to attend out-of-state conferences. Mrs. Crawley asked if these are already lined up? Mrs. Parker explained that some money has been budgeted and some have submitted the conferences they wish to attend, and sometimes they do not travel, but indicate up front. Mrs. Crawley asked about the consultancies are secured and where are they from? Mrs. Parker responded that one is in parental involvement that was scheduled for the back-to-school parent meeting and the National Network for the Partnership of Schools will come in and work with Caddo schools. Mrs. Crawley asked if the schools work together on this? Mrs. Parker said there are instances where schools pool their money to bring in a consultant. Mrs. Crawley asked that Mrs. Parker provide her with additional information, such as the individual budgets presented. Mrs. Crawley asked Mrs. Parker to explain how is the amount of money to each school determined? Mrs. Parker explained that it is based on the number of students on free and reduced lunch at the site and the eGrant determines the per pupil amount, and this amount is multiplied by the number of students on free and reduced lunch at that site.

Mr. Rachal said he believes he is seeing combinations of things that do not seem to combine well when he is looking at the budget. Mrs. Parker clarified that the series of numbers and what is included in each category is given to us by the state and we must follow their budgeting process. Mr. Rachal asked if in going through this, where is the information coming from to plug into this document? Mrs. Parker again stated she receives the information from the schools’ and staffs’ budgets, and she could print out the eGrant page to show more of the actual budget. Mr. Rachal highlighted the amount for salaries and benefits and the confusion in having some of the items categorized as they are. Mr. Rachal asked if we are hiring additional staff above the staffing formula with these dollars and Mrs. Parker responded that is correct. He added he believes this is very broad and because the economic times are not the same as they used to be, he would like to receive more detailed information. Mrs. Parker added that this is a supplemental program and is added to the regular education program and referenced a section where she further itemized the budgeted amounts, providing as much information as she thought the board might want. She said she will provide a copy of the additional summary information per school. Mr. Rachal stated that he doesn’t know if he needs the details from each school, but would like to see the amount submitted by each school in their budgets. Mr. Rachal asked for clarification of the amount listed under 900 and Mrs. Parker explained that this amount is budgeted to go into the General Fund Budget ($1.2 million), and it is determined by taking the amounts in categories 100 through 600 and multiplying it by the indirect cost percentage. Mr. Rachal asked if this amount is already included in the General Fund Budget and Mrs. Parker answered in the affirmative. Mr. Rachal stated his confusion in why things are grouped the way they are in this
budget format. Mr. Lee explained that there is a guide from the state that tells us what the account numbers are and what goes into each category. Mr. Lee said we must also convert figures from our budget to the state’s format when reporting to the state.

Ms. Seamster asked for clarification and that this is a routine annual process, and Mrs. Parker responded it is.

Ms. Trammel asked Mrs. Parker to clarify that the money in this fund can only be used for what it is designated. Mrs. Parker responded that is correct and as required by law. Ms. Trammel asked if this budget can be changed or can the money be reallocated? Mrs. Parker stated that the money has been given to the schools to use for their needs and she, Mrs. Turner and the school directors have the job to look at what they are doing with their allotment and approve or disapprove the activities. Ms. Trammel stated she is hearing from the discussion, can we do something different, and if we can’t, she does not understand what all the discussion is about. Dr. Dawkins stated that the laws say what you can do with the money and revisions within the laws and guidelines can be made by the principals. She added that if there is something the board can do, she would like for staff to let them know.

Mrs. Bell stated she will not reject any money that will help the children and we cannot write the law, so if we desire changes, we need to contact officials in Washington to work on this. She asked Mrs. Parker if these are new jobs that we can possibly fill with those laid off? Mrs. Parker stated these positions are already filled. Mrs. Bell said if any of these jobs are vacant due to retirement, etc., she would encourage filling them with those who were laid off.

Mrs. Crawford asked if she understands correctly that this money is what is in the big budget presented by staff or is it new money? Mr. Lee explained that the big budget presented was staff’s estimate and this is the final allocation and not additional money. Mrs. Crawford asked about the extra travel money we received for Title I and if this is accounted, and Mr. Lee answered that was for Choice schools. Mr. Lee added that at some point when we have a better number of Choice students, we will request Title I to reimburse General Fund for those transportation costs.

Mrs. Crawley said the reason she asked for this information is because the board votes on it, it makes the board responsible. She said if one of her schools has 40 students in a class and turned in a list for no teachers, this is a question she would ask. Mrs. Crawley asked Mrs. Parker if principals were aware at the time they submitted their budgets that the pupil teacher ratio would change? Mrs. Parker said this money can only be spent in the Core areas in the 2nd grade, and most of the teachers are preK and others are for reducing the pupil teacher ratio in classes of English, Language Arts, Science and Social Studies. She said there are also those, i.e. interventionists, that are being used as support personnel. Mrs. Parker further stated that it is the principals that have made the decision on how they want to spend their allotments, and she is attempting to give the board as indepth as possible an idea of how this $18 million is being spent in Caddo schools. If principals at some point want or need to do a budget revision to use the money somewhere other than originally submitted, they are allowed to do so. Mrs. Crawley asked if they knew we would change the pupil teacher ratio, had the board already voted on this before the principals submitted their needs? Mrs. Parker said they submitted their budget the first week in June. Mrs. Crawley asked if there were major changes from last year? Mrs. Parker said there were not because there are basic things that they can spend the money on, and this is supplementing the regular education program. Mrs. Crawley said she understands, but her question is now that we have changed the pupil teacher ratio, and the principals listed they wanted a consultant; can they change and add a teacher in place of a field trip, for example, if they have a class with 35 students? Mrs. Parker explained that is General Fund. Mrs. Crawley asked Mrs. Parker to explain the difference in the 24 teachers and are they not paid from the General Fund? Mrs. Parker said because they are paid by Title I funds and are used to
supplement the program in their school; if a classroom is overcrowded and the teacher is paid from the General Fund, it cannot be used for that. Mrs. Crawley said we are only talking about Title I schools and it is all Title I, free and reduced lunch children.

Mr. Abrams explained that the issue is if you want to reduce from 23 to 22 in a class, you could use it because you are improving and supplementing what you have; but because the General Fund had a shortfall, you increased the pupil teacher ratio and Federal Funds cannot be used to bring it back down. That is supplanting versus supplementing. Mrs. Crawley said she doesn’t understand because aren’t they saying they want it to be better than what we can supply them with? Mr. Abrams said it is not better, and it would have been better had it been left the way it was and then decide to cut the number; however, when the board increased the pupil teacher ratio due to the shortfall, it cannot use Federal dollars to bring it back down.

Mrs. Parker attempted to explain how a principal might determine needs at his school, i.e. the principal looks at test scores and the 3rd graders were weak in Language Arts, so he or she might take their Title I money and have additional 4th grade classes with activities to target those weak areas. Dr. Dawkins also asked that it be kept in mind that principals plan year to year and they know what their needs are before June. Mrs. Crawley said she is looking at the number of students in a classroom and she is concerned it will be worse this year. Dr. Dawkins stated that staff has heard the concerns expressed about the numbers and, even though some of those numbers mentioned have been disputed by principals, staff will be monitoring them closely. Mrs. Crawley also asked why we do pay for students to be tutored at Evangel? Mrs. Parker said the law says we have to offer the opportunity to participate and receive funds to our state-approved private schools and we must meet with them about the services available through Federal funds and they decide if they want to participate. There are two private schools in Caddo who have chosen to participate, Evangel and St. John’s. Mrs. Crawley asked if they cannot write their own grant? Mrs. Parker responded they can; however, they must go through more in the process than public schools. She added it is because the students come from all across the parish, and it is based on the number of students receiving free and reduced lunch, those living in a Title I attendance area, and students that are at-risk for failure. Mrs. Crawley stated she would like to receive budgets for the schools in her district.

Mrs. Armstrong asked for an explanation of the indirect cost in Category 900 paid to the General Fund and if it is dog-eared money or is it for specific purposes? Mr. Lee explained it goes into the General Fund for operations; however, there are certain things that must be paid to offset the cost for bookkeepers at Central Office that work for Title I, Special Education, and use of the Information Technology systems, etc. Mrs. Armstrong asked why we do pay for students to be tutored at Evangel? Mrs. Parker said the law says we have to offer the opportunity to participate and receive funds to our state-approved private schools and we must meet with them about the services available through Federal funds and they decide if they want to participate. There are two private schools in Caddo who have chosen to participate, Evangel and St. John’s. Mrs. Crawley asked if they cannot write their own grant? Mrs. Parker responded they can; however, they must go through more in the process than public schools. She added it is because the students come from all across the parish, and it is based on the number of students receiving free and reduced lunch, those living in a Title I attendance area, and students that are at-risk for failure. Mrs. Crawley stated she would like to receive budgets for the schools in her district.

Mr. Rachal asked for an explanation of the indirect cost in Category 900 paid to the General Fund and if it is dog-eared money or is it for specific purposes? Mr. Lee explained it goes into the General Fund for operations; however, there are certain things that must be paid to offset the cost for bookkeepers at Central Office that work for Title I, Special Education, and use of the Information Technology systems, etc. Mrs. Armstrong asked why we do pay for students to be tutored at Evangel? Mrs. Parker said the law says we have to offer the opportunity to participate and receive funds to our state-approved private schools and we must meet with them about the services available through Federal funds and they decide if they want to participate. There are two private schools in Caddo who have chosen to participate, Evangel and St. John’s. Mrs. Crawley asked if they cannot write their own grant? Mrs. Parker responded they can; however, they must go through more in the process than public schools. She added it is because the students come from all across the parish, and it is based on the number of students receiving free and reduced lunch, those living in a Title I attendance area, and students that are at-risk for failure. Mrs. Crawley stated she would like to receive budgets for the schools in her district.

Mr. Rachal asked he is looking for best choices and asked about the installation charge for a Smartboard under Item 400 and compared it to the large amount in Category 500 for traveling? He asked if the schools feel like traveling is more important than Smartboards? Dr. Dawkins stated that all the schools have individual needs, and in looking at the needs of the schools, it is the principals that are best able to determine those needs. He added there are specialized needs in some of the schools, and principals and teachers get specialized training at some of these conferences and in most cases he believes it is beneficial. He stated some are getting training via on-line, Distance Learning, and local conferences; however, they cannot get all they need here and there is some benefit to giving Best Practices to those who have shown success, and there has been very little abuse of these funds from the staff. Mr. Rachal said he is not questioning whether or not the conferences are beneficial, but his question is whether or not it is the best choice; as he does not see teachers saying rather than having Smartboards in their classroom, they would choose to attend a conference. Dr. Dawkins stated that principals and teachers are making decisions to some of all of that – getting Smartboards, computers, making choices to secure a lot of resources through grants such as this. He reminded the board that some schools
have more technology than others, which gets back to needs and the principal making the decision as to what is best for their school. Mr. Rachal asked if the principals and staffs at schools provide their requests and it is then presented to the school director, then the Chief Academic Officer and then the Superintendent? Mrs. Parker explained that once the allocations are determined, she meets with the principals to give it to them, explains changes at the state, what is allowed and what is not, and gives them a timeline for returning their information. She said at that point the principals meet with their administrative teams (to include teachers and parents) to discuss how these monies will be spent at their schools. Once this happens, budgets are received and the bookkeeper consolidates them, being reviewed by herself, and this is submitted to the eGrant. Mr. Rachal said he would like the schools’ requests as well as the allocation to each school. Mrs. Parker explained that when she forwards the schools’ budgets to the board, the bottom line is the allocation amount. Mr. Rachal asked about the deadline for the board to approve. Mrs. Parker stated she will get these to the board next week and further explained this is a formality bringing it to the board and making them aware of how these Federal funds will be spent. She also explained that the large amount in travel includes $1.8 million for School Choice travel.

Mr. Hooks stated the board can rest assured that Mrs. Parker will monitor these funds and these funds will not be wasted. He asked Dr. Dawkins how much the district receives from the ad valorem tax? Mr. Lee responded in the neighborhood of $70-$80 million. Mr. Hooks asked how is this money allocated? Mr. Lee said it goes to the operation of the district as a whole for items such as utilities and other various operation expenditures.

Mrs. Seamster asked for the budget information for Hamilton Terrace and the Academic Recovery Center. She also asked if once the principals designate how they wish to spend their allocation, if they do not use it in one category, can it be transferred to another category? Mrs. Parker said it can be done, but staff must submit a form.

Mr. Ramsey asked Mrs. Parker what the student allocation is in this particular grant? Mrs. Parker responded it is $539 per child times the number of students at that site on free and reduced lunch. Mr. Ramsey asked what will happen if the dollars are not spent? Mrs. Parker said it will go into the carryover fund; however, they try to get the principals to spend their money since we are only allowed to carry over 15% and if she goes over this, she must request a waiver. Also, since she can only request a waiver every three years, if she doesn’t spend the money, she must send it back to the State, which she has never done. Mr. Ramsey asked if Mrs. Parker maintains an inventory of computers, etc.? Mrs. Parker said she does and this is the Inventory Clerk’s responsibility. Mr. Ramsey verified that all this information is periodically reviewed in audits and Mrs. Parker said it is. Regarding the timeline, Mr. Ramsey asked what will happen if the board does not approve it on August 16th? Mrs. Parker said it will not have any effect; and if the board does not approve it on the 16th, they can bring it back next month. Mr. Ramsey asked what is the latest that revisions can be submitted, and Mrs. Parker responded February. Miss Green asked Mrs. Parker about the liability insurance at Pine Grove? Mrs. Parker responded that they pay for the insurance on the equipment in the schools. Miss Green asked if the students at Pine Grove have the opportunity to attend all the field trips? Mrs. Parker said it is not only Pine Grove, but it is parishwide and is what all the schools put in their budgets.

Mrs. Bell echoed Mr. Hooks’ comments about Mrs. Parker and referenced the list provided. She shared with the board that if we don’t move forward with this and provide the students with these needs, Caddo is going to be the laughing stock of the state. She said we have teachers still writing with chalk on green chalkboards and the new Smartboards need to be available for all Caddo students. Mrs. Bell stated the board needs to stop micromanaging the schools and trust the principal of the school when they list the needs at their individual schools.
Mrs. Crawley asked Mrs. Parker how she determined the amount of funds for the staff and non-teachers? Mrs. Parker explained that this amount is included in the set asides in their budgets. She further explained that staff is required by law to set aside a certain amount in certain areas before any money is given to the schools. Mrs. Crawley asked where is the set aside and Mrs. Parker said that is information the board does not have. Mrs. Parker also explained that in certain set asides, staff is required by law to set aside a certain percentage, i.e. transportation for School Choice, parental involvement, etc. Mrs. Crawley said she is only trying to be an educated board member.

Mrs. Seamster asked Mrs. Parker on what fiscal year period does the school district operate? Mrs. Parker responded July 1 through June 30; and the fiscal year for Title I will end on September 30th.

**Caddo Parish Disproportionality Corrective Action Plan.** The superintendent explained that the corrective action plan is required by the state; and having filed this previously, it identifies the area where there is disproportional representation of groups of students, i.e. special education and this corrective action plan addresses those issues.

**2011-2012 Caddo Parish Pupil Progression Plan Revisions.** Dr. Dawkins reported this is an annual process to address needed changes in the district’s Pupil Progression Plan as per state requirements. Mrs. Crawley asked the superintendent if the grade point scale is changing? Rosemary Woodard responded it is and that it is going to a uniform grading scale approved by BESE, returning to the seven-point scale. She said the local option allows for us to keep the 10-point scale for Enriched, Honors, Advanced Placement, International Baccalaureate and Gifted classes. Mrs. Crawley said she doesn’t believe BESE understands the grading scale.

Mrs. Crawford asked if Caddo will be doing the 10-point scale? Mrs. Woodard explained that staff’s recommendation is the 10-point scale for these classes because of the end result for students under the 10-point scale. In discussing this matter, Mrs. Woodard stated that the Parent Review Committee, as well as the Superintendent’s Committee, both believe it is a good idea. Mrs. Crawford asked if BESE provided a rationale for changing the grading scale, and Mrs. Woodard said since they were raising the bar for the 75 cut-off, they believe raising the bar with the grading scale was also the way to go.

Mr. Rachal stated that we went through this two years ago when we were uniform with the 10-point scale and he doesn’t believe BESE represented the Caddo Board in this decision, and that the Caddo Board should have been contacted. He said he feels like BESE needs to know they have now crippled Caddo students in competition across the country as universities and colleges are looking at GPAs. He also asked if a student is in Dual Enrollment classes and makes a 92, how does it show up on the college transcript? Mrs. Woodard explained that in the past with the seven-point scale, it was a B; however someone in the same class would get an A, and is why staff recommends that enriched courses be on a 10-point scale so they are equitable with other college students. Mrs. Woodard also reported she believes the uniform grading scale was a result of Legislative Action.

Mr. Rachal stated he wishes Legislators and BESE members would attend a meeting and see the faces of those whose lives this is affecting. He also asked staff to provide him with the BESE vote on this matter.

Mr. Abrams stated Act 60 was passed during the last Legislative Session and basically deals with athletics and that everyone participating must have at least a C average and this is uniform throughout the state.
Mrs. Bell said that whenever we decide to make this into law, every school and every teacher should be informed that BESE has made the change and we are only following the new law. She really wants the principals to make sure the teachers understand who made this change. Mrs. Woodard noted that the information presented reflects the state mandated criteria in one color (green) and the local option is in blue. Changes submitted to the school will indicate this and the pages on which changes appear. Mrs. Bell said she knows every parent will not get this information and she wants the teachers to understand so they can relay this information to their parents.

Mr. Hooks stated his concern for the AU schools and how this will hurt them. He added he has said since being on the board that those in Baton Rouge are looking to change all these schools into charter schools and in a few years he does not believe there will be a Caddo Parish School Board.

Mrs. Crawley said it is really not BESE, but it is our Senators and Representatives, so as a public outcry that in order to have a standardized grade you would have to have the same teacher teach every child and give every child the same test. Mrs. Crawley added that the public needs to get the Legislation and get this changed and take it off the law books.

**Revision to CPSB Travel Policy(ies).** Mrs. Bell highlighted revisions to the board’s travel policies stating how many conferences a board member may attend during a calendar year and encouraged board members to support it on August 16th.

Miss Green asked Mrs. Bell if her motion is stating that four board members can attend the National Conference and two will attend other out of state conferences. Miss Green asked if it will be handled so that the first four (or two) to sign up will be the ones to attend? Miss Green stated she believes the board understands the financial situation the district is in; and asked if Mrs. Bell would consider amending her agenda item to reflect that the board members can attend a certain number of conferences (two) a year and put a limit on it.

Mr. Ramsey stated that in order to look at and evaluate this policy revision, he would like to get information on the last three years and how many board members attended each conference. He added if there is a problem, he understands Miss Green’s comments, but as long as the motion remains as it is, he cannot vote for it. He believes out of state travel limited to one trip is ample because there is so much information via the Internet. He did state his agreement with the timing to do something with the board’s out-of-state travel. Mr. Ramsey said if the board is going to restrict staff travel and really look at them, it needs to put itself under the microscope.

Mrs. Bell stated that she is looking at this because she feels if we can limit staff and teachers, the board should do the same thing. She also asked Mr. Ramsey to clarify what he is asking and that he would like to see board members choosing one out of state trip. Mrs. Bell said she will consider the input shared by board members.

Mrs. Crawley said she is in agreement with looking at this, but with this policy the same board member could go on four out-of-state trips and she doesn’t believe this to be the best way to address limiting travel. She also shared the importance of board members networking with other board members from across the country about their districts. Mrs. Bell said she believes this will cut the board’s travel considerably.

Ms. Seamster asked staff to explain how board travel is handled? Mr. Lee responded that the board’s secretary schedules needed reservations (registration, airline, hotel) for in and out-of-state travel using the board’s travel card. Upon return, reimbursement for meals and other incidentals is received by completing a travel form for reimbursement of personal expenses.
Ms. Trammel noted the need for changes to this policy since the last revisions were in 1985; however, she said she believes if Mrs. Bell would adjust to say that travel is limited to one and no more than two in the event no one is traveling to a specific conference.

Mrs. Bell stated she likes the input from board members and will get with the board’s attorney to further discuss. She also stated she would like to get information from Mr. Lee on board costs for out-of-state travel. Miss Green expressed appreciation for Mrs. Bell cooperating and being open to input from the board. Miss Green also mentioned that she never said one trip, but believes two should be the max.

Mr. Ramsey reiterated that he hopes any comments referencing the board president will be removed.

Mr. Riall also stated that the board also has the option to pay for a trip personally if a board member wishes to go.

**Occupational and Physical Therapists.** Mr. Rachal requested this item to be on the agenda and he will bring supporting information on this item that goes back to the pay schedule and some of the changes implemented.

**Superintendent’s Report.** Dr. Dawkins announced he will bring a report on a schedule for the review of Caddo Parish policies.

**ADDITIONS**

**Continue Incentives for AU Teachers Moved for Overstaffing or School Closure.** Mrs. Crawford stated that the board voted on a motion at the last meeting and it failed. Mr. Hooks said it is the same motion, but he has the information this time and will have it to the board prior to the board meeting. Mrs. Bell asked if he is referencing the incentives for teachers that were receiving them and were moved to schools that are not receiving incentives. Mr. Hooks said this is for the teachers that were at the AU schools and were involuntarily moved because of overstaffing or school closures and are no longer receiving incentives promised them for three years when they agreed to move to one of the AU schools. Mrs. Bell asked if Mr. Hooks is asking that the district pay the teachers moved for whatever reason to another non AU school, because these teachers had extended school days and school year and this will not be true at a non-AU school. Mrs. Bell said we are not in the business of addressing personnel and she believes this is micromanaging. Mr. Hooks said these are the ones that made a commitment with the Caddo Parish School Board, and whether it was written or verbal, it was a commitment if they stayed at the school for three years. He added if they left because of overstaffing or school closure, this was no fault of theirs and he feels like we should honor that commitment. Mrs. Bell said she does not believe this to be true and that after talking to some of the teachers and learning that they did not sign a contract, she doesn’t believe we can justify a teacher getting incentives when they are now following the guidelines at a non-AU school. Mr. Hooks said he understands what Mrs. Bell is saying; however, these people based their livelihood on these three year commitments and he believes we should honor that since they were relocated because of overstaffing or the school closing. Mrs. Bell asked how will we pay this when it was not a contract. Mr. Hooks said they signed a piece of paper saying they would stay for three years and this is an agreement. Mr. Rachal called for a point of order as this is to be a question and answer time on the agenda and not a debate. Mrs. Bell said she would like to see the piece of paper and restated the board should not micromanage personnel or a principal. Mr. Riall stated that additional information, the financial impact, will be provided prior to the next board meeting and the board can debate it at that time. Mr. Abrams added that the amount for every teacher needs to be calculated, because when you give incentives to those who are not doing anything extra,
you will have the same issue to address. Superintendent Dawkins stated that staff has identified all the staff over the past two-year period.

Ms. Trammel asked if the people we are talking about for the school year 2010-11 were paid and we are now talking about the projection for the 2011-12 school year? She also asked how will the school system benefit from this projection since the district is in a financial crisis? Mr. Hooks explained that he has asked the superintendent to share these figures with him. Dr. Dawkins stated that staff has some preliminary figures. Ms. Trammel stated that several have referenced agreements signed by these teachers and if this document is not in their personnel folders, how can we believe something that we cannot see a copy? She asked if it is not in their personnel folders, is it possible for it to be filed somewhere else, and she was told the principals had them. Ms. Trammel asked if anyone has asked the principals for copies? Dr. Dawkins responded there is no district contract.

Mrs. Crawley stated that two years ago the teachers at Woodlawn signed an agreement and turned it in after a Monday faculty meeting. She added she will get a list of the schools affected, and asked Mr. Hooks about the second part of his request on incentive pay for staff attendance? Mr. Hooks shared a copy of an incentive plan that included $500 for attendance the last school year. Mrs. Crawley asked the superintendent to clarify this. Mr. Lee explained that Information Technology is running the reports to provide the number of teachers that missed fewer than the allowed days to receive this incentive and the checks should be run next week. Mr. Hooks asked why is it so late this year? Mr. Lee said it was paid in late July or early August last year. Mrs. Crawley asked what the criteria is for receiving this incentive? Mr. Lee said he believes a teacher can’t miss more than five days. Mr. Hooks stated he will pull this from the agenda based on Mr. Lee’s response. Mrs. Bell said she understands there are some teachers at the AU schools that missed from 50 to 81 days and she believes if you are getting extra money for attendance, that should be easy. The teachers at these schools are there to help these students succeed and move forward.

Mrs. Armstrong stated that she knows Dr. Dawkins has been working on the SunGard system and asked him where he is in the process. Dr. Dawkins responded that he is putting together a summary following a meeting that he and staff had with SunGard officials.

Mrs. Crawley stated that she would like to add an item to the agenda to appeal the implementation of the new grading scale. She asked if the board should do a resolution requesting the Legislature to change this? After discussion, Mrs. Crawley stated she will wait on bringing an item for action, but she believes at some point the board should protest this action.

PRESENTATION OF PROPOSED AGENDA AND CONSENT AGENDA

Mr. Riall stated that the following items will be the consent agenda: Items 8.01-8.02 and 8.04-8.05. Mrs. Bell moved, seconded by Mr. Riall, to approve the proposed agenda and consent agenda for the August 16, 2011 CPSB meeting as presented. Vote on the motion carried.

POLL AUDIENCE

Jon Glover, employee, stated that she emailed the board members on July 27th regarding the AU schools and the little or no improvement over the past seven years. She stated she doesn’t understand and asked what are we telling the students and parents why we are still dealing with these same issues? Understanding the criteria when scoring these schools, she asks why these schools are the ones that continue to fall below standards? She believes there should be an explanation for this travesty to continue and asked that someone please address it. Ms. Glover stated that we can no longer sit by and watch the destruction of these students and asked that whatever is being afforded to all the other schools not on the list be afforded to these schools.
She said resources should be exercised equally or they will continue to voice these concerns. Ms. Glover also stated that when the attention is averted to balancing the budget that is still not balanced, we are overlooking the real reason we are in business, and that is to make sure that every student in Caddo Parish receives the best educational opportunities possible. At this time, she doesn’t believe this is the case and she would like to know what the board’s plan is to eliminate the problem?

Ginger Marks, teacher, shared with the board lists she has compiled from information received from Attorney John Settle on all out-of-state travel for last year. Mrs. Marks reminded the board of the many teachers that appeared before the board telling them about the huge classes they had but the board did not believe them. She said JPAMS will show different. Mrs. Marks shared that Mr. Settle thought the state max was 29 students in a class, so he asked for classes with more than 30 students. From the information he received, Walnut Hill has seven math classes with 31 students in 5th grade, the same for English/ Language Arts. She also stated that Werner Park has two classes, one with 35 students and one with 36, and asked if the board does not believe JPAMS? She said the principals can say whatever they want to say and asked the board if it really believes that teachers had input into the special education and Title I budgets. She said she does not believe a teacher would approve of sending a retired return-to-work retiree to Chicago over getting money for a Smartboard? She asked the board to believe their teachers.

Jackie Lansdale, president of the Caddo Federation of Teachers/Support Personnel, addressed the AU issue and noted the board’s policies on Reduction in Force, and specifically the policy GCPA-R which states how positions are to be reduced. She said she believes for some reason principals are being told that all deals are off the table and they can remove anyone they choose and noted a situation whereby a teacher with many more years of seniority over another one was moved by the principal of an AU school. She reminded the board that this is a violation of board policy. She also said that principals are just principals, and some are good managers in all aspects and some are not. Mrs. Lansdale shared with the board some of the decisions being made by principals and asked that the board hold people accountable for behaviors.

Gae Graham addressed the board’s conversation regarding Title I schools and their budgets. She told the board that a Smartboard costs $5,270 for a full set up, and she knows this because Eden Gardens has 11 Smartboards and they need 13 more so every classroom has one and these were not purchased with state, parish or Title I funds, but with funds from the PTA, the parents at Eden Gardens, fund raisers, and businesses. She said Title I schools are very lucky to have the funds given to them for Smartboards and other advanced technology, but she doesn’t understand why some of the Smartboards are still in boxes in hallways. Her point is to not make light of the hard work that non Title I schools are doing in order to provide their teachers with the latest in technology.

**Adjournment.** Mrs. Bell moved, seconded by Mr. Riall, to adjourn. Vote on the motion to adjourn carried and the meeting adjourned at approximately 7:25 p.m.
The Caddo Parish School Board (CPSB) met in regular session in its office at 1961 Midway, Shreveport, Louisiana at approximately 4:30 p.m. on Tuesday, August 16, 2011 with President Lillian Priest presiding and the following school board members present being a quorum: Steve Riall, Jasmine Green, Debra Seamster, Charlotte Crawley, Curtis Hooks, Mary Trammel, Bonita Crawford, Barry Rachal, Larry Ramsey, Ginger Armstrong and Dottie Bell. Also present were Superintendent Gerald Dawkins and Legal Counsel Reginald Abrams. Mrs. Armstrong led the prayer and Pledge of Allegiance.

President Priest recognized and wished Board member Dottie Bell a Happy Birthday.

Mr. Riall moved, seconded by Mr. Ramsey, approval of the minutes of the July 12, 2011, July 19, 2011, July 26, 2011, August 1, 2011 and August 2, 2011 CPSB meetings as submitted. Vote on the motion carried unanimously.

PRESENTATIONS AND RECOGNITIONS

Tricia Grayson, director of communications and marketing, shared the district’s gratefulness to community partners for their generous support and recognized Charlotta Nordyke from the Rotary Club of Shreveport, who has donated $5,000 from their annual Dragon Boat Festival. Ms. Nordyke stated that the Rotary Club will soon celebrate its 100th year, and announced that the Rotary Club will sponsor the 3rd Annual Dragon Boat Festival on September 10 with the proceeds being given to non-profits in the community. She also expressed the Rotary Club’s appreciation for the opportunity to reinvest in Caddo Parish Public Schools.

Public Hearing for Renaming the Professional Development Center the Wanda L. Gunn Professional Development Center. President Priest declared the public hearing open for renaming the Professional Development Center the Wanda L. Gunn Professional Development Center. There being no speakers, Ms. Priest declared the public hearing closed.

VISITORS

Jon Glover, employee, asked if it is a rumor that Caddo has 19 AU schools; and knowing that it is not, she asked what attention has been given to alleviate these 19 schools from being on the AU list? She said it is evident that nothing is being done since the board opted to consolidate AU schools with other AU schools; and asked if the board did not perceive a change would be imminent and direct staff to take necessary steps? She asked if the board expects changes to be limited and the schools will not have an increase in their scores? She questioned if the board honestly believes something positive will come from the board doing business as usual and that the problem will only magnify. She stated that everyone is cognizant that test scores will not increase because the board has systematically engaged in acts that will not afford change, destroying students and particularly those in the inner city. Ms. Glover asked who is responsible for these actions. She believes some much needed and necessary changes need to be addressed, i.e. moving administrators and teachers from non AU schools to AU schools and hopefully gain insight into what is causing a continuous decline in the test scores for the AU schools. She added there is not time to deal with positive opposition, but if the board is truly for the education of all students in Caddo and those qualified and willing to go to whatever school they are assigned, they will no longer sit idly by and watch the destruction of Caddo’s children. If it is not of essence to the board, then she asked if it is possible that changes are truly eminent. She implored the board to look at the position and make the needed changes.
Nancy Nix, teacher at Caddo Middle Magnet, implored the board to look at the new grading scale given by BESE and expect the higher level students to achieve at the higher level. She said it doesn’t make sense to ask the higher level student to make a 90 yet ask students that struggle more to make a 93. Ms. Nix stated her belief that gifted students need to be held accountable and were until the grading scale was changed. She asked that the board place all the students on the same grading scale. Ms. Nix also encouraged the board’s support of the superintendent’s recommendation for the new principal at Caddo Middle Magnet.

Jackie Lansdale, president of the Caddo Federation of Teachers/Support Personnel, stated that in her position with the Federation she is called to do a lot of things; but the things she loves the most are The Most Improved Student Celebration and the New Teacher Inservice. She said that both of these afford her to witness possibilities and opportunities as well as challenge her to think what can be done to make it better. Mrs. Lansdale added she believes we can be instrumental in helping these further their dreams to become teachers; and referenced information on new teachers in 2008, 2009, 2010, and 2011 and the Federation’s service of offering Caddo Fed After Hours New Teacher Academy. This academy offers sessions designed specific to the needs of new teachers and she shared a copy of the first session on September 10th and additional planned sessions. Mrs. Lansdale also stated that they are studying fourth year teachers and when they verify the status of these, the Federation will plan a celebration for gaining tenure, and reminded the board that tenure is not awarded by the state, but is district by district. She invited the board and administration to be a part of this celebration. Mrs. Lansdale also reminded the board and superintendent that it is no secret that Caddo has lost its competitive edge when it comes to salaries; and that it is now more important than ever that the district becomes second to none in providing a supportive and appreciative work environment. She encouraged everyone to be realistic and not beat up the new teachers who do not perform at the same level as a veteran teacher, but listen and monitor them and what they have to say, invest in them in the present to assure the very best in the future. The students deserve this. She also stated that she looks forward to Hop on the Bus the first day of school and thanked the superintendent for inviting the Federation and the opportunity to meet with the Superintendent’s Advisory Committee.

Daryl Roberson, Caddo Association of Educators, expressed appreciation to the staff for the tremendous job in hiring new teachers. He noted the new school year will be met with many changes and expressed his concern on what continues to be what’s best for children and employees. He referenced employees returning today to different buildings in new positions including the biggest and alarming change of 7-12 grade schools and parents fearing their middle school students on the same campus with high school students. He said he looks forward to May and to the results he hopes he will see.

Shannon Fortenberry, 9th and 10th grade counselor, addressed the board on the proposed change in the grading scale and how difficult it is to tell students that are in the enriched type courses they only have to make a 90 to get an A yet students that struggle must make a 93 to get an A. She stated that when the grading scale has changed, student apathy is seen as well as how it affects students’ GPA for college. Ms. Fortenberry encouraged the board to have the same grading scale for all students. She also encouraged the board to support the superintendent’s recommendation for the principal at Caddo Middle Magnet.

Virginia Marks, teacher, shared with the board that she received a very nice tote bag as part of a giveaway to over 100 teachers and it was full of various school supplies which she does not need. She said her embarrassment and the specter of micro-managing has reared its ugly head to the Caddo Parish School Board. She said employees of the system have been told they cannot second guess the staff on the small details as this is micromanaging. She said she questions the giving of unneeded supplies that have not been requested when we are in a financial crises. Mrs. Marks also referenced the new soap dispensers in the schools that are embossed with the CPSB
logo, and asked what was wrong with the other soap dispensers? Mrs. Marks presented the supplies she received to the board member in her district and asked her to share them with someone who needs them.

Leeann Anglin addressed the board on the proposed grading scale and why the Pupil Appraisal Committee’s recommendation was not accepted, which she asked the board to do. Mrs. Anglin shared with the board that her child is in Gateway and because this child is active in sports, does not get home until sometimes 10:30-11:00 at night, and sometimes works on homework until 1:00 a.m. She stated that parents have had it with overworking the students and she is offended that counselors would think these students would “sit back” if they only had to get a 90 to get an A. She said these students work hard to be successful; and the issue is not the students, but it is the grading scale and what the state is requiring. Mrs. Anglin encouraged the board to support the committee’s recommendation to keep the grading scale at 90-100 for these students.

ESTABLISH THE AGENDA AND PROPOSED CONSENT AGENDA

Superintendent Dawkins highlighted items for the board’s consideration. He asked that the recommendation for Director of Purchasing be postponed, as well as the NCLB/IDEA Combined Grant. Ms. Priest announced that Mr. Hooks requested that his item “Continue Incentives for AU Teachers Moved for Overstaffing and School Closures” be pulled, and Mr. Rachal asked that Occupational Therapists and Physical Therapists be postponed. Mr. Hooks explained he is pulling his item because of his concern about the teachers/employees affected this year; and after conversation with the Board’s attorney, he understands there could be some legal problems. Mr. Rachal stated he is waiting on additional information and will bring this item back to the Board at a later date.

President Priest announced that Items 6.01 (minus Director of Purchasing), 6.02, 6.03, 7.01, 8.01-8.02, 8.04-8.05, and 13.01-13.02 are the Consent Agenda. Mr. Riall moved, seconded by Mr. Hooks, that the agenda and the proposed consent agenda for the August 16, 2011 CPSB meeting be approved as presented. Vote on the motion carried unanimously and the following is a summary of the board’s actions on the consent agenda items.

**Item No. 6**

**6.01 Personnel Recommendations.** The board approved the personnel recommendations, with the exception of Purchasing Director, as submitted by the superintendent in the mailout.

**6.02 Requests for Leaves.** The board approved the following requests for leaves as recommended by staff and submitted in the mailout.

**Certified**

Bebe Ezelle, Teacher, Barret Paideia, 5 years

Lindsey Blackshear, Teacher, Summerfield Elementary, 5 years

Catastrophic Leave, August 26, 2011 – October 7, 2011
Cindy Green, Teacher, Broadmoor Middle, 10 years

Rescind Sabbatical Leave, Fall Semester 2011 and Spring 2012 approved May 17, 2011
Megan Colvin

**Classified**

Leave Without Pay, August 4, 2011 – August 1, 2012
Juanita Hindsman, Library Clerk, Southern Hills, 12 years

Andrea Foust, Teacher’s Aide, Riverside Elementary, 1 year
6.02 Personnel Transactions Reports. The board approved Other Personnel Transactions Reports for the period of July 1, 2011 – July 20, 2011 as submitted in the mailout.

Item No. 7

7.01 Bids (Purchasing). The board approved the following bids as recommended by staff and submitted in the mailout on the bid tabulation sheets. (1) M. L. Bath Co., Ltd., Inc., totaling 52.65% discount for the Office Furniture Catalog Bid; (2) Economical Janitorial & Paper Supplies, Inc., totaling $66,840.00 for the purchase of Janitorial Paper Supplies (Bathroom tissue); (3) Standard Printing Company, totaling $44,208.00 for the purchase of Printing Services for all Schools; (4) Economical Janitorial & Paper Supplies, Inc., totaling $156,150.00 for the purchase of Janitorial Paper Supplies (rebid); (5) Lott Oil Company, totaling $8.40 per gallon for the purchase of Engine Oil; and (6) Lott Oil Company totaling $8.06 per gallon for the purchase of Antifreeze.

Item No. 8

8.01 Begin the Process for renaming the New Wing at Shreve Island Elementary for Kerry Laster. The board approved beginning the process of renaming the new wing at Shreve Island Elementary for Kerry Laster.

8.02 Year of the Healthy Child Proclamation. The board approved the proclamation proclaiming August 2011 through May 2012 as The Year of the Healthy Child as submitted in the mailout.

8.04 Caddo Disproportionality Corrective Action Plan. The board approved the Caddo Parish 2011-2012 Disproportionality Corrective Action Plan as required by the Louisiana State Department of Education and submitted in the mailout.

8.05 2011-12 Caddo Parish Pupil Progression Plan Revisions. The board approved the revisions to the Caddo Parish Pupil Progression Plan for 2011-12 as submitted in the mailout.

Item No. 13

13.01 Student Readmission Appeal Hearings. The board approved staff’s recommendation for DS and DV. The parents are in agreement with this recommendation.

13.02 Legal update and recommendation in the matter of Tasha Munsen-Robinson v. CPSB, Case No. 09-CV-1820, U.S. District Court, Western District of Louisiana (Shreveport Division). The board approved the settlement of claims of Tasha Munsen-Robinson v. CPSB, Case No. 09-CV-1820 based on the recommendations of the attorney for the CPSB.

Bids (Purchasing). Mr. Rachal stated that he wished to clarify the contract for janitorial supplies, i.e. soap dispensers. He explained the district will save approximately $35,000 with this new contract; and he further explained the soap dispensers were free, the installations were free and the information posted on the soap dispensers was free. Mr. Rachal also clarified this is a part of the “Clean Hands School Campaign” in K-3 grades, providing free publicity through the TV and newspaper avenues.

Mrs. Crawley asked that when something like this, i.e. soap dispensers, is done that an email communication be sent to the board so board members are better able to respond to inquiries.
Ms. Trammel stated that board members do receive emails that question some of the things that happen, but it seems that they don’t get the information anyway and if we give them the correct information, it seems as though they use the other end of the stick and she wonders if it really matters that the information is provided.

**REVISION TO CPSB TRAVEL POLICY(IES)**

*Mrs. Bell moved, seconded by Mrs. Armstrong, to approve the proposed revisions to CPSB Policy BHD as submitted in the mailout.* Mrs. Bell stated that the proposed revised policy, based on board input at the work session, was provided on BoardDocs last week and she read the proposed revision as follows: the School Board members may attend up to two out-of-state conferences during a fiscal year. Mrs. Bell shared with the board and audience information provided by Mr. Lee; and in response to statements during the budget work sessions, Mrs. Bell clarified that the total for out-of-state travel for 2009-10 was $23,090, and $33,683 for the 2010-11, and not $100,000 as reported. Mrs. Bell stated that she asked Mr. Lee about the savings to the district if board members only attend one out-of-state trip; and after consideration, believes a maximum of 2 out-of-state trips is appropriate at this time. Mr. Lee explained that the information provided is in response to board member requests on the amount of out-of-state travel and the potential savings if the board limits travel to one or two out-of-state trips would be between $5,000 and $10,000. If travel is limited to one trip, the budget could reflect a savings of approximately $10,000-$15,000.

Mrs. Armstrong requested clarification that the discussion is relative to the document passed out and not what is on BoardDocs. Mr. Abrams stated that it is on BoardDocs, but it will not open; and what will not open has been given to the board members.

Mr. Ramsey explained that he pulled this from consent because he was unable to open the document at home or when he got to the meeting today. He added that the conversations he has held regarding this mirror what has been said about board members being allowed to attend up to a certain number of conferences; and his preference is if the board is still concerned about travel, then the board needs to take necessary steps to limit the out-of-state travel to one out of state trip. He added that he questions that if each board member attends two out-of-state conferences, he doesn’t believe the amount budgeted cover the cost. In looking at patterns, he believes the question should be the number of total conferences attended. Mr. Ramsey stated he believes the change presented today is better than what was originally presented, but he still believes it should be one out-of-state conference.

Mr. Rachal asked how many total trips were made last school year? Mr. Lee stated that he believes between 20 and 25. Mr. Rachal responded that based on that, he doesn’t believe the new policy will have any effect on this at all. Mr. Lee agreed with that statement if every board member attends two. Mr. Rachal asked Mr. Lee about the budgeted amount for this item, and Mr. Lee responded $28,000. Mr. Rachal asked the maker of the motion if she would be agreeable to a friendly amendment to change it to one out-of-state conference during a fiscal year. Mrs. Bell responded she can agree if it is for this fiscal year and the board relooks at the policy next school year. Mr. Rachal stated his agreement and the second of the motion (Armstrong) accepted the friendly amendment of one out-of-state conference.

Mr. Hooks stated he likes to be aware and prepared before he gets to the meeting, and he was unable to access the backup documents. Dr. Dawkins stated staff will check into the glitches.

Mrs. Armstrong asked about the number reported by Mr. Lee; was it all conferences, including in-state? Mr. Lee explained it is only out-of-state conferences and those attending two or more.
Mrs. Crawford stated she does not have a problem with either policy; however, this year there were three new members on the board. Having never attended these conferences, these do not know which conference they will get the most from. She reminded the board there are hours that board members must earn during the year and she believes limiting the number of out-of-state trips will limit board members in getting what they need. Mrs. Crawford asked Mr. Lee why expenses for Williamsburg are reflected in July of 2010 because the Williamsburg trip is a different budget. Mr. Lee explained that a lot of the expenses were paid later in the year. Mrs. Crawford asked board members to be sensitive to new board members’ training needs when revising the travel policy.

Miss Green shared her agreement with Mrs. Crawford’s comments because she has learned a lot as a new board member by attending these conferences. Miss Green asked Mrs. Bell and Mr. Rachal if she understands correctly that the revision is for only one out-of-state conference? Mrs. Bell responded that is correct and the board will revisit the policy after this year.

Mr. Hooks stated his agreement with Miss Green and Mrs. Crawford, because as a new board member, he would have loved to attend the Regional Conference; however, because of the financial crisis he did not attend.

Ms. Priest stated she agrees we need to have a policy and we need to have flexibility. She added she hopes if this policy is approved, the board may relook at it and some of the extenuating circumstances that need to be considered.

Mr. Rachal asked if it would help to add the comment relative to the “board president being authorized to approve additional attendees within the board-approved budget”? Mr. Abrams, for clarification, restated the revision presented by Mrs. Bell and the friendly amendment from Mr. Rachal that “School Board members may attend one out-of-state conference during the 2011-12 fiscal year” and this means it will be only for this year and the board will come back next year to review and change it since at the end of the year, it will revert back to the original policy. Mr. Rachal said he never mentioned 2011-12; and Mr. Abrams explained that Mrs. Bell stated her agreement to the friendly amendment for one year. Mr. Rachal stated that his friendly amendment was for a fiscal year and did not reference any specific years and read it should state “School Board members may attend up to one out-of-state conference during a fiscal year”. With the disagreement between the maker of the motion and Mr. Rachal, Board member Rachal agreed to revise his friendly amendment to say School Board members may attend up to one out-of-state conference during the fiscal year 2011-2012. Mr. Rachal stated he would like to also add another friendly amendment to say that The Board President is authorized to approve additional attendees within the approved school board budget. Mr. Rachal said he hopes if there are board members who cannot attend an out-of-state conference and there are those that feel the need to attend National and Regional conferences, this will provide the flexibility for the Board President to approve this without coming back to the board for approval. Mrs. Bell, as the maker of the original motion, stated her agreement with the proposed amendments. Mr. Ramsey clarified that both friendly amendments will only apply to this fiscal year and Mrs. Bell said that is correct (July 1, 2011 through June 30, 2012).

Miss Green stated this is the problem she had the first time around (giving the Board President the authority to approve additional attendees); however, she is o.k. with it since it is only for one year.

Mr. Ramsey stated he can support the proposed revisions as long as it is within the board approved budget.
Mrs. Crawley said she only wants the board to set the example of what she perceives staff will be setting, which is one or less trips. While the board could eliminate all out-of-state travel for this fiscal year, she appreciates at least getting control over travel spending; and she encouraged carryover funds to be held for next year’s use.

Mr. Hooks moved to call for the question. The vote to end debate carried unanimously.

Mr. Rachal reread the motion for clarity and that School Board members may attend up to one out-of-state conference during the fiscal year 2011-2012 (July 1 – June 30) and the Board president is authorized to approve additional attendees within the approved school board budget. Also, expenses of Board members in accordance with established rules will be applicable. The administrative staff may be represented by the superintendent or a person designated by him. Vote on the motion carried unanimously.

SUPERINTENDENT’S REPORT

Superintendent Dawkins stated that the opening of the 2011-12 school year is upon us and shared with the board an update on where the district is with operations and staffing in preparing to open school. He highlighted construction projects being completed, clean up that will occur, installation of doors and light fixtures. Dr. Dawkins reported that staff members have been working night and day to get everything in place for the opening of school. Regarding staffing, staff is finding there is a critical shortage in areas not seen before, i.e. Language Arts, Special Education, etc. He also said that staffing is utilizing the pool of applicants and are attempting to deplete this group as directed by the board. In looking at the critical needs areas, there are some retirees who have these skills and staff is working with Reggie Abrams to determine the appropriate steps for rehiring these retirees. He also reported that Mrs. Turner is organizing the Central Office Instructional Staff that have needed critical certifications in order to fill these gaps. Dr. Dawkins also reported that he had opportunity to meet with the new teachers in Caddo and the outstanding group they are. Mrs. Bell asked the superintendent to look at the law recently passed by the Louisiana State Legislature whereby retirees returning to work will give up 25% and she wants to make sure retirees returning to work understand this.

Regarding the review of district policies, Dr. Dawkins explained the staff’s work todate. He said staff is proposing that the process begin on reviewing policies and he is asking Ms. Priest to assign a board member to each of the areas being reviewed. While the work is very tedious, Dr. Dawkins said it is necessary and hopefully will clarify the different perspectives and also stressed the importance of consistency in application of policies across the district. Dr. Dawkins reported this is being brought at the request of President Priest so staff can begin to bring back to the board recommendations relative to updates. Ms. Priest announced she will call board members requesting that they serve on one area. Mr. Rachal asked if at all possible that staff provide board members with additional information on what each section of policies addresses.

Mr. Ramsey asked about the board-approved vendor to help consolidate all policies and include the state laws where appropriate. Dr. Dawkins clarified that the board authorized the staff to work with ForeThought; and staff is pursuing this, attempting to get the funding in place.

ANNOUNCEMENTS AND REQUESTS

Mrs. Crawley asked staff if we are putting long-term subs in classrooms because she believes retirees in the classroom are what the parents want.

Mrs. Crawley asked that a review be done on the homework policy and its implementation.
Mrs. Crawley asked for information on travel that has occurred to date this fiscal year, including those already booked and the dates they were booked.

Mr. Rachal asked that staff extend an invitation for Walter Lee to share updates with the board at least on a quarterly basis.

Mr. Rachal asked that an item be placed on the September agenda to begin the process of renaming a portion of the Youree Drive Middle School grounds for Coach Tom Knox.

Mr. Rachal also asked that additional detailed information be provided on the policies.

Mrs. Bell asked that staff look at the grading scale and what can be done to overturn what BESE has adopted.

Mrs. Bell also asked for an update on retirees returning to work and the new law adopted by the Legislature.

Bonita Crawford stated her awareness that high schools beginning school with four or more subs and asked if it is possible to rehire retirees with the appropriate certification to fill these positions.

Mrs. Crawford also asked that staff look at a rumor that there are a lot of bus drivers without bus routes and they are just sitting around in transportation.

Mrs. Crawford also asked that staff respond to an email she received that transportation had extra money to buy a car for another department director.

Mr. Hooks asked that staff look at the school calendar for 2011-12, because it has been brought to his attention that January 1st is on Sunday and when that happens, the following Monday is a holiday. At this time the calendar is showing everyone returns on Monday, January 2nd.

Mr. Hooks also expressed appreciation to Mrs. Parker for providing the additional information on his schools.

Ms. Trammel stated that she went into one of her schools this week and observed that the one person in the office was overwhelmed. She asked staff to review and see if one person in the office is sufficient. She also stated to the audience as a point of personal privilege that she wants everyone to receive the information the board has, but many times the board members hear things from the public that they are not aware of and she believes information shared should come through the proper channels and given to the public by those in public relations or the Communications Department. She said it has been breathtaking the number of rumors this past week and encouraged those who hear rumors to please call the superintendent’s office for assistance in clarifying what has been heard. She said she will always answer those questions for which she has the information; but, if she doesn’t know something to be correct, she will get verification before she shares any information.

Ms. Seamster also expressed her appreciation to Mrs. Parker for responding to her request for information and shared her first two weeks have been very busy, having had the opportunity to visit several schools, back to school rallies and she, too, noted how some offices that she visited the worker appeared overwhelmed and she would like staff to look at this.

Charlotte Crawley asked the superintendent about the policy review committee list and if there will be other site-based representatives besides the two to three principals? Dr. Dawkins noted the list provided is only a draft.
Mr. Hooks also stated the maintenance and custodial support crews are overworked and he fears that the schools will not be as clean as they were last year at this time.

Mrs. Armstrong asked staff to look at the office staffing for K-8 schools since these are actually two schools in one.

Mr. Rachal asked the superintendent to ask Gary Joiner to provide the board with a copy of the Caddo Parish Commission approved districts.

Ms. Priest announced that the deadline for receiving information (agenda items) for the Intergovernmental Committee meeting scheduled for August 26th is Friday, August 19th.

Ms. Priest also announced that the board has been invited by Barksdale Air Force Base to tour the base, including their Child Development and Youth Centers.

Ms. Priest announced that she is calling a special board meeting for 4:30 p.m. on August 23rd. The purpose of this special meeting will be to consider an economic development initiative that could potentially create 400-600 jobs. Information being requested from the Industrial Development Board will be provided to the board members prior to the meeting on the 23rd.

Mr. Abrams announced that on Sunday at 4:00 p.m. the St. Pius Catholic Church Choir will present, along with Marc-Andre Bougie, The Haydn Mass in C and invited the board and public to attend.

Mrs. Bell reminded the board that Summer Graduation is August 23rd at 7:00 p.m. at Caddo Magnet High School.

EXECUTIVE SESSION

Mr. Abrams announced that the executive session for the Level IV grievance is postponed until next month and basically, the parties have agreed if the board passes a policy addressing the frequency of faculty meetings, they will halt the grievance.

Adjournment. Ms. Seamster moved, seconded by Mrs. Bell, to adjourn. Vote on the motion carried and the meeting adjourned at approximately 6:25 p.m.

_________________________________  ____________________________________________________________________
Dr. Gerald D. Dawkins, Secretary   Lillian Priest, President
The Caddo Parish School Board (CPSB) met in special session in its office at 1961 Midway, Shreveport, Louisiana at approximately 4:30 p.m. on Tuesday, August 23, 2011 with President Lillian Priest presiding and the following school board members present being a quorum: Jasmine Green, Debra Seamster, Charlotte Crawley, Curtis Hooks, Mary Trammel, Bonita Crawford, Barry Rachal, Larry Ramsey, Ginger Armstrong and Dottie Bell. Also present were Superintendent Gerald Dawkins and Legal Counsel Reginald Abrams. Mrs. Armstrong led the prayer and Pledge of Allegiance. President Priest announced that Mr. Riall is out of town.

PERSONNEL RECOMMENDATIONS

Mrs. Bell moved, seconded by Mr. Hooks, to approve the personnel recommendation as submitted by the superintendent in the mailout. Vote on the motion carried with Board members Green, Seamster, Hooks, Trammel, Priest, Crawford, Rachal, Ramsey and Bell supporting the motion and Board members Crawley and Armstrong opposed.

INTERIM CONTRACT FOR CONCESSIONS AT LEE HEDGES STADIUM

Ms. Trammel moved, seconded by Mr. Hooks, to approve the interim contract for concessions at Lee Hedges Stadium as recommended by the superintendent and submitted in the mailout with the modification of through December 31, 2011 rather than September 30, 2011. Ms. Seamster inquired about bids for this agreement and was there not anyone in Caddo to bid. Mr. Abrams explained that this is an interim contract due to a conflict with the current contract when bid. He also explained this is not subject to the public bid law and puts someone in place to get through the fall season. It will bid again before December 31. Vote on the motion carried unanimously.

RESOLUTION IN SUPPORT OF ECONOMIC DEVELOPMENT INITIATIVE

Jackie Lansdale, president of the Caddo Federation of Teachers/Support Personnel, shared with the board that she would like to understand the decision making behind this item since she does not see economic development behind any of the district’s goals and objectives. She also stated she sees nothing in the board’s role relative to economic development and making sure there are employers throughout the parish and granting them tax breaks. In light of the fact that the district is experiencing overcrowded music rooms, loss of 300 plus positions, teachers paying out of their pocket for every piece of paper they use, schools not having music teachers, buses breaking down and students transported late to school, she doesn’t understand why the board would consider giving away money. Mrs. Lansdale encouraged the board to consider what message it will send by supporting this item.

Curt Foreman of the North Louisiana Economic Development Partnership announced he is present to answer the board’s questions regarding this request. He explained Louisiana, along with approximately 10 other states, is being considered as a possible location, and approval of this resolution to support this economic development initiative will keep Caddo Parish in the consideration for these jobs. He explained this project requires support of the taxing bodies in the community and their agreement with the Louisiana Department of Revenue’s (LDR) ruling on a project of this kind.

Mrs. Armstrong moved, seconded by Mrs. Bell, that the CPSB support the economic development initiative by supporting the proposed resolution as recommended by the staff and submitted in the mailout. Mrs. Armstrong stated that in cases like this we do not always know who the players are and shared the similarity to General Motors locating a plant in Shreveport. She said that General Motors’ decision to locate in Shreveport proved for many years to be an economic boom for this area. She stated her belief that the board should support opportunities for
economic development and that the educational district will be beneficiary of this economic development project if it locates in our community. She encouraged the board to support this initiative which means more money and support for the district’s staffs, schools and students.

Mrs. Bell echoed Mrs. Armstrong’s comments and that she believes with the announcement that General Motors will close, this is an opportunity to bring new families and children into the community and district as well as provide jobs. She encouraged the board to support this item.

Mr. Rachal, for clarification, asked if the board’s approval of this resolution is for a particular company or is it a blanket agreement with the state? Mr. Abrams responded that he spoke with Don Pierson, director of economic development for the state, regarding their request for the board’s approval of this state resolution. He explained that the intent at this point is not to give up any taxes, but will we challenge what the LDR determines to be taxable; and at this time, we do not know what this company will provide. Mr. Rachal shared he believes this company is asking the state to get the feel from the local taxing bodies whether or not they agree with the state’s determination. Mr. Abrams further explained if we don’t agree, we would be out of the loop. Mr. Rachal asked for clarification and if the board approves this resolution, can we overrule what they say relative to sales tax? Mr. Abrams stated it could be a good precedent, but not one the school board could not challenge. Mr. Rachal also asked if this is not just states sales tax, but local parish and city sales taxes; and if the board approves this resolution, is it agreeing to it even though we don’t know the company? Mr. Abrams clarified that is not correct, but approval of the resolution would be a decision that the board agrees with the LDR’s determination as to whether or not what the company does is taxable. Mr. Rachal asked if he is wrong in thinking that if the LDR declares the company’s product not taxable, there is nothing we can do about it. Mr. Abrams stated that is probably incorrect, because if there is an entity not paying sales taxes, and the CPSB believes what they do is taxable, then the CPSB can sue the company to pay taxes.

Prior to Mr. Foreman’s response to questions, Mr. Rachal clarified that he is pro business, and asked Mr. Foreman what other parishes is this company considering? Mr. Foreman responded that Ouachita Parish in Louisiana, as well as 10 states, are going through this same procedure with the taxing bodies; and their support only states that these areas are willing to be competitive for this project who has asked the state to look into whether or not their product would be considered taxable. If the LDR declares they are not taxable in what they do, then the taxing bodies in the area chosen for the project agree to the cooperative endeavor agreement with the state to help make the project happen. He also announced there are multiple possible sites being considered in Caddo Parish. Mr. Rachal asked if they will also be asking for a waiver on property and/or ad valorem taxes? Mr. Foreman responded that is likely. Mr. Rachal stated that he personally just paid tremendous property taxes and he questions if these larger companies requesting waivers consider education to be important. He added he does not believe it is fair to him or anyone else paying property taxes and they are the only ones that will benefit. While he doesn’t have any problem with this, he will not speak in favor of it; because every time a waiver is granted, his personal property taxes increase.

Mrs. Crawley said she visited with the tax assessor when going through the property tax discussions and the odds are that the LDR will give away the taxes. She said she believes we need to make a statement that everyone needs to pay their fair share of the tax dollars. Mrs. Crawley asked if the board says yes, is it saying we will not pursue taxes; because it is her belief that we need to state now that we want the tax dollars. Mr. Abrams explained that a yes vote means the board will concur with the findings of the LDR, the taxing authority that determines whether or not something is taxable. Ultimately, the board can only act during the time that it acts, but the board can vote to change its mind at a later date as long as it hasn’t gone into effect. Mrs. Crawley asked about the periods of time for tax exemptions. Mr. Abrams explained that this one does not have a time period because this is only addressing whether or not what the company does is taxable. Mrs. Crawley said if what they do is not taxable, does that mean we do
not have an argument; but if the LDR says what they do is taxable, will the district get the tax dollars? Mr. Abrams responded that if the LDR declares what the company does to be taxable, the chances are very good that we will not see this project happen. He also said if the board makes the decision to enter into a cooperative endeavor, it is basically saying it agrees with the LDR’s determination. Additionally, if the board does not act, any citizen can file an action relative to whether something is taxable or not.

Ms. Seamster stated that she wants jobs, growth and economic development, but only wants a better understanding of what the resolution will do. She asked if she understands correctly that this is an incentive to bring companies to our area and allows them a break from sales taxes. Mr. Abrams said if the LDR determines the product to be non-taxable, there will be no break. Ms. Seamster asked about a decision by the LDR that the product is taxable? Mr. Abrams said if that is the case, the resolution will not mean anything regarding the company coming here; because if declared taxable, the company will probably choose not to locate here. Ms. Seamster asked for clarification and if the board supports this resolution, is it stating that we are in agreement with the other taxing bodies? Mr. Abrams stated that is incorrect, because if the Department of Revenue makes the determination that the product is non-taxable, the board is saying it will abide by that determination and will not challenge it.

Mr. Hooks said he believes it is evident that the board has a bad memory or amnesia and he wonders what message the board is sending to the citizens. He reminded the board that in March the board approved the Vision 2020 plan, about 3 months ago over 300 employees were laid off when the board approved the budget, then the board was forced not to roll forward the millage, and now we want to give up taxes. Mr. Hooks concurred with Mr. Rachal and that the $5,000 he had to pay, others paid that or double, and this is a lot of money. He further stated no one is going to put their children in Caddo Public Schools, but they are putting them in private schools and he doesn’t believe bringing this company to Caddo Parish will bring students to Caddo Parish schools. Mr. Hooks said if he had another child, that child would go to private school and not public school and that is the way he and his constituents feel. He encouraged the board to begin listening and doing what it needs to do. While it is good to bring jobs here, he believes it is necessary to watch what is being done.

Mrs. Armstrong moved, seconded by Mrs. Bell, to call for the question on all motions and discussion. Vote on the motion carried with Board members Crawley and Ramsey opposed.

Vote on the original motion carried with Board members Crawley and Hooks opposed and Board members Green, Seamster, Trammel, Priest, Crawford, Rachal, Ramsey, Armstrong and Bell supporting the motion.

ANNOUNCEMENTS

President Priest expressed appreciation to Mrs. Grayson for the work she has done for Caddo, and wished her the best in her future endeavors.

Ms. Priest stated that the maps at board members’ stations are the Caddo Parish Commission approved districts for reapportionment.

Ms. Priest announced that the Barksdale tour is scheduled for September 9th. Also, there are tickets still available for the NAACP banquet and the David Raines annual meeting and banquet.

Mrs. Bell stated how happy she was about the opening of school and stated numbers have doubled at Woodlawn, Huntington, and Turner. The numbers are up and she is anxious to see the numbers after everything settles down. She also expressed appreciation for the outstanding work done by the Attendance Department.
Ms. Trammel expressed appreciation to Mr. Woolfolk, Mr. White and Mr. Smith for the excellent job in getting schools ready for the opening day.

Mr. Hooks asked the superintendent to return the BTW students.

**Adjournment.** Ms. Trammel moved, seconded by Mrs. Crawley, to adjourn. Vote on the motion to adjourn carried and the meeting adjourned at approximately 5:15 p.m.

Dr. Gerald D. Dawkins, Secretary

Lillian Priest, President
The Caddo Parish School Board (CPSB) met in special session in its office at 1961 Midway Street, Shreveport, Louisiana at approximately 7:55 p.m. on Tuesday, September 6, 2011 with President Lillian Priest presiding and the following school board members present being a quorum: Steve Riall, Jasmine Green, Debra Seamster, Charlotte Crawley, Curtis Hooks, Mary Trammel, Bonita Crawford, Barry Rachel, Larry Ramsey, Ginger Armstrong and Dottie Bell. Also present were Secretary Gerald D. Dawkins and Legal Counsel Reginald Abrams. The prayer and pledge were omitted.

Executive Session. Mr. Riall moved, seconded by Mr. Hooks, to approve staff’s recommendation for T.M., the student’s parents are in agreement with staff’s recommendation. Vote on the motion carried unanimously.

Adjournment. Mr. Ramsey moved, seconded by Mr. Hooks, to adjourn. Vote on the motion carried and the meeting adjourned at approximately 8:00 p.m.

Dr. Gerald D. Dawkins, Secretary  Lillian Priest, President
September 6, 2011

The Executive Committee of the Caddo Parish School Board (CPSB) met in regular session in its office at 1961 Midway Street, Shreveport, Louisiana, at approximately 4:30 p.m. on Tuesday, September 6, 2011 with President Lilian Priest presiding and Steve Riall and Dottie Bell present being a quorum. Other school board members present were Jasmine Green, Debra Seamster, Charlotte Crawley, Curtis Hooks, Mary Trammel, Bonita Crawford, Barry Rachal, Larry Ramsey, and Ginger Armstrong. Also present were Secretary Gerald Dawkins, Legal Counsel Reginald Abrams, staff and other visitors. Mrs. Bell led the invocation and Pledge of Allegiance.

PRESENTATIONS

President Priest recognized and expressed appreciation to Mr. Willie D. Burton, former school board member for CPSB District 3, for his many years of service (20 years) on the Caddo Parish School Board and to the students and employees of Caddo Parish Public Schools.

Academic Update. Superintendent Dawkins recognized staff members (Mrs. Turner, Mrs. Gallant, Mrs. Woodard and principals) who shared progress in Caddo’s schools at each level in looking at the coming school year. Building level staffs were in attendance and recognized as a group, and the superintendent expressed his appreciation for them taking the time to support their colleagues, and for the work they are doing at their individual schools.

Mrs. Turner recognized the work the principals are doing in their schools regarding Best Practices and the efforts on behalf of student achievement and announced that individual presentations will be made by Hamilton Terrace, Midway Professional Development Center and Booker T. Washington. Mrs. Turner introduced Kathy Gallant, director of professional development, and Rosemary Woodard, director of assessment and school support, who shared the following specific areas in the Focus on Results presentation. Mrs. Turner asked that everyone keep in mind that effectiveness is assessed on the basis of results rather than intentions, and schools will analyze their data based on common assessments to identify students needing additional time and support for learning and to accelerate students currently proficient in their areas of learning.

Mrs. Woodard explained that District Performance Scores are released annually, usually one year behind, and it is anticipated that the 2011 results will be received in January-February, 2012. She noted the improvement in the District Performance Score since 2007, explaining that this score is made up of assessment data, attendance data, teacher quality information and other factors. Mrs. Woodard stated that currently Caddo has 36 schools (55%) scoring greater than 75%, 14 schools (21%) on academic watch, 3 newly added alternative schools (4% of the tested population) and 13 schools (20%) that are AU schools according to the state guidelines. She also reported that in looking at one school at a time, Caddo has elementary schools and some elementary with some middle school configuration and 23 of them (60%) are greater than 75%. She also reported that Caddo currently has 9 elementary/middle configurations (24%) and 6 schools on the middle school watch (16%). Mrs. Woodard re-emphasized that to change what is happening it is important to look at one school at a time and noted that the K-8 schools (four of them) are academically acceptable above the 75%, none are academically unacceptable and only one is currently on academic watch. She added that the same numbers hold true for the middle schools (greater than 75%) and 3 (43%) of the middle AU schools. She reported there are fewer high schools, but there are five (46%) that are in AU status, two (18%) on watch, and four (36%) scoring greater than 75. Mrs. Woodard reported that in looking at the percentage of students that are at Basic and Above, 58% of the students over the last three years are scoring at Basic and Above on all tests from 2007 through 2010, grades 3 through 12. She also reported that in the 4th and 8th grade areas, 73% scored at Basic and Above, which is up from 71%, and 8th graders...
moved from 64% to 70%, which is a good statistic. Mrs. Woodard also shared that the ACT results are slightly down from 2008; however, she feels this to be a good statistic in that we are testing many more because of an increase in interest in taking the ACT. The Graduation Cohort number for 2010 is pre-appealed and at this time, staff is not sure how much it may improve as a result of challenging the State Department on several of the results.

Mrs. Gallant addressed the kind of support that will be given to all schools districtwide, including universal screens, support from instructional supervisors and professional development specialists, IDEA support, consultant services with behavior interventionists at all schools, district-wide online professional development, district-wide assessments and support with data analysis, i.e. the plan, explore and cognitive assessment, opportunities to participate in state-wide projects, i.e. Accelerated Pathways and Connections. She also made the board aware that the State has a moving target relative to the minimum School Performance Score required of the schools, i.e. beginning in 2002, the minimum score was 45 and it has increased over the years to now being 75 for the 2011-12 school year. Mrs. Gallant explained that the AU schools have been divided into three tiers and explained the levels of need in each, including those schools in AU status that have received SIG grants and as a result do not have sanctions this year from the Federal or State Government. She shared with the board the work staff has done on the Superintendent’s Target Schools beginning with the original nine schools placed in AU status, four of which have been removed from their MOU based on their SPS scores. Mrs. Gallant explained how staff has divided the Watch List schools into three tiers of intervention and that technical support for the AU and SI schools will be provided by District Assistance Teams made up of instructional supervisors, specialists, and Special Education supervisors to help these schools with their School Improvement plans and their implementation. Quarterly monitoring of the implementation of these plans will be done to make sure they are on track and that they have everything they need to move forward. In-depth needs assessments also will be done at the schools in order to get to the root of problems and determine what the school needs to do. Mrs. Gallant also announced that all AU and Watch List elementary schools will receive a reading interventionist through IDEA Early Intervention Funds and instructional supervisors and specialists will monitor the SIG and AU5+ schools on a weekly basis and all AU and Watch List schools will receive universal screening for instructional level. Mrs. Gallant reported that the four 7-12 schools will receive quarterly monitoring by the RSD and the four SIG schools will receive monthly monitoring by the state.

Priscilla Pullen, principal at Midway Professional Development School; Marie Eakin, principal at Hamilton Terrace Adult Learning Center; and Patrick Greer, principal at Booker T. Washington High School shared with the board and audience those things they are doing at their schools to improve student achievement, including their vision, setting goals, early assessments to identify strengths and weaknesses on each testing method at each level, areas of needed improvement, continual data analysis, action planning, early interventions (for both remedial and advanced classes), professional development, monitoring, adjustments, reteaching, and assessing for proficiency.

Superintendent Dawkins expressed his appreciation to those who presented and shared with the board and that these are only examples of what is being done in our schools every day. He also announced that staff will bring additional information to the board in October following the release of the School Performance Scores.

Mrs. Crawley asked how many students took the ACT and Mrs. Woodard responded that, while she did not have the exact number with her, this number increased by approximately 30%. Mrs. Crawley also asked how many students attending kindergarten at Midway passed the Leap test? Mrs. Pullen explained that Dr. Debbie Williams at LSUS did this research and all the kindergarten students that entered Midway passed the Leap. Mrs. Crawley asked Mrs. Pullen if she has a plan in place to help parents understand their role. Mrs. Pullen responded that she does
have a separate brochure on parental development and each month activities are planned for
parents and students. She added this is something they have done every year; however, this year
it is a little more intense and grade levels are involved as well as the use of outside resources to
couple with what they are doing. Mrs. Crawley asked if teachers work on Saturdays; and if so,
are they being compensated for that time? Mrs. Pullen said they do and they are, and she wrote
this into the School Improvement Plan. Mrs. Crawley also asked about the New Technology
model training and if all 7th and 8th grade teachers will receive this training? Mr. Greer
responded they do not, as it is mainly geared to the high school teachers and the goal is to show
the 7th and 8th grade teachers how they can incorporate some of these project-based activities
with the middle school students and prepare them for the jump to high school, and all high
school grades will be included. Mrs. Crawley asked Mr. Greer who attended the high tech model
training, and Mr. Greer responded that an ELA teacher, a math teacher, and a Social Studies
teacher on the middle side and the remainder were high school teachers in the areas of Social
Studies, math and science.

Miss Green asked Mrs. Turner to provide board members with a copy of today’s power point
presentation. She also recognized principals of schools in her area and thanked the
superintendent for the excellent principals in District 2.

Curtis Hooks asked where is Caddo state-wide comparable to other districts? Mrs. Woodard
responded that she does not have that data in front of her, but she believes Caddo is slightly
below the State average; and because when Caddo’s average goes up, the State average goes up,
which makes it difficult to compare to other districts. Mrs. Woodard stated she will get Mr.
Hooks additional information. Mr. Hooks asked Mrs. Woodard if she is concerned about
merging the AU schools with another AU school since the AU schools are attempting to improve
the scores? Mrs. Turner noted that the information presented included a list of the schools in
which staff did some merging, it reflected an increase and they were moving up in the SP Scores
and achievement scores, which means they are moving in a positive direction. Mrs. Turner also
explained that it is her belief that with the combinations the district has in place, a stronger group
has been established, and noted the improvement at the 8th grade level. She also reported that
when they combined these schools they took the strength of all the professional development
added, as well as all the training with the teachers, and will continue to build on the focus on
instruction. Dr. Dawkins noted the example shared by Mr. Greer of what the leadership has done
to bring the talents of outstanding teachers together to accomplish the goals.

Mrs. Bell echoed board member comments relative to the outstanding presentation and asked
staff to explain the night program. Mrs. Eakin explained that this was the short-term suspension
center and PM Program; and that there are programs in place whereby other high schools can
benefit by allowing students who are behind in their credits to take classes at the PM School.
These students are extending their learning day and students from all across the parish take
courses at the PM School. She also added that currently in place, and there have been in the past,
are students who will not be on the MFP count because they are older than 22. Mrs. Bell shared
that she is aware of a student who was in a coma as the result of an automobile accident which
put her behind; however, she was able to take courses at the PM School and catch up. Mrs. Bell
also asked if the students in this program are in the school building during the day or do they
attend at night and/or take the classes online? Mrs. Eakin said they are in the school building
during the day and at night and will be able to extend their classroom learning time by logging
into their courses wherever they are and work on their courses. Mrs. Bell also asked about
students taking courses in the morning and working in the afternoon/evenings. Dr. Dawkins
stated that staff is aware and understands that some of these students are in unique situations and
we want to make available to them 24 hours a day these available resources. He also shared that
we are moving quickly toward Virtual School opportunities for Caddo students. Mrs. Bell asked
about the moving state target highlighted and requested that staff put this information on the
district’s web site so parents can understand these fast changes.
Mr. Rachal said he realizes that the group before the board today is only an example of the leadership in place in Caddo Schools and he doesn’t believe the public is aware of the effort and passion that this group has for the children. He expressed his appreciation for the staff’s hard work and how impressed he is with what he has seen and heard. Mr. Rachal asked the staff to tell him what they believe to be the main factor in those students that are under-achieving. Mr. Greer said from his experience he believes it is giving the children connections to the school, having productive relationships with the students on the campus. Mr. Greer explained that the J. S. Clark team made a concerted effort to make sure that the public perceived J. S. Clark differently, that they were open to the comments and critiques, but most importantly how the students felt about those who were looking at them from 8 to 3. Mr. Rachal stated that just going through Vision 2020 and hearing from everyone regarding their expectations for the school system, the board and the individual schools, he suggested that a survey of parents be conducted to determine what the parents/guardians expect of their children. He believes there is possibly something missing here and this could possibly provide some information to help build relationships. Mr. Rachal stated that he believes if the parents/guardians know that the staff and board care, maybe they will be more likely to participate and work with the students more diligently to help them reach goals and expectations.

Mr. Rachal also asked about the K-8 model and since it appears they are successful, as there are none in AU status, he believes this speaks for the consistency of the 9 years at one site. He added he believes we can expect the same from the new configurations and asked if it is possible in the future to have more K-8 schools. The superintendent responded that it is definitely believed that having students longer will yield better results. Dr. Dawkins stated that staff has discussed the K-8 model significantly and it is a topic that is still on the table as movement is made forward. With the fewer transitions at the 7-12 configurations, the superintendent said it is believed that with the leadership and support in the classroom, along with the consistency, we will see better results. Mr. Rachal asked Mr. Greer his opinion on the State’s new mandated grading scale, at which time Mr. Greer deferred to his director.

Mr. Ramsey referred to the graph presented on the District Performance Score and the attention people pay to this. He noted a gain of .5 points since 2009 and asked what each school will do to improve this score? Mrs. Turner explained that it will be a three-prong approach, first looking at the data and identifying the gaps, identifying the standards that need immediate focus and providing needed interventions for those students that need that support. She added that for those students at the other end of the continuum, in terms of proficiency, it is important that they are challenged to make certain they move into the Mastery and beyond level rather than being stagnant at Basic. Mr. Ramsey stated he believes adding reading interventionists at those schools identified as being in trouble to assist them before they reach AU status is needed, and asked what is staff doing to address the schools whose score is above 75? Dr. Dawkins added staff is assessing this to provide the needed support at the schools with reading interventionists being one of those supports. Mr. Ramsey noted over-age credit recovery and the outstanding work being done at Hamilton Terrace and asked staff how many students are we servicing through this program in our efforts to improve the graduation rate? Mrs. Turner stated that staff is looking at other on-line options as well as researching how we can make these options available to more students in the district. Staff will bring additional information to the board on this effort. Mr. Ramsey also stated that he believes holding the students and staff accountable for attendance, conduct and performance will also be key in improving scores. He also applauded all principals and staffs present for what they do to help our students.

Ms. Priest thanked the superintendent and staff for the presentation and asked that the staff continue to bring these type presentations to the board so board members can help some of the rhetoric and misinformation out in the public about what we aren’t doing, but what we are doing. She also reminded everyone of what Paul Pastorek said when speaking to the board and that
when he looked at the agenda, he saw that it was full of things that were not children centered, but adult centered. Ms. Priest also stated that while she believes we want all our children scoring at 100% and this is something we can strive for, she believes 58% of the children scoring at Basic and Above is good. She also noted those schools that were removed from AU status and cautioned everyone not to pull all the resources from those schools because even though they are out of AU, they are still not where we would like them to be. Ms. Priest commended J. S. Clark, the staff and leadership and shared with them her conversation with a Clark student over the summer that had read 113 books.

Mrs. Armstrong asked Mr. Greer how many students from J.S. Clark moved with him to the new configuration at BTW? Mr. Greer said they did not lose many, but many of them came with them for the 7th grade. He added he and his staff continue to work with the parents to ensure them of the education they will receive at BTW. Mrs. Armstrong said this has been her hope and that we would make this kind of impact which will make this transition smoother for those entering the 9th grade. Mrs. Armstrong recognized the amount of support for the schools in AU status, but asked the superintendent to remember those schools that have worked very hard also but have not gotten there; and they need the same kind of support relative to physical plant to accommodate computer labs, replacement of plumbing in a home economics lab, etc. She again stated her appreciation for all the hard work the principals are doing on their individual campuses as well as the leadership they are exhibiting for the staffs.

Ms. Seamster expressed her appreciation to all the administrators for everything they are doing to inspire, motivate and educate the children. She asked staff to explain how performance is determined for Hamilton Terrace and Academic Recovery. Mrs. Woodard stated they are calculated the same as any other school – test scores, attendance, and drop out rate. Ms. Seamster asked about the students at Hamilton Terrace that come from other schools and does the Performance Score go to their home school and Hamilton Terrace not receive any credit? Mrs. Woodard said that is correct and if they are not in the school one full academic year, the score goes back to the sending school; however, if they are at Hamilton Terrace for the full school year, their score remains at Hamilton Terrace. Ms. Seamster asked about the percentage of students this represents? Relative to Academic Recovery, Ms. Seamster asked if everyone is from another school? Mrs. Woodard said that is correct. Ms. Seamster asked if that means they do not receive any credit? Mrs. Woodard responded it is an alternative school and the students come from other schools. Ms. Seamster asked why Academic Recovery will not have a Performance Standard? Mrs. Woodard explained that it is Legislative and BESE action and if students are at the school the entire year, the numbers stay at the school; and if not, numbers are routed back.

Mr. Riall asked staff if he understands correctly that alternative schools will now begin having SP scores? Mrs. Woodard explained that four or five years ago the State Department unofficially released the alternative schools and stated that if districts are calculating School Performance that this is what it would be for alternative schools. At that time there was a Legislative push to report everyone on the same playing field and eliminate a lot of the routing which at one time 100% of the scores went back to the home schools. Mr. Riall asked if he understands that the alternative schools’ Performance Score is computed only on those students that are there the entire year, and Mrs. Woodard said she believes that to be correct. Mr. Riall asked how was the transition completed to move the students and staff at Hosston into the other two alternative schools, i.e. what percentage of each went to those settings? Mrs. Flowers explained that these students were looked at on a case by case basis to see if they completed their assignment at the school; and if so, many went back to their home school. If they had not completed their stay, they were sent to one of the other alternative programs. Mr. Riall asked about the placement of staff at Hosston and Mrs. Flowers responded that most of the staff relocated to Academic Recovery and a few went to other locations based on their request. Mr. Riall asked for explanation on where the students from Hosston go who were relocated to another alternative
Ms. Trammel expressed her appreciation to the principals and staff for taking aim at the target despite the fact that it is a moving one. She also shared how proud she is of the community involvement in the schools in District 6; and stated she believes when you get the community involved, it is likely to get the parents and students involved also. Ms. Trammel also expressed her appreciation to the schools who have gone above and beyond to bring the parents to their schools and get them involved. She also asked about reassignments in the schools and if this could not be done parishwide to ensure that we are doing everything to get our students where they need to be.

Mrs. Crawley expressed her appreciation and asked Mrs. Woodard about the dip in the ACT score and the fact that the more it is opened up and the more students who are encouraged to take this test will result in the scores going down. Mrs. Woodard explained that 1,348 students tested at the highest point and at the dip, we went to 1,513 which is an approximate 200 student jump in the number taking the ACT, or about one half of the 11th graders. Mrs. Crawley said she does not believe one can tell by one test score how well a student will do in college. Mrs. Turner added that in each high school we are continuing to do ACT Prep to help our student be more successful with the ACT and college readiness information. Mrs. Crawley asked if the counselors and assistant principals know about and encourage the PM School for those students needing this and Mrs. Turner said they do.

Dr. Dawkins concluded by stating that the staff’s focus is always on all schools and all students; and while there is much work to do, and some of it will not be easy, it is the challenge before us and the opportunity to take on this challenge. He further stated that staff will be bringing to the board more on working together in uses of technology and other issues that will impact instruction.

Reapportionment Update. Following a brief recess, the board reconvened in open session at approximately 6:10 p.m. President Priest announced that Dr. Gary Joiner was retained by the Caddo Parish School Board, as well as the Caddo Parish Commission and other governmental entities, for assistance in coming up with a redistricting plan as a result of the recent census. Dr. Joiner shared with the board that through a lot of debate and alternate plans submitted by those outside the Commission, the Commission chose Plan #9 which sailed through Justice with minimal questions. He also reported that because of the configuration of the districts in Plan #9, 10 of the 12 School Board members remain in their districts, with Districts 5 and 7 not. He explained that there is a confusing state law that if a parish has Home Rule Charter, and the parish governing bodies are the same size, they should have the same boundaries. Dr. Joiner added that this was part of a local bill; however, because two school board members did not end up in their districts, the School Board has free reign to do what it needs to do with the precincts created by the Parish Governing Board. He added that the last time this was done, the School Board ran first and was allowed by the Commission to create new precincts; however, this time, the School Board will not be able to create any new precincts. But since through this process enough precincts were created, the School Board will not have this challenge. Dr. Joiner stated that part of the plan is to follow accepted guidelines so there will be no retrogression (there will be 6 majority districts and 6 minority districts). He also explained that the Justice Department understands that sometimes in a parish like Caddo where there are a number of people moving around, unlike other parishes, there is a 50% deviation, and this is good news. He said the Caddo Parish Commission Plan does this. In instances where the residence in five and seven are right on the precinct boundary line, it is possible to move one or two precincts. He also added that if board members are o.k. with the proposed lines, then that is o.k.; however, if some board members believe some change needs to happen between two adjoining districts, it is possible to do that also. Dr. Joiner shared with the board the difference between the School Board and the
Parish Commission, and reminded the board that it represents all the voters in the district. He said he tried to keep as many neighborhoods together as possible while at the same time considering annexations; and with the Commission, it was possible to address situations by creating new precincts and keeping some of the current precincts from being illegal. Dr. Joiner stated that it is now time, over the next four to six weeks, to meet and discuss all the possibilities and build something that works, and submit it to the Department of Justice. Dr. Joiner shared with the board that they can email him at gdjoiner@bellsouth.net if they are o.k. or not with the specifics of Plan #9. He shared with the board that he is working on a Plan 9A to address District 5 and 7.

Mrs. Bell asked if there is a deadline on this and Dr. Joiner responded that the rule of thumb is an attempt is made for a School Board that is not in the same election cycle as Parish Governing Body to have it up there one year before the elections. If a vote can be agreed upon over the next month, he believes it is better to not put it off. He also added that while he doesn’t believe we need to finalize in the next two weeks, he would like to see a plan in place for Justice in November.

Mr. Rachal noted he has met with Dr. Joiner; and while he is not dissatisfied with what the Commission has approved, he repeated his past comments that we are meandering everywhere, and if each Board member sees the lines drawn, we would probably question what is happening. Mr. Rachal said if Dr. Joiner looked at the Caddo Parish School Board precincts, he would like to know what it would look like if the Board doesn’t continue to put this off and not continue to worry, but that all board members would look at the Best Practices. Dr. Joiner said the only thing is it must pass the Department of Justice and be within 5% plus or minus population deviation. Mr. Rachal said he believes we need to be forward thinking and not put things off for other generations to address. Mr. Rachal said those on the board must make some tough decisions; and again, he stated he is not necessarily against what the Parish Commission does, but he believes there are some other options.

Ms. Priest said Caddo will have a plan before the end of the year.

Mr. Hooks stated that when he met with Dr. Joiner he was told he would pretty much have the same schools, and asked when did this change and why wasn’t he notified of the change? Dr. Joiner responded that after meeting there were a series of plans brought in at the last minute that had to be voted on, and it was very contentious. The districts 5 and 7 were the centerpiece for that change and when the Commission went with Plan #9, they did not look at schools or School Board members, but at precincts that would fit in a plan they could pass. He explained at the time there was a Plan 9, Plan 10, Plan 10A, Plan 10B and a Citizens Plan; and when they completed reviewing these plans, the Commission removed all the Plan 10 versions and the Citizens Plan and went with Plan 9. Dr. Joiner further explained that the advantage to the School Board is that regardless of what the Commission did, and regardless of what precincts the Commission put in or pulled out, the School Board can restore within reason the schools in District 5 and the configuration as long as the population is within 5% plus or minus, and there is not an issue in District 5 or 7 relative to racial integrity. He said it will work to the board’s advantage and he believes board members will see this when he meets with individuals and it was necessary to get Justice to approve a plan. Mr. Hooks stated he also recalls attempting to contact Dr. Joiner several times to make sure he was still in his district and had his schools. Dr. Joiner explained that it was only one precinct moved from District 5 and District 7, and reminded the board that the Commission ultimately makes the decision to decide on what works for the Commission, not the School Board. Mr. Hooks asked if the School Board did not have Vision 2020 and schools closed, would he have lost the school? Dr. Joiner responded that he can’t answer that question. He said he has the School Board boundaries and the school locations, and he can review it and give an account. But relative to the closing of schools, it did not enter into the Commission’s negotiations.
Mrs. Armstrong asked about the easiest way to contact Dr. Joiner and he responded that his cell number is 347-8407.

Miss Green asked Dr. Joiner how much of the Blanchard area will she gain? Dr. Joiner explained that District 2 gained the new northern annexations, north of Hwy. 1 where it crosses Hwy. 173, precinct 164. She also asked about the likelihood of her keeping the other side of the lake? Dr. Joiner said it depends on what she wants to do and she must talk to her counterpart on the Commission. He also explained there will be reasons for keeping the other side of the lake in the plan, but it is not in the Commission; and as well, there is reason to abandon it if you are looking for a more compact district. Miss Green asked if she keeps the other side of the lake, can she give the new precinct back to District 1? Dr. Joiner said all trades are viable, but if you give something up and someone takes it, they will have to give up a commensurate amount of population, it’s the ripple effect. Ms. Priest asked Miss Green to save her questions specific to her district for when she meets with Dr. Joiner. Mr. Riall stated he will work with anyone.

Ms. Priest asked Dr. Joiner to verify that the redistricting cannot move an incumbent from their precinct. Dr. Joiner said that is correct and you cannot. Ms. Priest stated that wherever a board member resides currently, they will not be able to be drawn out of their district. Dr. Joiner explained that general accepted actions will be important and looked at and questions asked if there are questions. He also stated that there are several options that can be considered. Ms. Priest encouraged board members to communicate with Dr. Joiner whether or not they are pleased with their Commission approved boundary lines; and if not to set up a meeting with him to discuss it further.

ESTABLISH THE AGENDA AND CONSENT AGENDA FOR THE SEPTEMBER 20, 2011 CPSB MEETING

Superintendent Gerald Dawkins highlighted the proposed items for the board’s consideration at the September 20, 2011 CPSB meeting.

Requests for Leaves. Mrs. Bell inquired about a request for leave without pay and does staff know why they are requesting a leave without pay, because she believes some are going to other parishes to work for a year while on this type leave. She stated she believes there is possibly a law that governs this, but do they have to explain to HR why they are taking the leave without pay. Dr. Robinson responded there are specific reasons for taking a leave without pay and that at this time, we do not have any that are requesting the leave so they can work in another district.

Personnel Transactions Reports. Dr. Dawkins explained that a revised Personnel Transactions Report was prepared to correct the list “Retirees Returning to Work” to “Retirees Returning as Substitute Teachers.” He announced that as classes are leveled, decisions will be made over the next 48 to 72 hours as to where there are critical needs. Mrs. Crawley stated that it seems that some of the people are not retired but were laid off and are not what the job descriptions say, but they are actually clerks or secretaries. Dr. Dawkins stated that the District did have retirees that were laid off, but they have decided to work as a substitute. Mrs. Crawley asked if we eliminated a position (clerk or secretary), why are we rehiring them without benefits? Dr. Dawkins responded that the substitute pool is open to anyone to sub teach. Mrs. Crawley said she understands they were laid off from a secretarial or clerk position at the school and now they are being rehired as a substitute. Dr. Dawkins said they were not recalled and they have no job, but maybe some have decided they desire to be a substitute. Mrs. Crawley asked if a position was eliminated and replaced with a substitute? Mr. White responded that some may be serving as a sub, because the regular employee is on leave, etc. Mrs. Crawley shared an example of a school eliminating its clerk position and asked if the District hired someone back to be a clerk or secretary. Mr. White explained that an overage (number over the staffing formula) may have
been at that school and if so a sub would be put in that position. Mrs. Crawley stated her understanding that if she had 20 years experience, she would not be eliminated as an employee; but if her job was eliminated, there are secretaries that were over the staffing formula for a particular school or was this created after the RIF (new secretary positions that are now substitute positions)? Dr. Dawkins and Mr. White responded there were not. Dr. Dawkins also shared an example that if a teacher and an aide were laid off, the person has not been recalled; but they do have the right to sign up to be a sub. Mr. Abrams said he believes one of the reports said “Retirees Return to Work” and this is incorrect, but a revised document was posted. He also believes the question is whether or not the school board laid off persons to come back and work in those positions as a substitute, and the answer is “no.” He said there are secretaries/clerks that are being hired as subs because the one in the permanent position is off due to illness, injury, etc. He also added that these on the RIF list can work as a sub since their position is being held by someone else. With RIF being positions, Mrs. Crawley clarified her understanding that there were no positions RIFFED where a sub has been put in the position? Mr. Abrams said he believes the only exception is the person at The Rutherford House. Mrs. Crawley asked if she can get a good, clean document before the meeting on the 20th?

Mrs. Crawley asked about the 120 days notice for a person’s contract to be renewed and if anyone on the list is passed the 120 days? Dr. Robinson explained that it is taking staff some time to work through the new cycling, but when Mrs. Crawley requested that contract renewals be presented to the board 120 days in advance, staff is working to submit those as close to the 120 day mark as possible, and she hopes there aren’t any that are missing.

**Out of State Travel (General Fund).** Mrs. Crawley noted that she only sees one request and she would like to emphasize again no traveling out of state, and encouraged others to get what they need through the Internet or other local means.

**Bids (Purchasing).** The superintendent announced that this bid is being pulled since it has been determined that a supplier already working with the district can supply these resources for this Safe and Supportive Schools Initiative being funded through a Federal Grant.

**Begin the Process of Renaming a Portion of the Youree Drive Middle School Grounds for Coach Tom Knox.** Mr. Rachal explained he will provide the needed information on Coach Knox with the required Legislation passed during the last session and this action beginning the 90-day process.

**Special Education Interagency Agreements and Contracts.** Ms. Seamster asked staff to share a brief explanation of the services these agencies will provide. The superintendent explained that they provide a variety of services to Caddo’s special education students, and Mrs. Turner explained that these agencies provide counseling support for the students. Ms. Seamster asked staff to explain if a student misses, is out of, school for a certain behavior how does this impact them? Ms. Priest asked that Ms. Seamster get with Mrs. Turner to further explain this item.

**Approval of Job Descriptions (Graduation Coach and TAP Coordinator).** Dr. Dawkins explained that these jobs are funded 100% through the School Improvement Grant (SIG) for a three-year period of time. Mrs. Armstrong inquired about the three-year grant and if at the end of the 3 years will these positions be terminated if the grant stops? Dr. Dawkins explained that these positions will be annual Federal funded positions and each year they will sign a new contract and at the end of the three years, the positions will be eliminated. Mrs. Bell asked the superintendent if he will interview someone from within the system? The superintendent explained that it is an internal posting. Mrs. Crawford asked why there are no middle schools included? Staff responded that this was a competitive application and the schools listed are the ones that applied for the grant.
Mr. Ramsey asked if we are creating two new jobs for three years? Dr. Dawkins explained that the grant requires these two positions. Mr. Ramsey asked when will the grant be completed? Dr. Dawkins explained the grant will expire in three years and there will be annual appointments for three years and at the end of the three-year grant, the positions will go away. Mr. Ramsey asked if retirees will be qualified for these positions? Dr. Dawkins again stated that it currently is an internal advertisement. Ms. Priest clarified for the record that this is a competitive grant and when the grant is over, the jobs are over and the individuals hired in these positions understand that they are signing a one-year contract each year for three years and at the end of three years if we do not get the grant again, the job for these positions is over.

**NCLB/IDEA Combined Grant.** Dr. Dawkins announced this item was pulled last month to allow time for additional information and staff is bringing it back for board approval. Mr. Rachal stated there was a great deal of discussion on this item at the last meeting and he had the opportunity to sit down with administration and further review. He noted the example of all rooms, with the exception of Special Education, being equipped with Smartboards, computers, and projectors and he believes many classrooms already have these things. He also shared his astonishment at the number of regulations placed on grant dollars. He added that after meeting with staff and getting answers, he would like to see a survey go out to all the principals and the money disbursed in a need order. He expressed his appreciation to staff for sitting down with him and providing him with specific information. Mr. Rachal also stated there are a lot of teachers being hired to help alleviate some of the issues with struggling students and staff works hard to put together these grants. He also explained that each of these grants require the principal to put together a group of faculty and parents, along with the principal, to come up with the needs.

Mrs. Crawley asked if any program or equipment has been purchased where staff must travel out of state for training? Mrs. Parker stated that she is not aware of any expenditures for out of state travel. Mrs. Parker also added that a lot of the training is local and there is money in the grant for stipends for teachers attending training. Mrs. Bell reminded board members that some training must be hands on and in some instances, it is not logical for the consultant to bring his business here. Mr. Rachal responded that in the discussion, a lot of the schools are pooling their money to bring in consultants for appropriate hands-on training.

Mr. Riall asked about travel related to professional development and if this item is specific enough for it to be associated with travel for this grant and staff responded that it is paid for out of the grant.

**Request to Hear Appeal in Accordance with CPSB Policy GBCB-R.** Reggie Abrams stated that this is a request to appeal to the board a retaliation claim; and in accordance with board policy, the board will vote to grant the appeal or take other action. Information will be sent to the board for consideration under confidential cover. Mrs. Bell asked Mr. Abrams if this information is public or private, because there has been documentation provided that she understood the situation to be private, but it no sooner is put out there that she receives phone calls. She asked Attorney Abrams if the board can be liable for allowing other persons to see documentation under personal cover? Mr. Abrams said if this information is public or private, because there has been documentation provided that she understood the situation to be private, but it no sooner is put out there that she receives phone calls. She asked Attorney Abrams if the board can be liable for allowing other persons to see documentation under personal cover? Mr. Abrams said the board can be liable and since it is confidential, it should not be shared with others. Ms. Priest asked Mr. Abrams what can someone do when Board confidential information is out in the public, what can the board do? Mr. Abrams stated that the board is limited to what it can do; but if it is employee information, the employee can bring action. He added that Board member information deemed confidential, should not be disclosed because it is determined confidential to the Board and not just confidential information for an individual Board member. Mr. Abrams further explained that in general, information that goes to Board members and unless it falls under the privileged category or confidential dealing with an employee matter, it cannot really be confidential because it is information between the superintendent and the board. However, if it is a personnel matter,
these type confidences cannot be disclosed to the public. Ms. Priest asked Mr. Abrams to research this matter further and report back to the Board.

Mr. Rachal asked if he understands correctly that each Board member promises to one another that what’s confidential and privileged is just that and will be treated that way? Mr. Abrams responded that what is attorney-client privilege is different than the agreement that what is between Board members is confidential; and while what you say to someone may be expected to remain confidential, it doesn’t mean that it will remain confidential. Mr. Rachal asked about personnel matters and if he is correct that information must be kept confidential and only in the Board members’ hands? Mr. Abrams responded that is correct.

Mr. Hooks stated he believes this should work both ways because many times the superintendent’s staff doesn’t tell the Board everything and the Board doesn’t find out until arriving for a meeting. He added he believes the trust should go both ways, but it does not.

ADDITIONS

Mr. Rachal requested that his item relative to the Occupational Therapist/Physical Therapist Pay Schedule be placed on the agenda for the September 20th meeting. He said he will meet with the superintendent to discuss and bring a recommendation to the Board.

Mrs. Armstrong asked that an item be added to Readdress the Contractual Relationship with SunGard. She said she believes the district is at an impasse and needs to discontinue this relationship.

CONFIRM THE AGENDA AND CONSENT AGENDA

Ms. Priest announced that the consent agenda will be Items No. 6.02, 6.05, 8.01, and 8.03-8.05. Mr. Riall moved, seconded by Mrs. Bell to approve the proposed agenda and consent agenda for the September 20, 2011 CPSB meeting. Vote on the motion carried unanimously.

POLL AUDIENCE

Jon Glover, employee, stated that she feels like the town crier and no one is listening to her concerns relative to the 19 AU schools. She said that she is not seeing the interest that should be afforded to the students of the inner city and believes very little attention has been given to where the communities can see resolution being offered to offset this travesty. Ms. Glover stated she doesn’t believe the consolidation of schools will address this issue and that no consideration was given to this possibly being a beneficial move to the system and to the students as a whole. She said she believes the message to the students of the inner city is one that says these children’s educational opportunities are not as important as the remainder of the district; and excuses are not needed for why students are in their current status, but resolutions to bring them out of their current status. She noted that there is not time to sit idly by and observe the deterioration of the inner city students, but it is time to take action. She encouraged the Board to put resources where they are needed in an effort to make sure that every Caddo Parish child in the school system has equal access to educational opportunities.

Jackie Lansdale, president of the Caddo Federation of Teachers and Support Personnel, noted the absence of discipline in tonight’s presentations and that discipline in the classroom is key to positive achievement. She also noted that there has not been a Discipline Review Committee meeting in some time and the need to address some items. She announced that the Federation will hold a New Teacher Academy on Saturday and invited Board members to attend. Mrs. Lansdale also asked that as the Board enters its budgetary process that consideration be given to purchasing additional air conditioned buses and adopting a policy on how air conditioned buses
Regarding the confidentiality issues, she questioned an employee’s name being included in a packet when the Board brings tenure charges against an employee and asked the Board to take this into consideration. Mrs. Lansdale also questioned the mislabel of one of the personnel transaction reports, i.e. secretaries in the RIF returning as teachers’ aides and encouraged the Board to consider employee hearings and grievances on dates other than the regular Board meeting dates.

Frederic Washington shared his displeasure with labeling of students and schools and the rhetoric noted in the communities, because it is not rhetoric that there are 19 Caddo schools labeled as Academically Unacceptable, and that the Board is not listening to the people, but it is truth. Mr. Washington said he personally takes offense to this statement, because he has always defended the district, but he doesn’t believe 58% is anything to brag about. He stated that his concern is we do have failing schools and there are individuals that want to break the district apart and he is against that.

**Adjournment.** Mr. Riall moved, seconded by Mrs. Bell, to adjourn. Vote on the motion to adjourn carried and the meeting adjourned at approximately 7:55 p.m.
September 20 2011

The Caddo Parish School Board (CPSB) met in regular session in its office at 1961 Midway, Shreveport, Louisiana at approximately 4:30 p.m. on Tuesday, September 20, 2011 with President Lillian Priest presiding and the following school board members present being a quorum: Steve Riall, Jasmine Green, Debra Seamster, Charlotte Crawley, Curtis Hooks, Mary Trammel, Bonita Crawford, Barry Rachal, Larry Ramsey, Ginger Armstrong and Dottie Bell. Also present were Superintendent Gerald Dawkins and Legal Counsel Reginald Abrams. Mrs. Bell led the prayer and Pledge of Allegiance.

Mrs. Bell moved, seconded by Mr. Riall, for approval of the minutes of the August 16, 2011, August 23, 2011 and September 6, 2011 CPSB meetings as submitted in the mailout. Vote on the motion carried with Mrs. Crawford absent for the vote.

PRESENTATIONS AND RECOGNITIONS

BESE Update. Walter Lee, District 4 Board of Elementary and Secondary Education representative and superintendent of DeSoto Parish Schools, shared with the board the many changes being seen in education. With the big movement in education being reform, Mr. Lee stated that he is convinced it is here, it is happening and it will not go back to the way it used to be. He said this is a nationwide, statewide movement, thus there is no choice for it to also occur locally. Mr. Lee reported that every school system in the state is being affected financially with many in South Louisiana in worse shape than those in North Louisiana and this too will have an effect on reform and the makeup of schools. Regarding MFP, he reported this will be the third year there has been no increase and there will probably not be an increase next year unless the state recovers and is in better shape than it is appearing. At this time, it is believed the MFP will remain the same and “fully funded” as referred to by the State; however, what they are actually doing is shifting and terminating what was state supported assistance to local school systems to pick up the cost. He added the emphasis now is for the money to follow the child and the State is beginning to mandate that local schools systems account for every MFP dollar the district receives, noting they also want to see the part of MFP money for Special Education spent on Special Education and the district verifying it, as well as for vocational education. Mr. Lee stated that the State is losing site that MFP was a funding mechanism for getting the dollars from the State to the local districts and now attention is being given to the money following the child, with a lot of emphasis on school based budgeting. This will mean that the money will be allocated to the school and the school will take the money and decide how it will be used, which could ultimately lead to no longer having a system. He encouraged the Board to work closely with Legislative Delegation members.

Mr. Lee also reminded the Board that beginning in October every school will receive a letter grade, including the school systems; and he believes this too will be disappointing to many people as most citizens agree that education needs to be more effective and most parents feel schools need to do a better job even though most are pleased with their schools. He stated he believes how well the child performs in school is based a great deal on what a child brings to school with them; however, letter grades will not reveal that but how effective the school is which will put most school systems on the defensive. Mr. Lee also shared that the School Performance cutoff scores are increasing with the new cutoff score being 75; and if any school performs below 75, it will be declared academically unacceptable. While he knows Caddo is addressing schools in AU status, he reminded the Board that there probably will be greater emphasis and priority on how the money is spent.
Regarding Act 54, teacher evaluation law, is in effect and it is being piloted in approximately 20 schools systems this year with it becoming statewide next year. He announced there is a committee meeting now and they are struggling with how to define teacher evaluation and they will present a recommendation on this issue and how it should be implemented in the coming school year. He explained there is a lot of concern about school performance or value added counting for 50% of the teacher evaluation, which will not be easy to define or implement. Mr. Lee encouraged the Board to consider all of the things mentioned in relation to “Choice” because that is what he sees coming, i.e. charter schools, virtual schools and what is becoming more popular nationwide.

Mr. Lee announced that the Governor has now made it known who he desires to be the next State Superintendent; and at this time, there is no compromise on who that will be and why he believes there is interest in the election of BESE members. Additionally, Mr. Lee reported that he sees the upcoming session of the Legislature addressing teacher tenure, as well as pay for performance, retirement plan (for current employees and future employees), and possibly more pointed legislation directed to school boards. He encouraged Board members to stay in touch with its Legislative Delegation and testify at committee meetings.

Mr. Hooks expressed his appreciation to Mr. Lee for confirming what he has been telling the Board a long time and that the Caddo Parish School Board is going to cease from being. This is something that he has been hearing since he has been going to Baton Rouge and that is the CPSB will be a thing of the past. Mr. Lee responded that he didn’t say it quite that way.

Mrs. Crawford asked Mr. Lee if he plans to support the Governor’s choice, Mr. White, for State Superintendent of Education? Mr. Lee said he has openly stated that to date the board has 7 votes and if they do get the 7 votes, he will be the 8th vote to vote in favor of. Mr. Lee said he will not vote for Mr. White if there are only 6 votes; if there are only six votes, he does not believe it will come up for a vote. Mr. Lee further commented that his opinion in this matter is we have people in Louisiana that can do this job and do it well; however, it was made clear to him that this will not be. Mrs. Crawford asked if voting no would not show that he still believes this no matter how many votes there are in favor of him. From information learned on the Internet, she stated her hope that Mr. Lee would vote NO and not even be the seventh vote. Mr. Lee further stated he believes the education family prefers a Louisiana person, and he doesn’t believe digging your heels in and remaining firm will not hurt the Caddo Parish Board. Mr. Lee said if we can’t have a Louisiana Superintendent then he prefers to have a strong partner that will be more accessible to the education family. Even though he could do what Mrs. Crawford is asking he doesn’t see it as a way of improving education. Mrs. Crawford encouraged Mr. Lee to become more pro-active, pro-board and asked if there is something the board can do to help Governor Jindal understand our opposition to some of the things he is trying to get through the Legislature. Mr. Lee asked Mrs. Crawford if she believes that Governor Jindal does understand and she responded that her personal opinion is she believes he understands; however, he doesn’t care. Mr. Lee stated that all indications are that a majority of the public is not happy with the results of public education; and he feels he is using that. Mr. Lee referenced that he has always been called a change agent, a radical, a non educator, founder of the magnet schools, and he believes all schools should be a school of choice, and parents need the right to send their children to their school of choice. He encouraged the Board to consider and push for Choice.

Mrs. Armstrong referenced the MFP money following the child and her problem when the State offers additional money from the State or local funding to match or follow the child. She asked if there is anything the Board can do to recoup or stop this from happening, because she believes MFP is one thing, but public education does not have opportunity to have the additional money. Mr. Lee shared his agreement and that he has consistently voted against taking local dollars and giving it to the State charter schools or private companies. Even though he believes it could be illegal, he has not won that argument but he hasn’t seen any school board members in Baton
Rouge voicing opposition. He did state that the school board association was in attendance, but did not say anything; and at this time, Mr. Lee said the only way districts can address it is file a lawsuit, because he believes the voters in Caddo Parish voted local taxes for local use, he doesn’t believe anyone can legally take this money, but will as long as they can. At this time, Mr. Lee said he believes this is in the school board’s court and should ask the board’s attorney if the District has an attorney.

Mrs. Bell shared her opinion that it doesn’t matter how many yes votes there are for an issue brought for a vote, because if she is opposed to something, she will not support it even if she is the only one. She said she also believes it will take a lot for all the boards across the nation to fold, because every child cannot attend a charter or private school. Relative to the policies, Mrs. Bell asked were these not approved by BESE? Mr. Lee explained that BESE’s job is to implement laws passed by the Legislature. Mrs. Bell asked if since the BESE members are elected by the voters, can’t BESE members say the charter schools cannot receive more money per child than the public schools are receiving? She asked Mr. Lee who voted for the end of course test in the ninth grade being done on the computer? Mr. Lee said it was law and BESE was charged with determining how to develop policy and implement the law. Mrs. Bell said she knows there is an Education Committee and board members have traveled to appear before them. She said she will never give up on public schools and in looking at Value Added, End of Course Test, MFP, and she thought it BESE would fight for these things and go back to the Legislature. Mr. Lee clarified that the State Board of Education does not have that authority. Mrs. Bell asked Mr. Lee for clarification on who the local school board should contact regarding the MFP funds and he responded that the amount is determined by the Legislature and comes from the Governor’s office. Mrs. Bell encouraged Mr. Lee to fight to the end even if there are six votes so the people will know where he stands. Mr. Lee stated he respects the way Mrs. Bell feels and understands she must vote what she believes is best for the students of Caddo Parish, because he has that same responsibility at the State level and is what he will do.

Mr. Rachal recognized the many years of service Mr. Lee has in education and encouraged him to not vote on something just because it will win or lose; but if he is not for Mr. White, don’t vote for him. Mr. Lee stated that if anyone will look at his BESE voting record they will see that traditionally he is on the side that is 5 votes, which says he is not just voting what is popular and he must decide what is best for the State and the best way to get there. He added if one way does not get you where you need to be, then it is important to find another way, which is what he does and will always vote for what is best for the children in Louisiana and to move forward. He also stated he can stick his head in the sand, but all that will ultimately do is help eliminate public education as we know it and he doesn’t believe that is progress. Mr. Rachal asked if the Legislature ever approaches BESE for advice on education matters? Mr. Lee said rarely and when they do, it is usually to support a piece of legislation. Mr. Rachal feels it is important that the public is aware of the procedures followed with the Legislature passing laws and then asking BESE to put them in policy and implement them. To him, Mr. Rachal said he believes BESE members should be involved before legislation is proposed. Mr. Rachal presented the following questions for Mr. Lee and asked that some type of communication be established between him and the board for staying current on these matters. The questions are: Is the RSD going to continue and if so, how much longer? Mr. Lee responded it will continue as long as the reformers want it. Mr. Rachal asked about funding for the RSD schools and the huge issue where they are funded one way and the public schools another, i.e. students in RSD being provided with laptops and Caddo cannot provide each of its 43,000 students with laptops because of the many unfunded mandates that continue to come to the district? He asked where does the other money go for the students in a Virtual School? Mr. Lee said the contractor, private business, gets 90% of the total cost to educate a child yet they have no cost for buildings, personnel, etc. Mr. Rachal asked if it is possible that BESE can allow the local school districts to also have Virtual Schools? Mr. Lee stated that only two have been approved, but any school system can set up its own Virtual School approved by the local board and obtaining a code from
the State Department. Mr. Rachal asked Mr. Lee if he is saying he believes local school districts should get involved in Virtual Schools? Mr. Lee responded that Rapides Parish is doing this, and he would support every school in his district being a school of choice. Mr. Rachal stated that he does not have a problem with school of choice when it works with the money following the student; however, it’s when the State Department then applies different rules to the public education system and the local school system doesn’t have a choice. He noted the problem of a charter school deciding it no longer wants one of its students, and the local district doesn’t have a choice whether or not it will accept these students. Mr. Lee challenged the board to inform the public that with all of the money going to the providers of education outside the school system, he believes the public will reach a point to where they will not renew or pass additional taxes if the school board is not in charge of the schools and how the money is spent, then the question would be to the reformers as to how they will fund their schools. Mr. Rachal asked Mr. Lee if he supports letter grades for the schools? Mr. Lee responded that he opposed it all the way; and he would like to see this modified to at least an explanation given at the time the scores are released so the public understands that the letter grade does not reflect just how well the individual school is doing. Mr. Rachal shared how he believes the recent change in the grading scale will cripple our students when competing with students across the country. Mr. Lee explained it is the Legislature that passed a law stating there would be letter grades and BESE determined the cut off; and he didn’t agree with BESE’s conclusion. Mr. Rachal stated that he believes the local school board needs to determine with Mr. Lee how to best stay informed so the board can express its support or notify Mr. Lee as to how Caddo feels about issues. Mr. Lee reminded the board that it has a representative on staff that attends the meetings and knows what the agenda will address, but BESE does not always know when something will come for a vote.

Mrs. Crawley asked about Value Added and the teacher evaluation and she doesn’t believe teachers would be opposed to these if they thought it would be fair and accurate, giving the students a test when they walked in the door and another at the end of their class. She also referenced merit pay and those teachers who are National Certified yet the State is not paying it and mandating the local school districts to pay it. Mr. Lee responded that the local school districts should not pay this but the State should. She also stressed there is no way to take human error into account when testing. Mrs. Crawley said she believes this is setting up a district to be in the same situation as Atlanta where there was much cheating. She added that a no vote does speak loudly.

Ms. Seamster asked Mr. Lee about understanding of the Legislative process and if BESE offers legislation? Mr. Lee said it could, but they rarely do so. Ms. Seamster asked if the letter grades come from BESE? Mr. Lee explained that any member of the Legislature can introduce any bill they want for consideration. Every bill must be approved four times, the House Education Committee, the House, the Senate Education Committee and the Senate. If it fails to pass any of these four approvals, it fails. Ms. Seamster asked if, when a bill enters into the process, board members are contacted? Mr. Lee said they may not be contacted personally; but they are posted and the staff is aware of these postings. Ms. Seamster asked Mr. Lee could BESE recommend changes to Legislators or to the State Superintendent? Mr. Lee said BESE is responsible for appointing a State Superintendent in addition to approving graduation requirements and policies affecting the local school systems as a result of laws passed, as well as the MFP amount to be distributed to the local school systems. Ms. Seamster clarified that anyone can go to their legislator and request that something be changed, and Mr. Lee verified that is correct and is how most legislation is affected. Ms. Seamster stated that she too believes choice is good and she believes most parents would choose to send their children to their neighborhood school, but we must have equality with choice. Mr. Lee reminded the board that equity is the responsibility of the local school boards.

Ms. Priest expressed appreciation to Mr. Lee for addressing the board today and responding to concerns and questions. Mr. Lee stated his appreciation for local school boards and the tough
decisions they must make and encouraged all to seek ways that we can reach all students so those who think they have answers, but no responsibility, are not effective.

**Recognitions.** Dr. Mary Nash-Robinson, on behalf of the board and superintendent, recognized the following students/employees. The board president presented each with a certificate recognizing their accomplishment. Administrators, family and friends were also recognized.

**Louisiana History Teacher of the Year.** Dr. Mary Nash-Robinson recognized Stacy Erwin, KTBS One Class at a Time $1,000 Classroom Grant Recipient, Kevin Kingdom, Ridgewood Eden Gardens, as Louisiana’s History Teacher of the Year. Middle School Science teacher, was recognized for receiving KTBS Channel 3’s One Class at a Time $1,000 Classroom Grant. Mr. Kingdom will use the $1,000 to purchase renewal energy education kits (solar panels) for his science lab class.

**School Health Award.** Renea Tolbert, Vivian Elementary-Middle School, was recognized for receiving the school health award honorable mention for the 2010-11 school year and was presented to the school in Baton Rouge on September 14th. This award recognizes activities around the state that promote opportunities for students to develop life-long healthy eating and physical activity habits.

**Newly Appointed Administrators.** Dr. Robinson recognized the following newly appointed administrators: (1) Angela Douglas, principal, Forest Hill Elementary; (2) Tangelia Nelson, principal, Lakeshore Elementary; (3) Deborah Blanchette, assistant principal, Oil City Elementary-Middle; (4) Karura Rainey, assistant principal, Woodlawn Leadership Academy; (5) Pauline Harris-White, assistant principal, Huntington High School; (6) Keith Burton, principal, Caddo Middle Magnet; (7) Lynette Hampton Gibson, assistant principal, Ridgewood Middle; (8) Brandy Holcomb, assistant principal, Forest Hill Elementary; and (9) Kathy Gallant, director, Staff Development/Grants.

**VISITORS**

Cheryl Thibodeaux, co-chair, announced and invited board members to attend the Louisiana Branch of the International Dyslexia Association’s Conference at Broadmoor Middle Lab on October 1st. She also expressed appreciation to staff who helped in the planning and promotion of this conference on the District’s web site.

Jackie Lansdale, Caddo Federation of Teachers/Support Personnel, shared her disagreement with comments by the BESE representative that the public is turned off with public education. She also addressed tenets of good government, i.e. accountable, transparent, responsive, communication, effective; have a rule of law; and if you don’t have these, you begin to have a breach of trust with those served and this translates into corruption or the perception of corruption. While she is in no way saying anyone is corrupt, she believes everyone needs to be upfront and clear on areas such as inequity in enforcing attendance, closing of AU schools, the reassignment of employees, the need to tell the Filipino teachers if the district is going to sponsor their visas, school bus routes and the need for a policy regarding who gets routes and how, as well air-conditioned buses assigned for the long routes. She also noted that substitutes are being placed in classrooms when retirees could be used. She asked that these things be addressed.

**ESTABLISH THE AGENDA AND PROPOSED CONSENT AGENDA**

Dr. Mary Nash-Robinson presented the proposed agenda for the board’s consideration. President Priest announced that items 6.01-6.05, 8.01-8.04, 8.06 and 8.08 are the consent agenda. Items postponed included OT/PT Pay Schedule and Readdress Contractual Relationship with SunGard. Mr. Rachal provided backup information for beginning the process to rename a portion of the
Youree Drive Middle School grounds for Coach Knox. Mrs. Armstrong also stated for the record she is postponing her item on the contractual relationship with SunGard to allow them additional time to work with the superintendent and staff and honor the agreement; and if they do not, she will bring it back for possible litigation. Mr. Riall moved, seconded by Mr. Hooks, approval of the agenda and consent agenda for the September 20, 2011 CPSB meeting. Vote on the motion carried unanimously. The following is a summary of the board’s action on consent agenda items.

**Item No. 6**

**6.01 Personnel Recommendations.** The board approved the following personnel recommendations as recommended by the superintendent and submitted in the mailout: (1) Mary J. Harris, principal, South Highlands Elementary Magnet; (2) Rosalind Glover-Bryant, supervisor-Title 1 Compliance-Parent/Community Involvement; (3) Amanda Mosley-Blackford, assistant principal of administration, Hamilton Terrace Learning Center; and (4) staffing of vacant positions in critical shortage areas with return-to-work retirees.

**6.02 Requests for Leaves.** The board approved the following requests for leaves (certified and classified) as recommended by the superintendent and included in the mailout.

**Certified**

- Leave Without Pay, August 16, 2011-October 26, 2011
  Shaneka Harvey, Teacher, North Highlands, 10.5 years
- Sabbatical Leave (Study), January 17, 2012 – May 31, 2012
  Kelly Jagot, Teacher, Fairfield Elementary, 9 years

** Classified**

- Catastrophic Leave, September 12, 2011-October 25, 2011
  Lesa Bowlin, Bus Driver, Transportation, 10 years

**6.03 Other Personnel Transactions Reports.** The board approved Personnel Transactions Reports for the period of July 21, 2011 – August 20, 2011 as submitted in the mailout.

**6.04 Renewal of Promotional or Administrative Appointment Contracts.** The board approved the renewal of administrative contracts for the following administrators as recommended by the superintendent and submitted in the mailout: Janet Holliday, Mattie Bell, Phillip Givens, Betty Johnson and Allison Hammond.

**6.05 Out of State Travel (General Fund).** The board approved requests for out of state travel (General Fund) as submitted in the mailout and recommended by the superintendent.

**Item No. 8**

**8.01 Approval of Renaming the Professional Development Center the Wanda L. Gunn Professional Development Center.** The board approved renaming the Professional Development Center the Wanda L. Gunn Professional Development Center.

**8.02 Begin the Process of Renaming a Portion of the Youree Drive Middle School Grounds for Coach Tom Knox.** The board authorized staff to begin the process for renaming a portion of the Youree Drive Middle School grounds for Coach Tom Knox.

**8.03 Special Education Interagency Agreements and Contracts.** The board approved the special education interagency agreements and contracts as submitted by staff in the mailout.
8.04 Approval of Job Descriptions (Graduation Coach and TAP Coordinator). The board approved the job descriptions for Graduation Coach and TAP coordinator as recommended by the superintendent and submitted in the mailout.

8.06 NCLB/IDEA Combined Grant. The board approved the NCLB/IDEA combined grant as recommended by staff and submitted in the mailout.

8.08 Recommendation of Termination of Probationary Teacher. The board approved the superintendent’s recommendation for termination of a probationary teacher as submitted in the mailout.

REQUEST TO HEAR APPEAL IN ACCORDANCE WITH CPSB POLICY GBCB-R

Mr. Ramsey moved, seconded by Mrs. Trammel, to note in the record the employee’s claim of retaliation and to require the superintendent or the superintendent’s designee to monitor and make sure no retaliation occurs against the employee in the future. Mrs. Crawley asked if there will be a hearing and Ms. Priest explained it means there will not be a hearing. Vote on the motion carried unanimously.

OT/PT PAY SCHEDULE

Mr. Rachal explained he pulled this item and asked staff to provide the dollar amount for returning the 12-month OT/PTs to the original salary configuration as was done for the 9-month OT/PTs. He will bring this item back when information on the impact on the budget is provided.

APPROVAL OF TITLE I JOB DESCRIPTION (BUDGET COORDINATOR/ ADMINISTRATIVE ASSISTANT TO TITLE I DIRECTOR)

Mrs. Bell moved, seconded by Mrs. Crawford, to approve the Title I job description for budget coordinator/administrative assistant to the Title I Director, as submitted in the mailout. Mrs. Bell clarified that she supports approval of this job description since it is not a new job but is a position no longer funded by the General Fund but by Title I funds. Mrs. Crawford reiterated her support because it is a change in the job description and is funded by Title I. Mr. Rachal asked if there is a change in the grade and pay scale and Mr. Lee responded there is no change and is only being done so that this position can be moved from the General Fund to the Title I fund. Vote on the motion carried unanimously.

SUPERINTENDENT’S REPORT

Dr. Mary Nash-Robinson, on behalf of the superintendent, encouraged board members to attend the United Way kick-off breakfast at East Ridge, 7:30 a.m., Friday, September 23rd. Board members were also invited to attend a reception honoring Dr. Sara Ebarb for her 28 years in Caddo Parish and congratulating her on her new assignment as superintendent of Sabine Parish Public Schools on Thursday, September 29th from 3:30-5:30 p.m. in the board room. Dr. Ebarb expressed her appreciation to Caddo for the opportunities afforded her during her tenure with Caddo Parish Schools and the experience she takes with her that she knows will help her make good decisions in the future. Dr. Robinson also announced that Eden Gardens Elementary Magnet School was recently recognized as a Blue Ribbon School of Excellence.

ANNOUNCEMENTS AND REQUESTS

Board member Hooks, Trammel, Crawley, Bell, Armstrong, Green, Priest and Ramsey extended their congratulations to Dr. Sara Ebarb on being named superintendent in Sabine Parish and
expressed appreciation for the outstanding job she has done for the past 28 years in serving the students in Caddo Parish.

Mr. Hooks asked why he has not received answers to his requests and stated he would like to get this information.

Mrs. Crawley asked that staff provide her with a list of all classes that have long-term or permanent substitutes and also that consideration be given to closing the Central Office cafeteria and that staff provide information on the cost and funding source for the cafeteria.

Miss Green expressed appreciation to Mr. Woolfolk and Mr. Jones for assisting her in resolving a bus issue.

**Adjournment.** Mr. Riall moved, seconded by Miss Green, to adjourn. Vote on the motion to adjourn carried and the meeting adjourned at approximately 6:28 p.m.
The Executive Committee of the Caddo Parish School Board (CPSB) met in regular session in its office at 1961 Midway Street, Shreveport, Louisiana, at approximately 4:30 p.m. on Tuesday, October 4, 2011 with President Lillian Priest presiding and Steve Riall and Dottie Bell present being a quorum. Other school board members present were Jasmine Green, Debra Seamster, Charlotte Crawley, Curtis Hooks, Mary Trammel, Bonita Crawford, Barry Rachal, Larry Ramsey, and Ginger Armstrong. Also present were Secretary Gerald Dawkins, Legal Counsel Reginald Abrams, staff and other visitors. Mrs. Bell led the invocation and Pledge of Allegiance.

PRESENTATIONS

Superintendent Dawkins shared with the board information on the release of letter grades on Wednesday and reminded the board that in December 2010, BESE set the standards for earning letter grades replacing the “star” system. Information in summary data will be sent to the board once it is received. Principals will also send letters home to parents indicating the specific grade their school will receive, as well as impressing upon the staff that this grade does not reflect the hard work and uniqueness of each of Caddo’s schools.

Sci-Port. Representatives from Sci-Port shared an opportunity for Sci-Port to bring in a traveling exhibit called Bodies Revealed. It was stated that they desire to cover this exhibition in an appropriate and beneficial manner for all the students since it is an exhibition of real human bodies that are preserved and meticulously dissected to reveal different parts of the human anatomy. The exhibit will open January 28th and will run through the end of May. School programs have been organized, i.e. free teacher workshops including special workshops to enhance the educational information as well as how teachers can take it back to the classroom, special speakers from LSUHSC, a special medical careers, etc. It was explained that Sci-Port worked very hard to get the lowest admission rate possible for the public and for the students, and children’s tickets are $9.00 and it covers an hour class in the Bodies Revealed exhibit and entrance into Sci-Port with teachers getting in free. Regarding questions on the exhibit, it was reported that the specimens are anatomically correct and there is nothing overly emphasized, even though nothing is left out. It was also reported that families donated the bodies specifically for education and public display.

Ms. Priest shared that she serves on the Sci-Port Board and had the opportunity to view the proposal as it relates to the exhibits and she believes it to be very beneficial especially to students interested in entering a field in science, forensics, kinesiology, etc.

2011-12 Corrective Action Plan. Dr. Dawkins reminded the board that the CAP has been in place for approximately three years and while we do see progress toward being able to exit this plan, there are some areas that staff continues to work on. Pam Barker, director of special education, shared a recap of the 2007 settlement agreement, specific schools targeted that are still receiving support, and additional supports from a special education standpoint. Ms. Barker stated that in 2006, Southern Poverty Law Center, an advocacy group out of New Orleans, filed a lawsuit on behalf of specific students in Caddo Parish; students classified with an exceptionality of ED (emotionally disturbed), citing issues of non compliance. When the State Department received this information, they began to investigate and an initial on-site monitoring was conducted in November 2007. The Department of Education required that an independent counsel or consultant be put into place to address the focused monitoring report and issues of non-compliance, and develop a corrective action plan. Ms. Barker explained that some of the issues addressed in 2007-08 that began the corrective action plan process had to do with FAPE (Free and Appropriate Public Education) and they looked at IEPs and documentation as well as Behavior Intervention Plans, Manifestation Determination Process, and other issues dealing with...
the disciplinary process that occurs when a student with a disability is suspended or there is a
disciplinary infraction (i.e. discipline procedures, documented evidence, documentation of
progress for all students with disabilities). She reported that the need for increased parental
involvement was addressed from the area of working with parents and students through the IEP
process, appropriate related services such as counseling, occupational therapy, physical therapy,
and speech services. Also, increased access to LRE (least restrictive environment), giving
students with disabilities access to the general education setting and curriculum whenever
possible and when it is not, documented by staff as to why it is not. Ms. Barker reported that in
2008, the Department of Education met with Caddo regarding references on other consulting
firms and the firm that Dr. March is with was hired. In May, implementation and design of the
corrective action plan began and roles and responsibilities were identified. The first CAP was
developed and submitted in July, 2008, and each year following, to the State Department for
approval. The agreements of this initial plan were to increase the duration of counseling as it is a
related service, which means the social workers, school psychologists, and other mental health
providers must provide 60 minutes of related service as a counseling part of the IEP and
document it on the IEP. She explained that in addition to discipline, there was also a need for
district-wide professional development. Ms. Barker also explained a specific part of the original
CAP was the district purchasing and implementing a student data management system (JPAMs).
The PBIS (Positive Behavior Intervention Support) coincided with what the State determined
was required for all districts and was also implemented as a part of the CAP and included all the
special ed pupil appraisal staff, teachers, paraprofessionals, and any other person who might have
disciplinary procedures responsibilities. Specific strategies and objectives for significantly
reducing the number of suspensions and expulsions of all students, especially those classified
with a disability, are what continues today to be one of the largest areas addressed in the
Corrective Action Plan.

Ms. Barker said this is a highlight of the educational benefits with students with disabilities and
exceptionalities and how often and how long students are removed from the classroom for longer
than 10 days and placed at an alternative campus and what continued educational opportunities
are being offered to these students, i.e. remediation opportunities. She explained that each of the
CAPs have addressed each of the six major goals and the 2011-12 CAP is no different. She also
explained that each one of the goals has been approved by the Department of Education and each
one aligned with the original NSA (Negotiated Settlement Agreement). The goals include (1)
Communicate the NSA to the school board community and each administrator has completed
and turned in this documentation; (2) Parents and Parental Advisory Board and establish CAP
leadership team; (3) Implementation and strategies of PBIS and what is being done to support
staffs and students in the school; (4) Educational Services and Benefits documented and
provided to students based on their need; (5) Individual Remedies to Address All Areas of Non-
Compliance identified in the monitoring report and continue to insure that those areas are being
addressed; and annual review of IEPs to ensure if students with disabilities are removed for more
than 10 days that the services are continued; and (6) implementation and maintenance
monitoring and ongoing improvement of the CAP to ensure that Best Practices and progress
continue and is documented accurately. The Parental Advisory Board also convenes quarterly to
address information relative to the CAP.

Ms. Barker also shared with the board that since 2007-08 the overall suspension rate has
improved from over 33% the first year to 26% the next year, and 16.32% this past year. She
explained that the State has the data and the research that a school district should be below an
average of 15% and Caddo is close to where it needs to be. For the upcoming year, schools in
need of additional support have been identified and the special education staff is working to
develop an active CAP within the school to assist them in utilizing their data, where the
suspensions are occurring and determine what specific intervention strategies are in place or can
be put into place to help them; and Ms. Barker highlighted some of the schools’ specific statistics
Ms. Barker reported that one of the next steps will be to maintain and establish PBIS teams for pre-intervention support. They will also determine if intensive and academic behavior support for students with disabilities is needed as well as for regular at-risk students. In looking at the district policies for monitoring suspensions and developing pro-active strategies, staff looks at what is being done specifically and proactively to help these students. She also highlighted the proposed budget and explained that she included in the budget a percentage of the Corrective Action Plan in stimulus money which expired September 30th, thus all the services provided up to September 30th were from the stimulus funds and the remaining CAP amount will come from the IDEA budget, a total of $612,000.

Mr. Hooks asked Ms. Barker what was the driving factor for getting the suspension rate so low in 2011? Ms. Barker stated that it was a collaborative effort with the site-based behavior intervention specialists under Dr. Barzanna White, the school staffs working in conjunction with the behavior intervention specialists as well as special education staff, school psychologists, social workers, educational diagnosticians, instructional specialists looking at the individual school suspension data and developing interventions that target the areas of need. She also explained that she believes that everyone being focused on how we can best serve students is also an important factor. Mr. Hooks commended Ms. Barker and the Special Education Department for the outstanding job they are doing.

Mrs. Crawley asked Ms. Barker about the suspension rates (10%, 15%, 20%) and can she differentiate between students who are repeatedly suspended versus if it is different students every time being suspended? Ms. Barker said absolutely and they look at the school’s corrective action plan and the patterns of removals, the specific students, the timeframe of removals, and the actual infractions and why. Mrs. Crawley asked if the board can know by looking at the numbers provided if it is 20% of the body or is it the same people? Ms. Barker responded that it is cumulative. Mrs. Crawley asked if 5% could be getting 20% of the suspensions? Ms. Barker responded that is correct. Mrs. Crawley added that of all the schools in the district, Byrd may have a high suspension rate, but she never hears anyone say they are afraid to go into Byrd or that the kids are running the school. She also stated that it is important that we do not lose sight of good school behavior and work with the parent, the student, the teacher, and the principal so that students that show up are behaving. Mrs. Crawley asked if students are ever transferred from one school to another? Ms. Barker said they are and her staff tracks specific student data so when looking at individual schools, they are looking at specific student data.

Mr. Rachal asked if the percentage is a number from the student population or from the total number of suspensions? Ms. Barker clarified that it is the number of students (student population) suspended at least one or more days, and it could be the same student over and over again. Mr. Rachal asked if it is correct that for a school to be removed from the CAP, the percentage must be at the National average of 13.3%? Ms. Barker said that is not correct and that it is an overall 10%, 15% or 20% based on whether it is elementary, middle or high school. Mr. Rachal asked about the reference to 13.3% and Ms. Barker explained that is the National average; however, because we have such large schools, we look at 10% for elementary, 15% for middle, and secondary schools at 20%. Mr. Rachal also asked about parental requirements in this process? Ms. Barker responded there is nothing formally written in the Corrective Action Plan. Mr. Rachal asked would this not be relevant and helpful and Ms. Barker said it probably would; however, the constraints of the Corrective Action Plan were part of the negotiated settlement agreement that Southern Poverty Law Center made with the State Department of Education. She further explained that activities have changed throughout the course of the CAP each year, but the main goals were a part of the negotiated settlement agreement and cannot be changed. Mr. Rachal asked if that is not something we could add and Ms. Barker verified we
can. Mr. Abrams explained that the district’s goal is to get out from under this plan this year; and if we put this in the plan and can’t figure out a way to get parents to come to these meetings, it will become a goal that they say we did not meet. While it sounds good, Mr. Abrams said we do not want anything added that will keep us from getting out from under this plan. Dr. Dawkins added that he believes discussion around parents helping can occur in the Parental Advisory Committee meetings and may need to be a part of the settlement. Ms. Barker stated that part of the process of providing the interventions and supports through the IEP process requires parental involvement and requires three notices to invite the parent to attend. Staff is monitoring this and encouraging parents to come to the table and be a part of the process. Ms. Barker said that the board members are invited to be a part of the parental advisory committee and should receive copies of meeting notifications. In November, Ms. Barker announced a Parent Resource Day will be scheduled for a Saturday and outside agencies brought in to help present information on outside sources that will help students. Mr. Rachal recognized that out-of-school suspensions have dropped 50% in four years and he believes this is incredible. Ms. Barker added that progress has been made, but there is still progress to be made; and once the CAP is gone, it is important for students that these Best Practices remain in place with fidelity. Mr. Rachal suggested that the superintendent ask the school principals their thoughts on this program.

Mrs. Bell asked staff to explain the cumulative number listed, i.e. for Huntington High School? Ms. Barker explained that the cumulative means that throughout the school year students are either dropped or added so at any point in time if anyone looked at the total number, the cumulative would be the larger number; the mobility was that 40% of the initial enrollment transferred in or out. Mrs. Bell asked about the October 1st enrollment listed and Ms. Barker responded that is their SPED enrollment as of October 1, 2010, which was 9.8% of the enrollment. She also further explained the breakdown of numbers provided per school – the percent of SPED students suspended one or more days with out of school suspension, the number of site monitoring visits by Dr. March and his team of consultants to provide intensive support and talk about what is being done for the students (academic and behavioral). Mrs. Bell also asked about the 100 SPED students and does this number include Gifted and Talented students? Ms. Barker said no and that the 100 only includes students with disabilities. Mrs. Bell asked if the 100 SPED students were tested with the regular education students, and Ms. Barker responded that is correct. Mrs. Bell said she wants people to understand that these numbers are calculated with the regular education students and asked if it is possible to separate these scores? Ms. Barker explained that they cannot and in the AU reports there are sub group reports that break down the scores for students with disabilities. Mrs. Bell asked Superintendent Dawkins if the board can receive the new enrollment broken down to indicate special education students.

Miss Green asked about the reference to 2008 and if that is when this program began and Ms. Barker clarified that is when it began. Miss Green asked if there is a major difference between 2008 and now? Ms. Barker explained that with the CAP, the same six primary goals are in place and the only major difference is the activities submitted each day.

Mr. Hooks again reiterated how all schools went in with autism in regular education even though it was not used as a crutch. He encouraged the board to be mindful of the increase in scores during this time and that everyone is the same.

Dr. Dawkins expressed his appreciation for the staff team that works very hard in this area.

Financial Update. Jim Lee, director of finance, shared with the board an update on the district’s financial status. He presented preliminary results for the school year just completed on June 30, 2011, and noted that he uses the word “preliminary” because the outside auditors are still working on finalizing their presentation to the board in November or December. He reminded the board that the original budget staff presented for 2010-11 reflected a deficit spending of $29 million and an undesignated fund balance of approximately $4 million. At this time, the
preliminary results indicate that deficit spending will only be $6.2 million and the undesignated fund balance will be $27 million. Mr. Lee presented a three-year comparison – 2009-10 actual, 2010-11 preliminary and the budget for 2011-12 and highlighted the items in the 2010-11 preliminary column. He added there is still some work to do because the current year budget still reflects deficit spending of $15.9 million, and the superintendent has charged the staff to continue to work in cost cutting efforts to lower this to a balanced budget. Mr. Lee explained that reducing the $29 million deficit spending to $6.2 million is a result of revenue that was not counted on (property tax assessment), sales tax received ($3 million positive variance), MFP mid-year adjustment of $2.2 million and reduced expenditures of almost $5 million because of EduJobs (which was offset by the reduction in MFP from the state), positive staffing variances, utilities. Mr. Lee also reported that results for the 2009-10 and 2010-11 still reflect deficit spending and for 2011-12 the budget is for more than those two years. He explained that the superintendent has met with staff two or three times on next year’s budget as well as anything additional that staff can do to continue cost cutting measures and achieve a balanced budget by the end of the fiscal year.

In working on the current year budget, Mr. Lee reminded the board that one of the biggest items that impacts the budget each year, and especially the past few years, is employee benefits, particularly retirement and health care costs. For the current year, the budget reflects an increase in retirement by $7.6 million and an increase in health care of $4.6 million, both of which we have limited control over.

Ms. Priest thanked Mr. Lee for his report and the importance of the board receiving these updates on a regular basis so that as the budget process begins there will not be anything the board has not been made aware of. She cautioned that we are still financially in the red and anytime when talking about still spending $15.9 million more than what we will receive, it is very important to be extremely careful while also making some very tough decisions for the upcoming budget year. She asked Mr. Lee if the standard for a district the size of Caddo is a fund balance of approximately $17 million or higher? Mr. Lee said that is correct and a general rule of thumb is that a district the size of Caddo should have a minimum fund balance that could cover expenditures for two months, approximately 15-16%. Ms. Priest also asked everyone to look at their own personal checking account and what is in a reserve. Mr. Lee also reminded the board that it should be aware of those revenue items that cannot be counted on from year-to-year, i.e. EduJobs, tax revenue continuing to increase, etc.

Mrs. Crawley asked did the board not pass a motion for a balanced budget for next year to be presented to the board in February? Mr. Lee stated his awareness that staff is to bring information to the board on the budget and Mrs. Crawley stated the information is a balanced budget for the next year. Dr. Dawkins responded that is correct and staff is working on doing that. She also asked about references to subs and if Mr. Lee was referring to subs in the classroom? Mr. Lee responded he is not saying it is a better thing or suggesting that we use subs in the classroom, but only that it is less expensive when we use subs in vacant positions; and when it happens, we have a positive variance. Mrs. Crawley reminded staff that this is not what we want in the classroom, but highly qualified teachers. Mr. Lee said we do not count this in the formula and he is only sharing how we experienced favorable positive variances. Dr. Dawkins said Mr. Lee was only referencing the dollars and cents associated with subs last year.

Mr. Hooks referenced his conversation with the superintendent regarding the approximate 30 teachers in the turn-around program and asked if it is included in this budget. Dr. Dawkins explained that when he had the conversation with Mr. Hooks, the investigation was still in process and further explained that the first year the teachers were given college credit and a stipend and the second year it was college credit; however, that is not a part of this. Mr. Hooks said those teachers were not told this year that they would not be paid and were under the assumption that the second year would be the same as the first. He also said the only difference
Dr. Dawkins announced that staff will be bringing information to the board on a regular basis.

**CPSB Videos.** Dr. Robinson announced that staff is excited to share with the board three brief video clips on the following wonderful things happening in the district: (1) We Care Essay Contest, (2) CHILL (Choose Homework Instead of Losing Lunch) Program at Northwood High School, and (3) Red Apple Awards. Dr. Robinson reported that the We Care Essay Contest began yesterday and schools and students are encouraged to participate. The CHILL Program at Northwood High School encourages students to complete their homework; because if they do not they must give up lunch time with their friends to complete it and it has made a significant difference in students completing their homework before coming to class. The Red Apple Awards are being presented to employees in appreciation for going above and beyond the call of duty.

**Newly Appointed Administrator.** Dr. Robinson introduced Amanda Mosley-Black, assistant principal at Hamilton Terrace, and her family from Magnolia, Arkansas.

**ESTABLISH THE AGENDA AND PROPOSED CONSENT AGENDA FOR THE OCTOBER 18, 2011 CPSB MEETING**

Superintendent Dawkins stated that presenting the Red Apple Awards to employees was a great opportunity for him and he will be asking board members to join him in the future when presenting these awards.

Dr. Dawkins highlighted items for the board’s consideration at its meeting on October 18th and the following discussion ensued.

**Personnel Recommendations.** Mr. Riall inquired if this is a new position or existing position? Dr. Dawkins explained that it is an existing position vacant due to a retirement.

**Requests for Out of State Travel.** Mr. Rachal stated that in review of these requests he noted that one states there is no cost and asked if this person is paying their own way? The superintendent explained that this individual is the incoming president of a National Library Association and the organization will fund the expenditures.

**Bids (Purchasing).** Mr. Hooks asked which schools will receive the new keyboards? Mr. Graham responded that since Dr. Rettelle is out ill, he will need to research and let him know. Mr. Hooks asked which schools will receive the backpacks and supplies? Mr. Graham explained these are for the Homeless Program (Title I) and are assigned by student, not by school.

**Virtual School Services.** Mrs. Crawford stated her understanding that we are looking for an RFP and asked is the Virtual School not something we can do? Dr. Dawkins said Caddo will keep the MFP; however, the services provided from a software application standpoint in content will come from the RFP and will complement what we do. Mr. Rachal referenced discussion on virtual schools when Walter Lee addressed the board; however, he does not understand the $200,000 and what it includes. Rosemary Woodard explained this is the software needed in order to offer enough credits for students to earn a high school diploma virtually, and it is actually more content and professional development and gives us the ability to do all high school content on line. Mr. Rachal asked if there is a copy of the RFP and Mr. Graham responded they were only opened today at 10:30 and staff will conduct a scheduled evaluation on Thursday. Dr. Dawkins responded that staff can provide a copy of the RFP. Mr. Rachal shared his excitement
to hear about this option that may help our students. Mr. Abrams clarified that this is not the RFP but the bid coming back and this item is for approval of the actual bid. Mrs. Bell asked for additional information on Virtual Schools. Ms. Seamster also asked for a copy of the RFP and additional information on Virtual Schools. Mr. Riall asked if a child can enroll in a Virtual School and actually graduate without ever entering a classroom in the parish? Dr. Dawkins responded that is correct. Mr. Riall asked if it is correct that under this program the district will be hosting or running a Virtual School, and the superintendent said that is correct. Mr. Riall asked if the cost is a one-time expenditure to purchase the software and will there be maintenance, upgrade costs? Mr. Graham explained that staff will evaluate this in the two bids received. Mr. Riall asked if Caddo will receive the MFP funds for any child that enrolls in this and Dr. Dawkins responded that we do, and it will also expand the options for students already enrolled in Caddo, i.e. those who want to catch up, those who want to advance and take additional courses. Ms. Priest asked Mr. Graham about the expenditures and the possibility of seeing the RFP to see what services they will offer. With Virtual Schools being a reality, she added that she would like for Caddo to be on the front end of this rather than on the back end.

Mrs. Crawley asked if this is for high school only? Mrs. Woodward responded that she believes the proposal is for sixth through twelfth grade and if we enroll at least 50 students we will break even. Mrs. Crawley asked if we must purchase the computers or will the State purchase the computers? Mrs. Woodard explained that the students have the computers and we have the capability of buying and running the program without purchasing the computers as the students are working from home under the supervision of Caddo Parish Public Schools. Mrs. Crawley referenced the advertisement on television that students get a free computer and asked how one receives the free computer – through the State or through Caddo (the ones that receive the MFP funds). Mrs. Woodward said the district would not necessarily have to provide a computer, but the individual providers will furnish the computers. Dr. Dawkins explained that at this time there is a waiting list for people to get in. Mrs. Crawley said it is also something that can be promoted as home school for 6th through 12th grade; and she asked if it is something that could possibly help the suspended students and staff responded absolutely. Mr. Riall asked if there are any Dual Enrollment possibilities with Virtual Schools? Mrs. Woodward explained that is a different type of partnership and we are offering this type of Distance Learning at the current time.

Salvage Sale. Mr. Hooks asked if furniture will be sold in the salvage sale? Mr. Graham said we are not currently as all the schools that have been off-lined those items have gone to open schools and the equipment and furniture in the salvage sale are approximately three or more years old, i.e. old monitors. Ms. Seamster asked if salvaged furniture and supplies are offered to the staff before being placed in the salvage sell. Mr. Graham responded that is correct and that annually a list of items is provided to the schools and employees have approximately two weeks to notify his office and make arrangements to pick the items up.

General Fund Budget Revision. Ms. Priest reported that she has had the opportunity the past two years to meet with the external auditor and one of the things the auditor mentioned was how good it is that Caddo receives budget revisions throughout the year, because a lot of school districts get a list of budget revisions at year end.

Approval of Resolution Incurring Debt and Issuance of $20,707,000 of Qualified School Construction Bonds. Grant Schleuter of Foley, Judell (Bond Counsel) explained that this is the second series of qualified school construction bonds and is the last series available to the school board. These are part of the 2009 stimulus bill and it allows for two bond issues at zero (or near zero) percent interest. Mr. Schleuter stated that Caddo was one of the first school systems in 2009 to take advantage of this program and of the allocation from the Feds of $17.359 million, the district will actually pay back only $14.9 million. Compared to a similar financing of 15-years with an interest rate, the savings on the $17 million borrowed is over $8 million. The
program is being discontinued, as Congress did not renew it and the amount that can be borrowed has been increased from the $17,359 million to the $20,707,000 and similar results are expected at the next board meeting with a purchase commitment. The final terms will be announced at the next board meeting since the final terms are determined on that date. He reminded the board that it is a very good program and there is no cheaper financing available and basically amounts to a 50% grant on school construction.

Mr. Rachal asked if he understands correctly that the existing budget includes allocation in the capital projects fund to pay back these amounts and this will not be an addition. Mr. Lee verified there will be no impact on the General Fund budget; because, even though we are pledging money from General Funds, the payment will actually come from Capital Projects and it is budgeted.

Mr. Riall asked if Caddo’s bond rating has changed because of the district’s budget deficit? Mr. Lee stated that we are still at AA-.

Rewording of Youree Drive and Broadmoor Magnet Component Resolution. Mrs. Crawford shared with the board a copy of proposed revisions in the Youree Drive/Broadmoor Magnet Component policy and that instead of students just walking into this magnet component, students living in these neighborhoods can test to attend a magnet and can request to go to Broadmoor or Youree Drive rather than Caddo Middle Magnet or Herndon. She explained the first cut will be for Middle Magnet and the remaining students will be to go to Youree Drive and Broadmoor. She further explained it will still cap out of district students at 25.

Mrs. Bell asked for verification and if this is only for the magnet component within the school and Mrs. Crawford said that is correct. Mr. Abrams explained that when the board originally approved this, it was on a first-come, first served basis at Broadmoor and Youree and the result is parents are camping out and in his opinion there is potential for abuse. With this revision, students who want to get into a magnet component will now take the same type test and be placed on a list and given a fair chance to get in. He added they will also recognize Broadmoor is a school that has a magnet component and they can attend; however, it will control how the students are getting in and assure that it is done correctly. Mrs. Bell asked Mr. Abrams if the other schools with magnet components have criteria for entrance, i.e. Caddo Middle Career & Technology requires a 2.0 GPA. Mr. Abrams noted that this will only change the way it happens to get into Youree Drive – the first 25 in line get in; and this will give the students the opportunity to test into the magnet component the same as they would in other magnets. The limit of 25 from outside the neighborhood school district was set by the board in 2006; but if 100 students living inside the neighborhood school district (of Youree and Broadmoor) test for the magnet component and all 100 pass, they all will be in the magnet component at their neighborhood school.

Mrs. Crawley asked for clarification and if a student tests to get into Middle Magnet and the school can accept 200 6th graders; but the student is not within the top 200 but within 225, will that student be offered Youree Drive or Broadmoor? Mrs. Woodward explained that the intent is to standardize the procedures and yes they would be offered their second or third choice, the same as in elementary. Mrs. Crawley asked if Broadmoor is at capacity, because if they are not, consideration might be given to increasing the numbers.

Mr. Hooks asked why CMCTC is not on this list since they have a magnet component? Dr. Dawkins explained that this is not staff’s motion and it is something Board member Crawford has been working on for some time. Mr. Hooks asked Mrs. Crawford if she would consider adding CMCTC. Mrs. Crawford explained that this is addressing something the board implemented in 2006 and it only included Youree and Broadmoor and she is asking that the board consider amending the original resolution and attempt keeping the neighborhood students
who can’t get into Middle Magnet rather than losing them to private schools because their option may be Herndon and parents do not want to drive to Herndon. Mr. Hooks stated he understands because he knows the students at in the CMCTC neighborhood were not allowed to attend unless they met the criteria. He added that he asked the question because CMCTC draws students from across the parish. Mrs. Crawford clarified that this proposal is strictly aimed at neighborhood children. Mr. Ramsey asked the superintendent how will siblings of the 25 students outside the attendance zone be affected since there is a limit of 25 students from outside the schools’ attendance zones? Mrs. Woodard stated that the siblings will be permitted first and then after siblings others are offered a spot based on their scores, the same as the other magnet programs. Mr. Ramsey asked if it is possible that all 25 slots could be filled by siblings? Mr. Abrams responded probably not and his suggestion would be to not use the sibling rule and he would like to discuss this further. Mr. Ramsey stated that he is not opposed to it, but he believes the question will be asked. Mrs. Woodard stated that is the current procedure for magnet entrance, if the siblings qualify because the siblings still have to meet a baseline score. Mrs. Scruggs explained that because of the low number Youree accepts, they do not use the sibling preference. Ms. Trammel stated that since she is under the impression that magnets are to attract, will this not be a method to attract more students to these schools by pulling in more students from the overflow of students at Youree? Mr. Rachal referenced Mr. Hooks’ comments and interest in CMCTC and how it could be effective in the future to include others.

Mrs. Bell asked for further clarification of the acceptance of siblings and if 25 siblings pass the test, will that be the limit of students outside the attendance lines that can be accepted. Mr. Abrams stated that the motion will need to be clear that the board does not intend to give a sibling preference on the 25 and it will be ranked scores.

CPSB Meeting (December 20). Ms. Priest announced that the regular CPSB meeting in December is scheduled for December 20th, which falls during the Christmas Break so it is necessary to change this meeting and she is recommending that it be changed to December 13th, with the work session on December 6th. Mr. Hooks asked if the superintendent and staff revisited the January 1st holiday on the school calendar? Dr. Dawkins stated that staff does not recommend changing it based on the number of days in the calendar and he will provide an explanation.

OT/PT Pay Schedule. Mr. Rachal stated he is waiting on additional information from staff as this will have an impact on the General Fund. Once he receives the additional information, he will determine if it will be necessary to pull or postpone this item. Mrs. Crawley asked if we have gone through the company that conducted the compensation study since we are paying them to re-evaluate? Mr. Lee said he has not discussed with them, but possibly Human Resources has. Mrs. Crawley asked is that not the procedure for changing a salary schedule? Dr. Dawkins stated that he understands that the company made the recommendation. Dr. Robinson explained that the salary in place is what was recommended by Jeff Rahmberg and Associates and adjustments made by board action. Mrs. Crawley stated that she is aware that the board has revisited a few times to correct certain ones that did not seem right. Dr. Robinson stated that staff will resubmit it to Jeff Rahmberg for reconsideration.

ADDITIONS

Ms. Priest announced that the superintendent asked that the 2011-12 CAP be added to the agenda.

CONSENT AGENDA

Ms. Priest recommended the following items for the consent agenda: 6.01, 6.05, 7.01-7.03, 8.01-8.03, 8.06, and 8.08. Mr. Riall moved, seconded by Mrs. Bell, to approve the proposed agenda.
and consent agenda for the October 18, 2011 CPSB meeting as presented. Vote on the motion carried unanimously.

ANNOUNCEMENTS

Mrs. Crawford announced that the directors for District 4 and 5 have set up a meeting for LSBA to interview different candidates for BESE on October 18th at 6:00 p.m. at the Exacta Inn. Due to the CPSB meeting being held on that evening, it may be necessary to schedule another time for the CPSB members.

POLL AUDIENCE

Jackie Lansdale, Caddo Federation of Teachers/Support Personnel, addressed the board on matters of concern to the Federation. She shared information on an educational forum scheduled for Thursday, October 6th in the auditorium at the Fairgrounds. At this time all the candidates will be present to answer questions. Mrs. Lansdale stated that on Saturday, October 8th, Caddo employees will present to new teachers in the district various strategies that might be helpful during the school year. She also reminded the board that a lot of the data received on the suspensions is as good as the input and there have been instances where the data was not as clean as it should be and noted some of the discrepancies in particular instances. Regarding the virtual platform, she reported on a visit with the superintendent about a young man they assisted in becoming involved in this and the opportunity for him to complete high school. She encouraged the board to encourage more students to participate in this program. She stated that if the OT/PT Pay Schedule issue is being referred back to a committee, she believes those affected should be the one to submit it; and she would like to not only be a party to that, but to also bring to the board’s attention that it is counterintuitive to her that the board would ever base anyone’s salary from a medical profession on a teacher’s salary schedule and that is what this has been based upon.

Dr. Dawkins referenced the invitation at board members’ stations to the Junior Achievement Hall of Fame Banquet and asked that board members indicate whether or not they would like to attend. Dr. Dawkins also commended the dyslexia staff on Saturday for the workshop conducted at Broadmoor Middle School, as well as the partnership between Home Depot and Southern Hills and the campus cleanup at Southern Hills on Saturday.

Mrs. Bell expressed appreciation to Title I and the staff for the outstanding parental staff work shop.

Adjournment. Mr. Riall moved, seconded by Mrs. Bell, to adjourn. Vote on the motion to adjourn carried and the meeting adjourned at approximately 7:02 p.m.
October 18, 2011

The Caddo Parish School Board (CPSB) met in regular session in its office at 1961 Midway, Shreveport, Louisiana at approximately 4:30 p.m. on Tuesday, October 18, 2011 with President Lillian Priest presiding and the following school board members present being a quorum: Steve Riall, Jasmine Green, Debra Seamster, Curtis Hooks, Mary Trammel, Bonita Crawford, Barry Rachal, Larry Ramsey, and Dottie Bell. Also present were Superintendent Gerald Dawkins and Legal Counsel Reginald Abrams. Mr. Riall led the prayer and Pledge of Allegiance.

Mrs. Bell moved, seconded by Ms. Seamster, approval of the minutes of the September 20, 2011 and October 4, 2011 CPSB meetings as submitted. Vote on the motion carried unanimously.

PRESENTATIONS AND RECOGNITIONS

Dr. Mary Nash-Robinson, on behalf of the board and superintendent, recognized the following students/employees. The board president and superintendent presented each with a certificate recognizing their accomplishment. Administrators, family and friends were also recognized.

JROTC: Lt. Col. Daniel Durr recognized the following Caddo students: (1) Cadet Avalon Collins, Green Oaks, appointed Caddo Parish Corps Commander; and (2) Cadet Rueben Cheng, Caddo Magnet High School and (3) Cadet Shamariah Jacobs, Captain Shreve High School for receiving the JROTC Legion of Valor Bronze Cross for Achievement Award.

DECA Awards. Sam Hussein, DECA President, Byrd High School Chapter, was recognized for participating in a number of service activities in the community, as well as for writing a letter to the Superintendent regarding DECA and its importance in preparing students for business now and in the future.

Support Employee Awards. Cleveland White recognized the following as the 2010-2011 Caddo Parish School Board support employees: (1) (Elementary Division) Patricia Johnson, aide at Cherokee Park; (2) (Middle School Division) Priscilla Marshall, special education teacher’s aide at Caddo Middle Career & Technology; (3) (High School Division) Bruce Pennywell, groundskeeper, Caddo Career & Technology Center; (4) (Academic Affairs) Laverne Coleman, Secretary, area school director; (5) (Support Services) Johnny B. Cannon, Jr. crew chief in Maintenance Department; (6) (Human Resources) Dawn Porteau, secretary in 504 Special Services Department; and (7) (Superintendent’s Division) Benjamin Matthew Isgitt, media specialist, Communications & Marketing.

Counselors of the Year. Karen Rothel, Riverside Elementary, and Carol Brill, Caddo Magnet High, were recognized as Louisiana Elementary Counselor of the Year and Louisiana Secondary Counselor of the Year, respectively.

Blue Ribbon School. Eden Gardens Elementary Magnet was recognized for being named a Blue Ribbon School by the U. S. Department of Education.

2011 Professionalism Award. Attorney Reginald Abrams was recognized as the Shreveport Bar Association’s 2011 Professional Award Recipient.

National School Bus Safety Week. Proclamations from Governor Jindal, Mayor Glover, and the Caddo Parish Commission were presented to Otis Jones, director of Transportation, in recognition of October 17-21 as National School Bus Safety Week, and Thursday, October 20th.
as School Bus Driver Appreciation Day. Carl Pierson of the Caddo Parish Commission read and presented the proclamation on behalf of the Commission.

**Newly Appointed Administrators.** Dr. Mary Nash Robinson introduced the following newly appointed Caddo Parish administrators: (1) Rosalyn Glover-Bryant, Supervisor of Compliance, Parental and Community Involvement; and (2) Mary Harris, principal, South Highlands Elementary Magnet School.

Dr. Robinson also announced that Kristan Schneider, Communications secretary, will be leaving Caddo to pursue other endeavors. Students from the Captain Shreve High School broadcasting class were recognized as being in the audience recording portions of the meeting.

**VISITORS**

Jackie Lansdale, Caddo Federation of Teachers/Support Personnel, expressed appreciation to the superintendent and staff for addressing concerns of the Filipino teachers, for the superintendent’s agreement to ask the Discipline Review Committee to strategize on areas relative to school safety issues, i.e. assault and battery on school employees and identifying weapons, and for assistance offered to help a student enroll in an online program and not become a drop-out statistic. Mrs. Lansdale reported that the Federation continues to hold academies for new teachers and the numbers continue to grow, with the next workshop on strategies for effective classroom management scheduled for November 12th. She also noted the following areas of concern: (1) how teachers and employees are being treated at the school site and the possibility of implementing climate surveys at each work site to hopefully define areas in which changes can be made to ensure better working and learning environments, and (2) escalation of the cry of special education teachers who are receiving more and more edicts and loaded down with mounds of paperwork. She also expressed appreciation for the sponsorships in the Federation’s first education forum.

**ESTABLISH THE AGENDA AND CONSENT AGENDA**

Superintendent Dawkins highlighted items for the board’s consideration asking that Virtual Services be postponed to the November meeting. Grant Schleuter, bond counsel from Foley, Judell in New Orleans, shared that Jim Lee and Superintendent Dawkins worked closely with Chase Bank and received the 0% interest rate for the QSCB (Qualified School Construction Bonds). To his knowledge, he added that Caddo is the only district receiving the 0% interest rate on these bonds for both bond issues. Mr. Schleuter also reported that for the $20,707,000 in bonds, the district will pay back roughly $17.8 million.

**CONFIRM THE CONSENT AGENDA**

President Priest announced that Items 6.02-6.03, 6.05, 7.03, 8.01-8.06 and 8.08 are the consent agenda. Mr. Riall moved, seconded by Miss Green, to approve the agenda and consent agenda for the October 18, 2011 CPSB meeting. Vote on the motion carried unanimously. The following is a summary of the board’s actions on the consent agenda items.

**Item No. 6**

**6.02 Requests for Leaves.** The board approved the following requests for leaves as recommended by the superintendent and submitted in the mailout.

Certified
Catastrophic Leave, September 7, 2011-October 18, 2011
Racheal Knudson, Teacher, Newton Smith 6th Grade Academy, 5 years
Sabbatical Leave (Study) Spring Semester 2012
Andrew Coleman, Teacher, Creswell Elementary, 3 years
Kay D. Law, Teacher, Huntington High School, 16 years
Leave Without Pay, November 8, 2011-November 11, 2011
Melanie M. Jett, Teacher, Southwood High School, 13 years

Classified
Catastrophic Leave, September 2, 2011-September 22, 2011
Willie Harris, Jr., Transportation, Bus Driver, 4 years

6.03 Other Personnel Transaction Reports. The board approved the other personnel transaction reports for the period of August 21, 2011 – September 20, 2011 as recommended by the superintendent and submitted in the mailout.

6.05 Out of State Travel Requests (General Fund). The board approved requests for out of state travel (general fund) as recommended by the superintendent and submitted in the mailout.

Item No. 7

7.03 Purchasing – Annual Salvage Sale. The board authorized staff to hold the annual auction sale of used furniture and equipment on December 10, 2011 as submitted in the mailout.

Item No. 8

8.01 Annual Group Insurance Renewals. The board approved the group insurance renewals as recommended by staff and submitted in the mailout.

8.02 Approval of Beverage Contract(s) – (1) Coca Cola and North Caddo HS and (2) Coca Cola and Green Oaks. The board approved beverage contracts for Coca Cola and North Caddo High School and Coca Cola and Green Oaks as recommended by staff and submitted in the mailout.

8.03 General Fund Budget Revision. The board approved the General Fund Budget Revision as recommended by staff and submitted in the mailout.

8.04 Approval of Resolution Incurring Debt and Issuance of $20,707,000 of Qualified School Construction Bonds. The board approved the following resolution incurring debt and the issuance of $20,707,000 of Qualified School Construction Bonds as recommended by staff and submitted in the mailout.

RESOLUTION

A resolution providing for the incurring of debt and issuance of Twenty Million Seven Hundred Seven Thousand Dollars ($20,707,000) of Revenue Bonds (Taxable QSCB), Series 2011, of the Parish School Board of the Parish of Caddo, State of Louisiana; prescribing the form, terms and conditions of such Bonds and providing for the payment thereof; and providing for other matters in connection therewith.

WHEREAS, the Parish School Board of the Parish of Caddo, State of Louisiana (the "Issuer") is authorized by the State Constitution to levy a special tax of seven and ninety-six hundredths (7.96) mills (such rate being subject to adjustment from time to time due to reassessment) in each year (the "Tax"); and
WHEREAS, the Issuer has no outstanding indebtedness of any kind payable from a pledge or dedication of the avails or proceeds of the Tax, EXCEPT for $17,359,000 Revenue Bonds (Taxable QSCB), Series 2009 (the "Outstanding Parity Bonds"); and

WHEREAS, Section 1430 of Title 39 of the Louisiana Revised Statutes of 1950, as amended authorizes the Issuer to make and enter into contracts dedicating the pledge and dedication of the funds to be derived by the Issuer from the Tax; and

WHEREAS, on April 6, 2010, the Issuer gave its preliminary approval to the issuance of the hereinafter defined Bonds; and

WHEREAS, the Issuer now desires to incur debt and issue Twenty Million Seven Hundred Seven Thousand Dollars ($20,707,000) of its Revenue Bonds (Taxable QSCB), Series 2011 (the "Bonds"), in the manner authorized and provided by the aforesaid sections of the Louisiana Revised Statutes of 1950, as hereinafter provided, for the purpose of construction, rehabilitation or repair of public school facilities, including equipping of school facilities improved with Bond proceeds, and paying the costs of issuance of the Bonds; and

WHEREAS, an offer to purchase the Bonds has been submitted by JPMorgan Chase Bank, N.A., and the Issuer desires to accept the terms of said offer and provide for the sale of the Bonds to the purchaser at the price and in the manner hereinafter provided; and

WHEREAS, it is the desire of the Issuer to fix the details necessary with respect to the issuance of the Bonds and to provide for the authorization and issuance thereof; and

WHEREAS, it is the further desire of the Issuer to provide for the sale of the Bonds to the Purchaser at the price and in the manner hereinafter provided; and

WHEREAS, the Issuer further desires to qualify said Bonds under Section 54F of the Internal Revenue Code of 1986, as amended, as Qualified School Construction Bonds; and

WHEREAS, pursuant to the QSCB Regulations (herein defined), the Issuer has received an allocation of $20,070,000 for calendar year 2010, which amount has been held over to calendar year 2011;

NOW, THEREFORE, BE IT RESOLVED by the Parish School Board of the Parish of Caddo, State of Louisiana, acting as the governing authority of the Parish of Caddo, State of Louisiana, as school purposes, that:

SECTION 1) Definitions. As used herein, the following terms shall have the following meanings, unless the context otherwise requires:

"Act" means Section 1430 of Title 39 of the Louisiana Revised Statutes of 1950, as amended, and other constitutional and statutory authority.

"Additional Parity Obligations" means any additional pari passu bonds which may hereafter be issued, pursuant to Section 8 hereof, on a parity with the Bonds.

"Agreement" means the agreement to be entered into between the Issuer and the Paying Agent pursuant to this Resolution.

"Bonds" means the Issuer's Revenue Bonds (Taxable QSCB), Series 2011, authorized by this Resolution in the total aggregate principal amount of Twenty Million Seven Hundred Seven Thousand Dollars ($20,707,000), whether initially delivered or issued in exchange for, upon transfer of, or in lieu of any bond previously issued.

"Bond Register" means the records kept by the Paying Agent at its principal corporate office in which registration of the Bonds and transfers of the Bonds shall be made as provided herein.

"Bond Year" means the one-year period ending on each Sinking Fund Deposit Date, provided that the initial bond year may be a period shorter than one year.

"Cash" means cash and cash equivalents.

"Commitment Letter" shall mean the offer to purchase by the Purchaser attached hereto as Exhibit A.

"Credit Allowance Date" means with respect to the Bonds, each March 15, June 15, September 15 and December 15 on which any portion of the principal amount of the Bonds remains unpaid, and includes the last day on which the Bonds are outstanding.
"Credit Rate" means five and fifteen hundredths percent per annum (5.15%), the rate designated by the Secretary of the United States Treasury on the date of this Resolution, which is the date of the Issuer’s acceptance of the Commitment Letter of the Purchaser, which Commitment Letter is a binding, written contract for the sale or exchange of the Bonds.

"Date of Issuance" means the date the Issuer receives payment for the Bonds, which is anticipated to be November 16, 2011.

"Event of Default" means the occurrence of any of the following events unless waived in writing by the Owners:

1. a failure to pay the principal of or interest or premium, if any, on any Bond when the same shall become due and payable whether at maturity, upon redemption, or otherwise and such failure continues for two (2) days after the Issuer’s receipt of written notice from the Owner or the Paying Agent;
2. a failure of the Issuer to make the Principal Account Deposit Requirement on any Principal Account Deposit Date and such failure continues for two (2) days after the Issuer’s receipt of written notice from the Owner or the Paying Agent;
3. a failure of the Issuer to pay any other amount payable hereunder or with respect to any Bond (other than those specified in (1) and (2) above) when the same shall become due and payable and such failure continues for seven (7) days after the Issuer’s receipt of written notice from the Owner or the Paying Agent;
4. an Event of Insolvency shall occur with respect to the Issuer;
5. a failure by the Issuer to perform any covenant, agreement or condition set forth in Sections 3(a), 7, 8, 23, 24 or 27 of this Resolution; or
6. a failure by the Issuer in the performance or observance of any other of the covenants, agreements or conditions on its part in this Resolution or in the Bonds, and such failure continues for thirty (30) days after the Issuer’s receipt of written notice from the Owner or the Paying Agent unless the Issuer has instituted corrective actions satisfactory to the Owners within such 30-day period and diligently pursues such actions until such default is remedied.

"Event of Insolvency" means, with respect to the Issuer, the occurrence of one or more of the following events:

1. the issuance, under the laws of any state or under the laws of the United States of America, of an order of rehabilitation, liquidation or dissolution of the Issuer;
2. the commencement by or against the Issuer of a case or other proceeding seeking liquidation, reorganization or other relief with respect to the Issuer or its debts under any bankruptcy, insolvency or other similar state or federal law now or hereafter in effect, including, without limitation, the appointment of a trustee, receiver, liquidator, custodian or other similar official for the Issuer or there shall be appointed or designated with respect to it, an entity such as an organization, board, commission, authority, agency or body to monitor, review, oversee, recommend or declare a financial emergency or similar state of financial distress with respect to it or there shall be declared or introduced or proposed for consideration by it or by any legislative or regulatory body with competent jurisdiction over it, the existence of a state of financial emergency or similar state of financial distress in respect of it;
3. the inability or failure of the Issuer to generally pay its debts as they become due;
4. the declaration of a moratorium with respect to the payment of the debts of the Issuer;
5. an authorized Executive Officer of the Issuer shall admit in writing its inability to pay its debts when due; or
6. the initiation of any action in furtherance of or to authorize any of the foregoing by or on behalf of the Issuer.

"Executive Officers" means, collectively, the President and the Secretary of the Issuer.

"Final Maturity Date" means June 1, 2026.
"Fiscal Year" means the one-year accounting period beginning July 1 of each year, or such other period as may be designated by the Governing Authority as the fiscal year of the Issuer.

"Governing Authority" means the Parish School Board of the Parish of Caddo, State of Louisiana for school purposes, and any successor thereto.

"Government Securities" means noncallable direct general obligations of, or obligations the principal of and interest on which are unconditionally guaranteed by, the United States of America, which may be United States Treasury Obligations such as the State and Local Government Series or which may consist of specified portions of interest thereon, such as those securities commonly known as CATS, TIGRS, and STRPS, and may be in book-entry form; provided, however, that no Government Security shall mature or be payable (in whole or in part) after the Final Maturity Date.

"Issuer" or "School Board" means the Parish School Board of the Parish of Caddo, State of Louisiana.

"Maximum Annual Debt Service" means the highest amount of principal and interest due on an obligation in any Fiscal Year, provided that if there is outstanding any balloon indebtedness subject to mandatory sinking fund payments or redemptions, such balloon indebtedness shall be calculated as amortizing on the dates and in the amounts such mandatory sinking fund payments or redemptions are required rather than on the date such indebtedness matures; and further provided that if any interest payments due on any indebtedness are to be subsidized by payments paid or to be paid by the United States Department of the Treasury, the amount of such interest payments shall be reduced by an amount equal to the payments paid or to be paid during such period by the United States Department of the Treasury that are pledged as security for such indebtedness.

"Outstanding" when used with respect to the Bonds means, as of the date of determination, any Bond theretofore issued and delivered under this Resolution, except:

1. Any Bond theretofore canceled by the Paying Agent or delivered to the Paying Agent for cancellation;
2. Any Bond for which payment or redemption sufficient funds have been theretofore deposited in trust for the owners of such Bond with the effect specified in this Resolution or by law, provided that if such Bond is to be redeemed, irrevocable notice of such redemption has been duly given or provided for pursuant to this Resolution or waived;
3. Any Bond in exchange for or in lieu of which another Bond has been registered and delivered pursuant to this Resolution; and
4. Any Bond alleged to have been mutilated, destroyed, lost or stolen which may have been paid as provided in this Resolution or by law.

"Outstanding Parity Bonds" shall mean the Issuer’s $17,359,000 Revenue Bonds (Taxable QSCB), Series 2009.

"Owner" when used with respect to any Bond means the Person or Persons constituting a taxpayer in whose name(s) such Bond is registered in the Bond Register.

"Paying Agent" means The Bank of New York Mellon Trust Company, N.A., Baton Rouge, Louisiana, until a successor Paying Agent shall have been appointed pursuant to the applicable provisions of this Resolution and thereafter "Paying Agent" shall mean such successor Paying Agent.

"Person" means any individual, corporation, partnership, joint venture, association, joint-stock company, trust, unincorporated organization or government or any agency or political subdivision thereof.

"Principal Amount" means $20,707,000, less any amount redeemed as a result of mandatory redemption required pursuant to Section 3(a) of this Resolution.

"Purchaser" means JPMorgan Chase Bank, N.A., Monroe, Louisiana.

"Qualified Purposes" means construction, rehabilitation and repair of public school facilities within the jurisdiction of the Issuer, including equipping of school facilities improved with Bond proceeds.
"QSCB Code Provision" means Section 54F of the Code and applicable portions of Section 54A of the Code.

"QSCB Disqualification Event" has the meaning given it in Section 3 of this Resolution.

"QSCB Regulations" means, collectively, IRS Notice 2009-35 and IRS Notice 2010-17.

"Required Sinking Fund Value" means for each Sinking Fund Deposit Date the corresponding value required as set forth in Section 9 of this Resolution.

"Resolution" means this resolution authorizing the issuance of the Bonds, as it may be supplemented and amended.

"School System" means the Caddo Parish School Board System.

"Sinking Fund" means the "Parish School Board of the Parish of Caddo, State of Louisiana, Revenue Bonds (Taxable QSCB), Series 2011, Sinking Fund" established pursuant to Section 9 herein.

"Sinking Fund Deposit Date" means June 1st of each year, beginning June 1, 2012 and ending on June 1, 2026.

"Sinking Fund Deposit Requirement" means on each Sinking Fund Deposit Date, a cash deposit, together with any amounts then held in the Sinking Fund, in an amount sufficient to meet the Required Sinking Fund Value for such Sinking Fund Deposit Date.

"State" means the State of Louisiana.

"Superintendent" means the Superintendent of the School Board.

"Tax" means the special tax of seven and ninety-six hundredths 7.96 mills (such rate being subject to adjustment from time to time due to reassessment), and authorized by the State Constitution to be levied and collected annually by the Issuer in each year.

SECTION 2) Authorization of Bond; Maturity.

(a) In compliance with the terms and provisions of the Act, the QSCB Code Provision, the QSCB Regulations, other constitutional and statutory authority, there is hereby authorized the incurring of indebtedness of Twenty Million Seven Hundred Seven Thousand Dollars ($20,707,000) for, on behalf of, and in the name of the Issuer, for the purpose of construction, rehabilitation or repair of public school facilities, including equipping of school facilities improved with Bond proceeds, and paying the costs of issuance of the Bonds. To represent said indebtedness, this Governing Authority does hereby authorize the issuance of Revenue Bonds (Taxable QSCB), Series 2011, of the Issuer, in the amount of Twenty Million Seven Hundred Seven Thousand Dollars ($20,707,000). Any Bond - issued hereby shall be in the form of a fully registered bond, shall be dated the Date of Issuance, and shall be numbered R-1. Subject to the provisions of Section 3, the Bonds shall become due and payable and mature on the Final Maturity Date.

(b) Payment of Bonds. The principal of the Bonds upon maturity or redemption shall be payable by check of the Paying Agent mailed or delivered by the Paying Agent to the Owner thereof (determined as of the close of business on the day before the Final Maturity Date) at the address shown on the Bond Register upon presentation and surrender of the Bonds at the principal corporate trust office of the Paying Agent. Any Bond delivered under this Resolution upon transfer of, in exchange for or in lieu of any other Bond shall carry all the rights which were carried by such other Bond.

No Bond shall be entitled to any right or benefit under this Resolution, or be valid or obligatory for any purpose, unless there appears on such Bond a certificate of registration, substantially in the form provided in this Resolution, executed by the Paying Agent by manual signature.

The Bonds are hereby issued on a parity with the Outstanding Parity Bonds with respect to the avails or proceeds of the Tax, and the Bonds shall rank equally with and enjoy complete parity of lien with the Outstanding Parity Bonds on the avails or proceeds of the Tax in each of the Fiscal Years during which the Bonds and the Outstanding Parity Bonds are outstanding. It is certified that the Issuer has complied with, or will comply with prior to the issuance of the Bonds, all the terms and conditions for the issuance of Additional Parity Obligations set forth in the resolution authorizing the issuance of the Outstanding Parity Bonds.

(c) Designation as Qualified School Construction Bond. In accordance with the QSCB Code Provision, the Issuer hereby designates the Bonds as Qualified School Construction Bonds.

...
SECTION 3) Redemption Provisions. The Bonds are not subject to redemption or prepayment by the Issuer prior to their stated maturity except as specified in this section as follows:

(a) To the extent that less than 100% of the "available project proceeds" of the Bonds (as defined in the QSCB Regulations) are expended for Qualified Purposes by the close of the 3-year period beginning on the Date of Issuance (or if an extension of such expenditure period has been received by the Issuer from the Secretary of the United States Treasury Department, by the close of the extended period) the Issuer shall redeem all of the non-qualified Bonds within 90 days after the end of such period at a redemption price equal to the principal amount of the Bonds to be redeemed, plus a "make whole" amount as calculated pursuant to this Section. A partial redemption of the Bonds as described in this paragraph shall reduce the annual Sinking Fund Deposit Requirement payments (described in Section 9 hereof) on a pro-rata basis; and

(b) The Issuer may elect to redeem the Bonds in whole but not in part prior to maturity at its option in the event the Internal Revenue Service issues a ruling, notice or final determination adversely affecting the tax credits related to the Bonds or the Owner obtains an opinion of a nationally recognized bond counsel, subject to review by the bond counsel to the Issuer, that the Bonds no longer constitute "qualified school construction bonds" pursuant to Section 54F of the Code (each a "QSCB Disqualification Event") at a redemption price equal to the principal amount of the Bonds to be redeemed, plus a "make whole" amount as calculated pursuant to this Section. Redemption of the Bonds by the Issuer pursuant to this Section 3(b) shall occur not later than the 90th day following the QSCB Disqualification Event.

Official notice of such call for redemption of the Bonds, or any portion thereof, shall be given by the Paying Agent by means of first class mail, postage prepaid, by notice deposited in the United States mails not less than ten (10) days prior to the redemption date addressed to the Owner of the Bonds to be redeemed at his address as shown on the Bond Register.

In the event the Bonds, or any portion thereof, are redeemed prior to the Final Maturity Date pursuant to this Section, the Issuer will pay to the Owner thereof the portion of the Principal Amount being redeemed that is held by such Owner, plus a "make-whole" amount to compensate the Owner for any reasonable losses or breakage fees related to such Owner’s cost of funds or other costs (including reasonable attorneys fees to the extent permitted by law) incurred by the Owner as a result of such redemption. Further, in the event of a QSCB Disqualification Event, the Issuer shall make, and so long as the Bonds remain Outstanding continue to make, to the Owner on each Sinking Fund Deposit Date, additional payments to the Owner in an amount sufficient, after taking into consideration all penalties, fines, interest and additions to federal income tax (including lost tax credits) that are imposed on the Owner, to maintain the same after-tax yield that the Owner would have realized had such loss or reduction of tax credits not occurred.

SECTION 4) Registration and Transfer. The Issuer shall cause the Bond Register to be kept by the Paying Agent. The Bonds may be transferred, registered and assigned only on the Bond Register, and such registration shall be at the expense of the Issuer. A Bond may be assigned by the execution of an assignment form on the Bonds or by other instruments of transfer and assignment acceptable to the Paying Agent. A new Bond or Bonds will be delivered by the Paying Agent to the last assignee (the new Owner) in exchange for such transferred and assigned Bonds after receipt of the Bonds to be transferred in proper form. Such new Bond or Bonds shall be of the same maturity.

SECTION 5) Form of Bonds. The Bonds and the endorsements to appear thereon shall be in substantially the following forms, respectively, to wit:

(FORM OF BOND)

The Parish School Board of the Parish of Caddo, State of Louisiana (the "Issuer"), promises to pay, but solely from the source and as hereinafter provided, to:

JPMORGAN CHASE BANK, N.A.

or registered assigns, the Principal Amount set forth above on the Maturity Date set forth above. The principal of this Bond, upon maturity or redemption, is payable in lawful money of the United States of America at the principal office of The Bank of New York Mellon Trust Company, N.A., Baton Rouge, Louisiana, or successor thereto (the "Paying Agent"), upon presentation and surrender hereof.

THIS BOND CONSTITUTES A QUALIFIED SCHOOL CONSTRUCTION BOND WITHIN THE MEANING OF SECTIONS 54A AND 54F OF THE INTERNAL REVENUE CODE OF 1986, AS AMENDED (THE "CODE"). SUBJECT TO THE LIMITATIONS OF SECTION 54A(e), A TAXPAYER IS ENTITLED TO A TAX CREDIT AGAINST FEDERAL INCOME TAX (INCLUDING ALTERNATIVE MINIMUM TAX) IMPOSED ON SUCH TAXPAYER FOR THE TAXABLE YEAR THAT INCLUDES THE CREDIT ALLOWANCE DATE. THE TAX CREDIT UNDER SAID SECTIONS 54A AND 54F IS EQUAL TO 25% OF THE CREDIT RATE SPECIFIED HEREON MULTIPLIED BY THE PRINCIPAL AMOUNT OF THE BONDS HELD BY A TAXPAYER ON THE CREDIT ALLOWANCE DATE; PROVIDED, HOWEVER, THAT THE AMOUNT OF THE TAX CREDIT ALLOWED TO A TAXPAYER ON THE FIRST CREDIT ALLOWANCE DATE FOLLOWING THE ISSUANCE OF THIS BOND OR ON THE REDEMPTION OR MATURITY OF THIS BOND SHALL BE PRORATED AS PROVIDED IN SECTION 54A(b)(4) OF THE CODE.

"CREDIT ALLOWANCE DATE" AS USED HEREIN SHALL MEAN EACH MARCH 15, JUNE 15, SEPTEMBER 15 AND DECEMBER 15 ON WHICH THIS BOND IS OUTSTANDING. SUCH TERM SHALL ALSO INCLUDE THE LAST DAY ON WHICH THIS BOND IS OUTSTANDING.

This Bond represents the entire principal amount of an authorized issue aggregating in principal the sum of Twenty Million Seven Hundred Seven Thousand Dollars ($20,707,000) of Revenue Bonds (Taxable QSCB), Series 2011 (the "Bonds"), of the Issuer, said Bonds having been issued by the Issuer pursuant to a resolution adopted on October 18, 2011 (the "Resolution"), for the purpose of construction, rehabilitation or repair of public school facilities within the jurisdiction of the Issuer, including equipping of school facilities improved with Bond proceeds, and paying the costs of issuance thereof, under the authority conferred by Section 1430 of Title 39 of the Louisiana Revised Statutes of 1950, as amended, and other constitutional and statutory authority.

This Bond is not subject to redemption by the Issuer prior to its stated Maturity Date except: (a) to the extent that less than 100% of the available project proceeds(as defined in the QSCB Regulations) of this Bond is expended for Qualified Purposes by the close of the 3-year period beginning on the date of this Bond (or if an extension of such expenditure period has been received by the Issuer from the Secretary of the United States Treasury Department, by the close of the extended period) the Issuer shall redeem all of the non-qualified Bonds within 90 days after the end of such period at a redemption price equal to the principal amount of the Bonds to be redeemed, plus a "make-whole" amount as calculated as set forth below; and (b) the Issuer may elect to redeem this Bond prior to maturity at its option in the event the Internal Revenue Service issues a ruling, notice or final determination adversely affecting the tax credits related to the Bond or the Owner obtains an opinion of a nationally recognized tax or bond counsel, subject to review by the bond counsel to the Issuer, that this Bond no longer constitutes a "qualified
school construction bond" pursuant to Section 54F of the Code (each a "QSCB Disqualification Event") at a redemption price equal to the principal amount of the Bonds to be redeemed, plus a "make-whole" amount as calculated as set forth below; provided that redemption of this Bond by the Issuer pursuant to a QSCB Disqualification Event shall occur not later than the 90th day following such QSCB Disqualification Event.

Official notice of such call for redemption of this Bond, or any portion thereof, shall be given by the Paying Agent by means of first class mail, postage prepaid, by notice deposited in the United States mails not less than ten (10) days prior to the redemption date addressed to the Owner of this Bond at his address as shown on the Bond Register.

In the event this Bond, or any portion thereof, is redeemed prior to the Maturity Date pursuant to the Resolution, the Issuer will pay to the Owner thereof the portion of the principal amount being redeemed that is held by such Owner, plus a "make-whole" amount to compensate the Owner for any reasonable losses or breakage fees related to such Owner’s cost of funds or other costs (including reasonable attorneys fees to the extent allowed by applicable law) incurred by the Owner as a result of such redemption. Further, in the event of a QSCB Disqualification Event, the Issuer shall make, and so long as this Bond remains outstanding continue to make, to the Owner on each Sinking Fund Deposit Date, additional payments to the Owner in an amount sufficient, after taking into consideration all penalties, fines, interest and additions to federal income tax (including lost tax credits) that are imposed on the Owner, to maintain the same after-tax yield that the Owner would have realized had such loss or reduction of tax credits not occurred.

The Issuer shall cause to be kept at the principal corporate office of the Paying Agent a register (the "Bond Register") in which registration of the Bonds and of transfers of the Bonds shall be made as provided in the Resolution. This Bond may be transferred, registered and assigned only on the Bond Register, and such registration shall be at the expense of the Issuer. This Bond may be assigned by the execution of the assignment form hereon or by other instrument of transfer and assignment acceptable to the Paying Agent. A new Bond will be delivered by the Paying Agent to the last assignee (the new registered owner) in exchange for this transferred and assigned Bond after receipt of this Bond to be transferred in proper form.

This Bond, equally with the Outstanding Parity Bonds, is secured by and payable from an irrevocable pledge and dedication of the funds to be derived by the Issuer from the levy and collection of a special tax of seven and ninety-six hundredths (7.96) mills (such rate being subject to adjustment from time to time due to reassessment), which the Issuer is authorized to impose and collect in each year. Said special tax has been authorized to be levied on all the property subject to taxation within the corporate boundaries of the Issuer. For a more complete statement of the tax revenues from which and conditions under which this Bond is issued, reference is hereby made to the Resolution. The Issuer, in the Resolution, has also entered into certain other covenants and agreements with the registered owner of this Bond, including provisions for the issuance of additional bonds payable from the proceeds of the Tax on a parity with this Bond for the terms of which reference is made to the Resolution.

This Bond shall not be valid or become obligatory for any purpose or be entitled to any security or benefit under the Resolution until the certificate of registration hereon shall have been signed by the Paying Agent.

It is certified that this Bond is authorized by and issued in conformity with the requirements of the Constitution and statutes of this State. It is further certified, recited and declared that all acts, conditions and things required to exist, to happen and to be performed precedent to and in the issuance of this Bond to constitute the same legal, binding and valid obligations of the Issuer have existed, have happened and have been performed in due time, form
and manner as required by law, and that the indebtedness of the Issuer, including this Bond, does not exceed the limitations prescribed by the Constitution and statutes of the State of Louisiana. Any capitalized terms in this Bond which are not defined herein shall have the meaning assigned to such terms in the Resolution.

IN WITNESS WHEREOF, the Issuer, acting through the Parish School Board of the Parish of Caddo, State of Louisiana for school purposes, as its governing authority, has caused this Bond to be executed on behalf of the Issuer by the manual or facsimile signatures of the President and Secretary of the Governing Authority, and its corporate seal to be impressed or imprinted hereon.

SECTION 6) Execution of Bonds. The Bonds shall be signed by the Executive Officers for, on behalf of, in the name of and under the corporate seal of the Issuer, which signatures and corporate seal may be either manual or facsimile.
SECTION 7) Payment of Bonds. The Bonds, equally with the Outstanding Parity Bonds, shall be secured by and payable solely from an irrevocable pledge and dedication of the avails or proceeds of the Tax. This Governing Authority does hereby obligate itself and its successors in office to impose and collect the Tax annually in each year, and does hereby irrevocably and irrepealably dedicate, appropriate and pledge the annual income to be derived from the assessment, levy and collection of the Tax in each year to the payment of the Bonds. The Issuer further covenants that it shall not lower the Tax rate to result in lower Tax revenues than were collected in the fiscal year prior to the proposed adjustment unless it shall deliver to the Owner, at least thirty (30) days prior to the date of any proposed adjustment, written evidence satisfactory to the Owner showing that the lower Tax revenues will be not less than \(1.35\) times the combined Maximum Annual Debt Service requirements for the Bonds, the Outstanding Parity Bonds and any Additional Parity Obligations (the "Debt Service Coverage Requirement"). In the event the Revenues in any one calendar year shall be insufficient to provide the required Debt Service Coverage Requirement in such calendar year the Issuer covenants to increase by rolling forward the millage rate for such year to the extent allowed by law in an amount necessary to achieve the Debt Service Coverage Requirement.

SECTION 8) Parity Bonds. The Issuer shall issue no other bonds or obligations of any kind or nature payable from or enjoying a lien on the revenues of the Tax having priority over or parity with the Bonds, except that additional bonds may hereafter be issued on a parity with the Bonds under the following conditions:

(1) The Bonds herein authorized or any bonds issued on a parity therewith or any part thereof, including the interest thereon, may be refunded, and the refunding bonds so issued shall enjoy complete equality of lien with the portion of the bonds which is not refunded, if there be any, and the refunding bonds shall continue to enjoy whatever priority of lien over subsequent issues may have been enjoyed by the bonds refunded; provided, however, that if only a portion of the bonds outstanding is so refunded and the refunding bonds require total principal and interest payments during any year in excess of the principal and interest which would have been required in such year to pay the bonds refunded thereby, then such bonds may not be refunded without the consent of the owner of the unrefunded portion of the bonds issued hereunder (provided such consent shall not be required if such refunding bonds meet the requirements set forth in clause 2 of this Section).

(2) Additional bonds may be issued on and enjoy a full and complete parity with the Bonds with respect to the revenues of the Tax, provided that the anticipated Tax revenues in the year in which the additional bonds are to be issued, as reflected in the budget adopted by the Issuer, must be at least \(1.35\) times the Maximum Annual Debt Service for any calendar year on the Bonds, the Outstanding Parity Bonds and the Additional Parity Bonds.

(3) Junior and subordinate bonds may be issued without restriction.

(4) The Issuer must be in full compliance with all covenants and undertakings in connection with the Bonds, and there must be no delinquencies in payments required to be made in connection therewith.

In addition to the foregoing, while the Bonds are still Outstanding, the Issuer shall not be permitted to issue Additional Parity Obligations unless it shall deliver to the Owner of the Bonds, at least thirty (30) days prior to the date of any proposed issuance of Additional Parity Obligations, written evidence satisfactory to such Owner showing that the Tax revenues during twelve (12) consecutive months of the previous eighteen (18) months would have been sufficient to produce revenues in an amount equal to \(1.35\) times the combined Maximum Annual Debt Service of the Bonds and all outstanding Additional Parity Obligations, including the proposed Additional Parity Obligations.

SECTION 9) Sinking Fund. For the payment of the principal of the Bonds, there shall be established and maintained a special fund known as "Parish School Board of the Parish of Caddo, State of Louisiana, Revenue Bonds (Taxable QSCB), Series 2011, Sinking Fund," said Sinking Fund to be established and maintained with the Paying Agent or its designee. The Sinking Fund shall be maintained separate from any sinking fund established and maintained in connection with any other bonds of the Issuer, including but not limited to the Outstanding Parity Bonds.

Not less than fifteen (15) days before each Sinking Fund Deposit Date, the Paying Agent shall provide to the Issuer a selection of Government Securities that, either alone or in
combination with other Government Securities, satisfies the Sinking Fund Deposit Requirement. Not less than ten (10) days before each Sinking Fund Deposit Date, an Executive Officer of the Issuer, or his or her designee shall, select the Government Security or Securities from the list provided by the Paying Agent to satisfy the Sinking Fund Deposit Requirement. Not less than one (1) day before each Sinking Fund Deposit Date, the Issuer shall deposit in the Sinking Fund an amount fully sufficient to satisfy the Sinking Fund Deposit Requirement falling due on such Sinking Fund Deposit Date; provided, however, that on the Final Maturity Date, the Issuer shall instead be required to deposit the difference between the amount then held in the Sinking Fund and the Principal Amount of the Bonds. On each Sinking Fund Deposit Date, the Paying Agent shall use the amount deposited by the Issuer in the Sinking Fund to purchase the Government Securities selected by an Executive Officer of the Issuer or his or her designee from the list provided by the Paying Agent. If no Government Securities are available or may be purchased on a Sinking Fund Deposit Date to satisfy the relevant Sinking Fund Deposit Requirement, the Paying Agent shall retain the amount deposited in the Sinking Fund as Cash until such Government Securities are available, at which time the Paying Agent shall comply with the terms of this paragraph.

It is further provided by the Issuer that the sum of all Cash and investments held in the Sinking Fund shall equal, as close as is reasonable possible, the Required Sinking Fund Value set forth below on the relevant Sinking Fund Deposit Date:

For purposes of determining compliance with the Required Sinking Fund Value, the "value" of any Cash or Government Securities held in the Sinking Fund shall be determined as follows:

(a) For Cash, the amount of such Cash; and

(b) For Government Securities, the par of such security plus accrued but unpaid interest on such security (unless such security is in default, in which case the security shall be deemed to have its fair market value, which shall be determined by the Paying Agent based on the bid price list quoted by the Federal Reserve Bank of New York for such security on the valuation date and printed in The Wall Street Journal or The New York Times, or, if such value is not published, based on a determination performed by a nationally recognized and accepted pricing service whose valuation method consists of the composite average of various bid price quotes on the valuation date). Notwithstanding the foregoing, the Issuer shall have the lesser of i) forty-eight months or ii) the length of time until maturity of the Bonds to replenish any deficiency in the Sinking Fund Value due to a default of any Government Securities held in the Sinking Fund.

It is expressly provided that (1) the Issuer shall endeavor to purchase State and Local Government Series securities unless a prevailing reason exists at the time of purchase to do otherwise, (2) the Issuer shall make all reasonable efforts to ensure that the yield on the Sinking Fund for purposes of the QSCB Code Provisions and QSCB Regulations does not exceed 3.83% (which equals the Permitted Sinking Fund Yield in effect on the date of this Resolution), and (3) nothing contained herein shall prohibit the Paying Agent from acting through a designee to satisfy its obligations imposed pursuant to this Section.
The Issuer shall further transfer to the Paying Agent for deposit in the Sinking Fund on or before each Sinking Fund Deposit Date the amount necessary to pay any additional payment amounts due as a result of a QSCB Disqualification Event due on such Sinking Fund Deposit Date.

It shall be specifically understood and agreed, however, and this provision shall be a part of this contract, that after the funds have been budgeted out of the revenues of the Tax for any year sufficient to make all payments required on the Bonds and the Outstanding Parity Bonds herein authorized for that period, and all required amounts for that period have been deposited in the aforesaid sinking funds established for the Bonds and the Outstanding Parity Bonds, then any annual revenues of the Tax remaining in that year shall be free for expenditure by the Issuer for the purposes for which the Tax was authorized.

All Cash and investments held in the Sinking Fund under the terms of this Resolution shall constitute sacred funds for the benefit of the Owners of the Bonds, and shall be secured by said fiduciaries at all times to the full extent thereof in the manner required by law for the securing of deposits of public funds. Neither the cash or Government Securities nor the principal or interest payments on any such Government Securities shall be withdrawn or used for any purpose other than the purchase of additional Government Securities or the payment of the Principal Amount of the Bonds at the Final Maturity Date. The Purchaser is hereby granted an express lien on all moneys deposited and Government Securities held in the Sinking Fund.

Subject to the provisions of this Section, all of the Cash in the Sinking Fund shall be invested in accordance with the provisions of the laws of the State of Louisiana unless available to be used pursuant to the terms of this Resolution within five (5) business days.

SECTION 10) Annual Financial Statements. While any portion of the Bonds is Outstanding, the Issuer shall make available to the Owner its annual audited financial statements no later than 180 days after the applicable fiscal year-end of the Issuer.

SECTION 11) Comprehensive Budget. While any portion of the Bonds is Outstanding, the Issuer shall prepare and adopt a budget at the beginning of each fiscal year and shall furnish to the Owner a copy of such budget upon request of the Owner.

SECTION 12) Application of Proceeds. The Executive Officers are hereby empowered, authorized and directed to do any and all things necessary and incidental to carry out all of the provisions of this Resolution, to cause the Bonds to be prepared or printed, to issue, execute and seal the Bonds, and to effect delivery thereof as hereinafter provided. The proceeds derived from the sale of the Bonds shall be deposited by the Issuer with its fiscal agent bank or banks to be used only for the Qualified Purposes for which the Bonds are issued and paying costs of issuing the Bonds.

SECTION 13) Bonds Legal Obligations. The Bonds shall constitute legal, binding and valid obligations of the Issuer, and shall be the only representation of the indebtedness herein authorized and created.

SECTION 14) Resolution a Contract. The provisions of this Resolution shall constitute a contract between the Issuer, or its successor, and the Owners from time to time of the Bonds and any such Owner may at law or in equity, by suit, action, mandamus or other proceedings, enforce and compel the performance of all duties required to be performed by the Governing Authority or the Issuer as a result of issuing the Bonds.

SECTION 15) Amendment to Resolution. No material modification or amendment of this Resolution, or of any resolution and/or ordinance amendatory hereof or supplemental hereto, may be made without the consent in writing of the Owners of the Bonds.

SECTION 16) Recital of Regularity. This Governing Authority having investigated the regularity of the proceedings had in connection with the Bonds herein authorized and having determined the same to be regular, the Bonds shall contain the following recital, to wit:

"It is certified that this Bond is authorized by and is issued in conformity with the requirements of the Constitution and statutes of this State."

SECTION 17) Effect of Registration. The Issuer, the Paying Agent, and any agent of either of them may treat the Owner in whose name the Bonds is registered as the Owner of such Bond for the purpose of receiving payment of the principal (and redemption price) of such Bond and for all other purposes whatsoever, and to the extent permitted by law, neither the Issuer, the Paying Agent, nor any agent of either of them shall be affected by notice to the contrary.

SECTION 18) Notices to Owner. Wherever this Resolution provides for notice to the Owner of any event, such notice shall be sufficiently given (unless otherwise herein expressly provided) if in writing and mailed, first-class postage prepaid, to the Owner at the address of such Owner as it appears in the Bond Register. Where this Resolution provides for notice in any manner, such notice may be waived in writing by the Owner entitled to receive such notice,
either before or after the event, and such waiver shall be the equivalent of such notice. Waivers of notice by the Owner shall be filed with the Paying Agent and the Issuer, but such filing shall not be a condition precedent to the validity of any action taken in reliance upon such waiver.

SECTION 19) Cancellation of Bonds. Any Bond surrendered for payment, transfer, exchange or replacement, if surrendered to the Paying Agent, shall be promptly canceled by it and, if surrendered to the Issuer, shall be delivered to the Paying Agent and, if not already canceled, shall be promptly canceled by the Paying Agent. The Issuer may at any time deliver to the Paying Agent for cancellation any Bond previously registered and delivered which the Issuer may have acquired in any manner whatsoever, and any Bond so delivered shall be promptly canceled by the Paying Agent. Any canceled Bond held by the Paying Agent shall be disposed of as directed in writing by the Issuer.

SECTION 20) Mutilated, Destroyed, Lost or Stolen Bond. If (1) any mutilated Bond is surrendered to the Paying Agent, or the Issuer and the Paying Agent receive evidence to their satisfaction of the destruction, loss or theft of any Bond, and (2) there is delivered to the Issuer and the Paying Agent such security or indemnity as may be required by them to save each of them harmless, then, in the absence of notice to the Issuer or the Paying Agent that such Bond has been acquired by a bona fide purchaser, the Issuer shall execute, and upon its request the Paying Agent shall register and deliver, in exchange for or in lieu of any such mutilated, destroyed, lost, or stolen Bond, a new Bond of the same maturity and of like tenor and principal amount, bearing a number not contemporaneously outstanding. In case any such mutilated, destroyed, lost or stolen Bond has become or is about to become due and payable, the Issuer in its discretion may, instead of issuing a new Bond, pay such Bond. Upon the issuance of any new Bond under this Section, the Issuer may require the payment by the Owner of a sum sufficient to cover any tax or other governmental charge that may be imposed in relation thereto and any other expenses (including the fees and expenses of the Paying Agent) connected therewith. Every new Bond issued pursuant to this Section in lieu of any mutilated, destroyed, lost or stolen bond shall constitute a replacement of the prior obligation of the Issuer, whether or not the mutilated, destroyed, lost or stolen Bond shall be at any time enforceable by anyone and shall be entitled to all the benefits of this Resolution equally and ratably with any other Outstanding Bond. Any additional procedures set forth in the Agreement, authorized in this Resolution, shall also be available with respect to any mutilated, destroyed, lost or stolen Bond. The provisions of this Section are exclusive and shall preclude (to the extent lawful) all other rights and remedies with respect to the replacement and payment of any mutilated, destroyed, lost or stolen Bond.

SECTION 21) Discharge of Resolution; Defeasance. If the Issuer shall pay or cause to be paid, or there shall otherwise be paid to the Owner, the Principal Amount (and redemption price) of, and any other amounts owed with respect to the Bonds, at the times and in the manner stipulated in this Resolution, then the pledge of the money, securities and funds pledged under this Resolution and all covenants, agreements and other obligations of the Issuer to the Owner shall thereupon cease, terminate and become void and be discharged and satisfied, and the Paying Agent shall pay over or deliver all money held by it under this Resolution to the Issuer. Portions of the Principal Amount for the payment of which money shall have been set aside and shall be held in trust (through deposit by the Issuer of funds for such payment or otherwise) at the Final Maturity Date thereof shall be deemed to have been paid within the meaning and with the effect expressed above in this Section if they are defeased in the manner provided by Chapter 14 of Title 39 of the Louisiana Revised Statutes of 1950, as amended. Notwithstanding the foregoing, no defeasance of the Bonds shall be permitted without delivery to the Owners of the Bonds of an opinion of a nationally recognized bond counsel that such defeasance will not effect the ability of the Owners to claim the federal tax credits under Section 54A of the Code which such Owners would otherwise be permitted to claim.

SECTION 22) Successor Paying Agent; Paying Agent Agreement. The Issuer will at all times maintain a Paying Agent meeting the qualifications hereinafter described for the performance of the duties hereunder for the Bonds. The designation of the initial Paying Agent in this Resolution is hereby confirmed and approved. The Issuer reserves the right to appoint a successor Paying Agent by (a) filing with the Person then performing such function a certified copy of official proceedings of the Governing Authority giving notice of the termination of the Agreement and appointing a successor and (b) causing notice to be given to the Owner. Every Paying Agent appointed hereunder shall at all times be a bank or trust company organized and doing business under the laws of the United States of America or of any state, authorized under such laws to exercise trust powers, and subject to supervision or examination by Federal or State authority. The Executive Officers are hereby authorized and directed to execute an appropriate Agreement with the Paying Agent for and on behalf of the Issuer in such form as may be
satisfactory to said officers, the signatures of said officers on such Agreement to be conclusive evidence of the due exercise of the authority granted hereunder.

SECTION 23) Covenants Relating to the QSCB Code Provision, QSCB Regulations and Other Matters. The School Board hereby certifies that:

1) 100% of the available project proceeds, as defined in the Code, will be spent for Qualified Purposes;
2) 100% of the available project proceeds, as defined in the Code, will be spent at public school facilities within the jurisdiction of the School Board;
3) Within the six-month period beginning on the Date of Issuance, the Issuer will incur a binding commitment with a 3rd party to spend at least 10% of such available project proceeds on Qualified Purposes;
4) Any reimbursement of proceeds of the Bonds for capital expenditures for Qualified Purposes incurred prior to the Date of Issuance of the Bonds will be undertaken strictly in accordance with 54A(d)(2)(D) of the Code;
5) All applicable State and local laws governing conflicts of interest have and will continue to be satisfied with respect to the Bonds;
6) The Issuer will redeem all nonqualified Bonds pursuant to Section 3(a) of this Resolution;
7) The Issuer will comply with the terms of the Davis-Bacon Act, to the extent required by the American Recovery and Reinvestment Act of 2009;
8) Subject to the Terms of the Louisiana Governmental Claims Act (Sections 13:5101, et seq., of the Louisiana Revised Statutes of 1950, as amended), the Issuer is not entitled to claim immunity on the grounds of sovereignty or other similar grounds with respect to (i) itself for claims arising ex contractu or (ii) the enforcement of its obligations under this Resolution or the Bonds; and
9) The Issuer will submit reports similar to those required under Section 149(e) of the Code.

SECTION 24) Arbitrage. The Issuer covenants and agrees that, to the extent permitted by the laws of the State of Louisiana, it will comply with the provisions of Section 148 of the Internal Revenue Code of 1986 and any amendment thereto (the "Code"), as modified by the QSCB Code Provisions and QSCB Regulations, with respect to the proceeds of the Bonds.

SECTION 25) Disclosure Under SEC Rule 15c2-12(b). It is recognized that the Issuer will not be required to comply with the continuing disclosure requirements described in the Rule 15c2-12(b) of the Securities and Exchange Commission [17 CFR § 240.15c2-12(b)], because:

(a) the Bonds are not being purchased by a broker, dealer or municipal securities dealer acting as an underwriter in a primary offering of municipal securities, and
(b) the Bonds are being sold to not more than 35 financial institutions (i.e., no more than thirty-five persons) constituting an "Eligible Person", pursuant to the Rules of the Securities and Exchange Commission which (i) have such knowledge and experience in financial and business matters that it is capable of evaluating the merits and risks of the prospective investment in the Bonds and (ii) are not purchasing the Bonds for more than one account or with a view to distributing the Bonds.

SECTION 26) Default. Upon an Event of Default, the Owner may pursue any and all remedies, including but not limited to an action for mandamus, that may exist at law or in equity pursuant to the law of the State at the time of such Event of Default.

SECTION 27) Acceleration. The Issuer represents that it has not granted to any Person holding any indebtedness issued or incurred by the Issuer which is payable from or secured solely by a lien on the revenues of the Tax the right to accelerate the Issuer’ obligation to repay such indebtedness following the occurrence of a default or event of default by the Issuer with respect to such indebtedness. The Issuer covenants that it shall not grant the remedy of acceleration to any Person holding any indebtedness issued or incurred by the Issuer, which is payable from or secured solely by a lien on the revenues of the Tax, upon the occurrence of any event of default with respect to such indebtedness unless the Issuer has received the prior written consent of the Owners of the Bonds. In the event that the Issuer shall grant the remedy of acceleration to any Person holding any indebtedness issued or incurred by the Issuer which is payable from or secured solely by a lien on the revenues of the Tax, upon the occurrence of a default or event of default with respect to such indebtedness or upon the occurrence and continuation of an Event of Default hereunder the Owners of a majority of the outstanding principal amount of the Bonds, in their sole discretion, may deliver a notice to the Issuer declaring all amounts outstanding hereunder and under the Bonds to be immediately due and payable and such amounts shall then be immediately due and payable.
SECTION 28) Publication. A copy of this Resolution shall be published immediately after its adoption in one (1) issue of the official journal of the Issuer.

SECTION 29) Award of Bonds and Incorporation of Commitment Letter. The Superintendent is authorized and directed to execute the Commitment Letter on behalf of the Issuer. All of the provisions of the Commitment Letter not otherwise addressed herein are incorporated herein by reference. It is intended by the Issuer and the Purchaser that the Commitment Letter and this Resolution shall constitute a binding, written contract for the sale of the Bonds. The Bonds shall be delivered to said Purchaser upon the payment of the Principal Amount thereof.

SECTION 30) Severability; Application of Subsequently Enacted Laws. In case any one or more of the provisions of this Resolution or of the Bonds shall for any reason be held to be illegal or invalid, such illegality or invalidity shall not affect any other provisions of this Resolution or of the Bonds, but this Resolution and the Bonds shall be construed and enforced as if such illegal or invalid provisions had not been contained therein. Any constitutional or statutory provisions enacted after the date of this Resolution which validate or make legal any provision of the Resolution and/or the Bonds which would not otherwise be valid or legal, shall be deemed to apply to this Resolution and to the Bonds.

SECTION 31) Section Headings. The headings of the various sections hereof are inserted for convenience of reference only and shall not control or affect the meaning or construction of any of the provisions hereof.

SECTION 32) Effective Date. This Resolution shall become effective immediately.

This resolution having been submitted to a vote, the vote thereon was as follows:

And the resolution was declared adopted on this, the 18th day of October, 2011.

/s/ Gerald Dawkins /s/Lillian Priest
Secretary President

8.05 Rewording of the Youree Drive/Broadmoor Magnet Component Resolution. The board approved the rewording of the Youree Drive/Broadmoor Magnet Component Resolution as follows: That the procedures established by the Caddo Parish School Board on January 17, 2006 for placement of students in the Broadmoor and Youree Drive Middle School Magnet component programs on a first come first served basis be revised as follows:

That the students seeking admissions to the Broadmoor and Youree Drive Middle Schools magnet component programs shall use the same joint application as the applicants seeking admission to Caddo Middle Magnet School and Herndon Magnet School;

That the students seeking admissions to Broadmoor and Youree Drive Middle Schools magnet component programs shall be administered the same standardized admission test as the applicants seeking admission to Caddo Middle Magnet School and Herndon Magnet School;

That applicants who meet the qualifications for admission will be ranked according to their admissions test scores, and admissions shall be based upon ranked test scores. There will be no preference given to siblings of enrolled students.
8.06 December CPSB Meeting Date. The board voted to change the December 20, 2011 CPSB meeting to Tuesday, December 13, 2011 due to the Christmas holidays.

8.08 2011-12 Corrective Action Plan and Budget. The board approved the 2011-12 Corrective Action Plan and proposed budget as recommended by staff and submitted in the mailout.

PERSONNEL RECOMMENDATIONS

Mr. Ramsey moved, seconded by Mrs. Bell, to approve the personnel recommendation as recommended by the superintendent and submitted in the mailout.

Mr. Hooks moved to postpone action on the superintendent’s recommendation for this position of custodian supervisor. Motion failed for lack of a second. Vote on the original motion carried with Board member Hooks opposed and Board members Riall, Green, Seamster, Trammel, Priest, Crawford, Rachal, Ramsey and Bell supporting the motion.

BIDS (PURCHASING)

Mr. Rachal moved, seconded by Mrs. Bell, to approve the following bids as recommended by staff and submitted in the mailout (1) Student Keyboard Packages for Music Department to be re-bid at a later date; and (2) School Specialty, total unit price of $66.24, for student backpacks and supplies for Title I. Mr. Rachal asked staff to explain the $65 cost for these backpacks. Mr. Graham stated that these are for the Homeless Program throughout the parish and they are packaged with supplies needed for school. Mr. Rachal asked if this has been approved in the Title I budget and will not impact the individual schools? Mrs. Parker stated that it comes off the top of the Title I budget to accommodate special needs and it doesn’t impact the individual school budgets. Mrs. Bell noted that Caddo has approximately 1,100 homeless students and she believes it is important that when possible to do what we can through Title I to help these students. Vote on the motion carried.

OT/PT PAY SCHEDULES

Mr. Rachal moved, seconded by Mrs. Crawford that Rahmberg revisit the OT/PT pay schedule and verify that what we are doing relative to the OT/PT pay is accurate and to provide the board with a recommendation on changing how their pay is based. Mr. Rachal shared that he visited with staff on this matter; and since there are some unknown factors, he would like for Rahmberg to revisit this and address his concerns that we are taking medical professionals and trying to determine their pay according to educational professionals. Vote on the motion carried with Board members Hooks and Bell opposed and Board members Riall, Green, Seamster, Trammel, Priest, Crawford, Rachal, and Ramsey supporting the motion.

SUPERINTENDENT’S REPORT

Superintendent Dawkins announced that he will send the board a summary of the Graduation Cohort Report received on Monday; that report included two of Caddo’s schools (Huntington and Woodlawn) among the schools in the state that made double digit gains.

Dr. Dawkins also shared an assignment sheet for the CPSB Policy Review reflecting the sections of the Policy Manual on which board members will serve, as well as representatives from the employee organizations.

NEW BUSINESS
Mr. Ramsey requested that the Audit of the Purchasing Department be on the November agenda.

ANNOUNCEMENTS AND REQUESTS

Mary Trammel asked the superintendent to look into resolving the transportation problems associated with the Operation Graduation Program at Woodlawn High School.

Mrs. Bell announced that Huntington High School band won superior and she would like to see this recognition in the media. She also invited board members to attend the State Fair at 4:00 on October 26th and support the 4-H Program and the children.

Mr. Riall announced he will bring recommendations in the not too distant future regarding the possible sale of Caddo Parish School Board abandoned properties in northern Caddo Parish (Hosston, Pine Valley and Rodessa). Mr. Hooks also reported that Ted Cox contacted him regarding his interest in purchasing the George P. Hendrix property.

Mr. Hooks asked that the superintendent look into speedy replacements of two teaching positions (Chemistry and Algebra) in the Fair Park Medical Careers Program.

Mr. Hooks also asked for a breakdown on the figures provided by school for construction projects during the summer of 2011. He also expressed appreciation for the speedy response to his request on the Turnaround Program; however, he stated he is confused by the response because they were paid a stipend the previous summer. Dr. Dawkins noted they could have possibly been paid, but not from those funds.

Ms. Seamster expressed her appreciation for staff assistance in conducting meetings at schools in her district.

Miss Green asked the superintendent to look into the need for books at the Newton Smith Sixth Grade Center library.

Mr. Hooks asked the superintendent about an up-to-date Minifacts that includes the 7-12 grade configurations.

EXECUTIVE SESSION

Student Readmission Appeal. Mr. Riall moved, seconded by Miss Green, to go into executive session for the purpose of hearing a student readmission appeal. Vote on the motion carried and while the board did not actually go into executive session, they did reconvene in open session at approximately 5:54 p.m. Mr. Ramsey moved, seconded by Mr. Hooks, that the board accept staff’s recommendation for Z.R. Vote on the motion carried with Board member Priest opposed and Board members Riall, Green, Seamster, Hooks, Trammel, Crawford, Rachal, Ramsey and Bell supporting the motion.

Adjournment. Mr. Riall moved, seconded by Mr. Ramsey, to adjourn. Vote on the motion carried and the meeting adjourned at approximately 5:56 p.m.
The Caddo Parish School Board (CPSB) met in regular session in its office at 1961 Midway, Shreveport, Louisiana at approximately 4:30 p.m. on Tuesday, October 18, 2011 with President Lillian Priest presiding and the following school board members present being a quorum: Steve Riall, Jasmine Green, Debra Seamster, Curtis Hooks, Mary Trammel, Bonita Crawford, Barry Rachal, Larry Ramsey, and Dottie Bell. Also present were Superintendent Gerald Dawkins and Legal Counsel Reginald Abrams. Mr. Riall led the prayer and Pledge of Allegiance.

Mrs. Bell moved, seconded by Ms. Seamster, approval of the minutes of the September 20, 2011 and October 4, 2011 CPSB meetings as submitted. Vote on the motion carried unanimously.

PRESENTATIONS AND RECOGNITIONS

Dr. Mary Nash-Robinson, on behalf of the board and superintendent, recognized the following students/employees. The board president and superintendent presented each with a certificate recognizing their accomplishment. Administrators, family and friends were also recognized.

JROTC: Lt. Col. Daniel Durr recognized the following Caddo students: (1) Cadet Avalon Collins, Green Oaks, appointed Caddo Parish Corps Commander; and (2) Cadet Rueben Cheng, Caddo Magnet High School and (3) Cadet Shamariah Jacobs, Captain Shreve High School for receiving the JROTC Legion of Valor Bronze Cross for Achievement Award.

DECA Awards. Sam Hussein, DECA President, Byrd High School Chapter, was recognized for participating in a number of service activities in the community, as well as for writing a letter to the Superintendent regarding DECA and its importance in preparing students for business now and in the future.

Support Employee Awards. Cleveland White recognized the following as the 2010-2011 Caddo Parish School Board support employees: (1) (Elementary Division) Patricia Johnson, aide at Cherokee Park; (2) (Middle School Division) Priscilla Marshall, special education teacher’s aide at Caddo Middle Career & Technology; (3) (High School Division) Bruce Pennywell, groundskeeper, Caddo Career & Technology Center; (4) (Academic Affairs) Laverne Coleman, Secretary, area school director; (5) (Support Services) Johnny B. Cannon, Jr. crew chief in Maintenance Department; (6) (Human Resources) Dawn Porteau, secretary in 504 Special Services Department; and (7) (Superintendent’s Division) Benjamin Matthew Isgitt, media specialist, Communications & Marketing.

Counselors of the Year. Karen Rothel, Riverside Elementary, and Carol Brill, Caddo Magnet High, were recognized as Louisiana Elementary Counselor of the Year and Louisiana Secondary Counselor of the Year, respectively.

Blue Ribbon School. Eden Gardens Elementary Magnet was recognized for being named a Blue Ribbon School by the U. S. Department of Education.

2011 Professionalism Award. Attorney Reginald Abrams was recognized as the Shreveport Bar Association’s 2011 Professional Award Recipient.

National School Bus Safety Week. Proclamations from Governor Jindal, Mayor Glover, and the Caddo Parish Commission were presented to Otis Jones, director of Transportation, in recognition of October 17-21 as National School Bus Safety Week, and Thursday, October 20th
as School Bus Driver Appreciation Day. Carl Pierson of the Caddo Parish Commission read and presented the proclamation on behalf of the Commission.

Newly Appointed Administrators. Dr. Mary Nash Robinson introduced the following newly appointed Caddo Parish administrators: (1) Rosalyn Glover-Bryant, Supervisor of Compliance, Parental and Community Involvement; and (2) Mary Harris, principal, South Highlands Elementary Magnet School.

Dr. Robinson also announced that Kristan Schneider, Communications secretary, will be leaving Caddo to pursue other endeavors. Students from the Captain Shreve High School broadcasting class were recognized as being in the audience recording portions of the meeting.

VISITORS

Jackie Lansdale, Caddo Federation of Teachers/Support Personnel, expressed appreciation to the superintendent and staff for addressing concerns of the Filipino teachers, for the superintendent’s agreement to ask the Discipline Review Committee to strategize on areas relative to school safety issues, i.e. assault and battery on school employees and identifying weapons, and for assistance offered to help a student enroll in an online program and not become a drop-out statistic. Mrs. Lansdale reported that the Federation continues to hold academies for new teachers and the numbers continue to grow, with the next workshop on strategies for effective classroom management scheduled for November 12th. She also noted the following areas of concern: (1) how teachers and employees are being treated at the school site and the possibility of implementing climate surveys at each work site to hopefully define areas in which changes can be made to ensure better working and learning environments, and (2) escalation of the cry of special education teachers who are receiving more and more edicts and loaded down with mounds of paperwork. She also expressed appreciation for the sponsorships in the Federation’s first education forum.

ESTABLISH THE AGENDA AND CONSENT AGENDA

Superintendent Dawkins highlighted items for the board’s consideration asking that Virtual Services be postponed to the November meeting. Grant Schleuter, bond counsel from Foley, Judell in New Orleans, shared that Jim Lee and Superintendent Dawkins worked closely with Chase Bank and received the 0% interest rate for the QSCB (Qualified School Construction Bonds). To his knowledge, he added that Caddo is the only district receiving the 0% interest rate on these bonds for both bond issues. Mr. Schleuter also reported that for the $20,707,000 in bonds, the district will pay back roughly $17.8 million.

CONFIRM THE CONSENT AGENDA

President Priest announced that Items 6.02-6.03, 6.05, 7.03, 8.01-8.06 and 8.08 are the consent agenda. Mr. Riall moved, seconded by Miss Green, to approve the agenda and consent agenda for the October 18, 2011 CPSB meeting. Vote on the motion carried unanimously. The following is a summary of the board’s actions on the consent agenda items.

Item No. 6

6.02 Requests for Leaves. The board approved the following requests for leaves as recommended by the superintendent and submitted in the mailout.

Certified

Catastrophic Leave, September 7, 2011-October 18, 2011
Racheal Knudson, Teacher, Newton Smith 6th Grade Academy, 5 years
Sabbatical Leave (Study) Spring Semester 2012
Andrew Coleman, Teacher, Creswell Elementary, 3 years
Kay D. Law, Teacher, Huntington High School, 16 years
Leave Without Pay, November 8, 2011-November 11, 2011
Melanie M. Jett, Teacher, Southwood High School, 13 years

Classified
Catastrophic Leave, September 2, 2011-September 22, 2011
Willie Harris, Jr., Transportation, Bus Driver, 4 years

6.03 Other Personnel Transaction Reports. The board approved the other personnel transaction reports for the period of August 21, 2011 – September 20, 2011 as recommended by the superintendent and submitted in the mailout.

6.05 Out of State Travel Requests (General Fund). The board approved requests for out of state travel (general fund) as recommended by the superintendent and submitted in the mailout.

Item No. 7

7.03 Purchasing – Annual Salvage Sale. The board authorized staff to hold the annual auction sale of used furniture and equipment on December 10, 2011 as submitted in the mailout.

Item No. 8

8.01 Annual Group Insurance Renewals. The board approved the group insurance renewals as recommended by staff and submitted in the mailout.

8.02 Approval of Beverage Contract(s) – (1) Coca Cola and North Caddo HS and (2) Coca Cola and Green Oaks. The board approved beverage contracts for Coca Cola and North Caddo High School and Coca Cola and Green Oaks as recommended by staff and submitted in the mailout.

8.03 General Fund Budget Revision. The board approved the General Fund Budget Revision as recommended by staff and submitted in the mailout.

8.04 Approval of Resolution Incurring Debt and Issuance of $20,707,000 of Qualified School Construction Bonds. The board approved the following resolution incurring debt and the issuance of $20,707,000 of Qualified School Construction Bonds as recommended by staff and submitted in the mailout.

RESOLUTION

A resolution providing for the incurring of debt and issuance of Twenty Million Seven Hundred Seven Thousand Dollars ($20,707,000) of Revenue Bonds (Taxable QSCB), Series 2011, of the Parish School Board of the Parish of Caddo, State of Louisiana; prescribing the form, terms and conditions of such Bonds and providing for the payment thereof; and providing for other matters in connection therewith.

WHEREAS, the Parish School Board of the Parish of Caddo, State of Louisiana (the "Issuer") is authorized by the State Constitution to levy a special tax of seven and ninety-six hundredths (7.96) mills (such rate being subject to adjustment from time to time due to reassessment) in each year (the "Tax"); and
WHEREAS, the Issuer has no outstanding indebtedness of any kind payable from a pledge or dedication of the avails or proceeds of the Tax, EXCEPT for $17,359,000 Revenue Bonds (Taxable QSCB), Series 2009 (the "Outstanding Parity Bonds"); and

WHEREAS, Section 1430 of Title 39 of the Louisiana Revised Statutes of 1950, as amended authorizes the Issuer to make and enter into contracts dedicating the pledge and dedication of the funds to be derived by the Issuer from the Tax; and

WHEREAS, on April 6, 2010, the Issuer gave its preliminary approval to the issuance of the hereinafter defined Bonds; and

WHEREAS, the Issuer now desires to incur debt and issue Twenty Million Seven Hundred Seven Thousand Dollars ($20,707,000) of its Revenue Bonds (Taxable QSCB), Series 2011 (the "Bonds"), in the manner authorized and provided by the aforesaid sections of the Louisiana Revised Statutes of 1950, as hereinafter provided, for the purpose of construction, rehabilitation or repair of public school facilities, including equipping of school facilities improved with Bond proceeds, and paying the costs of issuance of the Bonds; and

WHEREAS, an offer to purchase the Bonds has been submitted by JPMorgan Chase Bank, N.A., and the Issuer desires to accept the terms of said offer and provide for the sale of the Bonds to the purchaser at the price and in the manner hereinafter provided; and

WHEREAS, it is the desire of the Issuer to fix the details necessary with respect to the issuance of the Bonds and to provide for the authorization and issuance thereof; and

WHEREAS, it is the further desire of the Issuer to provide for the sale of the Bonds to the Purchaser at the price and in the manner hereinafter provided; and

WHEREAS, the Issuer further desires to qualify said Bonds under Section 54F of the Internal Revenue Code of 1986, as amended, as Qualified School Construction Bonds; and

WHEREAS, pursuant to the QSCB Regulations (herein defined), the Issuer has received an allocation of $20,070,000 for calendar year 2010, which amount has been held over to calendar year 2011;

NOW, THEREFORE, BE IT RESOLVED by the Parish School Board of the Parish of Caddo, State of Louisiana, acting as the governing authority of the Parish of Caddo, State of Louisiana, for school purposes, that:

SECTION 1) Definitions. As used herein, the following terms shall have the following meanings, unless the context otherwise requires:

"Act" means Section 1430 of Title 39 of the Louisiana Revised Statutes of 1950, as amended, and other constitutional and statutory authority.

"Additional Parity Obligations" means any additional pari passu bonds which may hereafter be issued, pursuant to Section 8 hereof, on a parity with the Bonds.

"Agreement" means the agreement to be entered into between the Issuer and the Paying Agent pursuant to this Resolution.

"Bonds" means the Issuer's Revenue Bonds (Taxable QSCB), Series 2011, authorized by this Resolution in the total aggregate principal amount of Twenty Million Seven Hundred Seven Thousand Dollars ($20,707,000), whether initially delivered or issued in exchange for, upon transfer of, or in lieu of any bond previously issued.

"Bond Register" means the records kept by the Paying Agent at its principal corporate office in which registration of the Bonds and transfers of the Bonds shall be made as provided herein.

"Bond Year" means the one-year period ending on each Sinking Fund Deposit Date, provided that the initial bond year may be a period shorter than one year.

"Cash" means cash and cash equivalents.

"Commitment Letter" shall mean the offer to purchase by the Purchaser attached hereto as Exhibit A.

"Credit Allowance Date" means with respect to the Bonds, each March 15, June 15, September 15 and December 15 on which any portion of the principal amount of the Bonds remains unpaid, and includes the last day on which the Bonds are outstanding.
"Credit Rate" means five and fifteen hundredths percent per annum (5.15%), the rate designated by the Secretary of the United States Treasury on the date of this Resolution, which is the date of the Issuer’s acceptance of the Commitment Letter of the Purchaser, which Commitment Letter is a binding, written contract for the sale or exchange of the Bonds.

"Date of Issuance" means the date the Issuer receives payment for the Bonds, which is anticipated to be November 16, 2011.

"Event of Default" means the occurrence of any of the following events unless waived in writing by the Owners:

1. a failure to pay the principal of or interest or premium, if any, on any Bond when the same shall become due and payable whether at maturity, upon redemption, or otherwise and such failure continues for two (2) days after the Issuer’s receipt of written notice from the Owner or the Paying Agent;
2. a failure of the Issuer to make the Principal Account Deposit Requirement on any Principal Account Deposit Date and such failure continues for two (2) days after the Issuer’s receipt of written notice from the Owner or the Paying Agent;
3. a failure of the Issuer to pay any other amount payable hereunder or with respect to any Bond (other than those specified in (1) and (2) above) when the same shall become due and payable and such failure continues for seven (7) days after the Issuer’s receipt of written notice from the Owner or the Paying Agent;
4. an Event of Insolvency shall occur with respect to the Issuer;
5. a failure by the Issuer to perform any covenant, agreement or condition set forth in Sections 3(a), 7, 8, 23, 24 or 27 of this Resolution; or
6. a failure by the Issuer in the performance or observance of any of the covenants, agreements or conditions on its part in this Resolution or in the Bonds, and such failure continues for thirty (30) days after the Issuer’s receipt of written notice from the Owner or the Paying Agent unless the Issuer has instituted corrective actions satisfactory to the Owners within such 30-day period and diligently pursues such actions until such default is remedied.

"Event of Insolvency" means, with respect to the Issuer, the occurrence of one or more of the following events:

1. the issuance, under the laws of any state or under the laws of the United States of America, of an order of rehabilitation, liquidation or dissolution of the Issuer;
2. the commencement by or against the Issuer of a case or other proceeding seeking liquidation, reorganization or other relief with respect to the Issuer or its debts under any bankruptcy, insolvency or other similar state or federal law now or hereafter in effect, including, without limitation, the appointment of a trustee, receiver, liquidator, custodian or other similar official for the Issuer or there shall be appointed or designated with respect to it, an entity such as an organization, board, commission, authority, agency or body to monitor, review, oversee, recommend or declare a financial emergency or similar state of financial distress with respect to it or there shall be declared or introduced or proposed for consideration by it or by any legislative or regulatory body with competent jurisdiction over it, the existence of a state of financial emergency or similar state of financial distress in respect of it;
3. the inability or failure of the Issuer to generally pay its debts as they become due;
4. the declaration of a moratorium with respect to the payment of the debts of the Issuer;
5. an authorized Executive Officer of the Issuer shall admit in writing its inability to pay its debts when due; or
6. the initiation of any action in furtherance of or to authorize any of the foregoing by or on behalf of the Issuer.

"Executive Officers" means, collectively, the President and the Secretary of the Issuer.

"Final Maturity Date" means June 1, 2026.
"Fiscal Year" means the one-year accounting period beginning July 1 of each year, or such other period as may be designated by the Governing Authority as the fiscal year of the Issuer.

"Governing Authority" means the Parish School Board of the Parish of Caddo, State of Louisiana for school purposes, and any successor thereto.

"Government Securities" means noncallable direct general obligations of, or obligations the principal of and interest on which are unconditionally guaranteed by, the United States of America, which may be United States Treasury Obligations such as the State and Local Government Series or which may consist of specified portions of interest thereon, such as those securities commonly known as CATS, TIGRS, and STRPS, and may be in book-entry form; provided, however, that no Government Security shall mature or be payable (in whole or in part) after the Final Maturity Date.

"Issuer" or "School Board" means the Parish School Board of the Parish of Caddo, State of Louisiana.

"Maximum Annual Debt Service" means the highest amount of principal and interest due on an obligation in any Fiscal Year, provided that if there is outstanding any balloon indebtedness subject to mandatory sinking fund payments or redemptions, such balloon indebtedness shall be calculated as amortizing on the dates and in the amounts such mandatory sinking fund payments or redemptions are required rather than on the date such indebtedness matures; and further provided that if any interest payments due on any indebtedness are to be subsidized by payments paid or to be paid by the United States Department of the Treasury, the amount of such interest payments shall be reduced by an amount equal to the payments paid or to be paid during such period by the United States Department of the Treasury that are pledged as security for such indebtedness.

"Outstanding" when used with respect to the Bonds means, as of the date of determination, any Bond theretofore issued and delivered under this Resolution, except:

1. Any Bond theretofore canceled by the Paying Agent or delivered to the Paying Agent for cancellation;
2. Any Bond for which payment or redemption sufficient funds have been theretofore deposited in trust for the owners of such Bond with the effect specified in this Resolution or by law, provided that if such Bond is to be redeemed, irrevocable notice of such redemption has been duly given or provided for pursuant to this Resolution or waived;
3. Any Bond in exchange for or in lieu of which another Bond has been registered and delivered pursuant to this Resolution; and
4. Any Bond alleged to have been mutilated, destroyed, lost or stolen which may have been paid as provided in this Resolution or by law.

"Outstanding Parity Bonds" shall mean the Issuer’s $17,359,000 Revenue Bonds (Taxable QSCB), Series 2009.

"Owner" when used with respect to any Bond means the Person or Persons constituting a taxpayer in whose name(s) such Bond is registered in the Bond Register.

"Paying Agent" means The Bank of New York Mellon Trust Company, N.A., Baton Rouge, Louisiana, until a successor Paying Agent shall have been appointed pursuant to the applicable provisions of this Resolution and thereafter "Paying Agent" shall mean such successor Paying Agent.

"Person" means any individual, corporation, partnership, joint venture, association, joint-stock company, trust, unincorporated organization or government or any agency or political subdivision thereof.

"Principal Amount" means $20,707,000, less any amount redeemed as a result of mandatory redemption required pursuant to Section 3(a) of this Resolution.

"Purchaser" means JPMorgan Chase Bank, N.A., Monroe, Louisiana.

"Qualified Purposes" means construction, rehabilitation and repair of public school facilities within the jurisdiction of the Issuer, including equipping of school facilities improved with Bond proceeds.
"QSCB Code Provision" means Section 54F of the Code and applicable portions of Section 54A of the Code.

"QSCB Disqualification Event" has the meaning given it in Section 3 of this Resolution.

"QSCB Regulations" means, collectively, IRS Notice 2009-35 and IRS Notice 2010-17.

"Required Sinking Fund Value" means for each Sinking Fund Deposit Date the corresponding value required as set forth in Section 9 of this Resolution.

"Resolution" means this resolution authorizing the issuance of the Bonds, as it may be supplemented and amended.

"School System" means the Caddo Parish School Board System.

"Sinking Fund" means the "Parish School Board of the Parish of Caddo, State of Louisiana, Revenue Bonds (Taxable QSCB), Series 2011, Sinking Fund" established pursuant to Section 9 herein.

"Sinking Fund Deposit Date" means June 1st of each year, beginning June 1, 2012 and ending on June 1, 2026.

"Sinking Fund Deposit Requirement" means on each Sinking Fund Deposit Date, a cash deposit, together with any amounts then held in the Sinking Fund, in an amount sufficient to meet the Required Sinking Fund Value for such Sinking Fund Deposit Date.

"State" means the State of Louisiana.

"Superintendent" means the Superintendent of the School Board.

"Tax" means the special tax of seven and ninety-six hundredths 7.96 mills (such rate being subject to adjustment from time to time due to reassessment), and authorized by the State Constitution to be levied and collected annually by the Issuer in each year.

SECTION 2) Authorization of Bond; Maturity. (a) In compliance with the terms and provisions of the Act, the QSCB Code Provision, the QSCB Regulations, other constitutional and statutory authority, there is hereby authorized the incurring of indebtedness of Twenty Million Seven Hundred Seven Thousand Dollars ($20,707,000) for, on behalf of, and in the name of the Issuer, for the purpose of construction, rehabilitation or repair of public school facilities, including equipping of school facilities improved with Bond proceeds, and paying the costs of issuance of the Bonds. To represent said indebtedness, this Governing Authority does hereby authorize the issuance of Revenue Bonds (Taxable QSCB), Series 2011, of the Issuer, in the amount of Twenty Million Seven Hundred Seven Thousand Dollars ($20,707,000). Any Bond issued hereby shall be in the form of a fully registered bond, shall be dated the Date of Issuance, and shall be numbered R-1. Subject to the provisions of Section 3, the Bonds shall become due and payable and mature on the Final Maturity Date.

(b) Payment of Bonds. The principal of the Bonds upon maturity or redemption shall be payable by check of the Paying Agent mailed or delivered by the Paying Agent to the Owner thereof (determined as of the close of business on the day before the Final Maturity Date) at the address shown on the Bond Register upon presentation and surrender of the Bonds at the principal corporate trust office of the Paying Agent. Any Bond delivered under this Resolution upon transfer of, in exchange for or in lieu of any other Bond shall carry all the rights which were carried by such other Bond.

No Bond shall be entitled to any right or benefit under this Resolution, or be valid or obligatory for any purpose, unless there appears on such Bond a certificate of registration, substantially in the form provided in this Resolution, executed by the Paying Agent by manual signature.

The Bonds are hereby issued on a parity with the Outstanding Parity Bonds with respect to the avails or proceeds of the Tax, and the Bonds shall rank equally with and enjoy complete parity of lien with the Outstanding Parity Bonds on the avails or proceeds of the Tax in each of the Fiscal Years during which the Bonds and the Outstanding Parity Bonds are outstanding. It is certified that the Issuer has complied with, or will comply with prior to the issuance of the Bonds, all the terms and conditions for the issuance of Additional Parity Obligations set forth in the resolution authorizing the issuance of the Outstanding Parity Bonds.

(c) Designation as Qualified School Construction Bond. In accordance with the QSCB Code Provision, the Issuer hereby designates the Bonds as Qualified School Construction Bonds.
SECTION 3) Redemption Provisions. The Bonds are not subject to redemption or prepayment by the Issuer prior to their stated maturity except as specified in this section as follows:

(a) To the extent that less than 100% of the "available project proceeds" of the Bonds (as defined in the QSCB Regulations) are expended for Qualified Purposes by the close of the 3-year period beginning on the Date of Issuance (or if an extension of such expenditure period has been received by the Issuer from the Secretary of the United States Treasury Department, by the close of the extended period) the Issuer shall redeem all of the non-qualified Bonds within 90 days after the end of such period at a redemption price equal to the principal amount of the Bonds to be redeemed, plus a "make whole" amount as calculated pursuant to this Section. A partial redemption of the Bonds as described in this paragraph shall reduce the annual Sinking Fund Deposit Requirement payments (described in Section 9 hereof) on a pro-rata basis; and

(b) The Issuer may elect to redeem the Bonds in whole but not in part prior to maturity at its option in the event the Internal Revenue Service issues a ruling, notice or final determination adversely affecting the tax credits related to the Bonds or the Owner obtains an opinion of a nationally recognized bond counsel, subject to review by the bond counsel to the Issuer, that the Bonds no longer constitute "qualified school construction bonds" pursuant to Section 54F of the Code (each a "QSCB Disqualification Event") at a redemption price equal to the principal amount of the Bonds to be redeemed, plus a "make whole" amount as calculated pursuant to this Section. Redemption of the Bonds by the Issuer pursuant to this Section 3(b) shall occur not later than the 90th day following the QSCB Disqualification Event.

Official notice of such call for redemption of the Bonds, or any portion thereof, shall be given by the Paying Agent by means of first class mail, postage prepaid, by notice deposited in the United States mails not less than ten (10) days prior to the redemption date addressed to the Owner of the Bonds to be redeemed at his address as shown on the Bond Register.

In the event the Bonds, or any portion thereof, are redeemed prior to the Final Maturity Date pursuant to this Section, the Issuer will pay to the Owner thereof the portion of the Principal Amount being redeemed that is held by such Owner, plus a "make-whole" amount to compensate the Owner for any reasonable losses or breakage fees related to such Owner’s cost of funds or other costs (including reasonable attorneys fees to the extent permitted by law) incurred by the Owner as a result of such redemption. Further, in the event of a QSCB Disqualification Event, the Issuer shall make, and so long as the Bonds remain Outstanding continue to make, to the Owner on each Sinking Fund Deposit Date, additional payments to the Owner in an amount sufficient, after taking into consideration all penalties, fines, interest and additions to federal income tax (including lost tax credits) that are imposed on the Owner, to maintain the same after-tax yield that the Owner would have realized had such loss or reduction of tax credits not occurred.

SECTION 4) Registration and Transfer. The Issuer shall cause the Bond Register to be kept by the Paying Agent. The Bonds may be transferred, registered and assigned only on the Bond Register, and such registration shall be at the expense of the Issuer. A Bond may be assigned by the execution of an assignment form on the Bonds or by other instruments of transfer and assignment acceptable to the Paying Agent. A new Bond or Bonds will be delivered by the Paying Agent to the last assignee (the new Owner) in exchange for such transferred and assigned Bonds after receipt of the Bonds to be transferred in proper form. Such new Bond or Bonds shall be of the same maturity.

SECTION 5) Form of Bonds. The Bonds and the endorsements to appear thereon shall be in substantially the following forms, respectively, to wit:

**FORM OF BOND**

The Parish School Board of the Parish of Caddo, State of Louisiana (the "Issuer"),
promises to pay, but solely from the source and as hereinafter provided, to:

JPMORGAN CHASE BANK, N.A.
or registered assigns, the Principal Amount set forth above on the Maturity Date set forth above.
The principal of this Bond, upon maturity or redemption, is payable in lawful money of the
United States of America at the principal office of The Bank of New York Mellon Trust
Company, N.A., Baton Rouge, Louisiana, or successor thereto (the "Paying Agent"), upon
presentation and surrender hereof.

IS OUTSTANDING. SUCH TERM SHALL ALSO INCLUDE THE LAST DAY ON
WHICH THIS BOND IS OUTSTANDING.

This Bond represents the entire principal amount of an authorized issue aggregating in
principal the sum of Twenty Million Seven Hundred Seven Thousand Dollars ($20,707,000) of
Revenue Bonds (Taxable QSCB), Series 2011 (the "Bonds"), of the Issuer, said Bonds having
been issued by the Issuer pursuant to a resolution adopted on October 18, 2011 (the
"Resolution"), for the purpose of construction, rehabilitation or repair of public school facilities
within the jurisdiction of the Issuer, including equipping of school facilities improved with Bond
proceeds, and paying the costs of issuance thereof, under the authority conferred by Section 1430
of Title 39 of the Louisiana Revised Statutes of 1950, as amended, and other constitutional and
statutory authority.

This Bond is not subject to redemption by the Issuer prior to its stated Maturity Date
except: (a) to the extent that less than 100% of the available project proceeds(as defined in the
QSCB Regulations) of this Bond is expended for Qualified Purposes by the close of the 3-year
period beginning on the date of this Bond (or if an extension of such expenditure period has been
received by the Issuer from the Secretary of the United States Treasury Department, by the close
of the extended period) the Issuer shall redeem all of the non-qualified Bonds within 90 days
after the end of such period at a redemption price equal to the principal amount of the Bonds to
be redeemed, plus a "make-whole" amount as calculated as set forth below; and (b) the Issuer
elect to redeem this Bond prior to maturity at its option in the event the Internal Revenue
Service issues a ruling, notice or final determination adversely affecting the tax credits related to
the Bond or the Owner obtains an opinion of a nationally recognized tax or bond counsel, subject
to review by the bond counsel to the Issuer, that this Bond no longer constitutes a "qualified
school construction bond” pursuant to Section 54F of the Code (each a "QSCB Disqualification Event") at a redemption price equal to the principal amount of the Bonds to be redeemed, plus a "make-whole" amount as calculated as set forth below; provided that redemption of this Bond by the Issuer pursuant to a QSCB Disqualification Event shall occur not later than the 90th day following such QSCB Disqualification Event.

Official notice of such call for redemption of this Bond, or any portion thereof, shall be given by the Paying Agent by means of first class mail, postage prepaid, by notice deposited in the United States mails not less than ten (10) days prior to the redemption date addressed to the Owner of this Bond at his address as shown on the Bond Register.

In the event this Bond, or any portion thereof, is redeemed prior to the Maturity Date pursuant to the Resolution, the Issuer will pay to the Owner thereof the portion of the principal amount being redeemed that is held by such Owner, plus a "make-whole" amount to compensate the Owner for any reasonable losses or breakage fees related to such Owner’s cost of funds or other costs (including reasonable attorneys fees to the extent allowed by applicable law) incurred by the Owner as a result of such redemption. Further, in the event of a QSCB Disqualification Event, the Issuer shall make, and so long as this Bond remains outstanding continue to make, to the Owner on each Sinking Fund Deposit Date, additional payments to the Owner in an amount sufficient, after taking into consideration all penalties, fines, interest and additions to federal income tax (including lost tax credits) that are imposed on the Owner, to maintain the same after-tax yield that the Owner would have realized had such loss or reduction of tax credits not occurred.

The Issuer shall cause to be kept at the principal corporate office of the Paying Agent a register (the "Bond Register") in which registration of the Bonds and of transfers of the Bonds shall be made as provided in the Resolution. This Bond may be transferred, registered and assigned only on the Bond Register, and such registration shall be at the expense of the Issuer. This Bond may be assigned by the execution of the assignment form hereon or by other instrument of transfer and assignment acceptable to the Paying Agent. A new Bond will be delivered by the Paying Agent to the last assignee (the new registered owner) in exchange for this transferred and assigned Bond after receipt of this Bond to be transferred in proper form.

This Bond is issued on a parity with the Issuer’s outstanding $17,359,000 Revenue Bonds (Taxable QSCB), Series 2009 (the "Outstanding Parity Bonds") with respect to the avails or proceeds of the Tax. It is certified that the Issuer, in issuing this Bond and the issue of which it forms a part, has complied with all the terms and conditions set forth in the resolution authorizing the issuance of the Outstanding Parity Bonds.

This Bond, equally with the Outstanding Parity Bonds, is secured by and payable from an irrevocable pledge and dedication of the funds to be derived by the Issuer from the levy and collection of a special tax of seven and ninety-six hundredths (7.96) mills (such rate being subject to adjustment from time to time due to reassessment), which the Issuer is authorized to impose and collect in each year. Said special tax has been authorized to be levied on all the property subject to taxation within the corporate boundaries of the Issuer. For a more complete statement of the tax revenues from which and conditions under which this Bond is issued, reference is hereby made to the Resolution. The Issuer, in the Resolution, has also entered into certain other covenants and agreements with the registered owner of this Bond, including provisions for the issuance of additional bonds payable from the proceeds of the Tax on a parity with this Bond for the terms of which reference is made to the Resolution.

This Bond shall not be valid or become obligatory for any purpose or be entitled to any security or benefit under the Resolution until the certificate of registration hereon shall have been signed by the Paying Agent.

It is certified that this Bond is authorized by and issued in conformity with the requirements of the Constitution and statutes of this State. It is further certified, recited and declared that all acts, conditions and things required to exist, to happen and to be performed precedent to and in the issuance of this Bond to constitute the same legal, binding and valid obligations of the Issuer have existed, have happened and have been performed in due time, form
and manner as required by law, and that the indebtedness of the Issuer, including this Bond, does not exceed the limitations prescribed by the Constitution and statutes of the State of Louisiana.

Any capitalized terms in this Bond which are not defined herein shall have the meaning assigned to such terms in the Resolution.

IN WITNESS WHEREOF, the Issuer, acting through the Parish School Board of the Parish of Caddo, State of Louisiana for school purposes, as its governing authority, has caused this Bond to be executed on behalf of the Issuer by the manual or facsimile signatures of the President and Secretary of the Governing Authority, and its corporate seal to be impressed or imprinted hereon.

NOTICE: The signature to this assignment must correspond with the name as it appears upon the face of the within Bond in every particular, without alteration or enlargement or any change whatever.

* * * * * *

SECTION 6) Execution of Bonds. The Bonds shall be signed by the Executive Officers for, on behalf of, in the name of and under the corporate seal of the Issuer, which signatures and corporate seal may be either manual or facsimile.
SECTION 7) Payment of Bonds. The Bonds, equally with the Outstanding Parity Bonds, shall be secured by and payable solely from an irrevocable pledge and dedication of the avails or proceeds of the Tax. This Governing Authority does hereby obligate itself and its successors in office to impose and collect the Tax annually in each year, and does hereby irrevocably and irrepealably dedicate, appropriate and pledge the annual income to be derived from the assessment, levy and collection of the Tax in each year to the payment of the Bonds. The Issuer further covenants that it shall not lower the Tax rate to result in lower Tax revenues than were collected in the fiscal year prior to the proposed adjustment unless it shall deliver to the Owner, at least thirty (30) days prior to the date of any proposed adjustment, written evidence satisfactory to the Owner showing that the lower Tax revenues will be not less than $1.35 \text{ times}$ the combined Maximum Annual Debt Service requirements for the Bonds, the Outstanding Parity Bonds and any Additional Parity Obligations (the "Debt Service Coverage Requirement"). In the event the Revenues in any one calendar year shall be insufficient to provide the required Debt Service Coverage Requirement in such calendar year the Issuer covenants to increase by rolling forward the millage rate for such year to the extent allowed by law in an amount necessary to achieve the Debt Service Coverage Requirement.

SECTION 8) Parity Bonds. The Issuer shall issue no other bonds or obligations of any kind or nature payable from or enjoying a lien on the revenues of the Tax having priority over or parity with the Bonds, except that additional bonds may hereafter be issued on a parity with the Bonds under the following conditions:

1. The Bonds herein authorized or any bonds issued on a parity therewith or any part thereof, including the interest thereon, may be refunded, and the refunding bonds so issued shall enjoy complete equality of lien with the portion of the bonds which is not refunded, if there be any, and the refunding bonds shall continue to enjoy whatever priority of lien over subsequent issues may have been enjoyed by the bonds refunded; provided, however, that if only a portion of the bonds outstanding is so refunded and the refunding bonds require total principal and interest payments during any year in excess of the principal and interest which would have been required in such year to pay the bonds refunded thereby, then such bonds may not be refunded without the consent of the owner of the unrefunded portion of the bonds issued hereunder (provided such consent shall not be required if such refunding bonds meet the requirements set forth in clause 2 of this Section).

2. Additional bonds may be issued on and enjoy a full and complete parity with the Bonds with respect to the revenues of the Tax, provided that the anticipated Tax revenues in the year in which the additional bonds are to be issued, as reflected in the budget adopted by the Issuer, must be at least $1.35 \text{ times}$ the Maximum Annual Debt Service for any calendar year on the Bonds, the Outstanding Parity Bonds and the Additional Parity Bonds.

3. Junior and subordinate bonds may be issued without restriction.

4. The Issuer must be in full compliance with all covenants and undertakings in connection with the Bonds, and there must be no delinquencies in payments required to be made in connection therewith.

In addition to the foregoing, while the Bonds are still Outstanding, the Issuer shall not be permitted to issue Additional Parity Obligations unless it shall deliver to the Owner of the Bonds, at least thirty (30) days prior to the date of any proposed issuance of Additional Parity Obligations, written evidence satisfactory to such Owner showing that the Tax revenues during twelve (12) consecutive months of the previous eighteen (18) months would have been sufficient to produce revenues in an amount equal to $1.35 \text{ times}$ the combined Maximum Annual Debt Service of the Bonds and all outstanding Additional Parity Obligations, including the proposed Additional Parity Obligations.

SECTION 9) Sinking Fund. For the payment of the principal of the Bonds, there shall be established and maintained a special fund known as "Parish School Board of the Parish of Caddo, State of Louisiana, Revenue Bonds (Taxable QSCB), Series 2011, Sinking Fund," said Sinking Fund to be established and maintained with the Paying Agent or its designee. The Sinking Fund shall be maintained separate from any sinking fund established and maintained in connection with any other bonds of the Issuer, including but not limited to the Outstanding Parity Bonds.

Not less than fifteen (15) days before each Sinking Fund Deposit Date, the Paying Agent shall provide to the Issuer a selection of Government Securities that, either alone or in
combination with other Government Securities, satisfies the Sinking Fund Deposit Requirement. Not less than ten (10) days before each Sinking Fund Deposit Date, an Executive Officer of the Issuer, or his or her designee shall, select the Government Security or Securities from the list provided by the Paying Agent to satisfy the Sinking Fund Deposit Requirement. Not less than one (1) day before each Sinking Fund Deposit Date, the Issuer shall deposit in the Sinking Fund an amount fully sufficient to satisfy the Sinking Fund Deposit Requirement falling due on such Sinking Fund Deposit Date; provided, however, that on the Final Maturity Date, the Issuer shall instead be required to deposit the difference between the amount then held in the Sinking Fund and the Principal Amount of the Bonds. On each Sinking Fund Deposit Date, the Paying Agent shall use the amount deposited by the Issuer in the Sinking Fund to purchase the Government Securities selected by an Executive Officer of the Issuer or his or her designee from the list provided by the Paying Agent. If no Government Securities are available or may be purchased on a Sinking Fund Deposit Date to satisfy the relevant Sinking Fund Deposit Requirement, the Paying Agent shall retain the amount deposited in the Sinking Fund as Cash until such Government Securities are available, at which time the Paying Agent shall comply with the terms of this paragraph.

It is further provided by the Issuer that the sum of all Cash and investments held in the Sinking Fund shall equal, as close as is reasonable possible, the Required Sinking Fund Value set forth below on the relevant Sinking Fund Deposit Date:

For purposes of determining compliance with the Required Sinking Fund Value, the "value" of any Cash or Government Securities held in the Sinking Fund shall be determined as follows:

(a) For Cash, the amount of such Cash; and

(b) For Government Securities, the par of such security plus accrued but unpaid interest on such security (unless such security is in default, in which case the security shall be deemed to have its fair market value, which shall be determined by the Paying Agent based on the bid price list quoted by the Federal Reserve Bank of New York for such security on the valuation date and printed in The Wall Street Journal or The New York Times, or, if such value is not published, based on a determination performed by a nationally recognized and accepted pricing service whose valuation method consists of the composite average of various bid price quotes on the valuation date). Notwithstanding the foregoing, the Issuer shall have the lesser of i) forty-eight months or ii) the length of time until maturity of the Bonds to replenish any deficiency in the Sinking Fund Value due to a default of any Government Securities held in the Sinking Fund.

It is expressly provided that (1) the Issuer shall endeavor to purchase State and Local Government Series securities unless a prevailing reason exists at the time of purchase to do otherwise, (2) the Issuer shall make all reasonable efforts to ensure that the yield on the Sinking Fund for purposes of the QSCB Code Provisions and QSCB Regulations does not exceed 3.83% (which equals the Permitted Sinking Fund Yield in effect on the date of this Resolution), and (3) nothing contained herein shall prohibit the Paying Agent from acting through a designee to satisfy its obligations imposed pursuant to this Section.
The Issuer shall further transfer to the Paying Agent for deposit in the Sinking Fund on or before each Sinking Fund Deposit Date the amount necessary to pay any additional payment amounts due as a result of a QSCB Disqualification Event due on such Sinking Fund Deposit Date.

It shall be specifically understood and agreed, however, and this provision shall be a part of this contract, that after the funds have been budgeted out of the revenues of the Tax for any year sufficient to make all payments required on the Bonds and the Outstanding Parity Bonds herein authorized for that period, and all required amounts for that period have been deposited in the aforesaid sinking funds established for the Bonds and the Outstanding Parity Bonds, then any annual revenues of the Tax remaining in that year shall be free for expenditure by the Issuer for the purposes for which the Tax was authorized.

All Cash and investments held in the Sinking Fund under the terms of this Resolution shall constitute sacred funds for the benefit of the Owners of the Bonds, and shall be secured by said fiduciaries at all times to the full extent thereof in the manner required by law for the securing of deposits of public funds. Neither the cash or Government Securities nor the principal or interest payments on any such Government Securities shall be withdrawn or used for any purpose other than the purchase of additional Government Securities or the payment of the Principal Amount of the Bonds at the Final Maturity Date. The Purchaser is hereby granted an express lien on all moneys deposited and Government Securities held in the Sinking Fund.

Subject to the provisions of this Section, all of the Cash in the Sinking Fund shall be invested in accordance with the provisions of the laws of the State of Louisiana unless available to be used pursuant to the terms of this Resolution within five (5) business days.

SECTION 10) Annual Financial Statements. While any portion of the Bonds is Outstanding, the Issuer shall make available to the Owner its annual audited financial statements no later than 180 days after the applicable fiscal year-end of the Issuer.

SECTION 11) Comprehensive Budget. While any portion of the Bonds is Outstanding, the Issuer shall prepare and adopt a budget at the beginning of each fiscal year and shall furnish to the Owner a copy of such budget upon request of the Owner.

SECTION 12) Application of Proceeds. The Executive Officers are hereby empowered, authorized and directed to do any and all things necessary and incidental to carry out all of the provisions of this Resolution, to cause the Bonds to be prepared or printed, to issue, execute and seal the Bonds, and to effect delivery thereof as hereinafter provided. The proceeds derived from the sale of the Bonds shall be deposited by the Issuer with its fiscal agent bank or banks to be used only for the Qualified Purposes for which the Bonds are issued and paying costs of issuing the Bonds.

SECTION 13) Bonds Legal Obligations. The Bonds shall constitute legal, binding and valid obligations of the Issuer, and shall be the only representation of the indebtedness herein authorized and created.

SECTION 14) Resolution a Contract. The provisions of this Resolution shall constitute a contract between the Issuer, or its successor, and the Owners from time to time of the Bonds and any such Owner may at law or in equity, by suit, action, mandamus or other proceedings, enforce and compel the performance of all duties required to be performed by the Governing Authority or the Issuer as a result of issuing the Bonds.

SECTION 15) Amendment to Resolution. No material modification or amendment of this Resolution, or of any resolution and/or ordinance amendatory hereof or supplemental hereto, may be made without the consent in writing of the Owners of the Bonds.

SECTION 16) Recital of Regularity. This Governing Authority having investigated the regularity of the proceedings had in connection with the Bonds herein authorized and having determined the same to be regular, the Bonds shall contain the following recital, to wit:

"It is certified that this Bond is authorized by and is issued in conformity with the requirements of the Constitution and statutes of this State."

SECTION 17) Effect of Registration. The Issuer, the Paying Agent, and any agent of either of them may treat the Owner in whose name the Bonds is registered as the Owner of such Bond for the purpose of receiving payment of the principal (and redemption price) of such Bond and for all other purposes whatsoever, and to the extent permitted by law, neither the Issuer, the Paying Agent, nor any agent of either of them shall be affected by notice to the contrary.

SECTION 18) Notices to Owner. Wherever this Resolution provides for notice to the Owner of any event, such notice shall be sufficiently given (unless otherwise herein expressly provided) if in writing and mailed, first-class postage prepaid, to the Owner at the address of such Owner as it appears in the Bond Register. Where this Resolution provides for notice in any manner, such notice may be waived in writing by the Owner entitled to receive such notice,
either before or after the event, and such waiver shall be the equivalent of such notice. Waivers of notice by the Owner shall be filed with the Paying Agent and the Issuer, but such filing shall not be a condition precedent to the validity of any action taken in reliance upon such waiver.

SECTION 19) Cancellation of Bonds. Any Bond surrendered for payment, transfer, exchange or replacement, if surrendered to the Paying Agent, shall be promptly canceled by it and, if surrendered to the Issuer, shall be delivered to the Paying Agent and, if not already canceled, shall be promptly canceled by the Paying Agent. The Issuer may at any time deliver to the Paying Agent for cancellation any Bond previously registered and delivered which the Issuer may have acquired in any manner whatsoever, and any Bond so delivered shall be promptly canceled by the Paying Agent. Any canceled Bond held by the Paying Agent shall be disposed of as directed in writing by the Issuer.

SECTION 20) Mutilated, Destroyed, Lost or Stolen Bond. If (1) any mutilated Bond is surrendered to the Paying Agent, or the Issuer and the Paying Agent receive evidence to their satisfaction of the destruction, loss or theft of any Bond, and (2) there is delivered to the Issuer and the Paying Agent such security or indemnity as may be required by them to save each of them harmless, then, in the absence of notice to the Issuer or the Paying Agent that such Bond has been acquired by a bona fide purchaser, the Issuer shall execute, and upon its request the Paying Agent shall register and deliver, in exchange for or in lieu of any such mutilated, destroyed, lost, or stolen Bond, a new Bond of the same maturity and of like tenor and principal amount, bearing a number not contemporaneously outstanding. In case any such mutilated, destroyed, lost or stolen Bond has become or is about to become due and payable, the Issuer in its discretion may, instead of issuing a new Bond, pay such Bond. Upon the issuance of any new Bond under this Section, the Issuer may require the payment by the Owner of a sum sufficient to cover any tax or other governmental charge that may be imposed in relation thereto and any other expenses (including the fees and expenses of the Paying Agent) connected therewith.

Every new Bond issued pursuant to this Section in lieu of any mutilated, destroyed, lost or stolen bond shall constitute a replacement of the prior obligation of the Issuer, whether or not the mutilated, destroyed, lost or stolen Bond shall be at any time enforceable by anyone and shall be entitled to all the benefits of this Resolution equally and ratably with any other Outstanding Bond. Any additional procedures set forth in the Agreement, authorized in this Resolution, shall also be available with respect to any mutilated, destroyed, lost or stolen Bond. The provisions of this Section are exclusive and shall preclude (to the extent lawful) all other rights and remedies with respect to the replacement and payment of any mutilated, destroyed, lost or stolen Bond.

SECTION 21) Discharge of Resolution, Defeasance. If the Issuer shall pay or cause to be paid, or there shall otherwise be paid to the Owner, the Principal Amount (and redemption price) of, and any other amounts owed with respect to the Bonds, at the times and in the manner stipulated in this Resolution, then the pledge of the money, securities and funds pledged under this Resolution and all covenants, agreements and other obligations of the Issuer to the Owner shall thereupon cease, terminate and become void and be discharged and satisfied, and the Paying Agent shall pay over or deliver all money held by it under this Resolution to the Issuer.

Portions of the Principal Amount for the payment of which money shall have been set aside and shall be held in trust (through deposit by the Issuer of funds for such payment or otherwise) at the Final Maturity Date thereof shall be deemed to have been paid within the meaning and with the effect expressed above in this Section if they are defeased in the manner provided by Chapter 14 of Title 39 of the Louisiana Revised Statutes of 1950, as amended. Notwithstanding the foregoing, no defeasance of the Bonds shall be permitted without delivery to the Owners of the Bonds of an opinion of a nationally recognized bond counsel that such defeasance will not affect the ability of the Owners to claim the federal tax credits under Section 54A of the Code which such Owners would otherwise be permitted to claim.

SECTION 22) Successor Paying Agent; Paying Agent Agreement. The Issuer will at all times maintain a Paying Agent meeting the qualifications hereinafter described for the performance of the duties hereunder for the Bonds. The designation of the initial Paying Agent in this Resolution is hereby confirmed and approved. The Issuer reserves the right to appoint a successor Paying Agent by (a) filing with the Person then performing such function a certified copy of official proceedings of the Governing Authority giving notice of the termination of the Agreement and appointing a successor and (b) causing notice to be given to the Owner. Every Paying Agent appointed hereunder shall at all times be a bank or trust company organized and doing business under the laws of the United States of America or of any state, authorized under such laws to exercise trust powers, and subject to supervision or examination by Federal or State authority. The Executive Officers are hereby authorized and directed to execute an appropriate Agreement with the Paying Agent for and on behalf of the Issuer in such form as may be
satisfactory to said officers, the signatures of said officers on such Agreement to be conclusive
evidence of the due exercise of the authority granted hereunder.

SECTION 23) Covenants Relating to the QSCB Code Provision, QSCB Regulations
and Other Matters. The School Board hereby certifies that:
1) 100% of the available project proceeds, as defined in the Code, will be spent for Qualified Purposes;
2) 100% of the available project proceeds, as defined in the Code, will be spent at public school facilities within the jurisdiction of the School Board;
3) Within the six-month period beginning on the Date of Issuance, the Issuer will incur a binding commitment with a 3rd party to spend at least 10% of such available project proceeds on Qualified Purposes;
4) Any reimbursement of proceeds of the Bonds for capital expenditures for Qualified Purposes incurred prior to the Date of Issuance of the Bonds will be undertaken strictly in accordance with 54A(d)(2)(D) of the Code;
5) All applicable State and local laws governing conflicts of interest have and will continue to be satisfied with respect to the Bonds;
6) The Issuer will redeem all nonqualified Bonds pursuant to Section 3(a) of this Resolution;
7) The Issuer will comply with the terms of the Davis-Bacon Act, to the extent required by the American Recovery and Reinvestment Act of 2009;
8) Subject to the Terms of the Louisiana Governmental Claims Act (Sections 13:5101, et seq., of the Louisiana Revised Statutes of 1950, as amended), the Issuer is not entitled to claim immunity on the grounds of sovereignty or other similar grounds with respect to (i) itself for claims arising ex contractu or (ii) the enforcement of its obligations under this Resolution or the Bonds; and
9) The Issuer will submit reports similar to those required under Section 149(e) of the Code.

SECTION 24) Arbitrage. The Issuer covenants and agrees that, to the extent permitted by the laws of the State of Louisiana, it will comply with the provisions of Section 148 of the Internal Revenue Code of 1986 and any amendment thereto (the "Code"), as modified by the QSCB Code Provisions and QSCB Regulations, with respect to the proceeds of the Bonds.

SECTION 25) Disclosure Under SEC Rule 15c2-12(b). It is recognized that the Issuer will not be required to comply with the continuing disclosure requirements described in the Rule 15c2-12(b) of the Securities and Exchange Commission [17 CFR '240.15c2-12(b)], because:
(a) the Bonds are not being purchased by a broker, dealer or municipal securities dealer acting as an underwriter in a primary offering of municipal securities, and
(b) the Bonds are being sold to not more than 35 financial institutions (i.e., no more than thirty-five persons) constituting an "Eligible Person", pursuant to the Rules of the Securities and Exchange Commission which (i) have such knowledge and experience in financial and business matters that it is capable of evaluating the merits and risks of the prospective investment in the Bonds and (ii) are not purchasing the Bonds for more than one account or with a view to distributing the Bonds.

SECTION 26) Default. Upon an Event of Default, the Owner may pursue any and all remedies, including but not limited to an action for mandamus, that may exist at law or in equity pursuant to the law of the State at the time of such Event of Default.

SECTION 27) Acceleration. The Issuer represents that it has not granted to any Person holding any indebtedness issued or incurred by the Issuer which is payable from or secured solely by a lien on the revenues of the Tax the right to accelerate the Issuer’ obligation to repay such indebtedness following the occurrence of a default or event of default by the Issuer with respect to such indebtedness. The Issuer covenants that it shall not grant the remedy of acceleration to any Person holding any indebtedness issued or incurred by the Issuer, which is payable from or secured solely by a lien on the revenues of the Tax, upon the occurrence of any event of default with respect to such indebtedness unless the Issuer has received the prior written consent of the Owners of the Bonds. In the event that the Issuer shall grant the remedy of acceleration to any Person holding any indebtedness issued or incurred by the Issuer which is payable from or secured solely by a lien on the revenues of the Tax, upon the occurrence of a default or event of default with respect to such indebtedness or upon the occurrence and continuation of an Event of Default hereunder the Owners of a majority of the outstanding principal amount of the Bonds, in their sole discretion, may deliver a notice to the Issuer declaring all amounts outstanding hereunder and under the Bonds to be immediately due and payable and such amounts shall then be immediately due and payable.
SECTION 28) Publication. A copy of this Resolution shall be published immediately after its adoption in one (1) issue of the official journal of the Issuer.

SECTION 29) Award of Bonds and Incorporation of Commitment Letter. The Superintendent is authorized and directed to execute the Commitment Letter on behalf of the Issuer. All of the provisions of the Commitment Letter not otherwise addressed herein are incorporated herein by reference. It is intended by the Issuer and the Purchaser that the Commitment Letter and this Resolution shall constitute a binding, written contract for the sale of the Bonds. The Bonds shall be delivered to said Purchaser upon the payment of the Principal Amount thereof.

SECTION 30) Severability; Application of Subsequently Enacted Laws. In case any one or more of the provisions of this Resolution or of the Bonds shall for any reason be held to be illegal or invalid, such illegality or invalidity shall not affect any other provisions of this Resolution or of the Bonds, but this Resolution and the Bonds shall be construed and enforced as if such illegal or invalid provisions had not been contained therein. Any constitutional or statutory provisions enacted after the date of this Resolution which validate or make legal any provision of the Resolution and/or the Bonds which would not otherwise be valid or legal, shall be deemed to apply to this Resolution and to the Bonds.

SECTION 31) Section Headings. The headings of the various sections hereof are inserted for convenience of reference only and shall not control or affect the meaning or construction of any of the provisions hereof.

SECTION 32) Effective Date. This Resolution shall become effective immediately.

This resolution having been submitted to a vote, the vote thereon was as follows:

And the resolution was declared adopted on this, the 18th day of October, 2011.

/s/ Gerald Dawkins /s/Lillian Priest
Secretary President

8.05 Rewording of the Youree Drive/Broadmoor Magnet Component Resolution. The board approved the rewording of the Youree Drive/Broadmoor Magnet Component Resolution as follows: That the procedures established by the Caddo Parish School Board on January 17, 2006 for placement of students in the Broadmoor and Youree Drive Middle School Magnet component programs on a first come first served basis be revised as follows:

That the students seeking admissions to the Broadmoor and Youree Drive Middle Schools magnet component programs shall use the same joint application as the applicants seeking admission to Caddo Middle Magnet School and Herndon Magnet School;

That the students seeking admissions to Broadmoor and Youree Drive Middle Schools magnet component programs shall be administered the same standardized admission test as the applicants seeking admission to Caddo Middle Magnet School and Herndon Magnet School;

That applicants who meet the qualifications for admission will be ranked according to their admissions test scores, and admissions shall be based upon ranked test scores. There will be no preference given to siblings of enrolled students.
8.06 December CPSB Meeting Date. The board voted to change the December 20, 2011 CPSB meeting to Tuesday, December 13, 2011 due to the Christmas holidays.

8.08 2011-12 Corrective Action Plan and Budget. The board approved the 2011-12 Corrective Action Plan and proposed budget as recommended by staff and submitted in the mailout.

PERSONNEL RECOMMENDATIONS

Mr. Ramsey moved, seconded by Mrs. Bell, to approve the personnel recommendation as recommended by the superintendent and submitted in the mailout.

Mr. Hooks moved to postpone action on the superintendent’s recommendation for this position of custodian supervisor. Motion failed for lack of a second. Vote on the original motion carried with Board member Hooks opposed and Board members Riall, Green, Seamster, Trammel, Priest, Crawford, Rachal, Ramsey and Bell supporting the motion.

BIDS (PURCHASING)

Mr. Rachal moved, seconded by Mrs. Bell, to approve the following bids as recommended by staff and submitted in the mailout (1) Student Keyboard Packages for Music Department to be re-bid at a later date; and (2) School Specialty, total unit price of $66.24, for student backpacks and supplies for Title I. Mr. Rachal asked staff to explain the $65 cost for these backpacks. Mr. Graham stated that these are for the Homeless Program throughout the parish and they are packaged with supplies needed for school. Mr. Rachal asked if this has been approved in the Title I budget and will not impact the individual schools? Mrs. Parker stated that it comes off the top of the Title I budget to accommodate special needs and it doesn’t impact the individual school budgets. Mrs. Bell noted that Caddo has approximately 1,100 homeless students and she believes it is important that when possible to do what we can through Title I to help these students. Vote on the motion carried.

OT/PT PAY SCHEDULES

Mr. Rachal moved, seconded by Mrs. Crawford that Rahmberg revisit the OT/PT pay schedule and verify that what we are doing relative to the OT/PT pay is accurate and to provide the board with a recommendation on changing how their pay is based. Mr. Rachal shared that he visited with staff on this matter; and since there are some unknown factors, he would like for Rahmberg to revisit this and address his concerns that we are taking medical professionals and trying to determine their pay according to educational professionals. Vote on the motion carried with Board members Hooks and Bell opposed and Board members Riall, Green, Seamster, Trammel, Priest, Crawford, Rachal, and Ramsey supporting the motion.

SUPERINTENDENT’S REPORT

Superintendent Dawkins announced that he will send the board a summary of the Graduation Cohort Report received on Monday; that report included two of Caddo’s schools (Huntington and Woodlawn) among the schools in the state that made double digit gains.

Dr. Dawkins also shared an assignment sheet for the CPSB Policy Review reflecting the sections of the Policy Manual on which board members will serve, as well as representatives from the employee organizations.

NEW BUSINESS
ANNOUNCEMENTS AND REQUESTS

Mary Trammel asked the superintendent to look into resolving the transportation problems associated with the Operation Graduation Program at Woodlawn High School.

Mrs. Bell announced that Huntington High School band won superior and she would like to see this recognition in the media. She also invited board members to attend the State Fair at 4:00 on October 26th and support the 4-H Program and the children.

Mr. Riall announced he will bring recommendations in the not too distant future regarding the possible sale of Caddo Parish School Board abandoned properties in northern Caddo Parish (Hosston, Pine Valley and Rodessa). Mr. Hooks also reported that Ted Cox contacted him regarding his interest in purchasing the George P. Hendrix property.

Mr. Hooks asked that the superintendent look into speedy replacements of two teaching positions (Chemistry and Algebra) in the Fair Park Medical Careers Program.

Mr. Hooks also asked for a breakdown on the figures provided by school for construction projects during the summer of 2011. He also expressed appreciation for the speedy response to his request on the Turnaround Program; however, he stated he is confused by the response because they were paid a stipend the previous summer. Dr. Dawkins noted they could have possibly been paid, but not from those funds.

Ms. Seamster expressed her appreciation for staff assistance in conducting meetings at schools in her district.

Miss Green asked the superintendent to look into the need for books at the Newton Smith Sixth Grade Center library.

Mr. Hooks asked the superintendent about an up-to-date Minifacts that includes the 7-12 grade configurations.

EXECUTIVE SESSION

Student Readmission Appeal. Mr. Riall moved, seconded by Miss Green, to go into executive session for the purpose of hearing a student readmission appeal. Vote on the motion carried and while the board did not actually go into executive session, they did reconvene in open session at approximately 5:54 p.m. Mr. Ramsey moved, seconded by Mr. Hooks, that the board accept staff’s recommendation for Z.R. Vote on the motion carried with Board member Priest opposed and Board members Riall, Green, Seamster, Hooks, Trammel, Crawford, Rachal, Ramsey and Bell supporting the motion.

Adjournment. Mr. Riall moved, seconded by Mr. Ramsey, to adjourn. Vote on the motion carried and the meeting adjourned at approximately 5:56 p.m.
November 1, 2011

The Executive Committee of the Caddo Parish School Board (CPSB) met in regular session in its office at 1961 Midway Street, Shreveport, Louisiana, at approximately 4:30 p.m. on Tuesday, November 1, 2011 with President Lillian Priest presiding and Steve Riall and Dottie Bell present being a quorum. Other school board members present were Jasmine Green, Debra Seamster, Charlotte Crawley, Curtis Hooks, Mary Trammel, Bonita Crawford, Barry Rachal (arrived at approximately 5:00 p.m.), Larry Ramsey, and Ginger Armstrong. Also present were Secretary Gerald Dawkins, Legal Counsel Reginald Abrams, staff and other visitors. Ms. Green led the invocation and Pledge of Allegiance.

The board expressed its appreciation to Debra Seamster, interim District 3 representative, for her service to the district during this interim time. President Priest also recognized Carl Pierson, newly elected representative for CPSB District 3 who will be sworn in a few weeks.

PRESENTATIONS

Reapportionment. Dr. Gary Joiner shared with the board a copy of Reapportionment Plan 10 which reflects what the Caddo Parish Commission approved with the adjustments made after one-on-one meetings with CPSB members. While this proposed plan may not be what the CPSB votes on, Dr. Joiner reported that it is the basis of that plan. He noted that Districts 4 and 8 are now in sync, District 12 is the largest district, and District 3 is the smallest district. He suggested that the board members look at the proposed plan and notify the superintendent or himself if they are o.k. or if additional minor changes need to be made. Dr. Joiner stated that once everyone is in agreement, public hearing(s) can be set and it is possible the board could vote on the plan by the November 15th meeting.

Mrs. Crawley asked about the possibility of getting a copy of every board member’s map. Ms. Priest announced that board members should review their proposed district changes and email Dr. Joiner by 5:00 p.m. on Wednesday and an attempt will be made to hold a public meeting/hearing and possibly vote on the CPSB plan at the November 15, 2011 meeting.

Technology Overview. Superintendent Gerald Dawkins stated that in responding to the needs of the 21st Century learner, staff is prepared to share with the board information on Caddo’s technology resources, what we have in our technology inventory, how our resources are being used on a daily basis, as well as descriptions of the district’s challenges, possibilities, and opportunities. Dr. Dawkins stated that we should always strive for higher achievement, equity and access for all students at all times, as well as operational efficiency and elimination of duplication and redundancy. He noted that everything in tonight’s presentation (policy, training and resource implications) will give board members the opportunity to change or create appropriate policies to help guide the District’s future. Dr. Dawkins stated that it is important that everyone understands and is comfortable with this powerful technology resource in Caddo Parish Public School District. He said the school board will tonight have the opportunity to expand its skills and learn what resources are available to students and staff through a hands-on experience. The superintendent stated that staff continuously reviews the District’s resources and assets because we can no longer afford to continue allocating resources and programs that do not move the District forward academically or efficiently; and the redirection of resources will be a reality for all schools and departments.

Ms. Golett, director of information technology, shared with the board specifics of the Information Technology program and Reginald Dodd shared with the board the instructional technology support afforded to Caddo teachers and students on a daily basis. Ms. Golett reported on the expansion of technology’s role from doing automated processes to providing
Internet services and applications. She shared with the board the technology currently in place in Caddo and the vision for how technology will be used in the future to achieve academic success and operational efficiency. Ms. Golett reported that Caddo’s network is one that is efficient, robust and scalable; being built to not only support the District’s current needs but future needs as well. She explained that the District’s network currently supports voice, video and data on the single converge network, wired or wireless; and in order to meet the increased demand for Internet access, the Internet Bandwidth has been doubled from 250 megabytes per second to 500 megabytes per second. Ms. Golett also highlighted the different products and services added to the Network, including hosted Internet applications, security video feed, and streaming video from the website.

Ms. Golett also shared with the board the support offered to the District’s core business system – HR, Finance, Payroll, Insurance; maintenance of approximately 20,000 work stations in the District, replace or upgrade 500-700 work stations throughout the schools; JPAMs student information system, Parent Portal, website and streaming of Board meetings.

Tommy Smith, director of Maintenance, shared with the board how School Dude is used to process work orders in the Maintenance Department, and shared with the board how far the District has come from a cumbersome, old process to a wireless system utilized daily by 335 employees. Mr. Smith explained that the initial step eliminated approximately 70% of 60,000 pieces of paper; and being fully implemented with the wireless program, we should eliminate 100% of the paper. He also reported that staff believes the District has gained an efficiency of 30 minutes per work order; and when the wireless is fully implemented, an additional 30 minutes will be seen per work order. Wireless devices have also been implemented, i.e. Netbooks, which allows work orders to continue in the event the Internet goes down.

Otis Jones, director of Transportation, highlighted WebQuery which is open to the schools, public, parents, et.al. who need bus information on students. Mr. Jones also shared how invaluable the GPS system has been to the Transportation Department and how it can tell if a bus is on the way, if it is making scheduled stops, if it is exceeding the speed limit, is it arriving to the school on time, as well as provide a means for schools to look online and determine where their buses are at any given time. He also shared a bus simulation; and in an accelerated manner, how the bus traveled to its school and times it made scheduled stops.

Roy Murry, director of Security, provided a brief overview of what security is doing with cameras, access control, and alarm systems in Caddo’s schools. Mr. Murry stated that the advances in technology today are allowing us to keep our schools safe by supervising and monitoring students and controlling access to the schools. He added it also is allowing us to place personnel in strategic places where needed and to monitor from remote locations other areas of a school that may not have as much traffic. Mr. Murry explained that it also allows for the night foreman a laptop in their patrol vehicle to respond to a burglary, to pull up the school as they are responding to the call adding to officer safety, and it also gives the patrolman information he can relay to law enforcement in the event of a burglary. In major emergencies on a school campus that includes responding agencies, the patrolman can set up so responding agencies can pull up live video of what is taking place in the school building as well as have access to recorded video prior to their arrival on the campus. Mr. Murry also reported that Caddo has gone from an analog alarm system to a digital system and the implementation at the new 7-12 configurations to help keep the schools safe.

Reginald Dodd, supervisor of instructional technology, demonstrated what will happen in a typical day of a student and the technology used during the course of a student’s day. Mr. Dodd explained that the different types of technology that students have access to during the day include their books, instructional resources, assessments, etc. He said staff has been and will continue to ramp up the professional development in instructional technology so that the
technology is used effectively. With part of the vision of the District being to continue to provide training for all teachers and staff to improve proficiency and efficiency in the use of technology, training principals and assistant principals to take ownership of the technology vision at the school to make sure that the instruction goes forward as it should is also a part of that professional development. At this point in the meeting, demonstrations and hands-on activity took place on how technology is used in the classroom today.

Superintendent Dawkins commented that full digital conversion in the schools, programs and departments is the goal and beginning next week with the principals a book study on “Teaching Digital Natives”, and discussions on 21st Century learners will begin. At the end of the study, iPads will be issued to the principals and they will be expected to use them as management and learning tools to begin leading our students to a higher appreciation of the opportunities available to them. He said whole school applications will begin implementation in the Fall 2012 based on the results of the underway plan and pilots in Caddo schools in Math, English/Language Arts and Science at Kindergarten, Elementary, Middle, and High School levels to find out how impactful it is at each of these levels and how it is enhancing their learning. Funding will come from IDEA, Title I, and some General Fund, the resources of which are already in place, but only capitalizing on the use of these funds to manage and evaluate. He added that Special Education will pilot the use of specially designed software for autistic and dyslexic students. “Bring your own device” will also be piloted for one year at a middle and high school this year to include how a student’s Smart Phone can be used with this powerful technology. Thus, policies will need to change so we can ensure that students have access to information 24 hours a day and for students that do not have computers at home, it is important to not miss them if they have the opportunity to access the information via their cell phones. Also, a “Cloud Computing” for reading and math will be piloted; and staff is proposing that we immediately start a Virtual School in Caddo with the first phase implemented in January 2012. He noted that it is on the agenda and staff is bringing the proposal in Phases I, II and III; along with a recommendation, on November 15th.

Rosemary Woodard, director of assessment and school support, explained that in January, pending approval of the platform, we hope to begin an aggressive outreach for credit recovery, credit reclamation, and remediation for students who have failed classes the first semester and help them move forward. Mrs. Woodard explained that with End of Course testing, it is anticipated that approximately 1,000 students will be eligible for remediation and we will take applications for this platform via a media blitz. She added that beginning in February, Phase II will begin by contacting home study students and others, as well as studying the research and hopefully avoiding the pitfalls, the biggest which has been parents not being informed of the expectations. She said the estimated cost and impact to the board currently will be through the remediation budget; and if next year the District can reclaim 200 students, it will more than pay for the platform. In Phase III, Mrs. Woodard explained that the District hopes to reclaim all the home study students in the parish, look at the State Department regarding attendance zone waivers beyond Caddo Parish, and hopefully impact 500 students with the Virtual platform. She said the implications include expanding course offerings everywhere and the vendor is working with staff to get project-based learning in place with all the technology available and hopefully reclaim not only home study students, but also hospital homebound in addition to expanding offerings to the juvenile detention center and other areas where students have not been successful in other mediums. Mrs. Woodard reported that the support of the teacher technology center, the content supervisors, and designated school administrators are all in place ready and waiting to move forward.

Dr. Dawkins noted Mrs. Woodard’s comment relative to pitfalls and that you cannot turn students loose, who have been unsuccessful, in a Virtual School environment without some support. At this time Southwood and Hamilton Terrace have infrastructure and staff in place
working on this and these two places can be used for students to initially go for the face-to-face time with teachers in addition to this Virtual piece. He said the goal summary is to increase student performance and achievement and operational efficiency, 21st Century technology anytime, anywhere; and because the board has invested heavily in this, we can do this; and it is important to not wait any longer. While additional resources may be needed, he stated staff does not plan to request these from the board until all available funding possibilities have been exhausted. Partnerships with corporations and foundations, locally and nationally, will be sought to support these efforts; and in spite of any challenges, we must aggressively press forward to assure that every child, every student in Caddo Parish, and every staff member realizes the full potential of the technology resources provided by the board.

Mr. Riall stated his experience of typing in an address and it listing Linwood Charter School as a neighborhood school. He asked if Caddo is required to list Linwood Charter on our web site. Mr. Jones stated that he was not aware and will follow up.

Ms. Priest expressed her appreciation to staff for the information presented and that with the board having allocated dollars for technology, this is coming to fruition and is the way our students are studying and learning today. She commended the staff for moving forward to improve the academic learning and environment for students; because in the long run, it will be a savings to the District through safety means for the students and employees and encouraged staff to move forward with reviewing the policies and practices that may need revising or eliminated as a result of implementing technology for Caddo students.

Mrs. Crawley asked if students are using their identification cards for access to the buses the same as are used to access buildings, providing information as to who is on the bus. She also announced that on November 7th at the Convention Center there will be a free workshop on how technology is rearranging the brain. She also referenced how the maintenance workers in her business used their cell phones to clock in and out as well as a GPS. Mrs. Crawley also asked if these ID cards are being used in the cafeteria so parents can be notified when the student’s account is low. Dr. Dawkins responded that the District has this in place.

Mrs. Crawford referenced the study being conducted in 17 Kindergarten classrooms with iPads and asked if she could get the names of the schools? She also asked about the Math apps and how many times a student can enter the answer to a multiple choice question before it locks them out? Mr. Dodd explained they can change the answer as many times as they wish, but it is recorded when they move to the next question; and at the end, it will tell them how many they got correct and how many were incorrect. It will also allow them to go back and view the incorrect ones. Mrs. Turner explained that when the iPad is used as a teaching tool, it is a demonstration and the teacher will ask students to respond and then point out and explain errors. She also explained that with some software, and depending on what is being utilized in the classroom, it may prompt them to do certain things or to move forward and come back to a particular question.

Miss Green asked the superintendent if parents have access to where bus stops are located and can actually see where the bus is on a map. Mr. Jones responded that is not for the parents, but WebQuery is for the parents to determine their bus stop, the bus driver’s name and a number to reach them. She also asked about the principals receiving iPads next year? The superintendent clarified that will be this year; and they will receive them upon completion of the study, which is not new and is already a part of the budget. Miss Green asked if principals will be able to view the security cameras from the iPad and the superintendent responded they will.

Mrs. Bell thanked staff for the informative presentation and asked security if they have the capability to view all the cameras at all schools? Mr. Murry responded that he has a listing of all the cameras in all the schools and cameras are being attached to the alarm systems so that the
night security will be able to pull up a camera in the location of an alarm. He added that at this
time the department has one very large screen and four computers and different cameras can be
set up on different screens for monitoring. If there is a certain area we are having problems with
break-ins, Mr. Murry explained that those specific cameras can be placed on the screens for
closer monitoring. Mrs. Bell also asked transportation about the GPS systems for principals.
Mr. Jones explained that it allows principals access to a link so they can look up the buses
assigned to their schools. Mrs. Bell stated she believes this is a great idea, because when a bus is
not at the school as scheduled, the principal can locate the bus and announce to the teachers a bus
is late. Mrs. Bell said she is very impressed with how the children are learning today with
technology available, and she knows that eventually books will be out and hopes that at some
point every child will have their own Smart Phone/SmartBoard.

Ms. Seamster asked about School Dude and the intent to go paperless and how often does
Maintenance generate reports? Mr. Smith explained that reports can be generated anytime they
are needed and the data is time dated so that every time a report is generated it is only one minute
old. Ms. Seamster suggested that the web site be updated to include the board member’s name
and district information to the school sites.

Mr. Ramsey referenced conversations with the superintendent about bandwidth during testing
times; and this year he visited eight sites where there are still some issues with JPAMS. He said
it is slow and sites get dropped; and he believes if these issues are not corrected, all the bells and
whistles will not make it run as it should. Mr. Ramsey asked that the superintendent and his staff
poll the schools to determine how many are experiencing these JPAMS issues.

Ms. Priest reminded the board that a partnership was formed this past summer for providing
technology to students on free lunch.

ESTABLISH THE AGENDA AND CONSENT AGENDA FOR NOVEMBER 15, 2011
CPSB MEETING

Superintendent Dawkins highlighted items proposed for the board’s consideration at the
November 15, 2011 meeting and the following discussion ensued.

Out of State Travel (General Fund). Mr. Ramsey noted the number of out-of-state travel
requests last month and encouraged staff to continue to be cognizant of the budget situation and
that requests for out-of-state travel should only be those that are absolutely necessary.

Bids (Purchasing). Mrs. Crawford reported on recent articles/books she read on nutrition and
that people are going back to cooking. She asked when bids are let on various food items, are we
cognizant of this? Mrs. Harris explained that the cafeterias still cook a lot of things from scratch
and do more from scratch than any other parish in the State of Louisiana. She reported that the
Child Nutrition Department implemented a number of things between breakfast and lunch based
on the Healthy Hunger PreChild Act of 2010 whereby students get more fruits, vegetables and
whole grains. She also encouraged board members to come by the Student Nutrition Workshop
at the Caddo Technology Center to see and taste what is being offered.

Bids (Purchasing) – Virtual School Services. Mary Ann Trammel inquired about receiving
only one bid for Virtual School services, because she believes there should be three or four bids
for this amount of money. Mr. Graham, director of purchasing, reported there were actually two
bids; however one was disqualified because they did not submit prices. Both were adequate
bidders; and the bid chosen was a very acceptable bid. Mr. Rachal stated his agreement and that
he, too, is shocked there were only two responses and one of those rejected. He asked if the bid
was tailored to where we would not get many responses. Mr. Graham said we did not, and it was
bid nationwide through the district’s on-line bid process. Mr. Rachal asked if it is more difficult
because we are in a way competing with the state, and Mr. Graham responded that he could not answer that. Mr. Rachal also stated he is leery in only having two bids, rejecting one and basically leaving us with no choice but the one. He asked if it is possible to rebid this item. Dr. Dawkins responded that this is also time sensitive to moving forward.

Mrs. Woodard explained that if the platform had not been able to do what we need it to do, it would have been rejected. She said the criteria is set so we can service grades sixth through 12 and in certain content areas with backup of professional development and Master’s level teachers. She said there are several platforms available and staff researched all of them and if this particular bid did not deliver what we need to do relative to the academic component, staff would have rejected the bid.

Mr. Rachal asked for supporting documentation on this company; what they do, how they do it, more than just a single sentence as backup. Mr. Graham reported there is an extensive booklet on this that can be shared with the board members.

Mr. Ramsey asked for clarification and is it not correct that E2020 is a company that we have a track record with? Mrs. Woodard responded that is correct and staff is currently using this platform at Southwood for credit reclamation, and staff is very pleased with their performance. Mr. Ramsey stated that he understands rejecting a bid that cannot provide the platform needed.

Mr. Riall noted the original estimated annual expenditure of $200,000 and the bid is right at $300,000. Mrs. Woodard clarified that this is over a three-year period. Mr. Riall asked if he understands it is $100,000 a year and Mrs. Woodard said that is correct.

Ms. Seamster asked if this company provided staff with a demonstration of the product. Mrs. Woodard responded that staff has worked with this company for approximately one year and all the vendors that do this type program. Ms. Seamster asked if this is for software only and Mrs. Woodard explained that it is for support services as well. Ms. Seamster also asked about the additional expenses associated with the virtual school and if there is a total amount budgeted. Mrs. Woodard explained that the presentation reflected that in Phase I, the initial cost of putting the software in is already budgeted in the remediation budget amount; and as the program expands and more students are brought in, the costs presented are projected costs. Is the fee a one-time fee or is it an annual fee? Mrs. Woodard stated that the proposal is to provide services for three years and why staff believes it is a very good proposal.

Mr. Riall referenced the budget crisis and in spending $300,000 over three years, that amount could put five people back to work who were laid off.

Mr. Rachal asked if the $300,000 covers three years or is it annual. Mrs. Woodard pointed out the very detailed information provided on BoardDocs explaining that if the board approves this request it will be spread out over three years; and because staff will tie into what is already operational at Southwood, the amount should cover three years of services and software. Mr. Rachal also explained that from the State alone, and if our MFP is $5,000 and the cost is $100,000, this represents only 20 students.

Ms. Priest commented on the technology presentation and all of the great things happening with technology. She said Virtual Schools are here and Caddo Parish needs to be ready, because if we do not offer it, someone else will. She added she believes it is a golden opportunity for Caddo to reclaim a number of Caddo students; and $100,000, she believes, is only a drop in the bucket.

Mrs. Crawford referenced the breakdown on the MFP (in Phase III). Mrs. Woodard responded that is correct and it will be twice as much relative to the cost. Dr. Dawkins stated he has the response and will share it with the board members.
Mary Trammel stated her understanding that this meeting is a work session and is the opportunity for the board to ask questions. She stated that the information received was so vague, that it is necessary to ask questions so everyone understands it since this is about money.

Mrs. Bell stated that she needs more details and the importance of asking questions when the board is making a decision to spend a lot of money. She explained that she asked staff at last month’s meeting for information on Virtual Schools; and with the recent newspaper article on graduation rates, this is a way we can claim back some of our students. Mr. Hooks stated his agreement with Ms. Trammel’s comments.

Reginald Abrams noted some possible confusion in what this item actually is because this is a bid response and basically all the board ever gets in a bid response is the cost for what is in the RFP. He explained that administration will only give the board the cost and who they are recommending. The decision to have a Virtual School has obviously been made and now the board must accept the bid on the RFP, if it is within the budget, or reject it. He further explained that it is o.k. to discuss the item; however, it is no different than other bids. Information on the RFP was shared with the board at the last meeting; and at this meeting, staff is bringing a recommendation based on the response to the RFP. At this time, the board must, if it is within the budgeted amount, approve it.

Mr. Riall asked about a decision being made to have a Virtual School; and if Caddo will be in competition with the State offering, what is Caddo doing to offer our product over what the state is doing? Will we promote the idea of enrolling students in the Virtual School over our neighborhood schools? Are we going to allow students to be part-time in the Virtual School; and if so, will we collect any MFP funding for them?

Superintendent Dawkins responded that we are in competition with the State anyway, via charter schools; and Virtual Schools is yet another entity the State has also involved itself in. He added that thousands of students in the community are not in any school. He also stated there are students in the Caddo schools that can use any enhancement tools that we do not presently offer, and this is an additional opportunity for those who can succeed in this type environment.

Mr. Riall again stated his main concern in approving budget items such as this is the board needs to look at these closely to ensure that we get the return on our investment that we wish to get. Dr. Dawkins stated that is the reason behind development in three phases, and part of that is to start small and build the marketing for this program. Dr. Dawkins added that the effort is to also respond to the community in the citizens’ plea for help. Mr. Riall stated if we do it, we need to make sure it is successful.

Ms. Seamster asked about the request at last month’s meeting to receive the RFPs provided.

Mr. Hooks also stated that the board needs to look at the fact that the Caddo Parish School Board has been in turmoil and virtual schools are coming, and are here. He noted that people have lost confidence in Caddo Parish and he is not certain jumping on the turmoil will help.

Mr. Rachal asked how many students are expected. Dr. Dawkins responded that in the initial Phase I staff has determined approximately 200 for repeat credit, and 1,000 for remediation/summer program. For Phase II, Dr. Dawkins stated that 254 virtual students (full time) and about 500 full time students. Mr. Rachal asked about the students picking up credits. Mrs. Woodard shared that Caddo presently has approximately 400 students that are home study students, and this audience will be targeted.
Ms. Priest reminded the board that the item before the board today is whether or not Caddo Parish School Board will accept the bid before the board. Mr. Rachal stated that without the supporting information it makes it very difficult to spend $300,000. He noted the importance of having this information in order to make a decision.

Mr. Abrams suggested that in order to clarify this item, the board can bring a motion to accept the bid, followed by another motion (at some point) for Phase I and ask the superintendent to bring back at a later date the recommendation for Phases II and III. If done this way, it is more likely that the Virtual School becomes a real school in providing needed services.

Mrs. Crawley stated that her real question is while she supports Virtual Schools, when did the board vote on this item? Dr. Dawkins noted that the last meeting when this item was brought to the board it was pulled because the board wanted additional information for establishing a Virtual School. Mrs. Crawley stated that the order for doing this should be the board votes to do the project and approves the RFP to be mailed out, and then acts on the bids when they are received. Mrs. Crawley stated that while she supports Virtual Schools, she believes the order was reversed. Mr. Abrams explained that administration put out an RFP for software services and a proposal was received under the RFP submitted. He further explained that because the superintendent acts on behalf of the board regardless of whether or not the board has voted, the bid is out there and is one that the board must approve if it is within the budget. Otherwise, under the bid law, there is a requirement that it may not be rebid for another year because you have someone who has bid the project. Thus, Mr. Abrams stated the board will need to accept it based on the criteria in the bid and the response which resulted in a recommendation from administration. He added that the normal process would be for staff to submit to the board a recommendation to do an RFP for a Virtual School, the board votes on it and an RFP is put out. At this time, an RFP went out based on a decision by the superintendent and it is a viable RFP with information submitted by the company that falls within the criteria; however, it is higher than what he saw as the budgeted amount, and the board can accept it that way. Mr. Abrams stated that if the board wants to move forward, the board approves the bid amount to begin the process and can do so by approving it in phases, with the motion to approve the purchase and the services based on the bid and implement Phase I and request from the superintendent additional information for Phases II and III. Mrs. Crawley asked about the 1,000 in remediation and if these are children currently enrolled in Caddo and we are already getting MFP for these, but they need remediation because they are falling behind or they need to repeat a class. Dr. Dawkins said that is correct. Mrs. Crawley asked if she understands that this will not be new MFP dollars. Dr. Dawkins said that is correct; but the board is currently paying additional dollars to remediate them. Mrs. Crawley asked staff to explain how we will save money? Mrs. Woodard explained that the savings is in the summer remediation as 90% of what will be done this summer will be through the on-line platform, which allows for the opportunity to manage more students in end-of-course remediation and GEE remediation through the Virtual School platform. Mrs. Crawley asked if students will show up at a site. Mrs. Woodard explained they will show up at a site to test, but they can be managed through the Virtual platform the same as taking classes on-line, managed through email and other accesses set up through the platform. Mrs. Crawley asked if we will not hire summer school teachers and principals. Dr. Dawkins explained that based on the Virtual structure, we will hire fewer people to do on-site work, and asked Mrs. Woodard to report how much has been spent on summer remediation. Mrs. Woodard reported that the last two summers the District paid approximately $2 million for remediation. Mrs. Crawley asked if she remembers correctly that one summer Blessed Children (or another organization) did our summer school. Mrs. Woodard explained that we partner with organizations to pick up a part of what it costs us and our part was approximately $2 million. Mrs. Crawley asked if this would mean we would not spend anything like this with this program. The superintendent stated that is correct over a two-year period of time. Mrs. Crawley asked when will Phase II be implemented? Dr. Dawkins responded that will be next year, 2012-13 school year.
Mrs. Bell stated that this is not new to us but came up in discussion two months ago. She also reported that the last time it was brought up, she asked for more information on Virtual Schools because this is a way we can help save students that are not in school or those that are struggling. Mrs. Bell asked that when the board meets and discusses something for two to three hours to make it about something that will help students, even if it does cost $1 million. She stated her concern is the students we are losing.

Construction (Capital Projects). Ms. Priest asked for a list of the schools for this project.

SRAC Letter of Agreement. Ms. Seamster asked about the $40,000 to SRAC - how much does the School Board expend for ArtBreak and does the City of Shreveport participate in the cost of the Convention Center? Dr. Dawkins explained that staff has listed transportation and security as well, and regarding the cost for the rental of the building, the City has participated in the past in this cost. The District also has a contract with the City for the use of the Convention Center for our high school graduations and we are attempting to parlay that partnership to something lower, even though the cost is set for this year. Ms. Seamster asked if staff has an approximate overall amount that the District spends annually on ArtBreak in addition to the $40,000. The superintendent responded that we spend approximately $8,500 for security and approximately $4,300 for transportation and the facility rental is approximately $19,000 which is in the Arts Department budget. Dr. Dawkins also explained that Bossier pays a fee proportionate to the size of that district.

Purchasing Department Audit. Superintendent Dawkins reported that he met with the auditors and with the department head to discuss the Purchasing Department audit and Jeff Howard is in attendance if board members have questions. Mr. Ramsey stated that he will make a motion directing the superintendent to implement all the recommendations of the internal audit immediately, to report to the board when each recommendation has been fully implemented, and to direct the internal auditor to perform periodic sample audits of the Purchasing Department. He said he spent extensive time reviewing the audit and met with the auditors to get his questions answered. Mr. Ramsey stated that the audit was very thorough and precise and the superintendent is already addressing those situations that are problematic and need addressing quickly. He added this is the purpose of internal audits and he is very comfortable with the motion he will bring. He also applauded the job well done by the District’s internal auditors.

Mrs. Crawley expressed her appreciation for the timely submission of the audit and why she believes these audits are important, especially in times of changes in leadership. She also stated she believes these recommendations for change will help the department to be what it needs to be. She also agrees with periodic updates or mini-audits.

Mrs. Bell expressed appreciation to staff for the detailed report and asked how long did it take to conduct this audit? Mr. Howard responded that it took a couple of months and there are about three or four internal audits in process. The next internal audit brought to the board will be Maintenance or Energy Management. Mr. Howard also noted that the warehouse was not a part of the Purchasing Department audit, and it will be brought to the Board in a separate audit.

Mr. Hooks asked the superintendent what part did Mr. Graham play in the Purchasing Department audit? Dr. Dawkins responded that he worked with Mr. Howard in providing information and access to information in this department. Mr. Hooks also asked when did Mr. Graham take over as interim for this department? Mr. Graham responded in June of last year (2010). Mr. Hooks asked how far back did the audit cover? Mr. Howard explained that they sampled information during July 1, 2010-June 30, 2011, the 2010-11 school year. Mr. Howard reminded the board that they did not audit a person, but audited a department. Mr. Hooks stated his understanding; however, there is a person over that department that is responsible for what is going on in that department. Mr. Hooks stated his concerns since the director was newly
appointed and it was audited first. Dr. Dawkins stated his understanding of Mr. Hooks’ concern, and staff will take the information and work with Mr. Graham to make the needed changes in how things are done in the department, and this does not cast any reflection on Mr. Graham. He said the audit activity reflects all the work in that department; and to move forward, it will take leadership and a team effort. Mr. Hooks said his main concern as a board member is to first make sure the children are treated fairly and second to make sure the employees are treated fairly. Dr. Dawkins said the board can be assured that will happen.

Mrs. Bell stated her agreement with Mr. Hooks and asked Mr. Howard if the board did not indicate going back two or three years for the audit? Mr. Howard responded that two to three years of information would take possibly closer to five or six months and the information would not be as timely. He also stated that one year is a standard for auditing. Mrs. Bell stated she always thought 2011 would not be involved because Mr. Graham was an interim person and when only auditing one year, is that fair? If so, maybe the first audit should have been on a department that had someone in the leadership position longer and was not an interim director. Mr. Howard stated that he never heard about going back two to three years on the audit, and that possibly we are talking about two different things, and it may take two to three years to complete all the departmental audits. Mrs. Bell said it is her opinion that if we audit a department where the leadership quit and an interim is placed in that position, she is concerned about the fairness.

Ms. Priest reminded the board that we are not talking about personnel, but about a department. She said if she were the one sitting in that position for the period of time audited, she is the head of the department and it is the department that is being audited. Dr. Dawkins explained some of the things noted in the audit identified by Mr. Graham and he was addressing them.

**Faculty Meeting Policy.** Mr. Ramsey shared with the board a copy of this policy and stated that the only change is the insertion of “written”. Mr. Abrams stated that this is basically a new policy and falls in line with the grievance filed and the grievants agreed that if the Board came up with a policy that limits the number of faculty meetings, and the language presented is their language (with the exception of what is in bold print), they will end the grievance. The general rule will be one faculty meeting per week; however, if necessary, the principal can receive written approval from their director if there is need to call an additional meeting.

Mrs. Crawley asked if there will be time to meet with the employee organizations and review this before the board votes on this item. Dr. Dawkins stated that meetings will be held with principals next week as well as with the employee organizations. Mrs. Crawley asked about the statement “to notify and receive written approval” and will the principal be required to give the objective/reason for calling an additional meeting, since some principals have called additional faculty meetings for things such as “selling pots and pans” or “buying additional health insurance”. Mr. Abrams stated he believes a principal can have a meeting any time they want to with their staff and this policy will actually limit the superintendent; and if the principal wants to have another meeting he will only need to contact the director (and an email is sufficient) to get approval. Mr. Abrams further explained that basically this agreement addresses a grievance that was passed; and therefore if anyone doesn’t want the policy, it will stay the way it is and the administrator will continue to do it the way it has always been done. Mrs. Crawley asked if a principal can have a meeting anytime they want to with their staff and this policy will actually limit the superintendent; and if the principal wants to have another meeting he will only need to contact the director (and an email is sufficient) to get approval. Mrs. Crawley further explained that basically this agreement addresses a grievance that was passed; and therefore if anyone doesn’t want the policy, it will stay the way it is and the administrator will continue to do it the way it has always been done. Mrs. Crawley asked if a principal can have a meeting anytime they want to with their staff and this policy will actually limit the superintendent; and if the principal wants to have another meeting he will only need to contact the director (and an email is sufficient) to get approval. Mr. Abrams stated that he discussed this with Mrs. Lansdale at length and the major addition is the part providing for written approval which he believes will require everyone to stop and
think whether or not a meeting is needed. He believes the CFT concurs with this and it clarifies the intent of the policy when approved.

**Level IV RIF Grievances.** Mr. Rachal asked staff when supporting documents will be provided? Mr. Abrams announced that the board will receive this information in accordance with policy the Monday week prior to the board meeting.

**SunGard.** Mrs. Armstrong asked the superintendent to make the board aware of the team’s findings and how it has positively or negatively impacted the operations of the school system; and if it has not made a difference and the district continues to be negatively impacted, she believes the board should make a decision on November 15th that we do not need SunGard in our operations. Ms. Priest asked Mrs. Armstrong if she is asking the superintendent to provide the board with information in order to move forward. Mrs. Armstrong verified that is correct. Mr. Rachal asked if this is a request of the superintendent for a recommendation to continue or discontinue these services? Mrs. Armstrong responded basically yes. Mr. Rachal asked the superintendent if two weeks is enough time? Dr. Dawkins responded it is. Mr. Rachal asked for clarification that the item will be a recommendation from the superintendent to continue or discontinue services with SunGard. Mrs. Armstrong said yes. Ms. Trammel asked if the board passes on such a motion that we no longer need SunGard, is there anything in place to keep the system running? Superintendent Dawkins responded that the recommendation will include a complete response to the request. Mrs. Armstrong explained that she is bringing this forth because if SunGard has not been able to resolve the issues where SunGard is operational, she believes we need them resolved before moving forward and bringing in payroll. Ms. Priest asked the superintendent about the problems that have been brought forth regarding SunGard? Dr. Dawkins reported that he attended a SunGard meeting on Monday; and while some of the conversion has gone well, there are still a lot of questions on some, i.e. insurance and the nuances that cause us to do different things. He said we have made tremendous progress on SunGard, and he reminded everyone that SunGard came to the District before he came to Caddo. He added that staff is working very hard and some breakthroughs have been seen and he will provide an update on all the areas, what we are still challenged by and what we have accomplished. Ms. Priest asked if, relative to the nuances, these are some things we created? Dr. Dawkins said every district is different, so SunGard cannot just come in and not address the district’s specifics. He reminded the board that when he came to Caddo, Caddo was running three different payrolls; and most systems have one payroll. Ms. Priest stated that is what she is asking and if Caddo has some practices in place that prohibits or hinders SunGard from being able to perform at the level that we expected and need. Dr. Dawkins stated that the structure has presented some challenges with SunGard, and it is not a good or bad thing, but it is the way the district is. Ms. Priest asked if we are putting things in place to rid ourselves of those practices since we have made a sizeable investment, in order to make it work. The superintendent stated he believes the team has worked very hard to make everything happen and yesterday discussion was held on the role changes from HR to payroll or vice versa when an account number is assigned in order to pay someone. In some districts this is a payroll function and in some districts it is an HR function.

Mrs. Crawford asked that when the staff reports back to the board it would be helpful to have a list of the problems as well as how they have been resolved.

Mr. Ramsey stated that he met with Dr. Dawkins and Mr. Woolfolk to put together a list of things regarding this issue and he thought the information had been shared with all board members. He said he believes the information was very inclusive and all the questions have been addressed; however, he believes the question remains at what point in time do we actually pull the trigger and make the conversion. He also asked staff to provide information on the remaining budget because he understands it is currently being paid from QSCB dollars and will now affect the General Fund budget.
ADDITIONS

Mr. Ramsey requested an item on the faculty meetings policy be added to the agenda. He explained that he is recommending adding one word to the policy the board previously approved.

Dr. Dawkins asked that an item for the Level IV RIF Grievances be added to the agenda.

Mrs. Armstrong asked that an update on SunGard be provided to the board and an item added to the agenda as she understands it is still not working.

Mr. Rachal also asked that the superintendent advise when he will be prepared to bring an update to the board on school attendance zones. Dr. Dawkins announced that staff will be prepared to bring something in December. Mrs. Armstrong asked if this will also include the attendance zone that impacts Southern Hills?

Miss Green asked that the board hear a presentation on the Fair Share report provided at board member stations.

Ms. Priest asked that Mr. Rachal and Mrs. Armstrong put these requests in writing to the superintendent, since at this time, the board is discussing items for the agenda on November 15th.

ESTABLISH THE AGENDA AND CONSENT AGENDA

President Priest announced that items 6.05, 7.01, and 8.01-8.05 are the consent agenda items. *Mr. Riall moved, seconded by Mrs. Bell, to approve the proposed agenda and consent agenda for the November 15, 2011 CPSB meeting as presented. Vote on the motion carried.*

POLL AUDIENCE

Billy Wayne, Urban Support, shared with the board that his organization serves 1,000 students and was recently recognized by the State Department of Education as one of the top in the State. On October 11th, he reported that they met with district representatives to discuss clarifications on the District’s Supplemental Education Services (SES) program activities and it was agreed that the agency would bring concerns in writing and present them to the appropriate SES official. He stated that these were submitted via email on October 17th with a request for a return response of October 24th. He stated the agency only wishes to get clarification on the procedures and policies relative to the SES funds, and at this time, these concerns have not been addressed. Mr. Wayne asked when can they expect a response from the superintendent?

Jackie Lansdale, Caddo Federation of Teachers/Support Personnel, addressed the faculty meeting policy and that this is not a power control between the faculty and principals, but Caddo is a huge district and they are only looking for some type of accountability. She referenced the practice that some faculties are asked to remain after school for additional CAP meetings, without compensation, while the faculties in AU schools attend these during the day with compensation. She said the same is true with the duty-free lunch policy and sometimes in emergency situations, it may be necessary; however when it is, the principal is only asked to put it in writing to their director. Mrs. Lansdale also encouraged the board to move forward with the Virtual platform and shared the experience of a young man that did not become a drop out because of this program.

Adjournment. *Mr. Riall moved, seconded by Mrs. Bell, to adjourn. Vote on the motion to adjourn carried* and the meeting adjourned at approximately 7:44 p.m.
November 15, 2011

The Caddo Parish School Board (CPSB) met in regular session in its office at 1961 Midway, Shreveport, Louisiana at approximately 4:30 p.m. on Tuesday, November 15, 2011 with President Lillian Priest presiding and the following school board members present being a quorum: Steve Riall, Jasmine Green, Carl A. Pierson, Sr., Charlotte Crawley, Curtis Hooks, Mary Trammel, Bonita Crawford, Barry Rachal, Larry Ramsey, Ginger Armstrong and Dottie Bell. Also present was Legal Counsel Reginald Abrams, staff and visitors. Miss Green led the prayer and Pledge of Allegiance.

OATH OF OFFICE

Legal Counsel Reginald Abrams administered the oath of office to newly elected board member Carl A. Pierson, Sr., District 3. The board and audience extended congratulations and welcomed Mr. Pierson to the board.

CONSIDERATION OF THE MINUTES OF THE OCTOBER 18, 2011 AND NOVEMBER 1, 2011 CPBS MEETINGS

Mrs. Armstrong moved, seconded by Mrs. Bell, approval of the minutes of the October 18, 2011 and November 1, 2011 CPSB meetings as submitted. Vote on the motion carried unanimously.

PRESENTATIONS AND RECOGNITIONS

National Merit Program. Mary Rounds, principal, Caddo Magnet High School, recognized the following 2011-2012 National Merit Semifinalists: Conner Bacon, Ruth Bishop, Isabella Hicks, Benjamin Huff, Eleni Mijalis, Timothy O’Young, Katherine Pitts and Anna Yates. Ms. Rounds explained that these semifinalists are the highest scorers in each of the fifty states and represent less than 1 percent of each state’s high school seniors.

National Merit Achievement Program. Ms. Rounds explained that the National Merit Achievement Program recognizes outstanding African American students who have demonstrated promise and who want to increase their opportunities in higher education. The 2011-2012 National Merit Achievement Semifinalists are: (Grace) Oluwatoyin Adeboyega and Tan’nell Peoples.

National Merit Commended Students. Ms. Rounds recognized the following 2011-2012 National Merit Commended Students: Christian Alderman, Alexander Liebert and Luke White. These students are recognized for their exceptional academic promise.

SMART Students Siemens Regional Semifinalists. Ms. Rounds recognized Eleni Mijalis and Sara Beth Rivers, both from Caddo Magnet High, as the 2011-2012 Siemens Regional Semifinalists in the Siemens Competition in Math, Science & Technology.

Louisiana Scholastic Press Association Newspaper Competition. Dr. Sandra McCalla, principal, Captain Shreve High School, announced that The Enterprise, Captain Shreve’s newspaper, won first place in the Louisiana Scholastic Press Association Newspaper Competition. She announced that this award was given for the best all-around newspaper produced in the 2010-2011 school year and recognized the following newspaper staff for their individual awards: Morgan Harris, 1st place, Layout and Design-Center Page Spread; Anna Boyter, 1st place, Photography – Photo Essay; Hannah Brosius, 1st place, Advance News Story; Cici Criswell, 2nd place, Editorial/Political Cartoons; and Cici Criswell, 3rd place, Artwork/Illustrations-Illustrations. The members of the 2010-2011 newspaper staff were Morgan Harris, Editor-in-Chief; Anna Boyter, Photo Editor; Hannah Brosius, News Editor; John...
State Fair of Louisiana (Baton, Dance Line and Cheer Competition). Dr. Barzanna White stated that over the last several years, the State Fair of Louisiana has sponsored the Baton, Dance Line, and Cheer Competition which benefits Louisiana and Texas youth. Dr. White announced that Caddo groups won all three grand prize divisions. The following teams were recognized for their achievements: Blanchard Cheerleaders, 1st place, elementary school cheer (small); Cherokee Park Indians, 1st place, elementary school modern (medium); Southern Hill Vikettes, 1st place, elementary school high kick (medium); Southern Hills Vikettes, 1st place, elementary school hip hop (medium); and Southern Hills Vikettes, 1st place, elementary school Pom (medium). The Overall Grand Prize Elementary School Winner was Southern Hills Elementary School Vikettes. Middle School Winners were Oil City Tigerettes, 1st place, middle school pom (Medium); Vivian Middle Magnet Spirit Steppers, 2nd place, middle school pom (Small); Walnut Hill Golden Hornets Dance Line, 1st place, middle school show production (small); Donnie Bickham Patriot Belles, 1st place, middle school hip hop (small); Donnie Bickham Patriot Belles, 1st place, middle school pom (small); Donnie Bickham Patriot Belles, 1st place, middle school military (small); Donnie Bickham Patriot Belles, 1st place, middle school high kick (small) and Donnie Bickham Patriot Belles, 1st place, middle school prop (small). The Overall Grand Prize Middle School Winner is Donnie Bickham Middle School Patriot Belles. The high school winners included BTW JV Cheerleaders, 1st place, high school cheer (small); Captain Shreve Gator Highline, 2nd place, high school high kick (small); Captain Shreve Gator Highline, 2nd place, high school pom (medium); Captain Shreve Gator Highline, 2nd place, high school hip hop (small); Captain Shreve Gator Highline, 2nd place, high school novelty (medium); Northwood Falcon Line, 1st place, high school high kick (medium); Northwood Falcon Line, 1st place, high school military (medium); and Northwood Falcon Line, 1st place, high school novelty (medium). The Overall Grand Prize High School Winner was Northwood High School Falcon Line.

Teacher of the Year. Mrs. Antionette Turner, chief academic officer, stated that the classroom teacher is the single most important factor in a child’s education, and Caddo Parish is fortunate to have dedicated, knowledgeable teachers serving our students on a daily basis. The following were recognized as Caddo’s Teachers of the Year: (1) Marvin Rainey, Oak Park MicroSociety, Elementary Teacher of the Year; (2) Sara Knick, Caddo Middle Magnet, Middle School Teacher of the Year; and (3) Cheryl White, Booker T. Washington New Tech High School, High School Teacher of the Year.

KTBS One Class at a Time Winners. The following teachers were recognized as KTBS One Class at a Time $1000 Classroom Grant Recipients: Calley Schneider, Claiborne Elementary; and Lauren Wegner, Summerfield Elementary.

Louisiana Council for the Social Studies Grant. The following social studies educators were each recognized for receiving a $250 grant to continue expanding their content knowledge and return to their classrooms, schools and districts with a renewed enthusiasm and passion for promoting social studies: Antionette Edwards, Judson Elementary; Lanena Emanuel, Caddo Middle Magnet; Janice Houghes, Caddo Magnet High; and Ken Lerchie, Caddo Magnet High.

2011 DOW Fellowships. The following Caddo High School second year teachers were selected to receive DOW Fellowships through the National Science Teachers Association New Teachers Academy: Caytie Green, Captain Shreve High School and LaToria Stewart, Green Oaks Performing Arts.
Jackie Lansdale, Caddo Federation of Teachers/Support Personnel, announced that the Louisiana Federation of Teachers Convention will be held in Bossier on Sunday through Tuesday before Thanksgiving at Diamond Jacks in Bossier. Activities for the convention that the board members might be interested in attending include Sunday at 5:00 (Screening of American Teacher, answer to the Waiting for Superman Documentary); Monday at 12:30 when a gentleman from Common Cause will talk on corporate America and interest in the public school agenda, i.e. Why would Mayor Bloomberg be interested in Louisiana’s BESE elections?; and at 5:00 on Monday, the American Federation of Teachers will present a charter for Red River United, a union of the Bossier Federation and Caddo Federation. Mrs. Lansdale also announced that the CFT/SP will submit three resolutions at this year’s convention.

ESTABLISH THE AGENDA AND THE PROPOSED CONSENT AGENDA FOR THE NOVEMBER 15, 2011 CPSB MEETING

Dr. Mary Nash Robinson, in the Superintendent’s absence, highlighted items for the board’s consideration. President Priest announced that Items 6.02-6.03, 6.05, 7.01, 7.03, 8.01-8.05 are the consent agenda items.

CONFIRM THE CONSENT AGENDA

Mr. Riall moved, seconded by Mr. Hooks, to approve the agenda and proposed consent agenda for November 15th as presented. Vote on the motion carried unanimously and the following is a summary of the board’s action.

Item No. 6

Leave Requests, Certified and Classified Personnel. The board approved the following requests for leaves as recommended by the superintendent and submitted in the mailout.

Certified
Sabbatical Leave (study), Spring Semester 2012
Sellers-Truman, Shondolyn, Teacher, Westwood Elementary, 12 years
Shadoin, Tiffany O., Teacher, Summerfield Elementary, 5 years
Saxon, Sandra, Teacher, Special Services, 16.5 years
Mays, Retrina, Counselor, Huntington High School, 7 years
Herman, Donna S., Teacher, Fair Park College Prep, 10 years
Catastrophic Leave, September 3, 2011 – October 10, 2011
Bush-King, Maiblanch, Teacher, Academic Recovery, 8 years
Catastrophic Leave, December 9, 2011 – February 3, 2011
Bradley, Phillip A., Teacher, Hamilton Terrace, 19 years

Personnel Transactions Reports. The board approved the personnel transactions reports for the period covering September 21, 2011 – October 20, 2011 as recommended by the superintendent and submitted in the mailout.

Requests for Out of State Travel (General Fund). The board approved requests for out of state travel (General Fund) as recommended by the superintendent and submitted in the mailout.

Item No. 7

Purchasing. The board approved the following bids as recommended by staff and submitted in the mailout on the bid tabulation sheets: (1) Conco Food and Gerlach Meat for the purchase of Canned and Frozen Food; Fish, Poultry, Eggs, Meat and Specialty; (2) Carefree Janitorial,
totaling $130,794.95; Conco Food, totaling $187,814.75; Long’s Preferred, totaling $13,441.25 and VCC Janitorial, totaling $178,747.00 for the purchase of Food Service Paper and Supplies.

**Capital Projects/New Construction.** The board approved Purtle & Associates for Wiring Infrastructure at Various Schools; and authorized staff to move forward with advertising and bidding on a bus and car loop at Caddo Heights Elementary.

**Item No. 8**

**Special Education Interagency Agreements and Contracts.** The board approved the special education interagency agreements and contracts for providing services as recommended by the superintendent and submitted in the mailout.

**Letter of Agreement with Shreveport Regional Arts Council.** The board approved the letter of agreement with the Shreveport Regional Arts Council as recommended by the superintendent.

**Request for Use of School Buses.** The board approved requests for the use of school buses as recommended by the superintendent and submitted in the mailout.

**Purchasing Department Audit.** The board directed the superintendent to implement all the recommendations of the internal audit immediately, that the superintendent report to the board when each recommendation has been fully implemented and that the internal auditor perform periodic sample audits of the Purchasing Department.

**Faculty Meeting Policy.** The board approved the proposed policy addressing faculty meetings as submitted in the mailout.

**PERSONNEL RECOMMENDATIONS**

Mr. Ramsey requested this item be separated and the two recommendations voted on separately. Mr. Ramsey moved, seconded by Mr. Rachal, to postpone the filling of the Director of Student Support Services position until further discussion with the superintendent. Mr. Ramsey explained that he discussed with Dr. Dawkins that he could not support combining these two positions and his belief that it should be two positions. Mrs. Armstrong concurred and that all who have been in the school system realize how complicated the laws have become, especially those relative to 504, and believe this is too heavy a load for one person. Mr. Hooks also concurred with these comments and expressed his appreciation for Mr. Ramsey bringing this motion. Vote on the motion carried unanimously.

Mr. Ramsey moved, seconded by Mrs. Bell, to approve the superintendent’s recommendation for the area school director as submitted in the mailout. Vote on the motion carried.

**BIDS (PURCHASING – VIRTUAL SCHOOL SERVICES)**

Mrs. Armstrong moved, seconded by Mrs. Bell, to approve the bid of E2020, Inc., totaling $299,880 for Virtual School Services as recommended by staff and submitted in the mailout. Vote on the motion carried with Board member Crawley opposed.

**LEVEL IV RIF GRIEVANCES**

Jackie Lansdale, president of the Caddo Federation of Teachers/Support Personnel, shared specific instances of how employees were affected by the RIF. She said the board needs to hear from these employees and asked that the board select one or two of these and hear their stories.
Mr. Ramsey moved, seconded by Mrs. Bell, to accept the superintendent’s recommendation as to all grievances and to dismiss all grievances based on the information presented. Mr. Ramsey stated that he asked staff for information (on the status of employees laid off as a result of RIF), and it was provided. He said administration followed the board’s policy and noted that attempts are still begun made to bring people back to work. While he sees some things that can be corrected, Mr. Ramsey stated he will address that in a later motion and he supports the superintendent’s recommendation. Mrs. Bell stated her agreement with Mr. Ramsey’s comments.

Mrs. Crawley moved, seconded by Mr. Hooks, that the board follow policy and hear oral arguments from a representative of these groups (high school secretaries, Central Office, custodians). Mrs. Crawley stated that the board has not heard from these employees, and she believes if these employees take the time to file a grievance, they only want the board to hear their story. She asked that the board, as representatives of these employees, take the time to listen to their representative.

Mr. Hooks agrees that these people are only asking to be heard; and if board members deny this privilege, they should be voted out or recalled as these employees are entitled to their freedom of speech.

Mr. Abrams explained that board policy establishes how grievances are handled; and if the board does not follow its policy, it will be subject to attack in the court system. He also noted that if the board passes the substitute motion, it could possibly lead to litigation since the board will deny certain people sharing their story and policy states it is the attorneys that will be heard.

Mr. Rachal stated that out of respect, he would like to hear from those affected and asked what the next step would be to allow this. Mr. Abrams explained that if there is a motion to allow oral arguments, the board will allow the attorneys to discuss and present their position and the board will accept or deny the superintendent’s recommendation. Mr. Rachal asked the maker of the motion if she would accept a friendly amendment for the board to hear oral arguments. Mrs. Crawley clarified that she believes “representative” could have been the attorney and is in accordance with policy.

Mrs. Crawford stated that most of the secretaries were hired back and asked if the board decides to hear them, will they speak to being laid off from the job they were hired for or to the job they have but they want to go back to the job they were laid off from? She also asked if these employees wanted to speak, doesn’t the board have a forum for them to speak to the board for 3-5 minutes? Mr. Abrams responded that he would have to leave it to each attorney as to how they want to make arguments to the board; and because there is an overwhelming number of grievances, it would be necessary for him to come up with an outline that would be fair in presenting oral arguments. Mr. Abrams stated that he read all the information and there are actually several different arguments so it would be necessary to lay out a schedule on hearing the oral arguments.

Mr. Ramsey clarified what the board attorney has pointed out, and that in his review of the detailed information provided, many of the employees are back to work. In following board policy, the board should do what is required to address and dismiss, and that is why he brings this motion in support of the superintendent’s recommendation.

Mrs. Bell asked Mr. Abrams if, when the board was sued by the organization and went to court, these employees were represented by their attorneys. Mr. Abrams clarified that none of the grievants were part of the law suit, but it was the Caddo Federation of Teachers/Support Personnel that filed the law suit based on them. They were represented by Brian Landry and the
same issues are being presented now. He further explained that the preliminary finding was there was no proof of misapplication; thus, we filed to have it dismissed and expect the judge to rule on this in December. Mrs. Bell asked Mr. Abrams if the board would hear the same things that have already been heard and will it be the attorney or a representative presenting the case? Mr. Abrams responded that is correct. Mrs. Bell stated that she believes it is still about RIF and the way the board implemented RIF.

Mrs. Armstrong asked Mr. Abrams if the board should hear oral arguments, will they be the same arguments that were heard by the judge? Mr. Abrams answered that most of those have been made to the judge and basically, the motion is based on that. He added that there are individuals that are claiming certain things, but that is not what was before the court. The grievance is intended to show that the policy was misapplied and the board needs to correct it; however, he has not seen where it was misapplied. He reminded the board that all this information is included in the backup presented to the board.

Mrs. Armstrong asked who would absorb the cost for the board’s attorney representation? Mr. Abrams responded that the Caddo Parish School Board would be responsible for that cost. Mrs. Armstrong shared that she talked with a number of employees affected by RIF and she understands their concerns; however, she does not believe that by the board negating 8.06 by supporting the substitute motion that it will solve those concerns. She added that retooling the RIF policy (Item 8.08), she believes, can address those concerns. Mr. Abrams stated that is correct if the board believes changes should be made, and Mrs. Armstrong stated that she believes there are some areas where policy can be tweaked so it works more favorably for the employees. Mr. Abrams further explained that depends, because the complaint was we were too specific in how employees were identified and noted that in 2004 the board was criticized on how it identified employees in the RIF and is why the board changed it to job description.

Mr. Pierson asked for clarification on the substitute motion with the friendly amendment. Mr. Abrams explained that he believes the substitute motion is to allow oral arguments to be heard in the next meeting. Mr. Pierson asked for the wording of the substitute motion; and if the board hears oral arguments, what can happen as a result of hearing them? Attorney Abrams explained that if the board votes to have oral arguments by an attorney or representative, the board will determine if the grievants will get what they are requesting; and if so, the board is actually saying (1) it did not need a RIF; (2) the board should not group people together in certain ways and will need to undo what it did and put everyone back to work; and (3) if the board decides the categories were too tight, it would have to go back and lay off more employees.

Mrs. Crawley stated that she believes she is hearing that we are going to do everything without letting the employees or their attorney be involved; and that the board doesn’t need to hear in a formal meeting what the problems are. She stated that everyone receiving a letter following their Level III was told if they did not agree with the resolution at that level, they could file a Level IV hearing before the board.

Mr. Hooks stated that he doesn’t believe the employees are arguing if RIF was done right, but they are saying that RIF should not have happened at all. He added that he believes these employees did not have to be laid off because the district had the money.

Ms. Trammel moved to call for the question on all motions. Vote on the motion to end debate carried with Board members Green and Rachal voting no.

Vote on the substitute motion failed with Board members Green, Crawley and Hooks supporting the motion and Board members Riall, Pierson, Trammel, Priest, Crawford, Ramsey, Armstrong and Bell opposed. Mr. Rachal did not vote.
Vote on the main motion carried with Board members Crawley, Hooks and Rachal opposed and Board members Riall, Green, Pierson, Trammel, Priest, Crawford, Ramsey, Armstrong and Bell supporting the motion.

UPDATE ON SUNGARD

Mrs. Armstrong asked that this item be postponed to the December meeting.

REDRAFT RIF POLICY

Mr. Ramsey moved, seconded by Mrs. Bell to direct legal counsel to redraft the RIF policy; work with administration to set up a meeting with teacher organizations for input and bring to the board a recommendation for approval at the December meeting. Mr. Ramsey stated he believes this provides the opportunity to do the tweaking that has been discussed and needs to be done. Vote on the motion carried unanimously.

DEPARTMENT OF LABOR RESOLUTION RE: FILIPINO TEACHERS

Mrs. Lansdale shared her concerns for the board continuing to make up things as it goes along; and for taking actions that affect people’s lives and those affected are not included. She also noted how difficult it is for her to listen and not be able to address the inaccuracies stated.

Mrs. Crawford moved, seconded by Mr. Ramsey, to approve the resolution of the claims with the Department of Labor in accordance with board counsel’s recommendation.

Ms. Priest clarified that a resolution was reached with the Department of Labor, and not with employees, regarding claims of actions of UPI regarding the Filipino teachers. She added that the Caddo Parish School Board paid each Filipino teacher $1,660 for filing fees and set aside a
reserve of $400,000 for future claims we were able to resolve, and we were able to resolve for the Filipino teachers the amount of $57,380.

Mrs. Armstrong called for the question and the vote to end debate carried with Mrs. Crawley opposed.

Vote on the motion carried with Board members Crawley andHooks opposed and Board members Riall, Green, Pierson, Trammel, Priest, Crawford, Rachal, Ramsey, Armstrong and Bell supporting the motion.

ANNOUNCEMENTS AND REQUESTS

Mr. Hooks expressed appreciation for the opportunity to be included in the Alexander Honors Program. He also expressed appreciation to Tommy Smith for the outstanding work in renovating the auditorium. Mr. Hooks also thanked Fair Park for inviting him to the Veterans Day ceremony, and Mrs. Turner and Mr. Woolfolk for addressing the turn around request; and he asked that staff get a chemistry and Algebra teacher in the Medical Careers Program as soon as possible. Mr. Hooks also asked staff to address restoring the medical careers coordinator, provide a temporary building at Fair Park to replace Room 303, add another assistant principal at Fair Park due to increased enrollment, and remove the Nomination Form for Student of the Year.

Mrs. Crawford asked staff to provide a status of the Byrd parking lot as well as the Scout Hut at A. C. Steere. She also asked that Byrd football team be recognized for being undefeated.

Mr. Rachal asked that Attendance Lines be added to the December agenda and he welcomed Mr. Pierson to the board.

Ms. Priest announced that information is provided to each board member (not Mr. Pierson) for the superintendent’s evaluation and requested that board members turn them in by December 1st.

Mrs. Bell welcomed Mr. Pierson to the board.

Dr. Robinson announced and invited board members to attend a “meet and greet” with student teachers on Wednesday November 16th at 3:30 p.m. in the Wanda L. Gunn Professional Development Center.

Dr. Robinson also reminded the board that the Annual Teacher of the Year banquet will be held on Thursday, November 17th at 6:30 p.m. at East Ridge Country Club.

Adjournment. Mr. Pierson moved, seconded by Miss Green, to adjourn. Vote on the motion to adjourn carried unanimously and the meeting adjourned at approximately 6:36 p.m.
December 6, 2011

The Executive Committee of the Caddo Parish School Board (CPSB) met in regular session in its office at 1961 Midway Street, Shreveport, Louisiana, at approximately 4:30 p.m. on Tuesday, December 6, 2011 with President Lillian Priest presiding and Steve Riall and Dottie Bell present being a quorum. Other school board members present were Jasmine Green, Carl Pierson, Charlotte Crawley, Curtis Hooks, Mary Trammel, Bonita Crawford, Barry Rachal, and Larry Ramsey. Also present were Legal Counsel Reginald Abrams, staff and other visitors. Mr. Pierson led the invocation and Pledge of Allegiance. Ms. Priest announced that Dr. Dawkins was out ill and sends his regards.

PRESENTATIONS

Special Presentation. Board member Dottie Bell and Levada Palms announced that this year’s “Party with a Purpose” collected 187 educational toys for Caddo’s homeless children. Pitree Walker, homeless coordinator, shared with the board that approximately 651 students in Caddo Parish are homeless. A check in the amount of $1,140 was presented to Janis Parker, Title I director, and Ms. Walker to help meet the needs of these children.

Magnet Testing. Julie Scruggs, supervisor of magnet school testing, shared with the board a report on the 2011 magnet testing and placements. Her report included statistics on the testing and placement of students at magnet schools at all grade levels. Included in the written report were placement simulations for Kindergarten students using various scenarios, cut-off scores in each grade for the last two years at each elementary school, which is the lowest score of an applicant admitted in each placement category determined by board policy, the number of openings at each elementary and middle magnet school by grade over the past four years, how openings are determined, a review of six years of data, the number of children tested and placed in Kindergarten the first week of school, as well as the students enrolled in Caddo Parish neighborhood schools and private schools. Details on the students tested and placed in 6th grade were included and compared to the previous five years’ information. Under Tab 6, Mrs. Scruggs announced that board members will see the last year report for comparison to this year’s report, and noted the information relative to magnet schools that can be found on the district’s web page, including policies, parent information, applications, and information on options other than magnet schools.

She reported that testing went smoothly with very little complaint on the process or environment of testing, and 630 children were tested this year for Kindergarten with 467 of the 630 choosing South Highlands or Eden Gardens as their first or second choice with only 115 Kindergarten seats available this year at South Highlands and Eden Gardens after the placement of siblings. As indicated by the more than four times the number of children applying for seats at these schools than there are available seats, admission into these schools is highly competitive.

Mrs. Crawley stated that to her an important number is where the 630 students who took the test and did not make the minimum cut off score are now attending school, i.e. neighborhood, private, etc. Mrs. Scruggs said the 630 students that applied does not include how they scored. Mrs. Crawley said she understands; however, anyone can test, so she believes knowing how many qualified that we did not have a seat for would be important. Mrs. Scruggs referred to a summary sheet in section 5 and the tracking of those students who were not placed. Mrs. Crawley also referenced the large number that applied for middle magnet that did not get in. Mrs. Scruggs responded that 460 (of the 820) students tested were placed in 6th grade. Mrs. Crawley asked Mrs. Scruggs if staff has the number of how many met the qualifications (out of the 820), but did not receive a seat, and that she believes it would be a charge to staff to find a
solution to this. When asked if the middle school students were tracked, Mrs. Scruggs responded that she tracked Kindergarten students this year and can possibly track middle school next year.

Mrs. Crawford said in looking at the data presented, it is an indication of what needs to be done, because it states something when 1/3 of the Kindergarten students tested go to a private school. She believes a collective effort to market all Caddo schools can make this number smaller. Mrs. Scruggs also verified when receiving calls relative to the magnet schools, she always emphasizes the outstanding neighborhood schools in Caddo Parish.

Mr. Hooks asked Mrs. Scruggs who administers the Kindergarten test and how are these persons selected? Mrs. Scruggs explained that persons are recommended and/or persons apply and these are screened very carefully making sure that those selected to administer the test are highly qualified. Mr. Hooks asked if those interested in providing this service submit their names or if Mrs. Scruggs picks them? Mrs. Scruggs explained that names are recommended to her and she follows up on recommendations. Mr. Hooks said when he retired, he considered himself to be a well educated person and he wasn’t chosen; and he asked Mrs. Scruggs how many test administrators are in place. Mrs. Scruggs responded that she doesn’t have the exact number but that is information she can get.

Mr. Riall asked why Oil City is not listed in the neighborhood schools with magnet components? Mrs. Scruggs stated that she will follow up and make that correction.

Mrs. Bell expressed her appreciation for the information presented, but said she believes the main problem is the perception that certain areas do not have good schools. She said the mind set needs to change and once this happens, she believes we will see positive change and all schools being successful.

Mr. Rachal noted the 34% that went to private schools at the Kindergarten level and asked how many Kindergarten students this represents? Mrs. Scruggs responded that 58 students enrolled in private schools, 60 went to neighborhood schools and 88 did not qualify. For the middle school that number was approximately 208. Mr. Rachal asked if he is correct and that approximately 50% of the students were retained and if there is a percentage or number on the other grades? Mrs. Scruggs explained that Kindergarten is the only class tracked, and she tracks Kindergarten because it is the largest group and referenced the few openings in other grades and that some schools have no openings in the other grades because of siblings. Mr. Rachal requested that staff add this number to the information provided to the board. For clarification on this request, Ms. Lafargue stated that in the grades above Kindergarten, there may be only one seat available in first grade at South Highlands and no seats available in first grade at Eden Gardens, and possibly 120 applicants testing for first grade (from private, from other magnets, or other neighborhood schools). She added it can be done; however, for a staff of one person, it is a lot of work in the middle of coordinating and preparing for the next round of magnet testing. She added she is unsure if the information requested will give an accurate account of where we are losing students to or retaining since the number of openings in all magnet schools at any level above Kindergarten is so small. Mr. Rachal referenced the 120 applicants and he believes the 34% could be higher. Ms. Lafargue reminded him that those children applying for first grade spots are enrolled in school somewhere, either in Caddo or a private school. Mr. Rachal asked if the application allows for us to know where an applicant is currently enrolled and Ms. Lafargue responded it does. Mr. Rachal said if we have that information, he believes it would be good to know it. Ms. Lafargue said she believes if o.k., this is something that can be tracked and included in the next report to the board. Mr. Rachal asked staff what they believe the District needs to do to retain students we are losing to private schools or home-schooling? Mrs. Scruggs said she believes the schools need to showcase what they offer at their schools and make it more attractive to parents. Mr. Rachal stated the successfulness of the magnet program, and the board has said it does not matter how successful it is, it will not be duplicated; however, he believes it
is something we should do. Mrs. Scruggs responded that there are magnet components in schools. Mr. Rachal asked about the elementary level and Mrs. Scruggs verified there are not magnet components at the elementary level. Mr. Rachal asked if this can be done? Mrs. Woodard stated her agreement with Mrs. Scruggs about showcasing the neighborhood schools. Mr. Abrams explained that this report came about as a result of policy changes and litigation regarding Middle Magnet, with the staff and explained that the District is offering, duplicating programs at other schools, the MST program at Ridgewood and Southwood, the engineering program at Youree Drive and Captain Shreve. Because middle and high schools working together in a joint program has been successful, it is anticipated that these opportunities will be expanded to other middle and high neighborhood schools. Mr. Rachal noted the successfulness of these programs and he doesn’t believe that we are not going to do all we can to duplicate these successful programs.

Ms. Trammel asked Mrs. Scruggs to explain at what grade the magnet schools begin and Mrs. Scruggs stated that at the Kindergarten level. Ms. Trammel also asked staff to explain how we grow the numbers when after placing siblings there are limited seats. Rosemary Woodard further explained how it is possible that there may not be any openings if all the students stay. Ms. Trammel asked staff if there is ever a need to increase the number of classes offered? Mrs. Woodard explained that doing so increases the cost and the need for space.

Mrs. Crawley referenced Tab 6, page 5, test scores for last year. Mrs. Scruggs explained that this is last year’s report and this year’s report is Tab 1.

Mr. Hooks referenced Mr. Rachal’s question regarding magnet component and clarified that he had a magnet component where he once was principal, and the reason why schools can’t have the same programs is because of changes made by staff, i.e. sending a student to school with a monitor on. He added he knows this because of his experience as a principal when staff took away their authority and sent students elsewhere. He asked staff how is race balanced between elementary, middle and high school? Mr. Abrams explained that race is not used to balance the numbers, and the sole purpose of the report is to show the board how diversity is reached. Mr. Hooks said he can see that when he visits other schools, i.e. Judson, because it is obvious that race does not make a difference.

Mrs. Bell noted that Walnut Hill has 1,800 students with 100 students being turned away, and they do not have uniforms and are not a magnet school. She stated she believes there are ways we can make the neighborhood schools successful and noted that the ECE program located in the projects of Allendale having one of the best programs in Caddo Schools.

Mr. Pierson noted how the magnet programs began and as long as there are entrance requirements that are higher than the standard score of most of the children in Caddo Parish, to do anything different would develop an elite school system. His concern is to provide a comprehensive, complete education possible for all students, and magnet programs cannot be developed quickly enough.

Mr. Ramsey stated that while the Gateway Program is not necessarily a part of the magnet report, he would like to address what Gateway is and what it does in the neighborhood schools as well as the possibilities for expanding these opportunities. Mr. Ramsey said he would like to get an update in the near future. Mrs. Woodard said the information is available through the Gateway Department and staff will pull this information together for the board members.

Ms. Priest expressed appreciation to the members of staff that took the time to provide this report to the board and encouraged the board to contact the staff to get questions answered.
Vision 2020 Capital Construction Funding Opportunities. Jim Lee, chief financial officer, shared with the board information on potential funding staff has learned about in the last few weeks. He announced that staff is not looking for a decision tonight or next week; and if a recommendation is made, it will come to the board for action in January.

With the completion of the recent facilities study, Mr. Lee stated that we now know what the district needs relative to capital projects; and he reminded the board that at the time staff presented the capital projects needs in different areas, the largest portion is the renovations and upgrades of all the remaining facilities. Mr. Lee also stated it will be necessary to make a decision relative to vacant properties and to do everything addressed in the study, it will take between $500 and $600 million dollars. He also stated that this is not about improving the building, but it is about improving the learning environment for Caddo’s students and these improvements will further enhance and improve the students’ test scores by also providing a better working environment for employees. He explained how more modern facilities will positively impact enrollment, which will ultimately impact Caddo’s MFP. Mr. Lee shared with the board that he learned last week that the District can issue General Obligation Bonds in the amount of $133 million that will not increase the millage rates to the taxpayers or debt service. This ($133 million) represents approximately 25% of the total amount presented in the facilities study to cover all the much needed updates. While it is not enough to cover everything that needs to be done, Mr. Lee said it is a way we can show the public that the district is doing what it can without increasing taxes, and doing what we can afford. He explained this is something the board must approve before moving forward to obtain voter approval and that the District’s current debt service tax millage is 7.6 mills. Some of the questions he has been asked include how can we do this without increasing millage, and a few of the ways include continued growth in the value of properties in Caddo Parish, and the history over the past 15 years of continued growth. Mr. Lee said as the District pays down its debt, it allows the District more capacity for additional debt, and also, the interest rates are very low. He also pointed out that this funding arrangement is the issue of debt for capital projects only, and cannot be paid for salary increases, utilities, etc.; but only for capital needs.

Mr. Lee reported on conversations with the superintendent relative to where we stand with our budget which reflected in June that we would spend an additional $15 million; and at this time, everything we might possibly spend is included in the budget. He reminded the board of the vacant positions in the district; however, when budgeting, the District budgets as though there are no vacant positions. Also, Mr. Lee said the District has budgeted very conservatively and noted additional resources for providing cost saving measures this school year. He added that last year, the board approved a budget with deficit spending of $29 million and at this time, the District is approximately $22 million better than what was budgeted. He also reported that the District will reflect a large positive variance again this year as we do every year; and even though he cannot at this time guarantee balanced spending by the end of the year, the deficit spending will be approximately $5 million and not $15 million. Mr. Lee also shared with the board that staff understands nothing has been done for the employees in several years beyond the annual supplement; and while he cannot say at this time that the District will be able to do something for the employees, he can say that staff is looking at all possibilities for doing something for the District’s employees.

In debating whether or not it is prudent for the District to support a bond issue at this time given the current financial house is not in order, Mr. Lee reminded the board that this bond issue has nothing to do with the General Fund and any repayment of the debt will not impact the General Fund. He explained that if this is something the board wishes to do, the board will need to accept the proposed plan as a viable one and indicate interest in moving forward. If the board does support this, the staff will bring back an agenda item in January with a recommendation and needed information for the Board to call an election. He further explained that the reason for January is the best election time will be in April because the fall election is a Presidential
election. He also reported that if this is something the board is interested in, it will be important to move forward and get the employees, parents, community partners, etc. on board to support and to help share the information with the voting community. If the board chooses not to do this in 2012, Mr. Lee reminded the board that the debt service millage will need to be reduced if there is no plan to issue any new debt and what he will recommend to the board. If this happens, the repercussion will be losing the $133 million because even if the board opts to do this in another year, he cannot assure the board it can get this same amount. Mr. Lee also explained that if the board is interested in doing a similar plan (25% of what the facilities study called for), the board will then have to increase taxes to fund it, which he doesn’t believe would be successful.

Mr. Lee also addressed how this ties into the Vision 2020 Plan with schools being taken off line in Phase II and merged into a new school, and Phase III also taking additional schools off-line and the possibility of a bond issue to meet the construction needs. He said beginning Phase II is almost here, Phase III is only a year away and this funding for meeting those needs falls in line with what needs to be done. Mr. Lee said that one of the questions in meetings has been “how are you going to pay for this?” His response is he believes the study presented that and the next step is to come up with a way to fund it, and staff is looking at what can be done without raising costs to the public. Mr. Lee reminded the board this is something the CPSB has done in the past, i.e. $88 million in 2004 for air conditioning all the schools. Less than 10 years have passed since such an opportunity for securing financial status without any additional cost to the board members or the public has been brought to the board. When this is complete in approximately 10 years, all the debt has been issued and the district has begun repaying it, the board would then have the ability to do this again, continuing the funding for all the projects listed in the facilities.

In summary, Mr. Lee stated that the District has approximately $550 million in capital needs and to begin funding them, an opportunity to fund approximately 25% of this amount has been covered without increasing the current millage rate paid by the taxpayers.

Mr. Ramsey asked Mr. Lee what kind of impact will there be on the taxpayers if the board chooses to do nothing? Mr. Lee stated that before answering, he would like to talk about this with his bond counsel since he does not know exactly what it will need to be reduced to. Mr. Schluetter noted that the reassessment will be next year and it definitely indicates there would be a reduction, which must be determined prior to June 1st. Mr. Ramsey inquired of bond counsel how close we might be to projecting the $133 million? Mr. Schluetter responded that they feel very confident with this estimate and stated the basic approval on the rate one might have on these bonds. Mr. Ramsey asked if he is hearing a reduction of 2 mills and Mr. Schluetter responded that at this time it is very early in getting any estimates on the $22 Million. Mr. Schluetter also reminded the board that approximately $20 million is being targeted for each school year, which is a manageable amount. Mr. Ramsey asked since it is still early in the fiscal year, and we anticipate the deficit spending to be reduced to $5 million or less and continue the goal of balanced spending by the end of the fiscal year, if we are projecting a $5 million deficit for the current fiscal year, while at the same time requiring staff to bring to the board a balanced budget in February. Mr. Lee said up to this month, he has continued in conversation with the superintendent about ways we can make operations more efficient and reduce the $5 million deficit down to a net spending amount. Mr. Ramsey stated if staff recommends to the board to take this to the electorate, his concern is there are no details on how funds will be spent. Mr. Lee referred to Steve White for a response and Mr. White explained that staff is working with the superintendent on a system of priorities; however at this time, with the superintendent out of the office, it has stopped. If the board wishes to move forward, staff will look at a phased operation of approximately $20 million per year. Mr. Ramsey asked if any of this information has been discussed with any of the civic groups in getting their support of a proposed bond issue.

Mrs. Crawford asked for clarification on the millage rates. Mr. Lee responded we are not talking about millage rates, but only the debt service millage that repays the bonds. Mrs. Crawford
referenced some of the projects in Vision 2020 that were rather large but they did not provide any details and asked if details will be available in January? Mr. White responded that it is planned for January.

Mrs. Crawford asked if this will be an all or nothing ballot or will there be individual projects for the voters to approve? Mr. Lee said he believes it would be listed as one proposition on the ballot. Mr. Schlueter mentioned that it was in the 90s and he believes this election is envisioned to be a one proposition ballot. He also explained if the board so chooses, it can do the same and can adopt a companion resolution at the same time specifying the various projects.

Mrs. Crawford asked if the board moves forward with this project will it affect the millage coming up for renewal, because while it may not create new taxes, it does prolong the taxes. Mr. Lee explained that if you try to do both at the same time, he believes it will be more difficult. Mr. Schlueter explained it is not unusual to separate the capital improvement proposal from the renewals, particularly when the renewals are not up for renewal until 2013. Mrs. Crawford referenced the city facing this same thing, talk of a program that would attempt to defeat it and if staff has a means to counter this? Mr. Lee said it is something we would need a plan for and is what he meant when saying there is much work to be done if the board supports moving forward.

President Priest asked staff about the reference in the presentation to the operating General Fund when this has to do with capital projects. She stated she believes this muddies the water some and maybe the conversation should only be about the capital projects. She asked Mr. Lee what is Caddo’s current bond rating? Mr. Lee responded it was just reinstated this past week at AA-. Ms. Priest asked staff about the projected number of years, how quickly the board can have a list of the proposed projects and priorities, and if any dialogue or meetings have occurred with any of the citizen groups, electorate, etc. to put together a citizens review committee as this will be very important in moving forward. She also asked staff what is more important – moving forward with the capital projects fund or getting the renewals passed? Mr. Lee said both of these are very important. Ms. Priest stated her understanding of bricks and mortar for capital projects, however, what goes on within the bricks and mortar is what is important. Mr. Lee explained that the various millages that bring in the operating revenue are critical and represent 22% of the revenue. Ms. Priest noted the importance of taking all this into consideration and the board needing to understand the pros and cons of moving forward with a bond issue.

Mr. Riall asked Mr. Lee about the $88 million in bonds issued in 2004 and if this has been paid off? Mr. Lee said no because they are $20 million bonds issued over five years and some remains. Mr. Riall asked if the board approves moving forward with the $133 million bond proposal will we do another one in approximately 10 years? Mr. Lee responded that the board could do another one. Mr. Riall asked if it would be possible to do another bond issue sooner than 10 years and Mr. Lee said probably not. Mr. Riall asked staff how much of the Vision 2020 Plan will the $133 million finance? Mr. Lee responded that it will cover about 25%; and if this is done the way Mr. Schlueter explained, and the same way the district did the $88 million, i.e. issuing $20 million in bonds a year for six years, you would not want to go for another bond issue when all of a current one has not been spent. Mr. Riall asked if he is correct that if issuing these $133 million in bonds, 25% every 10 years, does it not give us a 40 year timeframe for funding Vision 2020? Mr. Lee said that is correct, and it is the only way of funding it without raising taxes to repay these bonds. Mr. Schlueter noted the difficulty in predicting beyond the $133 million and the need to look at the assessments each year from the assessor’s office to recalculate the numbers and possibly authorize an increase in the millage rates without a bond issue or an increase to the taxpayers.

Mr. Pierson stated his support for the bond issue as he believes this is how to do business. He said if we wait and must roll back millages, sooner or later if we do any capital projects, i.e. build a school, renovations, we will have to go to the people about increasing taxes and that is
not something he wants to do. He encouraged the board to strongly consider this and begin doing what we need to provide all Caddo children with a quality education.

Mr. Rachal asked if the board approves moving forward does he understand it will be approximately $133 million, and asked what the actual cost is and what will we be giving up? Mr. Schluerter explained that they will do an up-to-date analysis on what millage rate will likely drop next year and determine what the new figure might be. Mr. Rachal asked what is the cost to pay an additional $20 million in debt each year? Mr. Schluerter explained there are schedules they can share with the board assuming there would be $20 million in bonds per year; and, it may be more or less depending on the District’s ability to issue the bonds without the millage increase coupled with how the schedule progresses relative to construction contract awards. Mr. Rachal also asked about the cost in the first year if $20 million in bonds are issued, and Mr. Schluerter responded that the board will possibly need two schedules – one on the “what-if you don’t do anything” and what is the millage reduction next year and projected out in future years because it becomes less reliable since it depends on the assessment every year. He further explained the second figure he can provide the board will be assuming $20 million per year, and a $20 million issue per year at 4% will be $1,450,000 per year, principal and interest, in debt service, adding that 4% is slightly higher than the current market rate. Mr. Rachal also noted that the major budget matters Caddo is addressing and property owners are already taxed higher than anyone else in the state. He again stated his concerns in moving forward without addressing teacher pay, and it may be necessary to pay attention to possible future General Obligation bonds that can be used toward salaries since salaries cannot be covered with any of this. He asked if it is possible to go for General Obligation bonds that can include teacher salaries? He said he was not for the bond in 2004 and everyone knows where he stands with this proposed bond issue.

Mr. Hooks said he heard what Board member Pierson said; however, he also remembers what the people said to the board in March when they voiced their opposition to Vision 2020 and he doesn’t believe they have changed how they feel relative to it. He said it was brought to his attention that Mr. Ramsey initiated a motion directing the superintendent to bring to the board by February 2012 a proposed budget plan for the 2012-2013 school year and to date, the board has not received this information. He said he voted against Vision 2020 and he will vote against this.

**ESTABLISH THE AGENDA AND PROPOSED CONSENT AGENDA FOR DECEMBER 13, 2011**

Dr. Mary Nash Robinson highlighted the proposed items for the board’s consideration on December 13, 2011 and the following discussion ensued. Mr. Ramsey asked that Revisions to the RIF Policies be postponed until January to allow further discussion with employee groups.

**Recognitions.** Mrs. Crawley asked that the C. E. Byrd football team be recognized at the meeting on December 13th.

**Renewal of Administrative Contracts.** Mrs. Crawley inquired about the timeframe for Mr. Woolfolk’s contract? Dr. Robinson, as previously stated, announced that one administrative contract renewal was left off and will be added for next week.

**Bids (Purchasing).** Dr. Robinson announced that the bid for truck tires is pulled. Mr. Hooks asked about the bid for vehicle brake lines and Mr. Graham explained this is for school buses.

**School Attendance Boundaries.** Mr. Woolfolk explained the recommendation from the Superintendent for adjusting the school attendance boundaries. He reported that the superintendent asked he and Steve White to look at the attendance boundaries in line with the new configuration of schools for Vision 2020. Mr. Woolfolk added that even though staff is recommending changes in the attendance boundaries, staff is also recommending
“grandfathering” those in those boundaries that may change until a new person moves into that school district, i.e. students already in the boundaries will not be affected until they graduate. Steve White first apologized for an error in the original Southwood attendance boundaries map and announced that a revised map is at board members’ stations and on BoardDocs. Mr. White explained that the original school district boundaries are in black and the proposed revised boundaries are in red. He also explained it is necessary to look at revising the attendance lines in order to support the school configurations, especially the 7-12 configurations, to insure that the children that move into those schools stay in that school for grades 7 through 12. He said it is also necessary to enhance the feeder patterns of the schools and develop a pattern whereby students in one school automatically move into a particular high school, i.e. J. S. Clark feeding to Booker T. Washington High School with only one transition. He said these proposed changes will also better define the attendance zones. Following explanation of the information provided, Mr. White responded to the following questions from Board members.

Mr. Hooks said he was told about this during the summer and he has reviewed and had time to digest it. He stated that for years Fair Park has served Mooretown and Queensborough, and this proposed revision takes all of Queensborough away from him except for two streets and he does not believe this to be fair to Fair Park or to him as the board member. Mr. White added that the staff is attempting to develop feeder patterns and in making these revisions, Fair Park will gain a portion of Bethune, M. J. Moore and J. S. Clark. At this time, J. S. Clark is the only feeder school into Fair Park, and these proposed revisions will reduce the number of transfers for students, especially in the middle school age, which appears to be less traumatic for students, as well as improve test scores. Mr. Hooks stated his understanding of what the staff is attempting to do; however, he has students on some of these streets already attending Booker T. Washington and now staff is proposing to take all but two streets in that area from him, and he can’t support this. Mr. White further explained to Mr. Hooks how staff looked at the attendance boundaries and came up with the proposal presented to the board.

Mrs. Bell stated she agrees that the board needs to study this and noted how her district was affected when Hillsdale was closed. She also said she believes one of the most important things is to get these attendance lines finalized and return students to the public schools, and she is glad that we are attempting to more clearly identify these attendance areas.

Mrs. Crawley asked if this information is on the web site for public view, and Mr. White responded it is. Mrs. Crawley said she does not believe one week is enough time before voting on this, and when voting on this item, it should be voted on as one entire package and not each one individually. Mr. White only noted that it would help him to be able to move forward and work on the middle school attendance zones if he knew that the board at least generally approved the zones for the 7-12 configurations, understanding that the board could come back and make adjustments if needed. Mrs. Crawley asked if one of the goals in looking and adjusting attendance lines is to repopulate the under-populated schools? Mr. White responded not necessarily to repopulate, but to make the attendance boundaries match and create a definite feeder pattern and as few transfers as possible for students between Kindergarten and 12th grade.

President Priest announced that, with the adjustment of the December board meeting since school will be out, and this is a major decision that all must be comfortable with, she is recommending this item be postponed until January. She encouraged board members to review and call staff with any questions and concerns and maybe hold meetings in some of the communities being affected. Mr. Woolfolk stated staff’s total respect of this decision and if any board member would like to discuss rationales used in coming up with the proposed changes, he and staff are available at board members’ discretion.

Mrs. Crawford stated she knew we would be doing this; however, she thought we would get the middle and high schools at the same time. She asked Mr. White how close is he to finalizing the
middle school lines so the board could look at it in one package? Mr. White responded he is working to have something for the board in January.

Miss Green asked staff about the proposal that she will gain approximately 413 students. Mr. White said that is correct for the 7-12 configuration and is the number of students residing within the attendance zone. He also explained that while she may lose two students at the high school (Green Oaks) level, she will gain 413 students of the 7th and 8th graders to the 7-12 configuration.

President Priest reminded the board that the Caddo Public School Attendance Zone maps were revised in March 2011 and copies provided to board members. She encouraged board members to review this information over the Christmas holidays and noted the importance of doing a better job of verifying where students live in order to strengthen the board’s policy.

Mr. Hooks stated his agreement that no action be taken on this and reported that some of his constituents were sent letters this summer notifying them they will attend Booker T. Washington, and this was without board approval. He stated he met with the superintendent and he told these persons to overlook this but they still received a letter to go to BTW. Ms. Priest said the board is now looking at drawing the attendance zone boundaries and what happened there was when some schools were taken off line, the students in the northern portion received letters they would attend Fair Park, those in the southern portion would attend Woodlawn, etc. Mr. Hooks said these he is referencing all lived in Queensborough. Ms. Priest encouraged Mr. Hooks to get with Dr. Robinson and Ms. Edwards to discuss his concerns. Mr. Woolfolk explained that some of the confusion is J. S. Clark fed three schools – Fair Park, BTW and Byrd; and the reconfigurations resulting from implementation of Vision 2020 required staff to look at the students at M. J. Moore, Bethune and J. S. Clark and determine which students would attend Fair Park, Woodlawn and BTW. To rectify this, a decision was made to grandfather in the students.

Mr. Rachal said he understands this will be postponed and he believes, and asked Dr. Robinson, it is just a necessary evil to adjust attendance lines from time to time. Dr. Robinson responded that is correct; and having heard the board’s concerns, staff respects the board’s decision to postpone action on this item. She also announced staff is available to address any questions or concerns the board may have. Mr. Rachal reminded the board that we are here for all the children and noted a recent extension of a neighborhood that overlapped another attendance line sending students to a different school and the importance of looking at all attendance lines.

Mrs. Crawley referenced the maps for Fair Park and BTW and asked if, because these are very different schools with different focuses, it is possible to have an open enrollment in these schools’ areas and avoid sending neighborhood students to a school they do not want to attend?

**CPSB Properties and Recommendations.** Mrs. Bell asked Mr. White about the location of a particular CPSB property(ies)? Mr. White explained that they are on the north and south side of Greenwood Road and he will provide the more detailed information to her on Wednesday.

Mr. Riall asked Mr. White if this report is directing specific action to be taken by the board? Mr. White responded it is an item through the Superintendent and he believes the Superintendent is looking for action from the board.

Miss Green asked if staff’s recommendation is to sell Building 6 on Knight Street? Mr. White stated that the thought is those in Building 6 can be relocated to an available school building; and it is also staff’s belief that it will be easier to turn commercial property than a school and possibly turning one of our schools over to someone that may be in competition with the public school district. Miss Green asked if someone purchased George P. Hendrix? Mr. White explained there have been two attempts to buy George P. Hendrix; however, the financing fell through at the last minute.
Approval of Concession Services for Lee Hedges Stadium. Mrs. Crawley asked if we have a contract or are we taking bids? Mr. Graham responded two bids have been submitted. Mrs. Crawley asked about the possibility of allowing organizations, i.e. Booster Club, PTAs, bid for these? Understanding the possibility of misappropriation of funds, she wonders if we have ever allowed these the opportunity off the concession services? Mr. Abrams explained that in the last contract there was an auditing issue and is why a new contract was implemented. Mrs. Crawley asked if we have ever allowed these organizations to handle the concessions, and keep all the profits for our schools? Mr. Abrams said we have not and the main reason is the board has asked that it be put out for bid and is a decision the board made in the last several months. Mrs. Crawley stated her understanding, but she doesn’t understand why, once the current contract is up, we don’t look at our schools to compete for this. Mr. Graham said it is only a six months interim contract since a previous vendor cancelled. This one will take it to the end of the fiscal year.

Mrs. Crawford reminded the board that Lee Hedges does not belong to any one school and is the field for several schools. She asked if she understands the gate is split between the home school and the visitors, with the exception of the concessions and this is bit out. Mr. Graham said that is correct. Mrs. Crawford said she believes it will be confusing if numerous PTAs and Booster Clubs man the concessions depending on who is playing. Mr. Graham said it could be confusing and there needs to be some certainty that the organizations each week are prepared.

Mr. Rachal asked if we have received bids and Mr. Graham said staff is evaluating them and once they talk with the potential bidder, it will be posted on BoardDocs.

Carl Pierson noted that in the past there were problems when several different groups were doing concessions and placing orders. He said there were also problems in that groups did not want to do events beyond football.

Select Date and Place to Meet with Local Legislative Delegation and BESE Representative in January/February.

President Priest announced that information is on BoardDocs and at board members’ stations recommending a luncheon on February 7 or 21 to meet and discuss education related issues. She explained that three board members will be selected to work with staff to research and review potential legislative education bills. She reminded everyone that the Legislative Session, which begins March 12, will be loaded with education reform. It was also recommended that the board invite and meet with the Governor’s Policy on Education advisor prior to the session.

Proposed Revision to CPSB Policy CCA – Organization chart.

Charlotte Crawley noted that when she began serving on the board there was a solid line from the auditor to the board and dotted line to the superintendent. In 2003 this was changed and she would like to see it back the way it originally was and reflect what we are doing. Dr. Robinson explained that at this time, the positions of Director of Child Welfare and Attendance and Director of Special Services were combined in the budget process to a Director of Student Services. At the last meeting, the board expressed concern that one person would not be able to manage the responsibilities of both these areas and asked that the two positions be put back in place, thus the proposed changes to reinstate both positions. Mrs. Crawley said she is only saying when considering this change, she would like to consider the change relative to the auditor. Ms. Priest stated that her concern is if we create the two positions, there will now be cost and benefits for two positions versus one and the need to add the second position back in a budget that the board has discussed budget savings about. Mr. Rachal requested that the current org chart be added to the backup on BoardDocs.

Mr. Ramsey stated that the intent of his motion was to separate the job because of academics and IEPs on one side and the other side addresses civil type laws, and he believes all under one
director is not reasonable. Relative to the cost involved, Mr. Ramsey reminded the board that other positions have been eliminated and as the audit is moved forward, there will be some additional changes forthcoming. He believes before attendance lines are moved, it will be important to have these issues in line and give this director the support needed and not the responsibilities of two areas that are complicated and very different.

**Expanding the Use of Third Party Administrator for Workers Compensation.** Mrs. Crawley asked if this will be a savings, will we be eliminating any positions? Tommy Armstrong explained that savings will come by getting people back to work sooner, and in fewer accidents. Mr. Armstrong noted that last year’s savings totaled $575,172.93 and the year before it was $487,818.79. The Risk Management Department is being reorganized and plans are to move forward and provide more of the services necessary for safety and loss prevention. He also explained that a newly formed committee for work place health and safety will be designed to provide more safety to the Caddo Parish School System, which will save money when there are fewer accidents.

**Funding of Truancy Programs.** Mr. Abrams explained, in the superintendent’s absence, that over the last several months the Caddo Parish School Board staff and various board members and community leaders have met to address the best way to provide truancy services to Caddo Parish students. While there is a need to be addressed at this time, there is also a need for this program to be a long-term program funded long-term by sources other than the Caddo Parish School District. He reported that Cecille Guin at LSUS is currently looking at the possibility of restoring funding in this area. At this time, modifications have been made to the JPAMS system so early notification of students out of school is available and we can also work with the District Attorney to get a notification letter to the student’s house that is truant requesting them to show up at a meeting. He further explained that at this time VYJ appears to be the fit for the Department of Juvenile Services even though there are others who can do the same type services and may want to bid on these programs. During the interim, it is believed $90,000 is needed to provide the services between January and the end of the current school year. He reported the Caddo Parish Commission has agreed to put up one-third ($30,000) if the school board puts up one-third and the City has agreed to do the same thing. Mr. Abrams explained that the superintendent recommends the board approve the $30,000 match with the other agencies and move forward.

Mrs. Crawley reported that four board members attended a finance workshop in Pineville and noted that one of the things they were told is school boards do not need to spend money on truancy as it is a legal issue. She said the DA is the most effective person and it is their job; and the Caddo Parish School System needs to focus on lowering the student-teacher ratio so teachers are more familiar with the children they have. She said she believed it was helpful when the Alliance for Education printed the absenteeism in the newspaper and she believes it will be even more effective if the DA prints the parents’ names in the paper.

Ms. Priest said she is one of the board members that attended these meetings and Mr. Pierson, in his capacity on the Parish Commission, was also present in those meetings. She added it was felt that the DA, law enforcement and judges all must work with us and the DA worked out a system so it will be more effective. She explained that Caddo did not get available funding through LSU for such a program because of the lack of partnerships. With all the various agencies involved, it is felt that Caddo now stands a better chance of receiving long-term funding for this program.

Mr. Abrams explained that our staff will continue to do a lot of what is necessary in addressing truancy; because the courts are presently overwhelmed and cannot handle every student that has been out for over five days unexcused. He explained that Child Welfare and Attendance and VYJ actually made home visits to determine what the problem might be and intervened and hopefully resolved issues and returned students to school. Clay Walker, director of juvenile
services for Caddo Parish, explained that the Caddo Parish Attendance and Child Welfare does a
great job bringing the information to the Juvenile Court System and the Juvenile Judges; and
with the different tools that the school system and the juvenile courts have available, hopefully
they can work together to address the needs of these students. Mr. Cox said he actually
represents the Courts’ side and pointed out some of the issues they must address in what is
known as a gateway crime. He said truancy is not only the responsibility of the juvenile court,
District Attorney, Sheriff and the Police Department, but it’s everyone’s responsibility since
when they are not in school, many are on the street breaking into homes, stealing etc. He noted
there have been over 600 referrals from the Attendance Department that the juvenile justice
system has not been able to move on because the manpower is not there and we are getting
further behind in addressing truancy, which is up 60% from last year. Knowing this is just a
band aid, he encouraged the School Board to join with the Parish Commission and the City of
Shreveport in an effort to address this issue and get students back in school.

Mr. Rachal stated that if it saves one child, it will be worth every penny of what we spend
because every child is important. Mrs. Bell stated this is a partnership and these are Caddo’s
students and all three groups need to work together to save Caddo’s children. Mr. Ramsey noted
money that the Caddo Parish School Board has spent in the past with Juvenile Justice; however,
as Caddo dealt with the budget crunch, it was necessary to relook at its expenses. He shared his
appreciation for the Parish Commission’s involvement and for the superintendent’s
recommendation of a dollar amount for Caddo’s participation, in doing what we can to keep
these students off the streets. Ms. Trammel reminded the board that it was the former board
member from District 6 that worked hard and her hope was that we keep the truancy program
active in Caddo which she supports. Mr. Walker stated that he hopes that the partnership being
discussed is the first step in addressing this issue and student behavior problems.

ESTABLISH THE AGENDA AND PROPOSED CONSENT AGENDA

President Priest identified the following items for the consent agenda: 6.03-6.05, 8.03-8.06,
8.09-8.11. Mr. Riall moved, seconded by Mrs. Bell, that the proposed agenda and consent
agenda be approved for the December 13th CPSB meeting as presented. Vote on the motion
carried unanimously.

POLL AUDIENCE

Jackie Lansdale, Red River United, addressed items of interest and concern to the Federation as
follows: Revisions to CPSB Policy CCA (Organization Chart) and the chasm between the
schools sites and staffing formulas with Central Office not having staffing formulas. She asked
that areas that are over staffed and under staffed be addressed when considering this item. She
also stated that in 1997 when a board member asked what would be done to offset all the anxiety
about a bond, the answer was 6,000 employees; and when the board added a piece in the bond
issue for salaries, the employees were passionate about seeing it passed. She also said in 2004,
employees were left out and noted what Bossier and DeSoto Parishes have done for their
employees and the fact that Caddo is trying to compete with them. She added public education
costs and you must not operate in a spirit of fear but only do what is best and right for the Caddo
school system.

Mr. Abrams announced that the Louisiana Supreme Court reversed the Cristy case in Caddo
Parish’s favor (case involving the liquor in the backpack that the courts awarded $50,000) and
found that the board did give due process.

Adjourn. Mr. Riall moved, seconded by Mrs. Bell, to adjourn. Vote on the motion carried and
the meeting adjourned at approximately 8:15 p.m.
December 13, 2011

The Caddo Parish School Board (CPSB) met in regular session in its office at 1961 Midway, Shreveport, Louisiana at approximately 4:30 p.m. on Tuesday, December 13, 2011 with President Lillian Priest presiding and the following school board members present being a quorum: Steve Riall, Jasmine Green, Carl A. Pierson, Sr., Charlotte Crawley, Curtis Hooks, Mary Trammel, Bonita Crawford, Barry Rachal, Larry Ramsey, Ginger Armstrong and Dottie Bell. Also present was Legal Counsel Reginald Abrams, staff and visitors. Mr. Pierson led the prayer and Pledge of Allegiance.

CONSIDERATION OF MINUTES OF THE NOVEMBER 15, 2011 AND DECEMBER 6, 2011 CPSB MEETINGS

President Priest announced that the motion will be to approve the November 15, 2011 minutes only as the December 6th minutes are not complete. Mrs. Bell moved, seconded by Mr. Hooks, to approve the minutes of the November 15, 2011 minutes as submitted. Vote on the motion carried unanimously.

PRESENTATIONS AND RECOGNITIONS

On behalf of the board, staff recognized the following students/employees; and the board president, along with Mr. Woolfolk and Mrs. Turner, presented each with a certificate recognizing their accomplishment. Administrators, family and friends were also recognized.

We Care Essay Contest. Leisa Edwards recognized Bob Griffin and Tom Watts with Community Renewal, sponsors of the We Care Essay Contest. The following students were recognized: Third Place Winners -- McKenzie Persley, Kindergarten, University Elementary; Devin Wilson, 7th grade, Youree Drive Middle School; and Laura Sorkey, 11th Grade, Caddo Magnet High. Second Place Winners – Hannah Shores, 5th Grade, University Elementary; Haley Peace, 8th Grade, Donnie Bickham Middle; and Claire Hartgrove, 11th Grade, C. E. Byrd High School. First Place Winners – Abigail Phelan, 3rd Grade, Keithville Elementary; Emily Weddleton, 6th Grade, Herndon Middle Magnet; and Aliyah Bilal, 9th Grade, Captain Shreve High.

District 1-5A 2011 Champions. Bruce Daigle recognized the C. E. Byrd Yellow Jackets Football Team, 2011 District 1-5A Champions. Head Coach Mike Suggs and the team members were congratulated for this achievement. Mrs. Bell announced that Channel 3 news highlighted Byrd player Richard Cawthorne.

Teachers of the Year. Dr. Mary Nash-Robinson announced that last month when recognizing Caddo’s Teachers of the Year, two teachers were inadvertently missed. The following two teachers of the year were introduced and recognized: Debra Smith, Northside Elementary; and Carla Hill (absent), Fair Park High School. Dr. Robinson also announced that Dynamic Trophies was listed as providing the commemorative gifts for this year’s teachers; however it was Ad Pro Trophies, via Opportunity Caddo, that provided this year’s crystal trophies.

Smiles Louisiana Dental Program. Dr. Gregory Folse was recognized for providing the much needed dental care to children who are in much need of this service. Dr. Robinson expressed appreciation to Dr. Folse for what he does for the children in Caddo Parish. Dr. Folse shared with the board and audience his appreciation for the school district’s support in providing this much needed service to students and shared data on the services being provided and the number of students being seen/treated during the year.
Louisiana Association for Health and Physical Education, Recreation and Dance. Jan Holliday recognized Alan Carter, Caddo’s Supervisor of High School Physical Education and Athletics, who was recently named the State Athletic Director of the Year at this association’s recent annual conference in Baton Rouge.

Newly Appointed Administrators. Dr. Robinson introduced the following newly appointed administrators: Willie Arkansas, custodial supervisor; and Bruce Daigle, area director of school performance.

President Priest announced that these recognitions indicate the many good things taking place in Caddo; and despite the frequent negative publicity, the district is doing things such as providing for the homeless, providing dental services to students, recipient of many awards, etc. and she believes it is necessary that the district begin getting this positive message out.

Public Hearing on Renaming a Portion of Youree Drive Middle School Grounds for Coach Knox. President Priest declared the public hearing open on renaming a portion of the Youree Drive Middle School grounds for Coach Knox. There being no speakers on this item, President Priest declared the public hearing closed.

VISITORS

Jackie Lansdale, president of Red River United (Caddo Federation of Teachers/Support Personnel), shared a poem she had written on the Federation’s concerns relative to education.

ESTABLISH THE AGENDA AND PROPOSED CONSENT AGENDA FOR THE DECEMBER 13, 2011 CPSB MEETING

Dr. Mary Nash-Robinson presented items for the board’s consideration and the following discussion ensued. President Priest announced that Items 6.02-6.03, 6.05, 7.01-7.02, and 8.01-8.08 are the consent agenda. Mr. Riall moved, seconded by Mr. Pierson, to approve the agenda and the consent agenda for the Tuesday, December 13, 2011 CPSB meeting as presented. Vote on the motion carried unanimously. The following is a summary of the board’s action relative to consent agenda items.

Item No. 6

6.02 Requests for Leaves. The board approved the following requests for leaves as recommended by the superintendent and submitted in the mailout.

Certified

Kirstin Cloutier, Teacher, 2.5 years, Captain Shreve
Catastrophic Leave, December 6, 2011-December 16, 2011
Ralph C. Norton, Teacher, Shreveport Job Corp, 13 years

Renee Caldwell – request to rescind sabbatical leave for study in Spring Semester 2012 approved at the June 2011 board meeting.

6.03 Personnel Transactions Report. The board approved the personnel transactions reports for the period of October 21, 2011 – November 20, 2011 as recommended by the superintendent and submitted in the mailout.

6.05 Out of State Travel Requests (General Fund). The board approved requests for out-of-state travel (General Fund) as recommended by the superintendent and submitted in the mailout.
Item No. 7

7.01 **Bids (Purchasing).** The board approved the following bids as recommended by staff and submitted in the mailout on the bid tabulation sheets: (1) D&H Distributing Company, totaling unit price $592.77, for the purchase of Calculators for all Schools; (2) Aves Audio Visual Systems, Inc., totaling unit price $1,425.05 for the purchase of Audio Visual Equipment for All Schools; (3) EBSCO Industries, Inc., totaling percentage discount of 11.95% for periodicals for all schools; (4) Monroe Spring & Brake, Inc., totaling $353.00 per unit price for the purchase of vehicle brake linings; and (5) Delcom Group L.P., totaling percentage discount of 15% for the purchase of printers and scanners for all schools. The bid tabulation sheets are filed in the permanent records of the CPSB’s December 13, 2011 meeting.

7.02 **Bids (Construction).** The board approved the following bid(s) as recommended by staff and submitted on the bid tabulation sheets: (1) John Gibbs Roof Systems, Inc., with a Base Bid, for the sum total of $447,310 for Project 2012-077, “Central Office Re-Roof Main Office & Instructional Center”; and (2) Hope Contractors, with a Base Bid and Alternate 1, for the sum total of $303,900 for Project 2012-QB13, “QSCB Data Security Cameras at J.S. Clark”. The bid tabulation sheets are filed in the permanent records of the CPSB’s December 13, 2011 meeting.

Item No. 8

8.01 **CPSB Properties Report/Recommendations.** The board approved the proposed utilization of CPSB properties as submitted by the superintendent in the mailout, a copy of which is filed in the permanent record of the December 13, 2011 CPSB meeting.

8.02 **Special Education Interagency Agreements and Contracts.** The board approved special education interagency agreements and contracts for providing needed services to students as submitted in the mailout.

8.03 **Revisions to Pupil Progression Plan and High Stakes Testing.** The board approved the proposed revisions to the Pupil Progression Plan and High Stakes Testing Policy as submitted by staff in the mailout.

8.04 **Request for Approval to Sponsor H-1B Visa.** The board approved the request to sponsor an H-1B Visa for an international teacher requiring an H-1B visa to fill a vacancy in Chemistry.

8.05 **Approval of Concession Services for Lee Hedges Stadium.** The board approved the bid of John Auzeene, Jr., totaling 20% of the gross receipts for concession services for Lee Hedges (Caddo) stadium as submitted in the mailout.

8.06 **Select Date and Place to Meet with Local Legislative Delegation and BESE Representative in January/February.** The board moved that the CPSB schedule a luncheon on February 7th or February 21st with the Caddo Legislative Delegation, and any other surrounding legislators, to discuss education-related issues, that the board president appoint a sub-committee of three board members to work with staff to research and review proposed education bills for the 2012 Session, and invite the Governor’s Policy Advisor on Education to meet with the board and staff prior to the session.

8.07 **Proposed Revision to CPSB Policy CCA (Organization Chart).** The board approved the revision to Policy CCA (Organization Chart) as submitted by the superintendent in the mailout.

8.08 **Expanding the Use of Our Third Party Administrator for Workers Compensation.** The board approved expanding the use of our third party administrator for workers compensation as submitted in the mailout.
ADMINISTRATIVE CONTRACT RENEWALS

Board Member Crawley requested to separate the COO from the others. President Priest asked if the board agrees to voting on the COO’s contract separately? Mrs. Crawley moved, seconded by Mr. Ramsey, that the COO’s contract be voted on separately. Vote to separate failed with Board members Riall, Crawley, Crawford, Rachal, Ramsey and Armstrong supporting the motion to separate and Board members Green, Pierson, Hooks, Trammel, Priest and Bell opposed.

Mrs. Crawley moved, seconded by Mr. Riall, to vote on each one individually. Mrs. Crawley reminded the board that it has been doing this and the previous board discussed not wanting to vote no against all contract renewals but to have the ability to pull a particular contract and vote on it separately. Mr. Riall stated he believes board members should have the ability to vote individually as they have the need to rather than on all at one time. Mr. Pierson asked for clarification and if this means the board is evaluating everyone and determining whether or not contracts will be issued? President Priest stated she believes that is what this appears to be. Mr. Pierson said he doesn’t believe he can evaluate these employees fairly when he has not seen them perform their duties; this is something for which he holds the superintendent responsible.

Mrs. Crawford moved, seconded by Mr. Rachal, to postpone action on the COO’s contract until January. After discussion, Mrs. Crawford withdrew her motion and Mr. Rachal his second.

Ms. Trammel asked for clarification because when she agreed to serve on the board she believed it was the board’s responsibility to set policy and approve a budget. She added if personnel issues become the responsibility of the board, she then believes there is no longer a need for a superintendent; and if there is a problem with an employee, this is a matter board members should take up with the superintendent.

Mrs. Bell stated she believes when you pull out a single person’s contract, this is a personal issue; and if the board is going to begin evaluating employees, it will be important for her to go onto the jobs of these employees. Mrs. Bell said she doesn’t believe this is the board’s job and that this is a personal attack on someone which is something she will not go along with; and the board should address these matters with the superintendent.

Mr. Hooks moved, seconded by Mr. Pierson, to call for the question, because this discussion should have taken place in the last meeting (work session). Vote on the motion to end debate carried with Board members Crawford and Ramsey opposed and Board members Riall, Green, Pierson, Crawley, Hooks, Trammel, Priest, Rachal, Armstrong and Bell supporting the motion.

Mr. Abrams clarified that the current motion is to vote on each of the positions individually, and the board will be deciding procedurally on how it will address each one of these.

Vote on the motion to vote on the five administrative contracts separately failed with Board members Riall, Crawley, Crawford, Rachal, Ramsey and Armstrong supporting the motion to separate and Board members Green, Pierson, Hooks, Trammel, Priest and Bell opposed.

Mr. Pierson moved, seconded by Mr. Hooks, that the board accept the recommendation of the superintendent (on the renewal of administrative contracts). Vote on the motion carried with Board members Riall, Crawley, Ramsey and Armstrong opposed and Board members Green, Pierson, Hooks, Trammel, Priest, Crawford, Rachal and Bell supporting the motion.

FUNDING OF TRUAENCY PROGRAM
Mr. Rachal moved, seconded by Mrs. Crawford, to approve the superintendent’s recommendation for funding of $30,000 as its portion to help fund the truancy program for the next semester. Mr. Rachal asked, since there are other governmental parties involved, which entity will the money flow through? Mr. Lee responded that he has not had conversation with anyone on how this will occur, and Mr. Abrams explained that it will be through the Department of Juvenile Services and they will contract. Mr. Rachal asked if this is how the funds were used in the past? Mr. Lee said the funds approved last year went to Volunteers for Youth Justice. Mr. Rachal asked for clarification on why the funding direction has changed? Mr. Pierson explained that because there was only one funding mechanism last year, the funds flowed directly to VYJ the entity carrying out the program. He further explained that the Department of Juvenile Services is a department within the Caddo Parish Commission and is responsible for these funds. Mr. Pierson reminded the board members that this is only to carry the program through the end of this school year and next year some other funding arrangements will need to be made. Mr. Rachal noted the importance of clarifying this before voting on it. Mrs. Crawford said she believes this organization is doing a good job and it is helpful to know who to call when seeing students on the street and out of school.

Ms. Priest asked that staff at the January meeting, Ms. Salone and Ms. Everett, bring to the board current stats on this item, because she would like the records to reflect accurate information since she is seeing in staff reports that from September 12, 2010 to December 5, 2010 there were 458 truant students and September 12, 2011 to December 12, 2011, there were 634 and this is approximately 28% increase and not the 60% increase previously reported.

Mrs. Crawley said while her comments are not an evaluation of Juvenile Justice, state law makes the Commission and the juvenile services responsible for juvenile delinquency. Since the district pays for board members to attend these conferences on board finance, she shared with the board that this was addressed at the last class and this is not something school boards should be paying. She also noted how many times during the year expenditures are added to the board’s approved budget, but items are never taken away. Mrs. Crawley asked for clarification as to where the $30,000 is coming from, because she understands the Parish Commission is cutting Sci-Port and this is not something she supports; and she also understands that to add this to our budget means we will cut something. Mrs. Crawley also referenced that VYJ has been operating for approximately 4 years and with the new technology available, it can be easy and important to publish the names of parents of truant students. She said this is not the Caddo Parish School Board’s job, but the board’s job is to educate children.

Mrs. Armstrong asked for clarification on the funding for the remainder of this year and is that the fiscal year? Ms. Priest clarified it is through the end of this school year. Mrs. Armstrong stated her understanding that this is a completely different operation from VYJ. Mr. Abrams said that is not correct, but it will be using VYJ again to perform the services; and he did not want the CPSB to have a contract with VYJ since he does not see this as a necessary CPSB duty. He also explained that next Spring there is an intent to provide long-term grants, etc.

Mr. Hooks said he is very familiar with this because he serves on the State Children and Youth Services Board, and he reminded the board that VYJ came to the board last year and the board approved $185,000 for them. This year they are coming to the CPSB for help and asking for $30,000 and he believes this is not a lot at all when it comes to talking about Caddo’s children. He shared with the board an incident that happened at a Caddo school this week; how teachers are afraid, because the students are running the schools and help is needed.

Mr. Pierson moved, seconded by Mrs. Crawford, to call for the question. Vote on the motion to end debate carried unanimously.

Vote on the main motion to fund the truancy program as recommended by the superintendent carried with Board member Crawley opposed and Board members Riall, Green, Pierson, Hooks,
Trammel, Priest, Crawford, Rachal, Ramsey and Armstrong supporting the motion. Mrs. Bell abstained.

ELECTION OF 2012 OFFICERS

Mr. Rachal moved, seconded by Mrs. Crawford, that the board vote on officers by slate. Vote on the motion carried with Board member Green opposed.

Mrs. Armstrong moved, seconded by Mrs. Crawford, that the CPSB elect the following slate of officers for 2012: Steve Riall, President; Dottie Bell, First Vice President; and Larry Ramsey, Second Vice President. Vote on the motion carried unanimously.

AUTHORIZATION OF PRESIDENT TO USE FACSIMILE SIGNATURE

Mr. Ramsey moved, seconded by Mrs. Bell, to authorize the President to use a facsimile signature. Vote on the motion carried unanimously.

SUPERINTENDENT’S REPORT

Dr. Robinson announced that there is nothing to report at today’s meeting.

ANNOUNCEMENTS AND REQUESTS

Ms. Priest asked that staff bring to the board in January a presentation and data on truancy.

Ms. Priest announced that there will not be an executive session this evening on the superintendent’s evaluation; she has completed the superintendent’s evaluation and will meet with him to go over it. She also asked the president-elect to allow her to present the superintendent’s evaluation in January.

Mr. Ramsey asked that an item be added to the January agenda to approve the recommendation of the internal audit of the Energy Management Department.

Mrs. Bell asked that staff provide her with how many employees are currently on administrative leave and getting paid, as well as how long they will be on leave, and information on how we pay bus drivers for extra trips and the procedure followed for payment.

Board members Trammel, Rachal, Ramsey, and Riall congratulated President Priest on the wonderful job in serving as the board’s president for two years and wished everyone a Merry Christmas. Mr. Riall also expressed his appreciation to the board for the opportunity to serve as the board’s president during 2012.

Ms. Priest expressed her appreciation for the opportunity to serve and wished everyone a Merry Christmas and Happy and Prosperous New Year.

Adjournment. Mr. Riall moved, seconded by Mr. Hooks, to adjourn. Vote on the motion to adjourn carried unanimously and the meeting adjourned at approximately 5:55 p.m.
January 3, 2012

The Executive Committee of the Caddo Parish School Board (CPSB) met in regular session in its office at 1961 Midway Street, Shreveport, Louisiana, at approximately 4:30 p.m. on Tuesday, January 3, 2012 with President Steve Riall presiding and Dottie Bell and Larry Ramsey present being a quorum. Other school board members present were Jasmine Green, Carl Pierson, Charlotte Crawley, Curtis Hooks, Mary Trammel, Lillian Priest, Bonita Crawford, Barry Rachal, and Ginger Armstrong. Also present were Superintendent Gerald Dawkins, Legal Counsel Reginald Abrams, staff and other visitors. Mrs. Crawley led the invocation and Pledge of Allegiance.

PRESENTATIONS

Truancy. Carla Moore, supervisor of child welfare and attendance, shared with the board that the State Legislature mandates compulsory attendance laws and cited recent changes, as well as how those changes have affected the Caddo School District over the past five years. She also shared with the board numbers generated from the Attendance and Child Welfare Department, i.e. number of referrals to the Juvenile Justice System. Ms. Moore explained that the compulsory school attendance law requires that children attend school each day scheduled by the school system with the only exemptions being personal illness, illness in family substantiated by the parish supervisor of child welfare and attendance or a certificate from a practicing physician, death in the immediate family, or religious holidays. She explained that the compulsory attendance law is enforced in the Caddo School System by computer generated letters via JPAMS, staff generated letters from the Attendance and Child Welfare Department, phone calls via the JPAMS calling system, as well as by attendance supervisors and facilitators, school and home visits, court referrals, agency referrals and court petitions. Ms. Moore added that changes in the State Law over the past five years have altered the way school systems address truancy with students no longer being categorized as historically and non-historically truant, with earlier notification and conferences with parents being required. The new laws also outline consequences for parents of students who are considered truant. Referrals made in 2007-2008 were made based on historically or not-historically truant (court referrals were made on the 15th unexcused absence for non-historical truant students and on the 8th unexcused absence for historically truant students). During this (2007-08) school year, 1,443 students were referred to the Juvenile Justice System by the Attendance Department for truancy; and in 2009-10, Act 741 required that the parent be referred to the District Attorney after the unexcused absence, and was changed from 15 to five, with any habitual cases possibly resulting in fines for the parents or community service. She reported that 2,366 students were referred to Juvenile Justice System during the 2008-09 school term for truancy and in the 2009-10 school term, 2,850 students were referred. During the 2010-11 school year, Act 644 was passed by the State Legislature requiring that parents are notified in writing on the third unexcused absence, and schools must conduct parent conferences concerning student absences. She further added that Caddo Parish Public Schools installed a calling system that contacts parents upon each instance of an unexcused absence, beginning on the first unexcused absence. Three thousand three hundred twenty-four students were referred to the Juvenile Justice System last school term; and to date for the 2011-2012 school year, their department has continued to make referrals to the Juvenile Justice System in accordance with the law; with continuing to see increased instances of truancy, particularly among the middle and high school students, as the year progresses, with 634 referrals made to the Juvenile Justice System as of December 2011.

Mrs. Bell stated that she researched a program in Oklahoma where the parents are fined and actually go to court; and asked if Louisiana has passed something similar mandating some type of fine on the parents? Ms. Moore responded said it could be done; however, as of now, staff has not heard where any such thing will be implemented in Caddo. Mrs. Bell asked if the school system has talked to the appropriate officials about implementing this in Caddo? Mr. Abrams
explained that the Caddo School System refers to the Juvenile Justice System (District Attorney), and the District Attorney makes the recommendation as to what should be done to the parent and its a judge that can require the parent to do community service or impose monetary fees.

Mr. Pierson asked about the appearance that the numbers are down, and Ms. Moore explained that the referrals are up, but the number of truant students in the system is down, and normally an increase in numbers is seen in the second semester.

Mrs. Crawford asked if it is possible for the school to have school-based community service rather than going to court with the students. Mr. Abrams explained the statute mandates that the judge rule on what will be done and cited a case where the judge did mandate community service at the school, but there were some liability issues involved. Mrs. Crawford asked if the parents were the ones carrying out the community service and Mr. Abrams said that is correct, it was whoever was responsible for making sure the student was in school. Mrs. Crawford asked if there are numbers available that indicate the school referrals work? Ms. Moore said it is punitive and usually when a student is taken to court, they are judged and assigned a probation officer

Mrs. Crawley asked what do the schools or social services personnel do before it gets this bad for one particular student? Ms. Moore stated that the system calls the parent on the first unexcused absence, but State Law mandates that the schools have a conference with the parent and documentation on the third unexcused absence. She further stated that five unexcused days is basically for elementary and middle school students, because high school students actually fail on the fourth unexcused absence with the block schedule. Mrs. Crawley asked about last year’s 3300 and if these are the same children or different families? Ms. Moore said many times it is the same family, and normally the judge would require the parents to participate in parenting classes. Mrs. Crawley said she believes it is important that we do a lot of “hand holding” early on to ensure that these students are in school. Ms. Moore noted that referrals begin at age 7 and are through age 18. Mrs. Crawley said she understands it is the system making referrals; however, she is talking about the system bringing in social services, school nurses, counselors, etc. in an effort to get these students in school. Mrs. Crawley asked if home visits are made and Ms. Moore responded that the staff does home visits to determine why students are not in school.

Ms. Priest asked staff about the 3,324 referrals to Juvenile Justice and does this represent roughly 13% of Caddo’s student population enrollment? She asked that staff look at this as a number because when talking about things, it is the numbers that get attention and is something that needs to be addressed. Also, with the partnership formed, she believes it will be very important to continue the dialogue with law enforcement to implement a system of community service and/or some type of penalty for parents of truant students and asked that staff begin to work on this. Ms. Priest said the district is looked upon based on attendance and if students are not in school, they are not learning and this is not only an injustice to the children, but the system as well. Ms. Priest also stated her observance of students not enrolling in school at the beginning of the school year (in mid August), but waiting until after Labor Day.

Mrs. Crawford noted that a couple of board members a couple of years back attended a presentation on a truancy program in Lafayette and before students are referred to the Justice System, they are referred to social services to work with them and hopefully keep them from having to go before a judge and asked if Caddo does this. Ms. Moore explained how staff works with the parents due to the fact that sometimes there are extenuating circumstances (i.e. homeless, no transportation, etc.). Mrs. Crawford stated her understanding of these particular situations; however, she is talking about the parents that are not making certain their children are in school. Ms. Moore further explained meetings and hearings are held with the parents in an effort to address truant students and placing students on behavior contracts, explaining to the parents the importance of parents ensuring their children are in school. Mrs. Crawford added she
believes it is important that we set up some type of community service whether it be at the school or raking yards in the neighborhood, for example.

Mr. Abrams reported that staff is working on an agreement between the different groups (parish and city) based on what the board approved at last month’s meeting; and within that agreement there will be interventions in place and a part of their duties will be going into the homes and provide social services for the parents, assessing the problems. He further added that a part of the agreement will be requiring a report to the board, possibly quarterly, on what they have done, how many people they have touched and the results.

Ms. Trammel asked Ms. Moore if, in making sure parents are penalized (for the younger students), we will be penalizing the older students, along with the parents, and holding them accountable. Mr. Abrams responded that the way the court system is set up, and reminded the board of the 3300 referrals, there is no way they can all go through the Justice System, so it is necessary to use other services to intervene and determine the problem by using these additional services (community service, probation officers, etc.).

Mrs. Bell said she is about the children going to school, and she believes it is time for the board to get on the parents who are responsible for their children being in school and shared her experience in this area when she taught in Caddo. She said parents do not want to leave their job and will think twice when contacted about their child not being in school. Mrs. Bell noted the history of students who have failed the Leap exams and why schools SP Scores are not increasing every year. She also referenced a district in Oklahoma fining parents. Mrs. Bell said the child is the one suffering when getting to school late and missing part of the school day, and encouraged the board to meet with the legal system if necessary about possible parental penalization.

Mr. Ramsey said that Mr. Abrams expressed his concern relative to accountability issues and asked Mr. Abrams to clarify again the periodic communications. Mr. Abrams responded that the contracts have not yet been negotiated; however, conversations were held during the holidays with the parish attorney and city attorney on what they believe the agreement should look like, i.e. what each shall do and will do and report at the end of the year the effectiveness. Mr. Abrams also reminded the board of the concern about a one-time funding agreement and the need to look for other funding throughout the state, even the potential of putting it out for bid to organizations that can provide services.

Mrs. Crawley asked Ms. Moore about the missing number she would like and that is of the 635 reported to date this year, how many are repeaters, or different families? She also said that maybe publishing pictures and names in the newspaper (Inquisitor), similar to arrests, DUls, etc., will state how serious we are about this.

Mr. Pierson said he believes the Census and Attendance Department does an excellent job and could do a mammoth job if there were an unlimited number of personnel; however, considering the number of truant students, and because staff is limited, staff can only address so many. He highlighted other aspects, i.e. how many days a student is out by the time hearings are held, missed class work, how far students are behind in their class work by the time they are returned to the classroom, etc., and he believes the department and the board will continue to address these issues with our partners and get these students back on line and in school.

Mr. Hooks stated that you must begin somewhere; and if you don’t, the problem will not be eliminated. He referenced Mr. Abrams’ comments about getting help from the state and reminded the board that he sits on the Governor’s State Advisory Board, and they approve grants that can be used in this area. Mr. Hooks stated that someone might want to contact Dan Borland, who is over the juvenile system in Beauregard Parish about how they were successful in getting
Mr. Rachal echoed Mr. Hooks’ comments; and, he believes if these parents were fined for their truant children, then they would probably follow their children to school to make sure they were in attendance. He also stated that the public as a whole holds the school board accountable, as well as the superintendent, the teachers, and the counselors; and he doesn’t believe the public as a whole will look at the board in a negative way if we hold parents accountable to the fullest extent of the law. He also reminded everyone that historically if a new rule is put into place and it is a rule that someone likes to break, then they are not going to like that rule. Mr. Rachal noted Mr. Abrams’ comments that the courts could possibly be overwhelmed; however the school system is currently overwhelmed and it may not be a bad thing for someone else to be overwhelmed for a while. He asked the superintendent and Mr. Abrams to look at what policy can be put forth in order for there to be a larger impact in this area. Dr. Dawkins noted that he believes the point has been made that this is something staff needs to follow up on; and in terms of what the law allows, Mr. Abrams can explore this area and report back to the board. Mr. Rachal reiterated that he believes everyone on the board would like to know what “to the full extent of the law” provides, as well as what other parishes have in place that may be working.

Mr. Abrams stated that the system has modified what we do and according to the statute, any student who is habitually absent shall be reported by teachers and supervisors of child welfare and attendance to the family or juvenile court and dealt with in accordance with the courts determination. He said the issue is we are the agency that reports, tells them what happens, and it is up to the court to make the determination as to whether or not they are truant and that the parent is responsible. Mr. Abrams further explained that the statute continues to say that a student in kindergarten through 8th grade that is habitually absent shall be punished as follows (and this is a directive by the Legislature to the courts): (1) first offense – fine not more than $50 or the performance of not less than 25 hours of community service. He also explained that we have now partnered with the District Attorney and as a part of the District’s calling system, a letter is sent from the District Attorney to the parents, via JPAM, scheduling a meeting with him (DA) if they are not complying that the child is truant. Mr. Abrams further explained the process that is followed with the DA who is the enforcement arm with the authority given to them by the statute, and the school system cannot penalize or fine any person. Relative to what other systems have or are doing relative to imposing fines, Mr. Abrams responded that he will look at the grants, but we will have to follow the law.

Ms. Priest added her agreement that we must follow the law; however, she believes there are those situations that must be dealt with realistically, and that is we are losing the battle of children not being in school which is affecting the District’s School Performance Scores. She said there are things she believes we should do to bring to the forefront the value and need of children being in the classroom; and referenced the use of *The Inquisitor* to identify negligent parents not following the law relative to education for their children. Mr. Abrams again explained that this will occur in Juvenile Court and will not be open to the public, unless the court system declares and puts a judgment that is public record. Ms. Priest asked that we look at options, since we have the reporting system in place, to hold the parents accountable.

**ESTABLISH THE AGENDA FOR THE JANUARY 17, 2012 CPSB MEETING**
Dr. Dawkins presented items for the board’s consideration at the January 17th meeting and the following discussion ensued.

**Personnel Recommendations.** Mr. Hooks inquired about the recommendation for the Director of Attendance and the superintendent responded he will make a decision by the end of the week.

**Out of State Travel (General Fund).** Mrs. Crawley noted that some of the requests for out of state travel are actually before the board meets again and if the board is being asked to vote on these after they travel?

**Bids (Purchasing).** Ms. Green inquired about uniforms for Magnet High’s music program, and Leisa Edwards explained that uniforms and instruments for all high schools and middle schools are requested on a rotation basis, based on need and age of the uniforms. Ms. Green asked staff to provide her with a list of what school is next. Ms. Trammel asked for clarification because she has never seen Magnet High students in uniforms. Ms. Edwards said it is not the same uniform as other bands may have, but it is some type of robe, overlay, etc. for their music ensemble. Ms. Edwards added that she will provide information on the various types of uniforms and the proposed cycle and process for requesting uniforms and/or instruments.

**Bids (Construction).** Ms. Green asked staff to explain the lighting retrofit for Byrd High School. Mr. White explained that these projects are updating lighting throughout the schools; and to date, approximately 74% of the schools have been updated, replacing them with more energy efficient fixtures and bulbs. Ms. Green asked if this has gone on at any other schools; and Mr. White again stated that approximately 74% of Caddo schools are complete. Ms. Green noted the $150,000 for all three projects and Mr. White explained that this is the way in which they must be advertised according to the public bid law. Ms. Green asked staff to provide her with information on the cost for the three proposed projects.

Mrs. Armstrong asked Mr. White to clarify her belief that we had completed these retrofits. Mr. White explained that under the 2004 bond issue, air conditioning had to be completed first and any remaining funds were earmarked for lighting retrofits. Last summer a majority of the lighting retrofits were completed and Byrd had to be postponed in order to make the security updates to the 7-12 schools, which was a call he made since we do work on lighting retrofit projects when school is in session.

Mrs. Crawley asked Mr. White about moving J. S. Clark to an elementary school and the location of I-49 to J. S. Clark? Mr. Pierson said there is nothing set in stone relative to the location, but it will not interfere with J. S. Clark. Mrs. Crawley said her only problem with J. S. Clark is security because of its location on a highway and asked staff about security for the elementary students. Mr. White explained that the area directors and he met and the biggest challenge in the transition is all the preK, K and 1st grade students must be on the first floor. He also noted J. S. Clark’s close proximity to Hearne Avenue where vehicles seem to travel fast, and the area directors asked that the very small loop be removed so people will not pull in and out at that location, and to fence off around Hearne and along Ford Street. He also reported that these students will also have a fenced off area on the north side of the building.

Ms. Trammel asked Mr. White about fencing in the area and if this is because the school is on Hearne Avenue? Mr. White responded no, but it is to provide safety for every child. Ms. Trammel said she has noted that every school she has passed by or visited has fencing around them and it gives the appearance that it is a detention center or prison, and asked if this fencing is because the school is on Hearne? Mr. White said it’s not just because it is on Hearne, but it is what we do at any school to keep students from wandering into the street. Ms. Trammel referenced other schools in the district that do not have this appearance and asked that the staff
remember this when fencing in areas. Mr. White added there have been comments and one is having a fence only five feet high so it does not give the same appearance as a security fence.

Mr. Hooks asked how will the driveways along Hearne be fenced off? Mr. White explained that academic directors have recommended removing these driveways as they are not wide enough to be used as a drop off area, and how the fencing will be placed around the campus to tie in with the building. Mr. Hooks asked about the parking lot for teachers, and Mr. White responded that it will not affect this, but it will be before the drive, near the Home Economics Building.

Mr. Pierson said he believes these changes will serve two security purposes, adults cutting through the campus when walking, and the circle drive will keep anyone from just dropping in and picking up students.

Approval of Recommendations of the Internal Audit of the Energy Management Department. Ms. Priest asked that we get quarterly updates on the nine recommendations in the Energy Department audit because some address incentives and general cost savings.

Mr. Hooks asked for clarification of the recommendation on Page 2 of the audit where it states that the energy manager shall consult with the director of school plant to determine what should be reduced and at minimum a review should be year to date with a comparison of money. He also said that he doesn’t believe it to be fair to put everything on the energy manager, and he doesn’t believe you can hold the energy manager responsible when the responsibility is on his director. He also asked if SunGard is working and the superintendent responded it is working. Mr. Hooks asked if Mr. Smith has responded to this report and the superintendent responded he has. Mr. Hooks also stated his concern that we only have one energy manager; and Dr. Dawkins stated that at the present time, there is one energy manager and we never had more than two. Mr. Hooks asked how many schools do we have and the superintendent responded 69 or 70. Mr. Hooks stated that it doesn’t make sense to him for one man to be responsible for all these schools and asked who did the audit. Jeff Howard, chief internal auditor, responded that the Internal Auditing Department conducted the audit with Kelli Duffield being the assigned auditor. Mr. Hooks asked if this auditor knew we had this many schools and only one man to care for all of them, because he did not know it. He also stated that his point is one cannot overrule their director and must get their “yes” or “no” from the director and these recommendations do not even include a director. He also asked about the recommendation to reward schools for energy conservation, because he doesn’t understand why we would reward a school for doing what they should do. Mr. Hooks stated his disagreement with the audit because it presents an assumption that the energy manager is not doing his job and it is only one person, and it is unfair to put all this on one person and make it appear that he is not doing his job. Dr. Dawkins stated this report is information on where we can improve and not about someone not doing their job. Mr. Hooks said that is how he reads it. Dr. Dawkins said it is things we can do to be better as a system and we need to find ways to do just that.

Mr. Ramsey said the motion will be to simply direct the staff to implement the recommendations of the internal audit; and he believes the auditors did what they were supposed to do and that was review where we are or are not following policy. This audit only pointed out instances where policy is not being followed, and Mr. Ramsey reminded the board that internal audits are done to find problems and as a result address them and make the system better, and he does not doubt the superintendent and staff will address these.

Ms. Trammel thanked the superintendent for agreeing to help this employee and asked Mr. Howard the timeframe used for the audit. Mr. Howard explained that staff did not have any information to look at because it had not been put into the system, so the majority of the audit was looking at policy and noting where it was being followed and where it was not. Ms. Trammel asked if the intent for all the audits is to cover one year, two years, three years? Mr.
Howard said it depends on the information and it is not like an external audit where we testify to financial statements over a year; but these are operational audits.

Mr. Rachal referenced last year’s utility bill of approximately $9.1 million and that one of the recommendations is the establishment of a formal energy management plan, complete with goals and guidelines. He added that it is also recommended that CPSB Form 5 be updated to conform to Policy ECF which states principals will be held accountable and evaluated on the energy management program on their campus, and he is unsure if this is fair to add additional responsibilities to the principals. Relative to building controls, the audit noted the recommendation from Parsons that the best energy conservation opportunity is in the replacement of building controls and instrumentation systems, and how the cost of these upgrades could be recouped in approximately two years. He also noted the recommendation that consideration be given to implementing these controls at all locations so the HVA systems can be computer controlled. Mr. Rachal also shared a visit to another district and how the district could always know the exact temperature in a specific room as well as lights that were on or off. He noted with as many old buildings as there are in Caddo Parish, it is important to be careful how they are managed and asked staff to share where we are in the request for proposals in this area. Mr. Woolfolk responded that an RFP was done and responses were received from two companies. He explained that staff interviewed different types of companies, i.e. engineering consulting firm, a performance contracting firm, as well as a skilled labor company. Mr. Woolfolk also explained that staff looked at control systems where staff could control energy at all schools from a central location. At this time, staff is very close to bringing a recommendation to the board for consideration relative to what direction the board wishes to pursue. Mr. Rachal commended staff members for bringing this to where he has been striving to get for approximately 4 years and reiterated that Parsons said the District could recoup the cost in approximately 3 years.

Mrs. Bell referenced the fact that there is only one energy manager and it will take a team to work with this person to make energy conservation successful. She also reminded the board that upgrades need to be done and to do them it costs money. Mrs. Bell agreed with Mr. Ramsey for bringing this audit up, because it shows the board an area that needs some money.

Mr. Hooks shared with Mr. Ramsey his appreciation of the audit, however, he cannot understand how it is a good and fair audit when it seems to single out one person. Mr. Hooks asked how many audits have there been and Mr. Howard responded there have been two. Mr. Hooks asked why wasn’t the director in this area not audited? Dr. Dawkins explained that the auditors went to the employees that provide the service and again, this audit is showing that the District has some work to do. Mr. Hooks added that he believes this is placing the responsibility on one person and it should be on the director and not the energy manager.

Mr. Ramsey reported that he and the superintendent have discussed this and he believes if the superintendent had his preference, he would have done an internal audit when he first came to Caddo; however, this audit is doing exactly what it needs to do and that is exposing some things that need to be improved. Mr. Ramsey said he doesn’t believe any one person is being targeted; but the audit will thoroughly assess every department in the system and determine any problems that need addressing.

Approval of Resolution of Assignment of Oil and Gas Lease. Mrs. Bell asked that a thorough research of the properties is conducted, because she is aware of a possible problem with one of the properties. Mr. Abrams explained that this item is an oil and gas lease and the board will be approving the assignment to Cohort Energy.

Approval to Rename a Portion of the Youree Drive Middle School Grounds for Coach Knox. Ms. Trammel asked that Coach Knox’s full name be included in this item. Mr. Rachal
said he would ask that the item be changed to state Coach Tom Knox. He further stated that the PTA, faculty and community as a whole originally requested this to recognize the dedicated service Coach Tom Knox has given to Youree Drive.

Adoption of Resolution Ordering and Calling a Special Election to Authorize the Incurring of Debt and Issuance of General Obligation Bonds. Superintendent Dawkins shared with the board a list of capital projects submitted by the principals. He also stated that whatever the board decides to do, he only felt like staff had a responsibility to let the board know this opportunity is available. He said the request for needs exceeds the District’s ability to meet and if the board approves moving forward with this opportunity, staff would enlist the help of a professional organization to help market and communicate it. Also, Dr. Dawkins reminded the board in talking about $133 million, we are talking about equity in all Caddo schools and it is an opportunity that may not come again anytime soon.

Mr. Hooks asked about the capital projects and the request for paving at Caddo Middle Career and Technology? Dr. Dawkins clarified that these are requests from the schools and not what we are doing. Mr. White explained that CMCT asked for two different things, paving (extend the width of the sidewalks) and add a canopy over the sidewalks because of the increase in the number of students. Mr. Hooks asked staff when did the District hold its last bond proposal? Mr. White said 2004 and it was for air conditioning (replacing of window units, non air conditioned spaces, replace any air conditioning systems in eminent danger). He added that any remaining funds, once air condition projects were complete, were designated for lighting retrofit. He also reported that there were funds included for a Performing Arts Center at South Highlands and to support gymnasiums at Booker T. Washington, as well as an amount for information technology and wireless telephones. Mr. Hooks asked if all the schools are now air conditioned and Mr. White said they are. Mr. Hooks said he believes now is a bad time to bring a bond proposal to the taxpayers since schools that have been or will possibly be closed have been air conditioned. He said to make this right, there are 2,252 classified employees (36.31% of Caddo’s employees), and 3,951 certified employees (63.9%) that don’t believe this is the time and will be a “no” vote because of the way things have happened, i.e. change in the pay schedule and no pay increase in three to four years. While he supports improving facilities and building new schools, Mr. Hooks stated test scores must improve before we spend money on building or renovating anything. He shared that the State Department told him Caddo ranks number 49 and he doesn’t understand why when test scores look worse than ever, we would want to go to the taxpayers with a bond proposal when there are schools at risk of being taken over by the State. He also said he heard a rumor that there is an area in the district that wants to separate from Caddo Schools, and he reminded everyone that academics should always be at the top and come first. Mr. Hooks also noted the many good teachers, administrators and students that Caddo has lost in the last 3-4 years and those he has talked with have told him that as long as Dr. Dawkins is superintendent, Caddo will continue to lose teachers, administrators and students. While he likes Dr. Dawkins, Mr. Hooks stated he cannot in good conscience support some of his recommendations; and we cannot hold him liable for this, but we can hold the elected board members liable. President Riall ruled that the comments are getting into personalities and this is not about personalities, and Mr. Hooks said he is not, but he is addressing the bond issue. Mr. Riall asked Mr. Hooks to not mention personnel. Mr. Hooks said he is only giving the facts and does not many any disrespect to Mr. Riall, but it was the constituents in District 5 that elected him and he is their voice, and he will do his best to see that this bond proposal does not pass.

Mrs. Crawford referenced Bossier’s proposal and they included a provision for salaries, and can this be included in Caddo’s? She referenced the 1997 bond proposal where the projects were grouped and it wasn’t an “all or none” proposition, and is it possible for Caddo’s bond proposal to include a provision for salaries? Mr. Lee explained that in a bond issue, you cannot use bond proceeds for salaries, but the board would have to go to the taxpayers for a different proposition for a tax millage for salaries and benefits. Caddo already has one and we would be asking
taxpayers for a second tax millage for salaries, which will be an increase in taxes. Mrs. Crawford asked about the proposition for salaries under Mrs. Tyler, and Mr. Lee responded that is correct and it is the District’s largest millage in General Fund for salaries and benefits and it was renewed in 2007 and will come up for renewal in approximately four or five years. Mrs. Crawford again asked if she understands there is no way in this bond proposal, and Mr. Lee said if the board chooses, it can go to the taxpayers for another millage for salaries and benefits, but not as part of the bond issue. Mrs. Crawford asked about verification of the superintendent’s statement that this would be carried out over 10 years, and Mr. Lee said the way the bond issue is structured, it would take approximately 10 years. Mrs. Crawford asked staff how much will the election in April cost the District? Mr. Lee said the cost to Caddo will be reduced since there are other political bodies in that election as well. Mrs. Crawford asked for explanation of window treatments and Mr. White explained that this is replacing windows and coverings for windows because of the style windows in the older buildings, the need to control the light coming into the classrooms especially with more technology being placed in the classrooms, as well as for energy conservation. Mrs. Crawford said she understands, but questions placing the window treatments in this venue rather than through capital projects. Mr. White stated it is felt that the proper time to do this is when the windows are replaced; however, the board may choose to remove this from the bond and request that this cost be picked up under capital projects. Mrs. Crawford inquired of staff how many schools would like cafeterias replaced by adding a multi-purpose room. Mr. White, while he did not have the exact number, all that do not currently have a multi-purpose room have indicated it is something they need, and staff looked at something that would combine a physical education facility with a stage. Mrs. Crawford also asked about multi-purpose rooms being tornado proof when they are built and how much more it will cost? Mr. White said he does not have an answer, but to create a storm shelter to hold the entire student body could be costly, and would not have windows. To build the facility to the specification that it is tornado proof, he does not know of any window that would be tornado proof; and windows are important to lighting the classrooms. Mrs. Crawford stated she is not asking that these facilities be tornado proof, but only for rationale when she is asked the questions. Mr. White said he understands and this is information the staff would provide the board so it can make an informed and intelligent decision.

Mrs. Crawley stated that she is all for providing the best possible facilities that parents are willing to pay for, but the most important thing that can be put in a classroom is a top quality teacher. She added that she was still teaching in 1997 and received a pay increase of a little over $100 a month and the first month she spent it on her classroom. She said she understands that the bond money can only be spent for capital projects, but she knows that Bossier did this in 2004 and has chosen to go to the voters again, and their sales tax is higher than Caddo’s. She also noted that Caddo had the option on that bond issue to put a new school in southeast Shreveport, but the voters in that area voted no. Mrs. Crawley said even though they voted no on that proposition, they did support employees getting a pay increase. She again said that she understands that it can’t be in this money, but she doesn’t believe parents worry as much about the windows as they do about the teacher in that classroom. Mrs. Crawley noted that we can’t compete with the district south of Caddo as they have received the Haynesville Shale money, but Bossier has handled it by asking the taxpayers to vote for it, and we need to determine if the public wants to help Caddo compete. She also reminded the board that in 1997, Caddo was in the top 10 school districts in Louisiana, and in 2004, Caddo dropped to the 20s and now Caddo is number 49; and teacher pay and how you are rated in the State follow each other. She noted that as the surrounding districts continue to pay their teachers more, we will see Caddo continue to go down; but if another proposition is added to the proposal for salaries and benefits, the 6,000 Caddo employees would show up and vote for it, and she would like to have this option. She also asked that there not be any work done on any school in the Vision 2020 plan until we know for certain that these schools will not close.
Ms. Priest asked staff to provide the following information. She believes we should always remain competitive and this can be defined in many different ways, and people work in different places for different reasons, i.e. salaries, but it is not always about salaries, but could be proximity to workplace, home, benefits, etc., and encouraged being more open as we talk about how Caddo competes across the state. She asked that if the board chooses to move forward with this to be very clear that this proposal definitely will not include any schools scheduled to be offline. She also asked staff if there are science labs at all Caddo middle schools; how will we support financially what is needed for this election, and the importance of putting together a community support team and local marketing-pr firm to assist in packaging this proposal properly in order to get the message out as accurately as possible. Ms. Priest added that the board has mentioned air conditioned buses, but she believes we need to look closely at energy efficiency, as well as staff providing a detailed summary of the construction and renovation plan. Lastly, regarding project design costing $12 million, Ms. Priest said if that is the case, she believes the board should be very clear that the contract work is reflective of Caddo Parish.

Mrs. Bell referenced the capital projects list from the principals and asked the superintendent and board where will the money come from to do what needs to be done in the schools if the board chooses to not support this bond proposal? Mr. Hooks said eliminate take home cars and Mrs. Bell stated that is nowhere near $133 million. Mr. Hooks said that it is a beginning. Dr. Dawkins responded that it will be very difficult to find ways to fund upgrades and changes of $500 million, and reported that we currently have approximately $17 million in capital projects, which is a small amount when the total needs are $500 million. Mrs. Bell noted the need for a multi-purpose room at Walnut Hill, the need for new schools, the need for air conditioned buses and the fact that these needs are not going away. She said for a good education, she is willing to pay the money so not only her grandchildren, but all children can have the best education possible in Caddo Parish. Mrs. Bell stated that she believes if she walked into Magnet High School she will be told needs for the children to be able to compete, and she will also be told of the children’s needs at Huntington High School. She reminded everyone that everyday something is happening that will affect the children and how they will make it in this world, but how can a facility that is approximately 100 years continue to be patched and provide the students with what they need. Even so, it takes money to do so. Mrs. Bell said she believes that whatever it takes to give all Caddo students the best education possible, she is for it and supports the bond proposal. She also believes if the people in this city care about its children, they will not look at the price; and she agrees with giving the teachers a raise, but this is strictly bond money. Mrs. Bell shared with everyone about those things in the AU schools (teachers receiving bonuses), and reminded them that this was an incentive to strive to increase the scores in those schools and they are still unhappy. She said if the board is going to give a raise, it should be given to everyone; but if we can give teachers state-of-the-art classrooms, this will make a difference in teachers being dedicated to teach when they have everything they need for the children so they have the opportunity to compete with students in other parishes. Mrs. Bell said, regarding the proposition, that should be the next thing the board addresses and reminded them that the taxpayers in Marshall said no when a proposition was put on the ballot. She also pointed out that the list of needs and what can be done with this bond money will address needs at every school in the District, and encouraged the board to support it. She also reiterated that she is for a raise for the teachers.

Mr. Ramsey asked the superintendent about the bonding capacity and how will the capacity be impacted if the board moves forward or if it does not, or if the bond fails. Mr. Lee responded that if we don’t move forward at this time, it will be necessary to reduce our debt service millage because it will be higher than what is needed to satisfy the District’s existing General Obligation debt. Staff’s estimate is that it will reduce from 7.6 mils to approximately 6 mils, and this is the first drop in the event we do not issue any more debt. Mr. Ramsey asked staff to explain the reduction. Mr. Lee said he doesn’t have that number, but he will get it for the board. Mr. Ramsey stated that instead of talking about being able to bond $133 million, will it be an amount...
smaller than that? Mr. Lee said absolutely and they would have to run the numbers to know exactly how much. Mr. Schlueter said it could be lower than that as it will be necessary to know the election date if not this year and an assessment is done each year which will alter those figures in moving forward. Mr. Ramsey said the window of opportunity does not close to go forward with a bond issue, the board can come back at anytime. Mr. Lee clarified it does not close, but it does reduce. Mr. Ramsey said he understands it does reduce, but we still have the capacity, 6 mils to address needs, and he wants the public to understand that if we don’t do this now, it doesn’t mean we will never have the opportunity again. Mr. Lee confirmed that is true; however, each year the millage reduces, the amount the board can issue without increasing the millage reduces as well. Mr. Ramsey also said if we do this, he understands we are not raising the taxpayers’ taxes, but there is an opportunity to reduce taxes if we don’t go to the public with this request. He also said these are his concerns; and if we don’t have the support of all the organizations and taxpayers, it will fail. Mr. Ramsey also added that he believes more details are needed when spending this kind of money and everything needs to be put on the table.

Mr. Pierson shared that he was a football official for 27-28 years and for 15 years of that time, he wore the white hat, which means he was the referee that received all the boos; and he believes we will miss an opportunity, and every opportunity has pros and cons. He noted that this will not increase taxes; but as board members, he believes the board should give the people the opportunity to vote for or against it. Mr. Pierson said he will follow the majority vote of the board, the collective will of the board, even if he votes against it. He said you cannot buy a good teacher; because if teachers are not willing to go into the classroom with some of the students Caddo has, then it will not be successful no matter what the District pays them, and he certainly wants to pay whatever it takes, because he always believes teachers are underpaid. Mr. Pierson said he supports any measure that will raise salaries; however, he does not want anyone to think that the quality of teaching is directly proportional to the amount of money they make. Commitment to teaching children has more to do with how successful they are. Mr. Pierson also cautioned the board about conversation of supporting a raise on one hand (which will increase taxes), but at the same time not willing to support a bond issue which will not increase taxes, and this is the people’s money and they should have the opportunity to make this decision based on the best information we can give them.

Ms. Green stated her agreement with Mr. Pierson and she too would want to put it to her constituents for the final decision; however, in looking at the proposed projects, she believes board members need additional details before taking it to the taxpayers in her district. She asked staff how long will this need to be advertised before the public? Mr. Lee explained that if the board gives the go ahead at the January 17th meeting, staff would begin immediately to work with partners, organizations, etc. to make the public aware.

Mr. Rachal stated that at this time, there is not a budget and we should have one prior to putting this proposal before the public; there needs to be details in the proposal and there is a need to get the public’s input on the details; and the millages of 17.34 will be coming to the public for renewal for General Fund, as well as 6.95 for capital projects. He said it is a matter of determining what is important and he believes the answer was yes to the question that this could be done at a later date. Mr. Rachal also noted that board members have stated they speak for their constituents and want to hear from them on this, and the voting cycle that has the most people voting is the Presidential election in the fall, so if we want to hear from the people that is when they vote. He also asked staff if there is an opportunity to decrease property taxes? Mr. Lee restated that if the board does not do anything in April, we will reduce property taxes in 2012-13 at the latest. Mr. Rachal said he believes this allows the District to get the order of events together and the priorities in line. Mr. Lee said in looking at the numbers and reducing the millages in 2012, then the board will not have another opportunity to call another election before we reduce the millages. Mr. Rachal noted that Caddo collects 78.2 mills which is the highest in the state of Louisiana; and being in real estate, it is the cost of living and doing
business that businesses look at. As a result, he believes Caddo Parish growth has been stifled. Mr. Rachal asked staff to provide him with the cost to repay $133 million in bonds on a yearly basis. Mr. Lee explained the annual payback would be approximately $1,450,000 based on an estimated 4% interest rate, which he believes may be high; and we would pay it back over 20 years. Mr. Rachal asked how many teachers does Caddo have and Mr. Lee responded approximately 2,500. Mr. Rachal said if you take approximately $4 million that we would pay the first three years and divide it by the number of teachers, this is approximately $1,600, and maybe this is the correct order; and if we do move forward and the public approves this, what will they say when we go to them in a few years for the renewal of the 17 mills? He believes the public needs to know what the board is considering and placing everything on the table.

Mr. Hooks said he too was booed as a teacher, but he told his students if they could make it under him, they could make it anywhere. His reward is when his students return and he learns they have made good of themselves. Mr. Hooks said that what he said was he doesn’t believe it is time to bring a bond proposal to the public, and you need to get the wax out of your ear and listen. He said incurring debt to him means to run or fall into something that is unpleasant or inconvenient and he believes if we support this bond issue we will be running into something that is unpleasant and inconvenient. Mr. Hooks said he doesn’t mind taking it to the voters, but he will take the same stand with this as he did with Vision 2020, he voted against it and he will vote against this, because he is not for a bond proposal right now.

Ms. Green asked the superintendent how fast staff can provide board members with details on the proposed bond proposal? Dr. Dawkins responded that staff has noted board member questions and will begin tomorrow pulling details together. Ms. Green asked if this needs to be voted on at the next meeting, and the superintendent responded yes, by the 17th.

Mr. Riall asked Mr. Lee about the time frame for paying back this $133 million bond, and Mr. Lee responded that we will issue $20 million each year, so it would be approximately six or seven years to issue, and approximately 20 years to pay it back. Mr. Riall asked if this will tie up the District’s borrowing power for that time, and Mr. Lee said it does not. Mr. Riall asked when will the District be able to issue more bonds, and Mr. Lee said the board would probably not want to do anything until these issues are complete, approximately 10 years. Mr. Lee further stated that the District could issue more than that, but not without an increase to taxpayers. Mr. Riall said this is directly tied to Vision 2020, and asked if the plan originally said a possible bond issue in Phase III, but is actually being brought forth in Phase II? Mr. Lee said by the time the first series of bonds are issued, it would probably be in Phase III. Mr. Riall noted the very generic projects listed and he too would like to see exactly what will come about so everyone knows what will happen and what will not happen. Dr. Dawkins responded that staff will be able to give a plan like this; however, it is important not to box ourselves in, but to have some flexibility. Mr. Riall asked if flexibility could be coming back to the board for a vote and reminded everyone that Phase III of Vision 2020 was that nothing would be implemented without board approval. Mr. Abrams stated that is his understanding, and the superintendent stated that’s a valid question, but what the board sees now is general so there is flexibility. Dr. Dawkins said staff will provide more details and some timelines.

Mrs. Bell stated that the City’s bond issue passed because everyone knew the streets were falling apart, it was needed and people supported it; and the same is true for the school system. The District has some old school buildings and it is important for the children. Mrs. Bell said we can say we are going to vote against it, but if the board supports moving forward, she believes it will be necessary to have someone help sell it for us.

**ADDITIONS**
President Riall asked that the following items be added to the agenda: (1) Request for Approval to Sponsor H-1B Visas (Codofil), and (2) Changes to Policy GCO (Rachal). Mr. Abrams explained that during the last meeting the issue was raised about board members needing to go to the superintendent to split out recommendations and this proposal for revisions offers board members two options – one is a modification of the current GCO which allows a board member to contact the superintendent or board president at least 24 hours in advance to remove a name or separate out the recommendations, and the second option states that the superintendent will list each recommendation individually and the board can decide if it chooses to group certain ones together. Dr. Dawkins explained that the H-1B Visas for the Codofil teachers is what the District has had in cooperation with the State for French and Spanish teachers.

Mr. Rachal clarified that there are two options being presented and Option 2 in his opinion would be the easiest way to address this, and if the board chooses to address all under consent, it can do so. He added that in the past it has been difficult on board members and the individuals, so he believes it would be the easiest way to address this item, addressing them as individuals. Hopefully, this option will eliminate some of the debate. Mrs. Crawley concurred with Mr. Rachal and added that Option 1 would be o.k., but sometimes recommendations are not known until 24 hours before the board is scheduled to vote. With the need to give the superintendent 24 hours notice, she would not be able to do that. She also reminded the board that she prefers to have the information for the work session and be able to address questions and concerns and then vote on the item at the board meeting. Mr. Abrams clarified that the board has a rare and unique occasion whenever it will not be able to approve a contract extension; because if a teacher is promoted to an administrative position, their contract must be renewed and extended unless there has been a mid-contract termination or an intent to not renew. If so, then the board would possibly face a tenure hearing. He also clarified that the issue the board addressed at the last meeting was a non-tenure teacher issue and there would not have been any additional discussion had it not been. Mr. Abrams explained that the only way the board cannot extend a contract is if there is a recommendation for non renewal; and then the board would possibly have to go through a tenure hearing. Promotions are different and Option 1 addresses that because promotions will always come up. Mr. Rachal further clarified and asked if Option 2 will no longer deal with promotions? Mr. Abrams said if the board approves Option 2 it will be required every time the superintendent makes a personnel recommendation for the board to go through the process of making the determination of whether or not each individual recommendation will be on consent; and a circumstance like last month would possibly only come up every couple of years because there is nothing else to fall in that category. He further stated the point is last month the board dealt with an exception and what may come up in the future may not be an exception, but the norm will be the board must renew the contracts unless the superintendent recommends not renewing them, and at that point the board will be faced with a tenure hearing. Mr. Rachal stated that the process of the board excluding someone was more difficult than having a complete list; and if there isn’t an issue with any, then they would all be on consent, and asked the superintendent his thoughts on Option 2. Dr. Dawkins responded that seeing this for the first time today, it seems that having an individual contract; however, he is only doing what has been done here for years. He further stated that what he doesn’t understand is the group of employees in this group would not require a tenure hearing, so how deep will it go? Mr. Abrams explained that under Louisiana Law, tenure in positions was eliminated (1980); and this means you could not remove them from a position once they received tenure in that position. When the law was changed in 1985 to require there would be no tenure in a position; but the District was required to give them a contract that looks a lot like tenure, with one caveat being that the contract would allow the employee to be moved wherever the District so choses, but we would have to continue to pay them in the position they were in when moved. Dr. Dawkins stated that his concerns are not so much about Option 2, but about whether or not the recommendation itself stands if there is no recommendation to terminate; and if there is no recommendation to terminate, why do we get into this. Mr. Rachal stated that in any event, he believes Option 2 makes it much easier for the board instead of singling one recommendation out, even if it does
only occur once every three to four years. Dr. Dawkins said his concern is if there is no recommendation to terminate then why does it need to be addressed by the board.

Mr. Ramsey requested addition of an item directing the superintendent and staff to change the mission of the Academic Recovery to include a General Education component as well as a component for Behavior Intervention, models similar to the Alexander Learning Center. He said he believes almost every board member has discussed this and he has talked with the superintendent about his thought that this would have happened with the creation of the Academic Recovery Center. He clarified this directive will be to add components and not eliminate Academic Recovery. He further explained that he is tired of battling whose turn it is to take an extreme behavior problem so they can be placed in another school and continue their pattern of misbehavior. Mr. Ramsey said he believes it is time to address the problem head on and if there is a better way of addressing this, he is for it; however, he believes it is necessary at this time to give the superintendent and staff clear direction to create a place to teach these students and hopefully turn them around. Dr. Dawkins responded that staff will include in the recommendation a clear cut intervention program for these students as well as a return policy.

Mr. Hooks asked that items “Changing the Process for Student of the Year” and “Take Home Cars” be added to the agenda. After clarification, Mr. Hooks agreed to remove Changing the Process for Student of the Year. Mr. Hooks asked President Riall if he understands correctly that at the next meeting the board will vote and not discuss? Mr. Riall responded that the work session is for questions and answers and debating the issue takes place during the regular meeting.

Mrs. Bell requested adding to the agenda an item on “A Districtwide Policy on Who Will be Able to Check Students Out From School”. She also stated that she believes this should also include school-based requirements and will work with the superintendent and staff for her backup. She also added “Research All Caddo Parish School Board Properties” requesting that the files be researched beyond the Caddo School District, and include files in the Court House.

Mr. Rachal asked the superintendent about the attendance lines previously discussed and put off because staff was looking at the entire district. He said at this time, if it is coming back to the board, he is willing to postpone; but if not, he wants to add “Correct Attendance Lines in Subdivisions along the Wallace Lake Road”. Ms. Trammel asked for further clarification, and Mr. Rachal explained that they are undeveloped at the back of existing subdivisions and instead of breaking up subdivisions, they have drawn lines the way they make sense; however, these subdivisions are extending their boundaries into these areas.

Mr. Pierson asked if he did not understand someone say that the questions were for the work session, and asked if it is possible to place an item on the agenda for the work session by calling Debbie in the superintendent’s office rather than waiting until the end of the work session to add it to the agenda? While there are many things that may be added to the agenda that are worthy, he believes it is important to have the information at the work session for the board to address and ask questions.

Mrs. Armstrong explained to Mr. Pierson that the practice has been when something is brought up during the work session, in the interim, a board member gets the supporting documentation to the board’s secretary to place on BoardDocs so the board members have the needed information prior to taking action on that item. Mr. Abrams explained board policy on this issue, and if a board member has an item on the agenda without any backup on the day of the work session, a board member can raise a point of order and state that it was not presented timely and to go forward, it requires a 2/3 vote for the item to be voted on; and if no point of order is raised, the item will move forward. He further added that the rule was put into place to insure that information does not come in late, and if board members add items tonight that do not have any
Mr. Rachal said this is something that was presented to the superintendent approximately 1.5 years ago, and the information being used on this item was presented to the board last month on the proposed attendance lines. He indicated he did call, but it was late in the day; however, the board did receive this information last month. Dr. Dawkins asked for clarification because student attendance boundaries is something the staff wishes to hold a work session on prior to the board taking action. Mr. Rachal said if that special meeting can happen before the next voting board meeting, he can agree with it; however, he believes this has been ongoing for too long and he has presented and removed it approximately three or four times. He believes it is time for this to be addressed. Ms. Trammel only wanted clarification about attendance lines in a field, which she believes is totally different from what the board is looking to address relative to changing district lines.

Ms. Priest reminded the board that it needs to get back on the redistricting item which is separate and apart from the attendance lines. President Riall confirmed that he will be contacting Gary Joiner and asking him to attend another meeting.

CONFIRM THE AGENDA AND CONSENT AGENDA FOR JANUARY 17, 2012

President Riall recommended the following items for the consent agenda: 6.05, 7.01-7.02, 8.01, 8.03-8.04 and 8.06. Mrs. Bell moved, seconded by Mr. Riall, to approve the agenda and consent agenda for the January 17, 2012 CPSB meeting as presented. Vote on the motion carried.

POLL AUDIENCE

Jackie Lansdale, Red River United and Caddo Federation of Teachers/Support Personnel, addressed the board on the proposed bond issue and her interest in speaking with the superintendent and board president to discuss ways they could support the bond issue, because at this time, it is very difficult to support as it stands. She stated she does not know when the Superintendent’s Advisory Committee is scheduled to meet, but she would love to see Mrs. Bell’s policy brought to that group for discussion and input. Mrs. Lansdale also offered congratulations to the three Caddo schools that will be participating in TAP (Green Oaks, Fair Park and Woodlawn), as the result of a million dollar grant that was written, and she believes this is an opportunity that all schools need to be a part of, citing the positive aspects of this opportunity.

Mike Miers, Caddo teacher, noted Mrs. Bell’s comment that teachers teach because they love it and are dedicated to it and that is his creed. Having been at Byrd High School for 31.5 years, he wanted the board to be aware that in 2012 he is actually making less money than he did a year ago. If asked how can that be, he would say taxes have increased, insurance went up and cost of living went up, but his salary did not. Mr. Miers stated that from the internal audit heard, it doesn’t appear that the system is operating that efficiently, and he is questioning the board asking the public, without a lot of information, to put their trust in the board to incur more debt. He stated his agreement that we need to follow the money and determine where it goes and where it is being spent, and use it more efficiently in all schools across the parish. Mr. Miers said he believes if we reduce waste in the parish, we will have a lot more money; and even if a bond issue is necessary, you would not want to risk doing so at the expense of the 17.3 mils up for renewal at a later date. He also shared that his wife is an assistant principal in DeSoto Parish and noted how they are addressing truancy with $50 fines.

Christy Payne addressed the board on truancy because she believes it is very evident that the board does care about the students and the District. She said of her four children, two are in
Caddo schools and she wants to be in the partnership with the School System. Ms. Payne noted that at Eden Gardens there is a cafeteria, gymnasium, auditorium combined and it is also one of the oldest buildings in the parish. She added that she appreciates the difference in the tone from six months ago and that everyone is coming together to address what needs to be done. She advised the board that they want to be involved in supporting this issue and will help get the word out about the pros for their school, and she will attend the meetings to work with the board.

**Adjournment.** Mrs. Bell moved, seconded by Mr. Riall, to adjourn. Vote on the motion to adjourn carried and the meeting adjourned at approximately 8:21 p.m.
The Caddo Parish School Board (CPSB) met in regular session in its office at 1961 Midway, Shreveport, Louisiana at approximately 4:30 p.m. on Tuesday, January 17, 2012 with President Steve Riall presiding and the following school board members present being a quorum: Jasmine Green, Carl A. Pierson, Sr., Charlotte Crawley, Curtis Hooks, Mary Trammel, Lillian Priest, Bonita Crawford, Barry Rachal, Larry Ramsey, Ginger Armstrong and Dottie Bell. Also present were Superintendent Gerald Dawkins, Legal Counsel Reginald Abrams, staff and visitors. Mrs. Crawley led the prayer and Pledge of Allegiance.

Ms. Priest moved, seconded by Mr. Hooks, approval of the minutes of the December 6, 2011, December 13, 2011 and January 3, 2012 CPSB meetings as submitted. Vote on the motion carried with Board member Armstrong not present at the vote.

PRESENTATIONS AND RECOGNITIONS

Superintendent Dawkins made the following statement: “Over the last two plus years, our staff has very thoughtfully and thoroughly identified the needs of our students from a facilities’ perspective. As you might recall, the Parsons’ Study, with input from the community, did identify over $400 million worth of improvements that are needed in our schools. The $133 million proposed bond is simply a way to address some of those needs without any tax increase to citizens. I am respectfully requesting that we not consider the bond issue tonight and consider it at a future time with the board of education’s approval.”

On behalf of the board, Dr. Mary Nash-Robinson recognized the following students/employees. The superintendent and the board president presented each with a certificate recognizing their accomplishment. Administrators, family and friends present were also recognized.

Character Education Week Poster and Essay Contest. The following students were recognized as grand prize winners in the recent Character Education Week Poster and Essay Contest. Bullying Prevention Grand Prize Winners are Emily Reid, 5th grade, Barret Elementary; Malik Keesee, 7th grade, Ridgewood Middle; and Emory Prothro, 12th grade, C. E. Byrd High. Character Education Grand Prize Winners are Adria Reedy, 1st grade, Arthur Circle Elementary; Isabel Penaless, 6th grade, Herndon Magnet; and Courtney Prestwood, 10th grade, C. E. Byrd High. Drug Prevention Grand Prize Winners are Fremecia Giles, 5th grade, Lakeshore Elementary; Isabel Penaless, 6th grade, Herndon Magnet; and Margaret Frautschi, 10th grade, C.E. Byrd High. Suicide Prevention Grand Prize Winners are LaDarius Lampkin, 5th grade, Lakeshore Elementary; Willesha McDonald, 6th grade, Alexander Learning Center; and Courtney Prestwood, 10th grade, C.E. Byrd High.

Superintendent’s Christmas Card Contest. The following students will receive a $100 savings bond as first place winners in the Superintendent’s Christmas Card Contest: Adreaunna Scott, 4th grade, Vivian Elementary; Sarah Kate Adams, 6th grade, Caddo Middle Magnet; and Donna Tran, 10th grade, Caddo Magnet High.

Woodlawn Athletes. Toshiro Davis, Woodlawn Leadership Academy, was recognized for being selected to play in the 2012 U.S. Army All-American Bowl, featuring the nation’s top 90 high school football players, on January 7, 2012 at the Alamodome in San Antonio, Texas. Christopher Robinson, also from Woodlawn, was selected to participate in the U.S. Army National Combine specifically designed to highlight football abilities and talents of today’s rising underclassmen and tomorrow’s future college and NFL stars.
A+PEL Professional Development Grant. Roslyn Davis, Counselor at Youree Drive Middle School, was recognized for being awarded a Professional Development grant valued at up to $500 for conference attendance and training. Mr. Keith Courville, from A+PEL, was also present for the presentation.

Master Gardener Grant. Maureen Barclay, Captain Shreve High School, was recognized as the recipient of the Northwest Louisiana Master Gardeners grant in the amount of $3,700. This grant will be used to fund the development of the Gator Explorer Butterfly Garden and Outdoor Classroom that will be used for scientific experiments, mathematical problem solving and inspiration for creative writing and poetry.

Educator Event at the White House. Mr. Marvin Rainey, Oak Park Instructional Coordinator, was recognized for recently being invited by the White House Domestic Policy Council to the White House to participate in a forum to discuss effective teaching and commending great teachers. Dr. Robinson announced that Mr. Rainey has achieved National Board Certification as well as receiving Teacher of the Year at Oak Park.

Ruby Payne Committee. Dr. Fredrick Pinkney, assistant principal at Westwood Elementary, was recognized for receiving certification to train administrators and teachers in working with students from low-socioeconomic backgrounds and improving academic performance in high-poverty schools while attending the “Understanding the Framework of Poverty” conference in Houston, Texas. He was also appointed by Dr. Ruby Payne, President/CEO of aha!Process, to serve on the company’s advisory board and work with experts planning conferences on furthering sustainable communities and addressing challenges of poverty in an effort to build high-achieving schools. Dr. Robinson announced that Dr. Pinkney was one of six appointees and the only appointee from the South. Dr. Pinkney was also a presenter at the conference as a result of increased test scores on the IOWA test at Westwood Elementary, with 2nd graders using the Ruby Payne Improvement Model. The results were the 2nd grade overall composite scores increased 34 points in one year.

State Department of Education Recognitions. Woodlawn Leadership Academy and Huntington High School were recognized for being awarded a Certificate of Accomplishment for achieving the High Priority School Honor Roll. This award recognizes the Top Ten high schools for Double Digit Growth in their Cohort Graduation Rate for the 2010-2011 school year. Woodlawn’s graduation rate grew from 49.8% to 63.8%; and Huntington’s graduation rate grew from 62.6% to 73%. Mrs. Moore from the State Department of Education was also in attendance.

As a point of personal privilege, Board member Green recognized the artwork on display in the board room courtesy of students from the Green Oaks Performing and Visual Arts High School art department. Cleve Arkansas is the art instructor at Green Oaks and Bennie Doty is the photography instructor.

VISITORS

Cleve Arkansas, executive vice president, Red River United, asked for the board’s support of the .4% sales tax increase on the agenda for the board’s consideration to give to the citizens. Mr. Arkansas stated that considering the last time Caddo employees had a pay raise, he believes the citizens will understand the need for this. He referenced the surrounding parishes allowing the voters to determine whether or not employees are given a pay raise, and encouraged the board to do the same in Caddo.
Daryl Roberson, president of the Caddo Association of Educators, addressed the board on the proposed sales tax increase for a Caddo employee pay raise. Mr. Roberson shared the definition of vision and visionary and that the Vision 2020 Strategic Plan sounds like one that is right for the students, employees, and the citizens of Shreveport, and one whose priorities are in the best interest of Caddo’s students’ education and safety. He reminded the board that the employees of the district have not had a pay increase in the last three years and this program ensures the future fiscal health of the district, and he doesn’t know of anyone that could be against this. After work sessions and community meetings, citizens asked for more clarity and specifics of the plan; but the board approved Vision 2020 with not much more than an outline and directed staff to move forward. He said he believes it is still a “straw plan” that is yet to be worked out so that all stakeholders in Caddo can know what the ultimate impact of Vision 2020 Plan will be. He doesn’t believe it has been fully thought out before phases of the plan have been implemented; and today Item 8.05 and 8.06 have been pulled and are yet another phasing in Vision 2020. Mr. Roberson said he believes in the beginning both items sounded good; however, there are still unanswered questions about these items. He added everyone can only hope that the resolutions were pulled and the board is not attempting to pull anything over on the voters in the April special election. Mr. Roberson said he questions if there is an attempt to put a spin on the bond issue that coupled with low voter turnout will help it to pass. He also questions if we have gone too far in areas such as capital outlay, centralization of students and staff to turn around in the middle of the road. He said the hard working employees in Caddo deserve a pay increase from the district that will help maintain their standing with neighboring districts without raising taxes above the district’s level. He asked if this is the right time to ask the voters, has the board thought about what needs to be done to move all of Vision 2020 forward so that all Caddo stakeholders, students, parents, administration, faculties and staff are knowledgeable or is it only someone’s unpractical and fantastic idea or scheme. There are too many questions.

Scott Hughes, Alliance for Education, stated it is sad to him that the conversation on education will end in a battle that seemingly pits those people for or against public education and labeled as pro teacher or anti teacher based on how they vote on specific taxes. Mr. Hughes stated that since this seems to be the rules tonight, he believes all rational arguments should be set aside that point out that Caddo schools already collect over 78 mils in property taxes, which is not only the highest in the state, but over 20 mils higher than East Baton Rouge and 30 mils higher than the State average. Mr. Hughes also reminded the board that none of the proposals being addressed today by the board address the pending renewal of over 24 mils of the current operation fund. Mr. Hughes also reminded the board that he has for the last two years attempted to point out the same thing the Finance Director has continued to bring before the board and that is a budget problem; and because his concern is in this area, he is being labeled as a non-teacher supporter. He also noted the proposal before the board tonight with the promise of increased raises for employees and trying to tell the employees the simple truth, which is that Caddo’s impending fiscal problem could mean a $25 million budget problem and a motion will be brought forward that a proposed budget should be presented in February to hopefully avoid having to hand out pink slips. He challenged the board to tell employees the truth before moving forward and address the current funding renewals. He said if the board cannot pledge tonight that there will not be any layoffs in the spring, then ask how is it fair to talk about new taxes for buildings and bonuses.

Jackie Lansdale, president of Red River United, Caddo Federation of Teachers/Support Personnel, asked the board whose side are they on, because at the last board meeting a number of board members addressed the importance of employee pay. Board members stated how unhappy employees were about the comprehensive salary plan and reminisced about the 1997 election when salaries were included as one of the six propositions presented to the voters. She reminded the board that it stated its concern in moving forward without addressing employee pay which was important to them because voters have not been asked to weigh in on salaries since 1997. Mrs. Lansdale noted that since 1997, the surrounding districts have gone to the voters for support
of their employees and now Bossier is doing it again. She said they realize that Bossier and DeSoto Parish have sales tax increments dedicated to employee salaries and benefits, as well as other districts around the state, and reminded the board that sales taxes are, in the purest form, regressive, but they are also the fairest because everyone participates and not just the property owners. Mrs. Lansdale also asked the board if it has confidence in the Caddo Parish School District and if it is worthy of asking the voters to demonstrate their support. She shared data of surrounding districts attained through the State Department of Education website and that according to last year’s data we have 4,917 high school students attending an A or B high school. Bossier has 3,450 high school students attending B rated schools. DeSoto has zero students attending an A or B rated school with their highest rated high school being a C+, which voters seem to believe is o.k. She further stated that the students in Caddo have the opportunity to attend all three of the schools listed, and based on the makeup of the student populations, she doesn’t believe it is a race issue. Mrs. Lansdale noted the medium incomes for citizens in each district, and how it is apparent that socioeconomics affects student achievement. She also noted other outside factors affecting student achievement, i.e. Dr. March, MOUs with the state, etc., and the fact that Caddo continues to offer a quality education for every child, and for this everyone should be celebrating. She said she understands other outside organizations/groups are working hard to destroy public schools; however, their organization stands ready to work with the board to give the voters the opportunity to support a pay increase for the employees and supporting public education; because if the education system is destroyed, so will the middle class.

Michael Myers, Caddo teacher, noted that during presentations and recognitions each month world class teachers and students are recognized by the board for their achievements and honors. He pointed out that Caddo has more students and teachers that have received honors which is an indication that everyone comes to school every day to do their best. He said the Caddo Parish School Board receives a 1.5% sales tax from the parish; Bossier receives 1.75% from Bossier Parish; and DeSoto collects 2.5% sales tax for their schools, and he brings this up because one of the speakers wants to know the truth; however, he is sorry to say that the truth has never crossed the lips of anyone at the podium and there are personal motives that will destroy Caddo Parish if the board does not do something to stop it. While the motives could be beneficial, he is a loyal Caddo employee; and he is concerned that the agenda of those that want the truth told and see it done, will place Caddo Parish in dire straits. He said that is something he would hate for the current seated board to be a part of and that is the public schools failing.

ESTABLISH THE AGENDA AND PROPOSED CONSENT AGENDA

Superintendent Dawkins presented the following items for the board’s consideration and the following discussion ensued. President Riall announced that Item 8.10 (Take Home Cars) and 8.11 (Districtwide Policy on Who Can Check Students Out of School) are postponed until February and the following items will be the Consent Agenda: 6.01 (with exception of Director of Special Services), 6.02, 6.05, 7.01-7.02, 8.01, 8.03-8.04, 8.07, 8.13 and 13.01. Mrs. Bell moved, seconded by Mr. Hooks, to approve the proposed agenda and consent agenda for the January 17, 2012 CPSB meeting as presented. Vote on the motion carried unanimously and the following is a summary of items approved by the board.

**Item No. 6**

**6.01 Personnel Recommendations.** The board approved on consent (with the exception of Director of Special Services) the personnel recommendations as made by the Superintendent and submitted via BoardDocs.

**6.02 Requests for Leaves.** The board approved the requests for leaves (certified and classified) as recommended by the Superintendent and included in the mailout.
6.05 Out of State Travel (General Fund). The board approved the requests for out-of-state travel from the General Fund budget as recommended by staff and submitted in the mailout.

Item No. 7

7.01 Bids (Purchasing). The board approved the following bid as recommended by staff and submitted in the mailout on the bid tabulation sheets: (1) RC Promotions, Inc., totaling $53,232.75 for the purchase of Music Department Uniforms for Caddo Magnet High. A copy of the bid tabulation sheets is made a part of the permanent file of the January 17, 2012 CPSB meeting record.

7.02 Bids (Construction). The board approved the following bid(s) as recommended by staff and submitted on the bid tabulation sheets: (1) Excel Energy Group, Inc., with a Base Bid, Alternate 1, Alternate 2 and Alternate 3, for the sum total of $838,000 for Project 2012-401 “Byrd Lighting Retrofit”; (2) Henderson Construction, with a Base Bid, Alternate 1, Alternate 2 and Alternate 3, for the sum total of $313,082 for Project 2012-097, “Caddo Heights Bus Loop”; and (3) ELA Group, Inc., with a Base Bid, for the sum total of $2,704,000 for Project 2012-109, “J. S. Clark Middle Conversion to Elementary”. A copy of the bid tabulation sheets is made a part of the permanent file of the January 17, 2012 CPSB meeting record.

Item No. 8

8.01 Special Education Interagency Contract and Agreement(C). The board approved the special education interagency contracts and agreements as recommended by the superintendent and submitted in the mailout.

8.03 Approval of Resolution of Assignment of Oil and Gas Lease. The board approved the resolution of the assignment of an oil and gas lease as recommended by legal counsel and submitted in the mailout.

8.04 Approval to Rename a Portion of the Youree Drive Middle School Grounds for Coach Tom Knox. The board approved the renaming of a portion of the Youree Drive Middle School grounds for Coach Tom Knox.

8.07 Sponsor of H-1B Visas. The board approved the request to sponsor H-1B visa applications/renewal/extension, as applicable, for foreign language teachers under nonimmigrant petitions.

8.13 Early Childhood Education Resolution. The board approved the resolution to petition LSBA to sponsor legislation that will provide early childhood education funding in areas of staffing, equipment and evaluation for state mandated programs as submitted in the mailout.

Item No. 13

13.01 Student Readmission Appeals. The board approved student appeals for readmission for C.A., C.E. (to remain at current school), J.G., L.H., Q.J., and C.T. as recommended by staff and submitted in the mailout. Parents are in agreement.

PERSONNEL RECOMMENDATIONS

Mrs. Crawley moved, seconded by Mrs. Bell, to approve the appointment of the Director of Special Services as recommended by the superintendent and submitted in the mailout.
Mr. Abrams explained that this is a personnel recommendation and while the recommendation cannot be discussed, the board can discuss procedures or ask questions about the vote. Mr. Hooks called for a point of order because he remembers a couple of months ago when he could not speak. Mr. Rachal, desiring to speak on this item, stated that he will not be speaking to the recommendation, and Mr. Riall recognized Mrs. Crawley as the maker of the motion. Mrs. Crawley stated that her reason for separating the motion is because she would have pulled all director positions, because at this time, she does not want the budget to be top heavy when the board begins planning next year’s budget. She would like for the board to wait on promoting people until we have a budget, because if additional layoffs are necessary, you can move these employees, but you cannot take away their salary. Because it was explained to her how critical some of these director positions are, she only pulled the one recommendation.

Mr. Riall asked Mrs. Crawley to clarify her motion and Mrs. Crawley explained that it is only to vote on the Director of Special Services separately. Mrs. Bell, as the second of the motion, asked to rescind her second. Mr. Abrams explained that there is a motion and a second to approve a staff recommendation and whether or not a board member will support in favor of the motion is irrelevant, so there is either a second or there is not motion. Mrs. Bell asked for clarification of the motion; and after Mr. Abrams’ explanation, Mrs. Bell seconded the motion. Mr. Hooks called for a point of understanding. Mr. Riall explained that the motion on the floor is to accept staff’s recommendation, even though the maker of the motion spoke against it. Mr. Rachal pointed out that he believes an item later on the agenda will address this.

Mr. Hooks asked if the board is playing favoritism since he had the same question about promotions a couple of months ago relative to procedure and he was not allowed to talk. Mr. Riall stated that we are following policy and Mr. Hooks said that it not correct. President Riall said he was requested by a board member to separate this recommendation and Mrs. Crawley has moved, seconded by Mrs. Bell, to approve the recommendation for this one position and it is now time to vote on the motion, and Mr. Abrams stated that is correct. Mr. Hooks said in his situation the superintendent was aware of his concern, but he was still denied the opportunity to speak and he calls this discrimination, not a racial discrimination, but a social environmental discrimination.

Ms. Trammel asked if the board is ready to vote on this item and Mr. Riall said as soon as there are no more speakers and she is the last speaker.

Mr. Riall reminded the board that the motion is to accept staff’s recommendation for Director of Special Services. Vote on the motion failed with Board members Green, Pierson, Hooks, Trammel, Priest and Bell supporting the motion and Board members Riall, Crawley, Crawford, Rachal, Ramsey and Armstrong opposed.

APPROVAL OF RECOMMENDATIONS OF THE INTERNAL AUDIT OF THE ENERGY MANAGEMENT DEPARTMENT

Mr. Ramsey moved, seconded by Mrs. Armstrong, to approve the recommendations of the Internal Audit of the Energy Management Department. Mr. Ramsey explained that he asked that this item not be on consent due to questions from board members regarding costs that may be associated with one of the recommendations and the need to establish an Energy Management Policy which is not what his motion is about. While we do need to establish an Energy Management Policy, Mr. Ramsey explained that the motion does not approve the spending of funds to establish that policy, but it could be a staff recommendation and is what he is looking for; however, he believes everything else should be approved and staff move forward with the exception of any expenditure of funds. Mrs. Armstrong concurred with Mr. Ramsey’s comments and that we do need to move forward with the recommendations at this time and wait on staff’s recommendations to approve other portions.
Mr. Rachal asked if he understands correctly that everything is being approved, but not any expenditures that may be attached to these recommendations and that understanding was confirmed.

Vote on the motion carried with Board member Hooks opposed.

CONSIDERATION OF ADDITIONAL SALES TAX FOR THE PURPOSE OF EMPLOYEE SALARY RAISES

Mr. Rachal called for a point of order because according to policy any item brought after the work session requires a 2/3 vote of the board in order for it to be on the agenda for consideration. Mr. Riall stated that is correct and Legal Counsel agreed that the item was added to the agenda, but Board Policy BDDC keeps information added since the work session from being considered if a point of order is raised by a board member and unless the board agrees by a 2/3 vote to consider it. If a point of order is not raised, the board can move forward and consider the item. At this time, it is necessary for the board to vote on whether or not the item can be considered and it will take a yes vote of at least eight board members to do so. Mr. Riall asked if discussion is allowable before the Point of Order vote and Mr. Abrams said no. Mr. Riall recognized Mrs. Bell who asked for clarification because the information was sent to board members on last Thursday and asked if she understands correctly that she cannot discuss a possible pay raise for the employees and to talk, she must have at least eight board members approve it? Mr. Abrams further clarified that if a board member has an item on the agenda without backup during the work session, and a point of order is called, the board must vote on whether or not the item can be considered by the board. Mrs. Bell asked if she understands correctly that eight board members have to vote yes that they want to hear her motion and discussion or she cannot talk about a possible pay increase for employees? Mr. Abrams said that is correct for now, but it does not mean that the item cannot be brought back at the next meeting. Mrs. Bell said she followed the rules and she hopes that the board will vote and allow her to address this issue.

Mr. Riall asked Mr. Abrams to what degree is discussion allowed on a point of order? Mr. Abrams said none, because the rule is the rule and it is a point on whether or not procedure is being followed and the policy is clear as to what you can and cannot do.

Mr. Riall ruled that he will allow board members to speak to whether or not the board will allow this item to be considered and not about the pay increase itself. Ms. Trammel asked if Mr. Rachal could share with the board his rationale for a point of order and if it is because we did not receive material prior to or at the work session; and since the board now has the information, could this item not be placed on the February agenda? Mr. Rachal stated that his point of order is the policy states very clearly that if there is no supporting information at the work session and it is brought to the board as an added agenda item, if a point of order is called, it takes a 2/3 vote of the board to allow it to be placed on the agenda and discussed. Mr. Hooks said this reminds him of when the millage was pulled from the agenda and there was not an opportunity to discuss it or ask questions, and he read what happened in the May 17, 2011 minutes.

Miss Green asked if this is discussed tonight, does the board have to vote on it tonight, and the board president responded if the board votes to allow the item to be on the agenda, then the board will discuss the item and vote on it.

Mr. Pierson reminded the board that at the work session, he asked how far in advance of the work session should an item and backup information be provided because Item 8.12 was added at the end of the work session. He said he was told by the board attorney and Mrs. Armstrong that information should be brought to the work session before or at the beginning of the work session. He encouraged the board if there is an established procedure, it needs to be followed.
Mrs. Crawford stated that if the board approves the item to be discussed and a motion made, a substitute motion can also be made to postpone it to another time. Mr. Hooks said he doesn’t have any problems if the backup information is available. President Riall stated that is what the board is attempting to determine.

Mr. Riall explained that the board will first vote on the point of order and determine whether or not this item can be considered; a yes vote will be to allow the item to be considered. **Vote on the motion failed with Board members Green, Pierson, Hooks, Trammel and Bell supporting the motion and Board members Riall, Crawley, Priest, Crawford, Rachal, Ramsey and Armstrong opposed.**

**REVISIONS TO CPSB POLICY GCO**

Mr. Rachal moved, seconded by Mr. Ramsey, that the CPSB approve Option #2 as presented by the Board Attorney on Policy GCO. Mr. Rachal read Option #2 and said he reports that he supports this option because if everyone is in agreement with the personnel recommendations, they can all be placed on consent; and if not, then it would not go on consent, which addresses the issues we have had in the past.

Superintendent Dawkins asked if there is a provision whereby the board can notify staff if there are any problems with any personnel appointment because staff spends a considerable amount of time attempting to put the right person in place and tonight is the first time he was aware that there might be a problem. Mr. Rachal said he is only addressing that the recommendations would come to the board as they always have, except each individual would be a separate recommendation rather than all recommendations in a group. Dr. Dawkins stated that he is only asking for something to be included that if there is a problem that there is opportunity for dialogue before it comes to the table. Mr. Rachal asked board counsel if it is possible to add wording to Option #2 that will allow for what the superintendent is requesting? Mr. Abrams said it is not because Louisiana Law allows that to happen, bring back recommendation after recommendation – the superintendent recommends and the board approves, and the board should not get in on recommendations at the front end.

Mr. Pierson reiterated his previous comments relative to the fact that the board does not observe or evaluate and it is up to the Superintendent to do this; and if he as a board member has a problem, he has the option to go to the Superintendent with his concerns. He said he has heard what the board attorney has said and the board should not be getting in on the front end of personnel recommendations, and the board should accept the Superintendent’s recommendations or not. He said if there is a problem, the board should go to the Superintendent.

Mrs. Bell asked about the rationale for bringing this motion since it is the Superintendent that observes and evaluates and she doesn’t understand why the board is wanting to ask the Superintendent to divide the recommendations on the agenda and address each one individually. She said she does not understand what the board is doing, because she sees that as possibly a violation of ethics when we tell the Superintendent who to hire and not hire.

Ms. Trammel asked why did we hire a superintendent? She said she feels like the board is overstepping its boundaries; and if the board is going to do the hiring and firing, there is no need for a superintendent and the district can save that money. She encouraged the board if it is going to redo policies, it needs to be done from the top to the bottom and it is necessary to determine exactly what the board is here to do beyond setting policy. She said it appears to her that this is about control and putting specific people in positions.
Mr. Hooks said he has never had a problem with who the superintendent recommends, but he has only had a problem with procedures and wants to make sure the process is fair and right.

Ms. Priest stated that one of her issues/concerns is the board needs to really understand about micromanagement and the creation of policies that will legally allow the board to micromanage. She said the board is not responsible for evaluating but one person and that is the superintendent. Board members are not in the classroom, nor do they observe and evaluate employees.

Mr. Riall clarified that Policy GCO has been in place since 2007, and the intent of that policy was if a board member had a concern or did not want a particular promotion to be on consent, they could call the superintendent or board president and they could remove a particular person/recommendation from the consent item. Mr. Abrams explained that Option #1 was added because the current policy did not include contract extensions, but only promotions; and the current policy also allows board members to contact the board president ahead of time so individuals are not pointed out in the meeting. Mr. Riall agreed it is true that board members do not have the opportunity to evaluate these individuals, and he believes the board is only approving or disapproving the superintendent’s recommendations. Mr. Abrams explained that the law states that one of the school board’s main duties is to make policy and also to hire and fire based on the recommendation of the superintendent. He said it doesn’t mean the board has to always accept the superintendent’s recommendation, and a superintendent can continue to bring back a recommendation as many times as he chooses until he has enough votes for it to be approved.

Mrs. Crawley stated that her issue is she is not always on duty 24 hours before the board meeting and may not know who is being recommended, but she wants the public to understand why she is doing what she is doing. She said this is not the first time a recommendation has been pulled, and reminded the board that during the budget planning, she asked that all Central Office employees be pulled off. Mrs. Crawley said she wants the superintendent to have the financial movement so when he presents a budget in February there isn’t any money tied up until the budget is in place. She said she prefers not receiving any recommendations that we would not need to shut down the system if we didn’t have a particular position filled, and she will continue to state this stand.

Dr. Dawkins reminded the board that it was proposed that these two positions be combined, and the board voted to go back to the two positions, adding a position back to the budget, and it is not clear to him what happened tonight.

Mr. Rachal stated that this policy has nothing to do with evaluating anyone at anytime by him or any member of the board; and he doesn’t care if the board chooses Option 1 or 2. What he is attempting to do is alleviate what happened earlier tonight, as well as a couple of months ago, and it will allow the possibility for the board to either vote on all of them on consent or vote on a separate recommendation by itself if a board member requests to do so. Dr. Dawkins stated that he believes either option will work, but there has to be a genuine feeling of the recommendation being made and not an opinion of someone else. If there is a problem, he would want to be contacted so it can be addressed before and not during the board meeting regarding a valued employee.

Mr. Rachal said he will agree to withdraw his motion and sit down with the board attorney and superintendent to determine if there is a way to address this issue. Mr. Ramsey agreed and withdrew his second.

Mr. Hooks said whomever the superintendent puts in that place will stand if they are the right person; and if they are not, they won’t stand.
Mr. Riall stated that many times this information is not available at the work session and it may not be available until shortly before the meeting; and he believes if the recommendations were available by the work session, it would allow time for the board to address any concerns. The superintendent stated that if self interest is being served, he will be glad to get the information to board members when asked.

DIRECT STAFF TO CHANGE MISSION OF ACADEMIC RECOVERY AND ADD GENERAL EDUCATION AND BEHAVIOR EDUCATION COMPONENTS SIMILAR TO ALEXANDER LEARNING CENTER

Mr. Ramsey moved, seconded by Mrs. Armstrong, to direct staff to change the mission of Academic Recovery and add General Education and Behavior Education components similar to Alexander Learning Center. Mr. Ramsey stated that there have been several questions and he believes it is necessary to put into place somewhere programs for these struggling students as well as address SPED students with behavior issues.

Mrs. Bell called for a point of order, because she has not seen any backup information on this item. She said it is being discussed and if she is going to be held to policy then everyone is going to be held to policy. Mr. Ramsey stated that the motion, and a second, is on the floor and discussion is in process. Mr. Abrams stated that the point of order should have been raised at the time the item was called; and Mrs. Bell stated that she did and Mr. Riall agreed she did but did not do so publicly. Mr. Abrams stated that in that case, there is a point of order. Mr. Ramsey said there is no backup material for direction to the staff to review and change the mission of a school, and the intent was to direct the staff to review and come up with an appropriate curriculum to address the needs of these middle school students. Backup information is the same as what is printed in the agenda item and additional information will have to be created by curriculum, special education, etc. to bring to the board for consideration.

Mr. Ramsey withdrew his motion, and Mrs. Armstrong the second, and requested that staff look at a way to change the mission of Academic Recovery and add General Education and Behavior Education components similar to Alexander Learning Center to address the needs of the middle school students that are causing behavior problems. He said this will allow the time to have the information for the next work session for discussion.

CORRECT ATTENDANCE LINES ALONG WALLACE LAKE ROAD

Mrs. Bell called for a point of order because there is no backup information. Mr. Rachal explained that at the last board meeting when he added it to the agenda he noted that all the information was presented and he was in agreement with the recommendation as presented by staff with the attendance lines. Mrs. Bell said she did not get the information and she will pull the minutes tomorrow. Mr. Abrams said Mr. Rachal did refer to the information provided by staff and he believes this complies with what is required. Mr. Rachal moved, seconded by Mr. Hooks, to approve as presented by staff the boundary lines proposed by staff and presented to the board in a particular area along Wallace Lake Road.

Mr. Hooks said he doesn’t believe any board member knows their district better than other board members, so he supports Mr. Rachal’s request.

Ms. Priest stated that her concern is she does not want the board to piece mill attendance zones when meetings are scheduled relative to the attendance zones and she would like to see the board approve comprehensive Caddo Parish attendance lines for the district.

Mr. Riall announced that a workshop on attendance lines will be held on Thursday, January 26, 2012, from 11:30 a.m. – 1:30 p.m.
Ms. Trammel asked Mr. Rachal if this is the area referred to as a field, because if so, she has some problems with her area and asked if these can be addressed at the work session? Mr. Riall stated that is what the board is voting on.

Mrs. Crawley called for the question. Vote on the motion to end debate carried with Mr. Rachal opposed. Vote on the main motion carried with Board members Green, Trammel, Priest and Bell opposed and Board members Riall, Pierson, Crawley, Hooks, Crawford, Rachal, Ramsey and Armstrong supporting the motion.

SUPERINTENDENT’S REPORT

Superintendent Dawkins announced he will meet with State Superintendent John White on January 29th regarding the Governor’s Education agenda and the possibility of more vouchers and charters in the state.

ANNOUNCEMENTS AND REQUESTS

Bonita Crawford announced that the LSBA Resolutions Committee met last week and approved a resolution requesting that the state cease unfunded mandates and that they fund current unfunded mandates. These resolutions will be voted on during the LSBA annual conference in March. Mrs. Crawford also reported that conversations indicate Governor Jindal and State Superintendent White will be working to do away with bus driver tenure; and if that happens, it is felt they will then go for teacher tenure. She also stated it is believed they are sitting on a list of 200 schools and a number of those are in Caddo.

Miss Green asked about the status of her request for books in the library at Newton Smith and if staff could work expeditiously to provide the much needed books.

Ms. Priest reminded the board and staff about the upcoming Legislative Session and the need to put together Caddo’s educational issues to discuss with the local legislative delegation. She also suggested that we expand the list and invite the two members of the Bossier delegation as both have been appointed to the Education Committee. Ms. Priest also recognized Caddo Parish Commissioners present in the meeting today.

Mr. Riall announced that in response to the board request in December that the CPSB hold a luncheon February 7th or 21st with the Legislative Delegation to discuss education related issues and that the board president appoint a sub-committee of three board members to work with staff to review potential education bills for the 2012 Legislative Session, as well as invite the Governor’s Policy Advisor on Education to meet with the staff and board prior to the session, Board members Bonita Crawford, Carl Pierson and Lillian Priest have agreed to serve in this capacity.

Mrs. Bell requested that “Consideration of Additional Sales Tax for the Purpose of Employees Salary Raises” be added to the February 21 agenda.

Mr. Hooks asked that the salary schedule for administrators in K-8 schools be reinstated to the proper salary range.

Mrs. Crawley asked staff about the status of information on the number of repeat offenders, how many are the same number and how many are new ones. She also stated that she continues to hear from teachers about the AB block and their inability to cover the information as it needs to be covered. She also asked staff to provide an update on the lack of textbooks for additional elective classes assigned to teachers.
Mr. Ramsey requested that the superintendent and staff change the mission of the Academic Recovery to add General Education and Behavior Education components. He also requested a time to meet with the superintendent to clarify direction in this request.

Mrs. Armstrong expressed her appreciation to Mr. Hooks for asking staff to address the inequity of the administrators pay at K-8 schools. She also asked that staff reevaluate the high school setting and possibly return to the 4 x 4 Block Schedule for next Fall Semester. She said she believes the 4 x 4 offers more positives than the AB Block Schedule and noted the many complaints received from teachers, parents and students.

EXECUTIVE SESSION

Superintendent’s Evaluation. Mr. Ramsey moved, seconded by Mrs. Crawley, to go into executive session for up to 10 minutes for the purpose of the Superintendent’s Evaluation. Vote on the motion carried and the board went into executive session at approximately 6:45 p.m.

The board reconvened in open session at approximately 6:56 p.m.

Adjournment. Mrs. Bell moved, seconded by Mrs. Armstrong, to adjourn. Vote on the motion to adjourn carried and the meeting adjourned at approximately 6:57 p.m.

_________________________________  ______________________________
Dr. Gerald D. Dawkins, Secretary   Steve Riall, President
The Caddo Parish School Board (CPSB) held a special work session in its office at 1961 Midway, Shreveport, Louisiana at 11:30 a.m. on Thursday, January 26, 2012 with President Steve Riall presiding and the following school board members present being a quorum: Jasmine Green, Carl Pierson, Charlotte Crawley, Curtis Hooks, Mary Trammel, Lillian Priest, Bonita Crawford, Barry Rachal, Larry Ramsey, Ginger Armstrong and Dottie Bell. Also present were Secretary Gerald D. Dawkins, and Reginald Abrams, legal counsel. Mr. Ramsey led the prayer and Pledge of Allegiance.

Superintendent Gerald Dawkins explained today’s meeting is for sharing with the board possible revisions in the schools’ attendance zones for students in an effort to balance the attendance in Caddo’s schools.

Chief Operations Officer Jim Woolfolk stated that staff has attempted to provide an assessment and recommendation of the needed changes in the high school attendance zones. Once the baseline of the high schools is designed, Mr. Woolfolk explained that feeder patterns of the middle and elementary schools will be matched to those high school zones. He also clarified that an attendance zone is the number of students living in that area and not the students enrolled in that school. Staff has data, but the purpose of this presentation is to focus on the enrollment possibilities of that school. Mr. Woolfolk explained that four basic criteria were used when developing the proposed changes that will create a seamless transition for the 7-12 configurations to enhance academic performance, maintain all high school buildings, appropriately utilize facilities, and place attendance boundaries on major roads.

Chief Academic Officer Antionette Turner stated that these proposed attendance zone recommendations will provide the district with an opportunity to positively impact student performance in all Caddo schools. She added that seamless transition means fewer changes for students in their learning environments; and research shows that fewer transitions does improve student achievement because students are not moving from school to school, they are more familiar with the school plant and classroom rules and expectations, students are able to make connections and build relationships with teachers, administrators and peers; and teachers will know more about how their students learn. Mrs. Turner said that the positive track record with the current K-8 schools reflects the importance of more stability and collaboration with students and parents, and the stability and collaboration with students and parents in Caddo’s 7-12 schools will also reduce the dropout rate and increase student performance.

Relative to maintaining all the high school buildings, Mr. Woolfolk stated that the direction was to do so and also correct utilization issues in those schools. He explained that no schools (high schools) were off lined and attendance zones were incorporated into the high schools to support seamless transitions as explained by Mrs. Turner. Appropriate utilization of facilities is best practiced at the national rate of 85% and Caddo’s staff recommends working with an 80-90% utilization rate; however, to do so, changes are needed to insure enough students are in each attendance zone to draw from. Because of population shifts, historically some attendance zones were not appropriately sized in order to maintain an 80% utilization; and allowing the 7th and 8th grades to be added to the high schools helped increase utilization. He also stated that attendance zones should be addressed once every three years since there is enough movement in the city and parish that can affect schools being able to maintain this 80% utilization factor. Mr. Woolfolk also explained that the current attendance maps do not clearly define boundaries accurately enough to defend if challenged by parents or citizens, and boundary lines were moved to the nearest road to allow boundary maps with a supporting text document.

Steve White, director of capital projects/construction, shared with the board the overall goal of the parish for modification of attendance zones, highlighting current and proposed attendance
zones for each high school and where each may gain or lose students in the effort to create the seamless transition for students as well as increase the numbers at each of the high schools allowing for better plant utilization, cleaned up boundaries and easily definable boundaries along major roads wherever possible. Copies of the maps were posted on the boardroom walls and provided to the board members. A set of these maps is also filed in the official record of the information for the January 26, 2012 board work session.

Mr. Woolfolk added it is recommended to grandfather the current students in and not ask a student already at one school to change schools, but allow that student to complete high school at the school he/she is in with new students coming in following the new attendance zone. Dr. Dawkins reminded the board that these are attendance zones and staff has made adjustments to increase or decrease these attendance zones (and not enrollments).

Following staff’s presentation, discussion ensued with board members having an opportunity to ask questions about the proposed changes in attendance boundaries.

Mr. Hooks asked staff to explain how it determined the number of students living in each household, and staff explained that they worked with transportation and the Edulog software which includes every student in Caddo schools and the household where they live. Mr. White added that it does not take into consideration any student in Caddo that is attending a school outside the Caddo District (private schools). Mr. Hooks stated that information is incorrect, because he was told in the summer that Milton would be his drawing line and those living North of Milton would go to BTW and those on the Southside would attend Fair Park. He further stated that staff is now saying Penick and Jackson; and he doesn’t know if it is the school (Fair Park) or him being picked on, but ever since he has been on the board he has had to fight for Fair Park while staff has been fighting to close it. He said Fair Park needs teachers and classrooms, and it has become personal to him when what is being done affects the students. To him, this is social environmental discrimination. In checking these homes, he noted that letters went to parents this past summer notifying them that their children would attend Booker T. Washington and he is tired of being lied on and lied to. Mr. Hooks said he had a list of approximately 100 students and went to each home and some of the homes had no one living in them. He also stated that he met with Dr. Dawkins about the list and was told that the list was not to be out, and he would look at it; but he does not believe he did because people were still calling at the start of school about the letters. Dr. Dawkins responded that under this plan, Fair Park gains students and all the high schools will grow, and staff gets these numbers through census information and determines the numbers to the best of its ability. Mr. Hooks said he is being realistic and he knows his district, and the people that are trying to be taken from him, he needs and he will not give up anything. Referencing thoroughfares, Mr. Hooks noted that those living on the North side of Lakeshore Drive can go to Booker T. Washington and those living on the South side of Lakeshore Drive can attend Fair Park. Mr. White said staff did look at this; however the lines were drawn so as not to put any undue burden on Fair Park by being overutilized. At the present time, he said Fair Park is at 95% utilization with the enrollment at 1,071, which exceeds the 85% proposed; so if the attendance boundary is moved further North, the number of students picked up would move Fair Park above its capacity and create the need to look at additional structures. Mr. Hooks said his teachers at Fair Park do not mind teaching in a shack as long as they have students to teach. Mr. White again stated that staff’s intention when looking at the attendance population and the students was to modify and provide more students within the attendance boundary the opportunity to attend their neighborhood school. Dr. Dawkins also reminded everyone that Fair Park does not lose any students under this proposal and the pool to draw students is larger. Mr. Hooks said he doesn’t see that, and asked about the gain of 590 7th through 12th graders and the loss of 82 9th through 12th graders, because he believes today’s information is different. Mr. White responded that the numbers do change somewhat on a daily basis because the Edulog software is updated daily as students move throughout the district. He also stated that it took staff weeks and months to look at the information and various scenarios,
so he doesn’t believe the board can get a static picture and complete this review in one afternoon; but staff believes the information provided is as accurate as it can be at this point. Mr. Hooks asked if, when he first came on the board in 2010, Fair Park was scheduled to be closed? He said at one time there was a magnet coordinator for the Medical Careers Program and that person left and was never replaced. He said he believes the reason for not getting another person is because an attempt is being made to close Fair Park. Dr. Dawkins again stated that Fair Park will gain students in the scenario presented as the board voted to not close any high school. Mr. Hooks stated that because the community spoke out, the board voted to keep Fair Park open, and he believes if they had not spoken out, Fair Park would have been closed along with West Shreveport and Central. The community is not willing to give up these streets and he asked the superintendent if he is aware of where McCutcheon Street is located and the superintendent said he is and that it is in that school’s attendance zone. Mr. Hooks continued to ask the superintendent if he was aware where specific streets were located and the superintendent responded that he did not understand the question being asked. Mr. Hooks responded that he doesn’t understand how staff can propose taking streets from him without knowing where they are located. Mr. Hooks also asked about the streets from Queensborough that are now routed to Booker T. Washington? Dr. Dawkins said he does not have a street map in front of him, but under the scenario presented, even though losing some students, Fair Park is gaining additional students. Mr. Hooks stated that he cannot see it and he will not fall for it.

Mr. Riall explained that the board will debate the item at the February board meeting; but the meeting today is for the purpose of staff presenting information. Mr. Hooks said he is attempting to get some facts. Mr. Riall reminded Mr. Hooks that there is only one hour and 10 minutes remaining in this scheduled work session and there are numerous other board members wishing to ask questions. Mr. Hooks said he got out of his sick bed to come to this meeting and he doesn’t care if the board stays until 8:00 because he wants answers before he leaves.

Mr. Hooks asked about the intent to enhance academic performance and how can we do this when we continue to put AU students with AU students. Mr. Woolfolk stated that academics addressed this and reiterated the basic theory that if students are brought to that principal in the 7th grade and they have that many years to know the students, the parents, the tendencies will all be a better learning environment for all the students and provide consistency of learning, and at the same time hold principals accountable as to how they track the students over that period of time. Mr. Hooks asked if he understands correctly that the drop out rate for Fair Park is far better than it has been for a long time; and he asked if these students are moved, take the streets from him, the drop out rate will increase since they nor their parents want to go to Booker T. Washington? He said he lives in Booker T.’s attendance zone and knows what he is talking about; and the superintendent has only been here three years. He added he would not have sent his students to Booker T. Washington High School if not for Touissant Battley, and he doesn’t believe students will attend BTW. Mr. Woolfolk explained that when saying attendance zones, staff is saying “possibilities”, and the principal should go into these areas and talk to the parents about coming to their school. Mr. Hooks noted that he has ridden these streets with Mr. White and asked about the commercial businesses located from I-49 west along Kings Hwy (LSU, Shriners Hospital, Feist Weiller, drug store, etc.). Mr. White explained that is the existing attendance zone for Byrd High School. Mr. Hooks said he understands and again asked if in talking about attendance are we talking about students attending the school? Mr. White said that is correct and Mr. Hooks asked where will he get students from the area that is commercial businesses?

Mr. Riall again stated that it is necessary to surrender the floor from Mr. Hooks and move on to the next board member, and Mr. Hooks stated that the board president did not state a time limit and he believes the board president is out of order. Mr. Riall stated as president, he is running the meeting and as president that is his privilege. Mr. Hooks stated board members should have been given a time limit for speaking.
Mr. Abrams explained that the meeting was scheduled for two hours and if you divide that time by 12 board members, that is approximately 10 minutes for each board member, and Mr. Hooks has passed that time. He also stated that Mr. Riall as board president and being in charge of the meeting makes the determination on how much time; and if he wants to make a ruling, he can do so. Mr. Hooks asked that it be put to a vote and Mr. Abrams reminded him that the board cannot vote in this meeting. Mr. Hooks said if he can’t make a motion, he can talk and no one can keep him from talking because it is his freedom of speech. Mr. Abrams added that the board president is operating the meeting and every other board member present works with the discretion of the board president. Mr. Hooks said he has two more questions to ask, and then the others will get their opportunity to speak. Mr. Abrams explained that the board president makes that determination and if the board president states it is time to move forward, then he has the ability to do so. Mr. Hooks said he is not accepting this and he doesn’t care how others want to take it.

Mr. Ramsey asked about the loss of the 123 students for Southwood and that he has been clear in discussions with the superintendent and Mr. White regarding the Inner Loop being the northern boundary; and since he does not see this adjustment, asked that staff consider this revision. Also in the loss of the 123 students, he believes the subdivision plat and streets are clear and he would like to see these back at Southwood since he does not believe Southwood can stand losing 100 students. Mr. Ramsey stated his understanding about grandfathering in students and changing the attendance lines; however, he believes it is imperative that the attendance problems are corrected and that the many out-of-district transfers addressed before anything else is done, because there are too many out of district students.

Mrs. Crawford asked that staff look at leaving the lines for Byrd and Captain Shreve and not changing it as this is a battle we do not need to fight. She also stated her agreement with Mr. Ramsey and if these students are rezoned, BTW is the only school that remains in Choice, and she does not see taking from one school to give to another. Mrs. Crawford stated that she believes we are allowing students to leave schools, and in fixing the line, she thinks we are only adding another problem, and asked what will be done to the program to entice these students to stay at BTW. She said there are other issues that need to be addressed at the same time. Mrs. Crawford stated that she would like to know how many students from other attendance zones attend BTW.

Mrs. Crawley agreed with Mrs. Crawford since she knows the persons in her district that live on that street. She asked how will everyone be notified, because she is looking forward to a school year that begins without any turmoil. In grandfathering in students, Mrs. Crawley stated that she had someone live in her district and all three students in the household were told they would be attending three different schools, and she believes splitting up families is an issue, asking if the students in the area highlighted are in J. S. Clark or Broadmoor, and she encouraged staff to provide a complete package with all the schools being affected. Mrs. Crawley said she would also like to get some parent feedback and she doesn’t necessarily want to see this next school year; and she also agrees that issues in attendance need to be addressed. Mrs. Crawley asked for clarification and if BTW will continue to offer Choice next school year and staff responded that we will not know until test scores are released.

Ms. Priest stated that other than Mr. Rachal, she is one that does not have a high school located in her district; however, the proposed attendance zones, as well as the existing zones, will provide students from her district to six high schools. She said she is happy to see the growth in the populations for the neighborhood schools which is one of the major discussions during the reconfigurations, because of the schools’ capacities. With the ideal capacity for a school being 85% in order to justify keeping them open, she believes this proposal allows for the inner city schools’ enrollment to increase by over 3,237 students. Ms. Priest also stated that the board recently received the student assignment processes and policies handbook and it is important that
the policies in this book relative to the various types of transfers are adhered to in order to insure that students are not leaving and/or transferring out of schools they are supposed to attend. Regarding Choice, Ms. Priest said it is her hope that students cannot Choice out of their neighborhood schools in the coming school year. She also stated her agreement in looking at the major thoroughfares as boundaries. Mr. White shared information on the utilization of the new 7-12 configurations and how these schools were underutilized prior to this change.

Ms. Trammel stated that she believes, without citizen and parent feedback, there will be many problems when enrolling students in school. She asked if she understands correctly that with Woodlawn being under School Improvement, do we not have the Choice to keep those students at Woodlawn. Knowing that all parents attempt to provide the best possible education for their children, and that Caddo attempts to provide the best possible education in every Caddo school, Ms. Trammel said while that is the District’s intention, sometimes we may fall short of that goal. She asked about the attendance boundary for Woodlawn and asked staff to look at the proposed 109 students Woodlawn will lose to Fair Park and determine if that is where the parents want the students to go, since there could possibly be some problems with some of these movements of students. Ms. Trammel said she believes it is important to get information to the parents and conduct open meetings for them.

Mr. Pierson stated his concern over how negative everyone can be about change when parents are looking to the board for leadership. He said his comments are not so much about the proposed plan as they will be about the board’s focus and what it should be doing to be positive and forthright. He said he would never say what he might think about another school in Caddo Parish because the board’s job is to provide every child in school with the best, most comprehensive education possible. Mr. Pierson said he believes this proposal gives the board the opportunity to do just that and pointed out that every child cannot attend Byrd or Captain Shreve, and he believes there are probably those people that have never been to Booker T. Washington nor visited a classroom and they are portraying a negative impression that the children do not get a quality education. He added if a student is not doing well at a school and they transfer to Byrd or Shreve, there are no statistics indicating that they improve by making the transfer, but everyone assumes they are doing better. He stated that teachers all over the parish are teaching to the very best of their ability and the board needs to be positive despite the difficulty of change. Mr. Pierson noted the opportunity this plan has to track students who may have chronic absenteeism, health issues, or other issues and make a difference in students’ lives.

Miss Green stated her agreement with her colleagues, but asked staff to look at moving her boundary line East rather than North. She said she believes the students in that area will be attending Donnie Bickham and Northwood anyway and would like staff to look closer at this. Mr. White further explained that the lines were drawn in a way so that boundaries were not in the middle of a field in the event neighborhoods were added, so there was some sort of street designated as the boundary and providing a definitive line.

Mrs. Bell stated that she has no problem giving the 123 students back to Southwood High School because in the original plan approximately 60 of these 123 students went to Southwood and the remainder went to Byrd, Captain Shreve, Magnet High, Huntington and Hamilton Terrace. Mrs. Bell said lines can be drawn over the next 24 years and parents are still going to use excuses for their children to attend schools other than their neighborhood school. She stated students are attending schools outside their neighborhood for false reasons, and it will never be possible to get the enrollments up in these schools. She stressed the importance of starting with the policies being implemented in the Attendance Department because issues grew when magnet components were added at all the schools. While she agrees with Mr. Pierson, she believes there are board members that have not visited BTW or even the Law Program at Huntington High School, but are busy putting out the perception that certain schools are the best schools. She encouraged all the high schools to hold open houses and encourage parents to visit and observe what each of
Caddo’s high schools has to offer students. Mrs. Bell stated she believes the proposal is a good proposal and asked the staff and board to put the history together and sit down and discuss the attendance issues that need resolved and encourage those who are making the rules and laws to take time to walk in the teachers’ footsteps for a day and observe Caddo’s good teachers and the great job they do with the limited funds available.

Mr. Rachal thanked staff for the good report and asked staff for a copy of the information presented in the powerpoint. He also requested that staff provide him with the number of students for each school going in or out for Choice, M to M transfers, or Magnets. Mr. Woolfolk responded that staff has the numbers through last year’s data. Mr. Rachal also stated his agreement with Board member Pierson’s comments relative to the changes in demographics that we have no control over, and it is now necessary to address this issue. He also agreed that this must happen and how the board addresses it and presents it to the public determines how it will be received by the public. Mr. Rachal also requested information on the feeder schools for each of the high schools, if each of the high schools qualify for Choice, M to M, etc.; and for every box showing the number of students gained or loss to include where the students were gained or lost from. He also stated that making these needed changes will provide for a better utilization of Caddo’s facilities, which in turn is using tax payers’ dollars wisely.

Mrs. Armstrong asked that staff look at the area of Williams Road/Russ Lane in the Keithville area and consider students in this area attending Southwood rather than Huntington. She said she believes these students are actually in closer proximity to Southwood versus the longer travel pattern they must daily travel to get to Huntington. Mr. White explained that staff in looking at the proposed lines attempted to look at a describable road and impact the community as least as possible. Mrs. Armstrong stated her understanding; however, she only is asking that these things be considered as we are looking at making changes and possibly make students travel time less.

Superintendent Dawkins thanked the board for its feedback and staff will take it and the questions and look further at the proposed revisions to school attendance lines.

President Riall expressed appreciation to the staff for their efforts in the presentation and the work session adjourned at approximately 1:30 p.m.
February 7, 2012

The Executive Committee of the Caddo Parish School Board (CPSB) met in regular session in its office at 1961 Midway Street, Shreveport, Louisiana, at approximately 4:30 p.m. on Tuesday, February 7, 2012 with President Steve Riall presiding and Dottie Bell and Larry Ramsey present being a quorum. Other school board members present were Jasmine Green, Carl Pierson, Charlotte Crawley, Curtis Hooks, Mary Trammel, Lillian Priest, Bonita Crawford, Barry Rachal, and Ginger Armstrong. Also present were Superintendent Gerald Dawkins, Legal Counsel Reginald Abrams, staff and other visitors. Mr. Hooks led the invocation and Pledge of Allegiance.

PRESENTATIONS

Presentation. President Riall and Board member Armstrong, on behalf of the CPSB, presented Board member Lillian Priest with a bouquet of roses and a plaque in appreciation for her leadership and service as president of the Caddo Parish School Board for 2010 and 2011.

Redistricting Plan. Dr. Gary Joiner stated that all board members have seen the plans brought forth with Board member consultations and reminded the board that many of the districts will not change, they all have strengths and weaknesses and the Board should be in a position to vote at its next meeting and move forward with presenting it to the Department of Justice and the Courts. From this point, he explained the Board will vote on a plan, place the plan before the public to allow for input, make any additional changes needed to be made and approved by the Board, submit to the Department of Justice and wait for the Department of Justice (60 days) to examine and get any clarification if needed. Dr. Joiner also added that the final plan cannot be completed until the board votes on a plan; however, in the mean time, he has begun to gather necessary demographics from staff. Following board approval, the plan will be submitted to the Department of Justice (after public input); and then Justice has 60 days to examine, and based on past records, Justice is not taking the full 60 days to complete their review. At this point, Dr. Joiner said if they do not have questions, they will submit a letter of pre-clearance and new district lines will take effect at the next election.

Ms. Priest asked Dr. Joiner if any changes have been made to the original plans submitted to the board as a result of individual meetings with board members? Ms. Priest suggested that the proposed maps be placed on Caddo’s web site as soon as possible so board members and the public can begin reviewing them. Dr. Joiner added that the board will have the variations in a PDF format and Technology can place it on the web site. Ms. Priest inquired of Dr. Joiner if the final plan was “Plan 10 or 12”, and Dr. Joiner said he believes it is Plan 12 with variance. He also explained that there will be a map of the entire parish and there will be an inset map showing how each district is affected. He also shared that most board members’ attendance lines did not change from what was presented approximately one month ago.

Mrs. Armstrong expressed her appreciation for Dr. Joiner’s depth of work in meeting with each CPSB member.

Mr. Rachal asked for a map showing the current plan (Dr. Joiner said that is Plan 1), additional plans that have or will be submitted, precinct numbers as they currently are and what the proposed new precincts will be (Plan 1 and the final Plan). Dr. Joiner explained that the intermediate numbers two through the last plan are “what ifs”; and when there is something the board members are all in agreement with, it will be important to have one map; and since there are multiple plans on the table, he asked if Mr. Rachal wants the composite for each list. Mr. Rachal clarified that he would like it for himself, and it is up to the board if they want the information. He also said he doesn’t know if all the plans are needed and only desires to have the beginning and the final plan approved by the board.
ESTABLISH THE AGENDA FOR THE FEBRUARY 21, 2012 CPSB MEETING

Superintendent Dawkins highlighted items for the board’s consideration at the February 21, 2012 CPSB Meeting and the following discussion ensued. Dr. Dawkins asked that 7.02 Sale of CPSB Properties be removed from this agenda in order to review some appraisal numbers.

Piggyback on Playground Equipment Bid. Mr. Rachal asked for further clarification on this item and Tim Graham explained that it’s a request from the City of Walker to piggyback on a bid that Caddo already has in place – Caddo is not purchasing any playground equipment at this time. Mr. Rachal asked staff for clarification on how and what happens in a request like this. Mr. Graham explained that it is because of the volume of what Caddo does, they desire to purchase off Caddo’s bid for playground equipment and state law allows this. Mr. Rachal asked if he understands that a city in South Louisiana could not find anyone to work with on a bid for this equipment and they contacted us. Mr. Graham further explained that it is possible that the company they were working with told them about Caddo’s bid that they could piggyback on. Mr. Rachal asked if, other than a friendly long-distance neighbor, we get anything in return. Mr. Graham said no, but this is standard. Mr. Rachal said if they don’t get the message, he believes the board at least deserves a thank-you letter. Mr. Graham further clarified that Caddo gets several piggyback requests throughout the year from across the state, depending on the vendor a district might be working with. Ms. Priest added that this has been done on numerous occasions and piggybacking on textbook orders is one opportunity that is bid in volume and several districts want to take advantage of this opportunity.

Approval to Seek Legislative Authority for Up to ¼% Sales Tax Increase with Voter Approval. Mrs. Bell explained that she brings this item at this time because nothing has changed since 1997 when the board was faced with the same issue as today relative to upgrading school facilities and implementing employee pay raises. She referenced an article in the newspaper during that time on the importance of well paid teachers and good facilities in education. Mrs. Bell stated that in 2012 we are at the same place and no one has made a concerted effort to find a solution and that is why she is bringing the proposal for a sales tax increase earmarked for pay raises and benefits for Caddo’s dedicated employees. Mrs. Bell also referenced an article in the paper on Monday written by the BESE representative from District 3. She explained that she is asking for less than a penny and it will be paid by every citizen on any purchases made. She added that Bossier’s tax rate is already at 9% on every dollar and Caddo’s is at 8.6% with 1.5 going to education and reminded everyone that when they shop in Bossier, they are already paying 9% for Bossier and she believes if it is good enough for Bossier students, it is good for Caddo’s students. Mrs. Bell further explained that this ¼% sales tax increase will generate $20 million annually and will help Caddo attract quality teachers as well as keep the ones we have.

Mr. Abrams explained that when Mrs. Bell introduced the idea of a sales tax increase last month, it was not possible to move forward with how everything was designed at that time; because the maximum for any school board is 9% in any part of the parish, excluding any law enforcement district taxes of 3.5. He said without special legislation, all areas did not have the capacity to increase sales tax and explained proposed tax increases on the April 21st ballot by several entities. Mr. Abrams further explained that at this time and based on the circumstances, the board could not do a raise in the proposed method and if the board wants to use the funds for employee pay raises, it is possible the entire district will not be paying for a teacher pay raise, which could be a problem. He said in order to get some capacity, it is necessary to go to the Legislature and request a motion that would give the district special legislation to have the ability to propose the ¼ cent when it decides to do so. Mr. Abrams said if the board votes in support of the item, the board is asking the Legislature to go forth with a potential ¼% sales tax increase with voter approval.
Mrs. Bell noted that since the Town of Ida has already exceeded the maximum sales tax that can be levied, they would have to be excluded from any increase being sought. Also, with North Caddo seeking approval of a 1-cent sales tax increase; if approved, it will put them over the maximum and North Caddo would also be excluded. He added this will include Oil City, Vivian and possibly Mooringsport; and he believes it will spur legal action, because someone will say Ida (for example) is not paying their portion. She encouraged the board to consider approaching our Legislative delegation and doing something rather than nothing, because once it comes back from the Legislature, it will be the public that decides.

Mr. Hooks stated that he looked up the definition for tax and it means to lay a heavy burden on, a strain placed on citizens by the rulers; and he doesn’t have any problem giving teachers raises, and has been trying to get them a raise, but not off the expense of their backs. He stated that he has family members that work for the system and he cannot support this, and encouraged board members to think about those that have retired and have not received a Cost of Living increase. Mr. Hooks referenced the headlines in The Times regarding GM closing and how those losing their jobs, as well as the ones Caddo laid off, will be affected. Mr. Hooks also referenced the Governor’s proposed education plan and how he believes we are in trouble with this proposal. Even though he applauded Mrs. Bell for her efforts to give the employees a raise, he doesn’t believe it is a good time based on the economy being down. He added he does believe the system has enough money to give the employees a raise, and referenced the meeting where Mrs. Bell asked the superintendent to clarify that the board will not be asking the public for a bond issue for a while and the superintendent said there are issues that need addressing prior to going to the public, i.e define an accurate number for meeting the needs of the district. Mrs. Bell also stated her agreement with Mrs. Armstrong’s comment that sometimes there are things that can be changed without going to the public with a bond issue. Mr. Hooks also stated that he asked Mr. Lee in a meeting last May, 2011 about the millages and Mr. Rachal’s agreement with the recommendation and will not vote for a roll forward. Mr. Hooks also asked the superintendent if the district will be experiencing another layoff, especially teachers? Dr. Dawkins stated that it is not expected and the initial budget will be presented to the board on February 22nd. Mr. Hooks asked if the board was not supposed to have a budget at today’s meeting? Mrs. Bell called for a point of order because the discussion is on the sales tax, not a bond or a budget, and asked the board president to keep the discussion regarding the item. Mr. Riall stated that this is a work session for questions about agenda items and at the voting board meeting, there will be an opportunity to debate the issues; and he encouraged board members to confine their comments to questions about the specific agenda item. Mr. Hooks asked about the comment on May 12th that it included a pay raise for everyone, and asked if this proposed pay increase is for everyone? Mrs. Bell said it is, and Mr. Hooks said he believes the board will look crazy and as though it is trying to fatten the pockets of those at Central Office, and he doesn’t believe it is fair to ask the public to do this. He also noted that he has pleaded with everyone; and since being on the board, he has asked the superintendent about raises for the employees.

Change in Mission of Academic Recovery to Add General Education and Behavior Education Components Similar to Alexander Learning Center. Mr. Ramsey stated that he has met with the superintendent regarding this item and asked that it be placed under the Superintendent’s Report.

Proposed Revisions to School Attendance Zones. Dr. Dawkins announced that updated maps showing revised proposed attendance zones have been provided to the board members. Mr. Hooks announced that he asked for this item to be pulled and the superintendent explained that it is the president’s prerogative to pull the item. Mr. Hooks noted minutes from the May 17, 2011 meeting during which Mr. Rachal inquired of the superintendent if anyone calls and requests an item be pulled/postponed, is that request granted? He said that the response was if a board member asks to pull an item, yes, and it has been done in the past. It was also noted that this
item did not have a name beside it, and he requested that the item be removed and discussion not take place on this item. Mr. Riall asked board counsel to clarify this situation. Mr. Abrams explained that the superintendent has placed an item on the agenda for the work session; however, it is up to the executive committee to allow or not. Mr. Hooks said the item (discussion) he is referencing is the May 17, 2011 meeting and Mr. Abrams noted that would have been the regular monthly meeting in May. At this time, Mr. Abrams further explained that the superintendent has placed this item on the agenda, and he can take it off or another member of the executive committee can take it off. After the work session is complete, if a board member desires to remove it, any board member can request that it be removed from the agenda and a decision will need to be made relative to when it will come back. Mr. Hooks said it appears to him that there are different rules for different players. Mr. Abrams again stated that this occurred at a regular meeting. Mr. Hooks asked if the next meeting February 21st is actually a board meeting and if he can pull it at that time? Mr. Abrams explained he can request that it be pulled, but once it is on the agenda, it is at the president’s discretion and if the superintendent wishes to pull it. Today, a board member can ask that an item be removed from the agenda, but reminded Mr. Hooks that he is not on the executive committee, and it is the executive committee that sets the agenda. Mr. Hooks asked other board members if they recall this action being questioned and encouraged others to refer back to the minutes and the action regarding rolling the millage forward. He further stated that it was this action that made him feel like his right to vote on that item was taken from him. Mr. Hooks said it is appearing to him that only certain people can pull items and Mr. Riall asked was that action at a voting meeting and not a work session? Mr. Abrams again reminded the board that once an item is placed on the agenda, it is the board’s and not an individual board member’s item; and if a board member has in the past called and removed an item and got away with it, it is something that should not have been done. Mr. Hooks stated that he believes games are being played when some people can pull something, but others cannot and he does not believe this to be fair. Mr. Hooks further read dialogue from minutes in May 2011 about an item being postponed and a board member not aware until showing up at the meeting leaving the board with no choice.

President Riall stated that since this is the superintendent’s agenda item, he can pull it if he wishes to do so, the same as Mr. Ramsey pulled an item earlier. Mr. Hooks asked who works for who, does the superintendent work for the board or does the board work for the superintendent? Mr. Riall responded that the superintendent works for the board, but it is his agenda item. Mr. Hooks stated that it seems that the superintendent is over-riding the authority of a board member. Mr. Riall reminded Mr. Hooks that a board member has no authority, but only the board collectively has authority. Mr. Hooks said he has an authority to his district, and it seems that only certain people can do this, and when others try it, they can’t. Mr. Riall said the item is on the agenda and he is leaving it on. Mr. Hooks said we are already in the situation we are in because of the superintendent; and it bothers him that he can’t do this and others can. Mr. Riall stated that this is an executive committee meeting and basically the only ones here are himself, Mrs. Bell and Mr. Ramsey. Mr. Hooks asked Mr. Riall why are the other members of the board present? Mr. Riall responded that it is a work session so board members can ask questions on the agenda items; and in going through the agenda, the board is not even discussing that particular item yet.

Ms. Priest called for a point of order, as did Mrs. Bell, and the board president was asked if the board could move forward on the order of the agenda. Mr. Riall reminded everyone that this is a work session and the comments should be questions on agenda items and at the regular board meeting, agenda items can be debated. Mr. Hooks referenced the meeting on May 12th where Mr. Lee explained that teachers and teacher aides were included and asked Mrs. Bell if her motion includes everyone? Mrs. Bell confirmed it includes all 6,000 employees, classified and certified. Mr. Hooks said he believes the board will look crazy going to the taxpayers to fatten the pockets of people that work at Central Office, because their pockets are already fat enough; and he doesn’t think it is fair to go to the public and ask for this. Mr. Hooks also referenced Mrs.
Bell’s comment that no one did anything and he has pled and pled and referenced his pleas in the minutes. Mr. Riall again asked Mr. Hooks if he had any questions regarding this agenda item and Mr. Hooks stated his concern that the comment was made that no one has done anything and he has been attempting this since he began serving on the board.

Mr. Pierson stated his belief that both arguments are premature because the issue before the board today is whether or not we will approach the Legislature to give us an opportunity to reach a sales tax limit and the board must convince the Legislators to carry that forward. He stated that for those streamlining the meeting and for those in the audience, if this limit increase is what everyone wants, then individuals should approach their district Legislators and make them aware, if the majority of the board supports it, of the desire to increase our sales tax limit. When the tax limit is increased, then there will be an opportunity to decide whether or not the increase will be used to seek an increase in the sales tax by the citizens for an employee pay raise. He added it is at that time that most of the arguments being heard would come forth.

Mrs. Crawley stated her agreement with Mr. Pierson, but the question is the board is being asked to vote on this before receiving a budget and referenced the minutes of the August 16th CPSB meeting where it states the board will have the budget by the February executive session. She said she is disappointed and now the board is being asked to tell the Legislators that even though the budget is not together, we would like for them to go forth just in case we want to do this. She said she believes if the budget is presented and the public can see that everything possible has been done to trim the fat from the budget and the plan reflects the need to go forward with this and that we do not just want more money. At this point, Mrs. Crawley stated she does lean more toward a sales tax but she would be embarrassed to vote for this without a budget and would appreciate it if the vote on this item could be moved up before the meeting with the Legislators.

Mrs. Bell agreed with Mr. Pierson; however, she only stated what she did up front because the board wants to know everything. She also agrees that the people need to talk to their Legislators and get their support; however, she is the one that came up with this idea and did not ask the superintendent to provide a budget. Mrs. Bell shared her concern each time she looks at the employees that nothing has been done to give them an increase; and the idea of a sales tax indicates she is determined to do it. If the board wants to wait for the budget, she does not have a problem with that; however, this is how things are always put off and never addressed, and she will not argue with board members about something that needs to be done. Mrs. Bell asked the board members to consider presenting this proposal to the Legislators by voting for it or against it at the next meeting.

Mr. Hooks shared with the board that Mr. Lee explained that in 2008-09 the expenditures were $13 million and in 2009-2010, it was approximately $9 million even though no teacher received a raise. In his efforts to get the employees a raise, Mr. Hooks stated that he was told we did not have the money, so he believes we are in a Catch 22, and at this point he cannot support this.

Mr. Ramsey asked Mrs. Bell if she has had any discussion with the Legislative Delegation related to this? Mrs. Bell responded that she has talked with a Legislator and that person agreed that something needs to be done for the employees; and that despite the fact that it looks shaky in Baton Rouge, it does look like something that is possible. If the board approves, she believes this is something that the board can share with them at the Legislative Luncheon.

Ms. Trammel asked Mr. Abrams if there is a deadline for this and Mr. Abrams stated while he is not sure of the date of the deadline, he knows it must be introduced the first day of the session and thus it needs to be on the February agenda so a decision can be made prior to the start of the session. Ms. Trammel asked if the board will be able to meet all the requirements and Mr. Abrams stated that advertisement has occurred since it had to run for two days, so it is only a matter of having a Legislator on board to move it forward. Ms. Priest stated that each Legislator
has the opportunity to pre-file five bills and if the board feels that this is something that is important and it wants to move forward, it will be necessary to get with a Legislator in ample time and before they have filed their limit. Mr. Riall added that at this time only a few bills have been pre-filed.

Mr. Pierson added that the luncheon with the Legislators is on the 21st and prior to the board meeting that afternoon and asked if it is possible to ask one of the Legislators to carry this forward on behalf of the Caddo Parish School Board without the board taking a vote. Mr. Abrams explained that the board could call a special called meeting and that he did talk with the superintendent about the potential for public hearings and the board will need to decide without a poll of the board. Mr. Pierson stated that at this time there does not seem to be a complete consensus on this; and since there are those issues that the board already has before it for consideration, he said maybe it is better to get approval from the board before asking Legislators to pre-file a bill for this. Mr. Riall asked if he understands correctly that this item could be extracted from this agenda and placed on the agenda of a special called meeting? Mr. Abrams confirmed that is correct and that the board can ask the superintendent to call a special meeting for this one item or if the board wants to add a public hearing to discuss attendance lines or redistricting, the board could do so with at least 24 hours notice and allow a time on the agenda for visitors.

Mr. Rachal said this is a school board and not state legislators; and the school board does not have the authority to raise anyone’s sales taxes above the limits. No individual board member can talk to any Legislator; and if a Legislator believes it is the right thing to do, they can write the legislation, because the school board does not write legislation. Mr. Rachal commended Mrs. Bell for coming to the board asking for the board to speak as one voice and if the Legislator wants to do it, it does not make any difference what the school board says. He did agree with Mr. Pierson in that it is something that they need to feel comfortable as a whole in moving forward with this. At this time, he doesn’t believe there is one voice for moving forward with this. Mr. Pierson added that not to be argumentative, but when he served as a Caddo Parish Commissioner, the local Legislators looked to them to decide whether or not something is priority; and if it is priority to the school board, it is something that the Legislative Delegation will be willing to carry forward. Mr. Pierson said if they move forward and it does get on the House Floor and goes before appropriate committees, he assumes that local representatives will be present at these committee meetings to testify in support of this item. He said this is why he made the appeal to the audience and others that if it is something that is important, they need to talk to their local Legislator; and if the local Legislator(s) move forward and it is successful, it is something that the school board then has the option to submit to the voters if it chooses to do so.

Mrs. Bell reminded Mr. Rachal that the local Legislators call those together in their districts to ask them what they desire to be done in Baton Rouge during the session. She said she believes if we talk to them, they will talk to us about what is needed. Mrs. Bell stated she is also baffled by the board’s response today, because she just knew that when she presented the idea to the board, she felt like the board would come together to do something to help the employees. She also added that at this time, it may not happen until 2013 or 2014, but she only wants everyone to be together.

Mr. Hooks stated that the board can get all the Legislators on its side, but when they get to Baton Rouge, it is a different story. He referenced information the superintendent forwarded to the board members from the Department of Education, and that as long as Governor Jindal is in office and John White is the State Superintendent, he doesn’t believe this will go anywhere in Baton Rouge.

**Take Home Cars.** Mr. Hooks stated that he received his information and is asking that this item be pulled because he was stunned to learn how the money is spent for take home cars. He said
he wants everyone to know that the money for take home cars is money well spent and noted the rates for insurance, gas and purchase price on state contract. Based on this, he believes if take home cars were removed and we had to reimburse mileage for these it would cost a lot more.

**Proposed Revisions to School Attendance Zones.** Mr. Hooks said he feels he should be able to call and ask for an agenda to be pulled the same as others are able to do. He asked that others be fair with him and as a board member if he asks for an item to be pulled, it should be honored.

Mr. Riall stated that he was not notified and he was not aware of his request. Mr. Riall asked Mr. Abrams about policy when an item is on the agenda for the work session and a request is made for it to be pulled. Mr. Abrams said any board member can place an item on the agenda, so if Mr. Hooks called and wanted an item pulled, another board member could call and say they wanted the item on the agenda. At this time, the item being discussed was placed on the agenda by the superintendent, and it was his item for the agenda for the district. Mr. Hooks said the roll forward millage was placed on the agenda by the superintendent also. Dr. Dawkins said it was not the superintendent that had that item on the agenda. Mr. Riall stated his understanding that if any board member wants it to stay on the work session agenda, it will stay. Mr. Abrams explained that the superintendent placed an item on the work session agenda and at this time, there are three people (executive committee members) that are setting the agenda for the regular meeting and everyone else in attendance is attending to participate in the work session; and they cannot vote, but can only suggest to the executive committee members what they want. If a board member asks that the item be taken off and everyone agrees, then it will not be on the agenda; however if the executive committee wants it on the agenda and approves it, it is on the agenda. In the meantime, between the work session and the regular meeting, if the superintendent wants to withdraw it because he does not have a recommendation, it is there until the board meets and the item can be pulled or postponed. If the superintendent does not ask that it be withdrawn, a board member can make a motion to postpone and if seven board members vote for postponing it, then it can be postponed. Mr. Riall asked if a board member requests that an item be pulled from the agenda for the work session, how are those that may want it to remain on the agenda recognized? Mr. Abrams stated that after board member comments during the work session, the executive committee can move to approve the agenda with it on the agenda or not.

Superintendent Dawkins stated that staff heard from board members since the last meeting when the proposed changes in the schools’ attendance zones were presented, and they have not heard from any board member that they want the item pulled, so staff’s recommendation is that it stays on the agenda. Mr. Hooks asked the superintendent why he doesn’t do what the board asks of him, i.e. a budget by tonight’s meeting.

Mrs. Armstrong stated her concern that with the new school plans approved for grades 7-12, there is a need to redistribute and make changes to attendance zones for the 7th and 8th grade students to flow into the appropriate high school. She added there were some other issues needing addressed and noted another problem on one of the maps that she would like to address. Referencing the northern boundary of the Fair Park attendance zone, Mrs. Armstrong stated that she has visited with Mr. Pierson and it was indicated that the students now in the proposed boundary and the present boundary in the Queensborough were at one time attending J. S. Clark and it is being proposed that these students attend BTW. However, this same area has always been in the Queensborough area of Fair Park’s attendance area. She asked staff to look at reversing this and that it continues to have the school boundary as it now stands. She also asked staff if the middle school students can be grandfathered into what is now Fair Park’s zone, because she believes this Queensborough area could take in middle schoolers that once attended J.S. Clark (since J. S. Clark is being converted to an elementary school.)
Also, Mrs. Armstrong stated her appreciation to staff for the changes made in the Southwood High School attendance map which she believes simplifies some of the areas even though she would like to have taken the boundary out to the Sparks-Davis Road.

Ms. Trammel shared that she has received numerous calls from parents relative to the reasoning for changing attendance zone boundaries at this time and she asked that staff look at the number of students in the Woodlawn attendance zone being rezoned to Fair Park and the possibility of moving the northern boundary east from Line Avenue to Creswell. Mr. Woolfolk explained that that there are more students in the Woodlawn area south coming north, so to rezone students so that BTW is adequately utilized, it is necessary to rezone students at Woodlawn to Fair Park and rezone students at Fair Park to BTW. At this time, there are not enough students living in the BTW attendance zone to fill BTW, so it is necessary to rezone some of the students in Fair Park to BTW and replace those students with some of the students at Woodlawn to Fair Park. Mr. Woolfolk also clarified that if the 203 students rezoned to BTW remain at Fair Park, then Fair Park will be above its capacity when adding the 7th and 8th grade students along with the 9th through 12th grades. Ms. Trammel clarified that she understands the change in attendance lines based on the shift in population, but she knows there are a number of students still in the area being discussed (toward Creswell) that attend Captain Shreve. Mr. White said he does not know the exact number of students, but he can provide that for Ms. Trammel.

Mrs. Crawley expressed appreciation for the information she requested and at the last board meeting she stated that she did not want to vote on this at the next board meeting, because she would like to consider all the elementary, middle and high schools. She stated her agreement with Mrs. Armstrong’s comment that the Queensborough neighborhood has historically been Fair Park and asked to see the total number so she can refer back to the facilities study to make sure it will exceed capacity if the proposed new boundary line is moved back to its original boundary. Also, she would like to see the numbers and areas of students that will be attending Broadmoor and then Byrd. She would like to see this item postponed until a plan for all the schools is presented, because at this time she is not hearing a public outcry for this.

Mr. Pierson stated that before he was on the board, the board voted to not close any high schools; and since Dr. Schiller was superintendent, there was a notion to close some high schools. Either by vote or consensus, the board made the decision to keep all high schools open, which suggests to him that the board also decided in that vote to provide for those high schools. In some cases, this means moving district lines to make those high schools viable. Mr. Pierson stated that he remembers when Byrd High School only had a handful of students and Broadmoor, like Lakeside and Allendale, had grown to be an old community. As a result, the schools’ attendance areas were expanded and students rezoned to other schools; and now the discussion is what we need to do to revitalize the area and bring the students back to the neighborhood schools. He said to him, it’s about educating and providing for students. When the board voted to keep all the high schools open, it meant, to him, that we need to provide for these students what they need to get the best education we can provide. Mr. Pierson said he is not against anyone’s school, and he believes we can educate students wherever they are; but the board needs to look at the bigger picture. He also commended Mr. White for his efforts and attempt to satisfy 12 board members and asked the board members to be open-minded about how we got where we are.

Mr. Hooks said he doesn’t have anything against any school and he was very much misquoted because he sent both of his children to BTW. However, the parents he is now working with are those that elected him to office. In recent conversations about keeping the neighborhood schools, it appears that the conversation now is taking away the neighborhood school from the neighborhood, of which he does not understand the rationale. He quoted a portion of minutes from a recent meeting and that lines can be drawn over the next 24 years and parents will still find excuses for their students to attend schools other than their neighborhood school. He reminded everyone that students will do best when they are where they like to be. While he has
nothing against Booker T., he must fight for Fair Park and the streets that are in his district. Mr. Hooks said it is necessary to find some common ground.

Mr. Woolfolk stated that in his conversation with Mr. Hooks, he discussed the 7th and 8th graders at J. S. Clark and when they get to the 9th grade, they will attend Fair Park and this is not consistent with what staff believes is in the best interest of the kids and the importance of finding room for the three middle schools. Thus, the population must be dispersed equally to Woodlawn, Fair Park and BTW, and the zones need to change to accomplish this. Mr. Woolfolk further explained that if a student attended 7th and 8th grade at BTW and then is sent to Fair Park in the 9th grade, it is felt that it is an injustice to the students coming from BTW because the Bethune and Mooretown students have been there since the 7th grade. It is proven that it is better when a principal has six years with a student. While staff did not want to mess up neighborhoods, keeping the same attendance boundaries will not fit into Fair Park.

Mr. Rachal stated that unfortunately the population has shifted and as a result, the student population for each high school is not there to properly utilize the facilities. Now with the changes in the middle schools and when lines were redrawn a year ago, there has been a great wave toward southeast Shreveport. He asked staff if he understands correctly that the lines are proposed to better utilize the facilities? Mr. White said that is correct and it is a balancing act so as not to place an undue burden on one school by having it over-utilized when a neighboring school is under-utilized, thus the goal of 85% utilization for each facility. Mr. Rachal stated his agreements with staff’s comments as well as fellow board members’ comments; but he believes the board’s burden is dealing with the money and if it should be used on facilities or to more effectively teach the students. Being a necessary evil, he is hopeful the board will get through this while keeping the students at the forefront and trying to maintain community schools as best as possible. Mr. White responded to Mr. Rachal’s concerns on how close boundaries come to another school and how staff conversed many hours over this same thing; however, at this time Fair Park is 95% utilized and Booker T. Washington has increased from 32% to 68%, which is still somewhat underutilized. To populate both schools, Mr. White stated the appropriate place would have been Greenwood Road which would have placed Fair Park outside of its own attendance boundary, which was something staff could not do. He also said that staff understands the need not to place a fence in someone’s backyard as the boundary line and one household attends Fair Park and the other attends Booker T. Washington.

Ms. Priest stated that at a previous meeting staff provided a list of the capacities at each school if the board approves the proposed revisions to the attendance lines; and she reminded the board that at the time the board approved the reconfigurations, the District had five underutilized high schools (Booker T. Washington, Fair Park, Woodlawn, Green Oaks and Huntington). She said at that time there were students in a school’s backyard that did not attend that high school. The board can talk about drawing lines in certain locations; however, one of the main things the board needs to ensure is if the lines are drawn at a certain place, that students attend the school and not transfer across the district via possible transfers, i.e. hardship, M to M, curriculum, and hardship. Ms. Priest also stated that she agrees with Mr. Pierson’s comments about the high schools and the board has an obligation to support the high schools and provide them with the resources they need to keep the neighborhood students in their neighborhood school. She said it is important that the board revisit its transfer policy and consider what is best for the students and stop listening to adults that are only trying to hold on to a tradition.

Ms. Trammel asked if we are talking about what we are going to do without any input from the public that provides financial support to the schools. The superintendent announced that a public hearing will be scheduled next week.

Mrs. Crawley asked if there is a program at BTW and Fair Park where children from other districts can choose to attend and are these programs functioning well? Mrs. Turner responded
that the magnet component at Fair Park is available for students in the District to attend. Mrs. Crawley asked for a number of how many are attending the program. Mrs. Turner said she does not have that information in front of her. Mrs. Crawley stressed the importance of the board being made aware of what is proposed and noted that it looks like the board is throwing money at schools and the programs are not in place, so people are choosing to attend other schools. Mrs. Crawley asked staff to provide her with information on how many are zoned to BTW, Green Oaks, Woodlawn, Fair Park and how many of those are attending another school. Mrs. Crawley also asked if the New Tech program at BTW is being offered for 7th through 12th grades, and Mrs. Turner responded that it is but the 7th and 8th grade teachers are still getting the needed training for introducing them to the New Tech program and not all of the 7th and 8th graders are participating at the level they should. Mrs. Crawley asked why are they not? Mrs. Turner said it is project based and teachers are working on this. Mr. Riall reminded everyone that the conversation is to be about attendance zones. Mrs. Crawley asked if the area in question will allow students to choose to attend the magnet component at Fair Park and if they will be able to do so. Mrs. Turner said if they apply for the transfer and it is approved. Mrs. Crawley stated that to her it is somewhat meaningless if someone chooses a particular school. Mr. Woolfolk stated that he sent to the board members information on each school attendance zone and included where students in a particular area are attending schools outside the school’s attendance boundary. Mr. Woolfolk announced that he will be glad to resend the information to the board members.

Mrs. Armstrong reiterated what Dr. Dawkins stated and that it doesn’t matter what zones students are in, they can go to any school for the programs they choose, i.e. Huntington for Law, Shreve for Engineering. She said she believes the board needs to step back and not rush on a vote when there is too much outstanding information. She proposed that this item be put aside until the middle school feeder patterns are finalized. She also noted that if programs are not stimulating, children will not buy into it; and if there are programs in place that are not viable, the board needs to get rid of them and put the money into something that students will benefit from, not just for today, but for the rest of their lives.

Mr. Hooks asked Dr. Dawkins if the cart is being put before the horse given what Governor Jindal has said? Dr. Dawkins said to not do anything now will put Booker T. Washington at jeopardy, as well as Fair Park. He said it’s also a disadvantage for students and parents, but staff is prepared to move forward in anyway the board directs. Mr. Hooks asked the superintendent about moving students to one school for a year or so and then moving them to another school. Dr. Dawkins stated that the State may take over some of Caddo’s schools and we may not have the opportunity to choose what the board wishes to address. Mr. Hooks stated he hates for there not to be stability for the students.

Mrs. Bell stated that the conversation continues about what the Governor is going to do and she reminded Mr. Hooks that it is up to the Legislators. Mrs. Bell shared her concern that programs were to be placed at one school (Law Magnet at Huntington); however last year she learned that this program was at Magnet High, which she believes drew students there and away from Huntington. She said the same was true for other magnet programs throughout the district. Mrs. Bell stated her agreement with Mr. Pierson’s comments and commended Ms. Priest on her community meeting on Monday even though only 12 parents were in attendance. Mrs. Bell stated she was excited to hear about the possible number of students in her district; but to her it’s not about the numbers, but about students going where they need to go to get what they need. She also agreed that it’s an adult situation that needs to be addressed including how we can get the parents involved. She asked for a meeting on the attendance lines to be scheduled for next week and not postpone what needs to be done so we can let parents know where their children will be attending school next year.
Resolution Authorizing the Issuance of General Obligation Bonds. Mr. Rachal asked how much money will be saved in refinancing these bonds? Mr. Lee stated that bond counsel has estimated it could save up to $1 million over the remaining 17 years of the original bond issue. Mr. Rachal asked if he remembers correctly that the board has done this three additional times and Mr. Lee confirmed that was correct. Mr. Lee said he believes the first two totaled approximately $2 to $2.5 million and this one is approximately $1.3 million. Mr. Rachal said he believes this is good money management.

Ms. Priest suggested that letting the general public know is something we fall short in doing, because the board has a staff and bond counsel with the experience in this area. Over $1 million in savings to the taxpayers is something the public needs to be aware of. While the staff has done a good job, she believes there is a need for the board to better promote this savings.

Mrs. Crawley asked Mr. Lee if the $1 million is before or after attorney fees? Mr. Lee said that is the net savings, after attorney fees. Mrs. Crawley asked how much are the attorney fees, and Mr. Lee responded approximately $75,000 to $80,000 and it will come out of the total savings and not out of General Fund.

Proposed Student Check Out Policy. Mrs. Bell shared with the board that she has been very pleased with the check out policy being followed at the schools and that the committee used the input from the principals on how they are carrying out this policy. She said there is no doubt that the Caddo Parish School Board is under fire and every negative move made is all over the world. Mrs. Bell reported that the committee (staff, board attorney, organizations, board member, superintendent) came up with what is being proposed. Miss Green asked Mrs. Bell if a security question can be added to #4? Mr. Abrams explained that part of the security will be training and we would not want to tell everyone what type of security question might be used and is why #5 was added to the policy for security’s participation. Mrs. Crawley stated her agreement and that the problem is some of these are very transient and numbers are changed or disconnected, but if staff cannot verify, then the response is the student will return home the way they got to school.

Mr. Hooks said it sounds good, but nothing is 100% proof and there will always be those trying to beat the system. Mr. Ramsey asked Mrs. Bell if there were principals involved in this committee’s work, and Mrs. Bell said they were not; however, the committee asked principals to send their procedures which they did and the committee used these in their discussion and for input in the proposed policy for the board’s consideration. Mr. Ramsey stated that his only concern is that one size does not fit all, and Caddo has done an excellent job in handling these policies at each school. If the board is reacting to a local TV station’s effort to generate some news, then he does not think it is necessarily a good policy. Mr. Ramsey said he also believes staff can work with the elementary schools and come up with a bluebook practice. Mr. Abrams added that his review of the policy is that it is not a policy that will be a standard “cookbook” because the policy states “a minimum of”, which means schools can have their procedures comply with this policy and use things that help them as a school to better address this issue and not stop every other school’s procedures, which some are very good. Training will be key in how the procedures are followed so it is successful. Dr. Dawkins said the safety of all Caddo students is of utmost importance and the schools do a great job in this. He also announced that this will be discussed with parishwide administrators on Thursday. Mrs. Bell again stated she believes this is needed and what is being done at the schools needs to be reinforced.

Proposed Revision to CPSB Policy GBCB-R. Ms. Priest stressed the importance of each affected employee going through an inservice or training session, signing off that they have completed it. She said employees need to be aware and it cannot be assumed that they are aware.
Mr. Abrams stated that this proposed revision is being brought before the board because the Legislature passed an act requiring that certain crimes be reported within 24 hours. He further stated that Caddo Parish already has a policy in place that requires crimes be reported within 5 days, but this Legislative Act deals with many types of crimes on abuse or sexual in nature and there is no way anyone can determine which ones are to be reported within 24 hours. Mr. Abrams reported that he did an inservice with substitute teachers and bus drivers on this.

Mrs. Armstrong asked about the addendum regarding school bus operators and the other transportation employees, maintenance, etc. that if they are issued a traffic violation, they should be required to notify the appropriate person. Mr. Abrams said he will be glad to revise and include this for anyone operating a school board vehicle and explained that bus operators have a special license and drive the children. Mrs. Armstrong stated she believes it will be significant to include this as occasionally one employee will be driving and another employee riding.

Mrs. Bell asked the superintendent how thorough is a background check when an employee is hired? Cleveland White explained that when an employee is being considered for hire, every employee must have a background check. The background system allows for this information to known in 15 to 30 minutes.

Ms. Trammel asked about employee hires and if a board member has knowledge that someone on staff committed a crime and nothing is done about it, then who decides if there is fault. Mr. Abrams explained it is not a decision of whether one is convicted or not, but the law requires that an arrest is reported and it doesn’t mean you lose your job because of an arrest or conviction. He noted there are those who are employed by the school system and they are still employed; however there are those persons who deal with sex offenses and child abuse that cannot be employed. Mr. Abrams reminded the board that at one time the school system would hire someone and it would take months to get the information back on a conviction and then the employee would have to be terminated. He said if an employee is convicted of one of the crimes on the list provided, then the employee would be terminated based on the list because state law will not allow the District to continue to employ them. He also explained that there is a proviso that one can go to the District Attorney and ask for authorization for the employee to continue to be employed and it would have to be recorded at the state that this has taken place.

Revision to CPSB Policy GBN/JP. Mr. Ramsey asked Mr. Abrams if he reviewed the revisions? Mr. Abrams said he did and that we are attempting to comply with eRate and specific requirements and training needed to be included to protect children and it is required because of the money the District receives.

Superintendent’s Updates. Superintendent Dawkins shared with the board members a letter from the SDE regarding the MOU for deficiencies in special education. At this time, staff has begun a Corrective Action Plan based on the data from 2008-2009, and hopefully the data from 2009-2010 will allow Caddo to be removed from this MOU. He announced that this item should be added to the February 21st board meeting agenda for approval and the board president’s signature. Mr. Hooks asked the superintendent if, when a special education student strikes a teacher and is referred to Academic Recovery are they there for the entire year? Dr. Dawkins responded that it is dependent upon what is determined to be the best for that student and where the needed services are. Mr. Hooks asked if IEP conferences are held when students are placed in these situations? Dr. Dawkins said they are for all special education students.

Budget Work Session. After discussion, President Riall announced that the first budget work session will be from 11:30-1:30 on Thursday, February 23rd. Mr. Ramsey asked, as maker of the motion to bring a balanced budget at this meeting, will the budget now come to the board after the regular meeting on the 21st because if possible he would like to see it sooner. Dr. Dawkins
noted there were some delays because of his being out of the office for approximately one month; however, staff will work to do what can be done.

ESTABLISH THE AGENDA AND PROPOSED CONSENT AGENDA

President Riall announced that 8.02 “Take Home Cars” and 8.03 “Change in Mission of Academic Recovery” are removed and Items 6.03, 6.05, 7.01, 7.03, 8.04, 8.07-8.10, and 8.12–8.13 are the consent agenda items. Mrs. Bell moved, seconded by Mr. Ramsey, to approve the agenda and proposed consent agenda for the February 21, 2012 CPSB meeting as presented.

ADDITIONS

Mr. Hooks asked that a Status Report on the Filipino teachers be added to the Superintendent’s Report.

POLL AUDIENCE

Jackie Lansdale, president of Red River United and Caddo Federation of Teachers and Support Personnel, addressed Item 8.01 and the fact that every school system in the state has to worry about attacks on public education; and noted that Louisiana’s Governor is attempting to pursue a reform plan that will end public education as we know it. She said the Governor’s Plan will end teachers power to speak up for students and weaken local government. Mrs. Lansdale reminded the board that no one can worry about that at this time, because everyone is concerned about the decisions the local school board is making; because the people elected the board to make good educational steward decisions and it appears recent board decisions indicate the Caddo Parish School Board has lost sight of that, i.e. millions in restricted funds that cannot be used. She also stated that a fancy rating may look good to Wall Street, but it doesn’t mean anything for the students in the District and noted the board’s rejection of the many opportunities available to provide for the District’s students. Mrs. Lansdale stated her misunderstanding of why the board will not let the people decide about a ½% sales tax increase, and that now every single vote the board makes becomes suspicious. She reminded the board that when the Governor says he wants choice, Caddo has had Choice since the board made a decision to offer it to those students in low-performing schools; and when the board took its oath of office, it made a promise that it desired to leave the District better than it was found. Mrs. Lansdale stated how proud she is of the Caddo Parish School District, its past and its present, and she asked the board to be as proud and stop running the District down.

Jon Glover, employee, asked about the purpose of redistricting and if the board reconsidered redistricting, is it violating a plan that the Justice Department said the system must be unified, because she does not see the current board doing so in this decision. Ms. Glover said the board approved the Vision 2020 Plan that placed students from already failing schools and she questions the board’s vision in making this decision. She said redistricting only keeps students in the same school and she questions if the board only cares for those districts in Southeast Shreveport. In talking about independent school districts, she also questions why the board would support this decision when she does not see how this is helping the children in the Caddo Parish School System.

Frederic Washington, former student, stated that last week he received numerous calls from students, parents and teachers. He said for those that were not on the board at the time, he reported on the change in the district lines to make J. S. Clark a feeder for Booker T. Washington and he believes the comments board members have made are a verbal insult to the hard working teachers and students at Booker T. Washington. While he understands some may have lived in Fair Park’s attendance zone, he lived in Fair Park’s attendance zone; however he graduated from Booker T. Washington. In looking at the data, he said of the original 4 AU high schools, Booker
Washington has always been less than two points away from missing the line; and over the past seven years, he witnessed many things that he does not agree with; however, he does stand for strong public school districts; and reminded the board members that they are elected for the good of all boys and girls. He also reminded the board members that they are not here to grand stand and put on a show in an effort to impress someone. Mr. Washington said he is tired of attending board meetings and listening to the academics and not make it about the children and all this other needs to stop.

Donna Judd stated that she believes it is important to ask the Legislators for this tax even though it is used right away and ask the employees to support a raise for every Caddo employee for those who work directly with the children. While she has nothing against the sub teachers, she desires that her child have a certified teacher in the area in which she is teaching. Young people need to be encouraged to come into Caddo by offering a 13th check; and as a consumer, it doesn’t matter if you are in Shreveport or Bossier; and she also believes it is important that the board members come together and ask the voters what they want to do.

Rob Broussard, parent, stated that he is totally dissatisfied with the local school district and he is one of the proponents of the Independent School District and asked that this issue be addressed in a public forum. He said he has been in contact with Governor Jindal’s office as well as with Legislators and he believes the ship has already sunk. He noted that his school district would like to have an independent school, to fund themselves and to do what others have asked, and that is neighborhood schools will be neighborhood schools. Mr. Broussard said he believes strongly in the independent school districts and the work on revitalizing the neighborhoods that are in need of it. Mr. Broussard also asked why his neighborhood continues to be chastised and treated differently? Mr. Broussard also reported that he made a Public Records Request and it was late coming to him and he would for the superintendent to realize that when people ask for information they do expect a timely response as well as a return phone call. He also said there is additional information that he has been asked not to reveal to the board, because it will literally create an uproar in the system since it is about money.

Mike Myers, teacher, supports a pay raise for the employees and appreciates the board members that commented in support of such a pay raise. He said he believes he mentioned at the last board meeting the destructive action that is occurring in Caddo Parish and believes if the board comes together with a vote of confidence in a decision, then the voters can have in their hands the decision to make regarding this issue. He believes it is important to realize that coming together is important and the board needs to come together in a way to stop the proposed split.

Dr. Mary Nash-Robinson announced that next week is Counselors Appreciation Week and encouraged everyone to recognize the hard-working counselors in Caddo’s schools. She also announced that at 10:00 on Friday, the Superintendent will host a press conference at Central Elementary for the purpose of presenting a framed photo of the graduating class of 1932 to the Centralites.

Adjournment. Mrs. Bell moved, seconded by Mr. Ramsey, to adjourn. Vote on the motion to adjourn carried unanimously and the meeting adjourned at approximately 8:30 p.m.
February 16, 2012

The Caddo Parish School Board (CPSB) held a public hearing in its office at 1961 Midway, Shreveport, Louisiana at 4:30 p.m. on Thursday, February 16, 2012 with President Steve Riall presiding and the following school board members present being a quorum: Carl Pierson, Curtis Hooks, Mary Trammel, Lillian Priest, Bonita Crawford, Barry Rachal, Larry Ramsey, Ginger Armstrong and Dottie Bell. Also present were Secretary Gerald D. Dawkins, and Reginald Abrams, legal counsel. Mr. Hooks led the prayer and Pledge of Allegiance.

President Riall welcomed everyone to the public hearing on the school attendance zones and explained that this meeting is for the public to give input regarding the proposed attendance zone changes on the February 21, 2012 CPSB meeting agenda.

The following persons addressed the board on proposed changes to the schools’ attendance zones.

Earnestine Coleman, 3513 Huston Street, Shreveport, Louisiana, Fair Park PTSA President, shared her concern about the proposed changes in the attendance lines and how they will affect Fair Park’s attendance. She said board members were elected to better the education for all students, but she questions if they are in the seats just to be an elected official, because the lines drawn to send more students to Booker T. Washington (and she has nothing against Booker T. Washington), she believes might result in many students dropping out of school. Mrs. Coleman also noted the audience for today’s public hearing and questioned if others that are concerned have given up. She said she is tired of the struggle and believes her school board representative is fighting a losing battle, so she questions why she should continue to fight? She said she does not believe those students now at Fair Park will want to go to Booker T. Washington; and if the board changes the lines and makes them go to Booker to Washington, it is helping them to drop out of school. For more than a year Fair Park has been fighting to stay open, and she doesn’t understand the problem. Mrs. Coleman asked the board to think about the students because some of these students want to go to school and are excited about getting an education.

Thomas Sweeney, president of the National Association for the Advancement of God’s People, 2306 Lakeshore Dr., Shreveport, Louisiana, stated he is here today because of the zoning lines for these schools and questions if they will affect Byrd, Captain Shreve or others; and if not, why is it just the Black schools that are being changed? He said if the board would start doing its job and put in the schools what is needed, as well as work with the parents, the students will attend these schools. He also noted that the meetings are scheduled for 4:30 p.m. and most parents are still at work and cannot attend. Mr. Sweeney stated he believes we are going back to the struggle to end segregation because it appears we are returning to segregation. He said the citizens pay the board members’ salary and the board is an employee of Caddo’s citizens. He also noted that Bossier doesn’t have these problems and he wonders why Caddo does; and stated that if the board begins moving students from Fair Park to another school, his organization will file a lawsuit against the Caddo Parish School Board, the Louisiana Department of Education and the U.S. Department of Education. The citizens are supposed to have a say so in where their children attend school and the board is taking this away from the parents. Mr. Sweeney also noted the bussing of Black students to White schools, but not bussing White students to Black schools; removing skilled trades from the schools causing the students to not attend school because they were not college bound students. He encouraged the board to reconsider what it is planning on doing.

Arthur Douglas, Jr., 3301 Sun Valley Circle, Shreveport, Louisiana, addressed the closure of Fair Park and how it will be a detriment to that part of town. He said he believes if this is done we will see a greater problem than whatever the problem is now. Mr. Douglas also stated he believes the plan should have been shared with the parents and citizens in that area for their
input, because at the end of the day, if the children are not satisfied with what is happening at their school, they will have problems learning and moving forward. He encouraged the board to reconsider the plan and set a time where more parents, and working parents, can attend the meetings.

Debra Seamster, 1417 Madison Park, Shreveport, Louisiana, shared her love for Booker T. Washington and that she is all for improving BTW. She said she believes the change in the lines is only giving back what was taken in the past. While she doesn’t believe Fair Park is closing, she said she believes students will also be coming to BTW from other schools. She encouraged the board to move forward with the revised attendance lines to enhance the student population at BTW and that the board should better promote the programs and activities at BTW so the students affected will want to attend BTW. Ms. Seamster also stated that the principal at BTW is attempting to do what is needed to move BTW in the right direction and she encouraged the board to move forward.

Gennie McAfee, 3516 Lakeland St., Shreveport, Louisiana, shared her interest in the community schools and will fight for the community’s schools, because a community without a school is a dying community. Ms. McAfee noted that Queensborough is a dying community even with Fair Park and she knows that no one wants to see what it will be like without a high school in that community. She asked why is there so much struggle to keep this community school; and even though being told that changes are for budget reasons, she believes it looks like the poorest of children are having to give up the most. She said she has walked the streets attempting to get input from interested people, and it is not there. It is her hope that the coming up generations will not have to suffer as a result of the neglect of these parents and grandparents not attending meetings and speaking out. While she doesn’t have any children, she considers all the poor children hers and she will fight for them until she can fight no more. Ms. McAfee said she wants to hear some good news about community schools so she doesn’t have continue to fight for these children.

There being no additional speakers, the public hearing was adjourned at approximately 4:56 p.m.
February 21, 2012

The Caddo Parish School Board (CPSB) met in regular session in its office at 1961 Midway, Shreveport, Louisiana at approximately 4:30 p.m. on Tuesday, February 21, 2012 with President Steve Riall presiding and the following school board members present being a quorum: Jasmine Green, Carl A. Pierson, Sr., Charlotte Crawley, Curtis Hooks, Mary Trammel, Lilian Priest, Bonita Crawford, Barry Rachal, Larry Ramsey, Ginger Armstrong and Dottie Bell. Also present were Superintendent Gerald Dawkins, Legal Counsel Reginald Abrams, staff and visitors. Mr. Hooks led the prayer and Pledge of Allegiance.

Ms. Green moved, seconded by Mr. Priest, approval of the minutes of the January 17, 2012, January 26, 2012 and February 7, 2012 CPSB meetings as submitted. Vote on the motion carried unanimously.

PRESENTATIONS AND RECOGNITIONS

Victor Mainiero, interim director of communications, and Dr. Mary Nash-Robinson, government and community relations officer, on behalf of the board, recognized the following staff members and students for recent achievements. President Riall and Superintendent Dawkins presented each with a certificate in recognition of their accomplishment. Administrators, family and friends present were also recognized.

MST Presentation. Susan Tompkins, MST coordinator at Southwood High School, shared with the board and audience a brief video highlighting various aspects of the MST program and its recent successes. Students are afforded hands-on opportunities such as research and experiments through the MST Program. Community partners and BioStart students were also recognized.

Cora M. Allen Day March 7, 2012. Mr. Mainiero announced that March 7, 2012 will be the first annual Cora M. Allen Day. Mrs. Allen was a prominent African American leader in Shreveport during the early 20th Century, and this day will honor all women who are making a difference in the community as well as those who have overcome difficulties to achieve what others thought they could not do. Carolyn Echols with the Mayor’s Women’s Commission and the League of Women Voters shared with those in attendance additional information on Mrs. Allen and the many wonderful things she did as a prominent national and international leader, as well as representative for women in the South. Ms. Echols shared with the board the many projects that students have been involved in preparation for celebration of this day, i.e. activity book commemorating Mrs. Allen distributed to all Caddo Parish third graders, powerpoint presentation for all third and eighth graders in Louisiana History classes, an essay contest for 8th graders, and the EAST Lab at Southwood High School is producing a video in commemoration of this celebration. The March 7th celebration is scheduled the day before the International Women’s Day, as well as the anniversary of the dedication of the Clampion Temple, and will include many activities involving Caddo students at all levels. Board members were invited to attend on March 7th at Municipal Auditorium in addition to the many other activities they might wish to be involved in.

Robert Johnson New Generational Award for the Blues. Matthew Davidson, Caddo Middle Magnet, was recognized for receiving the Robert Johnson New Generational Award for the Blues. Dr. Robinson explained that this award is given annually to guitarists ages 12 to 18 to further the interest and promote The Blues.
**Louisiana Jr. Science and Humanities Symposium.** Mr. Mainiero announced that four of the top five positions at the Louisiana Jr. Science and Humanities Symposium were awarded to the following Caddo Public School students: Taylor Whitaker, C. E. Byrd High School, 5th place; Sean Nathan, Caddo Magnet High School, 3rd place; Aloni Mijalis, Caddo Magnet High School, 2nd place; and Henry Lin, Caddo Magnet High School, 1st place. The top three recipients will attend the National Jr. Science and Humanities Symposium in Bethesda, Maryland in May, 2012.

**Scholastic Art and Writing Awards.** The following Captain Shreve students were recognized for receiving awards at the regional level for the Scholastic Art and Writing Awards: Nick Fry, Ben Woodruff, Asia Grigsby, Sidney Streeker, and Lauren Norton. Special thanks were extended to the teachers and school principals.

**Wiley College Leadership Conference.** Dr. Mary Nash-Robinson recognized 19 Woodlawn Leadership Academy students that recently attended a leadership conference at Wiley College in Marshall, Texas. Dr. Strickland, president and CEO of Wiley College, welcomed these students to the conference designed to engage the students in reflective thinking and spirited dialogue for the purposes of enhancement of self efficacy as leaders.

**Grambling State University Athletics.** The following Caddo students recently signed athletic scholarships with Grambling State University: Justin Fortson, Fair Park High School; Quadrel Heath, Green Oaks High School; and Nicholas Peebles, C. E. Byrd High School.

**Caddo Coaches of the Year.** The following Caddo coaches were recognized for all-city and all state coach of the year: (1) Coach Michael Green, Fair Park High School, All-City Football Coach of the Year; and (2) Coach Michael Suggs, C. E. Byrd High School, All-State Football Coach of the Year.

**50th Anniversary Teaching.** Martha Maple, teacher, was recognized by the Caddo Parish School Board and the staff and faculty of Caddo Heights, on her anniversary of 50 years in teaching.

**National Awards.** Dr. Robinson announced that Caddo Parish was recently recognized for selection in the National Prevention Week Pilot Site Award that recognizes the work in Caddo for suicide prevention. The Caddo Parish School Board also won a national award for Promising Practices in Character Education. Dr. Barzanna White, District School Psychologist, was recognized as the recipient of awards for exemplary work in Character Education.

**DECA Dimensions Magazine.** The DECA Chapter at the Caddo Career and Technology Center was featured in the January 2012 DECA Dimensions Magazine.

**Academic Recovery and Career Discovery Center.** Margaret Brown, principal, and Academic Recovery and Career Discovery Center, were recognized for being chosen by CSPAN’s 2012 Cities Tour on Programming on the Road. Mr. Mainiero announced that only six schools in six cities were chosen to participate and the history and literary life of these communities were highlighted. Interviews were held with the principals, staffs, and students to talk about CSPAN’s free educational resources, programming and video production. The Academic Recovery segment will air the weekend of March 3 and 4, 2012.

**Lowe’s Educational Grant.** Margaret Brown, Academic Recovery and Career Discovery Center, was the recent recipient of Lowe’s Educational Grant for $5,000. They were selected to receive the 2011-2012 Lowe’s Toolbox for Education Grant for the school’s “Growing and Giving” project.
Newly Appointed Administrators. Dr. Mary Nash-Robinson introduced the following newly appointed administrators: (1) Ellen Hall, principal, Claiborne Fundamental Magnet Elementary; (2) Kay Lynch, assistant principal, Captain Shreve High; (3) Carla Moore, Director of Attendance and Census; (4) Kalen Washington, assistant principal, Fair Park High; (5) Brandy Neal, professional development specialist; and (6) Victor Mainiero, interim director, communications and marketing.

PUBLIC HEARING ON REDISTRICTING

President Riall declared the public hearing on the redistricting of board member districts open, and the following speakers addressed the board.

LeAnn Anglin asked that the public be included in the input relative to redistricting; and since she understands the public can receive notices about meetings if requested, she believes she is an informed parent who attends school board meetings and does visit Caddo’s web site but asked that the board and staff, through its new communications director, look at a new multi media approach to communicating with the public and especially the parents. She said she doesn’t believe the notice of this public hearing was adequate for those that might have wanted to attend today. Ms. Anglin also encouraged the School Board, if it does not have one, to create a Facebook page where this information is posted along with any other possible new and innovative media, and make it prominent on the web site and easy to find.

There being no additional speakers, President Riall declared the public hearing closed.

VISITORS

Emma Shepherd announced that the Caddo Association of Educators will sponsor the Read Across Louisiana program on February 25th at Mall St. Vincent. Ms. Shepherd explained that the Read Across Louisiana was created in conjunction with the Read Across America Program created by the National Educational Association celebrating Dr. Seuss’s birthday. This event is being hosted all across the state to show how important it is to promote reading as a way to academic success for students, and observing adults read inspires children to read. Ms. Shepherd invited and encouraged members of the board to join other adults in providing the leadership in the education of students and join them at Mall St. Vincent on February 25th by reading to the children.

Pat Haynie, Red River United Retirees, shared her support of the proposed ½% sales tax increase and that she believes, if given the opportunity, the people of Shreveport will support this. Because public education is what has helped make the country and the Caddo School System great, she encouraged the board to bring this proposal before the voters.

Dr. David Kirby shared with the board that he is at today’s meeting prepared to give the district a check for $337,000 if his bid on the Hosston property is approved by the board.

Jackie Lansdale, Red River United/Caddo Federation of Teachers/Support Personnel, requested that the Board seek legislative action to move forward with the ½% sales tax increase. She said it is only a penny to the public on every roll of paper towels, but it means millions to the public schools in the parish. Mrs. Lansdale said it is their belief this is a decision that needs to be made by the people in Caddo Parish. She said it is understood that the board members desire that the superintendent be fiscally responsible; and hearing a visitor say the board has a spending problem and not a funding problem, she challenged the simplicity of this remark and the fact that corporate income taxes received by the state were $721 million and exemptions totaled $972 million By 2006-07, corporate income taxes received by the state totaled were $721 million and exemptions total $792,000, and now the Governor is projecting a budget deficit. Mrs. Lansdale
stated that Caddo has also socked away millions in designated reserves plus more based on the
government projected rule. She also noted the stellar bond rating and asked if we really want to
place more value on a fancy bond rating than on keeping our schools high quality and protecting
middle class jobs in our town. Mrs. Lansdale said in the past many have agreed that public
education was something as a community everyone was willing to support, and she highlighted
some of the many great things in our community that we should celebrate. She encouraged the
board to study very carefully those districts that have seen failures and ask if they are better or
worst for it. She suggested that everyone study very closely the example set before us before
making decisions that may break up Caddo’s own district. With board approval to support
legislative action to support a ½ cent sales tax increase, knowing that this is only the first of
many hurdles that will need to overcome in moving forward. She said she believes the key in
moving forward is in the board’s hands and the decisions they will make in this regard, and she
stressed the importance of giving everyone the opportunity to pitch in and fund Caddo’s schools
and give the children the best education possible. Mrs. Lansdale reminded board members that it
is their decisions that will determine if Caddo’s employees continue to lose pay and possibly
even their jobs, and asked that the board consider the following questions in making these
important decisions: (1) Does the board believe in this District? (2) Does the board believe in
this community? (3) Does the board find the employees worthy of its support? (4) Will the
board give everyone a chance to pitch in and support Caddo’s schools?

Jon Glover asked if any of the board members can tell her what the board’s primary duty is to
those who have entrusted the board to represent them in this District. She said it appears there
are many agendas that are non-collective and the board did everything to encourage the
constituents that each would be the best to represent them in this school district; however, she
questions whether or not board members are doing that. Ms. Glover encouraged the board to
refocus on its purpose and help Caddo schools stand still as the best district in Louisiana.

Kevin Hurd shared his opposition to the changes in the school attendance zones and noted that he
does not reside in any of the areas affected, but as he has monitored what is being proposed, he is
concerned about the incidences in the proposal where students do live in the higher, more
academically successful schools and these might be moved into a district that is an academically
unacceptable area. He said because parents look at school districts when purchasing a home, he
stated that he does not believe it to be fair for their children to be moved from one school to
another and possibly placed in schools that are not performing as well as the school they
selected.

Kevin Fortson stated his opposition to the revisions in the attendance lines, especially those in
the Fair Park High School area. He said it will undermine and destabilize the learning
environment at Fair Park; and because Fair Park is currently in a state of academic emergency
and attempting to make Fair Park academically acceptable, and to comingle the students from
Mooretown and Queensborough with the students from Hollywood is a recipe for chaos and
unrest and will induce a negative environment for learning. Mr. Fortson said this decision will
also add disciplinary problems for the staff and faculty. Unless the board is maliciously setting
Fair Park Medical Careers Magnet up for failure, Mr. Fortson pled with the board on behalf of
Caddo’s students to vote against redrawing the lines and consider an alternate solution with input
from the parents and constituents. He also encouraged the board to provide a Chemistry teacher
for the Fair Park Medical Careers Program.

ESTABLISH THE AGENDA AND CONSENT AGENDA

Superintendent Dawkins highlighted items for the board’s consideration and President Riall
recommended that Items 6.02-6.03, 6.05, 7.01-7.04, 8.02-8.03, 8.05-8.08, 8.10-8.11 and 8.13.
Mrs. Bell moved, seconded by Mr. Rachal, to approve the proposed consent agenda items as
recommended by staff and included in the mailout. Vote on the motion carried unanimously and the following is a summary of the board’s action.

Item No. 6

6.02 Requests for Leaves. The board approved the following requests for leaves as recommended by staff and included in the mailout.

Certified
Racheal Knudson, Teacher, Newton Smith, 5.5 years
Leave Without Pay, April 25, 26, 27, 2012 & May 1, 2, 3, 4, 2012
Stacy Hood, Teacher, Youree Drive, 4 years
Jennifer Ash, Teacher, South Highlands, 11 years
Catastrophic Leave, January 17, 2012-February 28, 2012
Elnora Hunter, Teacher, Stoner Hill Elementary, 21 years
Nellie Davis, Teacher, Fair Park, 17.5 years
Catastrophic Leave, January 5, 6, & 9, 2012-February 6 & 7, 2012
Rebecca Lofon, Teacher, Ridgewood Middle School, 13 years
Catastrophic Leave, February 1, 2012-April 1, 2012
Loretta Z. Speed, Coordinator, Fair Park Preparatory, 38 years
Catastrophic Leave, January 15, 2012-February 27, 2012
Kimberly R. Bundrick, Teacher, West Shreveport Elementary, 16.5 years
Sabbatical Leave (Study), Fall Semester 2012-Spring Semester 2013
Jennifer Wautlet, Teacher, 81st Street ECE, 16 years

L. D. Addison was approved for a Medical Sabbatical Leave for the Fall Semester 2011. His medical condition has not improved and he is eligible to retire. The board approved his request to be relieved of his obligations to repay monies received while on leave.

Classified
Catastrophic Leave, February 1, 2012 – March 14, 2012
Frances Clark, Bus Driver, Transportation Dept., 13 years
Hosie Thomas, Security Coordinator, Northwood High School, 3 years

6.05 Out of State Travel (General Fund). The board approved requests for out of state travel (General Fund) as recommended by staff and submitted in the mailout.

Item No. 7

7.01 Bids (Purchasing). The board approved the following bids as recommended by staff and submitted in the mailout on the bid tabulation sheets: (1) Community Products, LLC, dba Rifton for discount percentage of 25% for the purchase of Physical Therapy Equipment and Supplies – Catalog; (2) Lee’s Transmission, Inc., totaling $4,855.00 for the purchase of Transmission Repairs for Transportation; and Ross Bus and Equipment Sales, Inc., totaling $47,180.40 for the purchase of Integrated Child Restraint Seats. A copy of the bid tabulations sheets is a part of the permanent records of the CPSB February 21, 2012 meeting.
7.02 Sale of CPSB Properties. The board approved the following bids as submitted in the mailout on the bid tabulation sheets: (1) Timothy R. Thomas – Living Word Christian Fellowship, totaling $51,000 for the Sale of George P. Hendrix Elementary School Property; and (2) David D. Kirby, totaling $337,000 for the Sale of Hosston Alternative School Property. A copy of the bid tabulation sheets is made a part of the permanent records of the CPSB February 21, 2012 meeting.

7.03 Piggyback on Playground Equipment Bid. The board approved parish school boards and governmental agencies in Louisiana to piggyback on CPSB Playground Equipment Bid (10P-10).

7.04 Bids (Construction/Capital Projects). The board approved the following bids as submitted in the mailout on the bid tabulation sheets: (1) Camus Electric Co., Inc., with a base bid, for the sum total of $251,255 for Project 2012-QB2A, “Security Cameras at North Highlands, Northside, Pine Grove, Blanchard”; and (2) Camus Electric Co., Inc. with a Base Bid for the sum total of $224,720.00 for Project 2012-QB2B, “Security Cameras at Westwood, Claiborne, Sunset Acres, Cherokee Park”. A copy of the bid tabulation sheets is attached and made a part of the permanent record of the February 21, 2012 CPSB meeting.

Item No. 8

8.02 Resolution for Continued Employment. The board approved the resolution directing the superintendent to write letters of reasonable assurance of continued employment as submitted in the mailout.

8.03 Begin the Process to Rename the New Wing at Broadmoor for Ed Hearron. The board approved staff beginning the process of renaming the new wing at Broadmoor Middle Laboratory School for Ed Hearron.

8.05 Resolution Authorizing the Issuance of General Obligation Bonds. The board approved the following resolution authorizing the issuance of General Obligation bonds as submitted in the mailout.

RESOLUTION
A resolution giving preliminary approval to the issuance of not to exceed Eleven Million Five Hundred Thousand Dollars ($11,500,000) of General Obligation School Refunding Bonds of Parishwide School District of Caddo Parish, Louisiana; making application to the State Bond Commission for approval of said Bonds; and providing for other matters in connection therewith.

WHEREAS, pursuant to the provisions of Article VI, Section 33 of the Constitution of the State of Louisiana of 1974, Sub-Part A, Part III, Chapter 4, of Title 39 of the Louisiana Revised Statutes of 1950, as amended, and other constitutional and statutory authority, Parishwide School District of Caddo Parish, Louisiana (the Issuer) has heretofore issued $14,000,000 of General Obligation School Bonds, Series 2004 (the Series 2004 Bonds); and

WHEREAS, in order to provide debt service savings to the Issuer, the Issuer desires to refund all or any portion of the Issuer’s outstanding Series 2004 Bonds pursuant to the provisions of Chapter 14-A of Title 39 of the Louisiana Revised Statutes of 1950, as amended, and other constitutional and statutory authority (the Act), through the issuance of its refunding bonds; and

WHEREAS, pursuant to the Act, and subject to the approval of the State Bond Commission, the Issuer desires to accomplish the refunding by authorizing the issuance of not exceeding Eleven
Million Five Hundred Thousand Dollars ($11,500,000) of its General Obligation School Refunding Bonds (the Bonds), to be payable from unlimited ad valorem taxes; and

WHEREAS, the Issuer desires to make formal application to the State Bond Commission for approval of the issuance of the Bonds;

NOW, THEREFORE, BE IT RESOLVED by the Parish School Board of the Parish of Caddo, State of Louisiana (the Governing Authority), acting as the governing authority of Parishwide School District of Caddo Parish, Louisiana, that:

SECTION 1. Preliminary Approval of the Bonds. Preliminary approval is given to the issuance of not exceeding Eleven Million Five Hundred Thousand Dollars ($11,500,000) of General Obligation School Refunding Bonds (the Refunding Bonds), of the Issuer, to be issued for the purpose of refunding all or any portion of the Issuer’s outstanding General Obligation School Bonds, Series 2004, and paying the costs of issuance of the Refunding Bonds, said Refunding Bonds to be payable from and secured by unlimited ad valorem taxes now being levied and collected annually in excess of all other taxes on all the property subject to taxation within the territorial limits of the Issuer. The Refunding Bonds shall bear interest at a rate or rates not to exceed four and one-half percent (4.5%) per annum, to be determined by subsequent resolution of this Governing Authority at the time of the sale of the Refunding Bonds, and shall mature no later than March 1, 2029. The Refunding Bonds shall be issued in fully registered form, shall be sold to the purchasers thereof at a price of not less than 97% of par, plus accrued interest, and shall have such additional terms and provisions as may be determined by this Governing Authority.

SECTION 2. Employment. This Governing Authority finds and determines that a real necessity exists for the employment of special bond counsel in connection with the issuance of the Refunding Bonds, and accordingly, Foley & Judell, LLP, of New Orleans, Louisiana, as Bond Counsel and Jacqueline A. Scott & Associates, APLC, of Bossier City, Louisiana, as Co-Bond Counsel, are hereby employed to do and perform work of a traditional legal nature as bond counsel with respect to the issuance and sale of said Refunding Bonds. Said Bond Counsel and Co-Bond Counsel shall prepare and submit to this Governing Authority for adoption all of the proceedings incidental to the authorization, issuance, sale and delivery of said Refunding Bonds, shall counsel and advise this Governing Authority as to the issuance and sale thereof and shall furnish their opinions covering the legality of the issuance of the Refunding Bonds. The total combined fee of Bond Counsel and Co-Bond Counsel shall be fixed at a sum not exceeding the maximum fee allowed by the Attorney General's fee guidelines for comprehensive, legal and coordinate professional work in connection with the issuance of revenue bonds and based on the amount of said Refunding Bonds actually issued, sold, delivered and paid for, plus "out-of-pocket" expenses, said fees to be contingent upon the issuance, sale and delivery of said Refunding Bonds. That pursuant to instructions from the Superintendent, Bond Counsel (in conjunction with Fiscal Services, Inc., of New Orleans, Louisiana, with respect to the compilation of statistical information) shall cause to be prepared an official statement with respect to the sale of the Bonds and the costs of the preparation and printing of said official statement shall be paid from the proceeds of the issue for which it has been prepared. Said Official Statement may be submitted to such nationally recognized bond rating service or services, together with a request that an appropriate rating be assigned. Payment for all ratings shall be made by the Superintendent upon presentation of appropriate statements from the particular rating service furnishing the ratings. A certified copy of this resolution shall be submitted to the Attorney General of the State of Louisiana for his written approval of said employment and of the fees herein designated, and the Superintendent is hereby empowered and directed to issue vouchers in payment for the work herein provided for upon completion of the work herein specified and under the conditions herein enumerated.
SECTION 3. State Bond Commission. Application is hereby made to the State Bond Commission, Baton Rouge, Louisiana, for approval of the issuance and sale of the Refunding Bonds and for consent and authority to proceed with the issuance and sale of the Refunding Bonds as provided above, and Bond Counsel is directed to make application to the State Bond Commission in accordance with the foregoing on behalf of the Governing Authority.

By virtue of applicant/issuer’s application for, acceptance and utilization of the benefits of the Louisiana State Bond Commission’s approval(s) resolved and set forth herein, it resolves that it understands and agrees that such approval(s) are expressly conditioned upon, and it further resolves that it understands, agrees and binds itself, its successors and assigns to, full and continuing compliance with the State Bond Commission Policy on Approval of Proposed Use of Swaps, or other forms of Derivative Products Hedges, Etc., adopted by the Commission on July 20, 2006, as to the borrowing(s) and other matter(s) subject to the approval(s), including subsequent application and approval under said Policy of the implementation or use of any swap(s) or other product(s) or enhancement(s) covered thereby.

SECTION 4. Appointment of Investment Banker/Underwriter. Stephens Inc., of Baton Rouge, Louisiana (the Underwriter), is hereby appointed as investment banker/underwriter in connection with refunding the Series 2004 Bonds, any compensation to be subsequently approved by the Issuer and to be paid from the proceeds of the Refunding Bonds and contingent upon the issuance of the Refunding Bonds; provided that no compensation shall be due to said investment banker/underwriter unless the Refunding Bonds are sold and delivered.

SECTION 5. Sale of Bonds. The Bonds are hereby authorized to be sold to the Underwriter, and the Superintendent is hereby authorized to execute a Bond Purchase Agreement with the Underwriter, in form and substance satisfactory to Bond Counsel to the School Board, provided the sale of the Bonds produces minimum net present value savings (after payment of all costs) to taxpayers of not less than 3.00% of the principal amount of Series 2004 Bonds being refunded.

The foregoing resolution having been submitted to a vote, the vote thereon was as follows:

And the resolution was declared adopted on this, the 21st day of February, 2012.

_________________________   __________________________
Secretary                  President

STATE OF LOUISIANA
PARISH OF CADDO
I, the undersigned Secretary of the Parish School Board of the Parish of Iberia, State of Louisiana, do hereby certify that the foregoing pages constitute a true and correct copy of a resolution adopted by said Parish School Board on February 21, 2012, giving preliminary approval to the issuance of not to exceed Eleven Million Five Hundred Thousand Dollars ($11,500,000) of General Obligation School Refunding Bonds of Parishwide School District of Caddo Parish, Louisiana; making application to the State Bond Commission for approval of said Bonds; and providing for other matters in connection therewith.

IN FAITH WHEREOF, witness my official signature on this, the 21st day of February, 2012.

_______________________________
Secretary

8.06 **YEP Contract Renewal.** The board approved the renewal of the Youth Enrichment Program contract as recommended by staff and submitted in the mailout.

8.07 **Proposed Student Check-Out Policy.** The board approved the proposed student check-out policy as submitted in the mailout.

8.08 **Proposed Revision to CPSB Policy GBCB-R Staff Conduct – Notice of Criminal Proceedings.** The board approved the proposed revisions to CPSB Policy GBCB-R Staff Conduct – Notice of Criminal Proceedings as submitted in the mailout.

8.10 **Revision to CPSB Policy GBN/JP.** The board approved the proposed revision to CPSB Policy GBN/JP as submitted in the mailout.

8.11 **Read Across Louisiana Proclamation.** The board approved the Read Across Louisiana Proclamation as submitted in the mailout.

8.13 **Special Education MOU.** The board approved the MOU with the State Department of Education for Special Education as recommended by staff and submitted in the mailout. A copy of the MOU is filed in the official papers of the February 21, 2012 CPSB meeting.

**PERSONNEL RECOMMENDATIONS**

*Mrs. Bell moved, seconded by Ms. Priest, that we pull all personnel recommendations.* Mrs. Bell stated she believes if there is a question, we need to pull all of the recommendations rather than pulling only certain recommendations. Ms. Priest said it is the board’s responsibility to hire and evaluate the superintendent, so she concurs that we should not pull out one recommendation.

Ms. Trammel stated that her concern is we have A, B, C, and D; and certain ones are pulled because we don’t have a budget; so maybe we should wait until a budget is received and vote on all of these.

Mrs. Crawley said she does not understand, because she wants to postpone all of the recommendations with the exception of principal appointments. She asked if the superintendent considers those positions that are not school site based more important than a chemistry teacher or the pupil teacher ratio. Dr. Dawkins responded that all the positions are important and are not more important than anything else in the budget, and these are in the current year budget, so he doesn’t understand. Mrs. Crawley said she doesn’t understand and the board does not have a budget for the coming year, and based on the fact that many employees were let go, but she believes we may have been able to get a chemistry teacher if the pupil teacher ratio had not been changed. Dr. Dawkins confirmed that these positions will not affect the pupil teacher ratio.
Mrs. Crawley asked if a chemistry teacher can be hired for Fair Park, and Dr. Dawkins said that is correct. Mrs. Crawley said she wants a budget with a school site focus. Dr. Dawkins added that these positions have been in the budget for at least 10 years, and Mrs. Crawley stated she understands, but she voted against the budget.

Mr. Ramsey moved, seconded by Mr. Pierson, to approve all personnel recommendation as submitted by the superintendent. Vote on the motion to approve all personnel recommendation carried with Board members Green and Crawley opposed and Board members Riall, Pierson, Hooks, Trammel, Priest, Crawford, Rachal, Ramsey, Armstrong and Bell supporting the motion.

APPROVAL TO SEEK LEGISLATIVE AUTHORITY FOR UP TO ½% SALES TAX INCREASE WITH VOTER APPROVAL

Mrs. Bell moved, seconded by Mr. Pierson, to approve staff seeking Legislative authority for up to ½% sales tax increase with voter approval. Mr. Rachal reiterated his previous comments that he doesn’t believe it is the staff’s recommendation and reminded everyone that it is the Legislators responsibility to write legislation. He again reminded everyone how Caddo’s sales tax has increased and he is not in favor of this. Vote on the motion failed with Board members Green, Pierson, Trammel, Priest and Bell supporting the motion and Board members Riall, Crawley, Hooks, Crawford, Rachal, Ramsey and Armstrong opposed.

PROPOSED REVISIONS TO SCHOOL ATTENDANCE ZONES

Mrs. Armstrong moved, seconded by Mr. Hooks, to approve the proposed revisions to school attendance zones but retain the current northern boundary for Fair Park. Mrs. Armstrong stated her belief that it will be a stabilizing map; and she does not want to impose any adult feelings on this Fair Park area and the students in the area being discussed should be able to attend Fair Park not only now, but in the future. Mr. Hooks echoed Mrs. Armstrong’s comments. Mr. Ramsey moved, seconded by Mrs. Crawford, that a friendly amendment or amendment be added to the motion to clarify that the students currently attending schools that will not be in the new attendance zones will be grandfathered into those schools and allowed to remain; however, should the student be expelled due to behavior and/or attendance issues, the student will lose grandfather status and be returned to the school in their own attendance zone. Upon becoming eligible for returning to their home school, he closed by stating there is nothing in the amendment that is intended to supersede Federal or State law. Mr. Ramsey stated if the School District is going to handle the attendance zone, he believes clarity is included so students have a clear understanding of what is expected of them. Mr. Pierson moved, seconded by Mrs. Bell, that the board accept the staff’s recommendation in terms of the proposed changes in school zones, along with the proposed amendment by Mr. Ramsey. Mr. Pierson stated his lack of understanding with Mr. Ramsey’s friendly amendment; however he does follow the amendment for bus riding purposes. Mrs. Bell stated her agreement with Mr. Pierson’s comments.

Vote on the original motion with the friendly amendment carried with Board members Pierson, Trammel and Bell opposed and Board members Riall, Green, Crawley, Hooks, Priest, Crawford, Rachal, Ramsey and Armstrong supporting the motion.

APPROVAL OF CPSB MEMBERS REDISTRICTING PLAN
Ms. Priest moved, seconded by Mrs. Bell, to approve Plan 12. Ms. Priest stated that board members have had an opportunity to meet with the demographer and review the maps as well as the precincts and she believes Plan 12 is basically palatable to the voters. She said she believes it is time for the board to move forward.

Mrs. Crawley moved, seconded by Mr. Hooks, that the board approve District Plan 11. She explained that she believes Plan 11 is the most diverse plan and she likes having the diversity this plan offers her district. All board members will also keep the schools that are in their district and is the closest to the current plan. She said it is important to her that parents/students attend a particular school that is also in the district where the board member is not only over that school.

Mr. Rachal called for the question to end debate, seconded by Mr. Ramsey. Ms. Priest reminded Board member Hooks that approval of this plan means Judson will no longer be in his district. Vote on the motion to end debate failed with Riall, Green, Trammel, Priest and Crawford opposed and Board members Pierson, Crawley, Hooks, Rachal, Ramsey, Armstrong and Bell supporting.

Ms. Priest stated that in reviewing Plans 10 and 11 basically insured that two board members were outside their district lines (Priest and Hooks), and Plan 12 addresses and corrects these situations and is why she is recommending Plan 12. She further stated that Plan 11 would make some significant changes to District 5 and 7.

Mrs. Crawley said when the board members visited with Mr. Joiner, the only change between Plan 12 and 11 was Ms. Trammel would gain Middle Magnet. It also changed Mr. Pierson’s, Mrs. Crawford’s, Ms. Trammel’s and her districts, and she believes what is presented is wrong. Mrs. Crawley asked for a recess in order to contact Gary Joiner.

Mr. Abrams stated that because the board is not under a deadline for this, it is appropriate to postpone it to the next meeting and make certain it is correct.

Miss Green moved, seconded by Mrs. Crawley and Mrs. Armstrong, to postpone. Mrs. Bell noted that Dr. Joiner was present at a board meeting a couple of weeks ago, and he asked for questions; and because the board has had this for the past 3-4 months, she believes the board needs to move forward and vote on this. Mrs. Crawford noted there is a mistake in Plan 11. Ms. Trammel asked for clarification that the motion on the floor will postpone the redistricting; because the concern expressed relative to Caddo Middle Magnet, and this school has always been in her district, is confusing since she has always understood that the magnet schools were shared among all the board members since students from all districts attend the magnet schools.

Ms. Priest further explained her reason for recommending Plan 12 is because it does not have any errors in it. Mrs. Crawley stated that she has not studied District 12 and when she visited with Mr. Joiner, he told them that the only change to Plan 10 was the magnet issue; and Plan 11 should not incorporate any change other than Mr. Pierson’s, hers, Ms. Trammel’s and Mrs. Crawford’s from Map 10; and at this time, she has not checked Plan 12. Mr. Pierson said he believes we have had ample time and board members were in Mr. Joiner’s office together to discuss those things that were different. He said he believes it has been dealt with and now it is a matter of the board voting and moving forward. He reminded everyone that every board member represents areas where the children attend another school, and believes the board needs to move on with Plan 12. Mr. Rachal called for the question to end debate on the motion to postpone. Vote on the motion to end debate carried with Board members Trammel and Bell opposed. Vote on the motion to postpone carried with Board members Pierson, Trammel, Priest and Bell opposed.
Mr. Rachal suggested scheduling an open session to discuss the various aspects of the proposed redistricting plan. Mrs. Bell said she believes only one board member has a problem with this, and Mr. Riall said there is no motion on the floor for discussion. As a point of personal privilege, Mrs. Bell stated there may be a need to schedule sessions for those having problems with what is proposed for their district. Mr. Riall said if a decision is made to hold a work session, it will be the board member’s discretion whether or not they attend.

**ANNOUNCEMENTS AND REQUESTS**

Ms. Priest requested that the Superintendent and Executive Committee meet to develop a committee structure for the Board with the exception of personnel. She said having this type structure to address items for the board’s consideration, she believes, will allow for items to be debated in committee and not in a full school board meeting. She asked that staff move on this request as expeditiously as possible.

Mr. Hooks said that anytime someone wants to speak with him, they can get his number from the secretary; however, if the call is made on a board meeting date, he does not answer his phone, but he will return the call later that evening or the next morning. Mr. Hooks also announced that he holds town hall meetings and if that doesn’t work, he can be found every Sunday morning at 3100 Hollywood Avenue at Zion Baptist Church’s 8:00 and 10:00 a.m. services. He said no one has to use the podium and microphone to hide behind, because anytime anyone does that, they are considered a coward. Mr. Hooks said he can be confronted at anytime and his number is always available; and he doesn’t believe there is a person that will say he has never returned a telephone call.

Mr. Pierson announced that on Wednesday, February 22nd, at 6:00 p.m. at Booker T. Washington, he will hold a town hall meeting and board members are invited to attend. Mr. Pierson also alerted the staff that in bringing J.S. Clark back on line next year, he does not want to wait until mid-summer to staff the school and encouraged the staff to consider moving forward in preparing to select a principal and staff so they can spend the summer preparing to meet the students when J.S. Clark opens in August.

Mr. Riall reported that he met with a group of people from Northwood High School, Northwood Booster Club, who have done an enormous amount of work on their own and financed improvements. This group noted some bleacher problems they have and asked staff to look at any of the aluminum bleachers at schools that closed to possibly move them to Northwood.

**EXECUTIVE SESSION**

**Student Readmission Appeals.** Mrs. Bell moved, seconded by Ms. Priest, to approve staff’s recommendation for N.H., J.B., J.B.(2). The parents are in agreement with staff’s recommendation. Vote on the motion carried unanimously.

**Approval of Termination of Probationary Teacher.** Mr. Ramsey moved, seconded by Mrs. Armstrong, to approve the termination of a probationary teacher in accordance with staff’s recommendation. Vote on the motion carried unanimously.

**Student Readmission Appeal.** Ms. Priest moved, seconded by Mrs. Bell, to go into executive session for up to 10 minutes for a student readmission appeal. Vote on the motion carried and the board went into executive session at approximately 6:37 p.m.

The board reconvened in open session at approximately 7:18 p.m. Mr. Ramsey moved, seconded by Ms. Priest, to uphold staff’s recommendation for A.T. Mr. Ramsey clarified that staff’s
recommendation is the student is at Hamilton Terrace until May 30, 2012 and after completing that, the student returns to the neighborhood school (Green Oaks).

Mr. Pierson moved, seconded by Miss Green/Mr. Hooks, that A.T. return to her neighborhood school immediately with a behavior contract. Vote on the motion carried with Board member Crawford opposed.

Adjournment. Ms. Priest moved, seconded by Mrs. Bell, to adjourn. Vote on the motion to adjourn carried and the meeting adjourned at approximately 7:21 p.m.

__________________________________  __________________________________
Dr. Gerald D. Dawkins, Secretary   Steve Riall, President
The Caddo Parish School Board (CPSB) held a special work session in its office at 1961 Midway, Shreveport, Louisiana at 11:30 a.m. on Thursday, February 23, 2012 with President Steve Riall presiding and the following school board members present being a quorum: Jasmine Green, Carl Pierson, Charlotte Crawley, Curtis Hooks, Mary Trammel, Lillian Priest, Bonita Crawford, Barry Rachal, Larry Ramsey, Ginger Armstrong and Dottie Bell. Also present were Secretary Gerald D. Dawkins, and Reginald Abrams, legal counsel. Mr. Hooks led the prayer and Pledge of Allegiance.

Superintendent Dawkins announced that staff will present a preliminary draft of next year’s budget with the disclaimer that as of this date, we do not know the impact of the MFP funding or any proposed vouchers or scholarships on the MFP; however additional information should be known next week on the MFP funding for the districts. He further stated that the proposed budget as presented today does not include any layoffs, and highlighted some of the historical aspects of the district, i.e. District School Performance Scores, graduation rates, gains seen. He said in 2009 the state took over nine schools in Caddo and we lost approximately $40 million in MFP dollars. He further stated that the AU status in Caddo’s schools shows that in 2007, Caddo had 12, and in 2011, there were 13. He reminded everyone there are schools in the system that are persistently under-performing and some have been since 2001-2002. Dr. Dawkins stated that in 2009 if the state had taken over the nine targeted schools in Caddo (Oak Park, Caddo Heights, Barret, J.S. Clark, Bethune, Fair Park, Green Oaks, Woodlawn and BTW), Caddo would have lost $40 million dollars in MFP funding, but the district decided to invest $15 million and save those two schools. He also reminded everyone that the 2.75 reduction in the state MFP began in 2009-10 and represented approximately $5 million and that the schools on Academic Watch have their SPS above 65, and would have passed had the cutoff score not continued to be raised.

Jim Lee, director of finance, shared with the board the first draft of the General Fund budget for 2011-2012. He pointed out that the board must, by law, adopt by July 1st of each year a budget for the coming year and staff would like to have one in place by the end of June. Mr. Lee said that last year the budget reflected spending beyond revenues by $15 million, which meant staff had to come up with $15 million in cuts, which is something the board has done in the past. Mr. Lee stated that staff responded to the board’s request to have the budget earlier this year; and by bringing the budget earlier, staff is hopeful of having an approved budget by April.

Big items that staff has been unable to pinpoint as tightly as they have in the past include the MFP funding from the state (what we will get or any vouchers) and it may be next week before this number is known. Secondly, health care cost has seen an increase with each year and at this time, the Insurance staff has budgeted a proposed 10% increase. While the Insurance staff has been able to negotiate down, staff believes it has been negotiated as low as possible.

Mr. Lee provided some historical information on the budget, i.e. how Caddo has done over the past five years, estimates for the 2011-12 year, and a snapshot of next year’s proposed budget, the designated and undesignated fund balances, and what staff is doing to strengthen the ending fund balance each year. He shared with the board a comparison of the last five year budgets, pointing out the difference in a balanced budget and a restrictive definition of a balanced budget. In the past 10 years, Caddo has actually had one truly balanced budget, and we always do better because of vacant positions and conservative budgeting. Projected retirement increases, projected no growth MFP for possibly the 4th year, and the reduction in our MFP and taxes because of the two charter schools all will impact the budget.

A copy of the detailed budget was presented to each board member, along with a brief projection of how staff believes the District will complete the 2011-12 year and a proposed balanced budget for 2012-13. Items in the current year’s budget that staff has factored out of the proposed budget
include targeted school incentives, staffing, block scheduling, support services, consolidation of schools, and M & S. Following Mr. Lee’s presentation, President Riall announced that each Board member will have the opportunity to ask two questions and after every board member has asked their questions, he will go back around the table until the allotted time runs out.

Mr. Pierson asked how much will we save in transportation with the combination of West Shreveport and Central to J. S. Clark? Mr. Lee said it depends on the number of buses now at each school and after consolidation how many buses/drivers/benefits will be reduced.

Regarding reductions, Mrs. Crawley asked what percentage is the total reduction at Central Office Support Services? Mr. Lee said approximately 6%, and some of the Special Education reductions are actually a move of costs from the General Fund to the IDEA budget. Mrs. Crawley asked how are we going to provide the extra credits at no expense if the high school schedule is changed? Dr. Dawkins responded that staff has looked at various options and the seven hour day is the same amount of time everyday for teachers, and would be a change in the scheduling formula and not a change in the teaching formula.

Mr. Hooks stated he will be out of town next week, but when he returns he would like to meet with the superintendent and Mr. Lee to get his questions answered.

Mrs. Bell stated she is glad that at this time we will not be laying anyone off, and asked about the process of building a budget without knowing what the Governor is going to do relative to MFP. Mrs. Bell noted that in the charter schools, we have given them $5 million; and if we are discussing a budget and do not know how many charters might be established, does that mean this budget can change after the next few months when the charter school and vouchers come from the MFP funds Caddo typically receives? Mrs. Bell asked about the target school costs and do these expenses stop after this year? Mr. Lee said the current year (2011-12) is the last year and these expenditures will cease.

Mr. Riall asked about the items impacting the General Fund (three year comparison) and the retirement costs of $2 million in 2013. Mr. Lee responded that the feedback Caddo receives each year increases by approximately $2,000. He further explained that the actuarial results reflect an increase to 20.5% which is a small increase from what it was. Regarding staffing and business services, he asked where the 23 bookkeepers are located (Central Office or school site.) Mr. Lee explained these are the bookkeepers and clerical persons in the Finance, Accounting, Accounts Payable, and Payroll areas.

Mrs. Crawford asked about the reduction factor and if this means we will go to a 7-hour day and if so, what will be the hours? The superintendent said staff has not determined that at this time and everything is preliminary. Mrs. Crawford asked if she understands we will be adding an hour and the superintendent explained we will be adding another class period to the day, not another hour.

Mr. Ramsey asked Mr. Lee if any assumptions were made in the preparation of this budget that are contingent upon board approval? Mr. Lee said everything is contingent on Board approval. Mr. Ramsey said he is referencing legislative action or other board action, and Mr. Lee said the only thing would be any adjustments in the MFP funding. Once everything goes to the Legislature and if BESE approves what is sent through, there could be an impact on the budget. Mr. Lee also added that the staffing formula could possibly change, i.e. change in block schedule for high schools. Mr. Ramsey asked about Phase 3 of the Vision 2020 Plan and the discussion on the closure of some of the schools. Mr. Lee said that will actually be the following year budget and this year’s budget reflects reopening J.S. Clark. Dr. Dawkins also noted that Phase 3 of the Vision 2020 Plan will not impact this budget since most of Phase III was contingent on a bond issue. Mr. Ramsey said he believes this needs to be made clear to the public.
Mrs. Armstrong asked about the staffing formula for instructional services and reduction of 111 teachers? Mr. Lee said that is correct and is largely due to block scheduling and will be addressed through attrition. Mrs. Armstrong noted that block scheduling continues to be referenced as if it is a done deal; and at this time, that is not the case. She also asked if any other consideration has been given to closing Building 6, moving the operation to another building and placing Building 6 on the market? Mr. Lee explained this is not reflected in the budget at this time; and the savings will not be significant since you will not lose employees, which is the biggest cost. He also said if we sell the building, the money will go into Capital Projects, and any savings you might see would be in operational expenditures, i.e. utilities.

Mrs. Crawley asked if Caddo goes to a seven period day and doesn’t increase the length of the day, does it mean students will be in each class shorter periods of time and would we go to school more days? Dr. Dawkins said no, because there is a seed time and a waiver with the state because the time is not the same. He further stated there are some schools that attend an additional hour each day; and since we negotiated incentives with the state, the staff will work with them on this. Mrs. Crawley asked if she understands correctly that the superintendent will bring a plan to the board, but at this time is explaining to the board how the budget will be affected? Mrs. Crawley asked for staff to look at the savings if all travel involving General Fund is restricted other than in-state and students or teachers receiving awards and will the savings be close to $600,000? She asked if out-of-state General Fund travel could be suspended for a year so we could give teachers the $200 M&S?

Ms. Trammel asked about instructional services and the adjustment for K-8 middle school principals? Mr. Lee responded that staff is looking at this. Dr. Dawkins announced staff just received a recommendation from Jeff Rahmburg and it will be figured in the cost.

Mrs. Bell said this is a good budget, but it is not a true budget since we do not know the MFP amount, we don’t know how vouchers or charters will be implemented, and it is important to know answers to these questions because it will affect our budget. Mrs. Bell also asked if four additional charter schools are added, could this mean Caddo’s budget would be affected by about $20 million? She said it is important to understand what will happen all across the state and asked Mr. Lee the cost to run the whole system? Is it $378 million? Mr. Lee said $378 million is only the General Fund, and does not include Title I funds, Federal funds, Capital Projects, and other Federal/State monies which brings the total amount to approximately ½ a billion dollars. Mrs. Bell also asked about the $285 million in instructional services and if she understands vouchers, charters, and virtual schools will affect everything that is run in the district?

Mr. Riall asked Mr. Lee when will the MFP amount be known? Mr. Lee responded possibly next week when BESE decides on the formula that will go to the Legislature. Mr. Riall asked about the $5 million reduction of the remediation program. Mr. Lee said that is the line item for the target school incentives.

Mr. Ramsey said he believes going through the budget process is very critical and there will always be some unexpected events during the year; however this exercise gives the staff and board members an opportunity to see where we are and where we need to go. He said he believes that in previous years this process began too late resulting in the board going through some contentious board meetings to get a budget approved. He added he believes this process gives the public a better view of what must be done to address the budget each year and he believes it needs to be done for a three to five year timeframe. He encouraged everyone to be prudent going through this exercise and determine what we must have and what we can do without. While he understands this will not be the final budget in April, he believes this affords the opportunities to discuss and ask needed questions. Mr. Ramsey also commented that even though it is not known at this time how vouchers will impact the budget, he believes there is a
good feeling that it will happen; and asked the superintendent and Mr. Lee if they agree we need to add a line for vouchers as was done for the charters? He also referenced funding for virtual school components and a component to better address the needs of middle school and over age students and asked if these were considered in this budget? Mr. Lee said they have not been figured yet, but staff is still looking at this.

Mrs. Armstrong asked Mr. Lee about the Business Services and the $98,000 adjustment in fees? Mr. Lee explained they are fees relative to workers compensation. Mrs. Armstrong asked about the School Telephones and the $103,000 budgeted amount, and Mr. Lee explained the increase is because they no longer qualify for the ERate rebates.

Miss Green asked about the cut last year in the maintenance staff and budget, and Mr. Lee responded that the part-time custodians were cut. She also stated if there is any money left over, she believes we need to look at bringing them back. Dr. Dawkins said staff will look at this along with other areas, i.e. increased fuel costs.

Mr. Pierson asked if any provision will be made in the budget for VYJ? Mr. Lee explained only the $30,000 we had in the budget for this year. Dr. Dawkins reported that a meeting was held with VYJ representatives relative to some reorganization in process; and hopefully we will have a clearer understanding of the relationships in this are and what needs to be done. Mr. Pierson asked, in terms of savings, about natural gas for buses and would this be a savings? Dr. Dawkins responded that with the rise in fuel costs, this is certainly something staff needs to look into. Mr. Jones stated that at this time there is only one facility in the area that can refuel buses and staff has been waiting to see if additional outlets for natural gas are placed in the area, since it takes approximately five to six hours to refuel a gas bus which is another factor to consider.

Mrs. Crawley asked about the $40 million figure referenced in comments about charter schools and $5 million for MFP with charter schools, because she doesn’t believe this is balancing the money received per child with the money we save since we don’t need as many teachers, we are not paying utilities, etc., if the money is to follow the student. Mr. Lee said that was the point and we would have needed tremendous layoffs to cover the $40 million a year, but believes it was a good investment since it kept us from laying off a lot of positions. Mrs. Crawley said she is not arguing that point, but she is only attempting to figure out if it is really going to cost the District $40 million? She is interested in a true and accurate number. Mr. Lee reminded her also that it doesn’t matter, because if the students are enrolled at the charter school on October 1 and then return to Caddo, Caddo does not get the money, but it stays with the charter school.

Mrs. Bell asked how much will the state pay per student in the public schools and how much will they pay per student in the charters? She also asked if a student is removed from the charter school, do we get the remainder of the money that went to the charter school, and does the local district receive any money from the state for a private school student that enrolls in the public school system? Mr. Lee explained that it all depends on the two count dates, October 1 and February 1. If a student is in Caddo before October 1, we get the money; if not, we don’t. He also added that at this point, private schools are not getting the money, but if this happens next year and vouchers are implemented, then the private school receives the money from the state. Mrs. Bell asked for clarification of a student dropping from a charter in November and enrolling in Caddo, will Caddo receive any money for that student? Mr. Lee said that would be included in the February 1st count and there would then be some lag time before we received any money.

Mr. Riall asked why are we reducing the number of bus drivers when he daily gets calls about bus drivers not showing up to pick up students? Mr. Lee said those are vacant positions that we have not filled for savings reasons.
Mrs. Crawford asked if the grants the District receives are a part of the General Fund or a separate fund? Mr. Lee explained they are not a part of the General Fund unless it is a Federal Fund and they pay the District indirect cost money.

Mr. Ramsey asked Mr. Lee what assumption was made for the MFP dollars? Mr. Lee responded that staff based it on the current level of funding per student that comes to the General Fund. He further explained that a small portion is broken out for the minimum amount required to go the Child Nutrition Fund. He said at this time, we are not expecting an increase in the per pupil cost or that we expect to see 1,000 new students, but Child Nutrition has a $4 million fund balance and operated $1.5 million in the black last year, so the portion allotted to Child Nutrition was left in the General Fund last year. Mr. Ramsey stated that is the sign of a good budget man.

Mrs. Armstrong asked about the $350,000 operation expense increase in transportation costs. Mr. Lee said the majority of that is the expected rise in fuel costs. Mrs. Armstrong asked when will FuelMan be up for rebid and Mr. Lee responded he will get that information from appropriate staff and provide it to the board. Mr. Lee also explained that some additional maintenance costs are included in this expenditure.

Mr. Lee said in the comments about MFP, he still stands by his statement that we should have something next week; however, BESE proposes it to the Legislative body and until they accept it, that amount is not definitive.

Mr. Ramsey shared his appreciation to Superintendent Dawkins and the staff for their work and that he would like to see this every year. Mrs. Armstrong echoed Mr. Ramsey’s comments.

Dr. Dawkins announced that staff is available to board members who may have questions.

There being no additional questions, the budget work session adjourned at 12:59 p.m.
March 6, 2012

The Caddo Parish School Board (CPSB) met in special session in its office at 1961 Midway Street, Shreveport, Louisiana, at approximately 4:30 p.m. on Tuesday, March 6, 2012 with President Steve Riall presiding and Board members Jasmine Green, Carl Pierson, Charlotte Crawley, Curtis Hooks, Mary Trammel, Lillian Priest, Bonita Crawford, Barry Rachal, Larry Ramsey, Ginger Armstrong and Dottie Bell present representing a quorum. Also present were Superintendent Gerald Dawkins, Legal Counsel Reginald Abrams, staff and other visitors. Ms. Trammel led the invocation and Pledge of Allegiance.

As a point of personal privilege, Board member Hooks announced that the following students from Fair Park participated in the Regional Science Fair, the first in 40 years: James Collins, Derek Johnson, Abigail Ibara, Jecario Moore, and Breanka Stewart. Mr. Hooks also announced that today was declared Morris Claiborne Day, and Morris Claiborne is a graduate of Fair Park. Superintendent Dawkins announced that these students will be formally recognized at the March 20th CPSB meeting.

VISITORS

Bessie Smith, Stoner Hill Neighborhood Action Group, stated that she is here today to get an understanding of the proposal to change their voting district. She said they want to remain in Precinct 64. She said many years ago children were forced to leave Valencia to attend Byrd High School. Even though they took on the challenge with great hesitation, they made Byrd High School their home. She further stated that now in 2012, the students are again being forced to follow a new redistricting plan. Mrs. Smith said it is believed that it is in their children’s best interest that members of the CPSB develop a redistricting plan where the children will remain in their precinct and continue at the same high school – Byrd High School. Mrs. Smith encouraged board members to please vote for Plan 13. Mrs. Smith also recognized other members of this neighborhood group present at the meeting.

Sandra Townsend, Anderson Island resident, along with others in that neighborhood expressed their concern for the children in their area that attend Byrd High School and they desire for Precinct 8 to remain in CPSB District 4 to ensure that the children’s interest are well represented and remain in the current board member’s district.

Howard Allen requested that members of the CPSB vote for the District Plan where they will remain in District 4. He said he feels it is important since children are zoned to attend Byrd High School and that it remains as it is. Having visited with Dr. Gary Joiner, Mr. Allen requested that Superintendent Dawkins, School board Chairman and members, honor their wishes and vote for Plan 13. A packet of petitions was presented for the files.

Monica Johnson expressed her appreciation for the assistance she received from Curtis Hooks, District 5 and how expeditiously she received an answer to.

Cleve Arkansas shared his concern about the amount of programs teachers and students have to endure only to find they are being shut down before his work is completed. He shared that after Fair Park was declared an AU school, there was a program put into place in an effort to help students; and how adjustments have been made since its implementation, and even now that the District will return to the original 7 period schedule. In discussing the budget, he believes he has heard board members say they have put money into these schools without any results; however, he believes if the board will allow a task (program) to be completed, better results will be seen. He encouraged the board to consider if decisions are about education or budget, because the system operates from taxes and there will come a time when the district will have to generate
revenues and maybe it is necessary to return to basics to better understand this. He asked the board to carefully reconsider this proposed change.

Edgar Rogers, 1974 graduate of Booker T. Washington and now with a local motion picture production company, is in the process of getting Booker T. Washington on the National Registry of Historic Places. He shared with the board the copy of a letter required from the CPSB stating that the Board is aware that he is pursuing this project. He said it will not cost CPSB anything and is only a designation of the historic nature of Booker T. Washington High School. He said there is a national team organized to work on this and make certain it is done in a professional manner. Having received a letter from the president of the board, the state responded that it was not quite what they were requesting, and this revision will meet that specification.

CPSB REDISTRICTING PLAN

Superintendent Dawkins introduced Dr. Gary Joiner who shared with the board those plans for the CPSB that have been developed since the Caddo Parish Commission adopted their plan, CPSB’s point of beginning. He reminded the board that the Commission adopted Plan 9, a plan that will not work for the school board because it places multiple members in some districts. Dr. Joiner explained that the difference between Plan 10 and 13 and 14 are Districts 5, 7, 10, 11 and 12 are identical plans. Plans 11 and 12 are interim plans; however they are viable plans and all have their own differences and all reflect board input. Further, if Plan 13 or 14 is selected, a letter from the Department of Justice is required explaining that Districts 1 and 12 are beyond the 5% variance. He announced that the total deviation is 10.44% as opposed to 10%. Plans 10, 11 and 12 are below the 10% and beyond that, it is the board’s preference. He said the question was raised prior to today’s meeting if two precincts can be swapped (Precincts 138 and 166) and it is this way in Plans 10 and 11 and this option brings the variance below the 10%.

Ms. Priest stated that in working with the census, one of the things they know is that every 10 years political subdivisions must do a redistricting plan. When the board votes on the voting precincts, it will be the precincts for the next 10 years. Ms. Priest said her concern is it is important that the board be extremely careful when other political bodies, especially when the State Legislature begins gerrymandering, begin to attempt to suit political purposes, because it can cause problems. She said she would hate for the CPSB to move into gerrymandering, and reminded everyone that the board’s main focus should be a redistricting plan and staying within the variances and differentials required for each district. Ms. Priest said each member of the board had to give something up or take something into their district and clarified that the redistricting plan and attendance zones are two different plans and she believes this has been confusing. She encouraged the board to come together on this.

Mr. Rachal asked about the total population in District 9 in the last census and what it will be now? Dr. Joiner said that District 9 has a population in all the plans presented of 21,929, and the ideal number is 21,247, which is well within the range required. Mr. Rachal asked what was the previous number? Dr. Joiner said he did not have the current plan; but, District 9 was 30% high. Mr. Rachal reiterated his comment when this process began months ago that it would be nice if the board began with a blank piece of paper and have Dr. Joiner draw what the board would perceive to make sense. With there being obvious guidelines at the Federal and State levels, and too much change at the Parish Commission level, it makes it difficult for the CPSB’s process. He said he would like to believe that those in another district than his, he only hopes that they feel like he represented them well and understand that this change is only the nature of the beast and must be done. Mr. Rachal asked that the superintendent and staff, once a plan is approved, to get the information out to the public via the local news media.

Ms. Trammel said in talking about the voting districts and not the attendance zones, the board is deciding on their individual voting districts. Ms. Trammel’s question was answered in the
affirmative, and Ms. Trammel said she is confused. Ms. Priest said today the board is voting on a map to redistrict voting precincts. This has already been considered by the City Council, and the Parish Commission, and today the board is considering the reapportioned voting precincts for the next 10 years. She further explained that precincts are determined on population and the shifts in population in Caddo Parish. At this time, with the majority of growth in Mr. Rachal’s district, Mr. Rachal became the major donor.

Mrs. Crawley asked President Riall to read the petition circulated in which it was clearly stated that they are not confused about what is happening today, but they are saying they want their voting district to be the same as the district in which their children attend school. She said not everyone in the parish can have this; however, if a student is already there and it is not an absolute necessity, then don’t change it.

Mrs. Armstrong moved, seconded by Mr. Hooks, that the CPSB approve Map 15 to be created using data on Map 13 and changing precinct 166 to SB District 2 and precinct 138 to SB District 1.

Mrs. Armstrong stated that in the discussion, it appears that all board members are donors and it seems to be the most practical plan to have as close to what was already in place. She encouraged the board to support this map with the noted change and move forward.

Mrs. Bell made a substitute motion, seconded by Miss Green, to postpone action on the redistricting plan to the April CPSB meeting.

Mrs. Bell said she brings this motion because rather than amending the plans, it appears there are some issues with various areas and she would like to address the issues presented and bring forth a plan that is agreeable with all board members. She also encouraged the cease of giving out misinformation, because some speakers referenced they want their children to continue to attend Byrd and this has nothing to do with attendance lines and where students attend school. Mrs. Bell said because Dr. Joiner indicated there is still time, she would like to see all questions and issues resolved and one map brought forth that everyone is in agreement with.

Miss Green apologized to fellow board members for those things in the plans that she did not understand and she agrees with Mrs. Bell’s comments and that waiting until April will allow time to get these issues corrected.

Mr. Pierson said he believes those things that concern him have been spoken. He stated that when he ran for the School Board, and for the Commission, he based his candidacy on honesty and integrity, and that those he serves will get the best and most truthful information. He said he believes there are some people who were deceived and are worried about where their children will go to school, and were deceived to think that because another representative would represent them since they would be in District 3 rather than District 4, which is far from the truth. Mr. Pierson said he hopes they understand this is not the case and everyone has to give or take based on the population and no one is guaranteed anything. He added that the issue will be between District 3 and 4, because District 4 wants to remain as it is and give District 3 a small peninsula where he knows that those in that peninsula will have the same issues as those in Stoner Hill and Anderson Island, if they want their children to attend the same school that their school board representative is in. If so, do we have to come back and make it like they want it or does the board look at making the numbers in accordance with the appropriate variances, and who represents a precinct may change, but where the children attend school will not change. Mr. Pierson noted an email that he received from an Anderson Island resident and he responded to issues by saying that while he is elected by a district, he represents every child in Caddo Parish, and he has no picks and chooses since the decisions made by the board affect the entirety of
Caddo Parish schools; and if there are board members that don’t feel that way, then the board has a long way to go.

Mr. Ramsey moved, seconded by Ms. Priest, to call for the question on all motions on the floor. Vote on the motion to end debate carried unanimously.

Vote on the motion to postpone carried with Board members Riall and Crawley opposed and Board members Green, Pierson, Hooks, Trammel, Priest, Crawford, Rachal, Ramsey, Armstrong and Bell supporting the motion.

**Adjournment.** Mr. Rachal moved, seconded by Mr. Ramsey, to adjourn. Vote on the motion to adjourn carried and the special session adjourned at approximately 5:30 p.m.

_________________________________  _________________________________
Dr. Gerald D. Dawkins, Secretary   Steve Riall, President
March 6, 2012

The Executive Committee of the Caddo Parish School Board (CPSB) met in regular session in its office at 1961 Midway Street, Shreveport, Louisiana, at approximately 5:48 p.m. on Tuesday, March 6, 2012 (following the special session) with President Steve Riall presiding and Dottie Bell and Larry Ramsey present being a quorum. Other school board members present were Jasmine Green, Carl Pierson, Charlotte Crawley, Curtis Hooks, Mary Trammel, Lillian Priest, Bonita Crawford, Barry Rachal, and Ginger Armstrong. Also present were Superintendent Gerald Dawkins, Legal Counsel Reginald Abrams, staff and other visitors. The prayer and Pledge of Allegiance were omitted.

ESTABLISH THE AGENDA FOR MARCH 20, 2012 CPSB MEETING

Superintendent Dawkins presented the proposed items for the board’s consideration at the March 20, 2012 CPSB meeting and the following discussion ensued.

2004 Bond Projects. Dr. Dawkins explained that any savings/funds remaining from the 2004 bond issue are to be used for lighting retrofits. Steve White added that the projects being recommended as a result of the savings from the last series of bond projects (finishing of air conditioning projects) and with $690,000 under budget, it will allow three additional schools lighting retrofit projects to be completed and only three schools remaining to be completed. Mr. Rachal asked if it is possible to postpone this item since there are some other things coming to the board. Dr. Dawkins said at this time, he believes we will know additional information before the board votes.

Critical Capital Projects. Steve White explained that these are capital projects performed each year at request of the schools and staff is recommending these projects for the coming year along with the design professionals for each of those projects.

Mrs. Crawley asked if staff is working on the Byrd parking lot situation? Mr. White explained that staff is working on this; however he does not know if it is the solution expected. He said the cost for resurfacing the student parking lot is $200,000-$300,000 and the asphalt parking lot also needs resurfacing; and at this time, the new student parking lot is not in capital projects. Mrs. Crawley said that causes major heartburn for the community. Superintendent Dawkins responded that staff is looking at options that might be available. Mrs. Crawley also asked Dr. Dawkins if he was aware that when the Southwest Appraisal Team visited Byrd to do an evaluation, they noted that it was unsafe and that the parking was a major safety factor, so she is still looking for a solution to this for the students’ safety.

Ms. Priest requested that staff provide a spreadsheet with information beyond the name of the designers to include what they may have done in order to insure that their employees are reflective of the community, etc.

Mr. Rachal noted there are many line items with a lot of money and he notes there are a number of schools listed with building controls and he would like to know what type of building controls. Mr. White responded that they are primarily HVAC controls that are computer generated and internet accessible and staff can receive notifications relative to lighting problems, if elevators are functioning properly, etc. and is similar to what is installed at Donnie Bickham. He said it also allows staff to check individual room temperatures when there is a complaint, to assess problems that may need addressing, as well as energy savings as outlined in the Parsons Study. At this time, the five schools with the worse energy systems are scheduled to be addressed; and at this time Byrd is also scheduled to be addressed but it needs more work beyond the others, i.e. getting upgraded HVAC system. Mr. Rachal asked if this is along what he began requesting approximately five years ago and if it has any impact on options in the future for a
complete RFQ for energy conservation throughout the district? Mr. White said it is along the lines of his request and staff has looked at several options for energy conservation savings and staff believes this option is the best option at this time, with the Caddo Parish School System recouping all the savings. Mr. Rachal asked if the controls being put in are being placed on systems funded out of the 2004 bond issue. Mr. White said it is strictly controls for those units and not replacing any air conditioning equipment; however, some of the schools had air conditioning units and the 2004 bond issue was designated for replacing window units and areas that were not air conditioned. For example, Captain Shreve had an existing chiller/boiler package and it has not recently been renovated and part of the package in adding these controls will be to pull the existing equipment, clean the coils and make certain it is running at peak efficiency, and if there is any indication that any part of the equipment is in eminent danger of failure, then these things will be corrected during the project, but it is not a wholesale replacement of equipment. This is only to replace controls and to give a non-proprietary type control that will continue to operate if units have to be replaced. Mr. Rachal asked if the systems replaced with the bond issue funds were replaced with these type controls? Mr. White said they were not, but a manual control with on-off and manual override, and these will not be removed and discarded. Mr. Rachal noted his understanding of the savings, but asked if it really costs $500,000? Mr. White responded that the $500,000 is the complete package and includes pulling equipment, replacing valves as needed, making sure the equipment is running properly and efficiently and that we are getting the peak energy savings possible. Mr. Rachal asked about the furniture and equipment and the number of different budgets from which these type purchases are made? Mr. White said although it is listed as furniture and equipment, the majority of it is equipment and about $300,000 of the amount is handled by Purchasing for furniture, a majority being Information Technology equipment. Regarding IT, Mr. Rachal asked if there a long-term plan for this so we are not band aiding this? Mr. White explained that while he cannot answer that question, but maybe IT can, he does know that the IT data infrastructure is being funded by the QSCB dollars, with all high schools, middle schools and K8 schools being completed. It is anticipated that all the elementary schools will be completed over the next two years.

Miss Green asked Mr. White about the foundation problem at Pine Grove, and Mr. White explained that with the drought we experienced last year, one side of the wing is landscaped and watered significantly, but on the other side of the building, there is no landscaping and no attempt to water that area. As it dried out with the drought, the clay as it dried and settled resulted in the building settling and causing cracks in the walls. Staff is proposing a foundation stabilization whereby pipes are placed in order to flood (reverse French drain system) to keep the clay saturated and as the foundation/building moves back into place, the cracks can be repaired. Miss Green asked if this is similar to the problem experienced at Northside and Steve White said it is. She also asked Mr. White how many years does he believe it will be before it happens again, and Mr. White responded it should be a permanent solution since this solution is creating a well that will hold an amount of water below the ground and the holes in drain will provide moisture back into the ground. Miss Green asked about Phase II of the paving project at Green Oaks. Mr. White responded the parking lots on the East and West have been repaired and this will be the bus loop that is faulting and separating. Miss Green asked if it will be done over the summer and Mr. White said that is correct.

Mrs. Crawford asked if that is the same thing that will be done at Arthur Circle’s foundation? Mr. White said it is. Mrs. Crawford asked about Title IX at Captain Shreve? Mr. White explained that it is bringing the girls locker room up to par with the boys’ locker room. Mrs. Crawford also asked about the guillotine windows in the new wing at Byrd and Mr. White responded that he understands it was a lack in design on the spring that holds the window up and staff can look at a retrofit to the windows that will correct this situation. He further explained that the lips are attached to the framing and then the brick is laid over it, so if we replace with a similar window, all the brick would need to be pulled off, thus staff is looking for a fix for the windows and will bring to the board a recommendation for fixing all the windows.
Ms. Trammel asked Mr. White about the concrete covering at Woodlawn and how it will be covered. Mr. White responded that this was a request from the school as a result of the consolidation of the 7th and 8th grade, and they are recommending placing an aluminum covering over the concrete and give the place for ROTC drills in inclement weather. Ms. Trammel also noted that in humid, damp weather, there is also a problem with the concrete sweating, and this causes some dangerous slippery situations for students. Mr. White said there are numerous locations in the parish with this scenario and it is a result of the type finish that is used on the concrete.

Mrs. Armstrong asked Mr. White about the salaries and benefits for the Construction Department and noted that she asked the question a number of years ago relative to project managers. She said staff reported that when the work was complete on the buildings, then there would no longer be a need for project managers. She asked if these employees can be used for these type capital projects even though we are not building buildings at this time, and that these positions are still needed? Mr. White said the department has lost one construction supervisor that has not been replaced, and at this time there are two project managers and two construction managers, as well as two secretarial. He noted that anytime there is construction to this scale, it is important to provide adequate staff to cover monitoring this. Mrs. Armstrong asked if the salaries and benefits cover the entire department? Mr. White responded that the entire department has been moved into Capital Projects and out of General Fund, and it is allowed by supervision of these projects, both in the capital projects fund and what has moved forward under the Capital Construction Bond Issue and the QSCB. Mrs. Armstrong asked if she understands the department staff consists of himself, two project managers, and secretarial. Mr. White said that is correct.

Renaming Wing B at Shreve Island for Dr. Kerry Laster. Mrs. Crawford explained that she is asking that a resolution be submitted for this item. Mrs. Crawford said she is collecting information from the school for inclusion in the resolution and a proposed resolution will be submitted for consideration.

Compensation for K-8 Administrators. Dr. Dawkins stated that staff has received a recommendation from Jeff Rahmberg and staff is currently assessing and will provide a recommendation to the board. Mrs. Armstrong asked the superintendent if this compensation is from the General Fund and will they be compensated to at least the same rate as the middle school administrators. Dr. Dawkins explained that recommendation is what the board members are looking at the current time. Ms. Priest stated that a memo was submitted on January 20, 2012 that was a response from Rahmberg, Stover and Associates saying they prepared the response addressing concerns expressed by K8 principals regarding the new salary schedule. His response also included that while they understood the concerns expressed, the proposed salary for K8 principals is consistent with the market. She further elaborated on Mr. Rahmberg’s response to say they believe what is in place is appropriate for building administrators. At this time, Ms. Priest said her concern is the District went through a compensation study and anyone can come forth and say they are not being compensated fairly and asked if anything was received from the K8 administrators or did HR receive anything relative to grievances on this matter. Dr. Dawkins said that HR did receive a formal request from these administrators and information received outlined everything by Rahmberg; and is why staff is reviewing this information very closely. Ms. Priest asked if anything has changed since January 20, 2012? Superintendent Dawkins said there is an appeal process and Mr. Rahmberg is the third party administrator and nothing has changed on the schedules; however employees do have the right to an appeal and staff will bring a recommendation.

Mr. Hooks asked if he understands correctly that Mr. Rahmberg looked at this and realized it was a mistake? Dr. Dawkins said Mr. Rahmberg looked at it and said he would like to reconsider it.
Proposed Revisions to CPSB Policy GBCB-R Staff conduct – Notice of Criminal Proceedings. Dr. Dawkins explained that this revision is a result of state law regarding employees reporting criminal proceedings to the employer. Mr. Abrams explained that this was on the agenda last month and was approved by mistake, pulling the wrong item from the agenda (request for hearing under GBCB-R). He said another proposed revision was suggested to him whereby other employees would be included in the revision; and since it was not done in time, he asked that it be postponed and the other agenda item was actually postponed. He shared the additional revision to add a line that if a school board employee is driving a school board owned vehicle, this information must also be reported to their immediate supervisor. Mrs. Bell asked Mr. Abrams if Human Resources is responsible for doing background checks? Mr. Abrams responded that is correct; and this item is relative to the policy that stipulates if an employee is arrested for any crime, then it must be reported within five days. The Legislature passed legislation that went into effect January 1 that says if an employee is convicted of certain crimes (child molestation, carnal knowledge, etc.), they must be reported within 24 hours. Because the list was so long and Caddo had a policy for five days, this policy will require an employee to comply with the statute which includes everything. Mr. Abrams further explained that relative to Transportation, Caddo’s policy had a revision that violations did not have to be reported that were minor traffic violations; however bus operators did have to report these. The question was asked about employees driving other school board vehicles and a board member asked that this verbiage be added to the policy.

Approval to Begin the Process of Applying for Green Cards for Eligible International Teachers. Mrs. Crawley asked if this is different than the H1B visas and is a step toward something more permanent? Dr. Dawkins said it is and referred to Mr. Abrams for a further explanation. Mr. Abrams explained that H1B visas are basically where the District made a decision to address shortages of certified teachers in areas where there was a need. He also stated there are employees who are interested in obtaining a Green Card and have met with administration. Caddo desires to use as many as possible and also noted that the issue with the Department of Labor has been resolved and approximately $400,000 has been set aside for any possible Green Cards. He added that legal fees are not included in this amount, but he believes since they were designated, they can be used for a portion of this expenditure and set aside to do so.

Mr. Ramsey stated his impression that Caddo is moving forward in this process and Mr. Abrams responded that staff has for the last several years followed a process that most would want to go through the Green Card process; and now that Caddo has its own attorney on board to deal with immigration, Caddo knows that we should be paying the District’s portion of the fees and when the Board receives requests that they are interested in staying and they need their Green Card to continue their employment, then it can be a process completed all at one time. Mr. Ramsey asked about the cost per person and Mr. Abrams said he does not have a cost per person at this time, and is why he is suggesting that funds in that reserve be earmarked to pay for Caddo’s portion, which could possibly be in excess of $1,500 per teacher. Mr. Ramsey asked Mr. Abrams if he foresees any problems in getting approvals and Mr. Abrams said he could not say what the Immigration Services will do, and no one can be guaranteed a Green Card. Because of massive teacher layoffs in various areas, Mr. Abrams further stated the shortage in the United States is not near what it has been in the past. Mr. Ramsey asked if whatever support the CPSB offers will be a plus for these teachers? Mr. Abrams said he believes the Board’s support will be good and if the Board does support, we can move forward.

Mrs. Armstrong asked about the period of time in which they will be eligible to continue in the country once they have a Green Card, and how long does it take to get a Green Card once the process begins? Mr. Abrams responded he does not know how long, and it could take several years; however, it does help them remain in the United States during the process; and once they
get permanent status, they also no longer have to stay with Caddo Parish. But, as long as they are being sponsored by Caddo, they will stay with Caddo. Mr. Abrams also explained that when they receive a Green Card, they have permanent status; and if they choose, the next step would be citizenship. Mrs. Armstrong asked if the Board’s Immigration Attorney has changed? Mr. Abrams explained that the Board approved RoShonda Rhodes with Immigration Services when she applied during the last RFP process for legal services. Her rate is approximately $100 an hour less than the previous attorney in Austin. Mr. Abrams added that Mark Murov is still used for the H1B Visa status since he has dealt with these for us in the past and will make sure they remain current, but he will not handle the Green Cards.

Mr. Rachal asked if the legal fees could differ from one to another? Mr. Abrams said absolutely and there are different circumstances, i.e. when they apply, differences in areas of specialty, etc. He further explained there is a difference in the employer’s fees (which are mainly upfront fees) and the fees that the employee is responsible for paying. Mr. Rachal asked if there will be any changes in the employer’s portion, and Mr. Abrams explained that it will be based upon what services are required and are necessary for the attorney to do in the three to four step process. Mr. Rachal asked if additional guidelines need to be included specifying what the costs include so that the Board does not incur what could be an enormous amount in fees and some more than others? Mr. Abrams further explained that the attorneys work at $175 an hour and once an attorney has begun the process, we must move forward. He said he does not expect the Board will incur extraordinary expenses associated with this, but he can provide the Board with quarterly reports relative to the expenses, etc. He also reminded the Board that it has already invested a lot in the H1B Visas and he doesn’t believe what is required now for the Green Cards will be as much as the H1Bs, and there is a reserve that was set aside for the labor dispute that can be used. Mr. Rachal asked how much is left in the reserve and Mr. Abrams responded he believes it is in the neighborhood of $300,000 plus. Mr. Lee said while we began at $400,000, he doesn’t believe more than $50,000 was spent. Mr. Rachal asked if we will be doing 30 at a time, and Mr. Abrams said we will not because it is based upon time and expiration and it would be impossible for the attorney to do this many at one time, and there will not be one big bill. Mr. Rachal asked who will do the negotiations in this effort and hopefully get additional money from what is anticipated? Mr. Abrams responded that the attorney has been hired. Mr. Rachal asked if there is not any negotiation if the volume appears higher than originally anticipated? Mr. Abrams said initially when someone applied, it was understood that there could possibly be a number of Green Cards and the Board went from $300 an hour to $175 an hour and the attorney knew of this potential up front. Mr. Rachal asked if through this process is it within the law to ask for any commitments from those that we sponsor? Mr. Abrams said that is something the Board cannot do.

For the record, Dr. Dawkins noted that the principals have been unanimous in their support of working with the Filipino teachers and that they have brought great value to Caddo’s schools and we do appreciate and support moving forward with this.

**Confirm Administrator of the Caddo-Shreveport Sales & Use Tax Commission.** Mr. Ramsey asked if this is a full-time job/appointment? Mr. Lee responded it is and it was a unanimous decision by all on the committee, which included himself and Jeff Howard.

**General Fund Budget Revision.** Mr. Rachal asked if board members could receive the details on the additional expenditures ($834,000) added since the current budget was approved. Mr. Lee referred to the page following which gives additional details of these expenditures.

**Revision 2012-13 CPSB Calendar.** Mr. Ramsey noted the revision to the calendars to complete the first semester before Christmas. Superintendent Dawkins stated that staff met with the representatives from the various organizations, and Kathy Gallant explained that after looking at the many requests that came in, it is being proposed to move the start date to August 13th/two
days earlier than originally proposed), and this will allow the first semester to end before Christmas. Mr. Ramsey asked about the changes in testing dates impacting the end date for the 12-13 calendar, and Mrs. Gallant explained that Spring Break was the week before testing which makes it very difficult to insure that everything is in place for the testing, so it is recommended that Spring Break be changed to March rather than April in order to allow for the preparation time. Mr. Ramsey asked if consideration was given to moving it further back? Mrs. Gallant explained there are additional testing dates (Phase I in March and Phase II in April) and this basically ties the District’s hands to change it. Mr. Ramsey stated he believes it actually goes back to the argument of how much class time can students get in prior to testing and Mrs. Gallant responded that as much as possible. She also explained that the 2013-14 mirrors the 2012-13 calendar and reminded everyone that election year requires the schools to be closed on election day and this (coupled with an additional day for Fall Break) actually gives the students a four-day weekend. She also said this does not happen in 2013; however, both calendars presented complete the first semester before Christmas and the second semester is completed prior to Memorial Day. Mr. Ramsey stated his appreciation for this recommendation and he supports it.

Mrs. Bell asked if the End of Course Test is replacing the Graduate Exit test? Mrs. Gallant said it is for this year; and the State is looking to change it next year. Rosemary Woodard explained that the End of Course (EOC) testing calendar is set by the State and is the window for testing. She said in December on the AB Block schedule, only retesters are tested.

Dr. Dawkins asked that staff be allowed to add the 2013-14 school calendar to this agenda item for the board’s consideration.

**Locally Initiated Elective for Film Studies II.** Mrs. Crawford reminded the Board that once this elective is approved by the Board, it can be offered to students in any of Caddo’s schools. She also said she believes with all the films being made in the Shreveport area, it will do the District well to make certain that Caddo students who have the skills to work in this industry are afforded the opportunity to take advantage of it. Mrs. Bell asked if this is the same thing BTW is offering and has offered in the past through its Telecommunications Program? Mrs. Woodard said this is an Enriched course and is slightly different; however as soon as it is approved, BTW can add it to their program.

**Revision to A.C. Steere Lease.** Mrs. Crawford stated that this is something that has been discussed for a number of years and she believes it is her responsibility to share with the Board that there are some concerns since it is located on the school’s playground. She further stated that Mr. Abrams indicated the City (who will cover the cost) will work with Caddo to make certain that the grounds remain safe for Caddo’s students. Mrs. Bell stated that she understands; however, since this playground is part of a City park, there are a lot of people that will use it. Mr. Abrams explained that the City will have the lease and will be responsible for the liability on this facility. He also explained the City will use some bond money to get it completed. Steve White verified the recommended location for the proposed restroom on the A.C. Steere campus. Mrs. Crawford stated that when designed, she only wants to make sure that the students’ safety is foremost in the decisions. Mr. White said he has not seen the design at this time. Mr. Pierson asked if this lease is an extension of the original 99 year lease? Mr. Abrams indicated that he believes the original lease has been extended. Mr. Pierson asked if the school will have access to this facility as it does the open-air gym? Mr. Abrams stated he is uncertain, because the City attempted to implement an agreement relative to how the School System could use the facility (which was never executed), and this restroom will be a public restroom which the School System should have access to. Mr. Pierson stated that even though the facility will be theirs, there are other facilities that belong to the City, yet there are restrictions on when they could be used, especially with it being on the school campus. Mr. Abrams said he understands this will be a part of the park area and it is a distance away from the school and will look more like the park. Mrs. Crawford confirmed Mr. Pierson’s remarks and that there are signs located in the park area
that it is closed until 3:30 (during the school hours) and then it is open to the public. Mr. Abrams added that he will send something to the City Attorney to make certain that this provision is included in the agreement (similar to the playground). Mrs. Crawford shared problems that the school has encountered with the park being on the campus and that guidelines need to be in place similar to the playground. Mrs. Crawford left the meeting at approximately 7:12 p.m.

Mr. Hooks asked who will monitor the safety of the children? Mr. Abrams responded that during the school day, Caddo Parish Schools will be responsible for monitoring the students. After hours (school hours), we have an agreement that the City is responsible for security for the park. Mr. Abrams indicated that he knows we do not put security at the park. Mr. Hooks said he knows this is for the good of the children, but some will not see it this way, and it really needs to be monitored closely for the children’s safety.

**Approve the Transportation Audit Report.** Mr. Ramsey stated that the board members have received the report and will be the backup, and he will be asking the Board to approve the recommendations of the Internal Audit.

**Approval of Resolution of Assignment of Oil and Gas Lease.** Mr. Abrams explained this resolution is the same one passed by the Board in January and the company submitting the resolution had an error in the resolution. The resolution presented in March for Board action corrects the error and needs Board approval.

**Request for Hearing in Accordance with CPSB Policy GBCB-R.** Mr. Abrams explained that this hearing is a claim of retaliation and the Board will make a decision as to whether or not it will hear it or accept staff’s recommendation.

**Approval of Request for Moving Forward to Place BTW on National Registry of Historic Places.** Mr. Pierson requested that the Board move forward with the request to support placing Booker T. Washington on the National Registry of Historic Places.

### REQUESTS

Mr. Hooks asked that staff provide him with a comparison of what is spent on capital projects/construction versus instruction.

Mrs. Bell asked staff to provide a report on a possible four-day school week and what savings the District might see if we went to a four-day week.

Mrs. Armstrong asked to move forward in establishing a definitive plan for scheduling classes for the next school year. She stated there is too much negativism with the current AB Block schedule and she believes that schools and teachers need to know what the schedule will be for next year so they can begin to plan. Dr. Dawkins noted this is a legitimate request and staff is currently working on this.

Ms. Trammel asked for staff to provide her information on who teaches penmanship to students? She said from the handwriting she has observed, it appears they are not being taught how to write.

### CONFIRM THE AGENDA AND CONSENT AGENDA FOR THE MARCH 20, 2012 CPSB MEETING

President Riall announced that items 7.02-7.03, 8.03-8.14 and 8.17 are the consent items. *Mrs. Bell moved, seconded by Mr. Ramsey, to approve the proposed agenda and consent agenda for the March 20, 2012 CPSB meeting as presented. Vote on the motion carried unanimously.*
Superintendent Dawkins stated that adjustments for the MFP were received last week from BESE and shared with the Board an analysis on what is different this year - $1.4 million in additional costs that will be borne by the local school district. In addition to budget deliberations, he believes a time needs to be set aside to further discuss this. Mr. Lee reported that the comparison of current year’s MFP with what is being proposed for next year and it is being reduced by approximately $4 million. He noted those items totaling $1.5 million that the local district will have to cover that it has not covered in the past will include Virtual Type II Schools, a special school district, Louisiana School for the Deaf and Visually Impaired, Louisiana School for Math-Science and the Arts and will be added to the MFP formula. Mr. Lee noted that some of the things are normal, i.e. $2 million of the $4 million reduction is due to local wealth (sales tax, property taxes increased).

Dr. Dawkins indicated there are questions about the legality of this move and Board members will hear more about the MFP.

Mr. Rachal said he believes the Board needs to add to the agenda a resolution to the Legislators pointing out this information, because he believes it is crucial that the local Board protest what is happening and fight back, letting the Legislative Delegation know where the local School Board stands.

*Mrs. Bell moved, seconded by Mr. Ramsey, to add to the agenda an item “Approval of Resolution on March 20, 2012 to the Legislative Delegation Opposing Unfunded Mandates”. Vote on the motion carried.*

Mr. Rachal asked if the increase/decrease (dollar for dollar) on how the local revenue affects the MFP? Mr. Lee explained it is a complicated formula; but they basically take Caddo’s overall tax base (property and sales tax) and determine. Mr. Rachal asked for clarification and if we go up a $1.00, does the state increase it by 20 cents? Mr. Lee responded there is no response for this, but when you have increased revenue from the same existing base, it affects the District, i.e. dollars from the Haynesville Shale.

President Riall asked that Board members contact staff members listed by the agenda items in an effort to streamline the regular meeting.

Mr. Riall announced that the next budget work session will be held from 11:00 a.m. to 1:00 p.m. on Tuesday, March 13, 2012 in the boardroom.

*Adjournment. Mrs. Bell moved, seconded by Mr. Ramsey, to adjourn. Vote on the motion to adjourn carried* and the meeting adjourned at approximately 7:46 p.m.
March 13, 2012
